CONSTRUCTION  
**NOTICE OF AWARD**

Dear Contractor:

You are hereby awarded the above referenced contract based upon your bid in the amount of \$139,800,000.00 submitted at the bid opening on November 20, 2012. Within ten (10) days of your receipt of this notice of award, you are required to take the actions set forth in Paragraphs (1) through (3) below. For your convenience, attached please find a copy of Schedule A of the General Conditions to the Contract, which sets forth the types and amounts of insurance coverage required for this contract.

- (1) Execute four copies of the Agreement in the Contracts Unit, 30-30 Thomson Avenue, 1<sup>st</sup> Floor, Long Island City, New York (IDCNY Building). A Commissioner of Deeds will be available to witness and notarize your signature. The Agreement must be signed by an officer of the corporation or a partner of the firm.
- (2) Submit to the Contracts Unit four properly executed performance and payment bonds. If required for this contract, copies of performance and payment bonds are attached.
- (3) Submit to the Contracts Unit the following insurance documentation: (a) original certificate of insurance for general liability in the amount required by Schedule A, and (b) original certificates of insurance or other proof of coverage for workers' compensation and disability benefits, as required by New York State Law. The insurance documentation specified in this paragraph is required for registration of the contract with the Comptroller's Office.

On or before the contract commencement date, you are required to submit all other certificates of insurance and/or policies in the types and amounts required by Schedule A. Such certificates of Insurance and/or policies must be submitted to the Agency Chief Contracting Office, Attention: Risk Manager, Fourth Floor at the above indicated department address.

Your attention is directed to the section of the Information for Bidders entitled "Failure to Execute Contract". As indicated in this section, in the event you fail to execute the contract and furnish the required bonds within the (10) days of your receipt of this notice of award, your bid security will be retained by the City and you will be liable for the difference between your bid price and the price for which the contract is subsequently awarded, less the amount of the bid security retained.

Sincerely,

Lorraine Holley  
DACCO

**Section II: General Contract Information****1. Define the industry in which work is to be performed.**

- **Construction** includes all contracts for the construction, rehabilitation, and/or renovation of physical structures. This category does include CM Build as well as other construction related services such as: demolition, asbestos and lead abatement, and painting services, carpentry services, carpet installation and removal, where related to new construction and not maintenance.
- **Professional Services** are a class of services that typically require the provider to have some specialized field or advanced degree. Services of this type include: legal, management consulting, information technology, accounting, auditing, actuarial, advertising, health services, pure construction management, environmental analysis, scientific testing, architecture and engineering, and traffic studies, and similar services.

**a. Type of work on Prime Contract (Check one):****b. Type of work on Subcontract (Check all that apply):**

☒ **Construction** ☐ **Professional Services** ☒ **Construction** ☐ **Professional Services** ☐ **Other**

**2. What is the expected percentage of the total contract dollar value that you expect to award to all subcontracts?**

80 %

**3. Will you award subcontract(s) in amounts below \$ 1 million for construction and/or professional services contracts within the first 12 months of the notice to proceed on the contract?**

☒ **Yes** ☐ **No**

**Section III: Subcontractor Utilization Summary**

**IMPORTANT: If you do not anticipate that you will subcontract at the target level the agency has specified, because you will perform more of the work yourself, you must seek a waiver of the Target Subcontracting Percentage by completing p. 9).**

Step 1:	Subcontracts under \$1M (4) (construction/professional services)	Total Bid/Proposal Value	Calculated Target Subcontracting Percentage
Calculate the percentage (of your total bid) that will go towards subcontracts under \$1M for construction and/or professional services	14,000,000	\$ 139,800,000	10 %

- **Subcontracts under \$1M (construction/professional services):** Enter the value you expect to award to subcontractors in dollars for amounts under \$1 million for construction and/or professional services. This value defines the amount that participation goals apply to, and will be entered into the first line of Step 2.
- **Total Bid/Proposal Value:** Provide the dollar amount of the bid/proposal.
- **Calculated Target Subcontracting Percentage:** The percentage of the total contract dollar value that will be awarded to one or more subcontractors for amounts under \$1 million for construction and/or professional services. This percentage must equal or exceed the percentage listed by the agency on page 1, at line (1).

**NOTE: The "Calculated Target Subcontracting Percentage" MUST equal or exceed the Target Subcontracting Percentage listed by the agency on Page 6, Line (1).**

Tax ID #: 22-2433095

PIN#: 8502013TR0001C

## SCHEDULE B - cont.

Step 2:

Calculate value of subcontractor participation goals

Subcontracts under \$1M  
(construction/professional services)

1. Copy value from Step 1, line (4) – the total value of all expected subcontracts under \$1M for construction and/or professional services

\$ 14,000,000

2. \* From line a. above, allocate the dollar value of "Subcontracts under \$1M" by Construction and Professional Services,

Construction

Professional Services

- \* If all subcontracts under \$1M are in one industry, enter '0' for the industry with no subcontracts.

- \* Amounts listed on these lines should add up to the value from line a.

Subcontracts under \$1M by Industry \$ 14,000,000

\$ N/A

- \* For Construction enter percentage from line (2) from Page 6.

- \* For Professional Services enter percentage from line (3) from Page 6.

- \* Total Participation Goals Percentages must be copied from Part I, lines (2) and (3).

Total Participation Goals x 50 %

x %

3. Value of Total Participation Goals

\$ 7,000,000

3:

☒ Subcontracts in Amounts Under \$1 M Scope of Work – Construction

Waterproofing, Dampproofing, Fencing, Paving, reproofing, Sealants, Tile, Glass & Glazing, Overhead Doors, Louvers & Other MEP, Site and Architectural Trades.

☒ Subcontracts in Amounts Under \$1 M Scope of Work – Professional Services

N/A

## Section IV: Vendor Certification and Required Affirmations

I hereby 1) acknowledge my understanding of the M/WBE requirements as set forth herein and the pertinent provisions of Local Law 129 of 2005, and the rules promulgated thereunder; 2) affirm that the information supplied in support of this subcontractor utilization plan is true and correct; 3) agree, if awarded this Contract, to comply with the M/WBE requirements of this Contract and the pertinent provisions of Local Law 129 of 2005, and the rules promulgated thereunder, all of which shall be deemed to be material terms of this contract; 4) agree and affirm that it is a material term of this contract that the Vendor will award subcontract(s) sufficient to meet the Target Subcontracting Percentage, unless a waiver is obtained, and the Vendor will award subcontract(s) sufficient to meet the Total Participation Goals unless such goals are modified by the Agency; and 5) agree and affirm, if awarded this contract the Vendor intends to make all reasonable, good faith efforts to meet the Target Subcontracting Percentage, or if the Vendor has obtained a waiver, the Vendor intends to meet the modified Target Subcontracting Percentage, if any, and the Vendor intends to solicit and obtain the participation of M/WBEs so as to meet the Total Participation Goals unless modified by the Agency.

## BID FORM

Prismatic Development Corporation

The above-named Bidder affirms and declares:

1. The said bidder is of lawful age and the only one interested in this bid; and no person, firm or corporation other than hereinbefore named has any interest in this bid, or in the Contract proposed to be taken.
2. By submission of this bid, each bidder and each person signing on behalf of any bidder certifies, and in the case of a joint bid each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief: (1) the prices in this bid have been arrived at independently without collusion, consultation, communication or agreement, for the purpose of restricting competition, as to any matter relating to such prices with any other bidder or with any competitor; (2) unless otherwise required by law, the prices quoted in this bid have not been knowingly disclosed by the bidder and will not knowingly be disclosed by the bidder prior to opening, directly or indirectly, to any other bidder or to any competitor; and (3) no attempt has been made or will be made by the bidder to induce any other person, partnership or corporation to submit or not to submit a bid for the purpose of restricting competition.
3. No councilman or other officer or employee or person whose salary is payable in whole or in part from the City Treasury is directly or indirectly interested in this bid, or in the supplies, materials, equipment, work or labor to which it relates, or in any of the profits thereof.
4. The bidder is not in arrears to the City of New York upon debt or contract or taxes, and is not a defaulter, as surety or otherwise, upon any obligation of the City of New York, and has not been declared not responsible, or disqualified, by any agency of the City of New York or State of New York, nor is there any proceeding pending relating to the responsibility or qualification of the bidder to receive public contracts except as set forth on the Affirmation included as page 17 of this Bid Booklet.

The bidder hereby affirms that it has paid all applicable City income, excise and other taxes for all years it has conducted business activities in New York City.

5. The bidder, as an individual, or as a member, partner, director or officer of the bidder, if the same be a firm, partnership or corporation, executes this document expressly warranting and representing that should this bid be accepted by the City and the Contract awarded to him, he and his subcontractors engaged in the performance:
  - (1) will comply with the provisions of Section 6-108 of the Administrative Code of the City of New York and the non-discrimination provisions of Section 220a of the New York State Labor Law, as more expressly and in detail set forth in the Agreement; (2) will comply with Section 6-109 of the Administrative Code of the City of New York in relation to minimum wages and other stipulations as more expressly and in detail set forth in the Agreement; (3) have complied with the provisions of the aforesaid laws since their respective effective dates, and (4) will post notices to be furnished by the City, setting forth the requirements of the aforesaid laws in prominent and conspicuous places in each and every plant, factory, building and structure where employees engaged in the performance of the Contract can readily view it, and will continue to keep such notices posted until the supplies, materials and equipment, or work labor and services required to be furnished or rendered by the Contractor have been finally accepted by the City. In the event of any breach or violation of the foregoing, the Contractor may be subject to damages, liquidated or otherwise, cancellation of the Contract and suspension as a bidder for a period of three years. (The words, "the bidder", "he", "his", and "him" where used shall mean the individual bidder, firm, partnership or corporation executing this bid).

6. Compliance Report

The bidder, as an individual, or as a member, partner, director, or officer of the bidder, if the same be a firm, partnership, or corporation, (1) represents that his attention has been specifically drawn to Executive Order No. 50, dated April 25, 1980, on Equal Employment Compliance of the contract, and (2) warrants that he will comply with the provisions of Executive Order No. 50. The Employment Report must be submitted as part of the bid.

The bidder, as an individual, or as a member, partner, director, or officer of the bidder, if the same be a firm, partnership, or corporation, executes this document expressly warranting that he will comply with: (1) the provision of the contract on providing records, Chapter 8.

7. By submission of this bid, the bidder certifies that it now has and will continue to have the financial capability to fully perform the work required for this contract. Any award of this contract will be made in reliance upon such certification. Upon request therefor, the bidder will submit written verification of such financial capability in a form that is acceptable to the department.

8. In accordance with Section 165 of the State Finance Law, the bidder agrees that tropical hardwoods, as defined in Section 165 of the State Finance Law, shall not be utilized in the performance of this Contract, except as the same are permitted by the foregoing provision of law.

9. The bidder has visited and examined the site of the work and has carefully examined the Contract in the form approved by the Corporation Counsel, and will execute the Contract and perform all its items, covenants and conditions, and will provide, furnish and deliver all the work, materials, supplies, tools and appliances for all labor and materials necessary or required for the hereinafter named work, all in strict conformity with the Contract, for the prices set forth in the Bid Schedule:

PROJECT ID: S216-399A

## BID SCHEDULE

**Submission:** Bidders are advised that the requirement to submit a Bid Schedule applies to the contract for which an "X" is indicated before the word "Yes". If required, the bidder must submit, with its bid, a completed Bid Schedule. Failure to provide a completed Bid Schedule may result in rejection of the bid as non-responsive.

    X     YES            NO

### Instructions for Preparing Bid Schedule:

- (A) The following bid prices on the Bid Schedule are to be paid for the actual quantities of the item numbers in the completed work or structure, and they cover the cost of all work, labor, material, tools, plant and appliances of every description necessary to complete the entire work, as specified, and the removal of all debris, temporary work and appliances.
- (B) In preparing its Bid Schedule, the bidder shall submit prices that include all costs for overhead and profit. Overhead shall include, without limitation, all costs in connection with the following: administration, management, superintendence, small tools, insurance, and bonds.
- (C) The Agency may reject a bid if it contains unbalanced bid prices. An unbalanced bid is considered to be one containing lump sum or unit items which do not reflect reasonable actual costs plus a reasonable proportionate share of the Bidder's anticipated profit, overhead costs, and other indirect costs, anticipated for the performance of the items in question.
- (D) The bidder shall refer to section 01270, Measurement and Payment for specific explanation of Bid Schedule Items, and Attachment C, Addendum 2 for revised Article 1.02 A) of Section 01270, Measurement and Payment.

**PLEASE BE SURE A LEGIBLE BID IS ENTERED FOR EACH ITEM.**  
**THE BIDDER SHALL INSERT THE TOTAL BID PRICE ON**  
**THE BID SCHEDULE ON PAGE 13-R OF THIS BID BOOKLET**

This affirmation must be signed by an officer or duly authorized representative.

\* Under the Federal Privacy Act the furnishing of Social Security Numbers by bidders on City contracts is voluntary. Failure to provide a Social Security Number will not result in a bidder's disqualification. Social Security Numbers will be used to identify bidders, proposers or vendors to ensure their compliance with laws, to assist the City in enforcement of laws, as well as to provide the City a means of identifying of businesses which seek City contracts.

## **BIDDER'S IDENTIFICATION OF SUBCONTRACTORS**

Project ID: S216-399A

**SUBMISSION:** In addition to its Bid (Bid Envelope # 1), the Bidder must, at the time of the bid, complete and submit this form in a separate, sealed envelope (Bid Envelope # 2). To complete this form, the Bidder must identify the subcontractors it intends to use for the work listed below, as well as the dollar amount to be paid to each subcontractor. Failure to complete this form and submit it in a separate, sealed envelope will result in the disqualification of the bid as non-responsive.

The Bidder intends to use the following subcontractors. If the Bidder intends to do any of the work referenced below with its own forces, the Bidder should complete this form using its own name. If multiple subcontractors for any trade are proposed, Bidder may submit multiple copies of this form.

1. **PLUMBING CONTRACTOR:**

4J's Plumbing  
(Print Name)

Agreed Amount To Be Paid To Subcontractor: \$ 2,193,000

2. **HVAC CONTRACTOR:**

C. D. E. Air conditioning Company Inc.  
(Print Name)

Agreed Amount To Be Paid To Subcontractor: \$ 8,000,000

3. **ELECTRICAL CONTRACTOR:**

Tru - Val Electric  
(Print Name)

Agreed Amount To Be Paid To Subcontractor: \$ 15,900,000

**BIDDER'S SIGNATURE:** The Bidder must sign this form in the space provided below:

BID BOND 1  
FORM OF BID BOND

KNOW ALL MEN BY THESE PRESENTS. That we,  
60 US Highway 46, Fairfield, NJ 07004

Prismatic Development Corp.

hereinafter referred to as the "Principal", and Zurich American Insurance Company  
300 Interpace Parkway, Morris Corp. I, Parsippany, NJ 07054

hereinafter referred to as the "Surety" are held and firmly bound to THE CITY OF NEW YORK, hereinafter referred to as the "CITY", or to its successors and assigns in the penal sum of Ten Percent of the  
Amount Bid

(\$---10%---), Dollars lawful money of the United States, for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

Whereas, the Principal is about to submit (or has submitted) to the City the accompanying proposal, hereby made a part hereof, to enter into a contract in writing for Southwest Brooklyn Marine

Transfer Station, FMS No. S216-399A

NOW, THEREFORE, the conditions of this obligation are such that if the Principal shall not withdraw said Proposal without the consent of the City for a period of forty-five (45) days after the opening of bids and in the event of acceptance of the Principal's Proposal by the City, if the Principal shall:

(a) Within ten (10) days after notification by the City, execute in quadruplicate and deliver to the City all the executed counterparts of the Contract in the form set forth in the Contract Documents, in accordance with the proposal as accepted, and

(b) Furnish a performance bond and separate payment bond, as may be required by the City, for the faithful performance and proper fulfillment of such Contract, which bonds shall be satisfactory in all respects to the City and shall be executed by good and sufficient sureties, and

(c) In all respects perform the agreement created by the acceptance of said Proposal as provided in the Information for Bidders, bound herewith and made a part hereof, or if the City shall reject the aforesaid Proposal, then this obligation shall be null and void; otherwise to remain in full force and effect.

## BID BOND 2

In the event that the Proposal of the Principal shall be accepted and the Contract be awarded to him the Surety hereunder agrees subject only to the payment by the Principal of the premium therefore, if requested by the City, to write the aforementioned performance and payment bonds in the form set forth in the Contract Documents.

It is expressly understood and agreed that the liability of the Surety for any and all claims hereunder shall in no event exceed the penal amount of this obligation as herein stated.

There shall be no liability under this bond if, in the event of the acceptance of the Principal's Proposal by the City, either a performance bond or payment bond, or both, shall not be required by the City on or before the 30th day after the date on which the City signs the Contract.

The surety, for the value received, hereby stipulates and agrees that the obligations of the Surety and its bond shall in no way be impaired or affected by any postponements of the date upon which the City will receive or open bids, or by any extensions of time within which the City may accept the Principal's Proposal, or by any waiver by the City of any of the requirements of the Information for Bidders, and the Surety hereby waives notice of any such postponements, extensions, or waivers.

IN WITNESS WHEREOF, the Principal and the Surety have hereunto set their hands and seals and such of them as are corporations have caused their corporate seals to be hereto affixed and these presents to be signed by their proper officers the 20th day of November, 2012.

MARQUIS, JR., William X. LINNEY, III, Robert B. PITTS, John J. SCIORTINO, JR., Peter H. FORENZA, Frederick E. NICHOLSON, Theresa J. FOLEY, Robert S. RAPP JR., Joseph T. CHARCZENKO and AnnMarie KEANE**, all of Branchburg, New Jersey, EACH its true and lawful Attorneys-In-Fact with power and authority hereby conferred to sign, seal, and execute in its behalf, during the period beginning with the date of issuance of this power, : **any and all bonds and undertakings, recognizances or other written obligations in the nature thereof**, and to bind ZURICH AMERICAN INSURANCE COMPANY thereby, and all of the acts of said Attorney[s]-in-Fact pursuant to these presents are hereby ratified and confirmed. This Power of Attorney is made and executed pursuant to and by the authority of the following By-Law duly adopted by the Board of Directors of the Company which By-Law has not been amended or rescinded:

Article VI, Section 5. "...The President or a Vice President in a written instrument attested by a Secretary or an Assistant Secretary may appoint any person Attorney-In-Fact with authority to execute surety bonds on behalf of the Company and other formal underwriting contracts in reference thereto and reinsurance agreements relating to individual policies and bonds of all kinds and attach the corporate seal. Any such officers may revoke the powers granted to any Attorney-In-Fact."

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the ZURICH AMERICAN INSURANCE COMPANY by unanimous consent in lieu of a special meeting dated December 15, 1998

" RESOLVED, that the signature of the President or a Vice President and the attesting signature of a Secretary or an Assistant Secretary and the seal of the Company may be affixed by facsimile on any Power of Attorney pursuant to Article VI, Section 5 of the By-Laws, and the signature of a Secretary or an Assistant Secretary and the seal of the Company may be affixed by facsimile to any certificate of any such power. Any such power or any certificate thereof with such facsimile signature and seal shall be valid and binding on the Company. Furthermore, such power so executed, sealed and certified by certificate so executed and sealed shall, with respect to any bond or undertaking to which it is attached, shall continue to be valid and binding on the Company."

IN WITNESS WHEREOF, the ZURICH AMERICAN INSURANCE COMPANY has caused these presents to be executed in its name and on its behalf and its Corporate Seal to be hereunto affixed and attested by its officers thereunto duly authorized, this **26th day of July, A.D. 2011**. This power of attorney revokes that issued on behalf of A.C. MARQUIS, JR., William X. LINNEY, III, Robert B. PITTS, John J. SCIORTINO, JR., Peter H. FORENZA, AnnMarie KEANE, dated February 1, 2010.

## ZURICH AMERICAN INSURANCE COMPANY

ss:

*Gregory E. Murray*

Secretary

By:

*Frank E. Martin Jr.*

Vice President

On the 26th day of July, A.D. 2011, before the subscriber, a Notary Public of the State of Maryland, duly commissioned and qualified, came the above named Vice President and Secretary of ZURICH AMERICAN INSURANCE COMPANY, to me personally known to be the individuals and officers described in and who executed the preceding instrument and they each acknowledged the execution of the same and being by me duly sworn, they severally and each for himself deposed and said that they respectively hold the offices in said Corporation as indicated, that the Seal affixed to the preceding instrument is the Corporate Seal of said Corporation, and that the said Corporate Seal, and their respective signature as such officers, were duly affixed and subscribed to the said instrument pursuant to all due corporate authorization.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my Official Seal the day and year first above.

*Constancia A. Duvon*

Notary Public

My Commission Expires: July 14, 2015

This Power of Attorney limits the acts of those named therein to the bonds and undertaking specifically named therein, and they have no authority to bind the Company except in the manner and to the extent herein stated.

## CERTIFICATE

I, the undersigned, a Secretary of the ZURICH AMERICAN INSURANCE COMPANY, do hereby certify that the foregoing Power of Attorney is still in full force and effect, and further certify that Article VI, Section 5 of the By-Laws of the Company and the Resolution of the Board of Directors set forth in said Power of Attorney are still in force.

IN TESTIMONY WHEREOF I have hereto subscribed my name and affixed the seal of said Company

*Gerald F. Haley*

the 20th day of November 2012

## SAFETY QUESTIONNAIRE

The bidder must include, with its bid, all information requested on this Safety Questionnaire. Failure to provide a completed and signed Safety Questionnaire at the time of bid opening may result in disqualification of the bid as non-responsive.

### 1. Bidder Information:

Company Name: Prismatic Development Corporation

DDC Project Number: S216-399A

Company Size:            Ten (10) employees or less  
           ☒ Greater than ten (10) employees

           Company has previously worked for DDC

### 2. Type(s) of Construction Work

TYPE OF WORK	LAST 3 YEARS	THIS PROJECT
General Building Construction	<u>          X          </u>	<u>          X          </u>
Residential Building Construction	<u>                          </u>	<u>                          </u>
Nonresidential Building Construction	<u>          X          </u>	<u>                          </u>
Heavy Construction, except building	<u>                          </u>	<u>                          </u>
Highway and Street Construction	<u>                          </u>	<u>                          </u>
Heavy Construction, except highways	<u>                          </u>	<u>                          </u>
Plumbing, Heating, HVAC	<u>                          </u>	<u>                          </u>
Painting and Paper Hanging	<u>                          </u>	<u>                          </u>
Electrical Work	<u>                          </u>	<u>                          </u>
Masonry, Stonework and Plastering	<u>                          </u>	<u>                          </u>
Carpentry and Floor Work	<u>          X          </u>	<u>          X          </u>
Roofing, Siding, and Sheet Metal	<u>                          </u>	<u>                          </u>
Concrete Work	<u>                          </u>	<u>                          </u>
Specialty Trade Contracting	<u>                          </u>	<u>                          </u>
Asbestos Abatement	<u>                          </u>	<u>                          </u>
Other (specify)	<u>                          </u>	<u>                          </u>

### 3. Experience Modification Rate:

The Experience Modification Rate (EMR) is a rating generated by the National Council of Compensation Insurance (NCCI). This rating is used to determine the contractor's premium for worker's compensation insurance. The contractor may obtain its EMR by contacting its insurance broker or the NCCI. If the contractor cannot obtain its EMR, it must submit a written explanation as to why.

The Contractor must indicate its Intrastate and Interstate EMR for the past three years. [Note: For contractors with less than three years of experience, the EMR will be considered to be 1.00].

YEAR	<u>INTRASTATE RATE</u>	<u>INTERSTATE RATE</u>
<u>10</u>	<u>800</u>	<u>662</u>
<u>11</u>	<u>760</u>	<u>864</u>
<u>12</u>	<u>830</u>	<u>830</u>

If the Intrastate and/or Interstate EMR for any of the past three years is greater than 1.00, the contractor must attach, to this questionnaire, a written explanation for the rating and identify what corrective action was taken to correct the situation resulting in that rating.

**4. OSHA Information:**

No Contractor has received a willful violation issued by OSHA or New York City Department of Buildings (NYCDOB) within the last three years.

No Contractor has had an incident requiring OSHA notification within 8 hours (i.e., fatality, or hospitalization of three or more employees).

The Occupational Safety and Health Act (OSHA) of 1970 requires employers with ten or more employees, on a yearly basis to complete and maintain on file the form entitled "Log of Work-related Injuries and Illnesses". This form is commonly referred to as the OSHA 300 Log (OSHA 200 Log for 2001 and earlier).

The OSHA 300 Log must be submitted for the last three years for contractors with more than ten employees.

The Contractor must indicate the total number of hours worked by its employees, as reflected in payroll records for the past three years.

The contractor must submit the Incident Rate for Lost Time Injuries (the Incident Rate) for the past three years. The Incident Rate is calculated in accordance with the formula set forth below. For each given year, the total number of incidents is the total number of non-fatal injuries and illnesses reported on the OSHA 300 Log. The 200,000 hours represents the equivalent of 100 employees working forty hours a week, fifty weeks per year.

$$\text{Incident Rate} = \frac{\text{Total Number of Incidents} \times 200,000}{\text{Total Number of Hours Worked by Employees}}$$

YEAR	TOTAL NUMBERS OF HOURS WORKED BY EMPLOYEES	INCIDENT RATE
<u>10</u>	<u>116,963</u>	<u>0</u>
<u>11</u>	<u>129,106</u>	<u>3.09</u>
<u>12</u>	<u>122,286</u>	<u>8.17</u>

If the contractor's Incident Rate for any of the past three years is one point higher than the Incident Rate for the type of construction it performs (listed below), the contractor must attach, to this questionnaire, a written explanation for the relatively high rate.

General Building Construction	8.5
Residential Building Construction	7.0
Nonresidential Building Construction	10.2
Heavy Construction, except building	8.7
Highway and Street Construction	9.7
Heavy Construction, except highways	8.3
Plumbing, Heating, HVAC	11.3
Painting and Paper Hanging	6.9
Electrical Work	9.5
Masonry, Stonework and Plastering	10.5
→ Carpentry and Floor Work	12.2
Roofing, Siding, and Sheet Metal	10.3
Concrete Work	8.6
Specialty Trade Contracting	8.6

##### 5. Safety Performance on Previous DDC Project(s)

no Contractor previously audited by the DDC Office of Site Safety.

DDC Project Number(s): \_\_\_\_\_

no Accident on previous DDC Project(s).

no Fatality or Life-altering Injury on DDC Project(s) within the last three years.  
[Examples of a life-altering injury include loss of limb, loss of a sense (e.g., sight, hearing), or loss of neurological function].

**BIDDER'S CERTIFICATION OF COMPLIANCE WITH  
IRAN DIVESTMENT ACT**

Pursuant to General Municipal Law §103-g, which generally prohibits the City from entering into contracts with persons engaged in investment activities in the energy sector of Iran, the bidder/proposer submits the following certification:

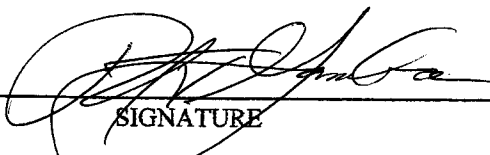

[Please Check One]

**BIDDER'S CERTIFICATION**

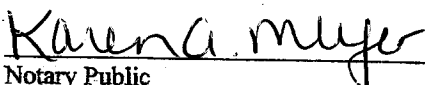

☒ By submission of this bid or proposal, each bidder/proposer and each person signing on behalf of any bidder/proposer certifies, and in the case of a joint bid each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief, that each bidder/proposer is not on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law.

☐ I am unable to certify that my name and the name of the bidder/proposer does not appear on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law. I have attached a signed statement setting forth in detail why I cannot so certify.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT A – BIDDERS QUESTIONS AND DDC RESPONSES**

No.	Bidders' Questions	DDC Responses
1	Can you please advise if the fenced in parking area east of the building site which currently houses impounded vehicles will be available to the General Contractor for a site staging area?	The fenced in parking area east of the building will not be available for site storage and staging. Revised Drawing C013 provided in Addendum #2 shows the space available for site storage and staging. See Attachment D, Revisions to Drawings.
2	Will the area of land along the existing marina south retaining wall be accessible for construction equipment (crane, excavator, loader) and material deliveries (armor stone)?	The marina's retaining wall is adjacent to the DSNY property line. There is no strip of land on the DSNY side of the property line – this area is under water.
3	What is the depth (tip elevation) of the existing fender piles on the North bulkhead?	Available design drawings for the existing fendering indicate the pile tips to be at Elevation -45'. The as-built condition may differ.
4	Do the new PSP900 King piles have to be coated on the interior, meaning can be coated after assembled as doubles? Or do they have to be coated as singles so all surfaces of the pile are covered?	The interior king pile cavity need not be coated. Each double king pile should be coated externally as a unit after fabrication. An addendum will specify casting a 2 foot deep concrete plug on top of each double king pile cavity after driving, cut-off and coating touch-up, to seal the cavity.
5	On Drawing S-803.00, how is the contractor expected to install the concrete encasement around the 18 inch diameter RCP in between the bulkhead and cofferdam space of 2'-8" which is partially below mean low water?	Addendum #2 shows demolition of the existing corner segment of concrete walkway. See Attachment D, Revisions to Drawings. This will allow access for excavation of fill between the PZ bulkhead and cofferdam cells before positioning the RCP outfall. As shown in Section 3 on drawing S-803.00, the space between the cofferdam and bulkhead is much wider than 2'-8" on the east side, due to the curvature of the cofferdam's corner cell. Concrete can be placed underwater in conformance with paragraph 3.05.G of Section 03300, cast on screeded excavated subgrade with side forms. Backfill would then be placed to refill between the cell and the bulkhead, and the corner segment of walkway would then be rebuilt to match existing.
6	What are the dimensions and thickness of the steel plate in Section 1/S-904?	The steel plate shown in the referenced section is the flange of the HP12 fender pile.
7	What diameter and wall thickness is the "3X strong" pipe on Detail 2/S-903?	The intended call out is for a 3 inch diameter extra strong (meaning Schedule 80) pipe.
8	What thickness are the corner gussets on Detail 2/S-903?	As indicated in Detail 2, gussets are typically 3/8" thick.

THE CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
DIVISION OF STRUCTURES

September 12, 2012

**ADDENDUM No. # 1**

FOR FURNISHING ALL LABOR AND MATERIAL NECESSARY AND REQUIRED FOR:

**S216-399A**

**Southwest Brooklyn Marine Transfer Station – Building Construction**

---

This addendum is issued for the purpose of amending the requirements of the Bid and Contract Documents and is hereby made a part of said Bid and Contract Documents to the same extent as though it were originally included therein.

---

The bidder is advised that the items listed below apply to the project:

1. **The Bid Opening for the contract described below scheduled for September 27, 2012, at 2:00 pm is rescheduled to October 11, 2012, at 2:00 pm.**

Contract #1 – General Construction Work

2. **Bidders Questions and Responses to Questions:**

See Attachment A.

3. **Revisions to the Bid Booklet:**

See Attachment B.

4. **Revisions to Specifications:**

See Attachment C.

5. **Revisions to Drawings:**

See Attachment D.

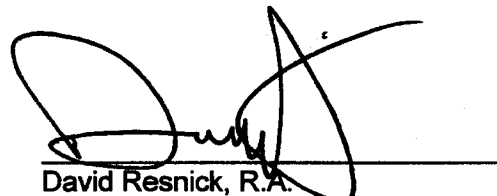

6. **Revisions to the Addendum to the General Conditions:**

See Attachment E.

---

THIS ADDENDUM MUST BE SIGNED BY ALL BIDDERS AND ATTACHED TO THEIR BIDS.

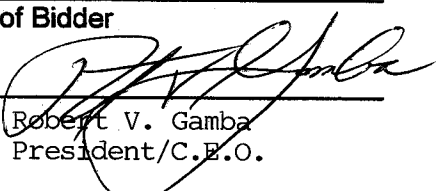

If additional information is required, please contact the Department of Design and Construction, Contract Section at (718) 391-2200, (718) 391-1727, or by fax at (718) 391-2615.

**Project Labor Agreement - - Letter of Assent**

Dear: City of NY, Department of Design & Construction, Div. of Public Buildings

The undersigned party confirms that it agrees to be a party to and be bound by the New York Agency, Project Labor Agreement as such Agreement may, from time to time, be amended by the parties or interpreted pursuant to its terms. The terms of the Project Labor Agreement, its Schedules, Addenda and Exhibits are hereby incorporated by reference herein.

The undersigned, as a Contractor or Subcontractor (hereinafter Contractor) on the Project known as Marine Transfer and located at Brooklyn, NY (hereinafter PROJECT), for and in consideration of the award to it of a contract to perform work on said PROJECT, and in further consideration of the mutual promises made in the Project Labor Agreement, a copy of which was received and is acknowledged, hereby:

- (1) Accepts and agrees to be bound by the terms and conditions of the Agreement, together with any and all schedules; amendments and supplements now existing or which are later made thereto;
- (2) Agrees to be bound by the legally established collective bargaining agreements and local trust agreements as set forth in the Project Labor Agreement and this Agreement but only to the extent of Program Work and as required by the PLA.
- (3) Authorizes the parties to such local trust agreements to appoint trustees and successor trustees to administer the trust funds and hereby ratifies and accepts the trustees so appointed as if made by the Contractor but only to the extent of Program Work as required by the PLA.
- (4) Certifies that it has no commitments or agreements that would preclude its full and complete compliance with the terms and conditions of said Agreement. The Contractor agrees to employ labor that can work in harmony with all other labor on the Project and shall require labor harmony from every lower tier subcontractor it has engaged or may engage to work on the Project. Labor harmony disputes/issues shall be subject to the Labor Management Committee provisions.
- (5) Agrees to secure from any Contractor(s) (as defined in said Agreement) which is or becomes a Subcontractor (of any tier), to it, a duly executed Agreement to be Bound in from identical to this document.

## **NOTICE TO BIDDERS:**

- **PROJECT LABOR AGREEMENT:** This contract is subject to a Project Labor Agreement ("PLA") entered into between the City and the Building and Construction Trades Council of Greater New York ("BCTC") affiliated Local Unions. By submitting a bid, the Contractor agrees that the PLA is binding on the Contractor and all subcontractors of all tiers. The bidder to be awarded the contract will be required to execute a "Letter of Assent" prior to award.

The Bidder is advised to review the following: (1) Notice regarding the PLA, (2) the PLA, and (3) the Letter of Assent, all of which are set forth at the beginning of Volume 2 of the Contract Documents.

- **SINGLE CONTRACT:** As stated above, this contract is subject to a PLA. The requirements of the Wicks Law for separate prime contractors DO NOT APPLY to any project that is covered by a PLA. Accordingly, the requirements of the Wicks Law for separate prime contractors do not apply to this Project. The Project consists of a single contract, the Contract for General Construction Work.

The Bidder is advised to review the Notice set forth at the beginning of Volume 2 of the Contract Documents. The Notice specifies revisions to the Contract Documents to provide that the Project consists of a single contract and to delete any and all references to separate prime contractors.

## **SPECIAL NOTICE TO BIDDERS**

**The New York City Department of Small Business Services (SBS), in conjunction with the New York Business Development Corporation (NYBDC), have established a NYC Construction Loan pilot program to provide prime contractors and subcontractors financing for mobilization costs on certain City construction projects.**

**Under this initiative, loans are available for early stage mobilization needs such as insurance, labor, supplies and equipment. Bidders are strongly encouraged to visit "Growing Your Business" at [www.nyc.gov/nycbusiness](http://www.nyc.gov/nycbusiness) to learn more about the loan or contact [constructionloan@sbs.nyc.gov](mailto:constructionloan@sbs.nyc.gov) / (212) 513-6444 to obtain details and to determine preliminary eligibility.**

**A successful loan applicant will be required to make an assignment of its contract (or subcontract) payments to the lender NYBDC until the loan is repaid. If the loan is to a subcontractor, a prime contractor must honor the terms of such an assignment.**

**A prime contractor may not discriminate against a subcontractor or potential subcontractor by reason of the subcontractor's participation, or nonparticipation, in the NYC Construction Loan program.**

**SPECIAL NOTICE TO BIDDERS**

**BID SUBMISSION REQUIREMENTS**

**THE BID SHALL CONSIST OF TWO (2) SEPARATE, SEALED  
ENVELOPES. THE DOCUMENTS THAT MUST BE COMPLETED AND  
INCLUDED IN EACH SEPARATE ENVELOPE ARE LISTED BELOW.**

**BID ENVELOPE #1:** Bid Envelope #1 shall contain the following items:

- Bid Form, including Affirmation
- Bid Security (if required, see page 22)
- MWBE Subcontractor Utilization Plan (if participation goals have been established)

**BID ENVELOPE #2:** Bid Envelope #2 shall contain **ONLY** the following item:

- Bidder's Identification of Subcontractors (see pages 16 & 17)

**FAILURE TO SUBMIT THE FOUR ITEMS LISTED ABOVE  
WILL RESULT IN THE DISQUALIFICATION OF THE BID**

**BID ENVELOPE #1:** In addition to the items listed above, Bid Envelope #1 shall also contain the following items: **DO NOT** Include the items listed below in Bid Envelope #2.

- Bid Breakdown (if required, see page 21)
- Safety Questionnaire
- Construction Employment Report (if bid is \$1,000,000 or more)
- Contract Certificate (if bid is less than \$1,000,000)
- Confirmation of Vendex Compliance
- Bidder's Certification of Compliance with Iran Divestment Act
- Special Experience Requirements Qualification Form (if required, see pages 3, 4)

**FAILURE TO SUBMIT THE SEVEN ITEMS LISTED ABOVE  
MAY RESULT IN THE DISQUALIFICATION OF THE BID.**

- NOTES:**
- (1) All of the above referred to blank forms to be completed and submitted with the bid are included in the BID BOOKLET.
  - (2) If additional information is required, please contact DDC at 718-391-2601.
  - (3) **VENDEX QUESTIONNAIRES:** Vendex Questionnaires, as well as detailed instructions, may be obtained at [www.nyc.gov/vendex](http://www.nyc.gov/vendex). The bidder may also obtain Vendex forms and instructions by contacting the Agency Chief Contracting Officer or the contact person for this contract.
  - (4) **SPECIAL EXPERIENCE REQUIREMENTS:** The Bidder is advised that Special Experience Requirements may apply to this contract. Such requirements are set forth on pages 3 and 4 of this Bid Booklet.
  - (5) **SPECIAL EXPERIENCE REQUIREMENTS FOR ASBESTOS:** The Bidder is advised that this contract contains strict requirements regarding the prior experience and licensing of the subcontractor who will perform any required asbestos abatement work. These special experience requirements are set forth in the section of the specifications which describes any required asbestos abatement work.

## SPECIAL EXPERIENCE REQUIREMENTS

Special Experience Requirements apply as indicated below.

<b>Bidder:</b>	<b>General Construction</b>	<u>  X  </u>	<b>YES</b>	<u>      </u>	<b>NO</b>
<b>Specific Areas of Work:</b>	<b>General Construction</b>	<u>  X  </u>	<b>YES</b>	<u>      </u>	<b>NO</b>
	<b>Plumbing Work</b>	<u>      </u>	<b>YES</b>	<u>  X  </u>	<b>NO</b>
	<b>HVAC Work</b>	<u>      </u>	<b>YES</b>	<u>  X  </u>	<b>NO</b>
	<b>Electrical Work</b>	<u>      </u>	<b>YES</b>	<u>  X  </u>	<b>NO</b>
<b>Manufacturers:</b>	<b>General Construction</b>	<u>  X  </u>	<b>YES</b>	<u>      </u>	<b>NO</b>
	<b>Plumbing Work</b>	<u>      </u>	<b>YES</b>	<u>  X  </u>	<b>NO</b>
	<b>HVAC Work</b>	<u>      </u>	<b>YES</b>	<u>  X  </u>	<b>NO</b>
	<b>Electrical Work</b>	<u>      </u>	<b>YES</b>	<u>  X  </u>	<b>NO</b>

(A) **EXPERIENCE REQUIREMENTS FOR THE BIDDER:** The special experience requirements set forth below apply to the bidder for the General Construction Contract. Compliance with such special experience requirements will be determined solely by the City prior to an award of contract. Failure to comply with the special experience requirements will result in the rejection of the bid as non-responsive.

(1) The bidder must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least three (3) projects similar in scope and type to the required work.

(B) **QUALIFICATION FORM:** For each project submitted to demonstrate compliance with the special experience requirements, the bidder must complete the Qualification Form included in the Bid Booklet. The City will only evaluate a project if the following criteria are met: (1) the project is described on the Qualification Form, and (2) all information on the Qualification Form is provided. The City will not evaluate any project which does not comply with the criteria set forth herein, including any project which is referred to only on the resume of an individual.

(C) **CONDITIONS:** The City may, in determining compliance with the special experience requirements set forth above, consider prior projects completed by principal(s) or other employees of the bidder while affiliated with another entity, subject to the conditions set forth below.

(1) Any principal or other employee on whose prior experience the bidder is relying to demonstrate compliance with these special experience requirements must have held the following: (a) a significant management role in the prior entity with which he/she was affiliated, and (b) a significant management role in the entity submitting the bid for a period of six months or from the inception of the bidding entity. If the bidder is relying on the prior experience of a principal or employee, it must submit documentation confirming the position held by such principal or employee in the prior entity, as well as in the bidding entity.

(2) The bidder may not rely on the experience of its principals or other employees to demonstrate compliance with any other requirements, including without limitation, financial requirements or requirements for a specified minimum amount of annual gross revenues.

(D) **EXPERIENCE REQUIREMENTS FOR SPECIFIC AREAS OF WORK:** The special experience requirements set forth below apply to the contractor or subcontractor who will perform specific areas of work. Compliance with such experience requirements will be evaluated after an award of contract. Within two (2) weeks of such award, the contractor will be required to submit the qualifications of the contractor or subcontractor who will perform these specific areas of work. If the bidder intends to perform these specific areas of work with its own forces, it must demonstrate compliance with the special experience requirements. If the bidder intends to subcontract these specific areas of work, the proposed subcontractor(s) must

demonstrate compliance with the special experience requirements. Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City. The bidder is advised to carefully review these special experience requirements prior to submitting its bid, as such experience requirements will be strictly enforced.

(1) Special experience requirements apply to the specific areas of work set forth below.

(a) Section 07610: Sheet Metal Roofing

(2) Special experience requirements applicable to the contractor or subcontractor that will perform specific areas of work are summarized below. Such experience requirements are set forth in full in the Addendum to the General Conditions.

(a) The contractor or subcontractor performing the work of this section must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least three (3) projects similar in scope and type to the required work. In addition, the contractor or subcontractor must be licensed, certified or approved by the manufacturer.

(3) For each project submitted to demonstrate compliance with the special experience requirements for specific areas of work, the contractor or proposed subcontractor will be required to complete the Qualification Form included in the Bid Booklet. The City will only evaluate a project if the following criteria are met: (1) the project is described on the Qualification Form, and (2) all information on the Qualification Form is provided. The City will not evaluate any project which does not comply with the criteria set forth herein, including any project which is referred to only on the resume of an individual.

(E) **EXPERIENCE REQUIREMENTS FOR MANUFACTURER(S)**: The special experience requirements set forth below apply to the manufacturer who will supply or fabricate specific material or equipment. Compliance with such experience requirements will be evaluated after an award of contract. Within two (2) weeks of award, the contractor will be required to submit the qualifications of the proposed manufacturer(s). Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City.

(1) Special experience requirements apply to the manufacturer(s) set forth below.

(a) Section 07610: Sheet Metal Roofing

(2) Special experience requirements applicable to the manufacturer(s) of specified material or equipment are summarized below. Such experience requirements are set forth in full in the Addendum to the General Conditions.

(a) The manufacturer providing the material or equipment specified in this section must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project. Such similar material or equipment provided by the manufacturer must have been in satisfactory service for not less than five (5) years.

## MWBE PROGRAM

### SUBCONTRACTOR UTILIZATION PLAN

**Schedule B: Subcontractor Utilization Plan:** Schedule B: Subcontractor Utilization Plan for this Contract is set forth on the following pages of this Bid Booklet. Schedule B: Subcontractor Utilization Plan (Part I) indicates whether participation goals have been established for this Contract. If participation goals have been established for this Contract, the bidder must submit Schedule B: Subcontractor Utilization Plan (Part II) with its bid.

**Contract Provisions:** Contract provisions regarding the participation of the MWBE firms are set forth in Article 77 of the Contract. The bidder is advised to review these contract provisions.

**Waiver:** The bidder may seek a full or partial pre-award waiver of the Target Subcontracting Percentage in accordance with Article 77 of the Contract (See Part A, Section 10). The bidder's request for a waiver must be submitted at least seven (7) calendar days prior to the bid date. Waiver requests submitted after the deadline will not be considered. The form for requesting a waiver of the Target Subcontracting Percentage is set forth in Schedule B: Subcontractor Utilization Plan (Part III).

**Rejection of the Bid:** The bidder must complete Schedule B: Subcontractor Utilization Plan (Part II) set forth on the following pages. Subcontractor Utilization Plans which do not include the required affirmations (on Page 2) will be deemed to be non-responsive, unless a full waiver of the Target Subcontracting Percentage is granted (Schedule B: Subcontractor Utilization Plan, Part III). In the event that the City determines that the bidder has submitted a Schedule B: Subcontractor Utilization Plan where the required affirmations are completed but other aspects of the Plan are not complete, or contain a copy or computation error that is at odds with the affirmation, the bidder will be notified by the Agency and will be given four (4) calendar days from receipt of notification to cure the specified deficiencies and return a completed plan to the Agency. Failure to do so will result in a determination that the Bid is non-responsive.

Receipt of notification is defined as the date notice is emailed or faxed (if the bidder has provided an email address or fax number), or no later than five (5) days from the date of mailing or upon delivery, if delivered.

**Impact on LBE Requirements:** If goals have been established for the participation of M/WBE's, the contractor is not required to comply with the Locally Based Enterprise Program ("LBE"). The LBE Program is set forth in Article 67 of the Contract.

## BID FORM

---

The above-named Bidder affirms and declares:

1. The said bidder is of lawful age and the only one interested in this bid; and no person, firm or corporation other than hereinbefore named has any interest in this bid, or in the Contract proposed to be taken.
2. By submission of this bid, each bidder and each person signing on behalf of any bidder certifies, and in the case of a joint bid each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief: (1) the prices in this bid have been arrived at independently without collusion, consultation, communication or agreement, for the purpose of restricting competition, as to any matter relating to such prices with any other bidder or with any competitor; (2) unless otherwise required by law, the prices quoted in this bid have not been knowingly disclosed by the bidder and will not knowingly be disclosed by the bidder prior to opening, directly or indirectly, to any other bidder or to any competitor; and (3) no attempt has been made or will be made by the bidder to induce any other person, partnership or corporation to submit or not to submit a bid for the purpose of restricting competition.
3. No councilman or other officer or employee or person whose salary is payable in whole or in part from the City Treasury is directly or indirectly interested in this bid, or in the supplies, materials, equipment, work or labor to which it relates, or in any of the profits thereof.
4. The bidder is not in arrears to the City of New York upon debt or contract or taxes, and is not a defaulter, as surety or otherwise, upon any obligation of the City of New York, and has not been declared not responsible, or disqualified, by any agency of the City of New York or State of New York, nor is there any proceeding pending relating to the responsibility or qualification of the bidder to receive public contracts except as set forth on the Affirmation included as page 17 of this Bid Booklet.

The bidder hereby affirms that it has paid all applicable City income, excise and other taxes for all years it has conducted business activities in New York City.

5. The bidder, as an individual, or as a member, partner, director or officer of the bidder, if the same be a firm, partnership or corporation, executes this document expressly warranting and representing that should this bid be accepted by the City and the Contract awarded to him, he and his subcontractors engaged in the performance:  
(1) will comply with the provisions of Section 6-108 of the Administrative Code of the City of New York and the non-discrimination provisions of Section 220a of the New York State Labor Law, as more expressly and in detail set forth in the Agreement; (2) will comply with Section 6-109 of the Administrative Code of the City of New York in relation to minimum wages and other stipulations as more expressly and in detail set forth in the Agreement; (3) have complied with the provisions of the aforesaid laws since their respective effective dates, and (4) will post notices to be furnished by the City, setting forth the requirements of the aforesaid laws in prominent and conspicuous places in each and every plant, factory, building and structure where employees engaged in the performance of the Contract can readily view it, and will continue to keep such notices posted until the supplies, materials and equipment, or work labor and services required to be furnished or rendered by the Contractor have been finally accepted by the City. In the event of any breach or violation of the foregoing, the Contractor may be subject to damages, liquidated or otherwise, cancellation of the Contract and suspension as a bidder for a period of three years. (The words, "the bidder", "he", "his", and "him" where used shall mean the individual bidder, firm, partnership or corporation executing this bid).

6. Compliance Report

The bidder, as an individual, or as a member, partner, director, or officer of the bidder, if the same be a firm, partnership, or corporation, (1) represents that his attention has been specifically drawn to Executive Order No. 50, dated April 25, 1980, on Equal Employment Compliance of the contract, and (2) warrants that he will comply with the provisions of Executive Order No. 50. The Employment Report must be submitted as part of the bid.

The bidder, as an individual, or as a member, partner, director, or officer of the bidder, if the same be a firm, partnership, or corporation, executes this document expressly warranting that he will comply with: (1) the provision of the contract on providing records, Chapter 8.

7. By submission of this bid, the bidder certifies that it now has and will continue to have the financial capability to fully perform the work required for this contract. Any award of this contract will be made in reliance upon such certification. Upon request therefor, the bidder will submit written verification of such financial capability in a form that is acceptable to the department.

8. In accordance with Section 165 of the State Finance Law, the bidder agrees that tropical hardwoods, as defined in Section 165 of the State Finance Law, shall not be utilized in the performance of this Contract, except as the same are permitted by the foregoing provision of law.

9. The bidder has visited and examined the site of the work and has carefully examined the Contract in the form approved by the Corporation Counsel, and will execute the Contract and perform all its items, covenants and conditions, and will provide, furnish and deliver all the work, materials, supplies, tools and appliances for all labor and materials necessary or required for the hereinafter named work, all in strict conformity with the Contract, for the prices set forth in the Bid Schedule:

**BID FORM**

This affirmation must be signed by an officer or duly authorized representative.

\* Under the Federal Privacy Act the furnishing of Social Security Numbers by bidders on City contracts is voluntary. Failure to provide a Social Security Number will not result in a bidder's disqualification. Social Security Numbers will be used to identify bidders, proposers or vendors to ensure their compliance with laws, to assist the City in enforcement of laws, as well as to provide the City a means of identifying of businesses which seek City contracts.

## **BIDDER'S IDENTIFICATION OF SUBCONTRACTORS**

### **NOTICE TO BIDDERS**

**SUBMISSION:** The Bidder must, at the time of the bid, submit the form on the next page ("BIDDER'S IDENTIFICATION OF SUBCONTRACTORS"). This form must be submitted in a separate, sealed envelope (BID ENVELOPE #2). Failure to do so will result in the disqualification of the bid as non-responsive.

\*\*\*\*\*

Please be advised that pursuant to GML § 101(5) the Bidder is required to submit with its bid the names of subcontractors it intends to use to perform the following work on this contract, as well as the agreed-upon amount to be paid to each:

- plumbing and gas fitting;
- steam heating, hot water heating, ventilating and air conditioning apparatus; and
- electric wiring and standard illuminating fixtures.

**NOTE:** This project may not involve all of the above listed subcontractors. Please see the form on the next page which indicates the subcontractors required for this Project.

The list of subcontractors is to be submitted in a separate sealed envelope by completing the form on the next page entitled "Bidder's Identification of Subcontractors". This form provides for the identification of any subcontractors intended to be used in any of the three trades listed above. If bidder intends to use its own forces for any of the above listed work, bidder should so indicate on the form.

Failure to submit the completed form on the next page ("Bidder's Identification of Subcontractors") that includes the names of subcontractors and the agreed upon amounts to be paid to such subcontractors will render the bid non-responsive.

**PLEASE NOTE:** for any contract that is subject to M/WBE participation goals under Local Law 129, if the bidder's intention to use its own forces to do any of the above-referenced work would result in Bidder's failure to attain the Target Subcontracting Percentage identified in the Subcontractor Utilization Plan, the bid will be non-responsive unless the bidder requests and obtains a Waiver of Target Subcontracting Percentage (Subcontractor Utilization Plan, Part III) in advance of bid submission.

After the low bid is announced, the sealed list submitted by the low bidder will be opened and the names of the subcontractors will be announced. The sealed lists of subcontractors submitted by all other bidders shall be maintained by the Agency unopened unless such bidder shall become the low bidder (e.g., the initial low bidder is found non-responsive). All unopened lists of subcontractors shall be returned to the bidders unopened after contract award, unless the bidder has given the agency permission to

After bid submission, any change of subcontractor or agreed-upon amount to be paid to each shall require approval of the Agency upon a showing of a legitimate construction need which shall include, but not be limited to, a change in project specifications, a change in project material costs, a change to subcontractor status as determined pursuant to §222 (2)(e) of the Labor Law, or if the subcontractor has become otherwise unwilling, unable or unavailable to perform the subcontract.

## **BIDDER'S IDENTIFICATION OF SUBCONTRACTORS**

**Project ID: S216-399A**

**SUBMISSION:** In addition to its Bid (Bid Envelope # 1), the Bidder must, at the time of the bid, complete and submit this form in a separate, sealed envelope (Bid Envelope # 2). To complete this form, the Bidder must identify the subcontractors it intends to use for the work listed below, as well as the dollar amount to be paid to each subcontractor. Failure to complete this form and submit it in a separate, sealed envelope will result in the disqualification of the bid as non-responsive.

The Bidder intends to use the following subcontractors. If the Bidder intends to do any of the work referenced below with its own forces, the Bidder should complete this form using its own name. If multiple subcontractors for any trade are proposed, Bidder may submit multiple copies of this form.

**1. PLUMBING CONTRACTOR:**

BID BOND 1  
FORM OF BID BOND

KNOW ALL MEN BY THESE PRESENTS. That we, \_\_\_\_\_

hereinafter referred to as the "Principal", and \_\_\_\_\_

hereinafter referred to as the "Surety" are held and firmly bound to THE CITY OF NEW YORK, hereinafter referred to as the "CITY", or to its successors and assigns in the penal sum of \_\_\_\_\_

(\$ \_\_\_\_\_), Dollars lawful money of the United States, for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

Whereas, the Principal is about to submit (or has submitted) to the City the accompanying proposal, hereby made a part hereof, to enter into a contract in writing for \_\_\_\_\_

NOW, THEREFORE, the conditions of this obligation are such that if the Principal shall not withdraw said Proposal without the consent of the City for a period of forty-five (45) days after the opening of bids and in the event of acceptance of the Principal's Proposal by the City, if the Principal shall:

- (a) Within ten (10) days after notification by the City, execute in quadruplicate and deliver to the City all the executed counterparts of the Contract in the form set forth in the Contract Documents, in accordance with the proposal as accepted, and
- (b) Furnish a performance bond and separate payment bond, as may be required by the City, for the faithful performance and proper fulfillment of such Contract, which bonds shall be satisfactory in all respects to the City and shall be executed by good and sufficient sureties, and
- (c) In all respects perform the agreement created by the acceptance of said Proposal as provided in the Information for Bidders, bound herewith and made a part hereof, or if the City shall reject the aforesaid Proposal, then this obligation shall be null and void; otherwise to remain in full force and effect.

## BID BOND 2

In the event that the Proposal of the Principal shall be accepted and the Contract be awarded to him the Surety hereunder agrees subject only to the payment by the Principal of the premium therefore, if requested by the City, to write the aforementioned performance and payment bonds in the form set forth in the Contract Documents.

It is expressly understood and agreed that the liability of the Surety for any and all claims hereunder shall in no event exceed the penal amount of this obligation as herein stated.

There shall be no liability under this bond if, in the event of the acceptance of the Principal's Proposal by the City, either a performance bond or payment bond, or both, shall not be required by the City on or before the 30th day after the date on which the City signs the Contract.

The surety, for the value received, hereby stipulates and agrees that the obligations of the Surety and its bond shall in no way be impaired or affected by any postponements of the date upon which the City will receive or open bids, or by any extensions of time within which the City may accept the Principal's Proposal, or by any waiver by the City of any of the requirements of the Information for Bidders, and the Surety hereby waives notice of any such postponements, extensions, or waivers.

IN WITNESS WHEREOF, the Principal and the Surety have hereunto set their hands and seals and such of them as are corporations have caused their corporate seals to be hereto affixed and these presents to be signed by their proper officers the \_\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_\_.

## BID SCHEDULE

**Submission:** Bidders are advised that the requirement to submit a Bid Schedule applies to each contract for which an "X" is indicated before the word "Yes". If required, the bidder must submit, with its bid, a completed Bid Schedule. Failure to provide a completed Bid Schedule may result in rejection of the bid as non-responsive.

      X            YES                                           NO

### Limitations on Use of Bid Schedule:

Bidders are advised that the Bid Schedule shall be used for bid analysis purposes only and shall not be binding for any other purposes under the Contract, including, without limitation, for payment purposes or in connection with a contractor claim for extra work. If the form for the Bid Schedule does not include an item of work required by the Contract Documents, such omission shall have no effect whatsoever, nor shall it be used by the contractor in connection with a claim for extra work (i.e., work for which the contractor is entitled to a change order).

### Instructions for Preparing Bid Schedule:

- (A) The following bid prices on the Bid Schedule are to be paid for the actual quantities of the item numbers in the completed work or structure, and they cover the cost of all work, labor, material, tools, plant and appliances of every description necessary to complete the entire work, as specified, and the removal of all debris, temporary work and appliances.
- (B) In preparing its Bid Schedule, the bidder shall submit prices that include all costs for overhead and profit. Overhead shall include, without limitation, all costs in connection with the following: administration, management, superintendence, small tools, insurance, bonds, and provision of services or items required by the General Conditions [except for Security/Fire Guard Services and Temporary Heat]. If the Project requires Security/Fire Guard Services and/or Temporary Heat, such service(s) will be included as separate line items in the Bid Schedule.
- (C) The Agency may reject a bid if it contains unbalanced bid prices. An unbalanced bid is considered to be one containing lump sum or unit items which do not reflect reasonable actual costs plus a reasonable proportionate share of the Bidder's anticipated profit, overhead costs, and other indirect costs, anticipated for the performance of the items in question.
- (D) If an item is not set forth in the Bid Schedule, but is included in the Contract Documents (Drawings, Specifications, General Conditions, and/or Addenda), the bidder is advised to add the item to its Bid Schedule and include the cost of the item in its grand total. In an attachment to its Bid Schedule, the bidder shall provide a list of all items added.

**PLEASE BE SURE A LEGIBLE BID IS ENTERED FOR EACH ITEM.**  
**THE BIDDER SHALL INSERT THE TOTAL BID PRICE ON**  
**THE BID SCHEDULE ON PAGE 13 OF THIS BID BOOKLET**

## SAFETY QUESTIONNAIRE

The bidder must include, with its bid, all information requested on this Safety Questionnaire. Failure to provide a completed and signed Safety Questionnaire at the time of bid opening may result in disqualification of the bid as non-responsive.

### 1. Bidder Information:

Company Name: \_\_\_\_\_

DDC Project Number: \_\_\_\_\_

Company Size: \_\_\_\_\_ Ten (10) employees or less  
\_\_\_\_\_ Greater than ten (10) employees

\_\_\_\_\_ Company has previously worked for DDC

### 2. Type(s) of Construction Work

TYPE OF WORK	LAST 3 YEARS	THIS PROJECT
General Building Construction	_____	_____
Residential Building Construction	_____	_____
Nonresidential Building Construction	_____	_____
Heavy Construction, except building	_____	_____
Highway and Street Construction	_____	_____
Heavy Construction, except highways	_____	_____
Plumbing, Heating, HVAC	_____	_____
Painting and Paper Hanging	_____	_____
Electrical Work	_____	_____
Masonry, Stonework and Plastering	_____	_____
Carpentry and Floor Work	_____	_____
Roofing, Siding, and Sheet Metal	_____	_____
Concrete Work	_____	_____
Specialty Trade Contracting	_____	_____
Asbestos Abatement	_____	_____
Other (specify)	_____	_____

### 3. Experience Modification Rate:

The Experience Modification Rate (EMR) is a rating generated by the National Council of Compensation Insurance (NCCI). This rating is used to determine the contractor's premium for worker's compensation insurance. The contractor may obtain its EMR by contacting its insurance broker or the NCCI. If the contractor cannot obtain its EMR, it must submit a written explanation as to why.

The Contractor must indicate its Intrastate and Interstate EMR for the past three years. [Note: For contractors with less than three years of experience, the EMR will be considered to be 1.00].

YEAR	<u>INTRASTATE</u> RATE	<u>INTERSTATE</u> RATE
_____	_____	_____
_____	_____	_____
_____	_____	_____

If the Intrastate and/or Interstate EMR for any of the past three years is greater than 1.00, the contractor must attach, to this questionnaire, a written explanation for the rating and identify what corrective action was taken to correct the situation resulting in that rating.

#### 4. OSHA Information:

\_\_\_\_\_ Contractor has received a willful violation issued by OSHA or New York City Department of Buildings (NYCDOB) within the last three years.

\_\_\_\_\_ Contractor has had an incident requiring OSHA notification within 8 hours (i.e., fatality, or hospitalization of three or more employees).

The Occupational Safety and Health Act (OSHA) of 1970 requires employers with ten or more employees, on a yearly basis to complete and maintain on file the form entitled "Log of Work-related Injuries and Illnesses". This form is commonly referred to as the OSHA 300 Log (OSHA 200 Log for 2001 and earlier).

The OSHA 300 Log must be submitted for the last three years for contractors with more than ten employees.

The Contractor must indicate the total number of hours worked by its employees, as reflected in payroll records for the past three years.

The contractor must submit the Incident Rate for Lost Time Injuries (the Incident Rate) for the past three years. The Incident Rate is calculated in accordance with the formula set forth below. For each given year, the total number of incidents is the total number of non-fatal injuries and illnesses reported on the OSHA 300 Log. The 200,000 hours represents the equivalent of 100 employees working forty hours a week, fifty weeks per year.

$$\text{Incident Rate} = \frac{\text{Total Number of Incidents} \times 200,000}{\text{Total Number of Hours Worked by Employees}}$$

YEAR	TOTAL NUMBERS OF HOURS WORKED BY EMPLOYEES	INCIDENT RATE
_____	_____	_____
_____	_____	_____
_____	_____	_____

If the contractor's Incident Rate for any of the past three years is one point higher than the Incident Rate for the type of construction it performs (listed below), the contractor must attach, to this questionnaire, a written explanation for the relatively high rate.

General Building Construction	8.5
Residential Building Construction	7.0
Nonresidential Building Construction	10.2
Heavy Construction, except building	8.7
Highway and Street Construction	9.7
Heavy Construction, except highways	8.3
Plumbing, Heating, HVAC	11.3
Painting and Paper Hanging	6.9
Electrical Work	9.5
Masonry, Stonework and Plastering	10.5
Carpentry and Floor Work	12.2
Roofing, Siding, and Sheet Metal	10.3
Concrete Work	8.6
Specialty Trade Contracting	8.6

##### 5. Safety Performance on Previous DDC Project(s)

\_\_\_\_\_ Contractor previously audited by the DDC Office of Site Safety.

DDC Project Number(s): \_\_\_\_\_  
\_\_\_\_\_

\_\_\_\_\_ Accident on previous DDC Project(s).

\_\_\_\_\_ Fatality or Life-altering Injury on DDC Project(s) within the last three years.  
[Examples of a life-altering injury include loss of limb, loss of a sense (e.g., sight, hearing), or loss of neurological function].

## Pre-Award Process

The bidder is advised that as part of the pre-award review of its bid, it may be required to submit the information described in Sections (A) through (D) below. If required, the bidder must submit such information within five (5) business days following receipt of notification from DDC that it is among the low bidders. Such notification from DDC will be by facsimile or in writing and will specify the types of information which must be submitted.

**In the event the bidder fails to submit the required information within the specified time frame, its bid may be rejected as nonresponsive.**

\*\*\*\*\*

- (A) **Project Reference Form:** If required, the bidder must complete and submit the Project Reference Form set forth on pages 28 through 30 of this Bid Booklet. The Project Reference Form consists of 3 parts: (1) Similar Contracts Completed by the Bidder, (2) Contracts Currently Under Construction by the Bidder, and (3) Pending Contracts Not Yet Started by the Bidder.
- (B) **Copy of License:** If required, the bidder must submit a copy of the license under which the bidder will be performing the work. Such license must clearly show the following: (1) Name of the Licensee, (2) License Number, and (3) Expiration date of the License. A copy of the license will be required from bidders for the following contracts: Plumbing Work, Electrical Work and Asbestos Abatement.
- (C) **Financial Information:** If required, the bidder must submit the financial information described below:

- (1) **Audited Financial Statements:** Financial statements (Balance Sheet and Income Statement) of the entity submitting the bid, as audited by an independent auditor licensed to practice as a certified public accountant (CPA). Audited financial statements for the three most recent fiscal years must be submitted. Each such financial statement must include the auditor's standard report.

If the bidder does not have audited financial statements, it must submit an affidavit attesting to the fact that the bidder does not have such statements. In addition, the bidder must submit the following documentation covering the three most recent fiscal years: signed federal tax returns, unaudited financial statements, and a "certified review letter" from a certified public accountant (CPA) verifying the unaudited financial statements.

Unless the most recent audited or unaudited financial statement was issued within ninety (90) days, the bidder must submit interim financial information that includes data on financial position and results of operation (income data) for the current fiscal year. Such information may be summarized on a monthly or quarterly basis or at other intervals.

- (2) **Schedule of Aged Accounts Receivable,** including portion due within ninety (90) days.
- (D) **Project Specific Information:** If required, the bidder must submit the project specific information described below:
- (1) Statement indicating the number of years of experience the bidder has had and in what type of construction.
- (2) Resumes of all key personnel to be involved in the project, including the proposed project superintendent.
- (3) List of significant pieces of equipment expected to be used for the contract, and whether such equipment is owned or leased.

- (4) Description of work expected to be subcontracted, and to what firms, if known.
- (5) List of key material suppliers.
- (6) Preliminary bar chart time schedule
- (7) Contractor's expected means of financing the project. This should be based on the assumption that the contractor is required to finance 2X average monthly billings throughout the contract period.
- (8) Any other issues the contractor sees as impacting his ability to complete the project according to the contract.

In addition to the information described in Sections (A) through (D) above, the bidder shall submit such additional information as the Commissioner may require, including without limitation, an explanation or justification for specific unit price items.

The bidder is further advised that it may be required to attend a pre-award meeting with DDC representatives. If such a meeting is convened, the bidder will be advised as to any additional material to be provided.

**A. PROJECT REFERENCES – SIMILAR CONTRACTS COMPLETED BY THE BIDDER**

List all contracts substantially completed within the last 4 years similar to the contract being awarded, up to a maximum of 10, in descending order of date of substantial completion.

Project & Location	Contract Type	Contract Amount (\$000)	Date Completed	Owner Reference & Tel. No.	Architect/Engineer Reference & Tel. No. if different from owner

**B. PROJECT REFERENCES – CONTRACTS CURRENTLY UNDER CONSTRUCTION BY THE BIDDER**

List all contracts currently under construction even if they are not similar to the contract being awarded.

Project & Location	Contract Type	Contract Amount (\$000)	Subcontracted to Others (\$000)	Uncompleted Portion (\$000)	Date Scheduled to Complete	Owner Reference & Tel. No.	Architect/Engineer Reference & Tel. No. if different from owner

**C. PROJECT REFERENCES – PENDING CONTRACTS NOT YET STARTED BY THE BIDDER**

List all contracts awarded to or won by the bidder but not yet started.

Project & Location	Contract Type	Contract Amount (\$000)	Date Scheduled to Start	Owner Reference & Tel. No.	Architect/Engineer Reference & Tel. No. if different from owner

## VENDEX COMPLIANCE

(A) **Vendex Fees:** Pursuant to Procurement Policy Board Rule 2-08(f)(2), the contractor will be charged a fee for administration of the VENDEX system, including the Vendor Name Check process, if a Vendor Name Check review is required to be conducted by the Department of Investigation. The contractor shall also be required to pay the applicable required fees for any of its subcontractors for which Vendor Name Check reviews are required. The fee(s) will be deducted from payments made to the contractor under the contract. For contracts with an estimated value of less than or equal to \$1,000,000, the fee will be \$175 per Vendor Name Check review. For contracts with an estimated value of greater than \$1,000,000, the fee will be \$350 per Vendor Name Check review.

(B) **Confirmation of Vendex Compliance:** The Bidder shall submit this Confirmation of Vendex Compliance to the Department of Design and Construction, Contracts Section, 30-30 Thomson Avenue – First Floor, Long Island City, NY 11101.

**Bid Information:** The Bidder shall complete the bid information set forth below.

Name of Bidder: \_\_\_\_\_  
Bidder's Address: \_\_\_\_\_  
Bidder's Telephone Number: \_\_\_\_\_  
Bidder's Fax Number: \_\_\_\_\_  
Date of Bid Opening: \_\_\_\_\_  
Project ID: \_\_\_\_\_

**Vendex Compliance:** To demonstrate compliance with Vendex requirements, the Bidder shall complete either Section (1) or Section (2) below, whichever applies.

(1) **Submission of Vendex Questionnaires to MOCS:** By signing in the space provided below, the Bidder certifies that as of the date specified below, the Bidder has submitted Vendex Questionnaires to the Mayor's Office of Contract Services, Attn: VENDEX, 253 Broadway, 9<sup>th</sup> Floor, New York, New York 10007.

Date of Submission: \_\_\_\_\_

By: \_\_\_\_\_  
(Signature of Partner or corporate officer)

Print Name: \_\_\_\_\_

(2) **Submission of Certification of No Change to DDC:** By signing in the space provided below, the Bidder certifies that it has read the instructions in a "Vendor's Guide to Vendex" and that such instructions do not require the Bidder to submit Vendex Questionnaires. The Bidder has completed **TWO ORIGINALS** of the Certification of No Change set forth on the next page of this Bid Booklet.

## **IRAN DIVESTMENT ACT COMPLIANCE RIDER**

### **FOR NEW YORK CITY CONTRACTORS**

The Iran Divestment Act of 2012, effective as of April 12, 2012, is codified at State Finance Law ("SFL") §165-a and General Municipal Law ("GML") §103-g. The Iran Divestment Act, with certain exceptions, prohibits municipalities, including the City, from entering into contracts with persons engaged in investment activities in the energy sector of Iran. Pursuant to the terms set forth in SFL §165-a and GML §103-g, a person engages in investment activities in the energy sector of Iran if:

- (a) The person provides goods or services of twenty million dollars or more in the energy sector of Iran, including a person that provides oil or liquefied natural gas tankers, or products used to construct or maintain pipelines used to transport oil or liquefied natural gas, for the energy sector of Iran; or
- (b) The person is a financial institution that extends twenty million dollars or more in credit to another person, for forty-five days or more, if that person will use the credit to provide goods or services in the energy sector in Iran and is identified on a list created pursuant to paragraph (b) of subdivision three of Section 165-a of the State Finance Law and maintained by the Commissioner of the Office of General Services.

A bid or proposal shall not be considered for award nor shall any award be made where the bidder or proposer fails to submit a signed and verified bidder's certification.

Each bidder or proposer must certify that it is not on the list of entities engaged in investment activities in Iran created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law. In any case where the bidder or proposer cannot certify that they are not on such list, the bidder or proposer shall so state and shall furnish with the bid or proposal a signed statement which sets forth in detail the reasons why such statement cannot be made. The City of New York may award a bid to a bidder who cannot make the certification on a case by case basis if:

- (1) The investment activities in Iran were made before the effective date of this section (i.e., April 12, 2012), the investment activities in Iran have not been expanded or renewed after the effective date of this section and the person has adopted, publicized and is implementing a formal plan to cease the investment activities in Iran and to refrain from engaging in any new investments in Iran: or
- (2) The City makes a determination that the goods or services are necessary for the City to perform its functions and that, absent such an exemption, the City would be unable to obtain the goods or services for which the contract is offered. Such determination shall be made in writing and shall be a public document.

**BIDDER'S CERTIFICATION OF COMPLIANCE WITH  
IRAN DIVESTMENT ACT**

Pursuant to General Municipal Law §103-g, which generally prohibits the City from entering into contracts with persons engaged in investment activities in the energy sector of Iran, the bidder/proposer submits the following certification:

*[Please Check One]*

**BIDDER'S CERTIFICATION**

- ☐ By submission of this bid or proposal, each bidder/proposer and each person signing on behalf of any bidder/proposer certifies, and in the case of a joint bid each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief, that each bidder/proposer is not on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law.
- ☐ I am unable to certify that my name and the name of the bidder/proposer does not appear on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law. I have attached a signed statement setting forth in detail why I cannot so certify.

7. \_\_\_\_\_  
Street Address City State Zip Code
8. \_\_\_\_\_  
(Chief Operating Officer) First Name Last Name Telephone Number Fax Number
9. \_\_\_\_\_  
Designated Equal Opportunity Compliance Officer (if same as Item #8, write "Same") Telephone Number
10. \_\_\_\_\_  
Name of Prime Contractor and Contact Person (if same as item #6, write "Same")
11. Number of employees in your company: \_\_\_\_\_
12. Contract information:  
(a) \_\_\_\_\_ Contracting Agency (City Agency)  
(b) \_\_\_\_\_ Contract Amount  
(c) \_\_\_\_\_ Procurement Identification Number (PIN)  
(d) \_\_\_\_\_ Contract Registration Number (CT#)  
(e) \_\_\_\_\_ Project Commence Date  
(f) \_\_\_\_\_ Projected Completion Date

FOR OFFICIAL USE ONLY: File No. \_\_\_\_\_

(g) Description and location of proposed contract:

---

---

---

---

13. Has your firm been reviewed by the Division of Labor Services (DLS) within the past 36 months and issued a Certificate of Approval? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach a copy of the certificate.

14. Has DLS within the past month reviewed an Employment Report submission for your company and issued a Conditional Certificate of Approval? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach a copy of the certificate.

**NOTE: DLS WILL NOT ISSUE A CONTINUED CERTIFICATE OF APPROVAL IN CONNECTION WITH THIS CONTRACT UNLESS THE REQUIRED CORRECTIVE ACTIONS IN PRIOR CONDITIONAL CERTIFICATES OF APPROVAL HAVE BEEN TAKEN**

15. Has an Employment Report already been submitted for a different contract (not covered by this Employment Report) for which you have not yet received compliance certificate? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes,

Date submitted: \_\_\_\_\_ Agency to which submitted: \_\_\_\_\_

Name of Agency Person: First Name \_\_\_\_\_ Last Name \_\_\_\_\_

Contract No. : \_\_\_\_\_ Telephone: \_\_\_\_\_

16. Has your company in the past 36 months been audited by the United States Department of Labor, Office of Federal Contract Compliance Programs (OFCCP)? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes,

(a) Name and address of OFCCP office: \_\_\_\_\_

(b) Was a Certificate of Equal Employment Compliance issued within the past 24 months? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach a copy of such certificate.

(c) Were any corrective actions required or agreed to? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach a copy of such requirements or agreements.

(d) Were any deficiencies found? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach a copy of such findings.

17. Is your company or its affiliates a member or members of an employers' trade association which is responsible for negotiating collective bargaining agreements (CBA) which affect construction site hiring? Yes \_\_\_\_\_ No \_\_\_\_\_  
If Yes, attach a list of such associations and all applicable CBA's.

FOR OFFICIAL USE ONLY: File No. \_\_\_\_\_

## PART II: DOCUMENTS REQUIRED

18. For the following policies or practices, attach the relevant documents (e.g., printed booklets, brochures, manuals, memoranda, etc.) If the policy(ies) are unwritten, attach a full explanation of the practices. See instructions.

- ☐ (a) Health benefit coverage/description(s) for all management, nonunion and union employees (whether company or union administered)
- ☐ (b) Disability, life, other insurance coverage/description
- ☐ (c) Employee Policy/Handbook
- ☐ (d) Personnel Policy/Manual
- ☐ (e) Supervisor's Policy/Manual
- ☐ (f) Pension plan or 401k coverage/description for all management, nonunion and union employees, whether company or union administered.
- ☐ (g) Collective bargaining agreement(s)
- ☐ (h) Employment Application(s)
- ☐ (i) Employee evaluation policy/form(s)
- ☐ (j) Does your firm have medical and/or non-medical (i.e. education, military, personal, pregnancy, child care) leave policy?

19. To comply with the Immigration Reform and Control Act of 1986 when and of whom does your firm require the completion of an I-9 form?

- |  |                              |                             |
|--|------------------------------|-----------------------------|
| (a) Prior to job offer                     | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (b) After a conditional job offer          | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (c) After a job offer                      | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (d) Within the first three days on the job | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (e) To some applicants                     | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (f) To all applicants                      | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (g) To some employees                      | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| (h) To all employees                       | Yes <input type="checkbox"/> | No <input type="checkbox"/> |

20. Explain where and how completed I-9 Forms, with their supportive documentation are maintained and made accessible.

---

---

21. Does your firm or any of its collective bargaining agreements require job applicants to take a medical examination?  
Yes ☐ No ☐

If Yes, is the medical examination given:

FOR OFFICIAL USE ONLY: File No

- |                                   |           |          |
|-----------------------------------|-----------|----------|
| (a) Prior to the job offer        | Yes _____ | No _____ |
| (b) After a conditional job offer | Yes _____ | No _____ |
| (c) After a job offer             | Yes _____ | No _____ |
| (d) To all applicants             | Yes _____ | No _____ |
| (e) Only to some applicants       | Yes _____ | No _____ |

If Yes, list for which applicants below and attach copies of all medical examination or questionnaire forms and instructions utilized for these examinations.

---

---

22. Do you have a written equal opportunity (EEO) policy? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, list the document(s) and page number(s) where these written policies are located.

---

---

23. Does the company have a current affirmative action plan(s) (AAP)

\_\_\_\_\_ Minorities and Women  
 \_\_\_\_\_ Individuals with handicaps  
 \_\_\_\_\_ Other. Please specify \_\_\_\_\_

---

24. Does your firm or collective bargaining agreement(s) have an internal grievance procedure with respect to EEO complaints? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, please attach a copy of this policy.

If No, attach a report detailing your firm's unwritten procedure for handling EEO complaints.

25. Has any employee, within the past three years, filed a complaint pursuant to an internal grievance procedure or with any official of your firm with respect to equal employment opportunity? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach an internal complaint log. See instructions.

26. Has your firm, within the past three years, been named as a defendant (or respondent) in any administrative or judicial action where the complainant (plaintiff) alleged violation of any anti-discrimination or affirmative action laws? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, attach a log. See instructions.

27. Are there any jobs for which there are physical qualification? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, list the job(s), submit a job description and state the reason(s) for the qualification(s).

---

---

28. Are there any jobs for which there are age, race, color, national origin, sex, creed, disability, marital status, sexual orientation, or citizenship qualifications? Yes \_\_\_\_\_ No \_\_\_\_\_

If Yes, list the job(s), submit a job description and state the reason(s) for the qualification(s).

Revised 11/10

## Division of Labor Services

### WHO MUST FILE AN EMPLOYMENT REPORT

An Employment Report (ER) must be filed if you meet the following conditions:

CONTRACTOR	CONTRACT VALUE	Submission Requirement
Prime Contractor	\$1,000,000 or greater ( <i>city, state</i> )	Construction Employment Report
	\$10,000 or greater ( <i>federally and/or federally assisted</i> )	
Subcontractor	\$750,000 or greater	Construction Employment Report
	Less than \$750,000	Less than \$750,000 Certificate
	\$10,000 or greater ( <i>federally and/or federally assisted</i> )	Construction Employment Report

### WHERE TO FILE

ERs must be filed directly with the Division of Labor Services (DLS).

### DLS REVIEW PROCESS

In accordance with Executive Order 50 (EO 50), upon receipt by DLS of a completed ER, DLS conducts a review of the contractor's current employment policies, practices and procedures, as well as perform a statistical analysis of the contractor's workforce, if necessary. The process is as follows:

1. Within five (5) business days, DLS will review the ER for completeness and accuracy. If any information is omitted or incorrect, or if necessary documents are not submitted, the submission shall be deemed incomplete and DLS will inform the contractor. The substantive compliance review does not commence until the submission is complete. **An incomplete submission will delay the review process and may preclude or interrupt the contract approval.**

- 1a. If the City is allocating funds to this project, you must provide the name of the contracting agency.

2. If the ER submission is complete, the compliance review will proceed, resulting in one of the following:

#### Certificate of Approval

The contractor is found to be in compliance with all applicable laws and regulations. The approval is valid for 36 months.

#### Continued Approval Certificate

The contractor has been issued a Certificate of Approval in the previous 36 months which is good for the applicable contract.

#### Conditional Certificate of Compliance

FOR OFFICIAL USE ONLY: File No. \_\_\_\_\_

The contractor is required to take corrective actions in order to be in compliance with EO 50. The contractor must meet the conditions within three months of the issue of the Conditional Certificate.

### **Determination of Nonperformance**

The contractor has failed to take the required corrective actions stipulated in the Conditional Certificate. A determination of nonperformance may prevent a contractor from receiving an DLS Approval.

3. Please indicate if you would like assistance from SBS in identifying certified M/WBEs for contracting opportunities.

3a. Please provide a copy of your project labor agreement which is negotiated through an employer trade association.

## **HOW TO COMPLETE THE EMPLOYMENT REPORT**

### **Contents**

#### **General Information**

**Part I: Company/Contract Information**

**Part II: Employment Policies and Practices**

**Part III: Contract Bid Information and Projected and Current Workforce Forms**

**Signature Page**

## **PART I: CONTRACTOR/SUBCONTRACTOR INFORMATION**

Question 5: Please provide the Employer Identification Number or Federal Tax I.D.

Questions 6 – 9: Please provide the requested company information. All contracts must have a designated Equal Employment Officer.

Question 10: If you are a subcontractor, you must state the name of the contractor for whom you are providing the construction services.

Question 11: Please indicate how many employees are in your company.

Question 12 (a-f): Please provide all relevant information requested in 12 (a) to (f).

Question 12(g): Provide a description of the trade work you will perform on this project and the address where the work will be performed. Subcontractors can obtain this information from the contract they have with their contractor.

Questions 13 – 15: If your company has received a valid Certificate of Approval within the past 36 months, been audited by the United States Department of Labor, Office of Federal Contract Compliance Programs (OFCCP), or if your company has submitted an ER for a different contract for which you have not yet received a compliance certificate, then you only need to complete and submit the following:

- General Information section
- Part I - Contractor/Subcontractor Information
- Form B - Projected Workforce
- Signature Page

If your company is currently waiting for an approval on another contract previously submitted, be certain to identify the date on which you submitted the completed Employment Report, the name of the City contracting agency with which the contract was made, and the name and telephone number of the person to whom the Employment Report was submitted.

If your company was issued a Conditional Certificate of Approval, all required corrective actions must have been taken or DLS will not issue a Continued Certificate.

Question 16: If the company was audited by the OFCCP, also provide the following:

- Identify the reviewing OFCCP office by its name and address
- If an unconditional certificate of compliance was issued by the OFCCP, attach a copy of the certificate in lieu of completing Parts II and III;

FOR OFFICIAL USE ONLY: File No. \_\_\_\_\_

Revised 11/12

- Include copies of all corrective actions and documentation of OFCCP's performance; and
- Provide a copy of all stated OFCCP findings.

Question 17: Please provide a copy of any Collective Bargaining Agreement(s) which is negotiated through an employer trade association on behalf of your organization or any of its affiliates.

## **PART II: EMPLOYMENT POLICIES AND PRACTICES**

*Remember to label all documents with the question number for which they are submitted.*

Questions 18a – j: You must respond to the questions as to whether or not your firm has documents reflecting written policies, benefits and procedures. If so, then you must identify by name each document in which the policy(ies), procedure(s) and benefit(s) is located and submit copies of all of the document(s). If your firm follows unwritten practices or procedures, include an explanation of how they operate. Please submit the most current document(s), including all applicable amendments. Label each document and/or unwritten practice according to the question to which it corresponds (e.g. 18a, 18b, etc.)

Questions 19a – h: Inquires about the manner/methods by which you comply with the requirements of the Immigration Reform and Control Act of 1986 (IRCA).

Question 20: Inquires into where and how I-9 forms are maintained and stored.

Questions 21a – e: Inquires into whether or not there is a requirement that an applicant or employee be subjected to a medical examination at any given time. Copies of the medical information questionnaire and instructions must be submitted with the Employment Report.

Question 22: Indicate the existence and location of all statements of your firm's Equal Employment Opportunity policy and attach a copy of each statement.

Question 23: Submit any current Affirmative Action Plan(s) created pursuant to Executive Order 11246.

Question 24: If your firm or collective bargaining agreement has an internal grievance procedure, indicate this and submit a copy of the policy and procedure. If unwritten, explain its nature and operation. Explain how your firm's procedure addresses EEO complaints.

Question 25: If your employees have used the procedure in the last three (3) years, please submit an explanation in the format indicated below:

1. Number of complaint(s)	2. Nature of the complaint(s)	3. Position(s) of the complainant(s)	4. Was an investigation conducted? Y/N	5. Current status of the disposition
---------------------------	-------------------------------	--------------------------------------	---	--------------------------------------

Question 26: Indicate whether in the past three (3) years complaints have been filed with a court of law or administrative agency, naming your company as a defendant (or respondent) in a complaint alleging violation of any anti-discrimination or affirmative action laws. If yes, develop and submit a log to show, for each administrative/and or judicial action filed, the following information:

1. Name(s) of complainant(s)	2. Administrative agency or court in which action was filed	3. Nature of the complaint(s)	4. Current status	5. If not pending, the complaint's disposition
------------------------------	---	-------------------------------	-------------------	--

Question 27: Identify each job for which a physical qualification exists. Identify and explain the physical qualification(s) for each stated job. Submit job descriptions for each job and the reasons for the qualifications.

OFFICIAL USE ONLY: File No. \_\_\_\_\_

Question 28: Identify each job for which there exists any qualification related to age, race, color, national origin, sex, creed, disability, marital status, sexual orientation or citizenship status. Identify and explain the specific related qualification for each job stated. Submit job descriptions for each job and the reasons for the qualifications.

### PART III: CONTRACT BID INFORMATION AND PROJECTED AND CURRENT WORKFORCE FORMS

#### FORM A: CONTRACT BID INFORMATION – USE OF SUBCONTRACTORS/TRADES

Your projections for the utilization of subcontractors on the proposed contract are to be provided in this section. A chart has been provided for the identification of subcontractors. Information is to be provided to the extent known at the time the ER is filed for review by DLS. If the subcontractor's name is unknown, then write "unknown". Under "ownership", enter the appropriate race/ethnic and gender code. If the contract is federally funded or assisted and the subcontractor is being utilized in accordance with applicable federal requirements with respect to Minority Business Enterprise or Woman Business Enterprise requirements, enter the appropriate code. This will also apply to state funded contracts with similar requirements for minority and female owned businesses.

#### FORM B: PROJECTED WORKFORCE FOR WORK TO BE PERFORMED ON THIS PROJECT

For each trade to be engaged by your company for this project, enter the projected workforce for Males and Females by trade classification in the charts provided.

#### FORM C: CURRENT WORKFORCE FOR WORK TO BE PERFORMED ON THIS PROJECT

For each trade *currently* engaged by your company for all work performed in NYC, enter the current workforce for Males and Females by trade classification in the charts provided.

### SIGNATURE PAGE

The signatory of this Employment Report and all other documents submitted to DLS must be an official authorized to enter into a binding legal agreement. The signature page must be completed in its entirety and notarized. Only original signatures will be accepted.

## **NOTICE:**

### **THIS CONTRACT IS NOT SUBJECT TO THE REQUIREMENTS OF THE WICKS LAW FOR SEPARATE PRIME CONTRACTORS**

This contract is subject to a Project Labor Agreement ("PLA"). In accordance with the Labor Law, the requirements of the Wicks Law for separate prime contractors do not apply to any project that is covered by a PLA. Accordingly, the requirements of the Wicks Law for separate prime contractors do not apply to this Project. However, the Contract Documents for this Project (General Conditions, Drawings and Specifications) were prepared as if the requirements of the Wicks Law for separate prime contractors did apply. To correct this situation, the bidder is advised that the Contract Documents are revised as set forth below.

- (A) Delete any and all references to separate responsibilities, separate specifications, separate drawings and/or separate contracts for the four subdivisions of the work listed below:
- General Construction Work (Contract No. 1)
  - Plumbing Work (Contract No. 2)
  - HVAC & Fire Protection Work (Contract No. 3)
  - Electrical Work (Contract No. 4)
- (B) Revise all such references to indicate that:
- The Project consists of a single contract, the Contract for General Construction Work.
  - All responsibilities and obligations in the Contract Documents assigned to the separate Contractors for the four subdivisions of the work listed above are the responsibility of the Contractor for General Construction Work.
  - The Contractor for General Construction Work is responsible for the performance of all required work for the Project as set forth in the Contract Documents, including all responsibilities and obligations assigned to the separate Contractors for the four subdivisions of the work listed above.
- (C) Revise any and all references to Contracts Nos. 2, 3 and 4 to refer to Contract No. 1.
- (D) Revise the specifications for plumbing work to require Contractor for General Construction Work to engage a Licensed Plumber to perform the required plumbing work.
- (E) Revise the specifications for electrical work to require Contractor for General Construction Work to engage a Licensed Electrician to perform the required electrical work.

## **NOTICE:**

### **THIS CONTRACT IS SUBJECT TO A PROJECT LABOR AGREEMENT**

This contract is subject to the attached Project Labor Agreement ("PLA") entered into between the City and the Building and Construction Trades Council of Greater New York ("BCTC") affiliated Local Unions. By submitting a bid, the Contractor agrees that if awarded the Contract the PLA is binding on the Contractor and all subcontractors of all tiers. The bidder to be awarded the contract will be required to execute the attached Letter of Assent prior to award. Contractor shall include in any subcontract a requirement that the subcontractor, and sub-subcontractors of all tiers, become signatory to and bound to the PLA with respect to the subcontracted work. Contractor will also be required to have all subcontractors of all tiers execute the attached Letter of Assent prior to such subcontractors performing any work on the Project. Bidders are advised that the City of New York and City agencies have entered into multiple PLAs. The terms of each PLA, while similar, are not identical. All bidders should carefully read the entire PLA that governs this Contract.

To the extent that the terms of the PLA conflict with any other terms of the invitation for bids, including the Standard Construction Contract, the terms of the PLA shall govern. For example, the PLA section that authorizes the scheduling of a four-day work, ten hours per day on straight time at the commencement of the job, PLA Article 12, section 1, overrides the Standard Construction Contract's provision concerning a five-day work week with a maximum of eight hours in a day, Standard Construction Contract Article 37.2.1. Where, however, the invitation for bids, including the Standard Construction Contract, requires the approval of the City/Department, the PLA does not supersede or eliminate that requirement.

In addition to the various provisions regarding work rules, Contractors should take special note of the requirement that Contractors and Subcontractors make payments to designated employee benefit funds. See PLA Article 11, Section 2. The PLA also contains provisions for what occurs when a contractor or a subcontractor fails to make required payments into the benefit funds, including potentially the direct payment by the City to the benefit fund of monies owed and corresponding withholding of payments to the Contractor. See PLA Article 11, Section 2. The City strongly advises Contractors to read these provisions carefully and to include appropriate provisions in subcontracts addressing these possibilities.

This Contract is subject to the apprenticeship requirements of Labor Law §222 and to apprenticeship requirements established by the Department pursuant to Labor Law §816-b. Please be advised that the involved trades have apprenticeship programs that meet the statutory requirements of Labor Law 222(e) and the requirements set by the Department pursuant to Labor Law §816-b, contractors and subcontractors who agree to perform the Work pursuant to the PLA are participating in such apprenticeship programs within the meaning of Labor Law §222(e) and the Department's directive.

If this Contract is subject to the Minority-Owned and Women-Owned Business Enterprise ("M/WBE") program created by Local Law 129, the specific requirements of M/WBE participation for this Contract are set forth in Schedule B entitled the "Subcontractor Utilization Plan", and are detailed in a separate Notice to Prospective Contractors included with this bid package. If such requirements are included with this Contract, the City strongly advises Contractors to read those provisions, as well as PLA Article 4, Section 2(C), carefully. A list of M/WBE firms may be obtained from the DSBS website at [www.nyc.gov/buycertified](http://www.nyc.gov/buycertified), by emailing DSBS at [buyer@sbs.nyc.gov](mailto:buyer@sbs.nyc.gov), by calling (212) 513-6356, or by visiting or writing DSBS at 110 William St., New York, New York, 10038, 7th floor. Eligible firms that have not yet been certified may contact DSBS in order to seek certification by visiting [www.nyc.gov/getcertified](http://www.nyc.gov/getcertified), emailing [MWBE@sbs.nyc.gov](mailto:MWBE@sbs.nyc.gov), or calling the DSBS certification helpline at (212) 513-6311.

The local collective bargaining agreements (CBAs) that are incorporated into the PLA as PLA Schedule A Agreements are available on computer disk from the Department's Contract Officer upon the request of any prospective bidder. Please note that the "PLA Schedule A" is distinct from the Department's Schedule A that is a part of this invitation for bids.

A contact list for the participating unions is set forth after the FAQs.

Below are answers to frequently asked questions (FAQs) about this PLA:

**Q1. Does a contractor need to be signatory with the unions in the NYC Building and Construction Trades Council in order to bid on projects under the PLA?**

A. No, any contractor may bid by signing and agreeing to the terms of the PLA. The contractor need not be signatory with these unions by any other labor agreement or for any other project.

**Q2. Does a contractor agreeing to the PLA and signing the Letter of Assent create a labor agreement with these unions outside of the project covered by the PLA?**

A. No, the PLA applies only to those projects that the Contractor agrees to perform under the PLA and makes no labor agreement beyond those projects.

**Q3. Does the PLA affect the subcontractors that a bidder may utilize on the project?**

A. Subject to the Department's approval of subcontractors pursuant to Article 17 of the Standard Construction Contract, a contractor may use any subcontractor, union or non-union, as long as the subcontractor signs and agrees to the terms of the PLA.

**Q4. Are bidders required to submit Letters of Assent signed by proposed subcontractors with their bid in order to be found responsive?**

A. No, bidders do not have to submit signed Letters of Assent from their subcontractors with their bid. Subcontractors, however, will be required to sign the letter of Assent prior to being approved by the Department.

**Q5. May a contractor or subcontractor use any of its existing employees to perform this work?**

A. Generally labor will be referred to the contractor from the respective signatory local unions. See PLA Article 4. However, contractors and subcontractors may continue to use up to 12% of their existing, qualifying labor force for this work, in accordance with the terms of PLA Article 4, Section 2B. Certified MWBEs for which participation goals are set pursuant to NYC Administrative Code §6-129 that are not signatory to any Schedule A CBAs may use their existing employees for the 2<sup>nd</sup>, 4<sup>th</sup>, 6<sup>th</sup> and 8<sup>th</sup> employee needed on the job if their contracts are valued at or under \$500,000. For contracts valued at above \$500,000 but under \$1,000,000, such certified MWBEs may use their own employees for the 2<sup>nd</sup>, 5<sup>th</sup> and 8<sup>th</sup> employees needed on the job in accordance with the provisions of PLA Article 4, Section 2C. If additional workers are needed by these MWBEs, the additional workers will be referred to the contractor from the signatory local unions subject to the contractor's right to meet 12% of the additional needs with its existing, qualifying employees.

**Q6. Must the City set MWBE participation goals for the particular project or contract in order for a certified MWBE to utilize the provisions of PLA Article 4, Section 2C?**

A. No. PLA Article 4, Section 2(C) specifies what categories of MWBEs are eligible to take advantage of this provision (i.e., those MWBEs for which the City is authorized to set participation goals under §6-129). For purposes of section 2(C), it is not necessary for the project to be subject to §6-129 or for the City to have actually set participation goals for the particular contract or project. The result is the same where a projects receives State funding and therefore is subject to the requirements of Article 15-A of the Executive Law.

**Q7. May a contractor bring in union members from locals that are not signatory unions?**

A. Referrals will be from the respective signatory locals and/or locals listed in schedule A of the PLA. Contractors may utilize 'traveler provisions' contained in the local collective bargaining agreements (local CBAs) where such provisions exist and/or in accordance with the provisions of PLA Article 4, Section 2.

**Q8. Does a non-union employee working under the PLA automatically become a union member?**

A. No, the non-union employee does not automatically become a union member by working on a project covered by the PLA. Non-union employees working under the PLA are subject to the union security provisions (i.e., union dues/agency shop fees) of the local CBAs while on the project. These employees will be enrolled in the appropriate benefit plans and earn credit toward various union benefit programs. See PLA Article 4, Section 6 and Article 11.

**Q9. Are all contractors and subcontractors working under the PLA, including non-union contractors and contractors signatory to collective bargaining agreements with locals other than those that are signatories to the PLA, required to make contributions to designated employee benefit funds?**

A. Contractors and subcontractors working under the PLA will be required to contribute on behalf of all employees covered by the PLA to established jointly trustee employee benefit funds designated in the Schedule A CBAs and required to be paid on public works under any applicable prevailing wage law. See PLA Article 11, Section 2. The Agency may withhold from amounts due the contractor any amounts required to be paid, but not actually paid into any such fund by the contractor or a subcontractor. See PLA Article 11, Section 2 C.

**Q10. What happens if a contractor or subcontractor fails to make a required payment to a designated employee benefit fund?**

A. The PLA sets forth a process for unions to address a contractor or a subcontractor's failure to make required payments. The process includes potentially the direct payment by the City to the benefit fund of monies owed and the corresponding withholding of payments to the Contractor. See PLA Article 11, Section 2. The City strongly advises Contractors to read these provisions carefully and to include appropriate provisions in subcontracts addressing these possibilities.

**Q11. Does signing on to the PLA satisfy the Apprenticeship Requirements established for this bid?**

A. Yes. By agreeing to perform the Work subject to the PLA, the bidder demonstrates compliance with the apprenticeship requirements imposed by this invitation for Bids.

**Q12. Does the PLA provide a standard work day across all the signatory trades?**

A. Yes, all signatory trades will work an eight (8) hour day, Monday through Friday with a day shift at straight time as the standard work week. The PLA also permits a contractor to schedule a four day [within Monday through Friday] work week, ten (10) hours per day at straight time if announced at the commencement of the project. See PLA Article 12, Section 1. This is an example where the terms of the PLA override provisions of the Standard Construction Contract (compare with section 37.2 of the Standard Construction Contract).

**Q13. Does the PLA create a common holiday schedule for all the signatory trades?**

A. Yes, the PLA recognizes eight (8) common holidays. See PLA Article 12, Section 4.

**Q14. Does the PLA provide for a standard policy for 'shift work' across all signatory trades?**

A. Yes, second and third shifts may be worked with a standard 5% premium pay. In addition, a day shift does not have to be scheduled in order to work the second and third shifts at the 1.05 hourly pay rate. See PLA Article 12, Section 3.

**Q15. May the Contractor schedule overtime work, including work on a weekend?**

A. Yes, the PLA permits the Contractor to schedule overtime work, including work on the weekends. See PLA Article 12, Sections 2, 3, and 5. To the extent that the Agency's approval is required before a Contractor may schedule or be paid for overtime, that approval is still required notwithstanding the PLA language.

**Q16. Are overtime payments affected by the PLA?**

A. Yes, all overtime pay incurred Monday through Saturday will be at time and one half (1 ½). There will be no stacking or pyramiding of overtime pay under any circumstances. See PLA Article 12, Section 2. Sunday and holiday overtime will be paid according to each trades CBA.

**Q17. Are there special provisions for Saturday work when a day is 'lost' during the week due to weather, power failure or other emergency?**

A. Yes, when this occurs the Contractor may schedule Saturday work at weekday rates. See PLA Article 12, Section 5.

**Q18. Does the PLA contain special provisions for the manning of Temporary Services?**

A. Yes. Where temporary services are required by specific request of the agency or construction manager, they shall be provided by the contractor's existing employees during working hours in which a shift is scheduled for employees of the contractor. The need for temporary services during non-working hours will be determined by the agency or construction manager. There will be no stacking of trades on temporary services. See PLA Article 15.

**Q19. What do the workers get paid when work is terminated early in a day due to inclement weather or otherwise cut short of 8 hours?**

A. The PLA provides that employees who report to work pursuant to regular schedule and not given work will be paid two hours of straight time. Work terminated early for severe weather or emergency conditions will be paid only for time actually worked. In other instances where work is terminated early, the worker will be paid for a full day. See PLA Article 12, Sections 6 and 8.

**Q20. Should a local collective bargaining agreement [local CBA] expire during the project will a work stoppage occur on a project subject to the PLA?**

A. No. All the signatory unions are bound by the 'no strike' agreement as to the PLA work. Work will continue under the PLA and the otherwise expired local CBA(s) until the new local CBA(s) are negotiated and in effect. See PLA Articles 7 and 19.

**Q21. May a contractor working under the PLA be subject to a strike or other boycott activity by a signatory union at another site while the contractor is a signatory to the PLA?**

A. Yes. The PLA applies ONLY to work under the PLA and does not regulate labor relations at other sites even if those sites are in close proximity to PLA work.

**Q22. If a contractor has worked under other PLAs in the New York City area, are the provisions in this PLA generally the same as the others?**

A. While Project Labor Agreements often look similar to each other, and particular clauses are often used in multiple agreements, each PLA is a unique document and should be examined accordingly.

**Q23. What happens if a dispute occurs between the contractor and an employee during the project?**

A. The PLA contains a grievance and arbitration process to resolve disputes between the contractor and the employees. See PLA Article 9.

**Q24. What happens if there is a dispute between locals as to which local gets to provide employees for a particular project or a particular aspect of a project?**

A. The PLA provides for jurisdictional disputes to be resolved in accordance with the NY Plan. See PLA Article 10. A copy of the NY Plan is available upon request from the Department. The PLA provides that work is not to be disrupted or interrupted pending the resolution of any jurisdictional dispute. The work proceeds as assigned by the contractor until the dispute is resolved. See PLA Article 10, Section 3.

**PROJECT LABOR AGREEMENT COVERING SPECIFIED  
RENOVATION & REHABILITATION OF NEW YORK CITY OWNED  
FACILITIES & STRUCTURES**

**ARTICLE 1 - PREAMBLE**

WHEREAS, the City of New York, acting through the Department of Sanitation, desires to provide for the cost efficient, safe, quality, and timely completion of certain new construction ("Program Work," as defined in Article 3) in a manner designed to afford the lowest costs to the Agency and the Public it represents, and the advancement of permissible statutory objectives;

WHEREAS, this Project Labor Agreement will foster the achievement of these goals, inter alia, by:

(1) providing a mechanism for responding to the unique construction needs associated with this Program Work and achieving the most cost effective means of construction, including direct labor cost savings, by the Building and Construction Trades Council of Greater New York and Vicinity and the signatory Local Unions and their members waiving various shift and other hourly premiums and other work and pay practices which would otherwise apply to Program Work;

(2) expediting the construction process and otherwise minimizing the disruption to the covered Agency's ongoing operations at the facilities that are the subject of the Agreement;

(3) avoiding the costly delays of potential strikes, slowdowns, walkouts, picketing and other disruptions arising from work disputes, reducing jobsite friction on common situs worksites, and promoting labor harmony and peace for the duration of the Program Work;

(4) standardizing the terms and conditions governing the employment of labor on the Program Work;

(5) permitting wide flexibility in work scheduling and shift hours and times to allow maximum work to be done during off hours yet at affordable pay rates;

(6) permitting adjustments to work rules and staffing requirements from those which otherwise might obtain;

(7) providing comprehensive and standardized mechanisms for the settlement

Execution Version

of work disputes, including those relating to jurisdiction;

- (8) ensuring a reliable source of skilled and experienced labor; and
- (9) securing applicable New York State Labor Law exemptions.

WHEREAS, the Building and Construction Trades Council of Greater New York and Vicinity, its participating affiliated Local Unions and their members, desire to assist the City in meeting these operational needs and objectives as well as to provide for stability, security and work opportunities which are afforded by this Project Labor Agreement; and

WHEREAS, the Parties desire to maximize Program Work safety conditions for both workers and the community in the project area.

NOW, THEREFORE, the Parties enter into this Agreement:

## **SECTION 1. PARTIES TO THE AGREEMENT**

This is a Project Labor Agreement ("Agreement") entered into by the New York City Department of Sanitation, including in its capacity as construction manager of covered projects and/or on behalf of any third party construction manager which may be utilized, and the Building and Construction Trades Council of Greater New York and Vicinity ("Council") (on behalf of itself) and the signatory affiliated Local Union's ("Unions" or "Local Unions"). The Council and each signatory Local Union hereby warrants and represents that it has been duly authorized to enter into this Agreement.

## **ARTICLE 2 - GENERAL CONDITIONS**

### **SECTION 1. DEFINITIONS**

Throughout this Agreement, the various Union parties including the Building and Construction Trades Council of Greater New York and Vicinity and its participating affiliated Local Unions, are referred to singularly and collectively as "Union(s)" or "Local Unions"; the

term "Contractor(s)" shall include any Construction Manager, General Contractor and all other contractors, and subcontractors of all tiers engaged in Program Work within the scope of this Agreement as defined in Article 3; "Agency" means the New York City Department of Sanitation (DSNY); when the Agency acts as Construction Manager, unless otherwise provided, it has the rights and obligations of a "Construction Manager" in addition to the rights and obligations of the Agency; the Building and Construction Trades Council of Greater New York and Vicinity is referred to as the "Council"; and the work covered by this Agreement (as defined in Article 3) is referred to as "Program Work."

## **SECTION 2. CONDITIONS FOR AGREEMENT TO BECOME EFFECTIVE**

This Agreement shall not become effective unless each of the following conditions are met: the Agreement is executed by (1) the Council, on behalf of itself, (2) the participating affiliated Local Unions; and (3) the commissioner of the Agency or his designee.

## **SECTION 3. ENTITIES BOUND & ADMINISTRATION OF AGREEMENT**

This Agreement shall be binding on all participating Unions and their affiliates, the Construction Manager (in its capacity as such) and all Contractors of all tiers performing Program Work, as defined in Article 3. The Contractors shall include in any subcontract that they let for performance during the term of this Agreement a requirement that their subcontractors, of all tiers, become signatory and bound by this Agreement with respect to that subcontracted work falling within the scope of Article 3 and all Contractors (including subcontractors) performing Program Work shall be required to sign a "Letter of Assent" in the form annexed hereto as Exhibit "A". This Agreement shall be administered by the Agency or a Construction Manager or such other designee as may be named by the Agency or Construction Manager, on behalf of all Contractors.

## **SECTION 4. SUPREMACY CLAUSE**

This Agreement, together with the local Collective Bargaining Agreements appended hereto as Schedule A, represents the complete understanding of all signatories and supersedes any national agreement, local agreement or other collective bargaining agreement of any type which would otherwise apply to this Program Work, in whole or in part, except that Program Work which falls within the jurisdiction of the Operating Engineers Locals 14 and 15 and/or the Teamsters Local 282 will be performed under the terms and conditions set out in the Schedule A agreements of Operating Engineers Locals 14 and 15 and Teamsters Local 282. Subject to the foregoing, where a subject covered by the provisions of this Agreement is also covered by a Schedule A, the provisions of this Agreement shall prevail. It is further understood that no Contractor shall be required to sign any other agreement as a condition of performing Program Work. No practice, understanding or agreement between a Contractor and a Local Union which is not set forth in this Agreement shall be binding on this Program Work unless endorsed in writing by the Construction Manager or such other designee as may be designated by the Agency.

#### **SECTION 5. LIABILITY**

The liability of any Contractor and the liability of any Union under this Agreement shall be several and not joint. The Construction Manager and any Contractor shall not be liable for any violations of this Agreement by any other Contractor; and the Council and Local Unions shall not be liable for any violations of this Agreement by any other Union.

#### **SECTION 6. THE AGENCY**

The Agency (or Construction Manager where applicable) shall require in its bid specifications for all Program Work within the scope of Article 3 that all successful bidders, and their subcontractors of all tiers, become bound by, and signatory to, this Agreement. The

Agency (or Construction Manager) shall not be liable for any violation of this Agreement by any Contractor. It is understood that nothing in this Agreement shall be construed as limiting the sole discretion of the Agency or Construction Manager in determining which Contractors shall be awarded contracts for Program Work. It is further understood that the Agency or Construction Manager has sole discretion at any time to terminate, delay or suspend the Program Work, in whole or part, on any Program.

#### **SECTION 7. AVAILABILITY AND APPLICABILITY TO ALL SUCCESSFUL BIDDERS**

The Unions agree that this Agreement will be made available to, and will fully apply to, any successful bidder for (or subcontractor of) Program Work who becomes signatory thereto, without regard to whether that successful bidder (or subcontractor) performs work at other sites on either a union or non-union basis and without regard to whether employees of such successful bidder (or subcontractor) are, or are not, members of any unions. This Agreement shall not apply to the work of any Contractor which is performed at any location other than the site of Program Work.

#### **SECTION 8. SUBCONTRACTING**

Contractors will subcontract Program Work only to a person, firm or corporation who is or agrees to become party to this Agreement.

#### **ARTICLE 3-SCOPE OF THE AGREEMENT**

##### **SECTION 1. WORK COVERED**

Program Work shall be limited to construction contracts bid and let by the Agency (or its Construction Manager where applicable) after the effective date of this Agreement (and prior to June 30, 2014) for that new construction on the following projects:

1. East 91st Street Marine Transfer Station, East River and 91st Street, Manhattan;
2. Southwest Brooklyn Marine Transfer Station, Gravesend Bay waterfront, Bensonhurst, Brooklyn; and
3. Manhattan 1/2/5 Garage, 500 Washington Street, Manhattan.

It is understood that Program Work does not include, and this Project Labor Agreement shall not apply to, any other work, including:

1. Contracts let and work performed in connection with projects carried over, recycled from, or performed under bids or rebids relating to work that were bid prior to the effective date of this Agreement or after June 30, 2014;
2. Contracts procured on an emergency basis;
3. Small purchases (purchases not more than \$100,000) awarded pursuant to New York City Charter §314, New York City Charter § 316 and New York City Procurement Policy Board Rules §3-08;
4. Contracts with electric utilities, gas utilities, telephone companies, and railroads, except that it is understood and agreed that these entities may only install their work to a demarcation point, e.g. a telephone closet or utility vault, the location of which is determined prior to construction and employees of such entities shall not be used to replace employees performing Program Work pursuant to this agreement; and
5. Contracts for installation of information technology that are not otherwise Program Work.

## SECTION 2. TIME LIMITATIONS

In addition to falling within the scope of Article 3, Section 1, to be covered by this

Agreement Program Work must be (1) advertised and let for bid after the effective date of this Agreement, and (2) let for bid prior to June 30, 2014, the expiration date of this Agreement. It is understood that this Agreement, together with all of its provisions, shall remain in effect for all such Program Work until completion, even if not completed by the expiration date of the Agreement. If Program Work otherwise falling within the scope of Article 3, Section 1 is not let for bid by the expiration date of this Agreement, this Agreement may be extended to that work by mutual agreement of the parties.

### **SECTION 3. EXCLUDED EMPLOYEES**

The following persons are not subject to the provisions of this Agreement, even though performing Program Work:

A. Superintendents, supervisors (excluding general and forepersons specifically covered by a craft's Schedule A), engineers, professional engineers and/or licensed architects engaged in inspection and testing, quality control/assurance personnel, timekeepers, mail carriers, clerks, office workers, messengers, guards, technicians, non-manual employees, and all professional, engineering, administrative and management persons;

B. Employees of the Agency, New York City, or any other municipal or State agency, authority or entity, or employees of any other public employer, even though working on the Program site while covered Program Work is underway;

C. Employees and entities engaged in off-site manufacture, modifications, repair, maintenance, assembly, painting, handling or fabrication of project components, materials, equipment or machinery or involved in deliveries to and from the Program site, except to the extent they are lawfully included in the bargaining unit of a Schedule A agreement;

D. Employees of the Construction Manager (except that in the event the

Agency engages a Contractor to serve as Construction Manager, then those employees of the Construction Manager performing manual, on site construction labor will be covered by this Agreement);

E. Employees engaged in on-site equipment warranty work unless employees are already working on the site and are certified to perform warranty work;

F. Employees engaged in geophysical testing other than boring for core samples;

G. Employees engaged in laboratory, specialty testing, or inspections, pursuant to a professional services agreement between the Agency, or any of the Agency's other professional consultants, and such laboratory, testing, inspection or surveying firm; and

H. Employees engaged in on-site maintenance of installed equipment or systems which maintenance is awarded as part of a contract that includes Program Work but which maintenance occurs after installation of such equipment or system and is not directly related to construction services.

#### **SECTION 4. NON-APPLICATION TO CERTAIN ENTITIES**

This Agreement shall not apply to those parents, affiliates, subsidiaries, or other joint or sole ventures of any Contractor which do not perform Program Work. It is agreed that this Agreement does not have the effect of creating any joint employment, single employer or alter ego status among the Agency (including in its capacity as Construction Manager) or any Contractor. The Agreement shall further not apply to any New York City or other municipal or State agency, authority, or entity other than the Agency and nothing contained herein shall be construed to prohibit or restrict the Agency or its employees, or any State, New York City or other municipal or State authority, agency or entity and its employees, from performing on or

off-site work related to Program Work.

As the contracts involving Program Work are completed and accepted, the Agreement shall not have further force or effect on such items or areas except where inspections, additions, repairs, modifications, check-out and/or warranty work are assigned in writing (copy to Local Union involved) by the Agency (or Construction Manager) for performance under the terms of this Agreement.

#### **ARTICLE 4- UNION RECOGNITION AND EMPLOYMENT**

##### **SECTION 1. PRE-HIRE RECOGNITION**

The Contractors recognize the signatory Unions as the sole and exclusive bargaining representatives of all employees who are performing on-site Program Work, with respect to that work.

##### **SECTION 2. UNION REFERRAL**

A. The Contractors agree to employ and hire craft employees for Program Work covered by this Agreement through the job referral systems and hiring halls established in the Local Unions area collective bargaining agreements. Notwithstanding this, Contractors shall have sole right to determine the competency of all referrals; to determine the number of employees required; to select employees for layoff (subject to Article 5, Section 3); and the sole right to reject any applicant referred by a Local Union, subject to the show-up payments. In the event that a Local Union is unable to fill any request for qualified employees within a 48 hour period after such requisition is made by a Contractor (Saturdays, Sundays and holidays excepted), a Contractor may employ qualified applicants from any other available source. In the event that the Local Union does not have a job referral system, the Contractor shall give the Local Union first preference to refer applicants, subject to the other provisions of this Article.

The Contractor shall notify the Local Union of craft employees hired for Program Work within its jurisdiction from any source other than referral by the Union.

B. A Contractor may request by name, and the Local will honor, referral of persons who have applied to the Local for Program Work and who meet the following qualifications:

- (1) possess any license required by New York State law for the Program Work to be performed;
- (2) have worked a total of at least 1000 hours in the Construction field during the prior 3 years; and
- (3) were on the Contractor's active payroll for at least 60 out of the 180 calendar days prior to the contract award.

No more than twelve per centum (12%) of the employees covered by this Agreement, per Contractor by craft, shall be hired through the special provisions above. Under this provision, name referrals begin with the eighth employee needed and continue on that same basis.

C. Notwithstanding Section 2(B), above, certified MWBE contractors for which participation goals are set pursuant to New York City Administrative Code §6-129, that are not signatory to any Schedule A CBAs, with contracts valued at or under five hundred thousand (\$500,000), may request by name, and the Local will honor, referral of the second (2<sup>nd</sup>), fourth (4<sup>th</sup>), sixth (6<sup>th</sup>), and eighth (8<sup>th</sup>) employee, who have applied to the Local for Program Work and who meet the following qualifications:

- (1) possess any license required by New York State law for the Program Work to be performed;
- (2) have worked a total of at least 1000 hours in the Construction field during the prior 3 years; and

- (3) were on the Contractor's active payroll for at least 60 out of the 180 work days prior to the contract award.

For such contracts valued at above \$500,000 but less than \$1 million, the Local will honor referrals by name of the second (2<sup>nd</sup>), fifth (5<sup>th</sup>), and eighth (8<sup>th</sup>) employee subject to the foregoing requirements. In both cases, name referrals will thereafter be in accordance with Section 2(B), above.

D. Where a certified MWBE Contractor voluntarily enters into a Collective Bargaining Agreement ("CBA") with a BCTC Union, the employees of such Contractor at the time the CBA is executed shall be allowed to join the Union for the applicable trade subject to satisfying the Union's basic standards of proficiency for admission.

### **SECTION 3. NON-DISCRIMINATION IN REFERRALS**

The Council represents that each Local Union hiring hall and referral system will be operated in a non-discriminatory manner and in full compliance with all applicable federal, state and local laws and regulations which require equal employment opportunities. Referrals shall not be affected in any way by the rules, regulations, bylaws, constitutional provisions or any other aspects or obligations of union membership, policies or requirements and shall be subject to such other conditions as are established in this Article. No employment applicant shall be discriminated against by any referral system or hiring hall because of the applicant's union membership, or lack thereof.

### **SECTION 4: MINORITY AND FEMALE REFERRALS**

In the event a Local Union either fails, or is unable to refer qualified minority or female applicants in percentages equaling the workforce participation goals adopted by the City and set forth in the Agency's (or, if applicable, Construction Manager's) bid specifications, within 48 hours of the request for same, the Contractor may employ qualified minority or female

applicants from any other available source.

#### **SECTION 5. CROSS AND QUALIFIED REFERRALS**

The Local Unions shall not knowingly refer to a Contractor an employee then employed by another Contractor working under this Agreement. The Local Unions will exert their utmost efforts to recruit sufficient numbers of skilled and qualified crafts employees to fulfill the requirements of the Contractor.

#### **SECTION 6. UNION DUES**

All employees covered by this Agreement shall be subject to the union security provisions contained in the applicable Schedule A local agreements, as amended from time to time, but only for the period of time during which they are performing on-site Program Work and only to the extent of tendering payment of the applicable union dues and assessments uniformly required for union membership in the Local Unions which represent the craft in which the employee is performing Program Work. No employee shall be discriminated against at any Program Work site because of the employee's union membership or lack thereof. In the case of unaffiliated employees, the dues payment will be received by the Local Unions as an agency shop fee.

#### **SECTION 7. CRAFT FOREPERSONS AND GENERAL FOREPERSONS**

The selection of craft forepersons and/or general forepersons and the number of forepersons required shall be solely the responsibility of the Contractor except where otherwise provided by specific provisions of an applicable Schedule A, and provided that all craft forepersons shall be experienced and qualified journeypersons in their trade as determined by the appropriate Local Union. All forepersons shall take orders exclusively from the designated Contractor representatives. Craft forepersons shall be designated as working forepersons at the

request of the Contractor, except when an existing local Collective Bargaining Agreement prohibits a foreperson from working when the craft persons he is leading exceed a specified number.

## **ARTICLE 5- UNION REPRESENTATION**

### **SECTION 1. LOCAL UNION REPRESENTATIVE**

Each Local Union representing on-site employees shall be entitled to designate in writing (copy to Contractor involved and Construction Manager) one representative, and/or the Business Manager, who shall be afforded access to the Program Work site.

### **SECTION 2. STEWARDS**

A. Each Local Union shall have the right to designate a working journey person as a Steward and an alternate, and shall notify the Contractor and Construction Manager of the identity of the designated Steward (and alternate) prior to the assumption of such duties. Stewards shall not exercise supervisory functions and will receive the regular rate of pay for their craft classifications. All Stewards shall be working Stewards.

B. In addition to their work as an employee, the Steward shall have the right to receive complaints or grievances and to discuss and assist in their adjustment with the Contractor's appropriate supervisor. Each Steward shall be concerned with the employees of the Steward's trade and, if applicable, subcontractors of their Contractor, but not with the employees of any other trade Contractor. No Contractor shall discriminate against the Steward in the proper performance of Union duties.

C. The Stewards shall not have the right to determine when overtime shall be worked, or who shall work overtime except pursuant to a Schedule A provision providing procedures for the equitable distribution of overtime.

### **SECTION 3. LAYOFF OF A STEWARD**

Contractors agree to notify the appropriate Union 24 hours prior to the layoff of a Steward, except in cases of discipline or discharge for just cause. If a Steward is protected against layoff by a Schedule A provision, such provision shall be recognized to the extent the Steward possesses the necessary qualifications to perform the work required. In any case in which a Steward is discharged or disciplined for just cause, the Local Union involved shall be notified immediately by the Contractor.

## **ARTICLE 6- MANAGEMENT'S RIGHTS**

### **SECTION 1. RESERVATION OF RIGHTS**

Except as expressly limited by a specific provision of this Agreement, Contractors retain full and exclusive authority for the management of their operations including, but not limited to, the right to: direct the work force, including determination as to the number of employees to be hired and the qualifications therefore; the promotion, transfer, layoff of its employees; require compliance with the directives of the Agency including standard restrictions related to security and access to the site that are equally applicable to Agency employees, guests, or vendors; or the discipline or discharge for just cause of its employees; assign and schedule work; promulgate reasonable Program Work rules that are not inconsistent with this Agreement or rules common in the industry and are reasonably related to the nature of work; and, the requirement, timing and number of employees to be utilized for overtime work. No rules, customs, or practices which limit or restrict productivity or efficiency of the individual, as determined by the Contractor, Agency and/or Construction Manager and/or joint working efforts with other employees shall be permitted or observed.

### **SECTION 2. MATERIALS, METHODS & EQUIPMENT**

There shall be no limitation or restriction upon the Contractors' choice of

materials, techniques, methods, technology or design, or, regardless of source or location, upon the use and installation of equipment, machinery, package units, pre-cast, pre-fabricated, pre-finished, or pre-assembled materials or products, tools, or other labor-saving devices. Contractors may, without restriction, install or use materials, supplies or equipment regardless of their source; provided, however, that where there is a Schedule "A" that includes a lawful union standards and practices clauses, then such clause as set forth in Schedule A Agreements will be complied with, unless there is a lawful Agency specification (or specification issued by a Construction Manager which would be lawful if issued by the Agency directly) that would specifically limit or restrict the Contractor's choice of materials, techniques, methods, technology or design, or, regardless of source or location, upon the use and installation of equipment, machinery, package units, pre-cast, pre-fabricated, pre-finished, or pre-assembled materials or products, tools, or other labor-saving devices, and which would prevent compliance with such Schedule A clause. The on-site installation or application of such items shall be performed by the craft having jurisdiction over such work; provided, however, it is recognized that other personnel having special qualifications may participate, in a supervisory capacity, in the installation, check-off or testing of specialized or unusual equipment or facilities as designated by the Contractor. There shall be no restrictions as to work which is performed off-site for Program Work.

## **ARTICLE 7- WORK STOPPAGES AND LOCKOUTS**

### **SECTION 1. NO STRIKES-NO LOCK OUT**

There shall be no strikes, sympathy strikes, picketing, work stoppages, slowdowns, hand billing, demonstrations or other disruptive activity at the Program Work site for any reason by any Union or employee against any Contractor or employer. There shall be no

other Union, or concerted or employee activity which disrupts or interferes with the operation of the Program Work or the objectives of the Agency at any Program Work site. In addition, failure of any Union or employee to cross any picket line established by any Union, signatory or non-signatory to this Agreement, or the picket or demonstration line of any other organization, at or in proximity to a Program Work site where the failure to cross disrupts or interferes with the operation of Program Work is a violation of this Article. Should any employees breach this provision, the Unions will use their best efforts to try to immediately end that breach and return all employees to work. There shall be no lockout at a Program Work site by any signatory Contractor, Agency or Construction Manager.

## **SECTION 2. DISCHARGE FOR VIOLATION**

A Contractor may discharge any employee violating Section 1, above, and any such employee will not be eligible thereafter for referral under this Agreement for a period of 100 days.

## **SECTION 3. NOTIFICATION**

If a Contractor contends that any Union has violated this Article, it will notify the Local Union involved advising of such fact, with copies of the notification to the Council. The Local Union shall instruct and order, the Council shall request, and each shall otherwise use their best efforts to cause, the employees (and where necessary the Council shall use its best efforts to cause the Local Union), to immediately cease and desist from any violation of this Article. If the Council complies with these obligations it shall not be liable for the unauthorized acts of a Local Union or its members. Similarly, a Local Union and its members will not be liable for any unauthorized acts of the Council. Failure of a Contractor or the Construction Manager to give any notification set forth in this Article shall not excuse any violation of Section 1 of this Article.

#### SECTION 4. EXPEDITED ARBITRATION

Any Contractor or Union alleging a violation of Section 1 of this Article may utilize the expedited procedure set forth below (in lieu of, or in addition to, any actions at law or equity) that may be brought.

A. A party invoking this procedure shall notify J.J. Pierson or Richard Adelman who shall alternate (beginning with Arbitrator J.J. Pierson) as Arbitrator under this expedited arbitration procedure. If the Arbitrator next on the list is not available to hear the matter within 24 hours of notice, the next Arbitrator on the list shall be called. Copies of such notification will be simultaneously sent to the alleged violator and Council.

B. The Arbitrator shall thereupon, after notice as to time and place to the Contractor, the Local Union involved, the Council and the Construction Manager, hold a hearing within 48 hours of receipt of the notice invoking the procedure if it is contended that the violation still exists. The hearing will not, however, be scheduled for less than 24 hours after the notice required by Section 3, above.

C. All notices pursuant to this Article may be provided by telephone, telegraph, hand delivery, or fax, confirmed by overnight delivery, to the Arbitrator, Contractor, Construction Manager and Local Union involved. The hearing may be held on any day including Saturdays or Sundays. The hearing shall be completed in one session, which shall not exceed 8 hours duration (no more than 4 hours being allowed to either side to present their case, and conduct their cross examination) unless otherwise agreed. A failure of any Union or Contractor to attend the hearing shall not delay the hearing of evidence by those present or the issuance of an award by the Arbitrator.

D. The sole issue at the hearing shall be whether a violation of Section 1, above, occurred. If a violation is found to have occurred, the Arbitrator shall issue a Cease and

Desist Award restraining such violation and serve copies on the Contractor and Union involved. The Arbitrator shall have no authority to consider any matter in justification, explanation or mitigation of such violation or to award damages (any damages issue is reserved solely for court proceedings, if any.) The Award shall be issued in writing within 3 hours after the close of the hearing, and may be issued without an Opinion. If any involved party desires an Opinion, one shall be issued within 15 calendar days, but its issuance shall not delay compliance with, or enforcement of, the Award.

E. The Agency and Construction Manager (or such other designee of the Agency) may participate in full in all proceedings under this Article.

F. An Award issued under this procedure may be enforced by any court of competent jurisdiction upon the filing of this Agreement together with the Award. Notice of the filing of such enforcement proceedings shall be given to the Union or Contractor involved, and the Construction Manager.

G. Any rights created by statute or law governing arbitration proceedings which are inconsistent with the procedure set forth in this Article, or which interfere with compliance thereto, are hereby waived by the Contractors and Unions to whom they accrue.

H. The fees and expenses of the Arbitrator shall be equally divided between the involved Contractor and Union.

#### **SECTION 5. ARBITRATION OF DISCHARGES FOR VIOLATION**

Procedures contained in Article 9 shall not be applicable to any alleged violation of this Article, with the single exception that an employee discharged for violation of Section 1, above, may have recourse to the procedures of Article 9 to determine only if the employee did, in fact, violate the provisions of Section 1 of this Article; but not for the purpose of modifying the

discipline imposed where a violation is found to have occurred.

## **ARTICLE 8 - LABOR MANAGEMENT COMMITTEE**

### **SECTION 1. SUBJECTS**

The Program Labor Management Committee will meet on a regular basis to: 1) promote harmonious relations among the Contractors and Unions; 2) enhance safety awareness, cost effectiveness and productivity of construction operations; 3) protect the public interests; 4) discuss matters relating to staffing and scheduling with safety and productivity as considerations; and 5) review efforts to meet applicable participation goals for MWBEs and workforce participation goals for minority and female employees.

### **SECTION 2. COMPOSITION**

The Committee shall be jointly chaired by a designee of the Agency and the President of the Council. It may include representatives of the Local Unions and Contractors involved in the issues being discussed. The parties may mutually designate an MWBE representative to participate in appropriate Committee discussions. The Committee may conduct business through mutually agreed upon sub-committees.

## **ARTICLE 9- GRIEVANCE & ARBITRATION PROCEDURE**

### **SECTION 1. PROCEDURE FOR RESOLUTION OF GRIEVANCES**

Any question, dispute or claim arising out of, or involving the interpretation or application of this Agreement (other than jurisdictional disputes or alleged violations of Article 7, Section 1) shall be considered a grievance and shall be resolved pursuant to the exclusive procedure of the steps described below, provided, in all cases, that the question, dispute or claim arose during the term of this Agreement.

#### **Step 1:**

(a) When any employee covered by this Agreement feels aggrieved by a claimed violation of this Agreement, the employee shall, through the Local Union business representative or job steward give notice of the claimed violation to the work site representative of the involved Contractor and the Construction Manager. To be timely, such notice of the grievance must be given within 7 calendar days after the act, occurrence or event giving rise to the grievance. The business representative of the Local Union or the job steward and the work site representative of the involved Contractor shall meet and endeavor to adjust the matter within 7 calendar days after timely notice has been given. If they fail to resolve the matter within the prescribed period, the grieving party, may, within 7 calendar days thereafter, pursue Step 2 of the grievance procedure by serving the involved Contractor with written copies of the grievance setting forth a description of the claimed violation, the date on which the grievance occurred, and the provisions of the Agreement alleged to have been violated. Grievances and disputes settled at Step 1 are non-precedential except as to the specific Local Union, employee and Contractor directly involved unless the settlement is accepted in writing by the Construction Manager (or designee) as creating a precedent.

(b) Should any signatory to this Agreement have a dispute (excepting jurisdictional disputes or alleged violations of Article 7, Section 1) with any other signatory to this Agreement and, if after conferring, a settlement is not reached within 7 calendar days, the dispute shall be reduced to writing and proceed to Step 2 in the same manner as outlined in subparagraph (a) for the adjustment of employee grievances.

**Step 2:**

The Business Manager or designee of the involved Local Union, together with representatives of the involved Contractor, Council and the Construction Manager (or designee),

shall meet in Step 2 within 7 calendar days of service of the written grievance to arrive at a satisfactory settlement.

**Step 3:**

(a) If the grievance shall have been submitted but not resolved in Step 2, any of the participating Step 2 entities may, within 21 calendar days after the initial Step 2 meeting, submit the grievance in writing (copies to other participants, including the Construction Manager or designee) to J.J. Pierson or Richard Adelman, who shall act, alternately (beginning with Arbitrator J.J. Pierson), as the Arbitrator under this procedure. The Labor Arbitration Rules of the American Arbitration Association shall govern the conduct of the arbitration hearing, at which all Step 2 participants shall be parties. The decision of the Arbitrator shall be final and binding on the involved Contractor, Local Union and employees and the fees and expenses of such arbitrations shall be borne equally by the involved Contractor and Local Union.

(b) Failure of the grieving party to adhere to the time limits set forth in this Article shall render the grievance null and void. These time limits may be extended only by written consent of the Construction Manager (or designee), involved Contractor and involved Local Union at the particular step where the extension is agreed upon. The Arbitrator shall have authority to make decisions only on the issues presented to him and shall not have the authority to change, add to, delete or modify any provision of this Agreement.

**SECTION 2. LIMITATION AS TO RETROACTIVITY**

No arbitration decision or award may provide retroactivity of any kind exceeding 60 calendar days prior to the date of service of the written grievance on the Construction Manager and the involved Contractor or Local Union.

**SECTION 3. PARTICIPATION BY AGENCY AND/OR CONSTRUCTION MANAGER**

The Agency and Construction Manager (or such other designee of the Agency) shall be notified by the involved Contractor of all actions at Steps 2 and 3 and, at its election, may participate in full in all proceedings at these Steps, including Step 3 arbitration.

## **ARTICLE 10 - JURISDICTIONAL DISPUTES**

### **SECTION 1. NO DISRUPTIONS**

There will be no strikes, sympathy strikes, work stoppages, slowdowns, picketing or other disruptive activity of any kind arising out of any jurisdictional dispute. Pending the resolution of the dispute, the work shall continue uninterrupted and as assigned by the Contractor. No jurisdictional dispute shall excuse a violation of Article 7.

### **SECTION 2. ASSIGNMENT**

All Program Work assignments shall be made by the Contractor to unions affiliated with the BCTC consistent with the New York Plan for the Settlement of Jurisdictional Disputes ("New York Plan") and its Greenbook decisions, if any. Where there are no applicable Greenbook decisions, assignments shall be made in accordance with the provisions of the New York Plan and local industry practice.

### **SECTION 3. NO INTERFERENCE WITH WORK**

There shall be no interference or interruption of any kind with the Program Work while any jurisdictional dispute is being resolved. The work shall proceed as assigned by the Contractor until finally resolved under the applicable procedure of this Article. The award shall be confirmed in writing to the involved parties. There shall be no strike, work stoppage or interruption in protest of any such award.

## **ARTICLE 11 - WAGES AND BENEFITS**

### **SECTION 1. CLASSIFICATION AND BASE HOURLY RATE**

All employees covered by this Agreement shall be classified in accordance with the work performed and paid the hourly wage rates applicable for those classifications as required by the applicable prevailing wage laws.

## **SECTION 2. EMPLOYEE BENEFITS**

A. The Contractors agree to pay on a timely basis contributions on behalf of all employees covered by this Agreement to those established jointly trustee employee benefit funds designated in Schedule A (in the appropriate Schedule A amounts), provided that such benefits are required to be paid on public works under any applicable prevailing wage law. Bona fide jointly trustee fringe benefit plans established or negotiated through collective bargaining during the life of this Agreement may be added if similarly required under applicable prevailing wage law. Contractors, not otherwise contractually bound to do so, shall not be required to contribute to benefits, trusts or plans of any kind which are not required by the prevailing wage law provided, however, that this provision does not relieve Contractors signatory to local collective bargaining agreement with any affiliated union from complying with the fringe benefit requirements for all funds contained in the CBA.

B. The Contractors agree to be bound by the written terms of the legally established jointly trustee Trust Agreements specifying the detailed basis on which payments are to be paid into, and benefits paid out of, such Trust Funds but only with regard to Program Work done under this Agreement and only for those employees to whom this Agreement requires such benefit payments.

C. To the extent consistent with New York City's Procurement Policy Board Rules with respect to prompt payment, as published at [www.nyc.gov/ppb](http://www.nyc.gov/ppb), §4-06(e), and in consideration of the unions' waiver of their rights to withhold labor from a contractor or

subcontractor delinquent in the payment of fringe benefits contributions ("Delinquent Contractor"); the Agency agrees that where any such union and/or fringe benefit fund shall notify the Agency, the General Contractor, and the Delinquent Contractor in writing with back-up documentation that the Delinquent Contractor has failed to make fringe benefit contributions to it as provided herein and the Delinquent Contractor shall fail, within ten (10) calendar days after receipt of such notice, to furnish either proof of such payment or notice that the amount claimed by the union and/or fringe benefit fund is in dispute, the Agency shall withhold from amounts then or thereafter becoming due and payable to the General Contractor an amount equal to that portion of such payment due to the General Contractor that relates solely to the work performed by the Delinquent Contractor which the union or fringe benefit fund claims to be due it, and shall remit the amount when and so withheld to the fringe benefit fund and deduct such payment from the amounts then otherwise due and payable to the General Contractor, which payment shall, as between the General Contractor and the Agency, be deemed a payment by the Agency to the General Contractor; provided however, that in any month, such withholding shall not exceed the amount contained in the General Contractor's monthly invoice for work performed by the Delinquent Contractor. The union or its employee benefit funds shall include in its notification of delinquent payment of fringe benefits only such amount it asserts the Delinquent Contractor failed to pay on the specific project against which the claim is made and the union or its employee benefit funds may not include in such notification any amount such Delinquent Contractor may have failed to pay on any other City or non-City project.

D. In the event the General Contractor or Delinquent Contractor shall notify the Agency as above provided that the claim of the union or fringe benefit fund is in dispute, the Agency shall withhold from amounts then or thereafter becoming due and payable to the General

Contractor an amount equal to that portion of such payment due to the General Contractor that relates solely to the work performed by the Delinquent Contractor which the union and/or fringe benefit fund claims to be due it, and deposit such amount when and so withheld in a separate interest-bearing account pending resolution of the dispute pursuant to the union's Schedule A agreement, and the amount so deposited together with the interest thereon shall be paid to the party or parties ultimately determined to be entitled thereto, or held until the Delinquent Contractor and union or fringe benefit fund shall otherwise agree as to the disposition thereof; provided however, that such withholding shall not exceed the amount contained in the General Contractor's monthly invoice for work performed by the Delinquent Contractor. In the event the Agency shall be required to withhold amounts from a General Contractor for the benefit of more than one fringe benefit fund, the amounts so withheld in the manner and amount prescribed above shall be applied to or for such fund in the order in which the written notices of nonpayment have been received by the Agency, and if more than one such notice was received on the same day, proportionately based upon the amount of the union and/or fringe benefit fund claims received on such day. Nothing herein contained shall prevent the Agency from commencing an interpleader action to determine entitlement to a disputed payment in accordance with section one thousand six of the civil practice law and rules or any successor provision thereto.

E. Payment to a fringe benefit fund under this provision shall not relieve the General Contractor or Delinquent Contractor from responsibility for the work covered by the payment. Except as otherwise provided, nothing contained herein shall create any obligation on the part of the Agency to pay any union or fringe benefit fund, nor shall anything provided herein serve to create any relationship in contract or otherwise, implied or expressed, between the

union/fund and/or fringe benefit and the Agency.

## **ARTICLE 12- HOURS OF WORK, PREMIUM PAYMENTS, SHIFTS AND HOLIDAYS**

### **SECTION 1. WORK WEEK AND WORK DAY**

A. The standard work week shall consist of 40 hours of work at straight time rates, Monday through Friday, 8 hours per day, plus ½ hour unpaid lunch period.

B. In accordance with Program needs, there shall be flexible start times with advance notice from Contractor to the Union. The Day Shift shall commence between the hours of 6:00 a.m. and 9:00 a.m. and shall end between the hours of 2:30 p.m. and 5:30 p.m. The Evening Shift shall commence between the hours of 3:00 p.m. and 6:00 p.m., unless different times are necessitated by the Agency's phasing plans on specific projects. The Night Shift shall commence between the hours of 11:00 p.m. and 2:00 a.m., unless different times are necessitated by the Agency's phasing plans on specific projects. Subject to the foregoing, starting and quitting times shall occur at the Program Work site designated by the Contractor.

C. Scheduling - Monday through Friday is the standard work week; 8 hours of work plus ½ hour unpaid lunch.

D. Notice - Contractors shall provide not less than 5 days prior notice to the Local Union involved as to the work week and work hour schedules to be worked or such lesser notice as may be mutually agreed upon.

### **SECTION 2. OVERTIME**

Overtime shall be paid for any work over eight (8) hours in a day and over forty (40) hours in a week, at time and one half (1½) Monday through Saturday. All overtime work performed on Sunday and Holidays will be paid pursuant to the applicable Schedule A. There shall be no stacking or pyramiding of overtime pay under any circumstances. There will be no

restriction upon the Contractor's scheduling of overtime or the nondiscriminatory designation of employees who shall be worked, including the use of employees, other than those who have worked the regular or scheduled work week, at straight time rates. The Contractor shall have the right to schedule work so as to minimize overtime or schedule overtime as to some, but not all, of the crafts and whether or not of a continuous nature.

### SECTION 3. SHIFTS

A. Flexible Schedules - Scheduling of shift work, including Saturday and Sunday work, shall be within the discretion of the Contractor in order to meet Program Work schedules and existing Program Work conditions including the minimization of interference with the mission of the Agency. It is not necessary to work a day shift in order to schedule a second or third shift, or a second shift in order to schedule a third shift, or to schedule all of the crafts when only certain crafts or employees are needed. Shifts must have prior approval of the Agency or Construction Manager, and must be scheduled with not less than five work days notice to the Local Union or such lesser notice as may be mutually agreed upon.

B. Second and/or Third Shifts/Saturday and/or Sunday Work - - The second shift shall start between 3 p.m. and 6 p.m. and the third shift shall start between 11 p.m. and 2 a.m., subject to different times necessitated by the Agency phasing plans on specific projects. There shall be no reduction in shift hour work.

C. Flexible Starting Times - Shift starting times will be adjusted by the Contractor as necessary to fulfill Program Work requirements subject to the notice requirements of paragraph A.

### SECTION 4. HOLIDAYS

A. Schedule - There shall be 8 recognized holidays on the Project:

New Years Day	Labor Day
Martin Luther King Day	President's Day
Memorial Day	Thanksgiving Day
Independence Day	Christmas Day

All said holidays shall be observed on the calendar date except those holidays which occur on Saturday shall be observed on the previous Friday and those that occur on Sunday shall be observed on the following Monday.

B. Payment - Regular holiday pay, if any, for work performed on such a recognized holiday shall be in accordance with the applicable Schedule A.

C. Exclusivity - No holidays other than those listed in Section 4(A) above shall be recognized or observed.

#### **SECTION 5. SATURDAY WORK**

The Contractor may schedule a Saturday work day and such time shall be scheduled and paid at time and one-half (1½) unless the applicable Schedule A permits a straight time rate.

#### **SECTION 6. REPORTING PAY**

A. Employees who report to the work location pursuant to their regular schedule and who are not provided with work shall be paid two hours reporting pay at straight time rates. An employee whose work is terminated early by a Contractor due to severe weather, power failure, fire or natural disaster or for similar circumstances beyond the Contractor's control, shall receive pay only for such time as is actually worked. In other instances in which an employee's work is terminated early (unless provided otherwise elsewhere in this Agreement),

the employee shall be paid for his full shift.

B. ~~When an employee, who has completed their scheduled shift and left the~~ Program Work site, is "called out" to perform special work of a casual, incidental or irregular nature, the employee shall receive overtime pay at the rate of time and one-half of the employee's straight time rate for hours actually worked.

C. When an employee leaves the job or work location of their own volition or is discharged for cause or is not working as a result of the Contractor's invocation of Section 7 below, they shall be paid only for the actual time worked.

D. Except as specifically set forth in this Article there shall be no premiums, bonuses, hazardous duty, high time or other special premium payments or reduction in shift hours of any kind.

E. There shall be no pay for time not actually worked except as specifically set forth in this Article and except where an applicable Schedule A requires a full weeks' pay for forepersons.

#### **SECTION 7. PAYMENT OF WAGES**

A. Termination- Employees who are laid off or discharged for cause shall be paid in full for that which is due them at the time of termination. The Contractor shall also provide the employee with a written statement setting forth the date of lay off or discharge.

#### **SECTION 8. EMERGENCY WORK SUSPENSION**

A Contractor may, if considered necessary for the protection of life and/or safety of employees or others, suspend all or a portion of Program Work. In such instances, employees will be paid for actual time worked, except that when a Contractor requests that employees remain at the job site available for work, employees will be paid for that time at their hourly rate

of pay.

#### **SECTION 9. INJURY/DISABILITY**

An employee who, after commencing work, suffers a work-related injury or disability while performing work duties, shall receive no less than 8 hours wages for that day. Further, the employee shall be rehired at such time as able to return to duties provided there is still Program Work available for which the employee is qualified and able to perform.

#### **SECTION 10. TIME KEEPING**

A Contractor may utilize brassing or other systems to check employees in and out. Each employee must check in and out. The Contractor will provide adequate facilities for checking in and out in an expeditious manner.

#### **SECTION 11. MEAL PERIOD**

A Contractor shall schedule an unpaid period of not more than 1/2 hour duration at the work location between the 3rd and 5th hour of the scheduled shift. A Contractor may, for efficiency of operation, establish a schedule which coordinates the meal periods of two or more crafts or which provides for staggered lunch periods within a craft or trade. If an employee is required to work through the meal period, the employee shall be compensated in a manner established in the applicable Schedule A.

#### **SECTION 12. BREAK PERIODS**

There will be no rest periods, organized coffee breaks or other non-working time established during working hours. Individual coffee containers will be permitted at the employee's work location.

### **ARTICLE 13 - APPRENTICES**

#### **SECTION 1. RATIOS**

Recognizing the need to maintain continuing supportive programs designed to develop adequate numbers of competent workers in the construction industry and to provide craft entry opportunities for minorities, women and economically disadvantaged non-minority males, Contractors will employ apprentices in their respective crafts to perform such work as is within their capabilities and which is customarily performed by the craft in which they are indentured. Contractors may utilize apprentices and such other appropriate classifications in the maximum ratio permitted by the New York State Department of Labor or the maximum allowed per trade. Apprentices and such other classifications as are appropriate shall be employed in a manner consistent with the provisions of the appropriate Schedule A. The parties encourage, as an appropriate source of apprentice recruitment consistent with the rules and operations of the affiliated unions' apprentice-programs, the use of the Edward J. Malloy Initiative for Construction Skills, Non-Traditional Employment for Women and Helmets to Hardhats.

## **ARTICLE 14-SAFETY PROTECTION OF PERSON AND PROPERTY**

### **SECTION 1. SAFETY REQUIREMENTS**

Each Contractor will ensure that applicable OSHA and safety requirements are at all times maintained on the Program Work site and the employees and Unions agree to cooperate fully with these efforts to the extent consistent with their rights and obligations under the law. Employees will cooperate with employer safety policies and will perform their work at all times in a safe manner and protect themselves and the property of the Contractor and Agency from injury or harm, to the extent consistent with their rights and obligations under the law. Failure to do so will be grounds for discipline, including discharge.

### **SECTION 2. CONTRACTOR RULES**

Employees covered by this Agreement shall at all times be bound by the

reasonable safety, security, and visitor rules as established by the Contractors and the Construction Manager for this Program Work. Such rules will be published and posted in conspicuous places throughout the Program Work sites. Any site security and access policies established by the Construction Manager or General Contractor intended for specific application to the construction workforce for Program Work and that are not established pursuant to an Agency directive shall be implemented only after notice to the BCTC and its affiliates and an opportunity for negotiation and resolution by the Labor Management Committee.

### **SECTION 3. INSPECTIONS**

The Contractors and Construction Manager retain the right to inspect incoming shipments of equipment, apparatus, machinery and construction materials of every kind.

### **ARTICLE 15 - TEMPORARY SERVICES**

Temporary services, i.e. all temporary heat, climate control, water, power and light, shall only be required upon the specific request of the Agency or Construction Manager, and when so requested shall be assigned to the appropriate trade claiming jurisdiction. Temporary system coverage shall be provided by the appropriate Contractors' existing employees during working hours in which a shift is scheduled for employees of this Contractor. The Agency or Construction Manager may determine the need for temporary system coverage requirements during non-working hours, which may be limited to one person per applicable trade where practicable. There shall be no stacking of trades on temporary services. In the event a temporary system is claimed by multiple trades, the matter shall be resolved through the New York Plan for Jurisdictional Disputes.

### **ARTICLE 16 - NO DISCRIMINATION**

#### **SECTION 1. COOPERATIVE EFFORTS**

The Contractors and Unions agree that they will not discriminate against any employee or applicant for employment because of creed, race, color, religion, sex, sexual orientation, national origin, marital status, citizenship status, disability, age or any other status provided by law, in any manner prohibited by law or regulation.

## **SECTION 2. LANGUAGE OF AGREEMENT**

The use of the masculine or feminine gender in this Agreement shall be construed as including both genders.

## **ARTICLE 17- GENERAL TERMS**

### **SECTION 1. PROJECT RULES**

A. The Construction Manager and the Contractors shall establish such reasonable Program Work rules that are not inconsistent with this Agreement or rules common in the industry and are reasonably related to the nature of work. These rules will be explained at the pre-job conference and posted at the Program Work sites and may be amended thereafter as necessary. Notice of amendments will be provided to the appropriate Local Union. Failure of an employee to observe these rules and regulations shall be grounds for discipline, including discharge. The fact that no order was posted prohibiting a certain type of misconduct shall not be a defense to an employee disciplined or discharged for such misconduct when the action taken is for cause.

B. The parties adopt and incorporate the BCTC's Standards of Excellence as annexed hereto as Exhibit "B".

### **SECTION 2. TOOLS OF THE TRADE**

The welding/cutting torch and chain fall are tools of the trade having jurisdiction over the work performed. Employees using these tools shall perform any of the work of the

trade. There shall be no restrictions on the emergency use of any tools or equipment by any ~~qualified employee or on the use of any tools or equipment for the performance of work within~~ the employee's jurisdiction.

### **SECTION 3. SUPERVISION**

Employees shall work under the supervision of the craft foreperson or general foreperson.

### **SECTION 4. TRAVEL ALLOWANCES**

There shall be no payments for travel expenses, travel time, subsistence allowance or other such reimbursements or special pay except as expressly set forth in this Agreement.

### **SECTION 5. FULL WORK DAY**

Employees shall be at their work area at the starting time established by the Contractor, provided they are provided access to the work area. The signatories reaffirm their policy of a fair day's work for a fair day's wage.

### **SECTION 6. COOPERATION AND WAIVER**

The Construction Manager, Contractors and the Unions will cooperate in seeking any NYS Department of Labor, or any other government, approvals that may be needed for implementation of any terms of this Agreement. In addition, the Council, on their own behalf and on behalf of its participating affiliated Local Unions and their individual members, intend the provisions of this Agreement to control to the greatest extent permitted by law, notwithstanding contrary provisions of any applicable prevailing wage, or other, law and intend this Agreement to constitute a waiver of any such prevailing wage, or other, law to the greatest extent permissible only for work within the scope of this Agreement, including specifically, but not limited to those provisions relating to shift, night, and similar differentials and premiums. This Agreement does

not, however, constitute a waiver or modification of the prevailing wage schedules applicable to work not covered by this Agreement.

## **ARTICLE 18. SAVINGS AND SEPARABILITY**

### **SECTION 1. THIS AGREEMENT**

In the event that the application of any provision of this Agreement is enjoined, on either an interlocutory or permanent basis, or is otherwise determined to be in violation of law, or if such application may cause the loss of Program funding or any New York State Labor Law exemption for all or any part of the Program Work, the provision or provisions involved (and/or its application to particular Program Work, as necessary) shall be rendered, temporarily or permanently, null and void, but where practicable the remainder of the Agreement shall remain in full force and effect to the extent allowed by law (and to the extent no funding or exemption is lost), unless the part or parts so found to be in violation of law or to cause such loss are wholly inseparable from the remaining portions of the Agreement and/or are material to the purposes of the Agreement. In the event a court of competent jurisdiction finds any portion of the Agreement to trigger the foregoing, the parties will immediately enter into negotiations concerning the substance affected by such decision for the purpose of achieving conformity with the court determination and the intent of the parties hereto for contracts to be let in the future.

### **SECTION 2. THE BID SPECIFICATIONS**

In the event that the Agency's (or Construction Manager's) bid specifications, or other action, requiring that a successful bidder (and subcontractor) become signatory to this Agreement is enjoined, on either an interlocutory or permanent basis, or is otherwise determined to be in violation of law, or may cause the loss of Program funding or any New York State Labor Law exemption for all or any part of the Program Work, such requirement (and/or its application

to particular Program Work, as necessary) shall be rendered, temporarily or permanently, null and void, but where practicable the Agreement shall remain in full force and effect to the extent allowed by law and to the extent no funding or exemption is lost). In such event, the Agreement shall remain in effect for contracts already bid and awarded or in construction only where the Agency and Contractor voluntarily accepts the Agreement. The parties will enter into negotiations as to modifications to the Agreement to reflect the court or other action taken and the intent of the parties for contracts to be let in the future.

### **SECTION 3. NON-LIABILITY**

In the event of an occurrence referenced in Section 1 or Section 2 of this Article, neither the Agency, the Construction Manager, any Contractor, nor any Union shall be liable, directly or indirectly, for any action taken, or not taken, to comply with any court order or injunction, other determination, or in order to maintain funding or a New York State Labor Law exemption for Program Work. Bid specifications will be issued in conformance with court orders then in effect and no retroactive payments or other action will be required if the original court determination is ultimately reversed.

### **SECTION 4. NON-WAIVER**

Nothing in this Article shall be construed as waiving the prohibitions of Article 7 as to signatory Contractors and signatory Unions.

## **ARTICLE 19 - FUTURE CHANGES IN SCHEDULE A AREA CONTRACTS**

### **SECTION 1. CHANGES TO AREA CONTRACTS**

A. Schedule A to this Agreement shall continue in full force and effect until the Contractor and/or Union parties to the Area Collective Bargaining Agreements which are the basis for Schedule A notify the Agency and Construction Manager in writing of the hourly rate changes agreed to in that Area Collective Bargaining which are applicable to work covered by

this Agreement and their effective dates.

~~B. It is agreed that any provisions negotiated into Schedule A collective~~  
bargaining agreements will not apply to work under this Agreement if such provisions are less favorable to those uniformly required of contractors for construction work normally covered by those agreements; nor shall any provision be recognized or applied on Program Work if it may be construed to apply exclusively, or predominantly, to work covered by this Agreement.

C. Any disagreement between signatories to this Agreement over the incorporation into Schedule A of provisions agreed upon in the renegotiation of Area Collective Bargaining Agreements shall be resolved in accordance with the procedure set forth in Article 9 of this Agreement.

## **SECTION 2. LABOR DISPUTES DURING AREA CONTRACT NEGOTIATIONS**

The Unions agree that there will be no strikes, work stoppages, sympathy actions, picketing, slowdowns or other disruptive activity or other violations of Article 7 affecting the Program Work by any Local Union involved in the renegotiation of Area Local Collective Bargaining Agreements nor shall there be any lock-out on such Program Work affecting a Local Union during the course of such renegotiations.

## **ARTICLE 20 - WORKERS' COMPENSATION ADR**

### **SECTION 1.**

An ADR program may be negotiated and participation in the ADR Program will be optional by trade.

## **ARTICLE 21 - HELMETS TO HARDHATS**

### **Section 1.**

The Contractors and the Unions recognize a desire to facilitate the entry into the building and construction trades of veterans who are interested in careers in the building and construction industry. The Contractors and Unions agree to utilize the services of the Center for Military Recruitment, Assessment and Veterans Employment (hereinafter "Center") and the Center's "Helmets to Hardhats" program to serve as a resource for preliminary orientation, assessment of construction aptitude, referral to apprenticeship programs or hiring halls, counseling and mentoring, support network, employment opportunities and other needs as identified by the parties.

### **Section 2.**

The Unions and Contractors agree to coordinate with the Center to create and maintain an integrated database of veterans interested in working on this Project and of apprenticeship and employment opportunities for this Project. To the extent permitted by law, the Unions will give credit to such veterans for bona fide, provable past experience.

### PLA Schedule A

The following Collective Bargaining Agreements, as this Schedule may be amended from time to time in accordance with the Agreement, constitute Schedule A:

- (1) Agreement between the Boilermakers Association of Greater New York, Inc. and the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers AFL-CIO, Lodge No. 5, September 1, 2006 - December 31, 2009.
- (2) Agreement between Association of Cement and Concrete Contractors of New York, Inc. and Cement and Concrete Workers comprised of Local No. 6A, Local No. 18A, Local No. 20 and the Employer, July 1, 2008 - June 30, 2011.
- (3) Agreement between the Cement League and the District Council of Cement and Concrete Workers: Comprised of Local No. 6A, Local No. 18A, Local No. 20; July 1, 2008 - June 30, 2011.
- (4) Agreement between the Cement League and the United Cement Masons' Union Local No. 780, Clarified & Extended from October 23, 1940 to June 30, 2011.
- (5) Building Construction agreement between the Building Contractors Association, Inc. and the District Council of New York City and Vicinity of the United Brotherhood of Carpenters and Joiners of America, AFL-CIO, July 1, 2006 - June 30, 2011.
- (6) General Contractors Association - Carpenters 2006; Agreement Between Members of the General Contractors Association of New York, Inc. and the District Council of Carpenters of New York City and Vicinity, July 1, 2006 - June 30, 2011.
- (7) Trade Agreement between Drywall Tapers and Pointers of Greater New York Local Union 1974, affiliated with International Union of Painters and Allied Trades, AFL-CIO and Drywall Taping Contractors' Association of Greater New York and the Association of Wall-Ceiling & Carpentry Industry of New York, Inc., September 6, 2006 - June 28, 2011; Independent Agreement between Local Union 1974 and Employer.
- (8) Agreement between Allied Building Metal Industries, Inc. and Local Union Nos. 40 and 361 of the International Association of Bridge, Structural and Ornamental and Reinforcing Iron Workers AFL-CIO, July 1, 2008 - June 30, 2014.
- (9) Agreement between Independent Contractors and Local #46 Metallic Lathers Union and Reinforcing Ironworkers of New York and Vicinity of the International Association of Bridge, Structural, Ornamental and Reinforcing Iron Workers, July 1, 2008 - June 30, 2014.
- (10) Agreement of Working Conditions between the Independent Insulation Contractors Association of New York City Inc. and the International Association of Heat and Frost Insulators and Asbestos Workers Local No. 12 of New York City, 2008-2014.

(11) Mason Tenders District Council of Greater New York Master Independent Collective Bargaining Agreement, 2008-2011.

(12) Trade Agreement between District Council No. 9, International Union of Painters and Allied Trades, AFL-CIO and the Association of Master Painters and Decorators of New York, Inc. and the Association of Wall, Ceiling & Carpentry Industries of New York, Inc. and the Window and Plate Glass Dealers Association, May 1, 2005 - April 30, 2011.

(13) Trade Agreement between Enterprise Association Local Union 638 and Mechanical Contractors Association of New York, Inc., July 1, 2008 - June 30, 2011.

(14) Agreement between Allied Building Metal Industries Inc. and Architectural and Ornamental Iron Workers Local Union No. 580 AFL-CIO; July 1, 2008 - June 30, 2011.

(15) Official Working Agreement between Service Contractors Division of the Mechanical Contractors Association of New York and Enterprise Association Metal Trades Branch Local Union 638, July 1, 2007 - June 30, 2010.

(16) Agreement between Association of Contracting Plumbers of the City of New York, Inc. and Local Union No 1 of the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada, July 1, 2007 - June 30, 2010.

(17) Agreement and Working Rules between New York Electrical Contractors Association, Inc. and the Association of Electrical Contractors, Inc. and Local Union No. 3 International Brotherhood of Electrical Workers, AFL-CIO, May 10, 2007 - May 13, 2010.

(18) Official Working Agreement between Service Contractors Division of the Mechanical Contractors Association of New York, Inc. and Enterprise Association Metal Trades Branch Local Union 638, Refrigeration, Air Conditioning, Air Cooling, Oil Burner and Stoker Service and Maintenance Technicians, July 1, 2007 - June 30, 2010.

(19) Structural Steel and Bridge Painters of Greater New York, Local Union No. 806, District Council No. 9, International Union of Painters and Allied Trades, AFL-CIO, CLC and New York Structural Steel Painting Contractors Association, Inc.; Collective Bargaining Agreement, October 1, 2005 - September 30, 2011.

(20) Trade Agreement between United Derrickmen & Riggers Association, Local No. 197 of New York, All long Island, Westchester and Vicinity and Building Stone and Pre-Case Contractors Association, 2008.

(21) Agreement between the Greater New York and New Jersey Tile Contractors Association, Inc., and the Tile Setters and Tile Finishers Union of New York and New Jersey, Local Union No. 7 of the International Union of Bricklayers and Allied Craftworkers, June 8, 2009 - June 2, 2013.

(22) Agreement between The Building Contractors Association, Inc. and International Union of Operating Engineers Local 15 and 15 A, July 1, 2006-June 30, 2011.

(23) Agreement dated as of July 1, 2006 between Building Contractors Association and International Union of Operating Engineers Local 14-14B, July 1, 2006-June 30, 2011.

(24) Agreement Between The Building Contractors Association, Inc. and International Union of Operating Engineers Local 15D affiliated with the AFL-CIO, July 1, 2006-June 30, 2011.

(25) Local 282 International Brotherhood of Teamsters High Rise Contract, Building Contractors Association and Independents, 2008-2013.

(26) Building, Concrete, Excavation & Common Laborers Union Local No. 731 Independent Agreement, July 1, 2006-June 30, 2012.

(27) March 17, 2009 Agreement between ThyssenKrupp Elevator Corp. and International Union of Elevator Constructors, Local 1 of NY and NJ, 2009-2014.

(28) Working Agreement Local Union No. 8 United Union of Roofers, Waterproofers and Allied Workers and Roofing and Waterproofing Contractor's Association of New York and Vicinity, July 1, 2009-June 30, 2011.

(29) Standard Form Collective Bargaining Agreement between Sheet Metal Workers' International Association Local Union #137 and the Greater New York Sign Association, July 16, 2007 – July 15, 2010.

(30) Trade Agreement between \_\_\_\_\_ and Local No. 1 New York of the International Union of Bricklayers and Allied Craftworkers, July 1, 2008 – July 30, 2011.

**Project Labor Agreement - - Letter of Assent**

Dear:

The undersigned party confirms that it agrees to be a party to and be bound by the New York Agency, Project Labor Agreement as such Agreement may, from time to time, be amended by the parties or interpreted pursuant to its terms. The terms of the Project Labor Agreement, its Schedules, Addenda and Exhibits are hereby incorporated by reference herein.

The undersigned, as a Contractor or Subcontractor (hereinafter Contractor) on the Project known as \_\_\_\_\_ and located at \_\_\_\_\_ (hereinafter PROJECT), for and in consideration of the award to it of a contract to perform work on said PROJECT, and in further consideration of the mutual promises made in the Project Labor Agreement, a copy of which was received and is acknowledged, hereby:

- (1) Accepts and agrees to be bound by the terms and conditions of the Agreement, together with any and all schedules; amendments and supplements now existing or which are later made thereto:
- (2) Agrees to be bound by the legally established collective bargaining agreements and local trust agreements as set forth in the Project Labor Agreement and this Agreement but only to the extent of Program Work and as required by the PLA.
- (3) Authorizes the parties to such local trust agreements to appoint trustees and successor trustees to administer the trust funds and hereby ratifies and accepts the trustees so appointed as if made by the Contractor but only to the extent of Program Work as required by the PLA.
- (4) Certifies that it has no commitments or agreements that would preclude its full and complete compliance with the terms and conditions of said Agreement. The Contractor agrees to employ labor that can work in harmony with all other labor on the Project and shall require labor harmony from every lower tier subcontractor it has engaged or may engage to work on the Project. Labor harmony disputes/issues shall be subject to the Labor Management Committee provisions.
- (5) Agrees to secure from any Contractor(s) (as defined in said Agreement) which is or becomes a Subcontractor (of any tier), to it, a duly executed Agreement to be Bound in from identical to this document.

**NEW YORK CITY BUILDING AND CONSTRUCTION TRADES COUNCIL**

**STANDARDS OF EXCELLENCE**

The purpose of this Standard of Excellence is to reinforce the pride of every construction worker and the commitment to be the most skilled, most productive and safest workforce available to construction employers and users in the City of New York. It is the commitment of every affiliated local union to use our training and skills to produce the highest quality work and to exercise safe and productive work practices.

The rank and file members represented by the affiliated local unions acknowledge and adopt the following standards:

- *Provide a full days work for a full days pay;*
- *Safely work towards the timely completion of the job;*
- *Arrive to work on time and work until the contractual quitting time;*
- *Adhere to contractual lunch and break times;*
- *Promote a drug and alcohol free work site;*
- *Work in accordance with all applicable safety rules and procedures;*
- *Allow union representatives to handle job site disputes and grievances without resort to slowdowns, or unlawful job disruptions;*
- *Respect management directives that are safe, reasonable and legitimate;*
- *Respect the rights of co-workers;*
- *Respect the property rights of the owner, management and contractors.*

The Unions affiliated with the New York City Building and Construction Trades Council will expect the signatory contractors to safely and efficiently manage their jobs and the unions see this as a corresponding obligation of the contractors under this Standard of Excellence. The affiliated unions will expect the following from its signatory contractors:

- *Management adherence to the collective bargaining agreements;*
- *Communication and cooperation with the trade foremen and stewards;*
- *Efficient, safe and sanitary management of the job site;*
- *Efficient job scheduling to mitigate and minimize unproductive time;*
- *Efficient and adequate staffing by properly trained employees by trade;*
- *Efficient delivery schedules and availability of equipment and tools to ensure efficient job progress;*
- *Ensure proper blueprints, specifications and layout instructions and material are available in a timely manner*
- *Promote job site dispute resolution and leadership skills to mitigate such disputes;*
- *Treatment of all employees in a respectful and dignified manner acknowledging their contributions to a successful project.*

The affiliated unions and their signatory contractors shall ensure that both the rank and file members and the management staff shall be properly trained in the obligations undertaken in the Standard of Excellence.

# **NOTICE TO BIDDERS**

## **DAMAGES FOR DELAY PILOT PROGRAM**

**Please be advised that this contract is part of a pilot program in which the Standard Construction Contract provisions concerning delay damages have been revised to allow contractors to be reimbursed for specified additional costs that are attributable to a delay in the performance of the work resulting from certain acts or omissions of the City agency or its representatives. Certain changes are highlighted here to alert bidders to the pilot program. Please see Articles 11, 12.3, and 13.10 of the Standard Construction Contract for a full understanding and the actual text of the pilot program. The text of the revised Standard Construction Contract is the controlling document should there be any discrepancies between this notice and the Standard Construction Contract.**

Changes to Articles 11, 12.3, and 13.10 of the Standard Construction Contract permit contractors to make claims for delay damages relating to the following circumstances:

The failure of the City to take reasonable measures to coordinate and progress the Work;

Extended delays attributable to the City in the review or issuance of change orders, in shop drawing reviews and approvals or as a result of the cumulative impact of multiple change orders, which constitute a material change to the Work and which have a verifiable impact on project costs.

The unavailability of the site for an extended period of time that significantly affects the scheduled completion of the contract.

The issuance by the City of a stop work order relative to a substantial portion of work for a period exceeding thirty days, that was not brought about through any action or omission of the Contractor.

Differing site conditions that were not known or reasonably ascertainable on a pre-bid inspection of the site or review of the bid documents or other publicly available sources and that are not ordinarily encountered in the Project's geographical area or neighborhood or in the type of work to be performed.

Delays caused by the City's bad faith or its willful, malicious, or grossly negligent conduct;

Delays not contemplated by the parties;

Delays so unreasonable that they constitute an intentional abandonment of the Contract by the City; and

Delays resulting from the City's breach of a fundamental obligation of the Contract.

Please see Article 11.4 for provisions regarding compensable delays.

Specific exclusions to claims for damages also apply, such as for third party (non-City) acts and omissions, court orders, strikes or *force majeure* events. For provisions related to non-compensable delays, please see Article 11.5.

For those delays where damages are available, Article 11 also sets forth what costs are recoverable. Please see Article 11.7 for which costs are recoverable and which costs are non-recoverable.

Article 11 also contains provisions concerning notice and documentation of claims. Please see Articles 11.1, 11.2, and 11.6. Contractors must comply with the notice requirements in order to preserve their claims. Consequently, please read these sections carefully. Delay damages are compensable only if they were actually, reasonably and necessarily incurred and are verified by appropriate documentation submitted at the appropriate times.

Claims for delay damages are not covered by the dispute resolution process in Article 27 of the Standard Construction Contract. See Article 11.8. When the amount of delay damages are agreed upon, such damages may be paid through a change order.

# NOTICE TO BIDDERS

Please be advised that the City of New York has revised the form of the performance bond that is required for City construction contracts that do not exceed \$5 million. The form of bond required for contracts that are greater than \$5 million has not changed. The City now has two approved forms. One form is to be used for contracts that do not exceed \$5 million and one form is to be used for contracts above \$5 million. The City's payment bond remains unchanged.

**The new bond form for contracts that do not exceed \$5 million has been approved by the U.S. Small Business Administration ("SBA") for participation in their Bond Guarantee Program.** The SBA's Bond Guarantee Program enables eligible small businesses to obtain or increase bonding by having the SBA act as a partial guarantor of the contractor to the surety. If you are interested in participating in this program, we suggest that you contact your broker or the SBA.

In order to maximize participation by small businesses in the SBA Guarantee Program, the City also encourages prime contractors who are awarded contracts greater than \$5 million to allow their subcontractors to use the SBA-approved form, particularly on contracts that are subject to Local Law 129 (the M/WBE program), if the prime contractor requires subcontractors to obtain performance bonds.

## INFORMATION FOR BIDDERS

### 1. Description and Location of Work

The description and location of the work for which bids are requested are specified in Attachment 1, "Bid Information". Attachment 1 is included in the Bid Booklet.

### 2. Time and Place for Receipt of Bids

Sealed bids shall be received on or before the date and hour specified in Attachment 1, at which time they will be publicly opened and read aloud in the presence of the Commissioner or his or her representative, and any bidders who may desire to be present.

### 3. Definitions

The definitions set forth in the Procurement Policy Board Rules shall apply to this Invitation For Bids.

### 4. Invitation For Bids and Contract Documents

(A) Except for titles, sub-titles, headings, running headlines, tables of contents and indices (all of which are printed herein merely for convenience) the following, except for such portions thereof as may be specifically excluded, shall be deemed to be part of the Contract and the Invitation for Bids.

- (1) All provisions required by law to be inserted in this Contract, whether actually inserted or not
- (2) The Contract Drawings and Specifications
- (3) The General Conditions, the General Requirements and the Special Conditions, if any
- (4) The Contract
- (5) The Information for Bidders; Request for Proposals; Notice of Solicitation and Proposal For Bids; Bid or Proposal, and, if used, the Bid Booklet
- (6) The Budget Director's Certificate; all Addenda issued prior to the receipt of the bids; the Notice of Award; Performance and Payment Bonds, if required; and the Notice to Proceed with the Work.

(B) For particulars as to this procurement, including quantity and quality of the purchase, extent of the work or labor to be performed, delivery and performance schedule, and any other special instructions, prospective bidders are referred to the Invitation For Bids Documents. A copy of such documents can be obtained at the location set forth in Attachment 1.

(C) Deposit for Copy of Invitation For Bids Documents: Prospective bidders may obtain a copy of the Invitation For Bids Documents by complying with the conditions set forth in the Notice of Solicitation. The deposit must be in the form of a check or money order made payable to the City of New York, and drawn upon a state or national bank or trust company, or a check of such bank or trust company signed by a duly authorized officer thereof.

(D) Return of Invitation For Bids Documents: All Invitation For Bids Documents must be returned to the Department upon request. If the bidder elects not to submit a bid thereunder, the Invitation For Bids Documents shall be returned to the Department, along with a statement that no bid will be submitted.

(E) Return of Deposit: Such deposit will be returned within 30 days after the award of the contract or the rejection of all bids as set forth in the advertisement, provided the Invitation For Bids Documents are returned to the location specified in Attachment 1, in physical condition satisfactory to the Commissioner.

(F) Additional Copies: Additional copies of the Invitation For Bids Documents may be obtained, subject to the conditions set forth in the advertisement for bids.

5. Pre-Bid Conference

A pre-bid conference shall be held as set forth in Attachment 1. Nothing stated at the pre-bid conference shall change the terms or conditions of the Invitation For Bids Documents, unless a change is made by written amendment as provided in Section 9 below. Failure to attend a mandatory pre-bid conference shall constitute grounds for the rejection of the bid.

6. Agency Contact

Any questions or correspondence relating to this bid solicitation shall be addressed to the Agency Contact person specified in Attachment 1.

7. Bidder's Oath

(A) The bid shall be properly signed by an authorized representative of the bidder and the bid shall be verified by the written oath of the authorized representative who signed the bid, that the several matters stated and information furnished therein are in all aspects true.

(B) A materially false statement willfully or fraudulently made in connection with the bid or any of the forms completed and submitted with the bid may result in the termination of any Contract between the City and the Bidder. As a result, the Bidder may be barred from participating in future City contracts as well as be subject to possible criminal prosecution.

8. Examination and Viewing of Site, Consideration of Other Sources of Information and Changed Conditions

(A) Pre-Bidding (Investigation) Viewing of Site - Bidders must carefully view and examine the site of the proposed work, as well as its adjacent area, and seek other usual sources of information, for they will be conclusively presumed to have full knowledge of any and all conditions on, about or above the site relating to or affecting in any way the performance of the work to be done under the Contract which were or should have been indicated to a reasonably prudent bidder. To arrange a date for visiting the work site, bidders are to contact the Agency Contact person specified in Attachment 1.

(B) Should the contractor encounter during the progress of the work subsurface conditions at the site materially differing from any shown on the Contract Drawings or indicated in the Specifications or such subsurface conditions as could not reasonably have been anticipated by the contractor and were not anticipated by the City, which conditions will materially affect the cost of the work to be done under the Contract, the attention of the Commissioner must be called immediately to such conditions before they are disturbed. The Commissioner shall thereupon promptly investigate the conditions. If he finds that they do so materially differ, or that they could not reasonably have been anticipated by the contractor and were not anticipated by the City, the Contract may be modified with his written approval.

9. Examination of Proposed Contract

(A) Request for Interpretation or Correction: Prospective bidders must examine the Contract Documents carefully and before bidding must request the Commissioner in writing for an interpretation or correction of every patent ambiguity, inconsistency or error therein which should have been discovered by a reasonably prudent bidder. Such interpretation or correction, as well as any additional contract provisions the Commissioner may decide to include, will be issued in writing by the Commissioner as an addendum to the Contract, which will be transmitted to each person recorded as having received a copy of the Contract Documents from the Department. Transmission of such addendum will be by mail, e-mail, facsimile or hand delivery. Such addendum will also be posted at the place where the Contract Documents are available for the inspection of prospective bidders. Upon transmission as provided for herein, such addendum shall become a part of the Contract Documents, and binding on all bidders, whether or not actual notice of such addendum is shown.

(B) Only Commissioner's Interpretation or Correction Binding: Only the written interpretation or correction so given by the Commissioner shall be binding, and prospective bidders are warned that no other officer, agent or employee of the City is authorized to give information concerning, or to explain or interpret, the Contract.

(C) Documents given to a subcontractor for the purpose of soliciting the subcontractor's bid shall include either a copy of the bid cover sheet or a separate information sheet setting forth the project name, the Contract number (if available), the contracting agency and the Project's location.

10. Form of Bid

Each bid must be submitted upon the prescribed form and must contain: a) the name, residence and place of business of the person or persons making the same; b) the names of all persons interested therein, and if no other person is so interested, such fact must be distinctly stated; c) a statement to the effect that it is made without any connection with any other person making a bid for the same purpose and that it is in all respects fair and without collusion or fraud; d) a statement that no Council member or other officer or employee or person whose salary is payable in whole or part from the City Treasury is directly or indirectly interested therein or in the supplies, materials or equipment and work or labor to which it relates, or in any portion of the profits thereof; e) a statement that the bidder is not in arrears to the City or to any agency upon a debt or contract or taxes, and is not a defaulter as surety or otherwise upon any obligation to the City to any agency thereof, except as set forth in the bid.

THE BID SHALL BE TYPEWRITTEN OR WRITTEN LEGIBLY IN INK. THE BID SHALL BE SIGNED IN INK. ERASURES OR ALTERATIONS SHALL BE INITIALED BY THE SIGNER IN INK. FAILURE TO CONFORM TO THE REQUIREMENTS OF THIS SECTION 10 SHALL RESULT IN THE REJECTION OF THE BID.

11. Irrevocability of Bid

The prices set forth in the bid cannot be revoked and shall be effective until the award of the Contract, unless the bid is withdrawn as provided for in Sections 15 and 18 below.

12. Acknowledgment of Amendments

The receipt of any amendment to the Contract Documents shall be acknowledged by the bidder in its bid submission.

13. Bid Samples and Descriptive Literature

Bid samples and descriptive literature shall not be submitted by the bidder, unless expressly requested elsewhere in the Contract or Contract Documents. Any unsolicited bid samples or descriptive literature which are submitted shall not be examined or tested and shall not be deemed to vary any of the provisions of this Contract.

14. Proprietary Information/Trade Secrets

(A) The bidder shall identify those portions of the bid which it deems to be confidential, proprietary information or trade secrets, and provide justification why such materials shall not be disclosed by the City. All such materials shall be clearly indicated by stamping the pages on which such information appears, at the top and bottom thereof with the word "Confidential". Such materials stamped "Confidential" must be easily separable from the non-confidential sections of the bid.

(B) All such materials so indicated shall be reviewed by the Agency and any decision not to honor a request for confidentiality shall be communicated in writing to the bidder. For those bids which are unsuccessful, all such confidential materials shall be returned to the bidder. Prices, makes and model or catalog numbers of the items offered, deliveries, and terms of payment shall be publicly available after bid opening, regardless of any designation of confidentiality made by the bidder.

15. Pre-Opening Modification or Withdrawal of Bids

Bids may be modified or withdrawn by written notice received in the office designated in Attachment 1, before the time and date set for the bid opening. If a bid is withdrawn in accordance with this Section, the bid security, if any, shall be returned to the bidder.

16. Bid Evaluation and Award

In accordance with the New York City Charter, the Procurement Policy Board Rules and the terms and conditions of this Invitation For Bids, this Contract shall be awarded, if at all, to the responsible bidder whose bid meets the requirements and evaluation criteria set forth in the Invitation For Bids, and whose bid price is either the most favorable bid price or, if the Invitation For Bids so states, the most favorable evaluated bid price. A bid may not be evaluated for any requirement or criterion that is not disclosed in the Invitation For Bids.

Restriction: No negotiations with any bidder shall be allowed to take place except under the circumstances and in the manner set forth in Section 21. Nothing in this Section shall be deemed to permit a contract award to a bidder submitting a higher quality item than that designated in the Invitation For Bids, if that bid is not also the most favorable bid.

17. Late Bids, Late Withdrawals and Late Modifications

Any bid received at the place designated in the solicitation after the time and date set for receipt of bids is late and shall not be considered. Any request for withdrawal or modification received at the place designated in the solicitation after the time and date set for receipt of bids is late and shall not be considered. The exception to this provision is that a late modification of a successful bid that makes the bid terms more favorable to the City shall be considered at any time it is received.

18. Withdrawal of Bids.

Except as provided for in Section 15, above, a bidder may not withdraw its bid before the expiration of forty-five (45) days after the date of the opening of bids; thereafter, a bidder may withdraw its bid only in writing and in advance of an actual award. If within sixty (60) days after the execution of the Contract, the Commissioner fails to fix the date for commencement of work by written notice to the bidder, the bidder, at his option, may ask to be relieved of his obligation to perform the work called for by written notice to the Commissioner. If such notice is given to the Commissioner, and the request to withdraw is granted, the bidder waives all claims in connection with this Contract.

19. Mistake in Bids

(A) Mistake Discovered Before Bid Opening: A bidder may correct mistakes discovered before the time and date set for bid opening by withdrawing or correcting the bid as provided in Section 15 above.

(B) Mistakes Discovered Before Award

(1) In accordance with General Municipal Law (Section 103, subdivision 11), where a unilateral error or mistake is discovered in a bid, such bid may be withdrawn upon written approval of the Agency Chief Contracting Officer if the following conditions are met:

- (a) The mistake is known or made known to the agency prior to the awarding of the Contract or within 3 days after the opening of the bid, whichever period is shorter; and
- (b) The price bid was based upon an error of such magnitude that enforcement would be unconscionable; and

- (c) The bid was submitted in good faith and the bidder submits credible evidence that the mistake was a clerical error as opposed to a judgment error; and
- (d) The error in the bid is actually due to an unintentional and substantial arithmetic error or an unintentional omission of a substantial quantity of work, labor, material or services made directly in the compilation of the bid, which unintentional arithmetic error or unintentional omission can be clearly shown by objective evidence drawn from inspection of the original work paper, documents, or materials used in the preparation of the bid sought to be withdrawn; and
- (e) It is possible to place the agency in the same position as existed prior to the bid.

(2) Unless otherwise required by law, the sole remedy for a bid mistake in accordance with this Article shall be withdrawal of the bid, and the return of the bid bond or other security, if any, to the bidder. Thereafter, the agency may, in its discretion, award the Contract to the next lowest bidder or rebid the Contract. Any amendment to or reformation of a bid or a Contract to rectify such an error or mistake therein is strictly prohibited.

(3) If the mistake and the intended correct bid are clearly evident on the face of the bid document, the bid shall be corrected to the intended correct bid and may not be withdrawn. Examples of mistakes that may be corrected are typographical errors, errors in extending unit prices, transposition errors and arithmetical errors.

## 20. Low Tie Bids

(A) When two or more low responsive bids from responsible bidders are identical in price, meeting all the requirements and criteria set forth in the Invitation For Bids, the Agency Chief Contracting Officer will break the tie in the following manner and order of priority:

- (1) Award to a certified New York City small, minority or woman-owned business entity bidder;
- (2) Award to a New York City bidder;
- (3) Award to a certified New York State small, minority or woman-owned business bidder;
- (4) Award to a New York State bidder.

(B) If two or more bidders still remain equally eligible after application of paragraph (A) above, award shall be made by a drawing by lot limited to those bidders. The bidders involved shall be invited to attend the drawing. A witness shall be present to verify the drawing and shall certify the results on the bid tabulation sheet.

## 21. Rejection of Bids

(A) Rejection of Individual Bids: The Agency may reject a bid if:

- (1) The bidder fails to furnish any of the information required pursuant to Section 24 or 28 hereof; or if
- (2) The bidder is determined to be not responsible pursuant to the Procurement Policy Board Rules; or if
- (3) The bid is determined to be non-responsive pursuant to the Procurement Policy Board Rules; or if
- (4) The bid, in the opinion of the Agency Chief Contracting Officer, contains unbalanced bid prices and is thus non-responsive, unless the bidder can show that the prices are not unbalanced for the probable required quantity of items, or if the imbalance is corrected pursuant to Section 15.

(B) Rejection of All Bids: The Agency, upon written approval by the Agency Chief Contracting Officer, may reject all bids and may elect to resolicit bids if in its sole opinion it shall deem it in the best interest of the City so to do.

(C) Rejection of All Bids and Negotiation With All Responsible Bidders: The Agency Head may determine that it is appropriate to cancel the Invitation For Bids after bid opening and before award and to complete the acquisition by negotiation. This determination shall be based on one of the following reasons:

- (1) All otherwise acceptable bids received are at unreasonable prices, or only one bid is received and the Agency Chief Contracting Officer cannot determine the reasonableness of the bid price, or no responsive bid has been received from a responsible bidder; or
- (2) In the judgment of the Agency Chief Contracting Officer, the bids were not independently arrived at in open competition, were collusive, or were submitted in bad faith.

(D) When the Agency has determined that the Invitation for Bids is to be canceled and that use of negotiation is appropriate to complete the acquisition, the contracting officer may negotiate and award the Contract without issuing a new solicitation, subject to the following conditions:

- (1) prior notice of the intention to negotiate and a reasonable opportunity to negotiate have been given by the contracting officer to each responsible bidder that submitted a bid in response to the Invitation for Bids;
- (2) the negotiated price is the lowest negotiated price offered by a responsible bidder; and
- (3) the negotiated price is lower than the lowest rejected bid price of a responsible bidder that submitted a bid in response to the Invitation for Bids.

22. Right to Appeal Determinations of Non-Responsiveness or Non-Responsibility and Right to Protest Solicitations and Award

The bidder has the right to appeal a determination of non-responsiveness or non-responsibility and has the right to protest a solicitation and award. For further information concerning these rights, the bidder is directed to the Procurement Policy Board Rules.

23. Affirmative Action and Equal Employment Opportunity

This Invitation For Bids is subject to applicable provisions of Federal, State and Local Laws and executive orders requiring affirmative action and equal employment opportunity.

24. VENDEX Questionnaires

(A) Requirement: Pursuant to Administrative Code Section 6-116.2 and the PPB Rules, bidders may be obligated to complete and submit VENDEX Questionnaires. Generally, if this bid is \$100,000 or more, or if this bid when added to the sum total of all contracts, concessions and franchises the bidder has received from the City and any subcontracts received from City contractors over the past twelve months, equals or exceeds \$100,000, Vendex Questionnaires must be completed. If required, Vendex Questionnaires must be completed and submitted before any award of contract may be made or before approval is given for a proposed subcontractor. Non-compliance with these submission requirements may result in the disqualification of the bid, disapproval of a subcontractor, subsequent withdrawal of approval for the use of an approved subcontractor, or the cancellation of the contract after its award.

(B) Submission: Vendex Questionnaires must be submitted directly to the Mayor's Office of Contract Services, ATTN: Vendex, 253 Broadway, 9<sup>th</sup> Floor, New York, New York 10007. In addition, the bidder must submit a Confirmation of Vendex Compliance to the agency. A form for this confirmation is set forth in the Bid Booklet.

(C) Obtaining Forms: Vendex Questionnaires, as well as detailed instructions, may be obtained at [www.nyc.gov/vendex](http://www.nyc.gov/vendex). The bidder may also obtain Vendex forms and instructions by contacting the Agency Chief Contracting Officer or the contact person for this contract.

25. Complaints About the Bid Process

The New York City Comptroller is charged with the audit of contracts in New York City. Any vendor who believes that there has been unfairness, favoritism or impropriety in the bid process should inform the Comptroller, Office of Contract Administration, One Centre Street, Room 835, New York, New York; telephone number (212)669-2797.

26. Bid, Performance and Payment Security

(A) Bid Security: Each bid must be accompanied by bid security in an amount and type specified in Attachment 1. The bid security shall assure the City of New York of the adherence of the bidder to its proposal, the execution of the Contract, and the furnishing of Performance and Payment Bonds by the bidder, if required in Attachment 1. Bid security shall be returned to the bidder as follows:

- (1) Within ten (10) days after the bid opening, the Comptroller will be notified to return the deposits of all but the three (3) lowest bidders. Within five (5) days after the award, the Comptroller will be notified to return the deposits of the remaining two unsuccessful bidders.
- (2) Within five (5) days after the execution of the Contract and acceptance of the Contractor's bonds, the Comptroller will be notified to return the bid security of the successful bidder or, if performance and payment bonds are not required, only after the sum retained under Article 21 of the Contract equals the amount of the bid security.
- (3) Where all bids are rejected, the Comptroller will be notified to return the deposit of the three (3) lowest bidders at the time of rejection.

(B) Performance and Payment Security: Performance and Payment Security must be provided in an amount and type specified in Attachment 1. The performance and payment security shall be delivered by the contractor prior to or at the time of execution of the Contract. If a contractor fails to deliver the required performance and payment security, its bid security shall be enforced, and an award of Contract may be made to the next lowest responsible and responsive bidder, or the contract may be rebid.

(C) Acceptable Types of Security: Acceptable types of security for bids, performance, and payment shall be limited to the following:

- (1) a one-time bond in a form satisfactory to the City;
- (2) a bank certified check or money order;
- (3) obligations of the City of New York; or
- (4) other financial instruments as determined by the Office of Construction in consultation with the Comptroller.

Whenever the successful bidder deposits obligations of the City of New York as performance and payment security, the Comptroller may sell and use the proceeds thereof for any purpose for which the principal or surety on such bond would be liable under the terms of the Contract. If the money is deposited with the Comptroller, the successful bidder shall not be entitled to receive interest on such money from the City.

(D) Form of Bonds: Security provided in the form of bonds must be prepared on the form of bonds authorized by the City of New York. Forms for bid, performance, and payment bonds are included in the Invitation for Bids Documents. Such bonds must have as surety thereunder such surety company or companies as are: (1) approved by the City of New York; (2) authorized to do business in the State of New York, and (3) approved by the Department of the Treasury of the United States. Premiums for any required bonds must be included in the base bid.

The bidder is advised that submission of a bid bond where the surety on such bond fails to meet the criteria set forth herein, shall result in the rejection of the bid as non-responsive.

The Department of the Treasury of the United States advises that information concerning approved surety companies may be obtained as follows: (1) from the Government Printing Office at 202-512-1800; (2) through the Internet at <http://www.fms.treas.gov/c570/index.html>, and (3) through a computerized public bulletin board, which can be accessed by using your computer modem and dialing 202-874-6887.

(E) Power of Attorney: Attorneys in fact who sign bid, performance, or payment bonds must file with each bond a certified copy of their power of attorney to sign said bonds.

27. Failure to Execute Contract

In the event of failure of the successful bidder to execute the Contract and furnish the required security within ten (10) days after notice of the award of the Contract, the deposit of the successful bidder or so much thereof as shall be applicable to the amount of the award made shall be retained by the City, and the successful bidder shall be liable for and hereby agrees to pay on demand the difference between the price bid and the price for which such Contract shall be subsequently awarded, including the cost of any required reletting and less the amount of such deposit. No plea of mistake in such accepted bid shall be available to the bidder for the recovery of the deposit or as a defense to any action based upon such accepted bid. Further, should the bidder's failure to comply with this Section cause any funding agency, body or group (Federal, State, City, Public, Private, etc.) to terminate, cancel or reduce the funding on this project, the bidder in such event shall be liable also to the City for the amount of actual funding withdrawn by such agency on this project, less the amount of the forfeited deposit.

28. Bidder Responsibilities and Qualifications

(A) Bidders must include with their bids all information necessary for a determination of bidder responsibility, as set forth in the Specifications.

(B) The Agency may require any bidder or prospective bidder to furnish all books of account, records, vouchers, statements or other information concerning the bidder's financial status for examination as may be required by the Agency to ascertain the bidder's responsibility and capability to perform the Contract. If required, a bidder must also submit a sworn statement setting forth such information as the Agency may require concerning present and proposed plant and equipment, the personnel and qualifications of his working organizations, prior experience and performance record.

(C) Oral Examination on Qualifications: In addition thereto, and when directed by the Agency, the bidder, or a responsible officer, agent or employee of the bidder, must submit to an oral examination to be conducted by the Agency in relation to his proposed tentative plan and schedule of operations, and such other matters as the Agency may deem necessary in order to determine the bidder's ability and responsibility to perform the work in accordance with the Contract. Each person so examined must sign and verify a stenographic transcript of such examination noting thereon such corrections as such person may desire to make.

(D) If the bidder fails or refuses to supply any of the documents or information set forth in paragraph (B) hereof or fails to comply with any of the requirements thereof, the Agency may reject the bid.

29. Employment Report

In accordance with Executive Order No. 50 (1980) as modified by Executive Order 108 (1986), the filing of a completed Employment Report (ER) is a requirement of doing business with the City of New York for construction contractors with contracts of \$1,000,000 or more and subcontractors with construction subcontracts of \$750,000 or more. The required forms and information are included in the Bid Booklet.

30. Labor Law Requirements

(A) General: The successful bidder will be required to comply strictly with all Federal, State and local labor laws and regulations.

(B) New York State Labor Law: This Contract is subject to New York State Labor Law Section 220, which requires that construction workers on the site be paid prevailing wages and supplements. The Contractor is reminded that all wage provisions of this Contract will be enforced strictly and failure to comply will be considered when evaluating performance. Noncompliance may result in the contractor being debarred by the City from future contracts. Complaints filed with the Comptroller may result in decisions which may debar a contractor from bidding contracts with any state governmental entity and other political subdivisions.

(C) Records: The Contractor is expected to submit accurate payroll reports and other required documents and verify attendance and job classifications being utilized in compliance with the law, Contract provisions and agency procedures.

31. Insurance

(A) Bidders are advised that the insurance requirements contained herein are regarded as material terms of the Contract. As required by Article 22 of the Contract, the contractor must effect and maintain with companies licensed and authorized to do business in the State of New York, the types of insurance set forth therein, when required by and in the amounts set forth in Schedule A of the General Conditions. Such required insurance must be provided from the date the contractor is ordered to commence work and up to the date of final acceptance of all required work.

(B) The contractor must, within ten days of receipt of the notice of award, submit the following insurance documentation: (a) original certificate of insurance for general liability in the amount required by Schedule A of the General Conditions, and (b) original certificates of insurance or other proof of coverage for workers' compensation and disability benefits, as required by Section 57 of the New York State Workers' Compensation Law and Section 220 of the Disability Benefits Law.

32. Lump Sum Contracts

(A) Comparison of Bids: Bids on Lump Sum Contracts will be compared on the basis of the lump sum price bid, adjusted for alternate prices bid, if any.

(B) Lump Sum Bids for "General Construction Work" which include excavation shall include all necessary excavation work defined in the Specifications as being included in the lump sum bid. The bidder shall also bid a unit price for the additional cost of excavating material which is defined in the Specifications as excavation for which additional payment will be made. The total estimated additional cost of removing such material will be taken as the quantity set forth in the Engineer's Estimate multiplied by the unit price bid. This total estimated cost of additional excavation shall be added to the lump sum bid for the General Construction Work for the purpose of comparing bids to determine the low bidder.

(C) Variations from Engineer's Estimate: The Engineer's Estimate of the quantity of excavation for which additional payment will be made is approximate only and is given solely to be used as a uniform basis for the comparison of bids and such estimate is not to be considered as part of this contract. The quantities actually required to complete the contract work may be more or less than the quantities in the Engineer's Estimate and, if so, no action for damages or for loss of profits shall accrue to the contractor by reason thereof.

33. Unit Price Contracts

(A) Comparison of Bids: Bids on Unit Price Contracts will be compared on the basis of a total estimated price, arrived at by taking the sum of the estimated quantities of such items, in accordance with the Engineer's Estimate of Quantities set forth in the Bid Form, multiplied by the corresponding unit prices, and including any lump sum bids on individual items.

(B) Variations from Engineer's Estimate: Bidders are warned that the Engineer's Estimate of Quantities on the various items of work and materials is approximate only, given solely to be used as a uniform basis for the comparison of bids, and is not be considered part of this contract. The quantities actually required to complete the contract work may be less or more than so estimated, and if so, no action for damages or for loss of profits shall accrue to the contractor by reason thereof.

(C) Overruns: The terms and conditions applicable to overruns of unit price items are set forth in Article 26 of the Contract.

34. Excise Tax

Bidders are referred to the Specifications for information on Federal Excise Tax exemptions.

35. Licenses and Permits

The successful bidder will be required to obtain all necessary licenses and permits necessary to perform the work.

36. Multiple Prime Contractors

If more than one prime contractor will be involved on this project, all contractors are required to examine the Invitation for Bid packages for all other parts of the project.

37. Locally Based Enterprise Requirements (LBE)

This Contract is subject to the requirements of Administrative Code, Section 6-108.1, and the regulations promulgated thereunder. No construction contract will be awarded unless and until these requirements have been complied with in their entirety. The bidder is advised of the provisions set forth below, as well as the provisions with respect to the Locally Based Enterprise Program contained in Article 67 of the Contract. The contractor is advised that:

(A) If any portion of the Contract is subcontracted, not less than ten percent of the total dollar amount of the contract shall be awarded to locally based enterprises ("LBEs"); except, where less than ten percent of the total dollar amount of the Contract is subcontracted, such lesser percentage shall be so awarded.

(B) No contractor shall require performance and payment bonds from LBE subcontractors.

(C) No Contract shall be awarded unless the contractor first identifies in its bid:

- (1) the percentage, dollar amount and type of work to be subcontracted; and
- (2) the percentage, dollar amount and type of work to be subcontracted to LBEs.

(D) Within ten calendar days after notification of low bid, the apparent low bidder shall submit an "LBE Participation Schedule" to the contracting agency. If such schedule does not identify sufficient LBE subcontractors to meet the requirements of Administrative Code Section 6-108.1, the apparent low bidder shall submit documentation of its good faith efforts to meet such requirements.

(1) The "LBE Participation Schedule" shall include:

- (a) the name and address of each LBE that will be given a subcontract,
- (b) the percentage, dollar amount and type of work to be subcontracted to the LBE, and
- (c) the dates when the LBE subcontract work will commence and end.

- (2) The following documents shall be attached to the "LBE Participation Schedule":
  - (a) verification letters from each subcontractor listed in the "LBE Participation Schedule" stating that the LBE will enter into a formal agreement for work,
  - (b) certification documents of any proposed LBE subcontractor which is not on the LBE certified list, and
  - (c) copies of the certification letter of any proposed subcontractor which is an LBE.
- (3) Documentation of good faith efforts to achieve the required LBE percentage shall include as appropriate but not limited to the following:
  - (a) attendance at prebid meetings, when scheduled by the agency, to advise bidders of contract requirements;
  - (b) advertisement where appropriate in general circulation media, trade association publications and small business media of the specific subcontracts that would be at least equal to the percentage goal for LBE utilization specified by the contractor;
  - (c) written notification to association of small, minority and women contractors soliciting specific subcontractors;
  - (d) written notification by certified mail to LBE firms that their interest in the contract is solicited for specific work items and their estimated values;
  - (e) demonstration of efforts made to select portions of the work for performance by LBE firms in order to increase the likelihood of achieving the stated goal;
  - (f) documented efforts to negotiate with LBE firms for specific subcontracts, including at a minimum:
    - (i) The names, address and telephone numbers of LBE firms that are contacted;
    - (ii) A description of the information provided to LBE firms regarding the plans and specifications for portions of the work to be performed;
    - (iii) Documentation showing that no reasonable price can be obtained from LBE firms;
    - (iv) A statement of why agreements with LBE firms were not reached;
  - (g) a statement of the reason for rejecting any LBE firm which the contractor deemed to be unqualified; and
  - (h) documentation of efforts made to assist the LBE firms contacted that needed assistance in obtaining required insurance.

(E) Unless otherwise waived by the Commissioner with the approval of the Office of Economic and Financial Opportunity, failure of a proposed contractor to provide the information required by paragraphs (C) and (D) above may render the bid non-responsive and the Contract may not be awarded to the bidder. If the contractor states that it will subcontract a specific portion of the work, but can demonstrate despite good faith efforts it cannot achieve its required LBE percentage for subcontracted work until after award of Contract, the Contract may be awarded, subject to a letter of compliance from the contractor stating that it will comply with Administrative Code Section 6-108.1 and subject to approval by the Commissioner. If the contractor has not met its required LBE percentage prior to award, the contractor shall demonstrate that a good faith effort has been made subsequent to award to obtain LBEs on each subcontract until it meets the required percentage.

(F) When a bidder indicates prior to award that no work will be subcontracted, no work may be subcontracted without the prior written approval of the Commissioner, which shall be granted only if the contractor in good faith seeks LBE subcontractors at least six weeks prior to the start of work.

(G) The contractor may not substitute or change any LBE which was identified prior to award of the contract without the written permission of the Commissioner. The contractor shall make a written application to the Commissioner for permission to make such substitution or change, explaining why the contractor needs to change its LBE subcontractor and how the contractor will meet its LBE subcontracting requirement. Copies of such application must be served on the originally identified LBE by certified mail return receipt requested, as well as the proposed substitute LBE. The Commissioner shall determine whether or not to grant the contractor's request for substitution.

38. Bid Submission Requirements

The Bid Submission Requirements are set forth on page 2 of the Bid Booklet.

39. Comptroller's Certificate

This Contract shall not be binding or of any force unless it is registered by the Comptroller in accordance with Section 328 of the City Charter and the Procurement Policy Board Rules. This Contract shall continue in force only after annual appropriation of funds by the City of New York and certification as hereinabove set forth.

40. Procurement Policy Board Rules

This Invitation For Bids is subject to the Rules of the Procurement Policy Board of the City of New York. In the event of a conflict between said Rules and a provision of this Invitation For Bids, the Rules shall take precedence.

41. DDC Safety Requirements

The DDC Safety Requirements apply to the work to be performed pursuant to the Contract. The DDC Safety Requirements are set forth on the following pages.

**CITY OF NEW YORK**  
**DEPARTMENT OF DESIGN AND CONSTRUCTION**  
**SAFETY REQUIREMENTS**

---

**THE DDC SAFETY REQUIREMENTS INCLUDE THE FOLLOWING SECTIONS:**

- I. POLICY ON SITE SAFETY**
- II. PURPOSE**
- III. DEFINITIONS**
- IV. RESPONSIBILITIES**
- V. SAFETY QUESTIONNAIRE**
- VI. SAFETY PROGRAM AND SITE SAFETY PLAN**
- VII. KICK-OFF/PRE-CONSTRUCTION MEETINGS AND SAFETY REVIEW**
- VIII. EVALUATION DURING WORK IN PROGRESS**
- IX. SAFETY PERFORMANCE EVALUATION**

**THIS PAGE INTENTIONALLY LEFT BLANK**

## I. POLICY ON SITE SAFETY

The City of New York Department of Design and Construction (DDC) is committed to a policy of injury and illness prevention and risk management for construction work that will ensure the safety and health of the workers engaged in the projects and the protection of the general public. Therefore, it is DDC's policy that work carried out by Contractors on DDC jobsites must, at a minimum, comply with applicable federal, state and city laws, rules and regulations, including without limitation:

- ☐ U. S. Department of Labor 29 Code of Federal Regulations (CFR) Part 1926 and applicable Sub-parts of Part 1910 – U.S. Occupational Safety and Health Administration (OSHA) including, but not limited to "Respiratory Protection" (29 CFR 1910.134), "Permit-Required Confined Spaces" (29 CFR 1910.146), and "Hazard Communication" (29 CFR 1910.1200);
- ☐ New York State Department of Labor Industrial Code Rule 23 – Protection in Construction, Demolition and Excavation;
- ☐ New York City Construction Codes, Title 28
- ☐ NYC Department of Transportation Title 34 Chapter 2 – Highway Rules
- ☐ New York State Department of Labor Industrial Code Rule 753
- ☐ NYC Local Law No. 113 (2005) Noise Control Code

In addition, all regulations promulgated by the NYC Department of Transportation, including requirements for Maintenance and Protection of Traffic (MPT), are applicable when contained in contract specifications. While MPT is a significant component of work in our Infrastructure Division, it does not supersede or exempt Contractors from complying with other applicable health and safety standards (for example, excavating and trenching standards, operation of heavy equipment and compliance with City environmental and noise regulations).

## I. PURPOSE

The purpose of this policy is to ensure that Contractors perform their work and supervise their employees in accordance with all applicable federal, state and city rules and regulations. Further, Contractors will be expected to minimize or eliminate jobsite and public hazard, through a planning, inspection, auditing and corrective action process. The goal is to control risks so that injuries, illnesses and accidents to contractors' employees, DDC employees and the general public, as well as damage to city-owned and private property, are reduced to the lowest level feasible.

## III. DEFINITIONS

**Agency Chief Contracting Officer (ACCO):** The ACCO shall mean the person delegated authority by the Commissioner to organize and supervise the procurement activity of subordinate Agency staff in conjunction with the CCPO.

**Competent Person:** As defined by OSHA, an individual who is capable of identifying existing and predictable hazards in the surroundings or working conditions that are unsanitary, hazardous, or dangerous to employees or the general public, and who has authorization to take prompt corrective measures to eliminate them.

**Construction Safety Auditor:** A representative of the QACS Construction Safety Unit who provides inspection and assessment services to enhance health and safety on all DDC construction projects. The activities of the Construction Safety Auditor include performing site surveys, reviewing health and safety plans, reviewing construction permits, and rendering technical advice and assistance to DDC Resident Engineers and Project Managers.

**Construction Safety Unit:** A part of QACS within the Division of Technical Support that assesses contractor safety on DDC jobsites and advises responsible parties of needed corrective actions.

**Construction Superintendent:** A representative of the contractor responsible for overseeing performance of the required construction work. This individual must engage in sound construction practices, and is responsible to maintain a safe work site. In the case of a project involving the demolition, alteration or new construction of buildings, the Construction Superintendent must be licensed by the NYC Department of Buildings.

**Contractor:** For purposes of these Safety Requirements, the term "Contractor" shall mean any person or entity that enters into a contract for the performance of construction work on a DDC project. The term "Contractor" shall include any person or entity which enters into any of the following types of contracts: (1) a prime construction contract for a specific project, (2) a prime construction contract using the Job Order Contracting System ("JOCS Contract"), and (3) a subcontract with a CM/Builder ("First Tier Subcontract").

**Director - Quality Assurance and Construction Safety (QACS):** Responsible for the operations of the QACS Construction Safety Unit and the DDC Site Safety management programs.

**Job Hazard Assessment (JHA):** A process of identifying site-specific hazards that may be present during construction and establishing the means and methods to reduce or eliminate those hazards.

**Jobsite Safety Coordinator:** A person designated by the Contractor to be onsite during all activities. This individual shall have received, at a minimum, the OSHA 10-hour construction safety program. Other examples of acceptable training are the 30-hour OSHA Safety and Health Standards for the Construction Industry training program (OSHA 510) or a degree/certificate in a safety and health from a college-level curriculum. This person does not necessarily have to be dedicated full-time to site safety, but must have sufficient experience and authority to undertake corrective action and must qualify to be a competent person. For certain projects, as defined in NYC Construction Codes - Title 28, this person may be required to have a Site Safety Manager's License issued by the NYC DOB.

**Qualified Person:** As defined by OSHA, an individual who, by possession of a recognized degree, certificate, license or professional standing, or who by extensive knowledge, training, and experience, has successfully demonstrated his or her ability to solve problems relating to the subject matter, the work, or the project. Qualified Persons are required under regulation to address issues pertaining, but without limit, to fall protection, scaffold design and trenching and shoring, among others.

**Resident Engineer (RE) / Construction Project Manager (CPM):** Representative of the Commissioner duly designated by the Commissioner to be his/her representative at the site of the work. (The RE/CPM may be a third-party consultant, including a CM, retained by DDC.)

**Safety Program:** Established by the Contractor that covers all operations of that Contractor and establishes the Contractor's overall safety policy, regulatory compliance plan and minimum safety standards. The Safety Program must be submitted prior to the commencement of work at the site and is subject to review and acceptance by the Construction Safety Unit.

**Safety Questionnaire:** Used by DDC to evaluate Contractor's current and past safety performance. It is required to be completed by all Contractors initially when submitting bids for Construction work, or when being pre-qualified and updated annually or as requested by the DDC.

**Site Safety Plan:** A site-specific safety plan developed by the Contractor for a specific project. The Site Safety Plan must identify hazards associated with the project, and include specific safety precautions and training appropriate and necessary to complete the work. The Site Safety Plan must be submitted prior to the commencement of work at the site and is subject to review and acceptance by the Construction Safety Unit.

**Unsafe or Unhealthy Condition:** A condition that could be potentially hazardous to the health and safety of personnel or the public, and/or damaging to equipment, machinery, property or the environment.

**Weekly Safety Meetings:** Weekly documented jobsite safety meetings, given to all jobsite personnel by contractor, with the purpose of discussing general safety topics and job specific requirements encountered at the DDC work site.

#### **IV. RESPONSIBILITIES**

All persons who manage, perform, and provide support for construction projects shall conduct operations in compliance with the requirements identified in this Policy and all applicable governing regulatory agency requirements and guidelines pertaining to safety in construction.

##### **A. Resident Engineer / Construction Project Manager / Construction Manager**

- Monitors the issuance of safety-related permits, approvals and drawings and maintains copies on site.
- Monitors construction-related work activities to confirm that they are conducted in accordance with DDC policies and all applicable regulations that pertain to construction safety.
- Maintains documentation and periodically attends weekly safety meeting.
- Notifies the Construction Safety Unit and the ACCO's Insurance and Risk Management Unit of project-related accidents and emergencies, as per DDC's Construction Safety Emergency Protocol.
- Gathers facts related to all accidents and prepares DDC Accident Reports.
- Notifies the Construction Safety Unit of outside regulatory agency inspections and forwards a copy of the inspection report within three days of its receipt.
- Monitors the conditions at the site for conformance with the Site Safety Plan and DDC construction documents.
- Notifies the contractor and DDC in the event that any condition or activity exists that is not in compliance with the Site Safety Plan, applicable federal, state or local codes or any condition that presents a potential risk of injury to the public or workers or possible damage to property.
- Notifies DDC of any emergency condition and directs the contractor to provide such labor, materials, equipment and supervision to abate such conditions.
- Reports gross safety violations to the Construction Safety Unit immediately.

##### **A. Contractors**

- Complete a Safety Questionnaire and submit with its bid or as part of a pre-qualification package.
- Provide a Written Job Hazard Assessment (JHA) that identifies expected safety issues of the work to be performed. JHA shall be included with the Site Safety Plan submitted by the contractor.
- Submit a Site Safety Plan and Safety Program within 15 days of issuance of the Notice to Proceed, or as otherwise directed. The Site Safety Plan and Safety Program are subject to review and acceptance by the Construction Safety Unit prior to the commencement of work at the site. The Site Safety Plan shall be revised and updated as necessary.
- Ensure that all employees are aware of the hazards associated with the project through formal and informal training and/or other communications. Conduct and document weekly safety meetings for the duration of the project. Documentation to be provided to the RE/CPM/CM on a monthly basis.
- Name a Construction Superintendent, if required.
- Name a Job Site Safety Coordinator. The Contractor will be required to identify the Job Site Safety Coordinator in the Site Safety Plan.
- Comply with all mandated federal, state and local safety and health rules and regulations.
- Comply with all provisions of the Site Safety Plan.
- As part of the Site Safety Plan, prepare a site specific MPT (if not otherwise provided in the contract documents) and comply with all of its provisions.
- Conduct and document site-specific safety orientation for Contractor personnel to review the hazards associated with the project as identified in the Site Safety Plan and the specific safety procedures and controls that will be used to protect workers, the general public and property. The Job Site Safety Coordinator will conduct this training prior to mobilization and provide documentation to the RE/CPM/CM.
- Provide, replace and adequately maintain at or around the project site, suitable and sufficient signage, lights, barricades and enclosures (fences, sidewalk sheds, netting, bracing, etc.).
- Report unsafe conditions or hazards to the DDC RE/CPM/CM as soon as practical, but no more than 24 hours after discovery, and take action to remove or abate such conditions.

- Report any accident involving injuries to workers or the general public, as well as property damage, to the DDC RE/CPM/CM within two (2) hours.
- Notify the DDC RE/CPM/CM within two (2) hours of the start of an inspection by any regulatory agency personnel, including OSHA.
- Maintain all records pertaining to all required compliance documents and accident and injury reports.
- Respond to DDC recommendations on safety, which shall in no way relieve the Contractor of its responsibilities for safety on the project. The Contractor has sole responsibility for safety.

## V. SAFETY QUESTIONNAIRE

DDC requires that all Contractors provide information regarding their current and past safety and environmental performance and programs. This will be accomplished by the use of the DDC Safety Questionnaire. As a part of the bid submittal package, the contractor must submit a completed DDC Safety Questionnaire listing their workers' compensation experience modification rating and OSHA Incidence Rates for the three (3) years prior to the date of the bid opening. DDC may request a Contractor to update its Questionnaire at any time or to provide more detailed information. The Contractor must provide the requested update within 30 days.

The following criteria will be used by DDC in reviewing the Contractor's responsibility, which will be based on the information provided on the questionnaire:

- Criteria 1: OSHA Injury and Illness Rates (I&IR) are no greater than the average for the industry (based on the most current Bureau of Labor Statistics data for the Contractors SIC code); and
- Criteria 2: Insurance workers compensation Experience Modification Rate (EMR) equal to or less than 1.0; and
- Criteria 3: Any willful violations issued by OSHA or NYC DOB within the last three years; and
- Criteria 4: A fatality (worker or member of public) experienced on or near Contractor's worksite within the last three (3) years; and
- Criteria 5: An unacceptable rating by QACS based on past performance on DDC projects; and
- Criteria 6: Contractor has in place an acceptable corporate safety program and its employees shall have completed all documented relative safety training; and
- Criteria 7: Contractor shall provide OSHA Injury Records (currently OSHA 300 Log) for the last three (3) years.

If the Contractor fails to meet the basic criteria listed above, the Construction Safety Unit may request, through the ACCO, more detail concerning the Contractor's safety experience. DDC may request the Contractor to provide copies of, among other things, OSHA records, OSHA and DOB citations, EPA citations and written Safety Programs.

## VI. SAFETY PROGRAM AND SITE SAFETY PLAN

Within fifteen (15) days of issuance of the Notice to Proceed, or as otherwise directed, the Contractor shall submit the following: (1) Safety Program, and (2) Site Safety Plan. The Safety Program shall set forth the Contractor's overall safety policy, regulatory compliance plan and minimum safety standard, and the Site Safety Plan shall identify hazards associated with the project, and include specific safety precautions and training appropriate and necessary to complete the work. The Safety Program and the Site Safety Plan are subject to review and acceptance by the Construction Safety Unit prior to the commencement of work at the site. Failure by the contractor to submit an acceptable Site Safety Plan and Safety Program shall be grounds for default.

The Site Safety Plan shall apply to all Contractor and subcontractor operations, and shall have at a minimum, the following elements. Each element shall be described in a separate section in the written document. It may be necessary to modify the basic format for certain unique or high-risk projects (such as tunnels or high-rise construction). The basic elements are as follows:

1. **Responsibility and Organization:** Identify the person or persons with authority and responsibility for implementing the Site Safety Plan. Provide an organization chart and define levels of authority and responsibility. Identify the Competent Person, the Construction Superintendent (if required), the Job Safety Coordinator and the Qualified Person required for this project.
2. **Communication:** Establish a system for communicating with employees and subcontractors on matters relating to worker and public safety and health and environmental protection, including provisions designed to encourage employees to inform the employer of hazards at the worksite without fear of reprisal. An emergency response notification protocol is to be established that also includes after hours contact numbers. The plan must also include provisions for weekly safety meetings held by the Job Site Safety Coordinator.
3. **Job Hazard Assessment:** A written document submitted by the contractor, used to identify expected job hazards and public safety risks and state the specific means and methods to reduce, control or eliminate those hazards. This part of the Site Safety Plan must also include how on-going evaluations of those risks and hazards will be carried out, including plans for periodic inspections to identify unsafe conditions, work practices and public safety hazards.
4. **Accident/Exposure Investigation:** Establish a procedure to investigate and report occupational and public injury or illness, property damage, vehicle accidents or other mishaps.
5. **Hazard Correction:** Establish means, methods and/or procedures for correcting unsafe or unhealthy conditions that might be exposing both the public and workers to hazards. Corrective actions must be taken immediately when observed or discovered. Should an imminent hazard exist which cannot be immediately abated without endangering employees, the public and/or property, remove or restrict all exposed persons from the area except those necessary to correct the existing condition. Employees necessary to correct the hazardous condition shall be provided the necessary safeguards. When corrective actions cannot be taken immediately, temporary measures should be taken until such time permanent measures are taken to eliminate the potential risks or hazards.
6. **Training:** Describe site-specific hazard training programs. In addition to the required safety orientation, additional site specific training, in the form of required weekly safety meetings, will be required. Contractors must also initiate training when: a) new employees are hired; b) employees are given new job assignments for which training has not been previously received; c) new substances, processes, procedures or equipment are introduced that might represent a new public or worker hazard; d) the employee is made aware of a new or previously unrecognized hazard; e) new supervisors are assigned to familiarize themselves with the safety and health hazards to which employees under their immediate direction and control may be exposed; and f) after a jobsite incident or accident has occurred.
7. **Recordkeeping:** Establish procedures to maintain records of scheduled and periodic inspections, weekly safety meetings, and training records. Updated records shall be maintained at the jobsite, accessible to the Construction Safety Auditors and/or Quality Assurance Auditors/RE/CPM, and retained in accordance with DDC policy.

The most critical component of the Site Safety Plan is the Job Hazard Assessment section. This section must address specific hazards that are anticipated throughout the project. Each Site Safety Plan must address, at a minimum:

- Public and pedestrian safety
- Fall protection
- Electrical hazards
- Scaffolding
- Fire protection
- Emergency notification & response
- Housekeeping / debris removal
- Dust control
- Maintenance and protection of traffic
- Trenching and excavating
- Heavy equipment operations
- Material / equipment storage
- Environmental contamination
- Sheeting and shoring
- Alcohol and Drug Abuse Policy

The following additional hazards must be addressed, if applicable, based on the contract safety specifications and/or the results of the JHA (the list is not all-inclusive):

- Basic Personal Protective Equipment
- Compressed Air
- Compressed Gas Cylinders
- Cranes, Derricks and Hoists
- Demolition
- Electrical safety
- Excavations and Trenching
- Fall Protection – Floor openings/Stairways
- Fall Protection – Guardrails Toe boards etc
- Fall Protection – Leading Edge
- Fall Protection – Personal Fall Protection Devices
- Fire Protection and Fire Prevention
- Hazard Communication (RIGHT TO KNOW)
- Hazardous Energy & Lock Out / Tag Out
- Housekeeping/ Sanitation
- Maintenance and Protection of Traffic (MPT)
- Man Lifts /Aerial Lifts
- Marine Operations
- Motor Vehicle Safety
- Overhead Power lines
- Permit Required Confined Space
- Portable Ladders
- Powered Actuated Tools
- Powered Material Handling Equipment
- Scaffolds – Mobile
- Scaffolds – Stationary
- Scaffolds – Suspended
- Slings
- Steel Erection
- Welding and Cutting (Hot Work)
- Airborne Contaminants – Particulates – General
- Asbestos
- Blood borne Pathogens
- Hearing Protection
- Lead in Construction
- Mercury in Construction
- PCB's
- Respiratory Protection
- Silica
- Thermal Stress
- West Nile Virus
- Rodents and Vermin
- Noise Mitigation Plan

Certain DDC programs, such as Job Order Contracting System (JOCS), may not necessarily require Site Safety Plans. The JOCS contractor will be required to submit a Safety Program. In addition, certain DDC Operating Units may establish program or client-specific safety requirements. The contractor's Site Safety Plan must address such program or client specific safety requirements.

## **VII. KICK-OFF MEETINGS/PRE-CONSTRUCTION AND SAFETY REVIEW**

As part of the construction kick-off meeting, a Site Safety Plan review will be part of the agenda. A QACS representative will participate in this meeting with the contractor prior to the start of the project for the purpose of:

- A. Reviewing the safety issues detailed in the contract.
- B. Reviewing the Site Safety Plan.
- C. Reviewing any new issues or information that was not previously addressed.
- D. Discussing planned inspections and audits of the site by DDC personnel.

## **VIII. EVALUATION DURING WORK IN PROGRESS**

The Contractor's adherence to these Safety Requirements will be monitored throughout the project. This will be accomplished by the following:

- A. Use of a safety checklist by a representative of the Construction Safety Unit or other designated DDC representative or Consultant during regular, unannounced inspections of the job site. Field Exit Conferences will be held with the RE/CPM, Contractor Superintendents or Safety Representatives.
- B. The RE/CPM will continually monitor the safety and environmental performance of the contractor's employees and work methods. Deficiencies shall be brought to the attention of the contractor's representative on site for immediate correction. The DDC representative will maintain a written record of these deficiencies and forward them to the Construction Safety Unit on a weekly basis. Any critical deficiencies shall be immediately reported to QACS phone# (718) 391-1624 or (718) 391-1911.
- C. If the Contractor's safety performance during the project is not up to DDC standards (safety performance measure, accident/incident rate, etc.) the Director- QACS, or designee will meet with the Contractor's safety representative, the DDC project manager, the RE/CPM, or the DDC Environmental Specialist (if environmental issues are involved). The purpose of this meeting is to 1) determine the level of non-compliance; 2) explain and clarify the safety/environmental provisions; 3) agree on a future course of action to correct the deficiencies.
- D. If the deficiencies continue to occur with inadequate attention by the contractor, this shall, among other remedies available, be grounds for default.
- E. The contractor shall inform the Construction Safety Unit and ACCO Insurance and Risk Management Unit of all medical injuries or illnesses that require doctors' treatment resulting from an on-the-job incident within 24 hours of the occurrence. The Construction Safety Unit shall also be immediately informed of all fatalities, catastrophic accidents with more than one employee hospitalized, any injuries to members of the general public and major equipment damage (e.g., property damage, equipment rollovers, loads dropped from crane). QACS shall maintain a record of all contractor injuries and illnesses during the project and provide regular reports to the Agency.
- F. The Construction Safety Unit shall be immediately notified at the start of any NYS-DOL/ NYC-COSH/ OSHA/ EPA inspections. The Director of Quality Assurance & Construction Safety shall maintain a log of all contractor OSHA/EPA inspections and citations during the project.

## **IX. SAFETY PERFORMANCE EVALUATION**

The contractor's safety record, including all DDC inspection results, will be considered as part of the Contractor's performance evaluation at the conclusion of the project. Poor safety performance during the course of the project shall be a reason to rate a Contractor unsatisfactory which will be reflected in the City's Vendex system and will be considered for future procurement actions as set forth in the City's Procurement Policy Board Rules.

CITY OF NEW YORK

STANDARD CONSTRUCTION CONTRACT (September 2008)

The Standard Construction Contract dated September 2008 (the "Contract") is amended as set forth below.

- Article 77: Article 77, Part A, Section 5 is deleted in its entirety and replaced with the following:

5. Where a Subcontractor Utilization Plan has been submitted, the Contractor shall, within 30 days of issuance by Agency of a notice to proceed, submit a list of proposed persons or entities to which it intends to award subcontracts within the subsequent 12 months. In the case of multi-year contracts, such list shall also be submitted every year thereafter. **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5), [i.e., a contract valued at or below \$3M (for projects in New York City) or a contract that is subject to a Project Labor Agreement] where the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades [i.e., plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring], the Contractor must identify all those to which it intends to award construction subcontracts for any of the Wicks trades, regardless of what point in the life of the contract such subcontracts will occur, at the time of bid submission. In the event that the Contractor's selection of a subcontractor is disapproved, the Contractor shall have a reasonable time to propose alternate subcontractors.**

- Article 77: Article 77, Part A, Section 11 is deleted in its entirety and replaced with the following:

11. **Modification of Subcontractor Utilization Plan.** A Contractor may request a modification of its Subcontractor Utilization Plan (Subcontractor Participation Goals) after award of this Contract. **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5), [i.e., a contract valued at or below \$3M (for projects in New York City) or a contract that is subject to a Project Labor Agreement] where the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades [i.e., plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring], the Contractor may request a Modification of its Subcontractor Utilization Plan as part of its bid submission. The Agency may grant a request for Modification of a Contractor's Subcontractor Utilization Plan if it determines that the Contractor has established, with appropriate documentary and other evidence, that it made reasonable, good faith efforts to meet the Subcontractor Participation Goals. In making such determination, Agency shall consider evidence of the following efforts, as applicable, along with any other relevant factors:**

Sub-paragraphs (a) through (h) remain unchanged.

**THIS PAGE INTENTIONALLY LEFT BLANK**

**WITNESSETH:**

The parties in consideration of the mutual agreements contained herein, agree as follows:

**CHAPTER I  
THE CONTRACT AND DEFINITIONS**

**ARTICLE 1. THE CONTRACT**

1.1 Except for titles, subtitles, headings, running headlines, tables of content and indices (all of which are printed herein merely for convenience), the following, except for such portions thereof as may be specifically excluded, shall be deemed to be part of this Contract:

1.1.1 All provisions required by law to be inserted in this Contract, whether actually inserted or not;

1.1.2 The Contract Drawings and Specifications;

1.1.3 The General Conditions and Special Conditions, if any;

1.1.4 The Contract;

1.1.5 The Information for Bidders; Request for Proposals; Notice of Solicitation and Proposal For Bids; Bid or Proposal, and, if used, the Bid Booklet;

1.1.6 The Budget Director's Certificate; all Addenda issued prior to the receipt of the bids; the Notice of Award; Performance and Payment Bonds, if required; and the Notice to Proceed with the Work.

1.2 Should any conflict occur in or between the Drawings and Specifications, the Contractor shall be deemed to have estimated the most expensive way of doing the Work, unless the Contractor shall have asked for and obtained a decision in writing from the Commissioner, of the Agency that is entering into this Contract, before the submission of its bid as to what shall govern.

**ARTICLE 2. DEFINITIONS**

2.1 The following words and expressions, or pronouns used in their stead, shall, wherever they appear in this Contract, be construed as follows, unless a different meaning is clear from the context:

2.1.1 "Addendum" or "Addenda" shall mean the additional Contract provisions issued in writing by the Commissioner prior to the receipt of bids.

2.1.2 "Agency" shall mean a city, county, borough or other office, position, department, division, bureau, board or commission, or a corporation, institution or agency of government, the expenses of which are paid in whole or in part from the City treasury.

2.1.3 "Agency Chief Contracting Officer" (ACCO) shall mean a person delegated authority by the Commissioner to organize and supervise the procurement activity of subordinate Agency staff in conjunction with the CCPO.

2.1.4 "City" shall mean the City of New York.

2.1.5 **"City Chief Procurement Officer" (CCPO)** shall mean a person delegated authority by the Mayor to coordinate and oversee the procurement activity of Mayoral agency staff, including the ACCO and any offices which have oversight responsibility for the procurement of construction.

2.1.6 **"Commissioner"** shall mean the head of the Agency that has entered into this Contract, or his/her duly authorized representative.

2.1.7 **"Comptroller"** shall mean the Comptroller of the City of New York.

2.1.8 **"Contract" or "Contract Documents"** shall mean each of the various parts of the contract referred to in Article 1 hereof, both as a whole and severally.

2.1.9 **"Contract Drawings"** shall mean only those drawings specifically entitled as such and listed in the Specifications or in any Addendum, or any drawings furnished by the Commissioner, pertaining or supplemental thereto.

2.1.10 **"Contract Work"** shall mean everything required to be furnished and done by the Contractor by any one or more of the parts of the Contract referred to in Article 1, except Extra Work as hereinafter defined.

2.1.11 **"Contractor"** shall mean the entity which executed this Contract, whether a corporation, firm, partnership, joint venture, individual, or any combination thereof, and it(s), their, his/ her successors, personal representatives, executors, administrators and assigns, and any person, firm, partnership, joint venture, individual, or corporation which shall at any time be substituted in the place of the Contractor under this Contract.

2.1.12 **"Days"** shall mean calendar days, except where otherwise specified.

2.1.13 **"Engineer" or "Architect" or "Project Manager"** shall mean the person so designated in writing by the Commissioner to act as such in relation to this Contract, including a private Architect or Engineer or Project Manager, as the case may be.

2.1.14 **"Engineering Audit Officer" (EAO)** shall mean the person so designated by the Commissioner to perform responsible auditing functions hereunder.

2.1.15 **"Extra Work"** shall mean Work other than that required by the Contract at the time of award which is authorized by the Commissioner pursuant to Chapter VI of this Contract.

2.1.16 **"Federal-Aid Contract"** shall mean a contract in which the United States (federal) Government provides financial funding as so designated in the Information for Bidders.

2.1.17 **"Final Acceptance"** shall mean final written acceptance of all the Work by the Commissioner, a copy of which shall be sent to the Contractor.

2.1.18 **"Final Approved Punch List"** shall mean a list, approved in writing by the Engineer, specifying those items of Work to be completed by the Contractor after Substantial Completion and dates for the completion of each item of Work.

2.1.19 **"Law" or "Laws"** shall mean the Constitution of the State of New York, the New York City Charter, the New York City Administrative Code, a Statute of the United States or

of the State of New York, a local law of the City of New York, any ordinance, rule or regulation having the force of law, or common law.

2.1.20 **"Materialman"** shall mean any corporation, firm, partnership, joint venture, or individual, other than employees of the Contractor, who or which contracts with the Contractor or any Subcontractor, to fabricate or deliver, or who actually fabricates or delivers, plant, materials or equipment to be incorporated in the Work.

2.1.21 **"Means and Methods of Construction"** shall mean the labor, materials, temporary structures, tools, plant, and construction equipment, and the manner and time of their use, necessary to accomplish the result intended by this Contract.

2.1.22 **"Other Contractor(s)"** shall mean any Contractor (other than the entity which executed this Contract or its Subcontractors) who has a contract with the City for work on or adjacent to the building or site of the Work.

2.1.23 **"Payroll Taxes"** shall mean State Unemployment Insurance ("SUI"), Federal Unemployment Insurance (FUI) and payments pursuant to the Federal Insurance Contributions Act ("FICA").

2.1.24 **"Project"** shall mean the public improvement to which this Contract relates.

2.1.25 **"Procurement Policy Board" (PPB)** shall mean the Agency of the City of New York whose function is to establish comprehensive and consistent procurement policies and rules which shall have broad application throughout the City.

2.1.26 **"Required Quantity"** in a unit price Contract shall mean the actual quantity of any item of Work or materials which is required to be performed or furnished in order to comply with the Contract.

2.1.27 **"Resident Engineer"** shall mean the representative of the Commissioner duly designated by the Commissioner to be his/her representative at the site of the Work.

2.1.28 **"Site"** shall mean the area upon or in which the Contractor's operations are carried on, and such other areas adjacent thereto as may be designated as such by the Engineer.

2.1.29 **"Specifications"** shall mean all of the directions, requirements and standards of performance applying to the Work as hereinafter detailed and designated under the Specifications.

2.1.30 **"Subcontractor"** shall mean any person, firm or corporation, other than employees of the Contractor, who or which contracts with the Contractor or with its Subcontractors to furnish, or actually furnishes labor, or labor and materials, or labor and equipment, at the site. Wherever the word Subcontractor appears, it shall also mean Sub-Subcontractor.

2.1.31 **"Substantial Completion"** shall mean the written determination by the Commissioner that the Work required under this Contract is substantially, but not entirely, complete.

2.1.32 **"Treasurer"** shall mean the Commissioner of the Department of Finance of the City of New York.

2.1.33 **"Work"** shall mean all services required to complete the Project in accordance with the Contract Documents, including without limitation, labor, material, superintendence, management, administration, equipment, and incidentals, and shall include both Contract Work and Extra Work.

## **CHAPTER II THE WORK AND ITS PERFORMANCE**

### **ARTICLE 3. CHARACTER OF THE WORK**

3.1 Unless otherwise expressly provided in the **Contract Drawings, Specifications and Addenda**, the **Work** shall be performed in accordance with the best modern practice, utilizing, unless otherwise specified in writing, new and unused materials of standard first grade quality and workmanship and design of the highest quality, to the satisfaction of the **Commissioner**.

### **ARTICLE 4. MEANS AND METHODS OF CONSTRUCTION**

4.1 Unless otherwise expressly provided in the **Contract Drawings, Specifications and Addenda**, the **Means and Methods of Construction** shall be such as the **Contractor** may choose; subject, however, to the **Engineer's** right to reject the **Means and Methods of Construction** proposed by the **Contractor** which in the opinion of the **Engineer**:

- 4.1.1 Will constitute or create a hazard to the **Work**, or to persons or property; or
- 4.1.2 Will not produce finished **Work** in accordance with the terms of the **Contract**; or
- 4.1.3 Will be detrimental to the overall progress of the **Project**.

4.2 The **Engineer's** approval of the **Contractor's Means and Methods of Construction**, or his/her failure to exercise his/her right to reject such means or methods, shall not relieve the **Contractor** of its obligation to complete the **Work** as provided in this **Contract**; nor shall the exercise of such right to reject create a cause of action for damages.

### **ARTICLE 5. COMPLIANCE WITH LAWS**

5.1 The **Contractor** shall comply with all **Laws** applicable to this **Contract** and to the **Work** to be done hereunder.

5.2 **Procurement Policy Board Rules**: This **Contract** is subject to the Rules of the **PPB** ("**PPB Rules**") in effect at the time of the bid opening for this **Contract**. In the event of a conflict between the **PPB Rules** and a provision of this **Contract**, the **PPB Rules** shall take precedence.

5.3 **Noise control code provisions**.

5.3.1 In accordance with the provisions of Section 24-216(b) of the Administrative Code of the City ("**Administrative Code**"), Noise Abatement Contract Compliance, devices and activities which will be operated, conducted, constructed or manufactured pursuant to this **Contract** and which are subject to the provisions of the **City Noise Control Code** shall be operated, conducted, constructed, or manufactured without causing a violation of the **Administrative Code**. Such devices and activities shall incorporate advances in the art of noise control development for the kind and level of noise

emitted or produced by such devices and activities, in accordance with regulations issued by the **Commissioner** of the Department of Environmental Protection.

5.3.2 The Contractor agrees to comply with Section 24-219 of the Administrative Code of the City ("Administrative Code") and implementing rules codified at 15 Rules of the City of New York ("RCNY") Section 28-100 et. seq. In accordance with such provisions, the **Contractor**, if the Contractor is the responsible party under such regulations, shall prepare and post a Construction Noise Mitigation Plan at each work site, in which the **Contractor** shall certify that all construction tools and equipment have been maintained so that they operate at normal manufacturers' operating specifications. If the **Contractor** cannot make this certification, it must have in place an Alternative Noise Mitigation Plan approved by the New York City Department of Environmental Protection. In addition, the Contractor's certified Construction Noise Mitigation Plan is subject inspection by the Department of Environmental Protection in accordance with 15 RCNY §28-101. No Contract work may take place at a worksite unless there is a Construction Noise Mitigation Plan or approved Alternative Noise Mitigation Plan in place. In addition, the **Contractor** shall create and implement a noise mitigation training program. Failure to comply with these requirements may result in fines and other penalties pursuant to the applicable provisions of the Administrative Code and RCNY.

5.4 Ultra Low Sulfur Diesel Fuel: In accordance with the provisions of Section 24-163.3 of the Administrative Code, the Contractor specifically agrees as follows:

5.4.1 Definitions. For purposes of this Article 5.4, the following definitions apply:

5.4.1(a) "Contractor" means any person or entity that enters into a Public Works Contract with a City agency, or any person or entity that enters into an agreement with such person or entity, to perform work or provide labor or services related to such Public Works Contract

5.4.1(b) "Motor Vehicle" means any self-propelled vehicle designed for transporting persons or property on a street or highway.

5.4.1(c) "Nonroad Engine" means an internal combustion engine (including the fuel system) that is not used in a Motor Vehicle or a vehicle used solely for competition, or that is not subject to standards promulgated under section 7411 or section 7521 of title 42 of the United States Code, except that this term shall apply to internal combustion engines used to power generators, compressors or similar equipment used in any construction program or project.

5.4.1(d) "Nonroad Vehicle" means a vehicle that is powered by a Nonroad Engine, fifty horsepower and greater, and that is not a Motor Vehicle or a vehicle used solely for competition, which shall include, but not be limited to, excavators, backhoes, cranes, compressors, generators, bulldozers and similar equipment, except that this term shall not apply to horticultural maintenance vehicles used for landscaping purposes that are powered by a Nonroad Engine of sixty-five horsepower or less and that are not used in any construction program or project.

5.4.1(e) "Public Works Contract" means a contract with a City agency for a construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge; a contract with a City agency for the preparation for any construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge; or a contract with a City agency for any final work involved in the completion of any construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge.

5.4.1(f) "Ultra Low Sulfur Diesel Fuel" means diesel fuel that has a sulfur content of no more than fifteen parts per million.

#### 5.4.2 Ultra Low Sulfur Diesel Fuel

5.4.2(a) All Contractors shall use Ultra Low Sulfur Diesel Fuel in diesel-powered Nonroad Vehicles in the performance of this **Contract**.

5.4.2(b) Notwithstanding the requirements of Article 5.4.2(a), Contractors may use diesel fuel that has a sulfur content of no more than thirty parts per million to fulfill the requirements of this Article 5.4.2, where the Commissioner of the New York City Department of Environmental Protection ("DEP Commissioner") has issued a determination that a sufficient quantity of Ultra Low Sulfur Diesel Fuel is not available to meet the needs of City agencies and Contractors. Any such determination shall expire after six months unless renewed.

5.4.2(c) Contractors shall not be required to comply with this Article 5.4.2 where the agency letting this contract makes a written finding, which is approved, in writing, by the DEP Commissioner, that a sufficient quantity of Ultra Low Sulfur Diesel Fuel, or diesel fuel that has a sulfur content of no more than thirty parts per million is not available to meet the requirements of Section 24-163.3 of the Administrative Code, provided that such Contractor in its fulfillment of the requirements of this **Contract**, to the extent practicable, shall use whatever quantity of Ultra Low Sulfur Diesel Fuel or diesel fuel that has a sulfur content of no more than thirty parts per million is available. Any finding made pursuant to this subdivision shall expire after sixty days, at which time the requirements of this Article 5.4.2 shall be in full force and effect unless the Agency renews the finding in writing and such renewal is approved by the DEP Commissioner.

5.4.2(d) Contractors may check on determinations and approvals issued by the DEP Commissioner pursuant to Section 24-163.3 of the Administrative Code, if any, at [www.dep.nyc.gov](http://www.dep.nyc.gov) or by contacting the Agency issuing this solicitation.

5.4.2(e) The requirements of this Article 5.4.2 do not apply where they are precluded by federal or State funding requirements or where the **Contract** is an emergency procurement.

#### 5.4.3 Best Available Technology

5.4.3(a) All Contractors shall utilize the best available technology for reducing the emission of pollutants for diesel-powered Nonroad Vehicles in the performance of this **Contract**. For determinations of best available technology for each type of diesel-powered Nonroad Vehicle, Contractors shall comply with the regulations of the City Department of Environmental Protection, as and when adopted, Chapter 14 of Title 15 of the Rules of the City of New York (RCNY). The Contractor shall fully document all steps in the best available technology selection process and shall furnish such documentation to the Agency or the DEP Commissioner upon request. The Contractor shall retain all documentation generated in the best available technology selection process for as long as the selected best available technology is in use.

5.4.3(b) No Contractor shall be required to replace best available technology for reducing the emission of pollutants or other authorized technology utilized for a diesel-powered Nonroad Vehicle in accordance with the provisions of this Article 5.4.3 within three years of having first utilized such technology for such vehicle.

5.4.3(c) This Article 5.4.3 shall not apply to any vehicle used to satisfy the requirements of a specific Public Works Contract for fewer than twenty calendar days.

5.4.3(d) The Contractor shall not be required to comply with this Article 5.4.3 with respect to a diesel-powered Nonroad Vehicle under the following circumstances:

5.4.3(d)(1) Where the agency makes a written finding, which is approved, in writing, by the DEP Commissioner, that the best available technology for reducing the emission of pollutants as required by those paragraphs is unavailable for such vehicle, Contractor shall use whatever technology for reducing the emission of pollutants, if any, is available and appropriate for such vehicle.

5.4.3(d)(2) Where the DEP Commissioner has issued a written waiver based upon the Contractor having demonstrated to the DEP Commissioner that the use of the best available technology for reducing the emission of pollutants might endanger the operator of such vehicle or those working near such vehicle, due to engine malfunction, Contractor shall use whatever technology for reducing the emission of pollutants, if any, is available and appropriate for such vehicle, which would not endanger the operator of such vehicle or those working near such vehicle.

5.4.3(d)(3) In determining which technology to use for the purposes of Articles 5.4.3(d)(1) and 5.4.3(d)(2) above, Contractor shall primarily consider the reduction in emissions of particulate matter and secondarily consider the reduction in emissions of nitrogen oxides associated with the use of such technology, which shall in no event result in an increase in the emissions of either such pollutant.

5.4.3(d)(4) Contractors shall submit requests for a finding or a waiver pursuant to this Article 5.4.3(d) in writing to the DEP Commissioner, with a copy to the ACCO of the Agency issuing the solicitation. Any finding or waiver made or issued pursuant to Articles 5.4.3(d)(1) and 5.4.3(d)(2) above shall expire after one hundred eighty days, at which time the requirements of Article 5.4.3(a) shall be in full force and effect unless the Agency renews the finding, in writing, and the DEP Commissioner approves such finding, in writing, or the DEP Commissioner renews the waiver, in writing.

5.4.3(e) The requirements of this Article 5.4.3 do not apply where they are precluded by federal or State funding requirements or where the contract is an emergency procurement.

5.4.4 Section 24-163 of the Administrative Code. Contractors shall comply with Section 24-163 of the Administrative Code related to the idling of the engines of motor vehicles while parking.

#### 5.4.5 Compliance

5.4.5(a) Contractor's compliance with Article 5.4 may be independently monitored. If it is determined that the Contractor has failed to comply with any provision of Article 5.4, any costs associated with any independent monitoring incurred by the City shall be reimbursed by the Contractor.

5.4.5(b) Any Contractor who violates any provision of Article 5.4, except as provided in Article 5.4.5(c) below, shall be liable for a civil penalty between the amounts of one thousand and ten thousand dollars, in addition to twice the amount of money saved by such Contractor for failure to comply with Article 5.4.

5.4.5(c) No Contractor shall make a false claim with respect to the provisions of Article 5.4 to a City agency. Where a Contractor has been found to have done so, such Contractor shall be liable for a civil penalty of twenty thousand dollars, in addition to twice the amount of money saved by such Contractor in association with having made such false claim.

#### 5.4.6 Reporting

5.4.6(a) For all Public Works Contracts covered by this Article 5.4, the Contractor shall report to the Department the following information:

5.4.6(1) The total number of diesel-powered Nonroad Vehicles used to fulfill the requirements of this Public Works Contract;

5.4.6(2) The number of such Nonroad Vehicles that were powered by Ultra Low Sulfur Diesel Fuel;

5.4.6(3) The number of such Nonroad Vehicles that utilized the best available technology for reducing the emission of pollutants, including a breakdown by vehicle model and the type of technology;

5.4.6(4) The number of such Nonroad Vehicles that utilized such other authorized technology in accordance with Article 5.4.3, including a breakdown by vehicle model and the type of technology used for each such vehicle;

5.4.6(5) The locations where such Nonroad Vehicles were used; and

5.4.6(6) Where a determination is in effect pursuant to Article 5.4.2(b) or 5.4.2(c), detailed information concerning the Contractor's efforts to obtain Ultra Low Sulfur Diesel Fuel or diesel fuel that has a sulfur content of no more than thirty parts per million.

5.4.6(b) The Contractor shall submit the information required by Article 5.4.6(a) at the completion of work under the Public Works Contract and on a yearly basis no later than August 1 throughout the term of the Public Works Contract. The yearly report shall cover work performed the preceding fiscal year (July 1 - June 30).

5.5 Ultra Low Sulfur Diesel Fuel. In accordance with the Coordinated Construction Act for Lower Manhattan, as amended:

5.5.1 Definitions. For purposes of this Article 5.5, the following definitions apply:

5.5.1(a) "Lower Manhattan" means the area to the south of and within the following lines: a line beginning at a point where the United States pierhead line in the Hudson river as it exists now or may be extended would intersect with the southerly line of West Houston street in the borough of Manhattan extended, thence easterly along the southerly side of West Houston street to the southerly side of Houston street, thence easterly along the southerly side of Houston street to the southerly side of East Houston street, thence northeasterly along the southerly side of East Houston street to the point where it would intersect with the United States pierhead line in the East river as it exists now or may be extended, including tax lots within or immediately adjacent thereto.

5.5.1(b) "Lower Manhattan Redevelopment Project" means any project in Lower Manhattan that is funded in whole or in part with federal or State funding, or any project intended to improve transportation between Lower Manhattan and the two air terminals in the City of New York known as LaGuardia Airport and John F. Kennedy International Airport, or between Lower Manhattan and the air terminal in Newark known as Newark Liberty International Airport, and that is funded in whole or in part with federal funding.

5.5.1(c) "Nonroad Engine" means an internal combustion engine (including the fuel system) that is not used in a Motor Vehicle or a vehicle used solely for competition, or that is not subject to standards promulgated under section 7411 or section 7521 of title 42 of the United States Code, except that this term shall apply to internal combustion engines used to power generators, compressors or similar equipment used in any construction program or project.

5.5.1(d) "Nonroad Vehicle" means a vehicle that is powered by a Nonroad Engine, fifty horsepower and greater, and that is not a Motor Vehicle or a vehicle used solely for competition, which shall include, but not be limited to, excavators, backhoes, cranes, compressors, generators, bulldozers and similar equipment, except that this terms shall not apply to horticultural maintenance vehicles used for landscaping purposes that are powered by a Nonroad Engine of sixty-five horsepower or less and that are not used in any construction program or project.

5.5.1(e) "Ultra Low Sulfur Diesel Fuel" means diesel fuel that has a sulfur content of no more than fifteen parts per million.

5.5.2 Requirements. **Contractors** and **Subcontractors** are required to use only Ultra Low Sulfur Diesel Fuel to power the diesel-powered Nonroad Vehicles with engine horsepower (HP) rating of 50 HP and above used on a Lower Manhattan Redevelopment Project and, where practicable, to reduce the emission of pollutants by retrofitting such Nonroad Vehicles with oxidation catalysts, particulate filters, or technology that achieves lowest particulate matter emissions.

5.6 Pesticides. In accordance with Section 17-1209 of the Administrative Code, to the extent that the **Contractor** or any **Subcontractor** applies pesticides to any property owned or leased by the City, the **Contractor** and any **Subcontractor** shall comply with chapter 12 of the Administrative Code.

## ARTICLE 6. INSPECTION

6.1 During the progress of the **Work** and up to the date of **Final Acceptance**, the **Contractor** shall at all times afford the representatives of the City every reasonable, safe and proper facility for inspecting all **Work** done or being done at the **Site** and also for inspecting the manufacture or preparation of materials and equipment at the place of such manufacture or preparation.

6.2 The **Contractor's** obligation hereunder shall include the uncovering or taking down of finished **Work** and its restoration thereafter; provided, however, that the order to uncover, take down and restore shall be in writing, and further provided that if **Work** thus exposed proves satisfactory, and if the **Contractor** has complied with Article 6.1, such uncovering or taking down and restoration shall be considered an item of **Extra Work** to be paid for in accordance with the provisions of Article 26. If the **Work** thus exposed proves unsatisfactory, the City has no obligation to compensate the **Contractor** for the uncovering, taking down or restoration.

6.3 Inspection and approval by the **Commissioner**, the **Engineer**, **Project Manager**, or **Resident Engineer**, of finished **Work** or of **Work** being performed, or of materials and equipment at the place of manufacture or preparation, shall not relieve the **Contractor** of its obligation to perform the **Work** in strict accordance with the **Contract**. Finished or unfinished **Work** not found to be in strict accordance with the **Contract** shall be replaced as directed by the **Engineer**, even though such **Work** may have been previously approved and paid for. Such corrective work is **Contract Work** and shall not be deemed **Extra Work**.

6.4 Rejected **Work** and materials shall be promptly taken down and removed from the **Site**, which must at all times be kept in a reasonably clean and neat condition.

**ARTICLE 7. PROTECTION OF WORK AND OF PERSONS  
AND PROPERTY; NOTICES AND INDEMNIFICATION**

7.1 During the performance of the **Work** and up to the date of **Final Acceptance**, the **Contractor** shall be under an absolute obligation to protect the finished and unfinished **Work** against any damage, loss, injury, theft and/or vandalism and in the event of such damage, loss, injury, theft and/or vandalism, it shall promptly replace and/or repair such **Work** at the **Contractor's** sole cost and expense, as directed by the **Resident Engineer**. The obligation to deliver finished **Work** in strict accordance with the **Contract** prior to **Final Acceptance** shall be absolute and shall not be affected by the **Resident Engineer's** approval of, or failure to prohibit, the **Means and Methods of Construction** used by the **Contractor**.

7.2 During the performance of the **Work** and up to the date of **Final Acceptance**, the **Contractor** shall take all reasonable precautions to protect the persons and property of the **City** and of others from damage, loss or injury resulting from the **Contractor's**, and/or its **Subcontractors'** operations under this **Contract**. The **Contractor's** obligation to protect shall include the duty to provide, place or replace and adequately maintain at or about the **Site** suitable and sufficient protection such as lights, barricades, and enclosures.

7.3 The **Contractor** shall comply with the notification requirements set forth below in the event of any loss, damage or injury to **Work**, persons or property, or any accidents arising out of the operations of the **Contractor** and/or its **Subcontractors** under this **Contract**.

7.3.1 The **Contractor** shall make a full and complete report in writing to the **Resident Engineer** within three (3) **Days** after the occurrence.

7.3.2 The **Contractor** shall notify in writing the commercial general liability insurance carrier, and, where applicable, the worker's compensation and/or other insurance carrier, of any such loss, damage, injury, or accident, and any claim or suit arising therefrom, immediately, but not later than 20 days after such event. The **Contractor's** notice to the commercial general liability insurance carrier must expressly specify that "this notice is being given on behalf of the **City of New York** as Additional Insured as well as [the **Contractor**] as Named Insured." The **Contractor's** notice to the insurance carrier shall contain the following information: the name of the **Contractor**, the number of the **Contract**, the date of the occurrence, the location (street address and borough) of the occurrence, and the identity of the persons or things injured, damaged or lost.

7.3.2(a) At the time notice is provided to the insurance carrier(s), the **Contractor** shall provide copies of such notice to the **Comptroller** and the **Commissioner**. Notice to the **Comptroller** shall be sent to the Insurance Unit, NYC Comptroller's Office, 1 Centre Street – Room 1222, New York, New York, 10007. Notice to the **Commissioner** shall be sent to the address set forth in Schedule A of the General Conditions.

7.3.2(b) If the **Contractor** fails to provide any of the foregoing notices to any appropriate insurance carrier(s) in a timely and complete manner, the **Contractor** shall indemnify the **City** for all losses, judgments, settlements and expenses, including reasonable attorneys' fees, arising from an insurer's disclaimer of coverage citing late notice by or on behalf of the **City**.

7.4 To the fullest extent permitted by law, the **Contractor** shall indemnify, defend and hold the **City**, its employees and agents (the "Indemnitees") harmless against any and all claims (including but not limited to claims asserted by any employee of the **Contractor** and/or its **Subcontractors**) and costs and expenses of whatever kind (including but not limited to payment or reimbursement of attorneys' fees and disbursements) allegedly arising out of or in any way related to the operations of the **Contractor** and/or its **Subcontractors** in the performance of this **Contract** or from the **Contractor's** and/or its **Subcontractors'** failure to comply with any of the provisions of this **Contract** or of the **Law**. Such costs and expenses shall include all those incurred in defending the underlying claim and those incurred in connection with the enforcement of this Article 7.4 by way of cross-claim, third-party

claim, declaratory action or otherwise. The parties expressly agree that the indemnification obligation hereunder contemplates (1) full indemnity in the event of liability imposed against the Indemnitees without negligence and solely by reason of statute, operation of law or otherwise; and (2) partial indemnity in the event of any actual negligence on the part of the Indemnitees either causing or contributing to the underlying claim (in which case, indemnification will be limited to any liability imposed over and above that percentage attributable to actual fault whether by statute, by operation of law, or otherwise). Where partial indemnity is provided hereunder, all costs and expenses shall be indemnified on a pro rata basis.

7.4.1 Indemnification under Article 7.4 or any other provision of the **Contract** shall operate whether or not **Contractor** or its **Subcontractors** have placed and maintained the insurance specified under Article 22.

7.5 The **Contractor** waives all rights against the **City** for any damages or losses for which either is covered under any insurance required under Article 22 (whether or not such insurance is actually procured) or any other insurance applicable to the operations of the **Contractor** and/or its **Subcontractors** in the performance of this **Contract**.

7.6 The provisions of this Article shall not be deemed to create any new right of action in favor of third parties against the **Contractor** or the **City**.

### **CHAPTER III TIME PROVISIONS**

#### **ARTICLE 8. COMMENCEMENT AND PROSECUTION OF THE WORK**

8.1 The **Contractor** shall commence **Work** on the date specified in a written notice signed by the **Commissioner**. The time for performance of the **Work** under the **Contract** shall be computed from the date specified in such written notice. **TIME BEING OF THE ESSENCE** to the **City**, the **Contractor** shall thereafter prosecute the **Work** diligently, using such **Means and Methods of Construction** as are in accord with Article 4 herein and as will assure its completion not later than the date specified herein, or on the date to which the time for completion may be extended.

#### **ARTICLE 9. PROGRESS SCHEDULES**

9.1 To enable the **Work** to be performed in an orderly and expeditious manner, the **Contractor**, within fifteen (15) **Days** after the Notice to Proceed with this **Contract**, unless otherwise directed by the **Engineer**, shall submit to the **Engineer** a proposed progress schedule in the form of a bar graph or in such other form as specified by the **Engineer**, and monthly cash flow requirements, showing:

9.1.1 The anticipated time of commencement and completion of each of the various operations to be performed under this **Contract**; and

9.1.2 The sequence and interrelation of each of these operations with the others and with those of other related **Contracts**; and

9.1.3 The estimated time required for fabrication or delivery, or both, of all materials and equipment required for the **Work**; and

9.1.4 The estimated amount in dollars the **Contractor** will claim on a monthly basis.

9.2 The proposed schedule shall be revised as directed by the **Engineer**, until finally approved by the **Engineer**, and after such approval, subject to the provisions of Article 11, shall be strictly adhered to by the **Contractor**.

9.3 If the **Contractor** shall fail to adhere to the approved progress schedule, or to the schedule as revised pursuant to Article 11, it shall promptly adopt such other or additional **Means and Methods of Construction** as will make up for the time lost and will assure completion in accordance with the approved progress schedule. The approval by the City of a progress schedule which is shorter than the time allotted under the **Contract** shall not create any liability for the City if the approved progress schedule is not met.

9.4 The **Contractor** will not receive any payments until the proposed progress schedule is submitted.

#### **ARTICLE 10. REQUESTS FOR INFORMATION OR APPROVAL**

10.1 From time to time as the **Work** progresses and in the sequence indicated by the approved progress schedule, the **Contractor** shall submit to the **Engineer** a specific request in writing for each item of information or approval required by the **Contractor**. These requests shall state the latest date upon which the information or approval is actually required by the **Contractor**, and shall be submitted in a reasonable time in advance thereof to enable the **Engineer** a sufficient time to act upon such submissions, or any necessary re-submissions thereof.

10.2 The **Contractor** shall not have any right to an extension of time on account of delays due to the **Contractor's** failure to submit requests for the required information or the required approval in accordance with the above requirements.

#### **ARTICLE 11. NOTICE OF CONDITIONS CAUSING DELAY AND DOCUMENTATION OF DAMAGES CAUSED BY DELAY**

11.1 After the commencement of any condition which is causing or may cause a delay in completion of the **Work**, including conditions for which the **Contractor** may be entitled to an extension of time, the following notifications and submittals are required:

11.1.1 Within seven (7) **Days** after the commencement of such condition, the **Contractor** must notify the **Engineer** in writing of the existence, nature and effect of such condition upon the approved progress schedule and the **Work**, and must state why and in what respects, if any, the condition is causing or may cause a delay.

11.1.2 If the **Contractor** shall claim to be sustaining damages for delay as provided for in this Article, within forty-five (45) **Days** from the time such damages are first incurred, and every thirty (30) **Days** thereafter for as long as such damages are being incurred, the **Contractor** shall submit to the **Commissioner** verified written statements of the details and the amounts of such damages, together with documentary evidence of such damages, ("statement of delay damages") as further detailed in Section 11.6. The **Contractor** may submit any of the above statements within such additional time as may be granted by the **Commissioner** in writing upon written request therefor. On failure of the **Contractor** to fully comply with all of the foregoing provisions, such claims shall be deemed waived and no right to recover on such claims shall exist. Damages that the **Contractor** may claim in any action arising under or by reason of this **Contract** shall not be different from or in excess of the statements made and documentation provided pursuant to this article.

11.1.3 Within 60 days of submission of the final verified statement of claims pursuant to Article 44, the **Commissioner** shall make a determination as to whether a compensable

delay has occurred and, if so, the amount of compensation due the **Contractor**. Notwithstanding the above, the **Commissioner** may make a determination as to whether a compensable delay has occurred at any time after the **Contractor's** first submission of a statement of delay damages.

11.2 Failure of the **Contractor** to strictly comply with the requirements of Article 11.1.1 may, in the discretion of the **Commissioner**, be deemed sufficient cause to deny any extension of time on account of delay arising out of such condition. Failure of the **Contractor** to strictly comply with the requirements of Articles 11.1.1 and 11.1.2 shall be deemed a conclusive waiver by the **Contractor** of any and all claims for damages for delay arising from such condition and no right to recover on such claims shall exist.

11.3 When appropriate and directed by the **Engineer**, the progress schedule shall be revised by the **Contractor** until finally approved by the **Engineer**. The revised progress schedule must be strictly adhered to by the **Contractor**.

#### 11.4 Compensable Delays

11.4.1 The **Contractor** agrees to make claim only for additional costs attributable to delay in the performance of this **Contract** necessarily extending the time for completion of the **Work** or resulting from acceleration directed by the City and required to maintain the project schedule, occasioned solely by any act or omission to act of the **City** listed below. The **Contractor** also agrees that delay from any other cause shall be compensated, if at all, solely by an extension of time to complete the performance of the **Work**.

11.4.1.1 The failure of the **City** to take reasonable measures to coordinate and progress the **Work**, except that the **City** shall not be responsible for the **Contractor's** obligation to coordinate and progress the **Work** of its subcontractors.

11.4.1.2 Extended delays attributable to the **City** in the review or issuance of change orders, in shop drawing reviews and approvals or as a result of the cumulative impact of multiple change orders, which have a verifiable impact on project costs.

11.4.1.3 The unavailability of the site for an extended period of time that significantly affects the scheduled completion of the **contract**.

11.4.1.4 The issuance by the **Engineer** of a stop work order relative to a substantial portion of work for a period exceeding thirty days, that was not brought about through any action or omission of the **Contractor**.

11.4.1.5 Differing site conditions that were not known or reasonably ascertainable on a pre-bid inspection of the site or review of the bid documents or other publicly available sources and that are not ordinarily encountered in the **Project's** geographical area or neighborhood or in the type of work to be performed.

11.4.1.6 Delays caused by the **City's** bad faith or its willful, malicious, or grossly negligent conduct;

11.4.1.7 Delays not contemplated by the parties;

11.4.1.8 Delays so unreasonable that they constitute an intentional abandonment of the **Contract** by the **City**; and

11.4.1.9 Delays resulting from the **City's** breach of a fundamental obligation of the **Contract**.

11.4.2 The provisions of this Article apply only to claims for additional costs attributable to delay and do not preclude determinations by the **Commissioner** allowing reimbursements for additional costs for **Extra Work** pursuant to Articles 25 and 26 of this **Contract**. To the extent that any cost attributable to delay is reimbursed as part of a change order, no additional claim for compensation under this section shall be allowed.

11.5 Non-Compensable Delays. The **Contractor** agrees to make no monetary request for, and has included in its bid prices for the various items of the **Contract**, the extra/additional costs attributable to any delays

caused by or attributable to the items set forth below. For such items, the **Contractor** shall be compensated, if at all, solely by an extension of time to complete the performance of the **Work**, in accordance with the provisions of Article 13. Such extensions of time will be granted, if at all, pursuant to the grounds set forth in Article 13.3.

11.5.1 The acts or omissions of any third parties, including but not limited to other contractors, public/ governmental bodies (other than **City** agencies), utilities or private enterprises, who are disclosed in the contract documents or are ordinarily encountered or generally recognized as related to the **Work**;

11.5.2 Any situation which was within the contemplation of the parties at the time of entering into the **Contract**, including any delay indicated or disclosed in the contract documents or generally recognized as related to the nature of the **Work**, and/or the existence of any facility or appurtenance owned, operated or maintained by any third party, as indicated or disclosed in the contract documents or ordinarily encountered or generally recognized as related to the nature of the **Work**;

11.5.3 Restraining orders, injunctions or judgments issued by a court which were caused by a Contractor's submission, action or inaction or by a Contractor's means and methods of construction, or by third-parties, unless such order, injunction or judgment was the result of an action or omission by the **City**;

11.5.4 Any labor boycott, strike, picketing or similar situation;

11.5.5 Any shortages of supplies of materials required by the contract work;

11.5.6 Climatic conditions, storms, floods, droughts, tidal waves, fires, hurricanes, earthquakes, landslides or other catastrophes, or acts of war or of the public enemy or terrorist acts;

11.5.7 Extra work which does not significantly affect the overall completion of the contract, reasonable delays in the review or issuance of change orders or field orders and/or in shop drawing reviews or approvals.

#### 11.6 Required Content of Submission of Statement of Delay Damages

11.6.1 In the verified written statement of delay damages required by Article 11.1.2, the following information shall be provided by the **Contractor**:

11.6.1.1 For each delay, the dates of the claimed periods of delay and, in addition, a description of the operations that were delayed, the reasons for the delay and an explanation of how they were delayed.

11.6.1.2 A detailed factual statement of the claim providing all necessary dates, locations and items of work affected by the claim.

11.6.1.3 The amount of additional compensation sought and a breakdown of that amount into categories as described in Article 26.2, subject to the limitations set forth in section 11.7.

11.6.1.4 Any additional information requested by the **Commissioner**.

#### 11.7 Recoverable Costs

11.7.1 Delay damages may be recoverable for the following costs actually and necessarily incurred in the performance of the **Work**:

11.7.1.1 Labor;

11.7.1.2 Materials;

11.7.1.3 Equipment;

- 11.7.1.4 Extended Field Office Costs;
- 11.7.1.5 Extended Contract Site Overhead;
- 11.7.1.6 Extended Home office overhead; and
- 11.7.1.7 Insurance and Bond Costs.

11.7.2 Recoverable Subcontractor Costs. When the work is performed by a **Subcontractor**, the **Contractor** may be paid the actual and necessary costs of such subcontracted work as outlined above in 11.7.1.1 through 11.7.1.6, and an additional overhead of 5% of the costs outlined in 11.7.1.1 through 11.7.1.3.

11.7.3 Non-Recoverable Costs. The parties agree that the **City** will have no liability for the following items and the **Contractor** agrees it shall make no claim for the following items:

- 11.7.3.1 Profit, or loss of anticipated or unanticipated profit;
- 11.7.3.2 Consequential damages, including but not limited to interest on monies in dispute, including interest which is paid on such monies, loss of bonding capacity, bidding opportunities, or interest in investment, or any resulting insolvency;
- 11.7.3.3 Indirect costs or expenses of any nature;
- 11.7.3.4 Direct or indirect costs attributable to performance of work where the **Contractor**, because of situations or conditions within its control, has not progressed the work in a satisfactory manner; and
- 11.7.3.5 Attorneys' fees and dispute and claims preparation expenses.

11.8 Determinations under this Article 11 are not subject to the jurisdiction of the Contract Dispute Resolution Board pursuant to the dispute resolution process set forth in Article 27.

11.9 If the parties agree that a compensable delay has occurred and agree on the amount of compensation, payment may be made pursuant to a written change order, subject to pre-audit by the **Engineering Audit Officer**, and may be post-audited by the **Comptroller** and/or the **Department**.

## **ARTICLE 12. COORDINATION WITH OTHER CONTRACTORS**

12.1 During the progress of the **Work**, **Other Contractors** may be engaged in performing other work or may be awarded other contracts for additional work on this **Project**. In that event, the **Contractor** shall coordinate the **Work** to be done hereunder with the work of such **Other Contractors** and the **Contractor** shall fully cooperate with such **Other Contractors** and carefully fit its own **Work** to that provided under other contracts as may be directed by the **Engineer**. The **Contractor** shall not commit or permit any act which will interfere with the performance of work by any **Other Contractors**.

12.2 If the **Engineer** shall determine that the **Contractor** is failing to coordinate its **Work** with the work of **Other Contractors** as the **Engineer** has directed, then the **Commissioner** shall have the right to withhold any payments otherwise due hereunder until the **Contractor** completely complies with the **Engineer's** directions.

12.3 The **Contractor** shall notify the **Engineer** in writing if any **Other Contractor** on this **Project** is failing to coordinate its work with the **Work** of this **Contract**. If the **Engineer** finds such charges to be true, the **Engineer** shall promptly issue such directions to the **Other Contractor** with respect thereto as the situation may require. The **City** shall not, however, be liable for any damages suffered by any **Other Contractor's** failure to coordinate its work with the **Work** of this **Contract** or by reason of the **Other Contractor's** failure to promptly comply with the directions so issued by the **Engineer**, or by reason of any **Other Contractor's** default in performance, it being understood that the **City** does not guarantee the responsibility or continued efficiency of any contractor. Except as provided for in Article 11.4.1.1, the **Contractor** agrees to make no claim against the **City** for

any damages relating to or arising out of any timely directions issued by the **Engineer** pursuant to this article (including but not limited to the failure of any **Other Contractor** to comply or promptly comply with such directions), or the failure of any **Other Contractor** to coordinate its work, or the default in performance of any **Other Contractor**.

12.4 The **Contractor** shall indemnify and hold the **City** harmless from any and all claims or judgments for damages and from costs and expenses to which the **City** may be subjected or which it may suffer or incur by reason of the **Contractor's** failure to comply with the **Engineer's** directions promptly; and the **Comptroller** shall have the right to exercise the powers reserved in Article 23 with respect to any claims which may be made for damages due to this **Contractor's** failure to comply with the **Engineer's** direction promptly. Insofar as the facts and Law relating to any claim would preclude the **City** from being completely indemnified by the **Contractor**, the **City** shall be partially indemnified by the **Contractor** to the fullest extent provided by Law.

12.5 Should the **Contractor** sustain any damage through any act or omission of any **Other Contractor** having a contract with the **City** for the performance of work upon the **Site** or of work which may be necessary to be performed for the proper prosecution of the **Work** to be performed hereunder, or through any act or omission of a **Subcontractor** of such **Contractor**, the **Contractor** shall have no claim against the **City** for such damage, but shall have a right to recover such damage from the **Other Contractor** under the provision similar to the following provisions which apply to this **Contract** and have been or will be inserted in the contracts with such **Other Contractors**:

12.5.1 Should any **Other Contractor** having or who shall hereafter have a contract with the **City** for the performance of work upon the **Site** sustain any damage through any act or omission of the **Contractor** hereunder or through any act or omission of any **Subcontractor** of the **Contractor**, the **Contractor** agrees to reimburse such **Other Contractor** for all such damages and to defend at its own expense any suit based upon such claim and if any judgment or claims (even if the allegations of the suit are without merit) against the **City** shall be allowed the **Contractor** shall pay or satisfy such judgment or claim and pay all costs and expenses in connection therewith and agrees to indemnify and hold the **City** harmless from all such claims. Insofar as the facts and Law relating to any claim would preclude the **City** from being completely indemnified by the **Contractor**, the **City** shall be partially indemnified by the **Contractor** to the fullest extent provided by Law.

12.6 The **City's** right to indemnification hereunder shall in no way be diminished, waived or discharged, by its recourse to assessment of liquidated damages as provided in Article 15, or by the exercise of any other remedy provided for by **Contract** or by Law.

### **ARTICLE 13. EXTENSION OF TIME FOR PERFORMANCE**

13.1 If performance by the **Contractor** is delayed for a reason set forth in Article 13.3, the **Contractor** may be allowed a reasonable extension of time in conformance with this article and the **PPB Rules**.

13.2 Any extension of time may be granted only by the **Commissioner** or by the Board for the Extension of Time (hereafter "**Board**") (as set forth below) upon written application by the **Contractor**.

13.3 Grounds for Extension: If such application is made, the **Contractor** shall be entitled to an extension of time for delay in completion of the **Work** caused solely:

13.3.1 By the acts or omissions of the **City**, its officers, agents or employees; or

13.3.2 By the act or omissions of **Other Contractors** on this **Project**; or

13.3.3 By supervening conditions entirely beyond the control of either party hereto (such as, but not limited to, acts of God or the public enemy, excessive inclement weather, war or other national emergency making performance temporarily impossible or illegal, or strikes or labor disputes not brought about by any act or omission of the **Contractor**).

13.3.4 The **Contractor** shall, however, be entitled to an extension of time for such causes only for the number of **Days** of delay which the **Commissioner** or the Board may determine to be due solely to such causes, and then only if the **Contractor** shall have strictly complied with all of the requirements of Articles 9 and 10.

13.4 The **Contractor** shall not be entitled to receive a separate extension of time for each of several causes of delay operating concurrently, but, if at all, only for the actual period of delay in completion of the **Work** as determined by the **Commissioner** or the Board, irrespective of the number of causes contributing to produce such delay. If one of several causes of delay operating concurrently results from any act, fault or omission of the **Contractor** or of its **Subcontractors** or **Materialmen**, and would of itself (irrespective of the concurrent causes) have delayed the **Work**, no extension of time will be allowed for the period of delay resulting from such act, fault or omission.

13.5 The determination made by the **Commissioner** or the Board on an application for an extension of time shall be binding and conclusive on the **Contractor**.

13.6 The granting of an application for an extension of time for causes of delay other than those herein referred to shall be entirely within the discretion of the **Commissioner** or the Board.

13.7 Permitting the **Contractor** to continue with the **Work** after the time fixed for its completion has expired, or after the time to which such completion may have been extended has expired, or the making of any payment to the **Contractor** after such time, shall in no way operate as a waiver on the part of the City of any of its rights under this **Contract**.

#### 13.8 Application for Extension of Time:

13.8.1 Before the **Contractor's** time extension request will be considered, the **Contractor** shall notify the **Commissioner** of the condition which allegedly has caused or is causing the delay, and shall submit a written application to the **Commissioner** identifying:

13.8.1(a) The **Contractor**; the registration number; and **Project** description;

13.8.1(b) Liquidated damage assessment rate, as specified in the **Contract**;

13.8.1(c) Original bid amount;

13.8.1(d) The original **Contract** start date and completion date;

13.8.1(e) Any previous time extensions granted (number and duration); and

13.8.1(f) The extension of time requested.

13.8.2 In addition, the application for extension of time shall set forth in detail:

13.8.2(a) The nature of each alleged cause of delay in completing the **Work**;

13.8.2(b) The date upon which each such cause of delay began and ended and the number of **Days** attributable to each such cause;

13.8.2(c) A statement that the **Contractor** waives all claims except for those delineated in the application, and the particulars of any claims which the **Contractor** does not agree to waive. For time extensions for **Substantial Completion** and final completion payments, the application shall include a detailed statement of the dollar amounts of each element of claim item reserved; and

13.8.2(d) A statement indicating the **Contractor's** understanding that the time extension is granted only for purposes of permitting continuation of **Contract** performance and payment for **Work** performed and that the **City** retains its right to conduct an investigation and assess liquidated damages as appropriate in the future.

### 13.9 Analysis and Approval of Time Extensions:

13.9.1 For time extensions for partial payments, a written determination shall be made by the **Commissioner** who may, for good and sufficient cause, extend the time for the performance of the **Contract** as follows:

13.9.1(a) If the **Work** is to be completed within six (6) months, the time for performance may be extended for sixty (60) **Days**;

13.9.1(b) If the **Work** is to be completed within less than one (1) year but more than six (6) months, an extension of ninety (90) **Days** may be granted;

13.9.1(c) If the **Contract** period exceeds one (1) year, besides the extension granted in Article 13.9.1(b), an additional thirty (30) **Days** may be granted for each multiple of six (6) months involved beyond the one (1) year period; or

13.9.1(d) If exceptional circumstances exist, the **Commissioner** may extend the time for performance beyond the extensions in Articles 13.9.1(a), 13.9.1(b), and 13.9.1(c). In that event, the **Commissioner** shall file with the Mayor's Office of Contract Services a written explanation of the exceptional circumstances.

13.9.2 For extensions of time for **Substantial Completion** and final completion payments, the **Engineer**, in consultation with the **Commissioner**, shall prepare a written analysis of the delay (including a preliminary determination of the causes of delay, the beginning and end dates for each such cause of delay, and whether the delays are excusable under the terms of this **Contract**). The report shall be subject to review by and approval of the Board, which shall have authority to question its analysis and determinations and request additional facts or documentation. The report as reviewed and made final by the Board shall be made a part of the **Agency Contract** file. Neither the report itself nor anything contained therein shall operate as a waiver or release of any claim the **City** may have against the **Contractor** for either actual or liquidated damages.

13.9.3 Approval Mechanism for Time Extensions for **Substantial Completion** or Final Completion Payments: An extension shall be granted only with the approval of the Board which is comprised of the **ACCO** of the **Agency**, the Corporation Counsel and the **Comptroller**, or their authorized representatives.

13.9.4 Neither the granting of any application for an extension of time to the **Contractor** or any other **Contractor** on this **Project** nor the papers, records or reports related to any application for or grant of an extension of time or determination related thereto shall be

referred to or offered in evidence by the **Contractor** or its attorneys in any action or proceeding.

13.10 **No Damage for Delay:** The **Contractor** agrees to make no claim for damages for delay in the performance of this **Contract** except as set forth in Article 11, and agrees that all it may be entitled to on account of any such delay for which compensation is not specifically provided for in Article 11 is an extension of time to complete performance of the **Work** as provided herein.

#### **ARTICLE 14. COMPLETION AND FINAL ACCEPTANCE OF THE WORK**

14.1 **Date for Substantial Completion:** The **Contractor** shall substantially complete the **Work** within the time fixed in Schedule A of the General Conditions, or within the time to which such **Substantial Completion** may be extended.

14.2 **Determining the Date of Substantial Completion:** The **Work** will be deemed to be substantially complete when the two conditions set forth in Articles 14.2.1 and 14.2.2 have been met. The **Commissioner** will then issue a **Certificate of Substantial Completion**.

14.2.1 **Inspection:** The **Engineer** has inspected the **Work** and has made a written determination that it is substantially complete.

14.2.2 **Approval of Final Punch List and Date for Final Acceptance:** Following inspection of the **Work**, the **Engineer** shall furnish the **Contractor** a final punch list, specifying all items of **Work** to be completed. The **Contractor** shall then submit to the **Engineer** dates for the completion of each specified item of **Work**. Within a reasonable time after receipt, the **Engineer**, in a written notification to the **Contractor**, shall approve the **Contractor's** completion dates or, if they are unable to agree, shall establish dates for the completion of each item of **Work**. The latest completion date specified shall be the date for **Final Acceptance** of the **Work**.

14.3 **Determining the Date of Final Acceptance:** The **Work** will be accepted as final and complete as of the date of the **Engineer's** inspection if, upon such inspection, the **Engineer** finds that all items on the **Final Approved Punch List** are complete and no further **Work** remains to be done. The **Commissioner** will then issue a written determination of **Final Acceptance**.

14.4 **Request for Inspection:** Inspection of the **Work** by the **Engineer** for the purpose of **Substantial Completion** or **Final Acceptance** shall be made within ten (10) **Days** after receipt of the **Contractor's** written request therefor.

14.5 **Request for Re-inspection:** If upon inspection for the purpose of **Substantial Completion** or **Final Acceptance**, the **Engineer** determines that there are items of **Work** still to be performed, the **Contractor** shall promptly perform them and then request a re-inspection. If upon re-inspection, the **Engineer** determines that the **Work** is substantially complete or finally accepted, the date of such re-inspection shall be the date of **Substantial Completion** or **Final Acceptance**. Re-inspection by the **Engineer** shall be made within ten (10) **Days** after receipt of the **Contractor's** written request therefor.

14.6 **Initiation of Inspection by the Engineer:** If the **Contractor** does not request inspection or re-inspection of the **Work** for the purpose of **Substantial Completion** or **Final Acceptance**, the **Engineer** may initiate such inspection or re-inspection.

## **ARTICLE 15. LIQUIDATED DAMAGES**

15.1 In the event the **Contractor** fails to complete the **Work** within the time fixed for such completion in Schedule A of the General Conditions, plus authorized time extensions, or if the **Contractor**, in the sole determination of the **Commissioner**, has abandoned the **Work**, the **Contractor** shall pay to the **City** the sum fixed in Schedule A of the General Conditions, for each and every **Day** that the time consumed in completing the **Work** exceeds the time allowed therefor; which said sum, in view of the difficulty of accurately ascertaining the loss which the **City** will suffer by reason of delay in the completion of the **Work** hereunder, is hereby fixed and agreed as the liquidated damages that the **City** will suffer by reason of such delay, and not as a penalty. This article shall apply to the **Contractor** if it is defaulted pursuant to Chapter X of this **Contract**. Neither the failure to assess liquidated damages nor the granting of any time extension shall operate as a waiver or release of any claim the **City** may have against the **Contractor** for either actual or liquidated damages.

15.2 Liquidated damages received hereunder are not intended to be nor shall they be treated as either a partial or full waiver or discharge of the **City's** right to indemnification, or the **Contractor's** obligation to indemnify the **City**, or to any other remedy provided for in this **Contract** or by **Law**.

15.3 The **Commissioner** may deduct and retain out of the monies which may become due hereunder, the amount of any such liquidated damages; and in case the amount which may become due hereunder shall be less than the amount of liquidated damages suffered by the **City**, the **Contractor** shall be liable to pay the difference.

## **ARTICLE 16. OCCUPATION OR USE PRIOR TO COMPLETION**

16.1 Unless otherwise provided for in the specifications, the **Commissioner** may take over, use, occupy or operate any part of the **Work** at any time prior to **Final Acceptance**, upon written notification to the **Contractor**. The **Engineer** shall inspect the part of the **Work** to be taken over, used, occupied, or operated, and will furnish the **Contractor** with a written statement of the **Work**, if any, which remains to be performed on such part. The **Contractor** shall not object to, nor interfere with, the **Commissioner's** decision to exercise the rights granted by this article. In the event the **Commissioner** takes over, uses, occupies, or operates any part of the **Work**:

16.1.1 the **Commissioner** shall issue a written determination of **Substantial Completion** with respect to such part of the **Work**;

16.1.2 the **Contractor** shall be relieved of its absolute obligation to protect such part of the unfinished **Work** in accordance with Article 7;

16.1.3 the **Contractor's** guarantee on such part of the **Work** shall begin on the date of such use by the **City**; and;

16.1.4 the **Contractor** shall be entitled to a return of so much of the amount retained in accordance with Article 21 as it relates to such part of the **Work**, except so much thereof as may be retained under Articles 24 and 44.

## **CHAPTER IV SUBCONTRACTS AND ASSIGNMENTS**

### **ARTICLE 17. SUBCONTRACTS**

17.1 The **Contractor** shall not make subcontracts totaling an amount more than the percentage of the total **Contract** price fixed in Schedule A of the General Conditions, without prior written permission from the **Commissioner**. All subcontracts made by the **Contractor** shall be in writing. No work may be performed by a

**Subcontractor** prior to the **Contractor** entering into a written subcontract with the **Subcontractor** and complying with the provisions of this Article 17.

17.2 Before making any subcontracts, the **Contractor** shall submit a written statement to the **Commissioner** giving the name and address of the proposed **Subcontractor**, the portion of the **Work** and materials which it is to perform and furnish, the cost of the subcontract, the VENDEX questionnaire if required, and any other information tending to prove that the proposed **Subcontractor** has the necessary facilities, skill, integrity, past experience and financial resources to perform the **Work** in accordance with the terms and conditions of this **Contract**.

17.3 If an approved **Subcontractor** elects to subcontract any portion of its subcontract, the proposed subcontract shall be submitted in the same manner as directed above.

17.4 The **Commissioner** will notify the **Contractor** in writing whether the proposed **Subcontractor** is qualified or not qualified. If the proposed **Subcontractor** is not qualified, the **Contractor** may submit another proposed **Subcontractor** unless the **Contractor** decides to do the **Work**. No **Subcontractor** shall be permitted on the **Site** unless approved.

17.5 Before entering into any subcontract hereunder, the **Contractor** shall inform the **Subcontractor** fully and completely of all provisions and requirements of this **Contract** relating either directly or indirectly to the **Work** to be performed and the materials to be furnished under such subcontract, and every such **Subcontractor** shall expressly stipulate that all labor performed and materials furnished by the **Subcontractor** shall strictly comply with the requirements of this **Contract**.

17.6 Documents given to a **Subcontractor** for the purpose of soliciting the **Subcontractor's** bid shall include either a copy of the bid cover or a separate information sheet setting forth the **Project** name, the **Contract** number (if available), the **Agency** (as noted in Article 2.1.6), and the **Project's** location.

17.7 The **Commissioner's** approval of a **Subcontractor** shall not relieve the **Contractor** of any of its responsibilities, duties and liabilities hereunder. The **Contractor** shall be solely responsible to the **City** for the acts or defaults of its **Subcontractor** and of such **Subcontractor's** officers, agents and employees, each of whom shall, for this purpose, be deemed to be the agent or employee of the **Contractor** to the extent of its subcontract.

17.8 The **Contractor** shall be responsible for ensuring that all **Subcontractors** performing **Work** at the **Site** have either their own insurance coverage or are covered by the **Contractor's** insurance as required by Article 22.

17.9 The **Contractor** shall promptly, upon request, file with the **Engineer** a conformed copy of the subcontract and its cost. The subcontract shall provide the following:

17.9.1 **Payment to Subcontractors:** The agreement between the **Contractor** and its **Subcontractors** shall contain the same terms and conditions as to method of payment for **Work**, labor and materials, and as to retained percentages, as are contained in this **Contract**.

17.9.2 **Prevailing Rate of Wages:** The agreement between the **Contractor** and its **Subcontractors** shall include the prevailing wage rates and supplemental benefits to be paid in accordance with Labor Law Section 220.

17.9.3 **Section 6-123 of the Administrative Code:** Pursuant to the requirements of Section 6-123 of the Administrative Code, every agreement between the **Contractor** and its **Subcontractors** in excess of \$50,000 shall include a provision that the **Subcontractor** shall not engage in any unlawful discriminatory practice as defined in Title VIII of the Administrative Code (Section 8-101 et. seq.).

17.10 The **Commissioner** may deduct from the amounts certified under this **Contract** to be due to the **Contractor**, the sum or sums due and owing from the **Contractor** to the **Subcontractors** according to the terms of the said subcontracts, and in case of dispute between the **Contractor** and its **Subcontractor**, or **Subcontractors**, as to the amount due and owing, the **Commissioner** may deduct and withhold from the amounts certified under this **Contract** to be due to the **Contractor** such sum or sums as may be claimed by such **Subcontractor**, or **Subcontractors**, in a sworn affidavit, to be due and owing until such time as such claim or claims shall have been finally adjusted.

17.11 On **Contracts** where 100% performance bonds and payment bonds are executed, the **Contractor** shall include on each requisition for payment the following data: **Subcontractor's** name, value of the subcontract, total amount previously paid to **Subcontractor** for **Work** previously requisitioned, and the amount, including retainage, to be paid to the **Subcontractor** for **Work** included in the requisition.

17.12 On **Contracts** where performance bonds and payment bonds are not executed, the **Contractor** shall include with each requisition for payment submitted hereunder, a signed statement from each and every **Subcontractor** and/or **Materialman** for whom payment is requested in such requisition. Such signed statement shall be on the letterhead of the **Subcontractor** and/or **Materialman** for whom payment is requested and shall (i) verify that such **Subcontractor** and/or **Materialman** has been paid in full for all work performed and/or material supplied to date, exclusive of any amount retained and any amount included on the current requisition, and (ii) state the total amount of retainage to date, exclusive of any amount retained on the current requisition.

#### **ARTICLE 18. ASSIGNMENTS**

18.1 The **Contractor** shall not assign, transfer, convey or otherwise dispose of this **Contract**, or the right to execute it, or the right, title or interest in or to it or any part thereof, or assign, by power of attorney or otherwise any of the monies due or to become due under this **Contract**, unless the previous written consent of the **Commissioner** shall first be obtained thereto, and the giving of any such consent to a particular assignment shall not dispense with the necessity of such consent to any further or other assignments.

18.2 Such assignment, transfer, or conveyance shall not be valid until filed in the office of the **Commissioner** and the **Treasurer**, with the written consent of the **Commissioner** endorsed thereon or attached thereto.

18.3 Failure to obtain the previous written consent of the **Commissioner** to such an assignment, transfer or conveyance, may result in the revocation and annulment of this **Contract**. The **City** shall thereupon be relieved and discharged from any further liability to the **Contractor**, its assignees, transferees or sublessees, who shall forfeit and lose all monies therefor earned under the **Contract**, except so much as may be required to pay the **Contractor's** employees.

18.4 The provisions of this clause shall not hinder, prevent, or affect an assignment by the **Contractor** for the benefit of its creditors made pursuant to the **Laws** of the State of New York.

18.5 This **Contract** may be assigned by the **City** to any corporation, agency or instrumentality having authority to accept such assignment.

**CHAPTER V**  
**CONTRACTOR'S SECURITY AND GUARANTY**

**ARTICLE 19. SECURITY DEPOSIT**

19.1 The bid deposit, if required, shall be retained by the **Comptroller** as security for the **Contractor's** faithful performance of the **Contract** and will be returned to the **Contractor** only after the sum retained under Article 21 equals the amount of the bid deposit, subject to the other provisions of this **Contract**. If performance and payment bonds are required, any bid security posted shall be returned within a reasonable time after posting of such bonds and execution of this **Contract** by the **City**. When no partial payments are provided, the bid deposit will be released when final payment is certified to the **Comptroller** for payment.

19.2 If the **Contractor** is declared in default under Article 48 prior to the return of the deposit, or if any claim is made such as referred to in Article 23, the amount of such deposit, or so much thereof as the **Comptroller** may deem necessary, may be retained and then applied by the **Comptroller**:

19.2.1 To compensate the **City** for any expense, loss or damage suffered or incurred by reason of or resulting from such default, including the cost of re-letting and liquidated damages; or

19.2.2 To indemnify the **City** against any and all claims.

**ARTICLE 20. PAYMENT GUARANTEE**

20.1 On **Contracts** where 100% performance bonds and payment bonds are executed, this article does not apply.

20.2 In the event the terms of this **Contract** do not require the **Contractor** to provide a payment bond, the **City** shall, in accordance with the terms of this article, guarantee payment of all lawful demands for:

20.2.1 Wages and compensation for labor performed and/or services rendered; and

20.2.2 Materials, equipment, and supplies provided, whether incorporated into the **Work** or not, when demands have been filed with the **City** as provided hereinafter by any person, firm, or corporation which furnished labor, material, equipment, supplies, or any combination thereof, in connection with the **Work** performed hereunder (hereinafter referred to as the "beneficiary") at the direction of the **City** or the **Contractor**.

20.3 The provisions of Article 20.2 are subject to the following limitations and conditions:

20.3.1 The guarantee is made for the benefit of all beneficiaries as defined in Article 20.2 provided that those beneficiaries strictly adhere to the terms and conditions of this Article 20.3.

20.3.2 Nothing in this article shall prevent a beneficiary providing labor, services or material for the **Work** from suing the **Contractor** for any amounts due and owing the beneficiary by the **Contractor**.

20.3.3 All demands made against the **City** pursuant to this article shall be made within four (4) months from the date payment is due on the invoice or invoices submitted by the beneficiary to the **Contractor** for labor or **Work** done or for materials or supplies delivered, or, if the demand is for wages, four (4) months from the date the wages were due to be paid to the beneficiary.

20.3.4 All demands made against the City by such beneficiary shall be presented to the **Engineer** along with all written documentation concerning the demand which the **Engineer** deems appropriate or necessary, which may include, but shall not be limited to: the subcontract; any invoices presented to the **Contractor** for payment; the notarized statement of the beneficiary that the demand is due and payable, that a request for payment has been made of the **Contractor** and that the demand has not been paid by the **Contractor** within the time allowed for such payment by the subcontract; and copies of any correspondence between the beneficiary and the **Contractor** concerning such demand. The City shall notify the **Contractor** that a demand has been made. The **Contractor** shall inform the City of any defenses to the demand, and shall forward to the City any documents the City requests concerning the demand.

20.3.5 The City shall make payment only if, after considering all defenses presented by the **Contractor**, it determines that the payment is due and owing to the beneficiary making the demand.

20.3.6 The City will not initiate the payment process of this article or make payment on a demand where the beneficiary making the demand has filed a lien against the **Work** or otherwise sues the City prior to receiving a written notice from the City that it will not pay the demand.

20.3.7 No beneficiary shall be entitled to interest from the City, or to any other costs, including, but not limited to, attorney's fees.

20.4 Upon the receipt by the City of a demand pursuant to this article, the City may withhold from any payment otherwise due and owing to the **Contractor** under this **Contract** an amount sufficient to satisfy the demand.

20.4.1 In the event the City determines that the demand is valid, the City shall notify the **Contractor** of such determination and the amount thereof, and direct the **Contractor** to immediately pay such amount to the beneficiary. In the event the **Contractor**, within seven (7) days of receipt of such notification from the City, fails to pay the beneficiary, such failure shall constitute an automatic and irrevocable assignment of payment by the **Contractor** to the beneficiary for the amount of the demand determined by the City to be valid. The **Contractor**, without further notification or other process, hereby gives its unconditional consent to such assignment of payment to the beneficiary and authorizes the City, on its behalf, to take all necessary actions to implement such assignment of payment, including without limitation the execution of any instrument or documentation necessary to effectuate such assignment.

In the event that the amount otherwise due and owing to the **Contractor** by the City is insufficient to satisfy such demand, the City may, at its option, require payment from the **Contractor** of an amount sufficient to cover such demand and exercise any other right to require or recover payment which the City may have under **Law** or **Contract**.

20.4.2 In the event the City determines that the demand is invalid, any amount withheld pending the City's review of such demand shall be paid to the **Contractor**; provided, however, no lien has been filed. In the event a lien has been filed, the terms and conditions set forth in Article 23 shall apply.

20.5 The provisions of this article shall not prevent the City and the **Contractor** from resolving disputes in accordance with the PPB Rules, where applicable.

20.6 In the event the City determines that the beneficiary is entitled to payment pursuant to this article, such determination and any defenses and counterclaims raised by the **Contractor** shall be taken into account in evaluating the **Contractor's** performance.

20.7 Nothing in this article shall relieve the **Contractor** of the obligation to pay the claims of all persons with valid and lawful claims against the **Contractor** relating to the **Work**.

20.8 The **Contractor** shall not require any performance, payment or other bonds of any **Subcontractor** if this **Contract** does not require such bonds of the **Contractor**.

20.9 The payment guarantee made pursuant to this article shall be construed in a manner consistent with Section 137 of the State Finance Law and shall afford to persons furnishing labor or materials to the **Contractor** or his **Subcontractors** in the prosecution of the **Work** under this **Contract** all of the rights and remedies afforded to such persons by such section, including but not limited to, the right to commence an action against the **City** on the payment guarantee provided by this article within the one year limitations period set forth in Section 137(4)(b).

## **ARTICLE 21. RETAINED PERCENTAGE**

21.1 If this **Contract** requires 100% performance and payment security, then as further security for the faithful performance of this **Contract**, the **Commissioner** shall deduct, and retain until the substantial completion of the **Work**, five (5%) percent of the value of **Work** certified for payment in each partial payment voucher.

21.2 If this **Contract** does not require 100% performance and payment security and if the price for which this **Contract** was awarded does not exceed \$500,000, then as further security for the faithful performance of this **Contract**, the **Commissioner** shall deduct, and retain until the substantial completion of the **Work**, ten (10%) percent of the value of **Work** certified for payment in each partial payment voucher.

21.3 If this **Contract** does not require 100% performance and payment security and if the price for which this **Contract** was awarded exceeds \$500,000, then as further security for the faithful performance of this **Contract**, the **Commissioner** shall deduct, and retain until the substantial completion of the **Work**, up to ten (10%) percent of the value of **Work** certified for payment in each partial payment voucher. The percentage to be retained is set forth in Schedule A of the General Conditions.

## **ARTICLE 22. INSURANCE**

22.1 Types of Insurance: From the date the **Contractor** is required to provide Proof of Insurance pursuant to Article 22.3.1 through the date of completion of all required **Work** (including punch list work as certified in writing by the **Resident Engineer**), the **Contractor** shall effect and maintain the following types of insurance if and as indicated in Schedule A of the General Conditions (with the minimum limits and special conditions specified in Schedule A). Such insurance shall be issued by companies that meet the standards of Article 22.2.1 and shall be primary (and non-contributing) to any insurance or self-insurance maintained by the **City**.

22.1.1 Commercial General Liability Insurance: The **Contractor** shall provide a Commercial General Liability Insurance policy covering the **Contractor** as Named Insured and the **City** as an Additional Insured. This policy shall protect the **City** and the **Contractor** from claims for property damage and/or bodily injury, including death, which may arise from any of the operations under this **Contract**. Coverage under this policy shall be at least as broad as that provided by ISO Form CG 0001 (10/01 ed.), must be "occurrence" based rather than "claims-made", and shall include, without limitation, the following types of coverage: Premises Operations, Products and Completed Operations, Contractual Liability (including the tort liability of another assumed in a contract), Broad Form Property Damage, Medical Payments, Independent Contractors, Personal Injury (Contractual Exclusion deleted), Explosion, Collapse and Underground Property, and Incidental Malpractice. If such insurance contains an aggregate limit, it shall apply separately to this Project.

22.1.1(a) Such Commercial General Liability Insurance shall name the City, together with its officials and employees, as an Additional Insured under this policy. Coverage for the City as Additional Insured shall specifically include the City's officials and employees, and shall be at least as broad as either Insurance Services Office ("ISO") Form CG 20 10 (07/04 ed.) or Form CG 20 33 (07/04 ed.) and shall provide completed operations coverage at least as broad as CG 20 37 (07/04 ed.).

22.1.1(b) If this Contract is equal to or greater than Ten Million Dollars (\$10,000,000.00), each Commercial General Liability Insurance policy provided shall contain each of the following endorsements:

22.1.1(b)(i) The Duties in the Event of Occurrence, Claim or Suit condition of the policy is amended per the following: If and insofar as knowledge of an "occurrence", "claim", or "suit" is relevant to the City of New York as Additional Insured under this policy, such knowledge by an agent, servant, official, or employee of the City of New York will not be considered knowledge on the part of the City of New York of the "occurrence", "claim", or "suit" unless the following position shall have received notice thereof from such agent, servant, official, or employee: Insurance Claims Specialist, Affirmative Litigation Division, New York City Law Department; and

22.1.1(b)(ii) Any notice, demand or other writing by or on behalf of the Named Insured to the Insurance Company shall also be deemed to be a notice, demand, or other writing on behalf of the City as Additional Insured. Any response by the Insurance Company to such notice, demand or other writing shall be addressed to Named Insured and to the City at the following addresses: Insurance Unit, NYC Comptroller's Office, 1 Centre Street - Room 1222, New York, N.Y. 10007; and Insurance Claims Specialist, Affirmative Litigation Division, New York City Law Department, 100 Church Street, New York, NY 10007.

22.1.2 Workers' Compensation Insurance and Disability Benefits Insurance: The Contractor shall provide, and ensure that each Subcontractor provides, Workers Compensation Insurance and Disability Benefits Insurance in accordance with the Laws of the State of New York on behalf of all employees providing services under this Contract (except for those qualifying for insurance pursuant to Article 22.1.4).

22.1.3 Employers' Liability Insurance: The Contractor shall provide, and ensure that each Subcontractor provides, Employers Liability Insurance affording compensation due to bodily injury by accident or disease sustained by any employee arising out of and in the course of his/her employment under this Contract (except for those qualifying for insurance pursuant to Article 22.1.4).

22.1.4 United States Longshoremen's and Harbor Workers Act and/or Jones Act Insurance: The Contractor shall provide, and ensure that each Subcontractor provides, insurance in accordance with the United States Longshoremen's and Harbor Workers Act and/or the Jones Act, on behalf of all qualifying employees providing services under this Contract.

22.1.5 Builders' Risk Insurance: The Contractor shall provide a Builders' Risk Insurance policy covering all risks in completed value form. Such policy shall cover the total value of the Work performed in accordance with Schedule A, as well as the value of any equipment, supplies and/or material for the Project that may be in storage (on or off the Site) or in transit. The policy shall cover the cost of removing debris, including demolition as may be legally necessary by the operation of any law, ordinance or regulation, and for loss or damage to any owned, borrowed, leased or rented capital equipment, tools, including tools of their agents and employees, staging towers and forms,

and property of the City held in their care, custody and/or control. Such policy shall name as insureds the City, the Contractor, and its Subcontractors. The Builders' Risk policy shall contain the following endorsements:

22.1.5(a) The City and the Contractor shall be named as loss payee for the Work in order of precedence, as their interest may appear; and

22.1.5(b) In the event the loss occurs at an occupied facility, the policy shall permit occupancy without the consent of the Insurance Company; and

22.1.5(c) In the event that the insurance policy has been issued by a mutual insurance company, the following language shall be included: "The City of New York is not liable for any premium or assessment under this policy of insurance. The First Named Insured is solely liable therefor."

22.1.6 Comprehensive Business Automobile Liability Insurance: The Contractor shall provide a Comprehensive Business Automobile Liability policy for liability arising out of any owned, non-owned, leased and hired vehicles to be used in connection with this Contract. Coverage should be at least as broad as ISO Form CA0001, ed. 10/01.

22.1.6(a) If autos are used for transporting hazardous materials, the Automobile Liability Insurance shall be endorsed to provide pollution liability broadened coverage for covered vehicles (endorsement CA 99 48) as well as proof of MCS 90.

22.1.7 Pollution/Environmental Liability Insurance: The Contractor shall provide Pollution/Environmental Liability Insurance covering bodily injury and property damage, including loss of use of damaged property or of property that has not been physically injured. Such insurance shall provide coverage for actual, alleged or threatened emission, discharge, dispersal, seepage, release or escape of pollutants (including asbestos), including any loss, cost or expense incurred as a result of any cleanup of pollutants (including asbestos) or in the investigation, settlement or defense of any claim, suit, or proceedings against the City arising from the operations under this Contract. Such insurance shall be in the Contractor's name and list the City as an Additional Insured. Coverage for the City as Additional Insured shall specifically include the City's officials and employees, and shall be at least as broad as provided to the Contractor for this Project.

22.1.7(a) If such coverage is written on a claims-made policy, such policy shall have a retroactive date on or before the effective date of this Contract, and continuous coverage shall be maintained, or an extended discovery period exercised, for a period of not less than three years from the time the Work under this Contract is completed.

22.1.8 Marine Insurance:

22.1.8(a) Marine Protection and Indemnity Insurance: The Contractor shall provide a Marine Protection and Indemnity policy with coverage at least as broad as policy form SP-23. The policy shall provide coverage for the Contractor and for the City (together with its officials and employees) as Additional Insured for bodily injury and property damage arising from marine operations under this Contract including injury or death of crew members (if not fully provided through other insurance), damage to piers, wharves and other fixed or movable structures and loss of or damage to any other vessel or craft, or to property on such other vessel or craft, not caused by collision.

22.1.8(b) Ship Repairers Legal Liability Insurance: The Contractor shall provide a Ship Repairers Legal Liability Insurance policy covering all repair operations under this Contract at

or in the vicinity of a designated approved port or yard under this **Contract**. The policy shall provide coverage from the point of acceptance of care custody and control of any **City** vessel. The policy shall provide Bailee Coverage for any **City** vessel in the **Contractor's** care, custody and control and coverage for damage to property of others caused by any **City** vessel in the **Contractor's** care custody and control.

22.1.8(c) Collision Liability/Towers Liability Insurance: The **Contractor** shall provide a Collision Liability/Towers Liability Insurance policy with coverage for the **Contractor** and for the **City** (together with its officials and employees) as Additional Insured at least as broad as the American Institute Tug Form (08/01/76) for all tugs used under this **Contract** and Collision Liability per American Institute Hull Clauses (6/2/77).

22.1.8(d) Marine Pollution Liability Insurance: The **Contractor** shall provide a Marine Pollution Liability Insurance policy covering itself as Named Insured and the **City** (together with its officials and employees) as Additional Insured for liability arising from the discharge or substantial threat of a discharge of oil, or from the release or threatened release of a hazardous substance including injury to, or economic losses resulting from, the destruction of or damage to real property, personal property or natural resources. Coverage under this policy shall be at least as broad as that provided by Water Quality Insurance Syndicate Form (09/98 ed.).

22.1.9 The **Contractor** shall provide such other types of insurance, at such minimum limits, as are specified in Schedule A of the General Conditions.

## 22.2 General Requirements for Insurance Policies:

22.2.1 All required insurance policies shall be maintained with companies that may lawfully issue the required policy and have an A.M. Best rating of at least A- VII or a Standard and Poor's rating of at least AA, unless prior written approval is obtained from the Mayor's Office of Operations.

22.2.2 The **Contractor** shall be solely responsible for the payment of all premiums for all required policies and all deductibles and self-insured retentions to which such policies are subject, whether or not the **City** is an insured under the policy.

22.2.3 In his/her sole discretion, the **Commissioner** may, subject to the approval of the **Comptroller** and the Corporation Counsel, accept Letters of Credit and/or custodial accounts in lieu of required insurance.

22.2.4 The **City's** limits of coverage for all types of insurance required pursuant to Schedule A of the General Conditions shall be the greater of (i) the minimum limits set forth in Schedule A or (ii) the limits provided to the **Contractor** as Named Insured under all primary, excess and umbrella policies of that type of coverage.

22.2.5 All required insurance policies, except for insurance required pursuant to Sections 22.1.2, 22.1.3, and 22.1.4, shall contain the following endorsement: "This policy may not be cancelled, terminated, modified or changed unless thirty (30) days prior written notice is sent by the Insurance Company to the Named Insured (or First Named Insured, as appropriate), the **Commissioner**, and to the **Comptroller**, attn: Office of Contract Administration, Municipal Building, Room 1005, New York, New York 10007."

## 22.3 Proof of Insurance:

22.3.1 Within ten (10) Days of award, the **Contractor** shall, for each policy required under this **Contract**, except for Workers Compensation Insurance and Disability Benefits Insurance and builders' risk insurance, file a Certificate of Insurance with the **Commissioner** pursuant to Article 22.6. For Workers' Compensation Insurance and Disability Benefits Insurance, the **Contractor** shall file proof of insurance in a form acceptable to the **Commissioner** within ten (10) Days of award. Accord forms are not acceptable proof of workers' compensation coverage. The **Contractor** must submit one of the following forms to the Department, or another form acceptable to the Department: C-105.2 -- Certificate of Workers' Compensation Insurance, or U-26.3 -- State Insurance Fund Certificate of Workers' Compensation Insurance. For builders' risk insurance, the **Contractor** shall file a Certificate of Insurance with the **Commissioner** at the direction of the **Commissioner** but in any event no later than ten (10) Days prior to commencement of the **Work**.

22.3.1(a) All Certificates of Insurance shall be in a form acceptable to the **City** and shall certify the issuance and effectiveness of the types of insurance specified in Schedule A, each with the specified minimum limits and evidence of the compliance with the Additional Insured or Named Insured provisions of Articles 22.1.1(a), 22.1.5, 22.1.7, and 22.1.8, as applicable. All Certificate(s) of Insurance shall be accompanied by either a duly executed "Certification by Broker" in the form contained in Part II of Schedule A or completed copies of all policies referenced in the Certificate of Insurance. In the absence of completed policies, binders are acceptable.

22.3.2 Certificates of Insurance confirming renewals of insurance shall be submitted to the **Commissioner** prior to the expiration date of coverage of policies required under this **Contract**. Such Certificates of Insurance shall comply with the requirements of Article 22.3.1(a) and, if applicable, Article 22.3.1(b).

22.3.3 The **Contractor** shall be obligated to provide the **City** with a copy of any policy required by this Article 22 upon the demand for such policy by the **Commissioner** or the New York City Law Department.

## 22.4 Operations of the Contractor:

22.4.1 The **Contractor** shall not commence the **Work** unless and until all required certificates have been submitted to and accepted by the **Commissioner**. Acceptance by the **Commissioner** of a certificate hereunder does not excuse the **Contractor** from securing a policy consistent with all provisions of this Article or of any liability arising from its failure to do so.

22.4.2 The **Contractor** shall be responsible for providing continuous insurance coverage in the manner, form, and limits required by this **Contract** and shall be authorized to perform **Work** only during the effective period of all required coverage.

22.4.3 In the event that any of the required insurance policies lapse, are revoked, suspended or otherwise terminated, for whatever cause, the **Contractor** shall immediately stop all **Work**, and shall not recommence **Work** until authorized in writing to do so by the **Commissioner**. Upon quitting the **Site**, except as otherwise directed by the **Commissioner**, the **Contractor** shall leave all plant, materials, equipment, tools and supplies on the **Site**. **Contract** time shall continue to run during such periods and no extensions of time will be granted. The **Commissioner** may also declare the **Contractor** in default for failure to maintain required insurance.

22.5 The **City** as Additional Insured or Loss Payee under **Subcontractors'** Insurance. The **Contractor** shall ensure that each **Subcontractor** name the **City** as Additional Insured or loss payee, as appropriate, under all

policies covering **Work** performed by such **Subcontractor** under this **Contract**. The **City's** coverage as **Additional Insured** shall include the **City's** officials and employees and be at least as broad as that provided to the **Contractor**. The foregoing requirements shall not apply to insurance provided pursuant to Articles 22.1.2, 22.1.3, and 22.1.4.

22.6 Wherever reference is made in Article 7 or this Article 22 to documents to be sent to the **Commissioner** (e.g., notices, filings, or submissions), such documents shall be sent to the address set forth in Schedule A of the General Conditions. In the event no address is set forth in Schedule A, such documents are to be sent to the **Commissioner's** address as provided elsewhere in this **Contract**.

22.7 If the **Contract** involves disposal of hazardous materials, the **Contractor** shall dispose such materials only at sites where the disposal site operator maintains Pollution Legal Liability Insurance in the amount of at least \$2,000,000 for losses arising from such disposal site.

22.8 **Materiality/Non-Waiver:** The **Contractor's** failure to secure policy(ies) in complete conformity with this Article, or to give the Insurance Company timely notice of any sort required in this **Contract** on behalf of the **City**, or to do anything else required by this Article shall constitute a material breach of this **Contract**. Such breach shall not be waived or otherwise excused by any action or inaction by the **City** at any time.

22.9 **Other Remedies:** Insurance coverage in the minimum amounts provided for herein shall not relieve the **Contractor** or **Subcontractors** of any liability under this **Contract**, nor shall it preclude the **City** from exercising any rights or taking such other actions as are available to it under any other provisions of this **Contract** or **Law**.

### **ARTICLE 23. MONEY RETAINED AGAINST CLAIMS**

23.1 If any claim shall be made by any person or entity (including **Other Contractors** with the **City** on this **Project**) against the **City** or against the **Contractor** and the **City** for any of the following:

(a) An alleged loss, damage, injury, theft or vandalism of any of the kinds referred to in Articles 7 and 12, plus the reasonable costs of defending the **City**, which in the opinion of the **Comptroller** may not be paid by an insurance company (for any reason whatsoever); or

(b) An infringement of copyrights, patents or use of patented articles, tools, etc., as referred to in Article 57; or

(c) Damage claimed to have been caused directly or indirectly by the failure of the **Contractor** to perform the **Work** in strict accordance with this **Contract**,

the amount of such claim, or so much thereof as the **Comptroller** may deem necessary, may be withheld by the **Comptroller**, as security against such claim, from any money due hereunder. The **Comptroller**, in his/her discretion, may permit the **Contractor** to substitute other satisfactory security in lieu of the monies so withheld.

23.2 If an action on such claim is timely commenced and the liability of the **City**, or the **Contractor**, or both, shall have been established therein by a final judgment of a Court of competent jurisdiction, or if such claim shall have been admitted by the **Contractor** to be valid, the **Comptroller** shall pay such judgment or admitted claim out of the monies retained by the **Comptroller** under the provisions of this article, and return the balance, if any, without interest, to the **Contractor**.

23.3 **Liens:** If at any time before or within thirty (30) **Days** after the **Work** is completed and accepted by the **City**, any persons claiming to have performed any labor or furnished any material toward the performance or completion of this **Contract**, shall file with the **Agency** and with the **Treasurer** any notice as is described in the

New York State Lien Law, or any act of the Legislature of the State of New York, the City shall retain, from the monies due or to become due under this **Contract**, so much of such monies as shall be sufficient to pay the amount claimed in said notice, together with the reasonable costs of any action or actions brought or that may be brought to enforce such lien. The monies so retained shall be held by the City until the lien thereon created by the said act and the filing of the said notice shall be discharged pursuant to Law.

#### **ARTICLE 24. MAINTENANCE AND GUARANTY**

24.1 The **Contractor** shall promptly repair, replace, restore or rebuild, as the **Commissioner** may determine, any finished **Work** in which defects of materials or workmanship may appear or to which damage may occur because of such defects, during the one (1) year period subsequent to the date of **Substantial Completion** (or use and occupancy in accordance with Article 16), except where other periods of maintenance and guarantee are provided for.

24.2 As security for the faithful performance of its obligations hereunder, the **Contractor**, upon filing its requisition for payment on **Substantial Completion**, shall deposit with the **Commissioner** a sum equal to one (1%) percent of the price (or the amount fixed in Schedule A of the General Conditions) in cash or certified check upon a state or national bank and trust company or a check of such bank and trust company signed by a duly authorized officer thereof and drawn to the order of the **Comptroller**, or obligations of the City, which the **Comptroller** may approve as of equal value with the sum so required.

24.3 In lieu of the above, the **Contractor** may make such security payment to the City by authorizing the **Commissioner** in writing to deduct the amount from the **Substantial Completion** payment which shall be deemed the deposit required above.

24.4 If the **Contractor** has faithfully performed all of its obligations hereunder the **Commissioner** shall so certify to the **Comptroller** within five (5) **Days** after the expiration of one (1) year from the date of **Substantial Completion** and acceptance of the **Work** or within thirty (30) **Days** after the expiration of the guarantee period fixed in the **Specifications**. The security payment shall be repaid to the **Contractor** without interest within thirty (30) **Days** after certification by the **Commissioner** to the **Comptroller** that the **Contractor** has faithfully performed all of its obligations hereunder.

24.5 Notice by the **Commissioner** to the **Contractor** to repair, replace, rebuild or restore such defective or damaged **Work** shall be timely, pursuant to this article, if given not later than ten (10) **Days** subsequent to the expiration of the one (1) year period or other periods provided for herein.

24.6 If the **Contractor** shall fail to repair, replace, rebuild or restore such defective or damaged **Work** promptly after receiving such notice, the **Commissioner** shall have the right to have the **Work** done by others in the same manner as provided for in the completion of a defaulted **Contract**, under Article 51.

24.7 If the security payment so deposited is insufficient to cover the cost of such **Work**, the **Contractor** shall be liable to pay such deficiency on demand by the **Commissioner**.

24.8 The **Engineer's** certificate setting forth the fair and reasonable cost of repairing, replacing, rebuilding or restoring any damaged or defective **Work** when performed by one other than the **Contractor**, shall be binding and conclusive upon the **Contractor** as to the amount thereof.

24.9 The **Contractor** shall obtain all manufacturers' warranties and guaranties of all equipment and materials required by this **Contract** in the name of the City and shall deliver same to the **Commissioner**. All of the City's rights and title and interest in and to said manufacturers' warranties and guaranties may be assigned by the City to any subsequent purchasers or lessees of the premises.

**CHAPTER VI**  
**CHANGES, EXTRA WORK AND DOCUMENTATION OF CLAIM**

**ARTICLE 25. CHANGES**

25.1 Changes may be made to this **Contract** only as duly authorized in writing by the **Commissioner** in accordance with the **Laws** and this **Contract**. All such changes, modifications and amendments will become a part of the **Contract**. Work so ordered shall be performed by the **Contractor**.

25.2 **Contract** changes will be made only for **Work** necessary to complete the **Work** included in the original scope of the **Contract** and/or for non-material changes to the scope of the **Contract**. Changes are not permitted for any material alteration in the scope of **Work** in the **Contract**.

25.3 The **Contractor** shall be entitled to a price adjustment for **Extra Work** performed pursuant to a written change order. Adjustments to price shall be computed in one or more of the following ways:

25.3.1 By applicable unit prices specified in the **Contract**; and/or

25.3.2 By agreement of a fixed price; and/or

25.3.3 By time and material records; and/or

25.3.4 In any other manner approved by the **CCPO**.

25.4 All payments for change orders are subject to pre-audit by the **Engineering Audit Officer** and may be post-audited by the **Comptroller** and/or the **Department**.

**ARTICLE 26. METHODS OF PAYMENT FOR OVERRUNS AND EXTRA WORK**

26.1 **Overrun of Unit Price Item**: An overrun is any quantity of a unit price item which the **Contractor** is directed to provide which is in excess of one hundred twenty-five (125%) percent of the estimated quantity for that item set forth in the bid schedule.

26.1.1 For any unit price item, the **Contractor** will be paid at the unit price bid for any quantity up to one hundred twenty five (125%) percent of the estimated quantity for that item set forth in the bid schedule. If during the progress of the **Work**, the actual quantity of any unit price item required to complete the **Work** approaches the estimated quantity for that item, and for any reason it appears that the actual quantity of any unit price item necessary to complete the **Work** will exceed the estimated quantity for that item by twenty-five (25%) percent, the **Contractor** shall immediately notify the **Engineer** of such anticipated overrun. The **Contractor** shall not be compensated for any quantity of a unit price item provided which is in excess of one hundred twenty five (125%) percent of the estimated quantity for that item set forth in the bid schedule without written authorization from the **Engineer**.

26.1.2 If the actual quantity of any unit price item necessary to complete the **Work** will exceed one hundred twenty five (125%) percent of the estimated quantity for that item set forth in the bid schedule, the **City** reserves the right and the **Contractor** agrees to negotiate a new unit price for such item. In no event shall such negotiated new unit price exceed the unit bid price. If the **City** and **Contractor** cannot agree on a new unit price, then the **City** shall order the **Contractor** and the **Contractor** agrees to provide additional quantities of the item on a time and material basis for the actual and reasonable cost as determined under Article 26.2, but in no event at a unit price exceeding the unit price bid.

**26.2 Extra Work:** For **Extra Work** where payment is by agreement on a fixed price in accordance with Article 25.3.2, the price to be paid for such **Extra Work** shall be based on the fair and reasonable estimated cost of the items set forth below. For **Extra Work** where payment is on a time and material basis in accordance with Article 25.3.3, the price to be paid for such **Extra Work** shall be the actual and reasonable cost of the items set forth below.

26.2.1 Necessary materials (including transportation to the Site); plus

26.2.2 Necessary direct labor, including payroll taxes and supplemental benefits; plus

26.2.3 Sales and personal property taxes, if any, required to be paid on materials not incorporated into such **Extra Work**; plus

26.2.4 Reasonable rental value of **Contractor**-owned, necessary plant and equipment other than small tools, plus fuel/energy costs. Except for fuel costs for pick-up trucks which shall be reimbursed based on a consumption of five (5) gallons per shift, fuel costs shall be reimbursed based on actual costs or, in the absence of auditable documentation, the following fuel consumption formula per operating hour:  $(.035) \times (\text{HP rating}) \times (\text{Fuel cost/gallon})$ . Reasonable rental value is defined as the lower of either seventy-five percent of the monthly prorated rental rates established in "The AED Green Book, Rental Rates and Specifications for Construction Equipment" published by PRIMEDIA (the "Green Book"), or seventy-five percent of the monthly prorated rental rates established in the "Rental Rate Blue Book for Construction Equipment" published by PRIMEDIA (the "Blue Book"). The reasonable rental value is inclusive of all operating costs except for fuel/energy consumption and equipment operator's wages/costs. For multiple shift utilization, reimbursement shall be calculated as follows: first shift shall be seventy-five percent of such rental rates; second shift shall be sixty percent of the first shift rate; and third shift shall be forty percent of the first shift rate. Equipment on standby shall be reimbursed at one-third the prorated monthly rental rate. **Contractor**-owned equipment includes equipment from rental companies affiliated with or controlled by the **Contractor**, as determined by the **Commissioner**. In establishing cost reimbursement for non-operating contractor-owned equipment (scaffolding, sheeting systems, road plates, etc.), the City may restrict reimbursement to a purchase-salvage/life cycle basis if less than the computed rental costs; plus

26.2.5 Necessary installation and dismantling of such plant and equipment, including transportation to and from the Site, if any, provided that, in the case of non-**Contractor**-owned equipment rented from a third party, the cost of installation and dismantling are not allowable if such costs are included in the rental rate; plus

26.2.6 Reasonable rental costs of non-**Contractor**-owned necessary plant and equipment other than small tools, plus fuel/energy costs. Except for fuel costs for pick-up trucks which shall be reimbursed based on a consumption of five (5) gallons per shift, fuel costs shall be reimbursed based on actual costs or, in the absence of auditable documentation, the following fuel consumption formula per hour of operation:  $(.035) \times (\text{HP rating}) \times (\text{Fuel cost/gallon})$ . In lieu of renting, the City reserves the right to direct the purchase of non-operating equipment (scaffolding, sheeting systems, road plates, etc.), with payment on a purchase-salvage/life cycle basis, if less than the projected rental costs; plus

26.2.7 Workers' compensation insurance, and any insurance coverage expressly required by the City for the performance of the **Extra Work** which is different than the types of insurance required by Article 22 and Schedule A of the General Conditions. The cost of workers' compensation insurance shall be based upon the Manual Rate for such insurance for the applicable work classifications/codes, in accordance with the most recent schedule promulgated by the New York Compensation Insurance Rating Board; plus

26.2.8 Additional costs incurred as a result of the **Extra Work** for performance and payment bonds; plus

26.2.9 Ten (10%) percent of the total of items in Articles 26.2.1 through 26.2.5 as compensation for overhead, except that no percentage for overhead will be allowed on **Payroll Taxes** or on the premium portion of overtime pay or on sales and personal property taxes. Overhead shall include without limitation, all costs and expenses in connection with administration, management superintendence, small tools, and insurance required by Schedule A of the General Conditions other than workers' compensation insurance; plus

26.2.10 Ten (10%) percent of the total of items in Articles 26.2.1 through 26.2.5, plus item 26.2.9, as compensation for profit, except that no percentage for profit will be allowed on **Payroll Taxes** or on the premium portion of overtime pay or on sales and personal property taxes; plus

26.2.11 Five (5%) percent of the total of items in Article 26.2.6, 26.2.7, and 26.2.8 as compensation for overhead and profit.

26.3 Where the **Extra Work** is performed in whole or in part by other than the **Contractor's** own forces pursuant to Article 26.2, the **Contractor** shall be paid, subject to pre-audit by the **Engineering Audit Officer**, the cost of such **Work** computed in accordance with Article 26.2 above, plus an additional allowance of five (5%) percent to cover the **Contractor's** overhead and profit.

26.4 Where a change is ordered, involving both **Extra Work** and omitted or reduced **Contract Work**, the **Contract** price shall be adjusted, subject to pre-audit by the **EAO**, in an amount based on the difference between the cost of such **Extra Work** and of the omitted or reduced **Work**. The cost of such **Extra Work** and of such omitted or reduced **Work** shall be computed based upon applicable **Contract** unit prices. Where there are no applicable **Contract** unit prices, the cost of such **Extra Work** and of such omitted or reduced **Contract Work** shall be computed in accordance with items 26.2.1 through 26.2.8. If the cost of such **Extra Work** exceeds the costs of such omitted or reduced **Contract Work**, the **Contract** price shall be increased by the difference, plus percentages for overhead and profit as provided in Articles 26.2.9 through 26.2.11. If the cost of the omitted or reduced **Contract Work** exceeds the cost of the **Extra Work**, then the **Contract** price shall be reduced by the difference.

26.5 Where the **Contractor** and the **Commissioner** can agree upon a fixed price for **Extra Work** in accordance with Article 25.3.2 or another method of payment for **Extra Work** in accordance with Article 25.3.4, or for **Extra Work** ordered in connection with omitted work, such method, subject to pre-audit by the **EAO**, may, at the option of the **Commissioner**, be substituted for the cost plus a percentage method provided in Article 26.2; provided, however, that if the **Extra Work** is performed by a **Subcontractor**, the **Contractor** shall not be entitled to receive more than an additional allowance of five (5%) percent for overhead and profit over the cost of such **Subcontractor's Work** as computed in accordance with Article 26.2.

## **ARTICLE 27. RESOLUTION OF DISPUTES**

27.1 All disputes between the **City** and the **Contractor** of the kind delineated in this article that arise under, or by virtue of, this **Contract** shall be finally resolved in accordance with the provisions of this article and the **PPB Rules**. This procedure for resolving all disputes of the kind delineated herein shall be the exclusive means of resolving any such disputes.

27.1.1 This article shall not apply to disputes concerning matters dealt with in other sections of the **PPB Rules**, or to disputes involving patents, copyrights, trademarks, or trade secrets (as interpreted by the courts of New York State) relating to proprietary rights in computer software.

27.1.2 This article shall apply only to disputes about the scope of work delineated by the **Contract**, the interpretation of **Contract** documents, the amount to be paid for **Extra Work** or disputed work performed in connection with the **Contract**, the conformity of the **Contractor's Work** to the

**Contract**, and the acceptability and quality of the **Contractor's Work**; such disputes arise when the **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner** makes a determination with which the **Contractor** disagrees.

27.2 All determinations required by this article shall be made in writing clearly stated, with a reasoned explanation for the determination based on the information and evidence presented to the party making the determination. Failure to make such determination within the time required by this article shall be deemed a non-determination without prejudice that will allow application to the next level.

27.3 During such time as any dispute is being presented, heard, and considered pursuant to this article, the **Contract** terms shall remain in force and the **Contractor** shall continue to perform **Work** as directed by the **ACCO** or the **Engineer**. Failure of the **Contractor** to continue **Work** as directed shall constitute a waiver by the **Contractor** of its claim.

#### 27.4 Presentation of Disputes to Commissioner.

Notice of Dispute and Agency Response. The **Contractor** shall present its dispute in writing ("Notice of Dispute") to the **Commissioner** within thirty (30) Days of receiving written notice of the determination or action that is the subject of the dispute. This notice requirement shall not be read to replace any other notice requirements contained in the **Contract**. The Notice of Dispute shall include all the facts, evidence, documents, or other basis upon which the **Contractor** relies in support of its position, as well as a detailed computation demonstrating how any amount of money claimed by the **Contractor** in the dispute was arrived at. Within thirty (30) Days after receipt of the detailed written submission comprising the complete Notice of Dispute, the **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner** shall submit to the **Commissioner** all materials he or she deems pertinent to the dispute. Following initial submissions to the **Commissioner**, either party may demand of the other the production of any document or other material the demanding party believes may be relevant to the dispute. The requested party shall produce all relevant materials that are not otherwise protected by a legal privilege recognized by the courts of New York State. Any question of relevancy shall be determined by the **Commissioner** whose decision shall be final. Willful failure of the **Contractor** to produce any requested material whose relevancy the **Contractor** has not disputed, or whose relevancy has been affirmatively determined, shall constitute a waiver by the **Contractor** of its claim.

27.4.1 **Commissioner Inquiry.** The **Commissioner** shall examine the material and may, in his or her discretion, convene an informal conference with the **Contractor**, the **ACCO**, and the **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner** to resolve the issue by mutual consent prior to reaching a determination. The **Commissioner** may seek such technical or other expertise as he or she shall deem appropriate, including the use of neutral mediators, and require any such additional material from either or both parties as he or she deems fit. The **Commissioner's** ability to render, and the effect of, a decision hereunder shall not be impaired by any negotiations in connection with the disputed presented, whether or not the **Commissioner** participated therein. The **Commissioner** may or, at the request of any party to the dispute, shall compel the participation of any other **Contractor** with a **Contract** related to the **Work** of this **Contract**, and that **Contractor** shall be bound by the decision of the **Commissioner**. Any **Contractor** thus brought into the dispute resolution proceeding shall have the same rights and obligations under this article as the **Contractor** initiating the dispute.

27.4.2 **Commissioner Determination.** Within thirty (30) days after the receipt of all materials and information, or such longer time as may be agreed to by the parties, the **Commissioner** shall make his or her determination and shall deliver or send a copy of such determination to the **Contractor**, the **ACCO**, and **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner**, as applicable, together with a statement concerning how the decision may be appealed.

**27.4.3 Finality of Commissioner Decision.** The Commissioner's decision shall be final and binding on all parties, unless presented to the Contract Dispute Resolution Board pursuant to this article. The City may not take a petition to the Contract Dispute Resolution Board. However, should the Contractor take such a petition, the City may seek, and the Contract Dispute Resolution Board may render, a determination less favorable to the Contractor and more favorable to the City than the decision of the Commissioner.

**27.5 Presentation of Dispute to the Comptroller.** Before any dispute may be brought by the Contractor to the Contract Dispute Resolution Board, the Contractor must first present its claim to the Comptroller for his or her review, investigation, and possible adjustment.

**27.5.1 Time, Form, and Content of Notice.** Within thirty (30) days of its receipt of a decision by the Commissioner, the Contractor shall submit to the Comptroller and to the Commissioner a Notice of Claim regarding its dispute with the Agency. The Notice of Claim shall consist of (i) a brief Written statement of the substance of the dispute, the amount of money, if any, claimed and the reason(s) the Contractor contends the dispute was wrongly decided by the Commissioner; (ii) a copy of the written decision of the Commissioner; and (iii) a copy of all materials submitted by the Contractor to the Agency, including the Notice of Dispute. The Contractor may not present to the Comptroller any material not presented to the Commissioner, except at the request of the Comptroller.

**27.5.2 Agency Response.** Within thirty (30) days of receipt of the Notice of Claim, the Agency shall make available to the Comptroller a copy of all material submitted by the Agency to the Commissioner in connection with the dispute. The Agency may not present to the Comptroller any material not presented to the Commissioner except at the request of the Comptroller.

**27.5.3 Comptroller Investigation.** The Comptroller may investigate the claim in dispute and, in the course of such investigation, may exercise all powers provided in section 7-201 and 7-203 of the New York City Administrative Code. In addition, the Comptroller may demand of either party, and such party shall provide, whatever additional material the Comptroller deems pertinent to the claim, including original business records of the Contractor. Willful failure of the Contractor to produce within fifteen (15) days any material requested by the Comptroller shall constitute a waiver by the Contractor of its claim. The Comptroller may also schedule an informal conference to be attended by the Contractor, Agency representatives, and any other personnel desired by the Comptroller.

**27.5.4 Opportunity of Comptroller to Compromise or Adjust Claim.** The Comptroller shall have forty-five (45) days from his or her receipt of all materials referred to in Article 27.5.3 to investigate the disputed claim. The period for investigation and compromise may be further extended by agreement between the Contractor and the Comptroller, to a maximum of ninety (90) days from the Comptroller's receipt of all materials. The Contractor may not present its petition to the Contract Dispute Resolution Board until the period for investigation and compromise delineated in Article 27.5.4 has expired. In compromising or adjusting any claim hereunder, the Comptroller may not revise or disregard the terms of the Contract between the parties.

**27.6 Contract Dispute Resolution Board.** There shall be a Contract Dispute Resolution Board composed of:

**27.6.1** The chief administrative law judge of the Office of Administrative Trials and Hearings (OATH) or his/her designated OATH administrative law judge, who shall act as chairperson, and may adopt operational procedures and issue such orders consistent with this article as may be necessary in the execution of the Contract Dispute Resolution Board's functions, including, but not limited to, granting extensions of time to present or respond to submissions;

27.6.1.1 The **CCPO** or his/her designee; any designee shall have the requisite background to consider and resolve the merits of the dispute and shall not have participated personally and substantially in the particular matter that is the subject of the dispute or report to anyone who so participated; and

27.6.2 A person with appropriate expertise who is not an employee of the City. This person shall be selected by the presiding administrative law judge from a prequalified panel of individuals, established and administered by OATH with appropriate background to act as decision-makers in a dispute. Such individual may not have a contract or dispute with the City or be an officer or employee of any company or organization that does, or regularly represents persons, companies, or organizations having disputes with the City.

27.7 Petition to the Contract Dispute Resolution Board. In the event the claim has not been settled or adjusted by the **Comptroller** within the period provided in this article, the **Contractor**, within thirty (30) days thereafter, may petition the Contract Dispute Resolution Board to review the **Commissioner's** determination.

27.7.1 Form and Content of Petition by **Contractor**. The **Contractor** shall present its dispute to the Contract Dispute Resolution Board in the form of a petition, which shall include (i) a brief written statement of the substance of the dispute, the amount of money, if any, claimed, and the reason(s) the **Contractor** contends the dispute was wrongly decided by the **Commissioner**; (ii) a copy of the written Decision of the **Commissioner**, (iii) copies of all materials submitted by the **Contractor** to the Agency; (iv) a copy of the written decision of the **Comptroller**, if any, and (v) copies of all correspondence with, or written material submitted by the **Contractor**, to the **Comptroller**. The **Contractor** shall concurrently submit four (4) complete sets of the Petition: one set to the Corporation Counsel (Attn: Commercial and Real Estate Litigation Division) and three (3) sets to the Contract Dispute Resolution Board at OATH's offices with proof of service on the Corporation Counsel. In addition, the **Contractor** shall submit a copy of the written statement of the substance of the dispute, cited in (i) above, to both the **Commissioner** and the **Comptroller**.

27.7.2 Agency Response. Within thirty (30) Days of its receipt of the petition by the Corporation Counsel, the **Agency** shall respond to the brief written statement of the **Contractor** and make available to the Contract Dispute Resolution Board all material it submitted to the **Commissioner** and **Comptroller**. Three (3) complete copies of the **Agency** response shall be provided to the Contract Dispute Resolution Board and one to the **Contractor**. Extensions of time for submittal of the **Agency** response shall be given as necessary upon a showing of good cause or, upon consent of the parties, for an initial period of up to thirty (30) Days.

27.7.3 Further Proceedings. The Contract Dispute Resolution Board shall permit the **Contractor** to present its case by submission of memoranda, briefs, and oral argument. The Contract Dispute Resolution Board shall also permit the **Agency** to present its case in response to the **Contractor** by submission of memoranda, briefs, and oral argument. If requested by the Corporation Counsel, the **Comptroller** shall provide reasonable assistance in the preparation of the **Agency's** case. Neither the **Contractor** nor the **Agency** may support its case with any documentation or other material that was not considered by the **Comptroller**, unless requested by the Contract Dispute Resolution Board. The Contract Dispute Resolution Board, in its discretion, may seek such technical or other expert advice as it shall deem appropriate and may seek, on its own or upon application of a party, any such additional material from any party as it deems fit. The Contract Dispute Resolution Board, in its discretion, may combine more than one dispute between the parties for concurrent resolution.

27.7.4 Contract Dispute Resolution Board Determination. Within forty-five (45) Days of the conclusion of all written submissions and oral arguments, the Contract Dispute Resolution Board shall render a written decision resolving the dispute. In an unusually complex case, the Contract Dispute Resolution Board may render its decision in a longer period, not to exceed ninety (90) Days, and shall

so advise the parties at the commencement of this period. The Contract Dispute Resolution Board's decision must be consistent with the terms of the **Contract**. Decisions of the Contract Dispute Resolution Board shall only resolve matters before the Contract Dispute Resolution Board and shall not have precedential effect with respect to matters not before the Contract Dispute Resolution Board.

**27.7.5 Notification of Contract Dispute Resolution Board Decision.** The Contract Dispute Resolution Board shall send a copy of its decision to the **Contractor**, the **ACCO**, the **Engineer**, the **Comptroller**, the **Corporation Counsel**, the **Director of the Office of Construction**, and the **PPB**. A decision in favor of the **Contractor** shall be subject to the prompt payment provisions of the **PPB Rules**. The Required Payment Date shall be thirty (30) Days after the date the parties are formally notified of the Contract Dispute Resolution Board's decision.

**27.7.6 Finality of Contract Dispute Resolution Board Decision.** The Contract Dispute Resolution Board's decision shall be final and binding on all parties. Any party may seek review of the Contract Dispute Resolution Board's decision solely in the form of a challenge, filed within four (4) months of the date of the Contract Dispute Resolution Board's decision, in a court of competent jurisdiction of the State of New York, County of New York pursuant to Article 78 of the Civil Practice Laws and Rules. Such review by the court shall be limited to the question of whether or not the Contract Dispute Resolution Board's decision was made in violation of lawful procedure, was affected by an error of Law, or was arbitrary and capricious or an abuse of discretion. No evidence or information shall be introduced or relied upon in such proceeding that was not presented to the Contract Dispute Resolution Board in accordance with this article.

**27.8** Any termination, cancellation, or alleged breach of the **Contract** prior to or during the pendency of any proceedings pursuant to this article shall not affect or impair the ability of the **Commissioner** or Contract Dispute Resolution Board to make a binding and final decision pursuant to this article.

## **ARTICLE 28. RECORD KEEPING FOR EXTRA OR DISPUTED WORK**

**28.1** While the **Contractor** or any of its **Subcontractors** is performing **Extra Work** on a Time and Material Basis ordered by the **Commissioner** under Article 25, or is performing disputed **Work**, or complying with a determination or order under protest in accordance with Articles 27 and 30, in each such case the **Contractor** shall furnish the **Resident Engineer** daily with three (3) copies of written statements signed by the **Contractor's** representative at the **Site** showing:

**28.1.1** The name and number of each **Worker** employed on such **Work** or engaged in complying with such determination or order, the number of hours employed, and the character of the **Work** each is doing; and

**28.1.2** The nature and quantity of any materials, plant and equipment furnished or used in connection with the performance of such **Work** or compliance with such determination or order, and from whom purchased or rented.

**28.2** A copy of such statement will be countersigned by the **Resident Engineer**, noting thereon any items not agreed to or questioned, and will be returned to the **Contractor** within two (2) Days after submission.

**28.3** The **Contractor** and its **Subcontractors**, when required by the **Commissioner**, or the **Comptroller**, shall also produce for inspection, at the office of the **Contractor** or **Subcontractor**, any and all of its books, bid documents, financial statements, vouchers, records, daily job diaries and reports, and cancelled checks, and any other documents relating to showing the nature and quantity of the labor, materials, plant and equipment actually used in the performance of such **Work**, or in complying with such determination or order, and the amounts

expended therefor, and shall permit the **Commissioner** and the **Comptroller** to make such extracts therefrom, or copies thereof, as they or either of them may desire.

28.4 In connection with the examination provided for herein, the **Commissioner**, upon demand therefor, will produce for inspection by the **Contractor** such records as the **Agency** may have with respect to such **Extra** or disputed **Work** performed under protest pursuant to order of the **Commissioner**, except those records and reports which may have been prepared for the purpose of determining the accuracy and validity of the **Contractor's** claim.

28.5 Failure to comply strictly with these requirements shall constitute a waiver of any claim for extra compensation or damages on account of the performance of such **Work** or compliance with such determination or order.

#### **ARTICLE 29. OMITTED WORK**

29.1 If any **Contract Work** in a lump sum **Contract**, or if any part of a lump sum item in a unit price, lump sum, or percentage-bid **Contract** is omitted by the **Commissioner** pursuant to Article 33, the **Contract** price, subject to audit by the EAO, shall be reduced by a pro rata portion of the lump sum bid amount based upon the percent of **Work** omitted subject to Article 29.4. For the purpose of determining the pro rata portion of the lump sum bid amount, the bid breakdown submitted in accordance with Article 41 shall be considered, but shall not be the determining factor.

29.2 If the whole of a lump sum item or units of any other item is so omitted by the **Commissioner** in a unit price, lump sum, or percentage-bid **Contract**, then no payment will be made therefor except as provided in Article 29.4.

29.3 For units that have been ordered but are only partially completed, the unit price shall be reduced by a pro rata portion of the unit price bid based upon the percentage of **Work** omitted subject to Article 29.4.

29.4 In the event the **Contractor**, with respect to any omitted **Work**, has purchased any non-cancelable material and/or equipment that is not capable of use except in the performance of this **Contract** and has been specifically fabricated for the sole purpose of this **Contract**, but not yet incorporated into the **Work**, the **Contractor** shall be paid for such material and/or equipment in accordance with Article 64.2.1(b); provided, however, such payment is contingent upon the **Contractor's** delivery of such material and/or equipment in acceptable condition to a location designated by the **City**.

29.5 The **Contractor** agrees to make no claim for damages or for loss of overhead and profit with regard to any omitted **Work**.

#### **ARTICLE 30. NOTICE AND DOCUMENTATION OF COSTS AND DAMAGES; PRODUCTION OF FINANCIAL RECORDS**

30.1 If the **Contractor** shall claim to be sustaining damages by reason of any act or omission of the **City** or its agents, it shall submit to the **Commissioner** within forty-five (45) **Days** from the time such damages are first incurred, and every thirty (30) **Days** thereafter for as long as such damages are incurred, verified statements of the details and the amounts of such damages, together with documentary evidence of such damages. The **Contractor** may submit any of the above statements within such additional time as may be granted by the **Commissioner** in writing upon written request therefor. Failure of the **Commissioner** to respond in writing to a written request for additional time within thirty (30) **Days** shall be deemed a denial of the request. On failure of the **Contractor** to fully comply with the foregoing provisions, such claims shall be deemed waived and no right to recover on such claims shall exist. Damages that the **Contractor** may claim in any action or dispute resolution procedure arising under or by reason of this **Contract** shall not be different from or in excess of the statements and documentation made pursuant to this article.

30.2 In addition to the foregoing statements, the **Contractor** shall, upon notice from the **Commissioner**, produce for examination at the **Contractor's** office, by the **Engineer, Architect or Project Manager**, all of its books of account, bills, invoices, payrolls, subcontracts, time books, daily reports, bank deposit books, bank statements, check books, cancelled checks, showing all of its acts and transactions in connection with or relating to or arising by reason of this **Contract**, and submit itself and persons in its employment, for examination under oath by any person designated by the **Commissioner** or **Comptroller** to investigate claims made or disputes against the **City** under this **Contract**. At such examination, a duly authorized representative of the **Contractor** may be present.

30.3 In addition to the statements required under Article 28 and this Article, the **Contractor** and/or its **Subcontractor** shall, within thirty (30) **Days** upon notice from the **Commissioner** or **Comptroller**, produce for examination at the **Contractor's** and/or **Subcontractor's** office, by a representative of either the **Commissioner** or **Comptroller**, all of its books of account, bid documents, financial statements, accountant workpapers, bills, invoices, payrolls, subcontracts, time books, daily reports, bank deposit books, bank statements, check books, cancelled checks, showing all of its acts and transactions in connection with or relating to or arising by reason of this **Contract**. Further, the **Contractor** and/or its **Subcontractor** shall submit any person in its employment, for examination under oath by any person designated by the **Commissioner** or **Comptroller** to investigate claims made or disputes against the **City** under this **Contract**. At such examination, a duly authorized representative of the **Contractor** may be present.

30.4 Unless the information and examination required under Article 30.3 is provided by the **Contractor** and/or its **Subcontractor** upon thirty (30) **Days** notice from the **Commissioner** or **Comptroller**, or upon the **Commissioner's** or **Comptroller's** written authorization to extend the time to comply, the **City** shall be released from all claims arising under, relating to or by reason of this **Contract**, except for sums certified by the **Commissioner** or **Comptroller** to be due under the provisions of this **Contract**. It is further stipulated and agreed that no person has the power to waive any of the foregoing provisions and that in any action or dispute resolution procedure against the **City** to recover any sum in excess of the sums certified by the **Commissioner** or **Comptroller** to be due under or by reason of this **Contract**, the **Contractor** must allege in its complaint and prove, at trial or during such dispute resolution procedure, compliance with the provisions of this Article.

30.5 In addition, after the commencement of any action or dispute resolution procedure by the **Contractor** arising under or by reason of this **Contract**, the **City** shall have the right to require the **Contractor** to produce for examination under oath, up until the trial of the action or hearing before the **Contract Dispute Resolution Board**, the books and documents described in Article 30.3 and submit itself and all persons in its employ for examination under oath. If this Article is not complied with as required, then the **Contractor** hereby consents to the dismissal of the action or dispute resolution procedure.

## **CHAPTER VII**

### **POWERS OF THE RESIDENT ENGINEER, THE ENGINEER OR ARCHITECT AND THE COMMISSIONER**

#### **ARTICLE 31. THE RESIDENT ENGINEER**

31.1 The **Resident Engineer** shall have the power to inspect, supervise and control the performance of the **Work**, subject to review by the **Commissioner**. The **Resident Engineer** shall not, however, have the power to issue an **Extra Work** order, except as specifically designated in writing by the **Commissioner**.

## **ARTICLE 32. THE ENGINEER OR ARCHITECT OR PROJECT MANAGER**

32.1 The **Engineer or Architect or Project Manager**, in addition to those matters elsewhere herein delegated to the **Engineer** and expressly made subject to his/her determination, direction or approval, shall have the power, subject to review by the **Commissioner**:

32.1.1 To determine the amount, quality, and location of the **Work** to be paid for hereunder; and

32.1.2 To determine all questions in relation to the **Work**, to interpret the **Contract Drawings, Specifications, and Addenda**, and to resolve all patent inconsistencies or ambiguities therein; and

32.1.3 To determine how the **Work** of this **Contract** shall be coordinated with **Work** of other **Contractors** engaged simultaneously on this **Project**, including the power to suspend any part of the **Work**, but not the whole thereof; and

32.1.4 To make minor changes in the **Work** as he/she deems necessary, provided such changes do not result in a net change in the cost to the **City** or to the **Contractor** of the **Work** to be done under the **Contract**; and

32.1.5 To amplify the **Contract Drawings**, add explanatory information and furnish additional **Specifications** and drawings, consistent with this **Contract**.

32.2 The foregoing enumeration shall not imply any limitation upon the power of the **Engineer or Architect or Project Manager**, for it is the intent of this **Contract** that all of the **Work** shall generally be subject to his/her determination, direction and approval, except where the determination, direction or approval of someone other than the **Engineer or Architect or Project Manager** is expressly called for herein.

32.3 The **Engineer or Architect or Project Manager** shall not, however, have the power to issue an **Extra Work** order, except as specifically designated in writing by the **Commissioner**.

## **ARTICLE 33. THE COMMISSIONER**

33.1 The **Commissioner**, in addition to those matters elsewhere herein expressly made subject to his/her determination, direction or approval, shall have the power:

33.1.1 To review and make determinations on any and all questions in relation to this **Contract** and its performance; and

33.1.2 To modify or change this **Contract** so as to require the performance of **Extra Work** (subject, however, to the limitations specified in Article 25) or the omission of **Contract Work**; and

33.1.3 To suspend the whole or any part of the **Work** whenever in his/her judgment such suspension is required:

33.1.3(a) In the interest of the **City** generally; or

33.1.3(b) To coordinate the **Work** of the various **Contractors** engaged on this **Project** to the provisions of Article 12; or

33.1.3(c) To expedite the completion of the entire **Project** even though the completion of this particular **Contract** may thereby be delayed.

## **ARTICLE 34. NO ESTOPPEL**

34.1 Neither the City nor any Agency, officer, agent or employee thereof, shall be bound, precluded or estopped by any determination, decision, approval, order, letter, payment or certificate made or given under or in connection with this Contract by the City, the Commissioner, the Resident Engineer, or any other officer, agent or employee of the City, either before or after the final completion and acceptance of the Work and payment therefor:

34.1.1 From showing the true and correct classification, amount, quality or character of the Work actually done; or that any such determination, decision, order, letter, payment or certificate was untrue, incorrect or improperly made in any particular, or that the Work, or any part thereof, does not in fact conform to the requirements of this Contract; and

34.1.2 From demanding and recovering from the Contractor any overpayment made to it, or such damages as the City may sustain by reason of the Contractor's failure to perform each and every part of its Contract.

## **CHAPTER VIII LABOR PROVISIONS**

## **ARTICLE 35. EMPLOYEES**

35.1 The Contractor and its Subcontractors shall not employ on the Work:

35.1.1 Anyone who is not competent, faithful and skilled in the Work for which he/she shall be employed; and whenever the Commissioner shall inform the Contractor, in writing, that any employee is, in his/her opinion, incompetent, unfaithful or disobedient, that employee shall be discharged from the Work forthwith, and shall not again be employed upon it; or

35.1.2 Any labor, materials or means whose employment, or utilization during the course of this Contract, may tend to or in any way cause or result in strikes, work stoppages, delays, suspension of Work or similar troubles by workers employed by the Contractor or its Subcontractors, or by any of the trades working in or about the buildings and premises where Work is being performed under this Contract, or by Other Contractors or their Subcontractors pursuant to other Contracts, or on any other building or premises owned or operated by the City, its Agencies, departments, boards or authorities. Any violation by the Contractor of this requirement may, upon certification of the Commissioner, be considered as proper and sufficient cause for declaring the Contractor to be in default, and for the City to take action against it as set forth in Chapter X of this Contract, or such other article of this Contract as the Commissioner may deem proper; or

35.1.3 In accordance with Section 220.3-e of the Labor Law of the State of New York (hereinafter "Labor Law"), the Contractor and its Subcontractors shall not employ on the Work any apprentice, unless he/she is a registered individual, under a bona fide program registered with the New York State Department of Labor. The allowable ratio of apprentices to journey-level workers in any craft classification shall not be greater than the ratio permitted to the Contractor as to its Work force on any job under the registered program. Any employee listed on a payroll at an apprentice wage rate, who is not registered as above, shall be paid the wage rate determined by the Comptroller of the City for the classification of Work actually performed. The Contractor or Subcontractor will be required to furnish written evidence of the registration of its program and apprentices as well as all the appropriate ratios and wage rates, for the area of the construction prior to using any apprentices on the Contract Work.

35.2 If the total cost of the **Work** under this **Contract** is at least two hundred fifty thousand dollars, all laborers, workers, and mechanics employed in the performance of the **Contract** on the public work site, either by the **Contractor**, **Subcontractor** or other person doing or contracting to do the whole or a part of the work contemplated by the contract, shall be certified prior to performing any **Work** as having successfully completed a course in construction safety and health approved by the United States department of labor's occupational safety and health administration that is at least ten hours in duration.

#### **ARTICLE 36. NO DISCRIMINATION**

36.1 The **Contractor** specifically agrees, as required by Labor Law Section 220-e, as amended, that:

36.1.1 In the hiring of employees for the performance of **Work** under this **Contract** or any subcontract hereunder, neither the **Contractor**, **Subcontractor**, nor any person acting on behalf of such **Contractor** or **Subcontractor**, shall by reason of race, creed, color or national origin discriminate against any citizen of the State of New York who is qualified and available to perform the **Work** to which the employment relates;

36.1.2 Neither the **Contractor**, **Subcontractor**, nor any person on its behalf shall, in any manner, discriminate against or intimidate any employee hired for the performance of work under this **Contract** on account of race, creed, color or national origin;

36.1.3 There may be deducted from the amount payable to the **Contractor** by the **City** under this **Contract** a penalty of fifty (\$50.00) dollars for each person for each **Day** during which such person was discriminated against or intimidated in violation of the provisions of this **Contract**; and

36.1.4 This **Contract** may be cancelled or terminated by the **City** and all moneys due or to become due hereunder may be forfeited, for a second or any subsequent violation of the terms or conditions of this article.

36.1.5 The aforesaid provisions of this article covering every **Contract** for or on behalf of the State or a municipality for the manufacture, sale or distribution of materials, equipment or supplies shall be limited to operations performed within the territorial limits of the State of New York.

36.2 The **Contractor** specifically agrees, as required by Section 6-108 of the Administrative Code, as amended, that:

36.2.1 It shall be unlawful for any person engaged in the construction, alteration or repair of buildings or engaged in the construction or repair of streets or highways pursuant to a **Contract** with the **City** or engaged in the manufacture, sale or distribution of materials, equipment or supplies pursuant to a **Contract** with the **City** to refuse to employ or to refuse to continue in any employment any person on account of the race, color or creed of such person.

36.2.2 It shall be unlawful for any person or any servant, agent or employee of any person, described in Article 36.1.2, to ask, indicate or transmit, orally or in writing, directly or indirectly, the race, color or creed or religious affiliation of any person employed or seeking employment from such person, firm or corporation.

36.2.3 Breach of the foregoing provisions shall be deemed a violation of a material provision of this **Contract**.

36.2.4 Any person, or the employee, manager or owner of or officer of such firm or corporation who shall violate any of the provisions of this section shall, upon conviction thereof, be punished by

a fine of not more than one hundred (\$100.00) dollars or by imprisonment for not more than thirty (30) Days, or both.

36.3 This **Contract** is subject to the requirements of Executive Order No. 50 (1980) ("E.O. 50"), as revised, and the Rules and Regulations promulgated thereunder. No **Contract** will be awarded unless and until these requirements have been complied with in their entirety. By signing this **Contract**, the **Contractor** agrees that it:

36.3.1 Will not engage in any unlawful discrimination against any employee or applicant for employment because of race, creed, color, national origin, sex, age, disability, marital status or sexual orientation with respect to all employment decisions including, but not limited to, recruitment, hiring, upgrading, demotion, downgrading, transfer, training, rates of pay or other forms of compensation, layoff, termination, and all other terms and conditions of employment; and

36.3.2 Will not engage in any unlawful discrimination in the selection of **Subcontractors** on the basis of the owner's race, color, creed, national origin, sex, age, disability, marital status or sexual orientation; and

36.3.3 Will state in all solicitations or advertisements for employees placed by or on behalf of the **Contractor** that all qualified applicants will receive consideration for employment without unlawful discrimination based on race, creed, color, national origin, sex, age, citizens status, disability, marital status, sexual orientation, or that it is an equal employment opportunity employer; and

36.3.4 Will send to each labor organization or representative of workers with which it has a Collective Bargaining Agreement or other **Contract** or memorandum of understanding, written notification of its equal employment opportunity commitments under E.O. 50 and the Rules and Regulations promulgated thereunder; and

36.3.5 Will furnish all information and reports including an Employment Report before the award of the **Contract** which are required by E.O. 50, the Rules and Regulations promulgated thereunder, and orders of the Department of Business Services, Division of Labor Services ("**DLS**") and will permit access to its books, records and accounts by the **DLS** for the purposes of investigation to ascertain compliance with such rules, regulations, and orders.

36.4 The **Contractor** understands that in the event of its noncompliance with the nondiscrimination clauses of this **Contract** or with any of such rules, regulations, or orders, such noncompliance shall constitute a material breach of this **Contract** and noncompliance with E.O. 50 and the Rules and Regulations promulgated thereunder. After a hearing held pursuant to the rules of the **DLS**, the Director of the **DLS** may direct the **Commissioner** to impose any or all of the following sanctions:

36.4.1 Disapproval of the **Contractor**; and/or

36.4.2 Suspension or termination of the **Contract**; and/or

36.4.3 Declaring the **Contractor** in default; and/or

36.4.4 In lieu of any of the foregoing sanctions, the Director of the **DLS** may impose an employment program.

Failure to comply with E.O. 50 and the rules and regulations promulgated thereunder, in one or more instances, may result in the **Agency** declaring the **Contractor** to be non-responsible.

The **Contractor** further agrees that it will refrain from entering into any **Contract** or **Contract** modification subject to E.O. 50 and the rules and regulations promulgated thereunder with a **Subcontractor** who is not in compliance with the requirements of E.O. 50 and the rules and regulations promulgated thereunder.

36.5 The **Contractor** specifically agrees, as required by Section 6-123 of the Administrative Code, that:

36.5.1 The **Contractor** will not engage in any unlawful discriminatory practice in violation of Title VIII of the Administrative Code;

36.5.2 every agreement between the **Contractor** and its **Subcontractors** in excess of \$50,000 shall include a provision that the **Subcontractor** shall not engage in any unlawful discriminatory practice as defined in title viii of the Administrative Code (Section 8-101 et. seq.); and

36.5.3 Any failure to comply with this Article 36.5 may subject the **Contractor** to the remedies set forth in Section 6-123 of the Administrative Code, including, where appropriate, sanctions such as withholding of payment, imposition of an employment program, finding the **Contractor** to be in default, cancellation of the **Contract**, or any other sanction or remedy provided by **Law** or **Contract**.

#### **ARTICLE 37. LABOR LAW REQUIREMENTS**

37.1 The **Contractor** shall strictly comply with all applicable provisions of the Labor Law, as amended. Such compliance is a material term of this **Contract**.

37.2 The **Contractor** specifically agrees, as required by Labor Law Section 220 and 220-d, as amended, that:

37.2.1 **Hours of Work:** No laborer, worker, or mechanic in the employ of the **Contractor**, **Subcontractor** or other person doing or contracting to do the whole or a part of the **Work** contemplated by this **Contract** shall be permitted or required to work more than eight (8) hours in any one (1) calendar **Day**, or more than five (5) **Days** in any one (1) week, except as provided in the Labor Law and in cases of extraordinary emergency including fire, flood, or danger to life or property, or in the case of national emergency when so proclaimed by the President of the United States of America.

37.2.2 In situations in which there are not sufficient laborers, workers and mechanics who may be employed to carry on expeditiously the **Work** contemplated by this **Contract** as a result of such restrictions upon the number of hours and days of labor, and the immediate commencement or prosecution or completion without undue delay of the **Work** is necessary for the preservation of the **Site** and/or for the protection of the life and limb of the persons using the same, such laborers, workers, and mechanics shall be permitted or required to work more than eight (8) hours in any one (1) **Day**; or five (5) **Days** in any one (1) week; provided, however, that upon application of any **Contractor**, the **Commissioner** shall have first certified to the Commissioner of Labor of the State of New York (hereinafter "**Commissioner of Labor**") that such public **Work** is of an important nature and that a delay in carrying it to completion would result in serious disadvantage to the public; and provided, further, that such **Commissioner of Labor** shall have determined that such an emergency does in fact exist as provided in Labor Law Section 220.2.

37.2.3 Failure of the **Commissioner** to make such a certification to the Commissioner of Labor shall not entitle the **Contractor** to damages for delay or for any cause whatsoever.

**37.2.4 Prevailing Rate of Wages:** The wages to be paid for a legal day's Work to laborers, workers, or mechanics employed upon the Work contemplated by this Contract or upon any materials to be used thereon shall not be less than the "prevailing rate of wage" as defined in Labor Law Section 220, and as fixed by the Comptroller in the attached Schedule of Wage Rates and in updated schedules thereof. The prevailing wage rates and supplemental benefits to be paid are those in effect at the time the Work is being performed.

**37.2.5 Requests for interpretation or correction in the Information for Bidders** includes all requests for clarification of the classification of trades to be employed in the performance of the Work under this Contract. In the event that a trade not listed in the Contract is in fact employed during the performance of this Contract, the Contractor shall be required to obtain from the Agency the prevailing wage rates and supplementary benefits for the trades used and to complete the performance of this Contract at the price at which the Contract was awarded.

**37.2.6 Minimum Wages:** Except for employees whose wage is required to be fixed pursuant to Labor Law Section 220, all persons employed by the Contractor and any Subcontractor in the manufacture or furnishing of the supplies, materials, or equipment, or the furnishing of work, labor, or services, used in the performance of this Contract, shall be paid, without subsequent deduction or rebate unless expressly authorized by Law, not less than the sum mandated by Law. Minimum wages shall be the rates fixed by Federal Law and regulations.

**37.3 Working Conditions:** No part of the Work, labor or services shall be performed or rendered by the Contractor in any plants, factories, buildings or surroundings or under working conditions which are unsanitary or hazardous or dangerous to the health and safety of employees engaged in the performance of this Contract. Compliance with the safety, sanitary and factory inspection Laws of the state in which the Work is to be performed shall be prima facie evidence of compliance with this article.

**37.4 Prevailing Wage Enforcement:** The Contractor agrees to pay for all costs incurred by the City in enforcing prevailing wage requirements, including the cost of any investigation conducted by or on behalf of the Agency or the Comptroller, where the City discovers a failure to comply with any of the requirements of this Article 37 by the Contractor or its Subcontractor(s). The Contractor also agrees, that should it fail or refuse to pay for any such investigation, the Agency is hereby authorized to deduct from a Contractor's account an amount equal to the cost of such investigation.

**37.4.1** The Labor Law Section 220 and Section 220-d, as amended, provide that this Contract shall be forfeited and no sum paid for any Work done hereunder on a second conviction for willfully paying less than:

**37.4.1(a)** The stipulated wage scale as provided in Labor Law Section 220, as amended, or

**37.4.1(b)** Less than the stipulated minimum hourly wage scale as provided in Labor Law Section 220-d, as amended.

**37.4.2** For any breach or violation of either Working Conditions (Article 37.3) and Minimum Wages (Article 37.2.6), the party responsible therefore shall be liable to the City for liquidated damages, which may be withheld from any amounts due on any Contracts with the City of such party responsible, or may be recovered in suits brought by the Corporation Counsel in the name of the City, in addition to damage for any other breach of this Contract, a sum equal to the amount of any underpayment of wages due to any employee engaged in the performance of this Contract. In addition, the Commissioner shall have the right to cancel Contracts and enter into other Contracts for the completion of the original Contract, with or without public letting, and the original Contractor shall be liable for any additional cost. All sums withheld or recovered as deductions, rebates, refunds, or underpayment of wages hereunder, shall be held in a special deposit account and

shall be paid without interest, on order of the **Comptroller**, directly to the employees who have been paid less than minimum rates of pay as set forth herein and on whose account such sums were withheld or recovered, provided that no claims by employees for such payments shall be entertained unless made within two (2) years from the date of actual notice to the **Contractor** of the withholding or recovery of such sums by the **City**.

37.4.3 A determination by the **Comptroller** that a **Contractor** and/or its **Subcontractor** willfully violated Labor Law Section 220 will be forwarded to the **City's** five District Attorneys for review.

37.4.4 The **Contractor's** or **Subcontractor's** noncompliance with this article and Labor Law Section 220, may result in an unsatisfactory performance evaluation and the **Comptroller** may also find and determine that the **Contractor** or **Subcontractor** willfully violated the New York Labor Law.

37.4.4(a) An unsatisfactory performance evaluation for noncompliance with this article may result in a determination that the **Contractor** is a non-responsible bidder on subsequent procurements with the **City** and thus a rejection of a future award of a contract with the **City**, as well as any other sanctions provided for by Law.

37.4.4(b) Labor Law Section 220-b, as amended, provides that when two (2) final determinations have been rendered against a **Contractor** or **Subcontractor** within any consecutive six (6) year period determining that such **Contractor** or **Subcontractor** has willfully failed to pay the prevailing rate of wages or to provide supplements in accordance with the Labor Law and this article, whether such failures were concurrent or consecutive and whether or not such final determinations concerning separate public work projects are rendered simultaneously, such **Contractor** or **Subcontractor** shall be ineligible to submit a bid on or be awarded any public work contract with the **City** for a period of five (5) years from the second final determination. If the final determination involves the falsification of payroll records or the kickback of wages or supplements, the **Contractor** or **Subcontractor** shall be ineligible to submit a bid on or be awarded any public work contract with the **City** for a period of five (5) years from the first final determination.

37.4.4(c) Labor Law Section 220, as amended, provides that the **Contractor** or **Subcontractor** found to have violated this article may be directed to make payment of wages or supplements including interest found to be due, and the **Contractor** or **Subcontractor** may be directed to make payment of a further sum as a civil penalty in an amount not exceeding twenty-five (25%) percent of the total amount found to be due.

37.5 The **Contractor** and its **Subcontractors** shall within ten (10) Days after mailing of a Notice of Award or written order, post in prominent and conspicuous places in each and every plant, factory, building, and structure where employees of the **Contractor** and its **Subcontractors** engaged in the performance of this **Contract** are employed, notices furnished by the **City**, in relation to prevailing wages and supplements, minimum wages and other stipulations contained in Sections 220 and 220-h of the Labor Law, and the **Contractor** and its **Subcontractors** shall continue to keep such notices posted in such prominent and conspicuous places until **Final Acceptance** of the supplies, materials, equipment, or **Work**, labor, or services required to be furnished or rendered under this **Contract**.

37.6 The **Contractor** shall strictly comply with all of the provisions of Articles 37.6.1 through 37.6.5, and provide for all workers, laborers or mechanics in its employ, the following:

37.6.1 **Notices Posted At Site:** Post, in a location designated by the **City**, schedules of prevailing wages and supplements for this **Project**, a copy of all re-determinations of such schedules for the

**Project**, the Workers' Compensation Law Section 51 notice, all other notices required by law to be posted at the Site, the City notice that this **Project** is a public works **Project** on which each worker is entitled to receive the prevailing wages and supplements for the occupation at which he or she is working, and all other notices which the City directs the **Contractor** to post. The **Contractor** shall provide a surface for such notices which is satisfactory to the City. The **Contractor** shall maintain and keep current such notices in a legible manner and shall replace any notice or schedule which is damaged, defaced, illegible or removed for any reason. The **Contractor** shall post such notices before commencing any **Work** on the Site and shall maintain such notices until all **Work** on the Site is complete; and

**37.6.2 Daily Site Sign-in Sheets:** Maintain daily Site sign-in sheets, and require that **Subcontractors** maintain daily Site sign-in sheets for its employees, which include blank spaces for an employee's name to be both printed and signed, job title, date started and Social Security number, the time the employee began **Work** and the time the employee left **Work**, until **Final Acceptance** of the supplies, materials, equipment, or **Work**, labor, or services to be furnished or rendered under this **Contract** unless exception is granted by the Comptroller upon application by the Agency. In the alternative, subject to the approval of the CCPO, the **Contractor** and **Subcontractor** may maintain an electronic or biometric sign-in system, which provides the information required by this Article 37.6.2; and

**37.6.3 Individual Employee Information Notices:** Distribute a notice, to each worker, laborer or mechanic employed under this **Contract**, in a form provided by the Agency, that this **Project** is a public work project on which each worker, laborer or mechanic is entitled to receive the prevailing rate of wages and supplements for the occupation at which he or she is working. If the total cost of the **Work** under this **Contract** is at least two hundred fifty thousand dollars, such notice shall also include a statement that, that each worker, laborer or mechanic be certified prior to performing any **Work** as having successfully completed a course in construction safety and health approved by the United States department of labor's occupational safety and health administration that is at least ten hours in duration. Such notice shall be distributed to each worker before he or she starts performing any **Work** of this **Contract** and with the first paycheck after July first of each year. Worker, laborer or mechanic includes employees of the **Contractor** and all **Subcontractors** and all employees of suppliers entering the Site. At the time of distribution, the **Contractor** shall have each worker, laborer or mechanic sign a statement, in a form provided by the Agency, certifying that the worker has received the notice required by this article, which signed statement shall be maintained with the payroll records required by this **Contract**; and

**37.6.3.1** The **Contractor** and each **Subcontractor** shall notify each worker, laborer or mechanic employed under this **Contract** in writing of the prevailing rate of wages for their particular job classification. Such notification shall be given to every worker, laborer and mechanic on their first pay stub and with every pay stub thereafter; and

**37.6.4 Site Laminated Identification Badges:** Provide laminated identification badges which indicate the worker's, laborer's or mechanic's name, trade, employer's name and employment starting date (month/day/year). Further, require as a condition of employment on the Site, that each and every worker, laborer or mechanic wear the laminated identification badge at all times and that it may be seen by any representative of the City; and

**37.6.5 Language Other Than English Used On Site:** Provide the ACCO notice when three (3) or more employees (worker and/or laborer and/or mechanic) on the Site, at any time, speak a language other than English. The ACCO will then provide the **Contractor** the notices in Article 37.6.1 in that language or languages as may be required. The **Contractor** is responsible for all distributions under Article 37; and

37.6.6 Provision of Records: The **Contractor** and **Subcontractor(s)** shall produce within five (5) **Days** on the **Site** of the **Work** and upon a written order of the **Engineer**, the **Commissioner**, the **ACCO**, the **Agency EAO**, or the **Comptroller**, such records as are required to be kept by this Article 37.6; and

37.6.7 If this **Contract** is for an amount greater than \$1,000,000, checks issued by the **Contractor** to covered employees shall be generated by a payroll service or automated payroll system (an in-house system may be used if approved by the **Agency**). For any subcontract for an amount greater than \$750,000, checks issued by a **Subcontractor** to covered employees shall be generated by a payroll service or automated payroll system (an in-house system may be used if approved by the **Agency**); and

37.6.8 The failure of the **Contractor** or **Subcontractor(s)** to comply with the provisions of Articles 37.6.1 through 37.6.7 may result in the **Commissioner** declaring the **Contractor** or **Subcontractor(s)** in default and/or the withholding of payments otherwise due under the **Contract**.

37.7 The **Contractor** and its **Subcontractors** shall keep such employment and payroll records as are required by Section 220 of the Labor Law.

37.8 At the time the **Contractor** makes application for each partial payment and for final payment, the **Contractor** shall submit to the **Commissioner** a written payroll certification, in the form provided by this **Contract**, of compliance with the prevailing wage, minimum wage and other provisions and stipulations required by Labor Law Section 220 and of compliance with the training requirements of Labor law section 220-h set forth in Article 35.2. This certification of compliance with the provisions of this article shall be a condition precedent to payment and no payment shall be made to the **Contractor** unless and until each such certification shall have been submitted to and received by the **Commissioner**.

37.9 This **Contract** is executed by the **Contractor** with the express warranty and representation that the **Contractor** is not disqualified under the provisions of Section 220 of the Labor Law for the award of the **Contract**.

37.10 Any breach or violation of any of the foregoing shall be deemed a breach or violation of a material provision of this **Contract**, and grounds for cancellation thereof by the **City**.

#### **ARTICLE 38. PAYROLL REPORTS**

38.1 The **Contractor** shall maintain on the **Site** the original payrolls or transcripts thereof which the **Contractor** and its **Subcontractor(s)** are required to maintain pursuant to Labor Law Section 220. The **Contractor** and **Subcontractor(s)** shall submit original payrolls or transcripts, subscribed and affirmed by it as true, with each and every payment requisition. The **Contractor** and **Subcontractor(s)** shall produce within five (5) **Days** on the **Site** of the **Work** and upon a written order of the **Engineer**, the **Commissioner**, the **ACCO**, the **Agency EAO**, or the **Comptroller**, such original payrolls or transcripts thereof, subscribed and affirmed by it as true, and the statements signed by each worker pursuant to this Chapter VIII. In addition, the **Contractor** and **Subcontractor(s)** shall furnish to the **Engineer** upon written demand any other information to satisfy the **Engineer** that this Chapter VIII and the Labor Law, as to the hours of employment and rates of wages, are being observed. The **Contractor** shall maintain the payrolls or transcripts thereof for six (6) years from the date of completion of the **Work** on this **Contract**.

38.2 When directed by the **Engineer**, the **Contractor** or **Subcontractor** shall provide the **Engineer** with an attendance sheet for each **Day** on which **Work** is performed on the **Site**. Such attendance sheet shall be in a form acceptable to the **Agency** and shall provide information for employees of the **Contractor** and **Subcontractor(s)**.

### **ARTICLE 39. DUST HAZARDS**

39.1 Should a harmful dust hazard be created in performing the **Work** of this **Contract**, for the elimination of which appliances or methods have been approved by the Board of Standards and Appeals of the City of New York, such appliances and methods shall be installed, maintained, and effectively operated during the continuance of such harmful dust hazard. Failure to comply with this provision after notice shall make this **Contract** void.

## **CHAPTER IX PARTIAL AND FINAL PAYMENTS**

### **ARTICLE 40. CONTRACT PRICE**

40.1 The City shall pay, and the Contractor agrees to accept, in full consideration for the Contractor's performance of the **Work** subject to the terms and conditions hereof, the lump sum price or unit prices which this **Contract** was awarded, plus the amount required to be paid for any **Extra Work** ordered by the Commissioner under Article 25, less credit for any **Work** omitted pursuant to Article 29.

### **ARTICLE 41. BID BREAKDOWN ON LUMP SUM**

41.1 Within fifteen (15) Days after the commencement date specified in the Notice to Proceed, unless otherwise directed by the **Resident Engineer**, the Contractor shall submit to the **Resident Engineer** a breakdown of its bid price, or of lump sums bid for items of the **Contract**, showing the various operations to be performed under the **Contract**, as directed in the progress schedule required under Article 9, and the value of each of such operations, the total of such items to equal the lump sum price bid. Said breakdown must be approved in writing by the **Resident Engineer**.

41.2 No partial payment will be approved until the Contractor submits a bid breakdown that is acceptable to the **Resident Engineer**.

41.3 The Contractor shall also submit such other information relating to the bid breakdown as directed by the **Resident Engineer**. Thereafter, the breakdown may be used only for checking the Contractor's applications for partial payments hereunder, but shall not be binding upon the City, the Commissioner, or the Engineer for any purpose whatsoever.

### **ARTICLE 42. PARTIAL PAYMENTS**

42.1 From time to time as the **Work** progresses satisfactorily, but not more often than once a month, the Contractor may submit to the Engineer a requisition for a partial payment in the prescribed form, which shall contain an estimate of the quantity and the fair value of the **Work** done during the payment period.

42.2 Partial payments may be made for materials, fixtures and equipment in advance of their actual incorporation in the **Work**, as the Commissioner may approve, and upon the terms and conditions set forth in the General Conditions.

42.3 The Contractor shall also submit to the Commissioner in connection with every application for partial payment a verified statement in the form prescribed by the Comptroller setting forth the information required under Labor Law Section 220-a.

42.4 Within thirty (30) Days after receipt of such satisfactory payment application, the **Engineer** will prepare and certify, and the **Commissioner** will approve, a voucher for a partial payment in the amount of such approved estimate, less any and all deductions authorized to be made by the **Commissioner** under the terms of this **Contract** or by **Law**.

#### **ARTICLE 43. PROMPT PAYMENT**

43.1 The Prompt Payment provisions of the PPB Rules in effect at the time of the Bid will be applicable to payments made under this **Contract**. The provisions require the payment to **Contractor** of interest on payments made after the required payment date, except as set forth in the PPB Rules.

43.2 The **Contractor** shall submit a proper invoice to receive payment, except where the **Contract** provides that the **Contractor** will be paid at predetermined intervals without having to submit an invoice for each scheduled payment.

43.3 Determination of interest due will be made in accordance with the PPB Rules.

43.4 If the **Contractor** is paid interest, the proportionate share of that interest shall be forwarded by the **Contractor** to its **Subcontractor(s)**.

43.5 The **Contractor** shall pay each **Subcontractor** or **Materialman** not later than seven (7) Days after receipt of payment out of amounts paid to the **Contractor** by the **City** for **Work** performed by the **Subcontractor** or **Materialman** under this **Contract**.

43.5.1 If **Contractor** fails to make any payment to any **Subcontractor** or **Materialman** within seven (7) days after receipt of payment by the **City** pursuant to section 43.5 herein, then the **Contractor** shall pay interest on amounts due to such **Subcontractor** or **Materialman** at a rate of interest in effect on the date such payment is made by the **Contractor** computed in accordance with section 756-b (1)(b) of the NY General Business Law. Accrual of interest shall commence on the day immediately following the expiration of the seventh day following receipt of payment to the **Contractor** by the **City** and shall end on the date on which payment is made.

43.6 The **Contractor** shall include in each of its subcontracts a provision requiring each **Subcontractor** to make payment to each of its **Subcontractors** or suppliers for **Work** performed under this **Contract** in the same manner and within the same time period set forth above.

#### **ARTICLE 44. SUBSTANTIAL COMPLETION PAYMENT**

44.1 When the **Work** in the opinion of the **Commissioner**, has been substantially but not entirely completed, he/she shall issue a certificate of **Substantial Completion**.

44.2 The **Contractor** shall submit with the **Substantial Completion** requisition:

44.2.1 A Final Verified Statement of any and all alleged claims against the **City** and any pending dispute resolution procedures in accord with the PPB Rules and this **Contract**, in any way connected with or arising out of this **Contract** (including those as to which details may have been furnished pursuant to Articles 11, 27, 28, and 30) setting forth with respect to each such claim the total amount thereof, the various items of labor and materials included therein, and the alleged value of each item; and if the alleged claim be one for delay, the alleged cause of each such delay, the period or periods of time, giving the dates when the **Contractor** claims the performance of the **Work** or a particular

part thereof was delayed, and an itemized statement and breakdown of the amount claimed for each such delay.

44.2.1(a) With respect to each such claim, the **Commissioner**, the **Comptroller** and, in the event of litigation, the Corporation Counsel of the City shall have the same right to inspect, and to make extracts or copies of, the **Contractor's** books, vouchers, records, etc., as is referred to in Articles 11, 27, 28, and 30. Nothing contained in this article is intended to or shall relieve the **Contractor** from the obligation of complying strictly with Articles 11, 27, 28, and 30. The **Contractor** is warned that unless such claims are completely set forth as herein required, the **Contractor** upon acceptance of the **Substantial Completion** payment pursuant to this article, will have waived any such claims.

**44.2.2 A Final Approved Punch List.**

44.2.3 Where required, a request for a substantial or final extension of time.

44.3 The **Commissioner** shall issue a voucher calling for payment of any part or all of the balance due for **Work** performed under the **Contract**, including monies retained under Article 21, less any and all deductions authorized to be made by the **Commissioner**, under this **Contract** or by **Law**, and less twice the amount the **Commissioner** considers necessary to ensure the completion of the balance of the **Work** by the **Contractor**. Such a payment shall be considered a Partial and not a Final Payment. No **Substantial Completion** payment shall be made under this article where the **Contractor** shall fail to complete the **Work** within the time fixed for such completion in the Schedule A of the General Conditions, or within the time to which completion may have been extended, until an extension or extensions of time for the completion of **Work** have been acted upon pursuant to Article 13.

44.4 No further partial payments shall be made to the **Contractor** after the **Commissioner** issues a Certificate of **Substantial Completion**, except the **Substantial Completion** payment and **Contractor's** requisition that were properly filed with the **Commissioner** prior to the date of **Substantial Completion**; however, the **Commissioner** may grant a waiver for further partial payments after the date of **Substantial Completion** to permit payments for change order **Work** and/or release of retainage and deposits pursuant to Articles 21 and 24. Such waiver shall be in writing.

44.5 The **Contractor** acknowledges that nothing contained in this article is intended to or shall in any way diminish the force and effect of Article 13.

#### **ARTICLE 45. FINAL PAYMENT**

45.1 After completion and **Final Acceptance** of the **Work**, the **Contractor** shall submit all required certificates and documents, together with a requisition for the balance claimed to be due under the **Contract**, less the amount authorized to be retained for maintenance under Article 24. A verified statement similar to that required in connection with applications for partial payments shall also be submitted to the **Commissioner**.

45.2 Amended Verified Statement of Claims: The **Contractor** shall also submit with the final requisition any amendments to the final verified statement of any and all alleged claims against the City, and any pending dispute resolution procedures in accord with the PPB Rules and this **Contract**, in any way connected with or arising out of this **Contract** (including those as to which details may have been furnished pursuant to Articles 11, 27, 28, and 30.) that have occurred subsequent to **Substantial Completion**, setting forth with respect to each such claim the total amount thereof, the various items of labor and materials included therein, and the alleged value of each such item; and if the alleged claim be one for delay, the alleged cause of each such delay, the period or periods of time, giving the dates when the **Contractor** claims the performance of the **Work** or a particular part thereof was

delayed, and an itemized statement and breakdown of the amount claimed for each such delay. With reference to each such claim, the **Commissioner**, the **Comptroller** and, in the event of litigation, the Corporation Counsel of the **City** shall have the same right to inspect, and to make extracts or copies of, the **Contractor's** books, vouchers, records, etc., as is referred to in Articles 11, 27, 28, and 30. Nothing contained in this article, is entitled to or shall relieve the **Contractor** from the obligation of complying strictly with Articles 11, 27, 28, and 30. The **Contractor** is warned that unless such claims are completely set forth as herein required, the **Contractor**, upon acceptance of the Final Payment pursuant to Article 46, will have waived any such claims.

45.3 Preparation of Final Voucher: Upon determining the balance due hereunder other than on account of claims, the **Engineer** will prepare and certify, for the **Commissioner's** approval, a voucher for final payment in that amount less any and all deductions authorized to be made by the **Commissioner** under this **Contract** or by **Law**. In the case of a lump sum **Contract**, the **Commissioner** shall certify the voucher for final payment within thirty (30) Days from the date of completion and acceptance of the **Work**, provided all requests for extensions of time have been acted upon.

45.3.1 All prior certificates and vouchers upon which partial payments were made, being merely estimates made to enable the **Contractor** to prosecute the **Work** more advantageously, shall be subject to correction in the final voucher, and the certification of the **Engineer** thereon and the approval of the **Commissioner** thereof, shall be conditions precedent to the right of the **Contractor** to receive any money hereunder. Such final voucher shall be binding and conclusive upon the **Contractor**.

45.3.2 Payment pursuant to such final voucher, less any deductions authorized to be made by the **Commissioner** under this **Contract** or by **Law**, shall constitute the final payment, and shall be made by the **Comptroller** within thirty (30) Days after the filing of such voucher in his/her office.

45.4 The **Contractor** acknowledges that nothing contained in this article is intended to or shall in any way diminish the force and effect of Article 13.

#### **ARTICLE 46. ACCEPTANCE OF FINAL PAYMENT**

46.1 The acceptance by the **Contractor**, or by anyone claiming by or through it, of the final payment, whether such payment be made pursuant to any judgment of any Court, or otherwise, shall constitute and operate as a release to the **City** from any and all claims of and liability to the **Contractor** for anything heretofore done or furnished for the **Contractor** relating to or arising out of this **Contract** and the **Work** done hereunder, and for any prior act, neglect or default on the part of the **City** or any of its officers, agents or employees, excepting only a claim against the **City** for the amounts deducted or retained in accordance with the terms and provisions of this **Contract** or by **Law**, and excepting any claims, not otherwise waived, or any pending dispute resolution procedures which are contained in the verified statement filed with the **Contractor's** substantial and final requisitions pursuant to Articles 44 and 45.

46.2 The **Contractor** is warned that the execution by it of a release, in connection with the acceptance of the final payment, containing language purporting to reserve claims other than those herein specifically excepted from the operation of this article, or those for amounts deducted by the **Commissioner** from the final requisition or by the **Comptroller** from the final payment as certified by the **Engineer** and approved by the **Commissioner**, shall not be effective to reserve such claims, anything stated to the **Contractor** orally or in writing by any officer, agent or employee of the **City** to the contrary notwithstanding.

46.3 Should the **Contractor** refuse to accept the final payment as tendered by the **Comptroller**, it shall constitute a waiver of any right to interest thereon.

46.4 The Contractor, however, shall not be barred from commencing an action for breach of Contract under this provision to the extent permitted by Law and by the terms of the Contract provided that a detailed and verified statement of claim is served upon the contracting Agency and Comptroller not later than forty (40) Days after the mailing of such final payment. The statement shall specify the items upon which the claim will be based and any such claim shall be limited to such items.

#### **ARTICLE 47. APPROVAL BY PUBLIC DESIGN COMMISSION**

47.1 All works of art, including paintings, mural decorations, stained glass, statues, bas-reliefs and other sculptures, monuments, fountains, arches, and other structures of a permanent character intended for ornament or commemoration, and every design of the same to be used in the performance of this Contract, and the design of all bridges, approaches, buildings, gates, fences, lamps, or structures to be erected, pursuant to the terms of this Contract, shall be submitted to the Art Commission, d/b/a the Public Design Commission of the City of New York, and shall be approved by the Public Design Commission prior to the erection or placing in the position of the same. The final payment shall not become due or payable under this Contract unless and until the Public Design Commission shall certify that the design for the Work herein contracted for has been approved by the said Public Design Commission, and that the same has been executed in substantial accordance with the design so approved, pursuant to the provisions of Chapter 37, Section 854 of the City Charter, as amended.

### **CHAPTER X CONTRACTOR'S DEFAULT**

#### **ARTICLE 48. COMMISSIONER'S RIGHT TO DECLARE CONTRACTOR IN DEFAULT**

48.1 In addition to those instances specifically referred to in other Articles herein, the Commissioner shall have the right to declare the Contractor in default of this Contract if:

48.1.1 The Contractor fails to commence Work when notified to do so by the Commissioner; or if

48.1.2 The Contractor shall abandon the Work; or if

48.1.3 The Contractor shall refuse to proceed with the Work when and as directed by the Commissioner; or if

48.1.4 The Contractor shall, without just cause, reduce its working force to a number which, if maintained, would be insufficient, in the opinion of the Commissioner, to complete the Work in accordance with the Progress Schedule; or if

48.1.5 The Contractor shall fail or refuse to increase sufficiently such working force when ordered to do so by the Commissioner; or if

48.1.6 The Contractor shall sublet, assign, transfer, convert or otherwise dispose of this Contract other than as herein specified; or sell or assign a majority interest in the Contractor; or if

48.1.7 The Contractor fails to secure and maintain all required insurance; or if

48.1.8 A receiver or receivers are appointed to take charge of the Contractor's property or affairs; or if

48.1.9 The **Commissioner** shall be of the opinion that the **Contractor** is or has been unnecessarily or unreasonably or willfully delaying the performance and completion of the **Work**, or the award of necessary subcontracts, or the placing of necessary material and equipment orders; or if

48.1.10 The **Commissioner** shall be of the opinion that the **Contractor** is or has been willfully or in bad faith violating any of the provisions of this **Contract**; or if

48.1.11 The **Commissioner** shall be of the opinion that the **Work** cannot be completed within the time herein provided therefor or within the time to which such completion may have been extended; provided, however, that the impossibility of timely completion is, in the **Commissioner's** opinion, attributable to conditions within the **Contractor's** control; or if

48.1.12 The **Work** is not completed within the time herein provided therefor or within the time to which the **Contractor** may be entitled to have such completion extended; or if

48.1.13 Any statement or representation of the **Contractor** in the **Contract** or in any document submitted by the **Contractor** with respect to the **Work**, the **Project**, or the **Contract** (or for purposes of securing the **Contract**) was untrue or incorrect when made.

48.1.14 The **Contractor** or any of its officers, directors, partners, five (5%) percent shareholders, principals, or other persons substantially involved in its activities, commits any of the acts or omissions specified as the grounds for debarment in the **PPB Rules**.

48.2 Before the **Commissioner** shall exercise his/her right to declare the **Contractor** in default, the **Commissioner** shall give the **Contractor** an opportunity to be heard, upon not less than two (2) **Days** notice.

#### **ARTICLE 49. EXERCISE OF THE RIGHT TO DECLARE DEFAULT**

49.1 The right to declare in default for any of the grounds specified or referred to in Article 48 shall be exercised by sending the **Contractor** a notice, signed by the **Commissioner**, setting forth the ground or grounds upon which such default is declared (hereinafter referred to as a "Notice of Default").

49.2 The **Commissioner's** determination that the **Contractor** is in default shall be conclusive, final and binding on the parties and such a finding shall preclude the **Contractor** from commencing a plenary action for any damages relating to the **Contract**. If the **Contractor** protests the determination of the **Commissioner**, the **Contractor** may commence a lawsuit in a court of competent jurisdiction of the State of New York under Article 78 of the New York Civil Practice Law and Rules.

#### **ARTICLE 50. QUITTING THE SITE**

50.1 Upon receipt of such notice the **Contractor** shall immediately discontinue all further operations under this **Contract** and shall immediately quit the **Site**, leaving untouched all plant, materials, equipment, tools and supplies then on the **Site**.

#### **ARTICLE 51. COMPLETION OF THE WORK**

51.1 The **Commissioner**, after declaring the **Contractor** in default, may then have the **Work** completed by such means and in such manner, by **Contract** with or without public letting, or otherwise, as he/she may deem advisable, utilizing for such purpose such of the **Contractor's** plant, materials, equipment, tools and supplies remaining on the **Site**, and also such **Subcontractors**, as he/she may deem advisable.

51.2 After such completion, the **Commissioner** shall make a certificate stating the expense incurred in such completion, which shall include the cost of re-letting and also the total amount of liquidated damages (at the rate provided for in the **Contract**) from the date when the **Work** should have been completed by the **Contractor** in accordance with the terms hereof to the date of actual completion of the **Work**. Such certificate shall be binding and conclusive upon the **Contractor**, its Sureties, and any person claiming under the **Contractor**, as to the amount thereof.

51.3 The expense of such completion, including any and all related and incidental costs, as so certified by the **Commissioner**, and any liquidated damages assessed against the **Contractor**, shall be charged against and deducted out of monies which are earned by the **Contractor** prior to the date of default. Should the expense of such completion, as certified by the **Commissioner**, exceed the total sum which would have been payable under the **Contract** if it had been completed by the **Contractor**, any excess shall be paid by the **Contractor**.

#### **ARTICLE 52. PARTIAL DEFAULT**

52.1 In case the **Commissioner** shall declare the **Contractor** in default as to a part of the **Work** only, the **Contractor** shall discontinue such part, shall continue performing the remainder of the **Work** in strict conformity with the terms of this **Contract**, and shall in no way hinder or interfere with any **Other Contractor(s)** or persons whom the **Commissioner** may engage to complete the **Work** as to which the **Contractor** was declared in default.

52.2 The provisions of this Chapter relating to declaring the **Contractor** in default as to the entire **Work** shall be equally applicable to a declaration of partial default, except that the **Commissioner** shall be entitled to utilize for completion of the part of the **Work** as to which the **Contractor** was declared in default only such plant, materials, equipment, tools and supplies as had been previously used by the **Contractor** on such part.

#### **ARTICLE 53. PERFORMANCE OF UNCOMPLETED WORK**

53.1 In completing the whole or any part of the **Work** under the provision of this Chapter X, the **Commissioner** shall have the power to depart from or change or vary the terms and provisions of this **Contract**, provided, however, that such departure, change or variation is made for the purpose of reducing the time or expense of such completion. Such departure, change or variation, even to the extent of accepting a lesser or different performance, shall not affect the conclusiveness of the **Commissioner's** certificate of the cost of completion referred to in Article 51, nor shall it constitute a defense to an action to recover the amount by which such certificate exceeds the amount which would have been payable to the **Contractor** hereunder but for its default.

#### **ARTICLE 54. OTHER REMEDIES**

54.1 In addition to the right to declare the **Contractor** in default pursuant to this Chapter X, the **Commissioner** shall have the absolute right, in his/her sole discretion and without a hearing, to complete or cause to complete in the same manner as described in Articles 51 and 53, any or all unsatisfactory or uncompleted punch list **Work** that remains after the completion date specified in the Final Approved Punch List. A written notice of the exercise of this right shall be sent to the **Contractor** who shall immediately quit the **Site** in accordance with the provisions of Article 50.

54.2 The previous provisions of this Chapter X shall be in addition to any and all other legal or equitable remedies permissible in the premises.

54.3 The exercise by the **City** of any remedy set forth herein shall not be deemed a waiver by the **City** of any other legal or equitable remedy contained in this **Contract** or provided under **Law**.

54.4 The expense of such completion, including any and all related and incidental costs, as so certified by the **Commissioner**, shall be charged against and deducted out of monies which have been earned by the **Contractor** prior to the date of the exercise of the right set forth in Article 54.1; the balance of such monies, if any, subject to the other provisions of this **Contract**, to be paid to the **Contractor** without interest after such completion. Should the expense of such completion, as certified by the **Commissioner**, exceed the total sum which would have been payable under the **Contract** if it had been completed by the **Contractor**, any excess shall be paid by the **Contractor**.

## **CHAPTER XI MISCELLANEOUS PROVISIONS**

### **ARTICLE 55. CONTRACTOR'S WARRANTIES**

55.1 In consideration of, and to induce, the award of this **Contract** to the **Contractor**, the **Contractor** represents and warrants:

55.1.1 That it is financially solvent, sufficiently experienced and competent to perform the **Work**; and

55.1.2 That the facts stated in its bid and the information given by it pursuant to the Information for Bidders is true and correct in all respects; and

55.1.3 That it has read and complied with all requirements set forth in the **Contract**.

### **ARTICLE 56. CLAIMS AND ACTIONS THEREON**

56.1 Any claim, that is not subject to dispute resolution under the **PPB Rules** or this **Contract**, against the **City** for damages for breach of **Contract** shall not be made or asserted in any lawsuit, unless the **Contractor** shall have strictly complied with all requirements relating to the giving of notice and of information with respect to such claims, as herein before provided.

56.2 Nor shall any lawsuit be instituted or maintained on any such claims unless such lawsuit is commenced within six (6) months after the date the **Commissioner** issues a Certificate of **Substantial Completion** pursuant to Article 44; except that:

56.2.1 Any claims arising out of events occurring after the date the **Commissioner** issues a Certificate of **Substantial Completion** and before **Final Acceptance** of the **Work** shall be asserted within six (6) months of **Final Acceptance** of the **Work**;

56.2.2 Any claims for monies deducted, retained or withheld under the provisions of this **Contract** shall be asserted within six (6) months after the date when such monies becomes due and payable hereunder; and

56.2.3 If the **Commissioner** exercises his/her right to terminate the **Contract** pursuant to Article 64, any such lawsuit shall be commenced within six (6) months of the date the **Commissioner** exercises said right.

## **ARTICLE 57. INFRINGEMENT**

57.1 The **Contractor** shall be solely responsible for and shall indemnify the **City** against any and all claims and judgments for damages for any infringement of copyright and patents or use of patented articles, tools, materials, equipment, appliances or processes in the performance or completion of the **Work**, including all costs and expenses which the **City** shall or may incur or be obligated to pay by reason thereof.

## **ARTICLE 58. NO CLAIM AGAINST OFFICERS, AGENTS OR EMPLOYEES**

58.1 No claim whatsoever shall be made by the **Contractor** against any officer, agent or employee of the **City** for, or on account of, anything done or omitted to be done in connection with this **Contract**.

## **ARTICLE 59. SERVICES OF NOTICES**

59.1 The **Contractor** hereby designates the business address specified in its bid, as the place where all notices, directions or other communications to the **Contractor** may be delivered, or to which they may be mailed. Actual delivery of any such notice, direction or communication to the aforesaid place, or depositing it in a postpaid wrapper addressed thereto in any post office box (P.O. Box) regularly maintained by the United States Postal Service, shall be conclusively deemed to be sufficient service thereof upon the **Contractor** as the date of such delivery or deposit.

59.2 Such address may be changed at any time by an instrument in writing, executed and acknowledged by the **Contractor**, and delivered to the **Commissioner**.

59.3 Nothing herein contained shall, however, be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the **Contractor** personally, or, if the **Contractor** is a corporation, upon any officer thereof.

## **ARTICLE 60. UNLAWFUL PROVISIONS DEEMED STRICKEN FROM CONTRACT**

60.1 If this **Contract** contains any unlawful provision not an essential part of the **Contract** and which shall not appear to have been a controlling or material inducement to the making thereof, the same shall be deemed of no effect and shall, upon notice by either party, be deemed stricken from the **Contract** without affecting the binding force of the remainder.

## **ARTICLE 61. ALL LEGAL PROVISIONS DEEMED INCLUDED**

61.1 It is the intent and understanding of the parties to this **Contract** that each and every provision of Law required to be inserted in this **Contract** shall be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein, and if, through mistake or otherwise, any such provision is not inserted, or is not inserted in correct form, then this **Contract** shall forthwith upon the application of either party be amended by such insertion so as to comply strictly with the Law and without prejudice to the rights of either party hereunder.

## **ARTICLE 62. TAX EXEMPTION**

62.1 The **City** is exempt from payment of Federal, State, local taxes and Sales and Compensation Use Taxes of the State of New York and of cities and counties on all materials and supplies sold to the **City** pursuant to

the provisions of this **Contract**. These taxes are not to be included in bids. However, this exemption does not apply to tools, machinery, equipment or other property leased by or to the **Contractor** or a **Subcontractor**, or to supplies and materials which even though they are consumed, are not incorporated into the completed **Work** (consumable supplies), and the **Contractor** and its **Subcontractors** shall be responsible for and pay any and all applicable taxes, including Sales and Compensation Use Taxes, on such leased tools, machinery, equipment or other property and upon all such unincorporated supplies and materials.

62.2 The **Contractor** agrees to sell and the **City** agrees to purchase all supplies and materials, other than consumable supplies, required, necessary or proper for or incidental to the construction of the **Project** covered by this **Contract**. The sum paid under this **Contract** for such supplies and materials shall be in full payment and consideration for the sale of such supplies and materials herein.

62.2.1 The **Contractor** agrees to construct the **Project** and to perform all **Work**, labor and services rendered, necessary, proper or incidental thereto for the sum shown in the bid for the performance of such **Work**, labor and services, and the sum so paid pursuant to this **Contract** for such **Work**, labor, etc., shall be in full consideration for the performance by the **Contractor** of all its duties and obligations under this **Contract** in connection with said **Work** and labor.

62.3 The purchase by the **Contractor** of the supplies and materials sold hereunder shall be a purchase or procurement for resale and therefore not subject to the New York State or **City** Sales or Compensation Use Taxes or any such taxes of cities or counties. The sale of such supplies and materials by the **Contractor** to the **City** is exempt from the aforesaid sales or compensating use taxes. With respect to such supplies and materials, the **Contractor**, at the request of the **City**, shall furnish to the **City** such Bills of Sale and other instruments as may be required by the **City**, properly executed, acknowledged and delivered assuring to the **City** title to such supplies and materials, free of liens and/or encumbrances, and the **Contractor** shall mark or otherwise identify all such materials as the property of the **City**.

62.4 Title to all materials to be sold by the **Contractor** to the **City** pursuant to the provisions of the **Contract** shall immediately vest in and become the sole property of the **City** upon delivery of such supplies and materials to the **Site** and prior to its becoming a part of the permanent structure and/or construction. Notwithstanding such transfer of title, the **Contractor** shall have the full and continuing responsibility to install such materials and supplies in accordance with the provisions of this **Contract**, protect them, maintain them in a proper condition and forthwith repair, replace and make good any damage thereto, theft or disappearance thereof, and furnish additional materials in place of any that may be lost, stolen or rendered unusable, without cost to the **City**, until such time as the **Work** covered by the **Contract** is fully accepted by the **City**. Such transfer of title shall in no way affect any of the **Contractor's** obligations hereunder. In the event that, after title has passed to the **City**, any of such supplies and materials are rejected as being defective or otherwise unsatisfactory, title to all such supplies and materials shall be deemed to have been transferred back to the **Contractor**.

62.5 The purchase by **Subcontractors** of supplies and materials to be sold hereunder shall also be a purchase or procurement for resale to the **Contractor** (either directly or through other **Subcontractors**) and therefore not subject to the aforesaid Sales or Compensation Use Taxes, provided that the subcontract agreements provide for the resale of such supplies and materials prior to and separate and apart from the incorporation of such supplies and materials into the permanent structure and/or construction and that such subcontract agreements are in a form similar to this **Contract** with respect to the separation of the sale of materials from the **Work** and labor, services, consumable supplies and any other matters to be provided, and provided further that the subcontract agreements provide separate prices for materials and all other services and matters. Such separation shall actually be followed in practice, including the separation of payments for supplies and materials from the payments for other **Work** and labor and other things to be provided.

62.6 The **Contractor** and its **Subcontractors** and Materialmen shall obtain any and all necessary **Contractor** Exempt Purchase Certificates or Resale Certificates from the appropriate governmental **Agency** or

Agencies, and furnish a **Contractor Exempt Purchase Certificate** or **Resale Certificate** to all persons, firms or corporations from which they purchase supplies and materials for the performance of the **Work** covered by this **Contract**.

62.7 In the event any of the provisions of this article shall be deemed to be in conflict with any other provisions of this **Contract** or create any ambiguity, then the provisions of this article shall control.

### **ARTICLE 63. INVESTIGATION(S) CLAUSE**

63.1 The parties to this **Contract** agree to cooperate fully and faithfully with any investigation, audit or inquiry conducted by a United States, a State of New York (State) or a City governmental **Agency** or authority that is empowered directly or by designation to compel the attendance of witnesses and to examine witnesses under oath, or conducted by the Inspector General of a governmental **Agency** that is a party in interest to the transaction, submitted bid, submitted proposal, **Contract**, lease, permit or license that is the subject of the investigation, audit or inquiry.

63.2 If any person who has been advised that his/her statement, and any information from such statement, will not be used against him/her in any subsequent criminal proceeding refuses to testify before a grand jury or other governmental **Agency** or authority empowered directly or by designation to compel the attendance of witnesses and to examine witnesses under oath concerning the award of or performance under any transaction, agreement, lease, permit, **Contract**, or license entered into with the City, the State, or any political subdivision or public authority thereof, or the Port Authority of New York and New Jersey, or any local development corporation within the City, or any public benefit corporation organized under the **Laws** of the State of New York, or;

63.3 If any person refuses to testify for a reason other than the assertion of his/her privilege against self incrimination in an investigation, audit or inquiry conducted by a City or State governmental **Agency** or authority empowered directly or by designation to compel the attendance of witnesses and to take testimony under oath, or by the Inspector General of the governmental **Agency** that is a party in interest in, and is seeking testimony concerning the award of, or performance under any transaction, agreement, lease, permit, **Contract**, or license entered into with the City, the State, or any political subdivision thereof or any local development corporation within the City, then;

63.4 The **Commissioner** whose **Agency** is a party in interest to the transaction, submitted bid, submitted proposal, **Contract**, lease, permit, or license shall convene a hearing, upon not less than five (5) days written notice to the parties involved to determine if any penalties should attach for the failure of a person to testify.

63.5 If any non-governmental party to the hearing requests an adjournment, the **Commissioner** who convened the hearing may, upon granting the adjournment, suspend any **Contract**, lease, permit, or license, pending the final determination pursuant to Article 63.7 without the City incurring any penalty or damages for delay or otherwise.

63.6 The penalties which may attach after a final determination by the **Commissioner** may include but shall not exceed:

63.6.1 The disqualification for a period not to exceed five (5) years from the date of an adverse determination for any person, or any entity of which such person was a member at the time the testimony was sought, from submitting bids for, or transacting business with, or entering into or obtaining any **Contract**, lease, permit or license with or from the City; and/or

63.6.2 The cancellation or termination of any and all such existing **City Contracts**, leases, permits or licenses that the refusal to testify concerns and that have not been assigned as permitted under this **Agreement**, nor the proceeds of which pledged, to an unaffiliated and unrelated institutional lender for fair value prior to the issuance of the notice scheduling the hearing, without the **City** incurring any penalty or damages on account of such cancellation or termination; monies lawfully due for goods delivered, **Work** done, rentals, or fees accrued prior to the cancellation or termination shall be paid by the **City**.

63.7 The **Commissioner** shall consider and address in reaching his/her determination and in assessing an appropriate penalty the factors in Articles 63.7.1 and 63.7.2. The **Commissioner** may also consider, if relevant and appropriate, the criteria established in Articles 63.7.3 and 63.7.4, in addition to any other information which may be relevant and appropriate:

63.7.1 The party's good faith endeavors or lack thereof to cooperate fully and faithfully with any governmental investigation or audit, including but not limited to the discipline, discharge, or disassociation of any person failing to testify, the production of accurate and complete books and records, and the forthcoming testimony of all other members, agents, assignees or fiduciaries whose testimony is sought.

63.7.2 The relationship of the person who refused to testify to any entity that is a party to the hearing, including but not limited to, whether the person whose testimony is sought has an ownership interest in the entity and/or the degree of authority and responsibility the person has within the entity.

63.7.3 The nexus of the testimony sought to the subject entity and its **Contracts**, leases, permits or licenses with the **City**.

63.7.4 The effect a penalty may have on an unaffiliated and unrelated party or entity that has a significant interest in an entity subject to penalties under Article 63.6, provided that the party or entity has given actual notice to the **Commissioner** upon the acquisition of the interest, or at the hearing called for in Article 63.4, gives notice and proves that such interest was previously acquired. Under either circumstance the party or entity shall present evidence at the hearing demonstrating the potential adverse impact a penalty will have on such person or entity.

#### 63.8 Definitions:

63.8.1 The term "license" or "permit" as used herein shall be defined as a license, permit, franchise or concession not granted as a matter of right.

63.8.2 The term "person" as used herein shall be defined as any natural person doing business alone or associated with another person or entity as a partner, director, officer, principal or employee.

63.8.3 The term "entity" as used herein shall be defined as any firm, partnership, corporation, association, joint venture, or person that receives monies, benefits, licenses, leases, or permits from or through the **City** or otherwise transacts business with the **City**.

63.8.4 The term "member" as used herein shall be defined as any person associated with another person or entity as a partner, director, officer, principal or employee.

63.9 In addition to and notwithstanding any other provision of this **Contract**, the **Commissioner** may in his/her sole discretion terminate this **Contract** upon not less than three (3) **Days** written notice in the event the

**Contractor** fails to promptly report in writing to the **Commissioner** of the Department of Investigations ("DOI") of the **City** any solicitation of money, goods, requests for future employment or other benefit or thing of value, by or on behalf of any employee of the **City** or other person, firm, corporation or entity for any purpose which may be related to the procurement or obtaining of this **Contract** by the **Contractor**, or affecting the performance of this **Contract**.

#### **ARTICLE 64. TERMINATION BY THE CITY**

64.1 In addition to termination pursuant to any other article of this **Contract**, the **Commissioner** may, at any time, terminate this **Contract** by written notice to the **Contractor**. In the event of termination, the **Contractor** shall, upon receipt of such notice, unless otherwise directed by the **Commissioner**:

64.1.1 Stop **Work** on the date specified in the notice;

64.1.2 Take such action as may be necessary for the protection and preservation of the **City's** materials and property;

64.1.3 Cancel all cancelable orders for material and equipment;

64.1.4 Assign to the **City** and deliver to the **Site** or another location designated by the **Commissioner**, any non-cancelable orders for material and equipment that is not capable of use except in the performance of this **Contract** and has been specifically fabricated for the sole purpose of this **Contract** and not incorporated in the **Work**;

64.1.5 Take no action which will increase the amounts payable by the **City** under this **Contract**.

64.2 In the event of termination by the **City** pursuant to this article, payment to the **Contractor** shall be in accordance with Articles 64.2.1, 64.2.2 or 64.2.3, to the extent that each respective article applies.

64.2.1 Lump Sum Contracts or Items: On all lump sum **Contracts**, or on lump sum items in a **Contract**, the **City** will pay the **Contractor** the sum of Articles 64.2.1(a) and 64.2.1(b), less all payments previously made pursuant to this **Contract**. On lump sum **Contracts** only, the **City** will also pay the **Contractor** an additional sum as provided in 64.2.1(c).

64.2.1(a) For **Work** completed prior to the notice of termination, the **Contractor** shall be paid a pro rata portion of the lump sum bid amount, plus approved change orders, based upon the percent completion of the **Work**, as determined by the **Commissioner**. For the purpose of determining the pro rata portion of the lump sum bid amount to which the **Contractor** is entitled, the Bid Breakdown submitted in accordance with Article 41 shall be considered, but shall not be dispositive. The **Commissioner's** determination hereunder shall be final, binding and conclusive.

64.2.1(b) For non-cancelable material and equipment, less salvage value, that is not capable of use except in the performance of this **Contract** and has been specifically fabricated for the sole purpose of this **Contract**, but not yet incorporated in the **Work**, the **Contractor** shall be paid the lesser of:

64.2.1(b)(i) The direct cost, as defined in Article 64.2.4; or

64.2.1(b)(ii) The fair and reasonable value, whichever is less, of such material and equipment, plus necessary and reasonable delivery costs.

64.2.1(b)(iii) In addition, the **Contractor** shall be paid five (5%) percent of Article 64.2.1(b)(i) or Article 64.2.1(b)(ii), whichever applies.

64.2.1(c) Except as otherwise provided in Article 64.2.1(d), on all lump sum **Contracts**, the **Contractor** shall be paid the percentage indicated below applied to the difference between the total lump sum bid amount and the total of all payments made prior to the notice of termination plus all payments allowed pursuant to Articles 64.2.1(a) and 64.2.1(b):

64.2.1(c)(i) Five (5%) percent of the first five million (\$5,000,000.) dollars; and

64.2.1(c)(ii) Three (3%) percent of any amount between five million (\$5,000,000.) dollars and fifteen million (\$15,000,000.) dollars; plus

64.2.1(c)(iii) One (1%) percent of any amount over fifteen million (\$15,000,000.) dollars.

64.2.1(d) In the event the City terminates a lump sum **Contract** pursuant to this article within ninety (90) days after registration of the **Contract** with the **Comptroller**, the **Contractor** shall be paid one (1%) percent of the difference between the lump sum bid amount and the total of all payments made pursuant to this article.

64.2.2 Unit Price Contracts or Items: On all unit price **Contracts**, or on unit price items in a **Contract**, the City will pay the **Contractor** the sum of Articles 64.2.2(a) and 64.2.2(b), less all payments previously made pursuant to this **Contract**:

64.2.2(a) For all completed units, the unit price stated in the **Contract**, and

64.2.2(b) For units that have been ordered but are only partially completed, the **Contractor** will be paid:

64.2.2(b)(i) A pro rata portion of the unit price stated in the **Contract** based upon the percent completion of the unit and

64.2.2(b)(ii) For non-cancelable material and equipment, payment will be made pursuant to Article 64.2.1(b).

64.2.3 Time and Material Contracts or Items: On all **Contracts** or items in a **Contract** where time and material records are specified as the basis for payment of the **Work**, the **Contractor** shall be paid in accordance with Article 26, less all payments previously made pursuant to this **Contract**.

64.2.4 Direct Costs: Direct Costs as used in this article shall mean:

64.2.4(a) The actual purchase price of material and equipment, plus necessary and reasonable delivery costs,

64.2.4(b) The actual cost of labor involved in construction and installation at the Site, and

64.2.4(c) The actual cost of necessary bonds and insurance purchased pursuant to requirements of this **Contract** less any amounts that have been or should be refunded by the **Contractor's** sureties or insurance carriers.

64.2.4(d) Direct Cost shall not include overhead.

64.3 In no event shall any payments under this article exceed the **Contract** price for such items.

64.4 All payments pursuant to this article shall be in the nature of liquidated damages and shall be accepted by the **Contractor** in full satisfaction of all claims against the **City**.

64.5 The **City** may deduct or set off against any sums due and payable pursuant to this article, any deductions authorized by this **Contract** or by **Law** (including but not limited to liquidated damages) and any claims it may have against the **Contractor**. The **City's** exercise of the right to terminate the **Contract** pursuant to this article shall not impair or otherwise effect the **City's** right to assert any claims it may have against the **Contractor** in a plenary action.

64.6 Where the **Work** covered by the **Contract** has been substantially completed, as determined in writing by the **Commissioner**, termination of the **Work** shall be handled as an omission of **Work** pursuant to Articles 29 and 33, in which case a Change Order will be issued to reflect an appropriate reduction in the **Contract** Sum, or if the amount is determined after final payment, such amount shall be paid by the **Contractor**.

#### **ARTICLE 65. CHOICE OF LAW, CONSENT TO JURISDICTION AND VENUE**

65.1 This **Contract** shall be deemed to be executed in the **City** of New York, State of New York, regardless of the domicile of the **Contractor**, and shall be governed by and construed in accordance with the **Laws** of the State of New York and the **Laws** of the United States, where applicable.

65.2 The parties agree that any and all claims asserted against the **City** arising under this **Contract** or related thereto shall be heard and determined in the courts of the State of New York ("New York State Courts") located in the **City** and County of New York. To effect this **Contract** and intent, the **Contractor** agrees:

65.2.1 If the **City** initiates any action against the **Contractor** in Federal Court or in New York State Court, service of process may be made on the **Contractor** either in person, wherever such **Contractor** may be found, or by registered mail addressed to the **Contractor** at its address as set forth in this **Contract**, or to such other address as the **Contractor** may provide to the **City** in writing; and

65.2.2 With respect to any action between the **City** and the **Contractor** in New York State Court, the **Contractor** hereby expressly waives and relinquishes any rights it might otherwise have:

65.2.2(a) To move to dismiss on grounds of forum non conveniens;

65.2.2(b) To remove to Federal Court; and

65.2.2(c) To move for a change of venue to a New York State Court outside New York County.

65.2.3 With respect to any action brought by the **City** against the **Contractor** in Federal Court located in the **City**, the **Contractor** expressly waives and relinquishes any right it might otherwise have to move to transfer the action to a United States Court outside the **City**.

65.2.4 If the **Contractor** commences any action against the **City** in a Court located other than in the **City** and State of New York, upon request of the **City**, the **Contractor** shall either consent to a transfer of the action to a State Court of competent jurisdiction located in the **City** and State of New York or, if the Court where the action is initially brought will not or cannot transfer the action, the

**Contractor** shall consent to dismiss such action without prejudice and may thereafter reinstate the action in a State Court of competent jurisdiction in the City.

65.3 If any provision(s) of this article is held unenforceable for any reason, each and all other provision(s) shall nevertheless remain in full force and effect.

#### **ARTICLE 66. PARTICIPATION IN AN INTERNATIONAL BOYCOTT**

66.1 The **Contractor** agrees that neither the **Contractor** nor any substantially owned affiliated company is participating or shall participate in an international boycott in violation of the provisions of the Export Administration Act of 1979, as amended, or the regulations of the United States Department of Commerce promulgated thereunder.

66.2 Upon the final determination by the Commerce Department or any other Agency of the United States as to, or conviction of the **Contractor** or a substantially-owned affiliated company thereof, participation in an international boycott in violation of the provisions of the Export Administration Act of 1979, as amended, or the regulations promulgated thereunder, the **Comptroller** may, at his/her option, render forfeit and void this **Contract**.

66.3 The **Contractor** shall comply in all respects, with the provisions of Section 6-114 of the Administrative Code and the rules and regulations issued by the **Comptroller** thereunder.

#### **ARTICLE 67. LOCALLY BASED ENTERPRISE PROGRAM**

67.1 This **Contract** is subject to the requirements of Section 6-108.1 of the Administrative Code and regulations promulgated thereunder. No construction **Contract** shall be awarded unless and until these requirements have been complied with in their entirety.

67.2 Unless specifically waived by the **Commissioner** with the approval of the Division of Economic and Financial Opportunity of the Department of Business Services, if any portion of the **Contract** is subcontracted, not less than ten (10%) percent of the total dollar amount of the **Contract** shall be awarded to locally based enterprise ("LBEs"); except that where less than ten (10%) percent of the total dollar amount of the **Contract** is subcontracted, such lesser percentage shall be so awarded.

67.3 The prime **Contractor** shall not require performance and payment bonds from LBE **Subcontractors**.

67.4 If the **Contractor** has indicated prior to award that no **Work** will be subcontracted, no **Work** shall be subcontracted without the prior approval of the **Commissioner**, which shall be granted only if the **Contractor** makes a good faith effort beginning at least six (6) weeks before the **Work** is to be performed to obtain LBE **Subcontractors** to perform the **Work**.

67.5 If the **Contractor** has not identified sufficient LBE **Subcontractors** prior to award, it shall sign a letter of compliance stating that it complies with Section 6-108.1 of the Administrative Code, recognizes that achieving the LBE requirement is a condition of its **Contract**, and shall submit documentation demonstrating its good faith efforts to obtain LBEs. After award, the **Contractor** shall begin to solicit LBE's to perform subcontracted **Work** at least six (6) weeks before the date such **Work** is to be performed and shall demonstrate that a good faith effort has been made to obtain LBE's on each subcontract until it meets the required percentage.

67.6 Failure of the **Contractor** to comply with the requirements of Section 6-108.1 of the Administrative Code and the regulations promulgated thereunder shall constitute a material breach of **Contract**. Remedy for such breach of **Contract** may include the imposition of any or all of the following sanctions:

67.6.1 Reducing a **Contractor's** compensation by an amount equal to the dollar value of the percentage of the LBE subcontracting requirement not complied with;

67.6.2 Declaring the **Contractor** in default;

67.6.3 Where non-compliance is by an LBE, de-certifying and declaring the LBE ineligible to participate in the LBE program for a period of up to three (3) years.

#### **ARTICLE 68. ANTITRUST**

68.1 The **Contractor** hereby assigns, sells and transfers to the City all right, title and interest in and to any claims and causes of action arising under the antitrust Laws of New York State or of the United States relating to the particular goods or services purchased or procured by the City under this **Contract**.

#### **ARTICLE 69. MacBRIDE PRINCIPLES PROVISIONS**

##### **69.1 Notice To All Prospective Contractors:**

69.1.1 Local Law No. 34 of 1991 became effective on September 10, 1991 and added Section 6-115.1 of the Administrative Code. The local Law provides for certain restrictions on City **Contracts** to express the opposition of the people of the City to employment discrimination practices in Northern Ireland to promote freedom of work-place opportunity.

69.1.2 Pursuant to Section 6-115.1, prospective **Contractors** for **Contracts** to provide goods or services involving an expenditure of an amount greater than ten thousand (\$10,000.) dollars, or for construction involving an amount greater than fifteen thousand (\$15,000.) dollars, are asked to sign a rider in which they covenant and represent, as a material condition of their **Contract**, that any business operations in Northern Ireland conducted by the **Contractor** and any individual or legal entity in which the **Contractor** holds a ten (10%) percent or greater ownership interest in the **Contractor** will be conducted in accordance with the MacBride Principles of nondiscrimination in employment.

69.1.3 Prospective **Contractors** are not required to agree to these conditions. However, in the case of **Contracts** let by competitive sealed bidding, whenever the lowest responsible bidder has not agreed to stipulate to the conditions set forth in this notice and another bidder who has agreed to stipulate to such conditions has submitted a bid within five (5%) percent of the lowest responsible bid for a **Contract** to supply goods, services or contraction of comparable quality, the **Agency** shall refer such bids to the Mayor, the Speaker or other officials, as appropriate, who may determine, in accordance with applicable Law and rules, that it is in the best interest of the City that the **Contract** be awarded to other than the lowest responsible pursuant to Section 313(b)(2) of the City Charter.

69.1.4 In the case of **Contracts** let by other than competitive sealed bidding, if a prospective **Contractor** does not agree to these conditions, no **Agency**, elected official or the City Council shall award the **Contract** to that bidder unless the **Agency** seeking to use the goods, services or construction certifies in writing that the **Contract** is necessary for the **Agency** to perform its functions and there is no other responsible **Contractor** who will supply goods, services or construction of comparable quality at a comparable price.

69.2 In accordance with Section 6-115.1 of the Administrative Code, the **Contractor** stipulates that such **Contractor** and any individual or legal entity in which the **Contractor** holds a ten (10%) percent or greater ownership interest in the **Contractor** either:

69.2.1 Have no business operations in Northern Ireland, or

69.2.2 Shall take lawful steps in good faith to conduct any business operations they have in Northern Ireland in accordance with the MacBride Principles, and shall permit independent monitoring of their compliance with such principles.

69.3 For purposes of this Article, the following terms shall have the following meanings:

69.3.1 "MacBride Principles" shall mean those principles relating to nondiscrimination in employment and freedom of work-place opportunity which require employers doing business in Northern Ireland to:

69.3.1(a) increase the representation of individuals from under-represented religious groups in the workforce, including managerial, supervisory, administrative, clerical and technical jobs;

69.3.1(b) take steps to promote adequate security for the protection of employees from under-represented religious groups both at the work-place and while traveling to and from Work;

69.3.1(c) ban provocative religious or political emblems from the workplace;

69.3.1(d) publicly advertise all job openings and make special recruitment efforts to attract applicants from under-represented religious groups;

69.3.1(e) establish layoff, recall and termination procedures which do not in practice favor a particular religious group;

69.3.1(f) abolish all job reservations, apprenticeship restrictions and different employment criteria which discriminate on the basis of religion;

69.3.1(g) develop training programs that will prepare substantial numbers of current employees from under-represented religious groups for skilled jobs, including the expansion of existing programs and the creation of new programs to train, upgrade and improve the skills of workers from under-represented religious groups;

69.3.1(h) establish procedures to assess, identify and actively recruit employees from under-represented religious groups with potential for further advancement; and

69.3.1(i) appoint a senior management staff member to oversee affirmative action efforts and develop a timetable to ensure their full implementation.

69.4 The **Contractor** agrees that the covenants and representations in Article 69.2 are material conditions to this **Contract**. In the event the **Agency** receives information that the **Contractor** who made the stipulation required by this Article is in violation thereof, the **Agency** shall review such information and give the **Contractor** an opportunity to respond. If the **Agency** finds that a violation has occurred, the **Agency** shall have the right to declare the **Contractor** in default in default and/or terminate this **Contract** for cause and procure supplies, services or Work from another source in the manner the **Agency** deems proper. In the event of such termination, the

Contractor shall pay to the Agency, or the Agency in its sole discretion may withhold from any amounts otherwise payable to the Contractor, the difference between the Contract price for the uncompleted portion of this Contract and the cost to the Agency of completing performance of this Contract either itself or by engaging another Contractor or Contractors. In the case of a requirement Contract, the Contractor shall be liable for such difference in price for the entire amount of supplies required by the Agency for the uncompleted term of Contractor's Contract. In the case of a construction Contract, the Agency shall also have the right to hold the Contractor in partial or total default in accordance with the default provisions of this Contract, and/or may seek debarment or suspension of the Contractor. The rights and remedies of the Agency hereunder shall be in addition to, and not in lieu of, any rights and remedies the Agency has pursuant to this Contract or by operation of Law.

#### **ARTICLE 70. HEALTH INSURANCE COVERAGE**

70.1 If the price for which this Contract was awarded exceeds \$100,000, or if the price for which this Contract was awarded when combined with other construction or services contracts awarded the Contractor by the City in the year prior to award of this Contract exceeds \$100,000, the Contractor, following registration of the Contract, shall be required to submit responses to requests for information regarding the nature of any health insurance provided by the Contractor to its employees and their spouses and domestic partners, upon request of the Agency or other designated City agency.

#### **ARTICLE 71. PROHIBITION OF TROPICAL HARDWOODS**

71.1 Tropical hardwoods, as defined in Section 165 of the New York State Finance Law ("Finance Law"), shall not be utilized in the performance of this Contract except as expressly permitted by Section 165 of the Finance Law.

#### **ARTICLE 72. CONFLICTS OF INTEREST**

72.1 Section 2604 of the City Charter and other related provisions of the City Charter, the Administrative Code and the Penal Law are applicable under the terms of this Contract in relation to Conflicts of Interest and shall be extended to Subcontractors authorized to perform Work, labor and services pursuant to this Contract and further, it shall be the duty and responsibility of the Contractor to so inform its respective Subcontractors. Notice is hereby given that, under certain circumstances, penalties may be invoked against the donor as well as the recipient of any form of valuable gift.

#### **ARTICLE 73. MERGER CLAUSE**

73.1 The Written Contract herein, contains all the terms and conditions agreed upon by the parties hereto, and no other agreement, oral or otherwise, regarding the subject matter of this Contract shall be deemed to exist or to bind any of the parties hereto, or to vary any of the terms contained herein.

#### **ARTICLE 74. STATEMENT OF WORK**

74.1 The Contractor shall furnish all labor and materials and perform all Work in strict accordance with the Specifications and Addenda thereto, numbered 4.

## ARTICLE 75. COMPENSATION TO BE PAID TO CONTRACTOR

75.1 The City will pay and the Contractor will accept in full consideration for the performance of the Contract, subject to additions and deductions as provided herein, the total sum of: *One Hundred* Dollars, (\$ *139,800,00.00* ), this said sum being the Amount at which the Contract was awarded to the Contractor at a public letting thereof, based upon the Contractor's bid for the Contract.

*Thirty Nine Million Eight Hundred Thousand and 00/100*

## ARTICLE 76. ELECTRONIC FUNDS TRANSFER

76.1 In accordance with Section 6-107.1 of the New York City Administrative Code, the Contractor agrees to accept payments under this Agreement from the City by electronic funds transfer. An electronic funds transfer is any transfer of funds, other than a transaction originated by check, draft or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument or computer or magnetic tape so as to order, instruct or authorize a financial institution to debit or credit an account. Prior to the first payment made under this Agreement, Contractor shall designate one financial institution or other authorized payment agent and shall complete the attached "EFT Vendor Payment Enrollment Form" in order to provide the Commissioner of Finance with information necessary for Contractor to receive electronic funds transfer payments through the designated financial institution or authorized payment agent. The crediting of the amount of a payment to the appropriate account on the books of a financial institution or other authorized payment agent designated by the Contractor shall constitute full satisfaction by the City for the amount of the payment under this agreement. The account information supplied by the Contractor to facilitate the electronic funds transfer shall remain confidential to the fullest extent provided by law.

76.2 The agency head may waive the application of the requirements herein to payments on contracts entered into pursuant to §315 of the City Charter. In addition, the Commissioner of the Department of Finance and the Comptroller may jointly issue standards pursuant to which the contracting agency may waive the requirements hereunder for payments in the following circumstances: (i) for individuals or classes of individuals for whom compliance imposes a hardship; (ii) for classifications or types of checks; or (iii) in other circumstances as may be necessary in the interest of the City.

**ARTICLE 77 – PARTICIPATION BY MINORITY-OWNED AND WOMEN-OWNED BUSINESS  
ENTERPRISES IN CITY PROCUREMENT**

**NOTICE TO ALL PROSPECTIVE CONTRACTORS**

**ARTICLE I. M/WBE PROGRAM**

Local Law No. 129 of 2005 added Section 6-129 to the Administrative Code of the City of New York. The local law creates a program for participation by minority-owned and women-owned business enterprises (MBEs and WBEs) in City procurement. As stated in the Section 6-129, the intent of the program is to address the impact of discrimination on the City's procurement process, and to promote the public interest in avoiding fraud and favoritism in the procurement process, increasing competition for City business, and lowering contract costs. The contract provisions contained herein are made pursuant to Local Law 129, and the rules of the Department of Small Business Services ("DSBS") promulgated thereunder.

If this Contract is subject to the Minority-Owned and Women-Owned Business Enterprise ("M/WBE") program created by Local Law 129, the specific requirements of M/WBE participation for this Contract are set forth in Schedule B of the Contract (entitled the "Subcontractor Utilization Plan"), and are detailed below. The Contractor must comply with all applicable M/WBE requirements for this Contract. Schedule B of the Contract ("Subcontractor Utilization Plan") is included in the Bid Booklet.

Article I, Part A, below, sets forth provisions related to the participation goals for construction and professional services contracts. Article I, Part B, below, sets forth miscellaneous provisions related to the M/WBE program.

**PART A: PARTICIPATION GOALS FOR CONSTRUCTION  
AND PROFESSIONAL SERVICES CONTRACTS**

1. The Target Subcontracting Percentage applicable to this Contract is set forth on Schedule B, Part I to this Contract (see Page 1, line (1)). The "Target Subcontracting Percentage" is the percentage of the total Contract which Agency anticipates that the prime contractor for this Contract would in the normal course of business award to one or more subcontractors for amounts under \$1 million for construction and professional services.

A prospective contractor may seek a full or partial pre-award waiver of the Target Subcontracting Percentage in accordance with Local Law 129 and Part A, Section 10 below. To apply for the a full or partial waiver of the Target Subcontracting Percentage, a prospective contractor must complete Part III (Page 4) of Schedule B, and must submit such request no later than seven (7) days prior to the date and time the bids or proposals are due, in writing to the Agency by e-mail at [poped@ddc.nyc.gov](mailto:poped@ddc.nyc.gov) or via facsimile at (718) 391-1885. Bidders/proposers who have submitted requests will receive a response by no later than two (2) calendar days prior to the date bids or proposals are due, provided, however, that if that date would fall on a weekend or holiday, a response will be provided by close-of-business on the business day before such weekend or holiday date.

2. The Subcontractor Participation Goals established for this Contract are set forth on Schedule B, Part I to this Contract (see Page 1, line (2) and/or line (3)). The Subcontractor Participation Goals represent a percentage of the total dollar value of all construction and/or professional services subcontracts under this Agreement for amounts under \$1 million.

3. If Subcontractor Participation Goals have been established for this Contract, Contractor agrees or shall agree as a material term of the Agreement that, with respect to the total amount of the Agreement to be awarded to one or more subcontractors pursuant to subcontracts for amounts under \$1 million, Contractor shall be subject to the Subcontractor Participation Goals, unless the goals are modified by Agency in accordance with Local Law 129 and Part A, Section 11 below.

4. If Subcontractor Participation Goals have been established for this Contract, a prospective contractor shall be required to submit with its bid or proposal, as applicable, a completed Schedule B, Part II Subcontractor Utilization Plan (see Page 2-3) indicating: (a) the percentage of work it intends to subcontract; (b) the percentage of work it intends to

award to subcontractors for amounts under \$1 million; (c) in cases where the prospective contractor intends to award subcontracts for amounts under \$1 million, a description of the type and dollar value of work designated for participation by MBEs and/or WBEs; and (d) the general time frames in which such work by MBEs and/or WBEs is scheduled to occur. In the event that this Subcontractor Utilization Plan indicates that the bidder or proposer, as applicable, does not intend to award the **Target Subcontracting Percentage**, the bid or proposal, as applicable, shall be deemed non-responsive, unless Agency has granted the bidder or proposer, as applicable, a pre-award waiver of the **Target Subcontracting Percentage** in accordance with Local Law 129 and Part A, Section 10 below.

**THE BIDDER/PROPOSER MUST COMPLETE THE SUBCONTRACTOR UTILIZATION PLAN INCLUDED HEREIN (SCHEDULE B, PART II). SUBCONTRACTOR UTILIZATION PLANS WHICH DO NOT INCLUDE THE REQUIRED AFFIRMATIONS WILL BE DEEMED TO BE NON-RESPONSIVE, UNLESS A FULL WAIVER OF THE TARGET SUBCONTRACTING PERCENTAGE IS GRANTED (SCHEDULE B PART III). IN THE EVENT THAT THE CITY DETERMINES THAT VENDOR HAS SUBMITTED A SUBCONTRACTOR UTILIZATION PLAN WHERE THE REQUIRED AFFIRMATIONS ARE COMPLETED BUT OTHER ASPECTS OF THE PLAN ARE NOT COMPLETE, OR CONTAIN A COPY OR COMPUTATION ERROR THAT IS AT ODDS WITH THE AFFIRMATION, THE VENDOR WILL BE NOTIFIED BY THE AGENCY AND WILL BE GIVEN FOUR (4) CALENDAR DAYS FROM RECEIPT OF NOTIFICATION TO CURE THE SPECIFIED DEFICIENCIES AND RETURN A COMPLETED PLAN TO THE AGENCY. FAILURE TO DO SO WILL RESULT IN A DETERMINATION THAT THE BID/PROPOSAL IS NON-RESPONSIVE. RECEIPT OF NOTIFICATION IS DEFINED AS THE DATE NOTICE IS EMAILED OR FAXED (IF THE VENDOR HAS PROVIDED AN EMAIL ADDRESS OR FAX NUMBER), OR NO LATER THAN FIVE (5) DAYS FROM THE DATE OF MAILING OR UPON DELIVERY, IF DELIVERED.**

5. Where a Subcontractor Utilization Plan has been submitted, the Contractor shall, within 30 days of issuance by Agency of a notice to proceed, submit a list of proposed persons or entities to which it intends to award subcontracts within the subsequent 12 months. In the case of multi-year contracts, such list shall also be submitted every year thereafter. **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5) (i.e., a contract valued at or below \$3M for projects in New York City) or if the Contract is subject to a project labor agreement in accordance with Labor Law §222, and the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades (plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring), the Contractor must identify all those to which it intends to award construction subcontracts for any portion of the Wicks trade work at the time of bid submission, regardless of what point in the life of the contract such subcontracts will occur. In identifying intended subcontractors in the bid submission, bidders may satisfy any Subcontractor Participation Goals established for this Contract by proposing one or more subcontractors that are M/WBEs for any portion of the Wicks trade work if the amount to be awarded to such M/WBE subcontractor is under \$1 million. In the event that the Contractor's selection of a subcontractor is disapproved, the Contractor shall have a reasonable time to propose alternate subcontractors.**

6. M/WBE firms must be certified by DSBS in order for the Contractor to credit such firms' participation toward the attainment of the M/WBE participation goals. Such certification must occur prior to the firms' commencement of work as subcontractors. A list of M/WBE firms may be obtained from the DSBS website at [www.nyc.gov/buycertified](http://www.nyc.gov/buycertified), by emailing DSBS at [buyer@sbs.nyc.gov](mailto:buyer@sbs.nyc.gov), by calling (212) 513-6356, or by visiting or writing DSBS at 110 William St., New York, New York, 10038, 7<sup>th</sup> floor. Eligible firms that have not yet been certified may contact DSBS in order to seek certification by visiting [www.nyc.gov/getcertified](http://www.nyc.gov/getcertified), emailing [MWBE@sbs.nyc.gov](mailto:MWBE@sbs.nyc.gov), or calling the DSBS certification helpline at (212) 513-6311.

7. Where a Subcontractor Utilization Plan has been submitted, the Contractor shall, with each voucher for payment, and/or periodically as Agency may require, submit statements, certified under penalty of perjury, which shall include, but not be limited to, the total amount paid to subcontractors (including subcontractors that are not MBEs or WBEs); the names, addresses and contact numbers of each MBE or WBE hired as a subcontractor pursuant to such plan as well as the dates and amounts paid to each MBE or WBE. The Contractor shall also submit, along with its voucher for final payment, the total amount paid to subcontractors (including subcontractors that are not MBEs or WBEs); and a final list, certified under penalty of perjury, which shall include the name, address and contact information of each subcontractor that is an MBE or WBE hired pursuant to such plan, the work performed by, and the dates and amounts paid to each.

8. If payments made to, or work performed by, MBEs or WBEs are less than the amount specified in the Contractor's Subcontractor Utilization Plan, Agency shall take appropriate action, in accordance with Local Law 129 and Article II below, unless the Contractor has obtained a modification of its Subcontractor Utilization Plan in accordance with Local Law 129 and Part A, Section 11 below.

9. Where a Subcontractor Utilization Plan has been submitted, and the Contractor requests a change order the value of which exceeds 10 percent of the Agreement, Agency shall establish participation goals for the work to be performed pursuant to the change order.

10. **Pre-award waiver of Target Subcontracting Percentage.** Agency may grant a full or partial waiver of the **Target Subcontracting Percentage** to a bidder or proposer, as applicable, who demonstrates—before submission of the bid or proposal—that it has legitimate business reasons for proposing the level of subcontracting in its Subcontractor Utilization Plan. In making its determination, Agency shall consider factors that shall include, but not be limited to, whether the bidder or proposer, as applicable, has the capacity and the bona fide intention to perform the Contract without any subcontracting, or to perform the Contract without awarding the amount of subcontracts for under one million dollars represented by the **Target Subcontracting Percentage**. In making such determination, Agency may consider whether the Subcontractor Utilization Plan is consistent with past subcontracting practices of the bidder or proposer, as applicable, and whether the bidder or proposer, as applicable, has made good faith efforts to identify portions of the Contract that it intends to subcontract.

11. **Modification of Subcontractor Utilization Plan.** A Contractor may request a modification of its Subcontractor Utilization Plan (**Subcontractor Participation Goals**) after award of this Contract. **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5) (i.e., a contract valued at or below \$3M for projects in New York City) or if the Contract is subject to a project labor agreement in accordance with Labor Law §222, and the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades (plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring), the Contractor may request a Modification of its Subcontractor Utilization Plan as part of its bid submission.** The Agency may grant a request for Modification of a Contractor's Subcontractor Utilization Plan if it determines that the Contractor has established, with appropriate documentary and other evidence, that it made reasonable, good faith efforts to meet the **Subcontractor Participation Goals**. In making such determination, Agency shall consider evidence of the following efforts, as applicable, along with any other relevant factors:

- (a) The Contractor advertised opportunities to participate in the Contract, where appropriate, in general circulation media, trade and professional association publications and small business media, and publications of minority and women's business organizations;
- (b) The Contractor provided notice of specific opportunities to participate in the Contract, in a timely manner, to minority and women's business organizations;
- (c) The Contractor sent written notices, by certified mail or facsimile, in a timely manner, to advise MBEs and WBEs that their interest in the Contract was solicited;
- (d) The Contractor made efforts to identify portions of the work that could be substituted for portions originally designated for participation by MBEs and/or WBEs in the Subcontractor Utilization Plan, and for which the Contractor claims an inability to retain MBEs or WBEs;
- (e) The Contractor held meetings with MBEs and/or WBEs prior to the date their bids or proposals were due, for the purpose of explaining in detail the scope and requirements of the work for which their bids or proposals were solicited;
- (f) The Contractor made efforts to negotiate with MBEs and/or WBEs as relevant to perform specific subcontracts;
- (g) Timely written requests for assistance made by the Contractor to Agency's M/WBE liaison officer and to DSBS;
- (h) Description of how recommendations made by DSBS and Agency were acted upon and an explanation of why action upon such recommendations did not lead to the desired level of participation of MBEs and/or WBEs.

Agency's M/WBE officer shall provide written notice to the Contractor of the determination.

12. If this Contract is for an indefinite quantity of construction or professional services or is a requirements type contract and the Contractor has submitted a Subcontractor Utilization Plan and has committed to subcontract work to MBEs and/or WBEs in order to meet the **Subcontractor Participation Goals**, the Contractor will not be deemed in violation of the M/WBE requirements for this Contract with regard to any work which was intended to be subcontracted to an MBE and/or WBE to the extent that the Agency has determined that such work is not needed.

13. If **Subcontractor Participation Goals** have been established for this Contract, Agency shall evaluate and assess the Contractor's performance in meeting those goals, and such evaluation and assessment shall become part of the Contractor's overall contract performance evaluation.

## **PART B: MISCELLANEOUS**

1. The Contractor shall take notice that, if this solicitation requires the establishment of a Subcontractor Utilization Plan, the resulting contract may be audited by DSBS to determine compliance with Section 6-129. See 6-129(e)(10). Furthermore, such resulting contract may also be examined by the City's Comptroller to assess compliance with the Subcontractor Utilization Plan.
2. Pursuant to DSBS rules, construction contracts that include a requirement for a Subcontractor Utilization Plan shall not be subject to the law governing Locally Based Enterprises set forth in Administrative Code Section 6-108.1.
3. DSBS is available to assist contractors and potential contractors in determining the availability of MBEs and WBEs to participate as subcontractors, and in identifying opportunities that are appropriate for participation by MBEs and WBEs in contracts.
4. Prospective contractors are encouraged to enter into joint ventures with MBEs and WBEs.
5. By submitting a bid or proposal the Contractor hereby acknowledges its understanding of the M/WBE requirements set forth herein and the pertinent provisions of Local Law 129 of 2005, and any rules promulgated thereunder, and if awarded this Contract, the Contractor hereby agrees to comply with the M/WBE requirements of this Contract and pertinent provisions of Local Law 129 of 2005, and any rules promulgated thereunder, all of which shall be deemed to be material terms of this Contract. The Contractor hereby agrees to make all reasonable, good faith efforts to solicit and obtain the participation of M/WBE's to meet the required **Subcontractor Participation Goals**.

## **ARTICLE II. ENFORCEMENT**

1. If Agency determines that a bidder or proposer, as applicable, has, in relation to this procurement, violated Section 6-129 or the DSBS rules promulgated pursuant to Section 6-129, Agency may disqualify such bidder or proposer, as applicable, from competing for this Contract and the Agency may revoke such bidder's or proposer's prequalification status, if applicable.
2. Whenever Agency believes that the Contractor or a subcontractor is not in compliance with Section 6-129 or the DSBS rules promulgated pursuant to Section 6-129, or any provision of this Contract that implements Section 6-129, including, but not limited to any Subcontractor Utilization Plan, Agency shall send a written notice to the Contractor describing the alleged noncompliance and offering an opportunity to be heard. Agency shall then conduct an investigation to determine whether such Contractor or subcontractor is in compliance.
3. In the event that the Contractor has been found to have violated Section 6-129, the DSBS rules promulgated pursuant to Section 6-129, or any provision of this Contract that implements this Section 6-129, including, but not limited any Subcontractor Utilization Plan, Agency may determine that one of the following actions should be taken:
  - (a) entering into an agreement with the Contractor allowing the Contractor to cure the violation;
  - (b) revoking the Contractor's pre-qualification to bid or make proposals for future contracts;
  - (c) making a finding that the Contractor is in default of the Contract;
  - (d) terminating the Contract;
  - (e) declaring the Contractor to be in breach of Contract;
  - (f) withholding payment or reimbursement;
  - (g) determining not to renew the Contract;
  - (h) assessing actual and consequential damages;
  - (i) assess liquidated damages or reduction of fees, provided that liquidated damages may be based on amounts representing costs of delays in carrying out the purposes of the program established by Section 6-129, or in

meeting the purposes of the Contract, the costs of meeting utilization goals through additional procurements, the administrative costs of investigation and enforcement, or other factors set forth in the Contract;

- (j) exercise rights under the Contract to procure goods, services or construction from another contractor and charge the cost of such contract to the Contractor that has been found to be in noncompliance; or
- (k) take any other appropriate remedy.

4. If a Subcontractor Utilization Plan has been submitted, and pursuant to this Article II, Section 3, the Contractor has been found to have failed to award subcontracts to MBEs and/or WBEs sufficient to meet the Subcontractor Participation Goals contained in its Subcontractor Utilization Plan or the Subcontractor Participation Goals as modified by Agency pursuant to Article I, Part A, Section 11, Agency may assess liquidated damages in the amount of ten percent (10%) of the difference between the dollar amount of subcontracts required to be awarded to MBE and/or WBE subcontractors to meet the Subcontractor Participation Goals and the dollar amount the Contractor actually awarded and paid to MBE and/or WBE subcontractors. In view of the difficulty of accurately ascertaining the loss which the City will suffer by reason of Contractor's failure to meet the Subcontractor Participation Goals, the foregoing amount is hereby fixed and agreed as the liquidated damages that the City will suffer by reason of such failure, and not as a penalty. Agency may deduct and retain out of any monies which may become due under this Contract the amount of any such liquidated damages; and in case the amount which may become due under this Contract shall be less than the amount of liquidated damages suffered by the City, the Contractor shall be liable to pay the difference.

5. Whenever Agency has reason to believe that an MBE or WBE is not qualified for certification, or is participating in a contract in a manner that does not serve a commercially useful function (as defined in Section 6-129), or has violated any provision of Section 6-129, Agency shall notify the commissioner of DSBS who shall determine whether the certification of such business enterprise should be revoked.

6. Statements made in any instrument submitted to Agency pursuant to Section 6-129 shall be submitted under penalty of perjury and any false or misleading statement or omission shall be grounds for the application of any applicable criminal and/or civil penalties for perjury. The making of a false or fraudulent statement by an MBE or WBE in any instrument submitted pursuant to Section 6-129 shall, in addition, be grounds for revocation of its certification.

7. The Contractor's record in implementing its Subcontractor Utilization Plan shall be a factor in the evaluation of its performance. Whenever a contracting agency determines that a contractor's compliance with a Subcontractor Utilization Plan has been unsatisfactory, the agency shall, after consultation with the city chief procurement officer, file an advice of caution form for inclusion in VENDEX as caution data.

IN WITNESS WHEREOF, the <sup>Deputy</sup> Commissioner, on behalf of the City of New York, and the Contractor, have executed this agreement in quadruplicate, two parts of which are to remain with the Commissioner, another to be filed with the Comptroller of the City, and the fourth to be delivered to the Contractor.

**Please Note:** Only insurance carriers licensed to write NYS disability benefits insurance policies and NYS licensed insurance agents of those insurance carriers are authorized to issue Form DB-120.1. **Insurance brokers are NOT authorized to issue this form.**

## Additional Instructions for Form DB-120.1

By signing this form, the insurance carrier identified in box "3" on this form is certifying that it is insuring the business referenced in box "1a" for disability benefits under the New York State Disability Benefits Law. The Insurance Carrier or its licensed agent will send this Certificate of Insurance to the entity listed as the certificate holder in box "2". ***This Certificate is valid for the earlier of one year after this form is approved by the insurance carrier or its licensed agent, or the policy expiration date listed in box "3c".***

Please Note: Upon the cancellation of the disability benefits policy indicated on this form, if the business continues to be named on a permit, license or contract issued by a certificate holder, the business must provide that certificate holder with a new Certificate of NYS Disability Benefits Coverage or other authorized proof that the business is complying with the mandatory coverage requirements of the New York State Disability Benefits Law.

### DISABILITY BENEFITS LAW

#### §220. Subd. 8

- (a) The head of a state or municipal department, board, commission or office authorized or required by law to issue any permit for or in connection with any work involving the employment of employees in employment as defined in this article, and notwithstanding any general or special statute requiring or authorizing the issue of such permits, shall not issue such permit unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits for all employees has been secured as provided by this article. Nothing herein, however, shall be construed as creating any liability on the part of such state or municipal department, board, commission or office to pay any disability benefits to any such employee if so employed.
- (b) The head of a state or municipal department, board, commission or office authorized or required by law to enter into any contract for or in connection with any work involving the employment of employees in employment as defined in this article, and notwithstanding any general or special statute requiring or authorizing any such contract, shall not enter into any such contract unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits for all employees has been secured as provided by this article.

Prismatic Development Corp.

60 Route 46

Fairfield, NJ 07004

hereinafter referred to as the "Principal", and \_\_\_\_\_

Fidelity and Deposit Company of Maryland

Zurich American Insurance Company

300 Interpace Parkway, Morris Corp. I

Parsippany, NJ 07054

hereinafter referred to as the "Surety" ("Sureties") are held and firmly bound to THE CITY OF NEW YORK,  
hereinafter referred to as the "City" or to its successors and assigns, in the penal sum of

One Hundred Thirty Nine Million Eight Hundred Thousand and 00/100

(\$ 139,800,000.00 ) Dollars, lawful money of the United States, for the payment of which said sum  
of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators,  
successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal is about to enter, or has entered, into a Contract in writing with the City for  
Southwest Brooklyn Marine Transfer Station-Building

a copy of which Contract is annexed to and hereby made a part of this bond as though herein set forth in full;

**Performance Bond #2 (Pages 84 to 87): Use if the total contract price is more than \$5 Million.**

PERFORMANCE BOND #2 (Page2)

NOW, THEREFORE, the conditions of this obligation are such that if the Principal, his or its representatives or assigns, shall well and faithfully perform the said Contract and all modifications, amendments, additions and alterations thereto that may hereafter be made, according to its terms and its true intent and meaning, including repair and/or replacement of defective work and guarantees of maintenance for the periods stated in the Contract, and shall fully indemnify and save harmless the City from all cost and damage which it may suffer by reason of failure so to do, and shall fully reimburse and repay the City for all outlay and expense which the City may incur in making good any such default, and shall protect the said City of New York against, and pay any and all amounts, damages, costs and judgments which may or shall be recovered against said City or its officers or agents of which the said City of New York may be called upon to pay any person or corporation by reason of any damages arising or growing out of the doing of said work, or the repair or maintenance thereof, or the manner of doing the same, or the neglect of the said PRINCIPAL, or his (their, its) agents or servants, or the improper performance of the said work by the said PRINCIPAL, or his (their, its) agents or servants, or the infringement of any patent or patent rights by reason of the use of any materials furnished or work done as aforesaid or otherwise, then this obligation shall be null and void, otherwise to remain in full force and effect.

The Surety (Sureties), for value received, hereby stipulates and agrees, if requested to do so by the City, to fully perform and complete the Work to be performed under the Contract, pursuant to the terms, conditions, and covenants thereof, if the City determines that the Principal, for any cause, has failed or neglected to fully perform and complete such Work. The Surety (Sureties) further agrees to commence and diligently perform the Work specified in the Contract, including physical site work, within twenty-five (25) business days after written notice thereof from the City and to complete all Work within such time as the City may fix. The Surety and the City reserve all rights and defenses each may have against the other; provided, however, that the Surety expressly agrees that its reservation of rights shall not provide a basis for non-performance of its obligation to commence and to complete all Work as provided herein.

The Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties) and its bond shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or to the said Contract or Work to be performed thereunder, or by any payment thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or by any assignment, subletting or other transfer thereof or of any Work to be performed or any moneys due or to become due thereunder; and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, waivers, assignments, subcontracts and transfers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to assignees, subcontractors, and other transferees shall have the same effect as to said Surety (Sureties) as though done or omitted to be done by or in relation to said Principal.

**Performance Bond #2 (Pages 84 to 87): Use if the total contract price is more than \$5 Million.**

## EXTRACT FROM BY-LAWS OF THE COMPANIES

"Article V, Section 8, Attorneys-in-Fact. The Chief Executive Officer, the President, or any Executive Vice President or Vice President may, by written instrument under the attested corporate seal, appoint attorneys-in-fact with authority to execute bonds, policies, recognizances, stipulations, undertakings, or other like instruments on behalf of the Company, and may authorize any officer or any such attorney-in-fact to affix the corporate seal thereto; and may with or without cause modify or revoke any such appointment or authority at any time."

### CERTIFICATE

I, the undersigned, Vice President of the ZURICH AMERICAN INSURANCE COMPANY, the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY, and the FIDELITY AND DEPOSIT COMPANY OF MARYLAND, do hereby certify that the foregoing Power of Attorney is still in full force and effect on the date of this certificate; and I do further certify that Article V, Section 8, of the By-Laws of the Companies is still in force.

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the ZURICH AMERICAN INSURANCE COMPANY at a meeting duly called and held on the 15th day of December 1998.

RESOLVED: "That the signature of the President or a Vice President and the attesting signature of a Secretary or an Assistant Secretary and the Seal of the Company may be affixed by facsimile on any Power of Attorney...Any such Power or any certificate thereof bearing such facsimile signature and seal shall be valid and binding on the Company."

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY at a meeting duly called and held on the 5th day of May, 1994, and the following resolution of the Board of Directors of the FIDELITY AND DEPOSIT COMPANY OF MARYLAND at a meeting duly called and held on the 10th day of May, 1990.

RESOLVED: "That the facsimile or mechanically reproduced seal of the company and facsimile or mechanically reproduced signature of any Vice-President, Secretary, or Assistant Secretary of the Company, whether made heretofore or hereafter, wherever appearing upon a certified copy of any power of attorney issued by the Company, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

IN TESTIMONY WHEREOF, I have hereunto subscribed my name and affixed the corporate seals of the said Companies, this 20th day of February, 2014.

## EXTRACT FROM BY-LAWS OF THE COMPANIES

"Article V, Section 8, Attorneys-in-Fact. The Chief Executive Officer, the President, or any Executive Vice President or Vice President may, by written instrument under the attested corporate seal, appoint attorneys-in-fact with authority to execute bonds, policies, recognizances, stipulations, undertakings, or other like instruments on behalf of the Company, and may authorize any officer or any such attorney-in-fact to affix the corporate seal thereto; and may with or without cause modify or revoke any such appointment or authority at any time."

### CERTIFICATE

I, the undersigned, Vice President of the ZURICH AMERICAN INSURANCE COMPANY, the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY, and the FIDELITY AND DEPOSIT COMPANY OF MARYLAND, do hereby certify that the foregoing Power of Attorney is still in full force and effect on the date of this certificate; and I do further certify that Article V, Section 8, of the By-Laws of the Companies is still in force.

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the ZURICH AMERICAN INSURANCE COMPANY at a meeting duly called and held on the 15th day of December 1998.

RESOLVED: "That the signature of the President or a Vice President and the attesting signature of a Secretary or an Assistant Secretary and the Seal of the Company may be affixed by facsimile on any Power of Attorney...Any such Power or any certificate thereof bearing such facsimile signature and seal shall be valid and binding on the Company."

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY at a meeting duly called and held on the 5th day of May, 1994, and the following resolution of the Board of Directors of the FIDELITY AND DEPOSIT COMPANY OF MARYLAND at a meeting duly called and held on the 10th day of May, 1990.

RESOLVED: "That the facsimile or mechanically reproduced seal of the company and facsimile or mechanically reproduced signature of any Vice-President, Secretary, or Assistant Secretary of the Company, whether made heretofore or hereafter, wherever appearing upon a certified copy of any power of attorney issued by the Company, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

IN TESTIMONY WHEREOF, I have hereunto subscribed my name and affixed the corporate seals of the said Companies, this 20th day of February, 2014.

*Geoffrey Delisio*

Geoffrey Delisio, Vice President

**Payment Bond (Pages 88 to 91): Use for any contract for which a Payment Bond is required.**

PAYMENT BOND (Page 1)

Bond No. 08937329

**PAYMENT BOND**

KNOW ALL PERSONS BY THESE PRESENTS, That we, \_\_\_\_\_

Prismatic Development Corp.

60 Route 46

Fairfield, NJ 07004

hereinafter referred to as the "Principal", and \_\_\_\_\_

Fidelity and Deposit Company of Maryland

Zurich American Insurance Company

300 Interpace Parkway, Morris Corp. I

Parsippany, NJ 07054

hereinafter referred to as the "Surety" ("Sureties") are held and firmly bound to THE CITY OF NEW YORK,  
hereinafter referred to as the "City" or to its successors and assigns, in the penal sum of

One Hundred Thirty Nine Million Eight Hundred Thousand and 00/100

(\$139,800,000.00) Dollars, lawful money of the United States, for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal is about to enter, or has entered, into a Contract in writing with the City for  
Southwest Brooklyn Marine Transfer Station-Building

a copy of which Contract is annexed to and hereby made a part of this bond as though herein set forth in full;

NOW, THEREFORE, the conditions of this obligation are such that if the Principal, his or its representatives or assigns and other Subcontractors to whom Work under this Contract is sublet and his or their successors and assigns shall promptly pay or cause to be paid all lawful claims for

(a) Wages and compensation for labor performed and services rendered by all persons engaged in the prosecution of the Work under said Contract, and any amendment or extension thereof or addition thereto, whether such persons be agents servants or employees of the Principal or any such Subcontractor, including all persons so

**Payment Bond (Pages 88 to 91): Use for any contract for which a Payment Bond is required.**

**PAYMENT BOND (Page 2)**

engaged who perform the work of laborers or mechanics at or in the vicinity of the site of the Project regardless of any contractual relationship between the Principal or such Subcontractors, or his or their successors or assigns, on the one hand and such laborers or mechanics on the other, but not including office employees not regularly stationed at the site of the project; and

(b) Materials and supplies (whether incorporated in the permanent structure or not), as well as teams, fuels, oils, implements or machinery furnished, used or consumed by said Principal or any subcontractor at or in the vicinity of the site of the Project in the prosecution of the Work under said Contract and any amendment or extension thereof or addition thereto; then this obligation shall be void, otherwise to remain in full force and effect.

This bond is subject to the following additional conditions, limitations and agreements:

(a) The Principal and Surety (Sureties) agree that this bond shall be for the benefit of any materialmen or laborer having a just claim, as well as the City itself.

(b) All persons who have performed labor, rendered services or furnished materials and supplies, as aforesaid, shall have a direct right of action against the Principal and his, its or their successors and assigns, and the Surety (Sureties) herein, or against either or both or any of them and their successors and assigns. Such persons may sue in their own name, and may prosecute the suit to judgment and execution without the necessity of joining with any other persons as party plaintiff.

(c) The Principal and Surety (Sureties) agree that neither of them will hold the City liable for any judgment for costs of otherwise, obtained by either or both of them against a laborer or materialman in a suit brought by either a laborer or materialman under this bond for moneys allegedly due for performing work or furnishing material.

(d) The Surety (Sureties) or its successors and assigns shall not be liable for any compensation recoverable by an employee or laborer under the Workmen's Compensation Law.

(e) In no event shall the Surety (Sureties), or its successors or assigns, be liable for a greater sum than the penalty of this bond or be subject to any suit, action or proceeding hereon that is instituted by any person, firm, or corporation hereunder later than two years after the complete performance of said Contract and final settlement thereof.

The Principal, for himself and his successors and assigns, and the Surety (Sureties), for itself and its successors and assigns, do hereby expressly waive any objection that might be interposed as to the right of the City to require a bond containing the foregoing provisions, and they do hereby further expressly waive any defense which they or either of them might interpose to an action brought hereon by any person, firm or corporation, including subcontractors, materialmen and third persons, for work, labor, services, supplies or material performed rendered, or furnished as aforesaid upon the ground that there is no law authorizing the City to require the foregoing provisions to be placed in this bond.

And the Surety (Sureties); for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties), and its bonds shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or of the said Contract or the work to be performed thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or by any assignment, subletting or other transfer thereof or of any part thereof, or of any Work to be performed, or any moneys due to become due thereunder and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, waivers, assignments, subcontracts and transfers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to assignees, Subcontractors, and other transferees shall have the same effect as to said Surety (Sureties) as though done or omitted to be done or in relation to said Principal.

**Payment Bond (Pages 88 to 91): Use for any contract for which a Payment Bond is required.**

**PAYMENT BOND (Page 3)**

IN WITNESS HEREOF, the Principal and the Surety (Sureties) have hereunto set their hands and seals, and such of them as are corporations have caused their corporate seals to be hereunto affixed and these presents to be signed by their proper officers, this 20th day of February, 2014.

## EXTRACT FROM BY-LAWS OF THE COMPANIES

"Article V, Section 8, Attorneys-in-Fact. The Chief Executive Officer, the President, or any Executive Vice President or Vice President may, by written instrument under the attested corporate seal, appoint attorneys-in-fact with authority to execute bonds, policies, recognizances, stipulations, undertakings, or other like instruments on behalf of the Company, and may authorize any officer or any such attorney-in-fact to affix the corporate seal thereto; and may with or without cause modify or revoke any such appointment or authority at any time."

### CERTIFICATE

I, the undersigned, Vice President of the ZURICH AMERICAN INSURANCE COMPANY, the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY, and the FIDELITY AND DEPOSIT COMPANY OF MARYLAND, do hereby certify that the foregoing Power of Attorney is still in full force and effect on the date of this certificate; and I do further certify that Article V, Section 8, of the By-Laws of the Companies is still in force.

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the ZURICH AMERICAN INSURANCE COMPANY at a meeting duly called and held on the 15th day of December 1998.

RESOLVED: "That the signature of the President or a Vice President and the attesting signature of a Secretary or an Assistant Secretary and the Seal of the Company may be affixed by facsimile on any Power of Attorney...Any such Power or any certificate thereof bearing such facsimile signature and seal shall be valid and binding on the Company."

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY at a meeting duly called and held on the 5th day of May, 1994, and the following resolution of the Board of Directors of the FIDELITY AND DEPOSIT COMPANY OF MARYLAND at a meeting duly called and held on the 10th day of May, 1990.

RESOLVED: "That the facsimile or mechanically reproduced seal of the company and facsimile or mechanically reproduced signature of any Vice-President, Secretary, or Assistant Secretary of the Company, whether made heretofore or hereafter, wherever appearing upon a certified copy of any power of attorney issued by the Company, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

IN TESTIMONY WHEREOF, I have hereunto subscribed my name and affixed the corporate seals of the said Companies, this 2nd day of February, 20 14.

A handwritten signature in cursive script that reads "Geoffrey Delisio".

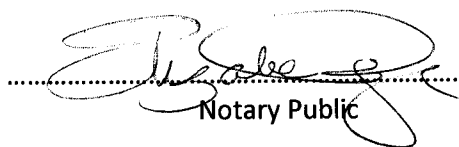

Geoffrey Delisio, Vice President

## EXTRACT FROM BY-LAWS OF THE COMPANIES

"Article V, Section 8, Attorneys-in-Fact. The Chief Executive Officer, the President, or any Executive Vice President or Vice President may, by written instrument under the attested corporate seal, appoint attorneys-in-fact with authority to execute bonds, policies, recognizances, stipulations, undertakings, or other like instruments on behalf of the Company, and may authorize any officer or any such attorney-in-fact to affix the corporate seal thereto; and may with or without cause modify or revoke any such appointment or authority at any time."

### CERTIFICATE

I, the undersigned, Vice President of the ZURICH AMERICAN INSURANCE COMPANY, the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY, and the FIDELITY AND DEPOSIT COMPANY OF MARYLAND, do hereby certify that the foregoing Power of Attorney is still in full force and effect on the date of this certificate; and I do further certify that Article V, Section 8, of the By-Laws of the Companies is still in force.

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the ZURICH AMERICAN INSURANCE COMPANY at a meeting duly called and held on the 15th day of December 1998.

RESOLVED: "That the signature of the President or a Vice President and the attesting signature of a Secretary or an Assistant Secretary and the Seal of the Company may be affixed by facsimile on any Power of Attorney...Any such Power or any certificate thereof bearing such facsimile signature and seal shall be valid and binding on the Company."

This Power of Attorney and Certificate may be signed by facsimile under and by authority of the following resolution of the Board of Directors of the COLONIAL AMERICAN CASUALTY AND SURETY COMPANY at a meeting duly called and held on the 5th day of May, 1994, and the following resolution of the Board of Directors of the FIDELITY AND DEPOSIT COMPANY OF MARYLAND at a meeting duly called and held on the 10th day of May, 1990.

RESOLVED: "That the facsimile or mechanically reproduced seal of the company and facsimile or mechanically reproduced signature of any Vice-President, Secretary, or Assistant Secretary of the Company, whether made heretofore or hereafter, wherever appearing upon a certified copy of any power of attorney issued by the Company, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

IN TESTIMONY WHEREOF, I have hereunto subscribed my name and affixed the corporate seals of the said Companies, this 25th day of February, 2014.

*Geoffrey Delisio*

Geoffrey Delisio, Vice President

**Performance Bond #1 (Pages 80 to 83): Use if the total contract price is \$5 Million Or Less. Performance Bond #1 has been approved by the U.S. Small Business Administration ("SBA") for participation in its Bond Guarantee Program.**

PERFORMANCE BOND #1 (Page 2)

NOW, THEREFORE, the conditions of this obligation are such that if the Principal, his or its representatives or assigns, shall well and faithfully perform the said Contract and all modifications, amendments, additions and alterations thereto that may hereafter be made, according to its terms and its true intent and meaning, including repair and or replacement of defective work and guarantees of maintenance for the periods stated in the Contract, and shall fully indemnify and save harmless the City from all cost and damage which it may suffer by reason of the Principal's default of the Contract, and shall fully reimburse and repay the City for all outlay and expense which the City may incur in making good any such default and shall protect the said City of New York against, and pay any and all amounts, damages, cost and judgments which may or shall be recovered against said City or its officers or agents or which the said City of New York may be called upon to pay any person or corporation by reason of any damages arising or growing out of the Principal's default of the Contract, then this obligation shall be null and void, otherwise to remain in full force and effect.

The Surety (Sureties), for value received, hereby stipulates and agrees, upon written notice from the City that the City has determined that the Principal is in default of the Contract, to (1) pay the City the cost to complete the contract as determined by the City in excess of the balance of the Contract held by the City, plus any damages or costs to which the City is entitled, up to the full amount of the above penal sum, (2) fully perform and complete the Work to be performed under the Contract, pursuant to the terms, conditions, and covenants thereof, or (3) tender a completion Contractor that is acceptable to the City. The Surety (Sureties) further agrees, at its option, either to notify the City that it elects to pay the city the cost of completion plus any applicable damages and costs under option (1) above, or to commence and diligently perform the Work specified in the Contract, including physical site work, within twenty-five (25) business days after written notice thereof from the City and, if the Surety elects to fully perform and complete the Work, then to complete all Work within the time set forth in the Contract or such other time as agreed to between the City and Surety in accordance with the Contract. If the Surety elects to tender payment pursuant to (1) above, then the Surety shall tender such amount within fifteen (15) business days notification from the City of the cost of completion. The Surety and the City reserve all rights and defenses each may have against the other; provided, however, that the Surety expressly agrees that its reservation of rights shall not provide a basis for non-performance of its obligation to pay the City the cost of completion, to commence and complete all Work as provided herein, or to tender a completion contractor.

The Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties) and its bond shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or to the said Contract or the Work to be performed thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or any moneys due or to become due thereunder; and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, and waivers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to subcontractors shall have the same effect as to said Surety (Sureties) as though done or omitted to be done by or in relation to said Principal. Notwithstanding the above, if the City makes payments to the Principal before the time required by the contract that in the aggregate exceed \$100,000 or 10% of the Contract price, whichever is less, and that have not become earned prior to the Principal being found to be in default, then all payments made to the Principal before the time required by the Contract shall be added to the remaining contract value available to be paid for the completion of the Contract as if such sums had not been paid to the Principal, but shall not provide a basis for non-performance of its obligation to pay the City the cost of completion, to commence and to complete all Work as provided herein, or to tender a completion contractor.

**Performance Bond #1 (Pages 80 to 83): Use if the total contract price is \$5 Million Or Less:**  
**Performance Bond #1 has been approved by the U.S. Small Business Administration ("SBA")**

PERFORMANCE BOND #2 (Page2)

NOW, THEREFORE, the conditions of this obligation are such that if the Principal, his or its representatives or assigns, shall well and faithfully perform the said Contract and all modifications, amendments, additions and alterations thereto that may hereafter be made, according to its terms and its true intent and meaning, including repair and/or replacement of defective work and guarantees of maintenance for the periods stated in the Contract, and shall fully indemnify and save harmless the City from all cost and damage which it may suffer by reason of failure so to do, and shall fully reimburse and repay the City for all outlay and expense which the City may incur in making good any such default, and shall protect the said City of New York against, and pay any and all amounts, damages, costs and judgments which may or shall be recovered against said City or its officers or agents of which the said City of New York may be called upon to pay any person or corporation by reason of any damages arising or growing out of the doing of said work, or the repair or maintenance thereof, or the manner of doing the same, or the neglect of the said PRINCIPAL, or his (their, its) agents or servants, or the improper performance of the said work by the said PRINCIPAL, or his (their, its) agents or servants, or the infringement of any patent or patent rights by reason of the use of any materials furnished or work done as aforesaid or otherwise, then this obligation shall be null and void, otherwise to remain in full force and effect.

The Surety (Sureties), for value received, hereby stipulates and agrees, if requested to do so by the City, to fully perform and complete the Work to be performed under the Contract, pursuant to the terms, conditions, and covenants thereof, if the City determines that the Principal, for any cause, has failed or neglected to fully perform and complete such Work. The Surety (Sureties) further agrees to commence and diligently perform the Work specified in the Contract, including physical site work, within twenty-five (25) business days after written notice thereof from the City and to complete all Work within such time as the City may fix. The Surety and the City reserve all rights and defenses each may have against the other; provided, however, that the Surety expressly agrees that its reservation of rights shall not provide a basis for non-performance of its obligation to commence and to complete all Work as provided herein.

The Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties) and its bond shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or to the said Contract or Work to be performed thereunder, or by any payment thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or by any assignment, subletting or other transfer thereof or of any Work to be performed or any moneys due or to become due thereunder; and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, waivers, assignments, subcontracts and transfers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to assignees, subcontractors, and other transferees shall have the same effect as to said Surety (Sureties) as though done or omitted to be done by or in relation to said Principal.

**Performance Bond #2 (Pages 84 to 87): Use if the total contract price is more than \$5 Million.**

PERFORMANCE BOND #2 (Page 3)

IN WITNESS WHEREOF, the Principal and the Surety (Sureties) have hereunto set their hands and seals, and such of them as are corporations have caused their corporate seals to be hereunto affixed and these presents to be signed by their proper officers, this \_\_\_\_\_ day of \_\_\_\_\_, \_\_\_\_\_.

**Payment Bond (Pages 88 to 91): Use for any contract for which a Payment Bond is required.**

PAYMENT BOND (Page 1)

PAYMENT BOND

KNOW ALL PERSONS BY THESE PRESENTS, That we, \_\_\_\_\_

\_\_\_\_\_

hereinafter referred to as the "Principal", and \_\_\_\_\_

\_\_\_\_\_

hereinafter referred to as the "Surety" ("Sureties") are held and firmly bound to THE CITY OF NEW YORK, hereinafter referred to as the "City" or to its successors and assigns, in the penal sum of

\_\_\_\_\_

(\$ \_\_\_\_\_) Dollars, lawful money of the United States, for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal is about to enter, or has entered, into a Contract in writing with the City for

\_\_\_\_\_

a copy of which Contract is annexed to and hereby made a part of this bond as though herein set forth in full;

NOW, THEREFORE, the conditions of this obligation are such that if the Principal, his or its representatives or assigns and other Subcontractors to whom Work under this Contract is sublet and his or their successors and assigns shall promptly pay or cause to be paid all lawful claims for

(a) Wages and compensation for labor performed and services rendered by all persons engaged in the prosecution of the Work under said Contract, and any amendment or extension thereof or addition thereto, whether such persons be agents servants or employees of the Principal or any such Subcontractor, including all persons so

**Payment Bond (Pages 88 to 91): Use for any contract for which a Payment Bond is required.**

**PAYMENT BOND (Page 2)**

engaged who perform the work of laborers or mechanics at or in the vicinity of the site of the Project regardless of any contractual relationship between the Principal or such Subcontractors, or his or their successors or assigns, on the one hand and such laborers or mechanics on the other, but not including office employees not regularly stationed at the site of the project; and

(b) Materials and supplies (whether incorporated in the permanent structure or not), as well as teams, fuels, oils, implements or machinery furnished, used or consumed by said Principal or any subcontractor at or in the vicinity of the site of the Project in the prosecution of the Work under said Contract and any amendment or extension thereof or addition thereto; then this obligation shall be void, otherwise to remain in full force and effect.

This bond is subject to the following additional conditions, limitations and agreements:

(a) The Principal and Surety (Sureties) agree that this bond shall be for the benefit of any materialmen or laborer having a just claim, as well as the City itself.

(b) All persons who have performed labor, rendered services or furnished materials and supplies, as aforesaid, shall have a direct right of action against the Principal and his, its or their successors and assigns, and the Surety (Sureties) herein, or against either or both or any of them and their successors and assigns. Such persons may sue in their own name, and may prosecute the suit to judgment and execution without the necessity of joining with any other persons as party plaintiff.

(c) The Principal and Surety (Sureties) agree that neither of them will hold the City liable for any judgment for costs of otherwise, obtained by either or both of them against a laborer or materialman in a suit brought by either a laborer or materialman under this bond for moneys allegedly due for performing work or furnishing material.

(d) The Surety (Sureties) or its successors and assigns shall not be liable for any compensation recoverable by an employee or laborer under the Workmen's Compensation Law.

(e) In no event shall the Surety (Sureties), or its successors or assigns, be liable for a greater sum than the penalty of this bond or be subject to any suit, action or proceeding hereon that is instituted by any person, firm, or corporation hereunder later than two years after the complete performance of said Contract and final settlement thereof.

The Principal, for himself and his successors and assigns, and the Surety (Sureties), for itself and its successors and assigns, do hereby expressly waive any objection that might be interposed as to the right of the City to require a bond containing the foregoing provisions, and they do hereby further expressly waive any defense which they or either of them might interpose to an action brought hereon by any person, firm or corporation, including subcontractors, materialmen and third persons, for work, labor, services, supplies or material performed, rendered, or furnished as aforesaid upon the ground that there is no law authorizing the City to require the foregoing provisions to be placed in this bond.

And the Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties), and its bonds shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or of the said Contract or the work to be performed thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or by any assignment, subletting or other transfer thereof or of any part thereof, or of any Work to be performed, or any moneys due to become due thereunder and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, waivers, assignments, subcontracts and transfers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to assignees, Subcontractors, and other transferees shall have the same effect as to said Surety (Sureties) as though done or omitted to be done or in relation to said Principal.

**Payment Bond (Pages 88 to 91): Use for any contract for which a Payment Bond is required.**

THIS PAGE INTENTIONALLY LEFT BLANK

**OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE**

**LABOR LAW §220 PREVAILING WAGE SCHEDULE**

Pursuant to Labor Law §220 (3) the Comptroller of the City of New York has promulgated this schedule solely for Workers, Laborers and Mechanics engaged by private contractors on New York City public work contracts. Contracting agencies anticipating doing work which requires the employment of a trade or classification not included in this schedule must request the Comptroller to establish a proper classification for the work pursuant to Labor Law §220 (3-a) (a). The prevailing rate schedule as promulgated by the Comptroller, must, in compliance with law, be annexed to and form part of the contract.

The appropriate schedule of prevailing wages and benefits must be posted at all public work sites pursuant to Labor Law §220 (3-a) (a).

This schedule is applicable for work performed during the effective period, unless otherwise noted. You will be notified of any changes to this schedule by addenda published on our web site at [www.comptroller.nyc.gov](http://www.comptroller.nyc.gov). The rate of wages and supplemental benefits to be paid or provided are those that prevail at the time the work is being performed. Preliminary schedules for future one-year periods are published annually in the City Record on or about June 1<sup>st</sup> of each succeeding year. Final schedules are published on or about July 1<sup>st</sup> in the City Record and on our web site at [www.comptroller.nyc.gov](http://www.comptroller.nyc.gov).

The Comptroller's Office has attempted to include all overtime, shift and night differential, Holiday, Saturday, Sunday or other premium time work. However, this schedule does not set forth every prevailing practice with respect to such rates with which employers must comply. All such practices are nevertheless part of the employer's prevailing wage obligation and contained in the collective bargaining agreements of the prevailing wage unions. These collective bargaining agreements are available for inspection by appointment. Requests for appointments may be made by calling (212) 669-4443, Monday through Friday between the hours of 9 a.m. and 5 p.m.

Answers to questions concerning prevailing trade practices may be obtained from the Classification Unit by calling (212) 669-7974. Please direct all other compliance issues to: Bureau of Labor Law, Attn: Wasyl Kinach, P.E., Office of the Comptroller, 1 Centre Street, Room 1122, New York, N.Y. 10007; Fax (212) 669-4002.

Prevailing rates and ratios for apprentices are attached to this schedule in the Appendix. Pursuant to Labor Law §220 (3-e), only apprentices who are individually registered in a bona fide program to which the employer contractor is a participant, registered with the New York State Department of Labor, may be employed on a public work project. Workers who are not journey persons or not registered apprentices pursuant to Labor Law §220 (3-e) may not be substituted for apprentices and must be paid as journey persons.

Workers, Laborers and Mechanics employed on a public work project must receive not less than the prevailing rate of wage and benefits for the classification of work performed by each upon such public work. Contractors are solely responsible for maintaining original payroll records which delineate, among other things, the hours each employee worked within a given classification. Contractors using rates and/or classifications not promulgated by the Comptroller do so at their own risk. Additionally, prior to bid, Agency Chief Contracting Officers must contact the Bureau of Labor Law when the need arises for a work classification not published in this schedule.

**Prevailing Rate Schedule Information:** The information below is intended to assist you in setting your prevailing wage rate obligation.

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

**Covered Workers:** Any and all individuals who are engaged, employed or otherwise occupied as Workers, Laborers or Mechanics on the public work site.

**Supplemental Benefits:** Employers may meet supplemental benefits obligation by paying the hourly supplemental benefits rate to their employees in cash. Such cash payments are considered income to the employee. Employers who elect to provide bona fide supplemental benefits to their employees will be given hourly cash credit for such benefits up to the hourly benefits rate set forth in the applicable schedule for the relevant trade or occupation at issue.

Particular attention should be given to the supplemental benefits requirement. Although in most instances the payment or provision for supplemental benefits is for each hour worked, some classifications require the payment or provision of supplemental benefits for each hour paid. Consequently, some prevailing practices require benefits to be purchased at the overtime, shift differential, Holiday, Saturday, Sunday or other premium time rate.

Contractors are advised to review the applicable Collective Bargaining Agreements and the Comptroller's Prevailing Wage Schedule before bidding on Public Work. If there are any questions concerning prevailing wages, benefits, overtime, Holiday pay, shift differentials or any prevailing practice, please contact this office.

Public Work construction, reconstruction, demolition, excavation, rehabilitation, repair, renovation, alteration, or improvement contracts awarded pursuant to a Project Labor Agreement ("PLA") in accordance with Labor Law section 222 may have different labor standards for shift, premium and overtime work. Please refer to the PLA's pre-negotiated labor agreements for wage and benefit rates applicable to work performed outside of the regular workday. More information is available at the Mayor's Office of Contract Services (MOCS) web page at <http://www.nyc.gov/html/mocs/html/vendors/pla.shtml>.

All the provisions of Labor Law section 220 remain applicable to PLA work including, but not limited to, the enforcement of prevailing wage requirements by the Comptroller; however, we will enforce shift, premium, overtime and other non-standard rates as they appear in a project's pre-negotiated labor agreement.

Any error as to compensation under the prevailing wage law or other information as to trade classification, made by the contracting agency in the contract documents or in any other communication, will not preclude a finding against the contractor of prevailing wage violation.

**Benefits are paid for EACH HOUR WORKED unless otherwise noted.**

Wasył Kinach, P.E.  
Director of Classifications

**Shift Wage Rate: \$91.20**

**Engineer - Heavy Construction Maintenance Engineer I**

Installing, Repairing, Maintaining, Dismantling and Manning of all equipment including Steel Cutting, Bending and Heat Sealing Machines, Mechanical Heaters, Grout Pumps, Bentonite Pumps & Plants, Screening Machines, Fusion Coupling Machines, Tunnel Boring Machines Moles and Machines of a similar nature, Power Packs, Mechanical Hydraulic Jacks; all drill rigs including but not limited to Churn, Rotary Caisson, Raised Bore & Drills of a similar nature; Personnel, Inspection & Safety Boats or any boats used to perform functions of same, Mine Hoists, Whirlies, all Climbing Cranes, all Tower Cranes, including but not limited to Truck Mounted and Crawler Type and machines of similar nature; Maintaining Hydraulic Drills and machines of a similar nature; Well Point System-Installation and dismantling; Burning, Welding, all Pumps regardless of size and/or motor power, except River Cofferdam Pumps and Wells Point Pumps; Motorized Buggies (three or more); equipment used in the cleaning and televising of sewers, but not limited to jet-rodder/vacuum truck, vacall/vactor, closed circuit television inspection equipment; high powered water pumps, jet pumps; screed machines and concrete finishing machines of a similar nature; vermeers.

**Effective Period: 7/1/2012 - 6/30/2013**

**Wage Rate per Hour: \$56.74**

**Supplemental Benefit Rate per Hour: \$31.07**

**Supplemental Note: \$55.74 on overtime**

**Shift Wage Rate: \$90.78**

**Engineer - Heavy Construction Maintenance Engineer II**

**On Base Mounted Tower Cranes**

**Effective Period: 7/1/2012 - 6/30/2013**

**Wage Rate per Hour: \$74.44**

**Supplemental Benefit Rate per Hour: \$31.07**

**Supplemental Note: \$55.74 on overtime**

**Shift Wage Rate: \$119.10**

**Engineer - Heavy Construction Maintenance Engineer III**

**On Generators, Light Towers**

**Effective Period: 7/1/2012 - 6/30/2013**

**Wage Rate per Hour: \$37.56**

**Supplemental Benefit Rate per Hour: \$31.07**

**Supplemental Note: \$55.74 on overtime**

**Shift Wage Rate: \$60.10**

**Engineer - Heavy Construction Maintenance Engineer IV**

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

**Pumps and Mixers including mud sucking**

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: **\$38.53**

Supplemental Benefit Rate per Hour: **\$31.07**

Supplemental Note: \$55.74 on overtime

Shift Wage Rate: **\$61.65**

**Engineer - Heavy Construction Operating Engineer III**

Minor Equipment such as Tractors, Post Hole Diggers, Ditch Witch (Walk Behind), Road Finishing Machines, Rollers five tons and under, Tugger Hoists, Dual Purpose Trucks, Fork Lifts, and Dempsey Dumpers, Fireperson.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: **\$54.09**

Supplemental Benefit Rate per Hour: **\$31.07**

Supplemental Note: \$55.74 on overtime

Shift Wage Rate: **\$86.54**

**Engineer - Heavy Construction Oilers I**

Gradalls, Cold Planer Grader, Concrete Pumps, Driving Truck Cranes, Driving and Operating Fuel and Grease Trucks.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: **\$51.19**

Supplemental Benefit Rate per Hour: **\$31.07**

Supplemental Note: \$55.74 on overtime

Shift Wage Rate: **\$81.90**

**Engineer - Heavy Construction Oilers II**

All gasoline, electric, diesel or air operated Shovels, Draglines, Backhoes, Keystones, Pavers, Guniting Machines, Battery of Compressors, Crawler Cranes, two-person Trenching Machines.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: **\$35.50**

Supplemental Benefit Rate per Hour: **\$31.07**

Supplemental Note: \$55.74 on overtime

Shift Wage Rate: **\$56.80**

**Engineer - Steel Erection Maintenance Engineers**

Derrick, Travelers, Tower, Crawler Tower and Climbing Cranes

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: **\$54.33**

Supplemental Benefit Rate per Hour: **\$29.66**

Supplemental Note: \$53.17 on overtime

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
\$220 PREVAILING WAGE SCHEDULE

Shift Wage Rate: \$86.93

**Engineer - Steel Erection Oiler I**

On a Truck Crane

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$50.91

Supplemental Benefit Rate per Hour: \$29.66

Supplemental Note: \$53.17 on overtime

Shift Wage Rate: \$81.46

**Engineer - Steel Erection Oiler II**

On a Crawler Crane

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$39.04

Supplemental Benefit Rate per Hour: \$29.66

Supplemental Note: \$53.17 on overtime

Shift Wage Rate: \$62.46

**Overtime Description**

On jobs of more than one shift, if the next shift employee fails to report for work through any cause over which the employer has no control, the employee on duty who works the next shift continues to work at the single time rate.

**Overtime**

Double time the regular rate after an 8 hour day.

Double time the regular time rate for Saturday.

Double time the regular rate for Sunday.

Double time the regular rate for work on the following holiday(s).

**Paid Holidays**

New Year's Day

Lincoln's Birthday

President's Day

Memorial Day

Independence Day

Labor Day

Columbus Day

Election Day

Veteran's Day

Thanksgiving Day

Christmas Day

Employees must work at least one day in the payroll week in which the holiday occurs to receive the paid holiday

## ENGINEER - OPERATING

### Operating Engineer - Road & Heavy Construction I

Back Filling Machines, Cranes, Mucking Machines and Dual Drum Paver.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$64.38

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$103.01

### Operating Engineer - Road & Heavy Construction II

Backhoes, Power Shovels, Hydraulic Clam Shells, Steel Erection, Moles and machines of a similar nature.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$66.70

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: 51.85 overtime hours

Shift Wage Rate: \$106.72

### Operating Engineer - Road & Heavy Construction III

Mine Hoists, Cranes, etc. (Used as Mine Hoists)

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$68.86

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$110.18

### Operating Engineer - Road & Heavy Construction IV

Gradealls, Keystones, Cranes on land or water (with digging buckets), Bridge Cranes, Vermeer Cutter and machines of a similar nature, Trenching Machines.

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$67.21

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$107.54

**Operating Engineer - Road & Heavy Construction V**

Pile Drivers & Rigs (employing Dock Builder foreperson): Derrick Boats, Tunnel Shovels.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$65.86

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$105.38

**Operating Engineer - Road & Heavy Construction VI**

Mixers (Concrete with loading attachment), Concrete Pavers, Cableways, Land Derricks, Power Houses (Low Air Pressure Units).

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$62.51

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$100.02

**Operating Engineer - Road & Heavy Construction VII**

Barrier Movers , Barrier Transport and Machines of a Similar Nature.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$50.27

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$80.43

**Operating Engineer - Road & Heavy Construction VIII**

Utility Compressors

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$36.37

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$46.38

**Operating Engineer - Road & Heavy Construction IX**

Horizontal Boring Rig

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$56.24

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$89.98

**Operating Engineer - Road & Heavy Construction X**

Elevators (manually operated as personnel hoist).

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$54.50

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$87.20

**Operating Engineer - Road & Heavy Construction XI**

Compressors (Portable 3 or more in battery), Driving of Truck Mounted Compressors, Well-point Pumps, Tugger Machines Well Point Pumps, Churn Drill.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$42.11

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$67.38

**Operating Engineer - Road & Heavy Construction XII**

All Drills and Machines of a similar nature.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$63.18

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$101.09

**Operating Engineer - Road & Heavy Construction XIII**

Concrete Pumps, Concrete Plant, Well Drilling Machines, Stone Crushers, Double Drum Hoist, Power Houses (other than above).

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$61.14

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$97.82

**Operating Engineer - Road & Heavy Construction XIV**

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

**Concrete Mixer**

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$58.34

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$93.49

**Operating Engineer - Road & Heavy Construction XV**

Compressors (Portable Single or two in Battery, not over 100 feet apart), Pumps (River Cofferdam) and Welding Machines, Push Button Machines, All Engines Irrespective of Power (Power-Pac) used to drive auxiliary equipment, Air, Hydraulic, etc.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$39.03

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$62.45

**Operating Engineer - Road & Heavy Construction XVI**

Concrete Breaking Machines, Single Drum Hoists, Locomotives (over ten tons) and Dinkies over ten tons, Hydraulic Crane-Second Engineer.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$55.73

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$89.17

**Operating Engineer - Road & Heavy Construction XVII**

On-Site concrete plant engineer, On-site Asphalt Plant Engineer, and Vibratory console.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$56.19

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$89.90

**Operating Engineer - Road & Heavy Construction XVIII**

**Tower Crane**

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$81.09

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

Shift Wage Rate: \$129.74

**Operating Engineer - Paving I**

Asphalt Spreaders, Autogrades (C.M.I.), Roto/Mil

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$59.25

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$94.80

**Operating Engineer - Paving II**

Asphalt Roller

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$57.65

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$92.24

**Operating Engineer - Paving III**

Asphalt Plants

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$48.46

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$77.54

**Operating Engineer - Concrete I**

Cranes

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$63.49

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Concrete II**

Compressors

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$36.91

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
\$220 PREVAILING WAGE SCHEDULE

**Operating Engineer - Concrete III**

Micro-traps (Negative Air Machines), Vac-All Remediation System.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$50.31

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Steel Erection I**

Three Drum Derricks

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$67.62

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$108.19

**Operating Engineer - Steel Erection II**

Cranes, 2 Drum Derricks, Hydraulic Cranes and Fork Lifts.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$64.91

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$103.86

**Operating Engineer - Steel Erection III**

Compressors, Welding Machines.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$37.87

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$60.59

**Operating Engineer - Steel Erection IV**

Compressors - Not Combined with Welding Machine.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$36.00

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

Shift Wage Rate: \$57.60

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§220 PREVAILING WAGE SCHEDULE

**Operating Engineer - Building Work I**

Forklifts, House Cars, Rack and Pinion, Plaster (Platform machine), Plaster Bucket, Concrete Pump and all other equipment used for hoisting material.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$53.09

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Building Work II**

Compressors, Welding Machines (Cutting Concrete-Tank Work), Paint Spraying, Sandblasting, Pumps (with the exclusion of Concrete Pumps), House Car (settlement basis only), All Engines irrespective of Power (Power-Pac) used to drive Auxiliary Equipment, Air, Hydraulic, etc.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$39.35

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Building Work III**

Double Drum

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$60.66

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Building Work IV**

Stone Derrick, Cranes, Hydraulic Cranes Boom Trucks.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$64.35

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Building Work V**

Dismantling and Erection of Cranes, Relief Engineer.

Effective Period: 7/1/2012 - 6/30/2013

Wage Rate per Hour: \$59.17

Supplemental Benefit Rate per Hour: \$28.65

Supplemental Note: \$51.85 overtime hours

**Operating Engineer - Building Work VI**

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK

**TO BE PAID AT THE RATE OF THE JOURNEYPERSON IN THE TRADE**  
**PERFORMING THE WORK.**

**OFFICE OF THE COMPTROLLER**

**CITY OF NEW YORK**

**220 APPRENTICESHIP PREVAILING WAGE SCHEDULE**

**APPENDIX**

Pursuant to Labor Law §220 (3-e), only apprentices who are individually registered in a bona fide program to which the employer contractor is a participant and registered with the New York State Department of Labor, may be employed on a public work project.

Any employee listed on a payroll at an apprentice wage rate, who is not registered as above, shall be paid the journey person wage rate for the classification of work he actually performed.

Apprentice ratios are established to ensure the proper safety, training and supervision of apprentices. A ratio establishes the number of journey workers required for each apprentice in a program and on a job site. Ratios are interpreted as follows: in the case of a 1:1, 1:4 ratio, there must be one journey worker for the first apprentice, and four additional journey workers for each subsequent apprentice.

**THIS PAGE INTENTIONALLY LEFT BLANK**

**OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§230 PREVAILING WAGE SCHEDULE**

**This schedule of prevailing wages and supplemental fringe benefits must be posted at the public work site as required by New York State Labor Law § 231 (6).**

---

**LABOR LAW § 230 BUILDING SERVICE EMPLOYEES**

**In accordance with Labor Law §230 et seq. the Comptroller of the City of New York has promulgated this schedule of prevailing wages and supplemental benefits for building service employees engaged on building service contracts in excess of \$1,500.00. Prevailing rates are required to be annexed to and form part of the contract pursuant to §231 (4); however, only rates for trades anticipated by the contracting agency to be required on the work need be annexed to the contract.**

**Contracting agencies that anticipate doing work that may require building service trades or classifications not included in this schedule may request the Comptroller to establish a proper classification and wage determination for the work. Contractors using trades and/or classifications for which the Comptroller has not promulgated wages and benefits do so at their own risk.**

**Labor Law § 231 (6) requires contractors to post on the site of the work a current copy of this schedule of wages and supplements.**

**This schedule is applicable to work performed during the effective period, unless otherwise noted. Changes to this schedule are published on our web site [www.comptroller.nyc.gov](http://www.comptroller.nyc.gov). Contractors must pay the wages and supplements in effect when the building service employee performs the work. Preliminary schedules for future one-year periods appear in the City Record on or about June 1 each succeeding year. Final schedules appear on or about July 1 in the City Record and on our web site [www.comptroller.nyc.gov](http://www.comptroller.nyc.gov).**

**Building service employees on public contracts must receive not less than the prevailing rate of wage and supplements for the classification of work performed. Contractors are solely responsible for maintaining original payroll records delineating, among other things, the hours worked by each employee within a given classification.**

**Employers may pay cash supplements; however, cash payments made in lieu of providing bona fide benefits is considered income to the employee. Employers providing bona fide benefits are credited for the cost of such benefits up to the prevailing benefits rate for the trade at issue. Employers may combine cash supplements with in-kind supplements to meet the prevailing rate minimum.**

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
§230 PREVAILING WAGE SCHEDULE

Contractors are advised to review the applicable Comptroller's Prevailing Wage Schedule before bidding on public work. Any Prevailing Wage Rate error made by the Contracting Agency, whether in a contract document or other communication, will not preclude a finding against the contractor of a prevailing-wage violation.

Some of the rates in this schedule are based on collective bargaining agreements. These agreements are available for inspection by appointment. Requests for appointments may be made by calling (212) 669-4443, Monday through Friday between the hours of 9 a.m. and 5 p.m.

Answers to questions concerning prevailing trade practices may be obtained from the Classifications Unit by calling (212) 669-7974. Please direct all other compliance issues to; Bureau of Labor Law, Attn: Wasyl Kinach, P.E., Office of the Comptroller, 1 Centre Street, Room 1122, New York, N.Y. 10007; Fax (212) 669-4002.

Benefits are paid for **EACH HOUR WORKED** unless otherwise noted.

Wasyl Kinach, P.E.  
Director of Classifications  
Bureau of Labor Law

The ADDENDUM TO THE GENERAL CONDITIONS is contained in Volume 3 of the Contract Documents. Volume 3 contains the following:

- Addendum to the General Conditions
- Specifications

## SECTION 01000 GENERAL CONDITIONS

### PART 1 - GENERAL

#### 1.01 Applicability of General Conditions

- A. Since there are several separate Contracts pertaining to the construction of this project, for convenience, the General Conditions are stated only once. These General Conditions are applicable to all Contracts and shall constitute an integral part of each separate Contract to the same extent as though they were repeated in full therein.
- B. The Contractor is advised that various sections of these General Conditions are amended by the Addendum to the General Conditions. This Addendum also includes various schedules referred to in these General Conditions (Schedules A through F). These schedules contain important information that is specific to this project. The Addendum, including Schedules A through F, is set forth in Volume 3 of the Contract Documents.
- C. Throughout these General Conditions, various responsibilities and obligations are assigned to each of the following four Contractors: (1) General Construction, (2) Plumbing, (3) Heating/Ventilating/Air-Conditioning/Fire Protection, and (4) Electrical. In the event the Project does not involve all four Contracts, the responsibilities and obligations of each omitted Contract shall be assigned to one of the Contracts which is included in the Project. The Addendum to the General Conditions specifies which Contractor shall perform the responsibilities and obligations of each omitted contract, as set forth in the General Conditions.

#### 1.02 Scope and Intent

- A. DESCRIPTION OF PROJECT - Refer to the Addendum to the General Conditions for a description of this project.
- B. PROGRESS SCHEDULE
  - 1. Within 15 days after the Notice to Proceed, the Contractor for General Construction Work shall prepare a composite Job Progress Chart that shall indicate graphically and chronologically the time the various parts of the work of all Contracts shall commence and be completed. The Chart shall be in a reproducible form approved by the Commissioner.
  - 2. Immediately after the Notice to Proceed of their Contracts, the Contractors for Plumbing Work, Heating, Ventilating and Air Conditioning Work (HVAC) and Electrical Work, as applicable, shall furnish all necessary data to the Contractor for General Construction Work, and cooperate in all respects in connection with formulation of the Chart.
  - 3. The Chart shall show the sequence and interrelationship of each operation of all the Contracts.
  - 4. The Chart shall show the estimated time for fabrication and/or delivery of all materials and equipment required for the work.
  - 5. As directed by the Resident Engineer, the Contractors shall meet with each other and with the Resident Engineer to review and make the necessary adjustments to the composite Job Progress Chart, and to coordinate the work indicated thereon. (Article 12 of the Contract).
  - 6. When completed, the Job Progress Chart shall be signed and dated by each Contractor or their official representative. The Resident Engineer is authorized to sign the Chart for the Department of Design and Construction. Thereafter, the Chart shall be modified only with the Commissioner's approval. When directed by the Commissioner, the Chart shall be revised and updated. If necessary, a new revised Chart shall be prepared in the same manner as outlined above for the original Chart.

7. The approved Chart shall be distributed by the Contractor for General Construction Work, as follows: the original and two (2) copies to the Resident Engineer, two (2) copies to each Contractor, and two (2) copies to the Department of Design and Construction
  8. All Contractors shall consult the approved Progress Chart and install their work within the time limits indicated on the Chart.
  9. The Resident Engineer shall post in a prominent place in the field office a copy of the Chart and mark thereon the progress of the work, including the times when various parts of the work commenced and were completed.
- C. COMPLETION OF WORK - Work to be done under each separate Contract comprises the furnishing of all labor, materials, equipment and other appurtenances and obtaining of all regulatory agency approvals necessary and required to complete the construction work in accordance with the Contract.
- D. OMISSION OF DETAILS - All work called for in the Specifications applicable to each separate Contract but not shown on the Contract Drawings in their present form, or vice versa, is required, and shall be performed by the Contractor as though it were originally delineated or described. Such work is deemed included in the Bid Price.
- E. WORK NOT IN SPECIFICATIONS OR CONTRACT DRAWINGS - Work not particularly specified in the Specifications nor detailed on the Contract Drawings but involved in carrying out their intent or in the complete and proper execution of the work, is required, and shall be performed by the Contractor. Such work is deemed included in the Bid Price.
- F. SILENCE OF THE SPECIFICATIONS - The apparent silence of the Specifications as to any detail, or the apparent omission from them of a detailed description concerning any work to be done and materials to be furnished, shall be regarded as meaning that only the best practice is to prevail and that only the best material and workmanship is to be used and interpretation of the Specifications shall be made upon that basis.
- G. CONFLICT BETWEEN CONTRACT DRAWINGS AND SPECIFICATIONS - Should any conflict occur in or between the Drawings and Specifications, the Contractor shall be deemed to have estimated on the most expensive way of doing the work unless the Contractor shall have asked for and obtained a decision in writing from the Commissioner before the submission of the bid as to what shall govern.
- H. COOPERATION BETWEEN CONTRACTORS - Inasmuch as the completion of the project within the prescribed limit of time is dependent largely upon the close and active cooperation of all those engaged therein, it is therefore expressly understood and agreed that the Contractor shall lay out and install all work at such time or times and in such manner as not to delay or interfere with the carrying forward of the work of other Contractors. In the event of any dispute arising as to possible or alleged interference between the various Contractors which may retard the progress of the work, the dispute shall be adjudicated by the Commissioner, whose decision as to the party or parties at fault and as to the manner in which the matter may be adjudicated, shall be binding and conclusive on all parties.
- I. "DIRECTED," "REQUIRED," ETC.- Wherever reference is made in the Contract to the work or its performance, the terms "directed," "required," "permitted," "ordered," "designated," "prescribed," "determined," and words of similar import shall, unless expressed otherwise, imply the direction, requirements, permission, order, designation or prescription of the Commissioner.
- J. "APPROVED," ETC. - "Approved," "acceptable," "satisfactory," and words of similar import shall mean and intend approved, acceptable or satisfactory to the Commissioner.
- K. CONFLICTS OF INTERESTS - The Charter of the City of New York, Section 2604, provides a number of safeguards in relation to conflicts of interest. Such safeguards include, without limitation, the following: "No public servant shall receive compensation except from the City for performing any official duty or accept or receive any gratuity from any person whose interest may be affected by the

public servant's official action."

1. Other sections of the City Charter, the Administrative Code and the Penal Law are applicable in implementing the basic Conflicts of Interest Section and under certain circumstances penalties may be invoked against the donor as well as the recipient of any form of valuable gift.
2. Notice is hereby given that sections of the City Charter, the Administrative Code and the Penal Law alluded to herein shall apply under the terms of this Contract to circumstances relevant to conflicts of interest and shall be extended in application to subcontractors authorized to perform work, labor and services pursuant to this Contract and further, it shall be the duty and responsibility of the Contractors to so inform their respective subcontractors.

### **1.03 Provisions Referenced in the Contract**

- A. Various Articles of the Contract refer to requirements set forth in Schedule A of the General Conditions. Schedule A, which is included in the Addendum to the General Conditions, sets forth 1) the referenced Articles of the Contract, and 2) the specific requirements applicable to each respective Contract.
- B. Applications for Extensions of Time, as indicated in Article 13 of the Contract, shall be made in accordance with the Rules of the Procurement Policy Board.
- C. **PARTIAL PAYMENTS FOR MATERIALS IN ADVANCE OF THEIR INCORPORATION IN THE WORK PURSUANT TO ARTICLE 42 OF THE "CONTRACT"** - In order to better insure the availability of materials, fixtures and equipment when needed for the work, the Commissioner may authorize partial payment for certain materials, fixtures and equipment, prior to their incorporation in the work, but only in strict accordance with, and subject to, all the terms and conditions set forth in the Specifications, unless an alternate method of payment is elsewhere provided in the Specifications for specified materials, fixtures or equipment.
  1. The Contractor shall submit to the Commissioner a written request, in quadruplicate, for payment for materials purchased or to be purchased for which the Contractor needs to be paid prior to their actual incorporation in the work. The request shall be accompanied by a schedule of the types and quantities of materials, and shall state whether such materials are to be stored on or off the site.
  2. Where the materials are to be stored off the site, they shall be stored at a place other than the Contractor's premises (except with the written consent of the Commissioner) and under the conditions prescribed or approved by the Commissioner. The Contractor shall set apart and separately store at the place or places of storage all materials and shall clearly mark same "PROPERTY OF THE CITY OF NEW YORK", and further, shall not at any time move any of said materials to another off-site place of storage without the prior written consent of the Commissioner. Materials may be removed from their place of storage off the site for incorporation in the work upon approval of the Resident Engineer.
  3. Where the materials are to be stored at the site, they shall be stored at such locations as shall be designated by the Resident Engineer and only in such quantities as, in the opinion of the Resident Engineer, will not interfere with the proper performance of the work by the Contractor or by other Contractors then engaged in performing work on the site. Such materials shall not be removed from their place of storage on the site except for incorporation in the work, without the approval of the Resident Engineer.
4. **INSURANCE**
  - a. **STORAGE OFF-SITE** - Where the materials are stored off the site and until such time as they are incorporated in the work, the Contractor shall fully insure such materials against any and all risks of destruction, damage or loss including but not limited to fire, theft, and any other casualty or happening. The policy of insurance shall be payable to the City of New York. It shall be in such terms and amounts as shall be approved by the Commissioner and shall be

placed with a company duly licensed to do business in the State of New York. The Contractor shall deliver the original and one (1) copy of such policy or policies marked "Fully Paid" to the Commissioner.

- b. STORAGE ON THE SITE - Where the materials are stored at the site, the Contractor shall furnish satisfactory evidence to the Commissioner that they are properly insured against loss, by endorsements or otherwise, under the policy or policies of insurance obtained by the Contractor to cover losses to materials owned or installed by the Contractor. The policy of insurance shall cover fire and extended coverage against windstorm, hail, explosion and riot attending a strike, civil commotion, aircraft, vehicles and smoke.
5. All costs, charges and expenses arising out of the storage of such materials, shall be paid by the Contractor and the City hereby reserves the right to retain out of any partial or final payment made under the Contract an amount sufficient to cover such costs, charges and expenses with the understanding that the City shall have and may exercise any and all other remedies at law for the recovery of such cost, charges and expenses. There shall be no increase in the Contract price for such costs, charges and expenses and the Contractor shall not make any claim or demand for compensation therefor.
6. The Contractor shall pay any and all costs of handling and delivery of materials, to the place of storage and from the place of storage to the site of the work; and the City shall have the right to retain from any partial or final payment an amount sufficient to cover the cost of such handling and delivery.
7. In the event that the whole or any part of these materials are lost, damaged or destroyed in advance of their satisfactory incorporation in the work, the Contractor, at the Contractor's own cost, shall replace such lost, damaged or destroyed materials of the same character and quality. The City will reimburse the Contractor for the cost of the replaced materials to the extent, and only to the extent, of the funds actually received by the City under the policies of insurance hereinbefore referred to. Until such time as the materials are replaced, the City will deduct from the value of the stored materials or from any other money due under the Contract, the amount paid to the Contractor for such lost, damaged or destroyed materials.
8. Should any of the materials paid for the City hereunder be subsequently rejected or incorporated in the work in a manner or by a method not in accordance with the Contract and Specifications, the Contractor shall remove and replace, at Contractor's own cost, such defective or improperly incorporated material with materials complying with the Contract and Specifications. Until such materials are replaced, the City will deduct from the value of the stored materials or from any other money due the Contractor, the amount paid by the City for such rejected or improperly incorporated materials.
9. Payments for the cost of materials made hereunder shall not be deemed to be an acceptance of such materials as being in accordance with the Contract Documents, and the Contractor always retains and must comply with the Contractor's duty to deliver to the site and properly incorporate in the work only materials which comply with the Contract Documents.
10. The Contractor shall retain any and all risks in connection with the damage, destruction or loss of the materials paid for hereunder to the time of delivery of the same to the site of the work and their proper incorporation in the work in accordance with the Contract Documents.
11. The Contractor shall comply with all laws and the regulations of any governmental body or agency pertaining to the priority purchase, allocation and use of the materials.
12. When requesting payment for such materials, the Contractor shall submit with the partial estimate duly authenticated documents of title, such as bills of sale, invoices or warehouse receipts, all in quadruplicate. The executed bills of sale shall transfer title to the materials from the Contractor to the City (in the event that the invoices state that the material has been purchased by a subcontractor, bills of sale in quadruplicate will also be required transferring title to the materials

from subcontractor to the Contractor).

13. Where the Contractor, with the approval of the Commissioner, has purchased unusually large quantities of materials in order to assure their availability for the work, the Commissioner, at the Commissioner's option, may waive the requirements of Paragraph 12 provided the Contractor furnishes evidence in the form of an affidavit from the Contractor in quadruplicate, and such other proof as the Commissioner may require, that the Contractor is the sole owner of such materials and has purchased them free and clear of all liens and other encumbrances. In such event, the Contractor shall pay for such materials and submit proof thereof, in the same manner as provided in Paragraph 12 hereof, within seven (7) days after receipt of payment therefor from the Comptroller. Failure on the part of the Contractor to submit satisfactory evidence that all such materials have been paid for in full, shall preclude the Contractor from payments under the Contract.
14. The Contractor shall include in each succeeding partial estimate requisition a summary of materials stored which shall set forth the quantity and value of materials in storage, on or off the site, at the end of each preceding estimate period; the amount removed for incorporation in the work; the quantity and value of materials delivered during the current period and the total value of materials on hand for which payment thereof will be included in the current payment estimate.
15. Upon proof to the satisfaction of the Commissioner of the actual cost of such materials and upon submission of proper proof of title as required under Paragraph 12 or Paragraph 13 hereof, payment will be made therefore to the extent of 85%, provided however, that the cost so verified, established and approved shall not exceed the estimated cost of such materials included in the approved detailed breakdown estimate submitted in accordance with Article 41 of the Contract; if it does, the City will pay only 85% approved estimated cost.
16. Upon the incorporation in the work of any such materials, which have been paid for in advance of such incorporation in accordance with the foregoing provisions, payment will be made for such materials incorporated in the work pursuant to Article 42 of the Contract, less any sums paid pursuant to Paragraph 15 herein.

**D. EXCISE AND TRANSPORTATION TAXES-** Pursuant to Section 6 of the "Information for Bidders", the Contractor may be exempted from the payment of Federal Excise and Transportation Taxes in accord with the following:

1. Excise Tax Exemption Certificate will be certified by the Department of Design and Construction where requested by the Contractor, for items which fall within the scope of the Contract and which may be exempt from Federal Excise Tax.
2. TRANSPORTATION TAX - The 3% Federal Tax has been repealed and is hereby deleted from the Contract. The 10% Federal Tax for travel remains in effect.

**E. CORRESPONDENCE** - There shall be six (6) copies of all letters of correspondence to the Department of Design and Construction. An additional copy of all correspondence shall be sent directly to the Resident Engineer at the job site.

**F. MOBILIZATION PAYMENT** - A line item for mobilization shall be allowed on the Contractor's Detailed Estimate Breakdown submitted in accordance with Article 41 of the Contract. The Mobilization Payment is intended to include the cost of required bonds, insurance coverage and/or any other expenses required for the initiation of the Contract Work. All costs for mobilization shall be deemed included in the total Contract Price. The Detailed Estimate shall reflect, and the Mobilization Payment shall be made, in accordance with the following schedule:

Contract Amount		Percent		Mobilization	
Less than \$	50,000	x	0 =	0	
\$	50,000 - \$	100,000	= \$	6,000	
\$	100,001 - \$	500,000	x	6 = \$	6,000 (min) - \$ 30,000 (max)

\$ 500,001 - \$ 2,500,000	x	5	=	\$ 30,000 (min) - \$ 125,000 (max)
Over \$ 2,500,000	x	4	=	\$ 125,000 (min) - \$ 300,000 (max)

The Contractor may requisition for one-half (1/2) of the Mobilization Payment upon satisfactory completion of the following:

1. Installation of any required field office(s).
2. Submission of all required insurance certificates and bonds.
3. Approval by the Department of Design and Construction of the coordinated progress schedule for the project and the Contractor's Shop Drawing schedule.

The remaining balance of the Mobilization Payment may be requisitioned only after 10 percent (10%) of the Contract price, exclusive of the total amount of Mobilization Payments made or to be made hereunder, shall have been approved for payment.

#### 1.04 Contract Drawings

- A. SCHEDULE C - The Contract Drawings are listed in Schedule C, which is set forth in the Addendum to the General Conditions. Such drawings referred to in the Contract, and in the applicable Specifications for the various Contracts bear the general title:

City of New York  
Department of Design and Construction  
Division of Structures

- B. DOCUMENTS FURNISHED TO THE CONTRACTOR - After the award of the Contract, the Contractor for General Construction Work will be furnished with five (5) sets of paper prints of all Contract Drawings mentioned in Paragraph A above.

- C. PRINTS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)

Each Contractor, other than the Contractor for General Construction Work referred to in Paragraph B, will receive two (2) sets of paper prints of all Drawings listed in Paragraph A and three (3) sets of paper prints of all Contract Drawings applying directly to each Contractor's own Contract.

- D. Each Contractor will receive nine (9) complete sets of Specifications.
- E. ADDITIONAL COPIES of Drawings and Specifications, when requested, will be furnished to the Contractor if available.
- F. COORDINATION AND COOPERATION - Since the Contracts are all related to the project, the Contractor shall consult and study the requirement of the Contract Drawings and Specifications of all Contracts furnished to the Contractor, so that the Contractor may become acquainted with the work of the project as a whole in order to achieve the proper coordination and cooperation necessary for the efficient and timely performance of the work.
- G. SUPPLEMENTARY DRAWINGS - When, in the opinion of the Commissioner, it becomes necessary to more fully explain the work to be done, or to illustrate the work further, or to show any changes which may be required, drawings known as Supplementary Drawings will be prepared by the Commissioner.
- H. COMPENSATION - Where Supplementary Drawings entail extra work, compensation therefor to the Contractor shall be subject to the terms of the "Contract". The Supplementary Drawings shall be binding upon the Contractor with the same force as the Contract Drawings.

- I. SUPPLEMENTARY DRAWING PRINTS - Three (3) copies of prints of these Supplementary Drawings will be furnished to the Contractor.
- J. COPIES TO SUBCONTRACTORS - The Contractor shall furnish each of its subcontractors and material suppliers such copies of Contract Drawings, Supplementary Drawings, or copies of the Specifications as may be required for its work.
- K. CONTRACTOR TO CHECK DRAWINGS - The Contractor shall verify all dimensions, quantities and details shown on the Contract Drawings, Schedules, or other data received from the Commissioner, and shall notify the Commissioner of all errors, omissions, conflicts and discrepancies found therein. Notice of such errors shall be given before the Contractor proceeds with any work. Figures shall be used in preference to scale dimensions and large-scale drawings in preference to small-scale drawings.

#### **1.05 Shop Drawings and Record Drawings**

##### **A. SHOP DRAWINGS**

- 1. SUBMISSION OF SHOP DRAWINGS - For instructions relative to Shop Drawings involving electrical or mechanical work or equipment of any nature called for in any Contract, see the General Electrical Requirements and the General Mechanical Requirements.
- 2. SHOP DRAWINGS - The Contractor shall promptly prepare and submit layout detail and Shop Drawings of such parts of the work as are indicated in the Specifications or as required. These Shop Drawings shall be made in accordance with the Contract Drawings, Specifications and Supplementary Drawings, if any. The Shop Drawings shall be accurate and distinct and give all the dimensions required for the fabrication, erection and installation of the work.
- 3. SIZE OF DRAWINGS - The Shop Drawings, unless otherwise directed, shall preferably be on sheets of the same size as the Contract Drawings, with a one half (1/2) inch marginal space on each side and a two (2) inch marginal space for binding on the left side.
- 4. SCOPE OF DRAWINGS - Shop Drawings shall be numbered consecutively and shall accurately and distinctly represent the following:
  - a. All working and erection dimensions.
  - b. Arrangements and sectional views.
  - c. Necessary details, including performance characteristics, and complete information for making necessary connections with other work.
  - d. Kinds of materials including thicknesses and finishes.
  - e. All other information required by the Commissioner.
- 5. TITLES AND REFERENCE - Shop Drawings shall be dated and contain:
  - a. Name of the Project, DDC Project Number and Contract Number.
  - b. The descriptive names of equipment, or materials covered by the Contract Drawings and the classified item number or numbers, if any, under which it is, or they are required.
  - c. The locations or points at which materials, or equipment, are to be installed in the work.
  - d. Cross references to the section number, detail number and paragraph number of the Contract Specifications.

- e. Cross references to the sheet number, detail number, etc., of the Contract Drawings.

NOTE: In addition to the above requirements, the Shop Drawings shall bear a stamp having the following wording:

FIELD MEASUREMENTS - The Contractor certifies that it has verified and supplemented the Contract Drawings by taking all required field measurements, that said measurements correctly reflect all field conditions and that this Shop Drawing incorporates said measurements.

6. THE SUBMISSION OF SHOP DRAWINGS - The Shop Drawings shall be accompanied by a letter of transmittal, in triplicate, containing the name of the Project, the name of the Contractor, the number of Drawings, titles and any other requirements. Re-submission of the same drawings shall bear the original number of the drawings and the original titles.
7. PRELIMINARY SUBMISSION - The Contractor shall submit one (1) set of sepia Shop Drawings to the Consultant Architect/Engineer for their approval. A satisfactory Shop Drawing will be stamped "Approved", be dated and one (1) copy thereof will be returned to the Contractor by letter. Should the Shop Drawing not be approved by the Consultant Architect/Engineer, the Commissioner will return the sepia Shop Drawings with the necessary corrections and changes to be made as indicated thereon.
8. REVISIONS - The Contractor must make such corrections and changes and again submit one (1) set of sepia drawings for the approval of the Consultant Architect/Engineer. The Contractor shall revise and resubmit the Shop Drawing as required by the Consultant Architect/Engineer until approval thereof is obtained. However, Shop Drawings which have been stamped "Approved As Noted" shall be considered an "Approved" Shop Drawing and NEED NOT be revised and resubmitted.
- No work called for by the Shop Drawings shall be done until the approval of the said drawings by the Consultant Architect/Engineer is given. In addition to the foregoing Shop Drawing transmissions, a copy of any Shop Drawing prepared by any of the Contractors which Shop Drawing indicated work related to, adjacent to, impinging upon, or affecting work to be done by other Contractors, shall be transmitted to the Contractors so affected. These approved Shop Drawings shall be delivered to the Resident Engineer for distribution to the affected Contractors at the job meetings and shall be so recorded in the minutes.
9. FINAL SUBMISSION - When approval of any Shop Drawing is obtained by the Contractor, it shall insert the date of the approval of the drawing and promptly furnish the Consultant Architect/Engineer with eight (8) additional prints of the approved Drawings. No work called for by the Shop Drawings shall be performed until the approval of the said drawings by the Commissioner is given. In addition to the foregoing Shop Drawing transmissions, a copy of any Shop Drawing prepared by any of the Contractors which indicates work related to, adjacent to, impinging upon, or affecting work to be done by other Contractors, shall be transmitted to the Contractors so affected. These approved Shop Drawings shall be delivered to the Resident Engineer for distribution to the affected Contractors at the job meetings and shall be so recorded in the minutes.
10. VARIATIONS - If the Shop Drawings show variations from the Contract requirements because of standard shop practice or other reasons, the Contractor shall make specific mention of such variations in its letter of submittal. Approval of the Shop Drawings shall constitute approval of the subject matter thereof only and not of any structural apparatus shown or indicated.
11. CATALOGUE CUTS - Except as otherwise prescribed herein, the submission of catalogue cuts shall conform to the procedures specified for Shop Drawings.
- a. PRELIMINARY SUBMISSION - The Contractor shall submit three (3) sets of catalogue cuts to the Consultant Architect/Engineer to approve. A satisfactory catalogue cut will be stamped

"Approved", be dated and one (1) copy thereof will be returned to the Contractor by letter. Should the catalogue cut not be approved by the Commissioner, the Commissioner will return one (1) set of such catalogue cuts with the necessary corrections and changes to be made indicated thereon.

- b. REVISIONS - The Contractor shall make such corrections and changes and again submit four (4) sets of the catalogue cuts, in duplicate, for the approval of the Commissioner. The Contractor shall revise and resubmit the catalogue cuts as required by the Consultant Architect/Engineer until approval thereof is obtained.

However, catalogue cuts which have been stamped "Approved As Noted" shall be considered an "Approved" catalogue cut and need not be revised and resubmitted.

- c. FINAL SUBMISSION - When approval of any catalogue cut is obtained by the Contractor, it shall insert the date of the approval and promptly furnish the Consultant Architect/Engineer with four (4) additional sets of the approved catalogue cuts.

- 12. RESPONSIBILITY OF CONTRACTOR - The approval of Shop Drawings will be general and shall not relieve the Contractor of responsibility for the accuracy of such Shop Drawings, nor for the proper fitting and construction of the work, nor of the furnishing of materials or work required by the Contract and not indicated on the Shop Drawings. Approval of Shop Drawings shall not be construed as approving departures from the Contract Drawings, Supplementary Drawings or Specifications.

- 13. SHOP DRAWINGS AND MATERIAL SAMPLES SCHEDULE - The Shop Drawings and Material Samples Schedule is set forth in Schedule F, which is included in the Addendum to the General Conditions. Completion of this Schedule shall be in accordance with Article 1.41 (A) of these General Conditions.

- 14. PROCEDURE FOR PREPARING, FORWARDING, CHECKING AND RETURN - of all Shop Drawings shall be, generally, as follows:

The Contractor shall make available to its subcontractors the necessary Contract Documents and have them determine dimensions and conditions in the field, particularly with reference to coordination with other trades or work under other Contractors. The Contractor shall direct its subcontractors to prepare Shop Drawings for submission to the Consultant Architect/Engineer in accordance with the requirements of these General Conditions. The Contractor shall also direct its subcontractors to "Ring Up" corrections made on all re-submissions for approval, so as to be readily seen, and that the symbol "sub" be used to identify the source of the correction or information that has been added.

The Contractor shall:

- a. Review and be responsible to the Commissioner, or the Commissioner's authorized representative, for information shown on subcontractor's Shop and Installation drawings and manufacturers' date, and also for conformity to Contract Documents.
- b. "Ring Up" corrections made on all submissions for approval, so as to be readily seen, and that the symbol "GC", "PL", "HVAC" or "EL" be used to indicate that the correction and/or information added was made by the Contractor.
- c. Clearly designate which trade is to perform the work when the term, "work by others" or other similar phrases are indicated on the Contract Drawings before submission to the Consultant Architect/Engineer.
- d. Stamp submissions "Recommended for Approval", date and forward to the Commissioner or the Commissioner's authorized representative.

In order to expedite Shop Drawing procedures, the Contractor shall write a Shop Drawing status letter directly to the Consultant Architect/Engineer, each week, containing the following subject matter:

- (1) A list of all Shop Drawings which have been sent to but not returned by the Architect or Engineer giving name of the subcontractor, drawing number, title and date of submission.
- (2) An indication of the desired priority of the return, if necessary.

NOTE: The status letter shall be prepared and sent at a given time each week, preferably Friday afternoon, to enable the Consultant Architect/Engineer to receive the letter on Monday morning. This procedure shall be maintained throughout the active Shop Drawing period of construction.

**B. INTEGRATED DRAWINGS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. The Contractor for General Construction Work shall provide to the Contractor for Heating, Ventilating and Air Conditioning Work reflected ceiling starting points or plans, beam soffit elevations, ceiling heights, roof openings, etc.
2. The Contractor for Heating, Ventilating and Air Conditioning Work shall prepare a drawing or drawings showing ductwork, heating and sprinkler piping. This drawing shall include location of grilles, registers, etc. and access doors in hung ceilings. Locations shall be fixed by elevations and dimensions from column center lines and/or walls.
3. The Contractor for Heating, Ventilating and Air Conditioning Work shall prepare and distribute to each of the other Contractors, the Resident Engineer and to the Consultant Architect a sepia of the above.
4. The Contractor for General Construction Work shall lay out on its sepia, the reflected ceiling plan, beam soffit elevations, ceiling heights, roof openings, etc.
5. The Contractor for Plumbing Work shall lay out its piping, valves, cleanouts, etc., indicating locations and elevations and shall indicate the necessary access doors.
6. The Contractor for Electrical Work shall indicate its fixtures, large conduit runs, clearances, pull boxes, junction boxes, sound system speakers, etc.
7. The Resident Engineer will call as many meetings with the Contractors as are necessary to resolve any conflicts that become apparent. The Resident Engineer will call on the services of the Consultant Engineer or Architect where necessary. The Resident Engineer is responsible for the coordination of the Contract Drawings.
8. Upon resolution of the conflicts, each Contractor shall enter its own work on the Resident Engineer's sepia, which will become the Master or Integrated Drawing. The Master Sepia shall be signed by each Contractor to indicate its acceptance of the arrangement of the work.
9. A reproducible copy of the Master Integrated Drawing or Drawings will be prepared and distributed by the Contractor for Heating, Ventilating and Air Conditioning Work to each Contractor and to the Consultant Architect for information.
10. Each Contractor shall prepare its Shop Drawings in accordance with the Integrated Drawings. No work will be permitted without approved Shop Drawings. It is therefore essential that this procedure be instituted as quickly as possible.
11. Contractors shall be held strictly accountable for cooperation in preparing the Integrated Drawing or Drawings.

C. RECORD DRAWINGS

1. The Department of Design and Construction, at the start of construction (kick-off meeting), will furnish to each Contractor at no cost a complete set of Contract Document mylars pertaining to the work to be performed under its Contract. It is the responsibility of each Contractor to modify the Contract Drawings to indicate all changes and corrections, if any, occurring in the work as actually installed. The Contractor is required to furnish all other mylar drawings if necessary such as Addenda Drawings and Supplementary Drawings as may be necessary to indicate all work in detail as actually completed.

NOTE TO CONTRACTOR: All professional seals must be blocked out. Title box complete with project title and Consultants' names will remain.

2. Each Contractor shall maintain, during the progress of the work, an accurate record of the work as actually installed, on Record Drawings, on mylar, in ink. These Record Drawings shall be made available to the Resident Engineer upon request.

The Contractor's attention is particularly directed to the necessity of keeping accurate records of all subsurface and concealed work, so that the Record Drawings may contain this information in exact detail and location. Record Drawings should also show all connections, valves, gates, switches, cut-outs and similar operating equipment.

Before substantial completion payment, each Contractor shall furnish to the Commissioner one (1) complete set of mylar Record Drawings, in ink indicating all of the work and locations as actually installed, plus one (1) set of paper prints which will be furnished to sponsoring agency by Department of Design and Construction.

3. Record Drawings shall be of the same size as that of the Contract Drawings, with a one (1) inch margin on three (3) sides and a two (2) inch margin on the left side.
4. Each Record Drawing shall bear the legend "RECORD DRAWING" in heavy block lettering, one half (1/2) inch high, and contain the following data:

RECORD DRAWING

Contractor's Name \_\_\_\_\_

Contractor's Address \_\_\_\_\_

Made by \_\_\_\_\_ Date \_\_\_\_\_

Checked by \_\_\_\_\_ Date \_\_\_\_\_

Commissioner's Representatives

(Resident Engineer)	DDC
(Plumbing Inspector)	DDC
(Heating & Ventilating Inspector)	DDC
(Electrical Inspector)	DDC

5. RECORD DRAWING TITLE SHEET - Each Contractor shall prepare a title sheet, the same size as Record Drawings, which shall contain the following:

a. Heading:

The City of New York  
Department of Design and Construction  
Division of Structures

- b. Capital Budget Project Number (CAPIS ID)

- c. Name and Location of Project
  - d. Contractor's Name and Address
  - e. Record of changes (a caption description of work affected, and the date and number of Change Order or other authorization)
  - f. List of Record Drawings
6. All changes from Contract Drawings shall be distinctly encircled and identified by Change Order number correlating to changes listed on the "Title Sheet." The Contractor shall show within the encircled areas the work as actually installed.
  7. BULLETINS, OPERATING AND SERVICE MANUALS - Where the Contractor has submitted prints in the form of technical bulletins, operating and service manuals, or other printed matter as a Shop Drawing, having diagrams or drawings thereon of a material or equipment installed in the work, the Contractor shall furnish three (3) sets thereof so that the Commissioner may have all the necessary information for the proper operation maintenance and repair of the material and equipment and the ordering of spare parts. All bulletins and operating and service manuals shall be compiled and indexed in book form for each Contract.

#### **1.06 Approval of Materials**

- A. LOCAL LAWS - All materials, appliances and types or methods of construction shall be in accordance with the Specifications and shall in no event be less than that necessary to conform to the requirements of the Building Code of the City of New York, Administrative Code and Charter of the City of New York.
- B. APPROVAL OF MANUFACTURER - The names of proposed manufacturers, material suppliers, and dealers who are to furnish materials, fixtures, equipment, appliances or other fittings shall be submitted to the Commissioner for approval as early as possible to afford proper review and analysis.
- C. REPUTE OF MANUFACTURER - No manufacturer will be approved for any materials to be furnished under the Contract unless it shall be of good reputation, shall have a plant of ample capacity and shall have successfully produced similar products. All required approvals for legal use of materials and equipment such as B.S.A. and M.E.A. must be obtained prior to installation.
- D. ALL MATERIALS - fixtures, fittings, supplies and equipment furnished under the Contract shall be new and unused, except as approved by the Agency, and of standard first-grade quality and of the best workmanship and design. The City of New York encourages the use of recycled products where practical.
- E. INFORMATION TO SUPPLIERS - In asking for prices on materials under any item of the Contract, the Contractor shall provide the manufacturer or dealer with such complete information from the Specifications and Contract Drawings as may in any case be necessary, and in every case the Contractor shall inform the manufacturer or dealer of all the General Conditions and requirements herein contained.
- F. STANDARD REFERENCES - Whenever reference is made to the furnishing of materials or testing thereof to conform to the standards of any technical society, organization or body, it shall be construed to mean the latest standard, code, specification or tentative specification adopted and published at the date of advertisement for bids, even though reference has been made to an earlier standard.
- G. REFERENCES - Reference to a technical society, organization or body may be made in the Specifications by abbreviations in accordance with the following list:

A.I.A.                      for American Institute of Architects

A.C.I.	for American Concrete Institute
A.G.A.	for American Gas Association
A.G.M.A.	for American Gear Manufacturer Association
A.I.E.E.	for American Institute of Electrical Engineers
A.I.S.C.	for American Institute of Steel Construction
A.S.A.	for American Standards Association
A.S.T.M.	for American Society for Testing Materials
A.W.S.C.	for American Welding Society Code
A.W.W.A.	for American Water Works Association
B.S. & A.	for New York City Board of Standards & Appeals
C.I.P.R.A.	for Cast Iron Pipe Research Association
B.G. & E.	for Bureau of Gas & Electricity of the City of New York
FED. SPEC.	for Federal Specification
I.P.C.E.A.	for Insulated Power Cable Engineer's Association
NAVY SPEC.	for Navy Department Specification
N.E.C.	for National Electric Code
N.E.M.A.	for National Electrical Manufacturers Association
N.Y.B.C.	for New York City Building Code
N.Y.E.C.	for New York City Electrical Code
N.Y. SPEC.	for New York City Department of Purchase Specification
P.P.S.	for Power Piping Society
S.A.E.	for Society of Automotive Engineers Standards
S.H.B.I.	for Steel Heating Boiler Institute

- H. STANDARD SPECIFICATIONS - When no reference is made to a code, standard or specification, the Standard Specifications of the ASTM or the AIEE, as the case may be, shall govern.
- I. SAMPLES OF MATERIALS - The Contractor shall submit to the Commissioner for approval, samples of all materials specified to be used in the project.
1. For samples of materials involving electrical work of any nature, see the General Electrical Requirements.
  2. Samples shall be in triplicate, of sufficient size to show the quality, type, range of color, finish and texture of the material. However, in addition thereto, after approval, three (3) additional samples showing the material, color and texture of all interior finishes, including the finishes of exposed built-in equipment, trim, glazing, fittings and fixtures, etc., shall also be furnished. The sizes of these additional samples shall be as directed by and acceptable to the Commissioner.
  3. Each of the samples shall be labeled, bearing the name and quality of the material, the Contractor's name, date, Contract and project, and the related Specification or Contract Drawing reference to the samples submitted.
  4. A letter of transmittal, in triplicate, from the Contractor requesting approval must accompany all such samples.
  5. Transportation charges to the Commissioner's office must be prepared on all samples forwarded.
  6. Samples for testing purposes shall be as required in the Specifications.
- J. SAMPLES ON DISPLAY - When samples are specified to be equal to samples in the office of the Commissioner, they shall be carefully examined by the bidders and by those whom the bidder expects to employ for the furnishing of such materials.
- K. TIMELY SUBMISSIONS LOG/SCHEDULE - Samples shall be submitted in accordance with approved Shop Drawing log so as to permit proper consideration without delaying any operation under the project. Materials should not be ordered until approval is received, in writing, from the Commissioner. All materials shall be furnished equal in every respect to the approved samples.

- L. THE APPROVAL OF ANY SAMPLES - will be given as promptly as possible, and shall be only for the characteristic color, texture, strength, or other feature of the material named in such approval, and no other. When this approval is issued by the Commissioner, it is done with the distinct understanding that the materials to be furnished will fully and completely comply with the Specifications, the determination of which may be made at some later date by a laboratory test or by other procedure. Use of materials will be permitted only so long as the quality remains equal to the approved samples and complies in every respect with the Specifications, and the colors and textures of the samples on file in the Office of the Commissioner, for the project.
- M. ACCEPTIBILITY OF TEST DATA - The Commissioner will be the final judge as to acceptability of laboratory test data and performance in service of materials submitted.
- N. VALUABLE SAMPLES - such as hardware, plumbing and electrical fixtures, etc., not destroyed by inspection or test, will be returned to the Contractor and may be incorporated into the work after all questions of acceptability have been settled, providing suitable permanent records are made as to the location of the samples, their properties, etc.
- O. EQUIVALENT QUALITY OF MATERIALS - All materials and equipment which are designated in the Specifications by a number in the catalogue of any manufacturer or by a manufacturer's grade or trade name, are designated for the purpose of describing the article and fixing the standard or the quality and finish. Materials and equipment, which are, in the opinion of the Commissioner, the equivalent to that specified, will be acceptable.
- P. The submission of any material, or article, as the equal of the materials or articles set forth in the Specifications as a standard shall be accompanied by illustrations, drawings, descriptions, catalogues, records of tests, samples and any and all other information essential for judging the equality to the materials, finish and durability of that specified as standard, as well as information indicating satisfactory use under similar operating conditions.
- Q. MANUFACTURER'S DIRECTIONS - Where the Specifications provide that the manufacturer's directions are to be used, such printed directions shall be submitted to the Commissioner.
- R. COMMISSIONER TO SELECT INSPECTORS - Except as specifically provided in the Specifications, the Commissioner will select and designate all persons, firms, or corporations to make or witness each and every inspection, test or analyses, with or without reports.
- S. NOTICE - The Contractor shall give notice in writing to the Commissioner sufficiently in advance of its intention to commence the manufacture or preparation of materials especially manufactured or prepared for use in or as part of the permanent construction. Such notice shall contain a request for inspection, the date of commencement and the expected date of completion of the manufacture or preparation of materials. Upon receipt of such notice, the Commissioner will arrange to have a representative present at such times during the manufacture as may be necessary to inspect the materials, or the Commissioner will notify the Contractor that the inspection will be made at a point other than the point of manufacture, or the Commissioner will notify the Contractor that inspection will be waived.
- T. NO SHIPPING BEFORE INSPECTION - The Contractor shall comply with the foregoing before shipping any material.
- U. CERTIFICATE OF MANUFACTURE - When the Commissioner so requires, the Contractor shall furnish to the Commissioner authoritative evidence in the form of Certificates of Manufacture that the materials to be used in the work have been manufactured and tested in conformity with the Specifications. These certificates shall include copies of the results of physical tests and chemical analyses where necessary, that have been made directly on the product, or on similar products being fabricated by the manufacturer. This may include such approvals as B.S.A., M.E.A., B.E.C. Advisory Board, etc.

- V. ACCEPTANCE - When materials or manufactured products shall comprise such quantity that it is not practical to make physical tests or chemical analyses directly on the product furnished, a certificate stating the results of such tests or analyses of similar materials which were concurrently produced may, at the discretion of the Commissioner, be considered as the basis for the acceptance of such material or manufactured product.
- W. TESTING COMPLIANCE - The testing personnel shall make the necessary inspections and tests, and the reports thereof shall be in such form as will facilitate checking to determine compliance with the Specifications, indicating thereon all analyses and/or test data and interpreted results thereof.
- X. REPORTS - Six (6) copies of the reports shall be submitted and authoritative certification thereof must be furnished to the Commissioner as prerequisite for the acceptance of any material or equipment.
- Y. REJECTIONS - If, in making any test, it is ascertained by the Commissioner that the material or equipment does not comply with the Specifications, the Contractor will be notified thereof, and will be directed to refrain from delivering said materials or equipment, or to promptly remove it from the site or from the work and replace it with acceptable material without cost to the City.
- Z. FURNISH DESIGNATED MATERIAL - Upon rejection of any material or equipment submitted as the equivalent of that specifically named in the Specifications, the Contractor shall immediately proceed to furnish the designated material or equipment.
- AA. COST OF TESTS BORNE BY CITY - Where the City directs test to be performed to determine compliance with the Specifications regarding materials or equipment, and where such compliance is ascertained as a result thereof, the City will bear the cost of such tests.
- BB. COST OF TESTS BORNE BY CONTRACTOR - Where tests are specifically called for in the Specifications to be made by the Contractor, the cost thereof shall be borne by the Contractor and shall be deemed to be included in the Contract price. The expenses of the testing personnel assigned by the City shall not be the Contractor's obligation. The Contractor shall reimburse the City for expenditures incurred in the making of tests on materials and equipment submitted by the Contractor as the equivalent of that specifically named in the Specifications and rejected for non-compliance.

#### **1.07 Delivery of Materials**

- A. MATERIAL ORDERS - The Contractor shall furnish to the Commissioner a copy of each material order, indicating date of order and quantity of material, and shall also notify the Commissioner when materials have been delivered to the site and in what quantities.
- B. AMPLE QUANTITIES - The Contractor shall deliver materials in ample quantities to insure the most prompt and uninterrupted progress of the work so as to complete the work within the Contract time.
- C. CONTAINERS - The manufacturer's containers shall be delivered with unbroken seals and shall bear proper labels.
- D. THE CONTRACTOR SHALL COORDINATE DELIVERIES - in order to avoid delaying or impeding the progress of the work of any related Contractor.
- E. STACKING - All materials shall be properly stacked in convenient places adjacent to the site, or where directed, and protected in a satisfactory manner. Stacked materials shall be so arranged as to not interfere with visibility of traffic control devices.
- F. OVERLOADING - If authority is given to store materials in any part of the project area, they shall be so stored as to cause no overloading.
- G. NO INTERFERENCE - If it becomes necessary to remove and restack materials to avoid impeding the progress of any part of the work or interfering with the work to be done by any other Contractor, the relevant Contractor shall remove and restack such materials at no additional cost to the City.

## **1.08 Temporary Structures**

- A. **FIELD OFFICE FOR CONTRACTOR** - The Contractor shall establish a temporary field office for its own use at the site during the period of construction, at which readily accessible copies of all Contract Documents shall be kept.
- B. The field office shall be located where it will not interfere with the progress of any part of the work or with visibility of traffic control devices.
- C. **CONTRACTOR'S REPRESENTATIVE** - In charge of each office there shall be a responsible and competent representative of the Contractor, duly authorized to receive orders and directions and to put them into effect.
- D. **TELEPHONE ARRANGEMENTS** - Arrangements shall be made by the Contractor whereby its representative may be readily accessible by telephone.
- E. **MATERIAL SHEDS** - used by the Contractor for the storage of its materials shall be kept at locations which will not interfere at any time with the progress of any part of the work or with visibility of traffic control devices.
- F. **SUBSTANTIAL CONSTRUCTION** - All temporary structures shall be of substantial construction and neat appearance, and shall be painted a uniform gray unless otherwise directed by the Commissioner.
- G. **ADVERTISING PRIVILEGES** - The City reserves the right to all advertising privileges. The Contractor shall not cause any signs of any kind to be displayed at the site unless specifically required herein or authorized by the Commissioner.
- H. **CONTRACTOR'S SIGN** - The Contractor shall post and keep posted, on the outside of its field office, office or exterior fence or wall at site of work, a legible sign giving full name of the company, address of the company and telephone number(s) of responsible representative(s) of the firm who can be reached in event of an emergency at any time.

## **1.09 Surveys (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. **LINE AND GRADE** - The City will establish a baseline and bench mark near the site of the work for use of the Contractor in connection with the performance of the work.
- B. **RESPONSIBILITY** - The Contractor shall establish all other lines and elevations required for its work and shall be solely responsible for the accuracy thereof.
- C. **SAFEGUARD ALL POINTS** - Each Contractor shall safeguard all points, stakes, grade marks and bench marks made or established by the Contractor on the work, shall re-establish same if disturbed and bear the entire expense of rectifying the work improperly installed due to not maintaining, not protecting or removing without authorization such established points, stakes, or marks.
- D. **CITY MONUMENTS AND MARKS** - No work shall be performed near City monuments or marks so as to disturb them until the said monuments or marks have been referenced or reset or otherwise disposed of by the relevant Agency or party who installed them.
- E. **FOUNDATIONS** - The Contractor for General Construction Work shall furnish certification from a licensed Surveyor that all portions of the foundation work are located in accordance with the Contract Drawings and at the elevations required thereby. This certification shall show the actual locations and the actual elevations of all the work in relation to the locations and elevations shown on the Contract Drawings, including but not restricted to the following:
  - 1. The locations and elevations of all piles, if any.

2. Elevations of tops of all spread footings, tops of pile caps, and tops of all foundation walls, elevator pit walls and ramp walls.
  3. Location of all footing centers and pier centers including those for exterior wall columns.
  4. Location of all foundation walls including wall columns, elevator pit walls and ramp walls.
- F. **WALL LINES** - After the first courses of masonry or stone have been laid, the Contractor for General Construction Work shall establish the permanent lines of exterior walls. Such Contractor shall furnish promptly, certification from a licensed Surveyor, in the form of signed original drawings showing the exact location of such wall lines, of all portions of all structures. Except at its own risk, the Contractor for General Construction Work shall not proceed further with the erection of walls until the Surveyor's certification has been submitted and verified for correct location of wall lines.
- G. **SURVEYOR** - The Surveyor selected for any of the purposes mentioned in Paragraph E and Paragraph F above, and Paragraph I below, shall be a licensed Surveyor and shall be subject to the approval of the Commissioner. The Surveyor shall not be a regular employee of the Contractor, nor shall the Surveyor have any interest in the Contract. The Surveyor shall not be employed by the Contractor in laying out any work, it being intended that the Surveyor's certification shall represent an independent and disinterested verification of such layout. The Surveyor shall report to the Department of Design and Construction's Resident Engineer each time upon arrival to and departure from the site and review with the Resident Engineer the data required for the project.
- H. **FINAL CERTIFICATION** - Final certification shall be submitted upon completion of the work or upon completion of any subdivision of the work as directed by the Commissioner. Any exceptions or deviations from the drawings shall be noted on the final certificate and there shall be included any maps, plates, notes, pertinent documents and data necessary, in the opinion of the Commissioner, to constitute a full and complete report.
- I. **FINAL SURVEY** - The Contractor for General Construction Work shall submit to the Department of Design and Construction for submission to the Department of Buildings a final Survey by the licensed Surveyor showing the location of the new Structure, before completion of the Structure. This Survey shall show the location of the first tier of beams or of the first floor; the finish grades of the open spaces on the plot; the established curb level and the location of all other Structures on the plan, together with the location and boundaries of the lot or plot upon which the Structure is constructed, curb cuts, all yard dimensions, etc.

#### **1.10 Contractor's Superintendent**

- A. **SUPERINTENDENT** - The Contractor shall devote its time and personal attention to the work and shall employ and retain at the project site, from the commencement until the entire completion of the work, a Contractor's Superintendent competent and capable of maintaining proper supervision and care of the work and acceptable to the Commissioner, who, in the absence of the Contractor, and irrespective of any superintendent or foreman employed by any subcontractor, shall see that the instructions of the Commissioner are carried out.
- B. **REPLACEMENT** - The Contractor's Superintendent on the job shall not be changed or removed without the consent of the Commissioner.

#### **1.11 Permits**

The Contractor shall comply with all local, state and federal laws, rules and regulations affecting the Work of this Project, including, without limitation, (1) obtaining all necessary permits for the performance of the Work prior to commencement thereof, and (2) complying with all requirements for the disposal of demolition and/or construction debris, waste, etc., including disposal in City landfills. The Contractor shall be responsible for all costs in connection with such regulatory compliance, unless otherwise specified in the Contract.

### **1.12 Transportation**

- A. **AVAILABILITY** - It shall be the duty of the Contractor to determine the availability of transportation facilities and dockage for the use of its employees, equipment and material and the conditions under which such use will be permitted.
- B. **COSTS** - If transportation facilities and dockage are available and are permitted to be used by the governmental agency having jurisdiction, the Contractor shall pay all necessary costs and expenses, and abide by all rules and regulations promulgated in connection therewith.
- C. **VEHICLES** - With respect to the use of vehicles on highways and bridges, the Contractor's attention is directed to the limitations set forth in the Rules of the City of New York, Title 34, Chapter 4, Section 4-15.
- D. **CONTINUED USE** - It is understood that the Commissioner makes no warranty as to the continued use by the Contractor of such facilities.

### **1.13 Sleeves And Hangers (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. **COORDINATE TO PROGRESS SCHEDULE** - Contractors required to furnish and install conduits, outlets, piping sleeves, boxes, inserts and all other materials and equipment necessary to be built into the work to be performed by the Contractor for General Construction Work, shall promptly furnish and set such sleeves or other materials in conformity with the requirements of the project.
- B. **COOPERATION OF CONTRACTORS** - All Contractors shall fully cooperate with each other in connection with the performance of the above work as "cutting in" new work is neither contemplated nor will it be tolerated.
- C. **TIMELINESS** - In the event that timely delivery of sleeves and other materials cannot be made, and to avoid delay, the affected Contractor may arrange to have boxes or other forms set at the locations where the piping or other material is to pass through or into the slabs, walls or other work. Upon the subsequent installation of the sleeves or other material, the Contractor for General Construction Work shall fill around them with materials as required by the Contract. The necessary expenditures incurred for the boxing out and filling in shall be borne by the Contractor or Contractors responsible therefore.
- D. **INSERTS** - The Contractor for General Construction Work is to install strip inserts four (4) foot on center and perpendicular to beams in ceiling slabs of boiler, machine and mechanical equipment rooms. Inserts are to be installed for strippable concrete slabs only.

### **1.14 Cutting And Patching**

- A. **RESPONSIBILITY** - Each Contractor shall do all cutting, patching and restoration required by its work, unless otherwise particularly specified in the Specifications of its Contract.
- B. **RESTORE WORK** - Each Contractor shall restore any work they damage that is the work of another Contractor.
- C. **COMPETENT WORKERS** - All restoration work shall be done to the satisfaction of the Commissioner by competent workers skilled in the trade required by such restoration. If, in the judgment of the Commissioner, workers engaged in restoration work are incompetent, they shall be replaced immediately by competent workers.
- D. **REMOVALS** - Each Contractor must remove from the premises all demolished materials of every nature or description resulting from cutting, patching and restoration work, in accordance with the requirements hereinafter stipulated under article on REMOVAL OF RUBBISH AND SURPLUS MATERIALS.

**1.15 Temporary Heat (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

**A. GENERAL**

1. Definition - The provision of Temporary Heat shall mean the provision of heat in order to permit construction to be performed in accordance with the Progress Schedule during all seasons of the year and to protect the work from the harmful effects of low temperature. In the event the building, or any portion thereof, is occupied during construction, the provision of Temporary Heat shall include the provision of heat to permit normal operations in such occupied areas.
  - a. The provision of Temporary Heat shall be in accordance with the temperature requirements set forth in Paragraph (c) below.
  - b. The provision of Temporary Heat shall include the provision of: 1) all fuel necessary and required, 2) all equipment necessary and required, and 3) all operating labor necessary and required. Operating labor shall mean that minimum force required for the safe day to day operation of the system for the provision of Temporary Heat and shall include, without limitation, heating maintenance labor and/or Firewatch as required by NYC Fire Department regulations. Operating labor may be required seven (7) days per week and during other than normal working hours, for the period of time required by seasonal weather conditions.
  - c. In the event the building, or any portion thereof, is occupied and the Project involves the replacement, modification and/or shut down of the permanent heating system, or any key component thereof; and such system is a combined system which furnishes domestic hot water for the building occupants, the provision of Temporary Heat shall include the provision of domestic hot water at the same temperature as the system which is being replaced. Domestic hot water shall be provided in accordance with the phasing requirements set forth in the Contract Documents.
2. Responsibility – The Contractor responsible for the provision of Temporary Heat, and all expenses in connection therewith, shall be as set forth below.
  - a. Projects Involving Enclosure of the Building
    - (1) Prior to Enclosure - Until the Commissioner determines that the building has been enclosed, as set forth in Paragraph (b) below, each Contractor shall be responsible for the provision of its own Temporary Heat.
    - (2) Post Enclosure - Once the Commissioner determines that the building, or any portion thereof, has been enclosed, as set forth in Paragraph B below, the Contractor for Heating, Ventilating and Air Conditioning Work ("HVAC Work") shall be responsible for the provision of Temporary Heat by one or more of the following means: 1) by an existing heating system (if any), 2) by a permanent heating system which is being installed as part of the Project, or 3) by a temporary heating system(s). The Contractor for HVAC Work shall, within two (2) weeks of the kick-off meeting, submit to DDC for review its proposed plan to provide Temporary Heat. Such plan is subject to approval by the Resident Engineer. The Contractor for HVAC Work shall provide Temporary Heat in accordance with the approved plan until written acceptance by the Commissioner of the work of all Contractors, including punch list work, unless directed otherwise in writing by the Commissioner. The responsibility of the Contractor for HVAC Work provided for herein is subject to the exception set forth in Paragraph H.3.b.(2) below.
  - b. Projects not involving Enclosure of the Building
    - (1) If the Project involves the installation of a new permanent heating system if one did not exist previously, or the replacement, modification and/or shut down of the existing

permanent heating system, or any key component thereof, the Contractor for HVAC Work shall be responsible for the provision of Temporary Heat, except as otherwise provided in Paragraph H.3.b.(2) below.

- (2) If the Project does not involve the installation of a new permanent heating system if one did not exist previously, or the replacement, modification and/or shut down of the existing permanent heating system, or any key component thereof; there is no Contractor responsibility of the provision of Temporary Heat, unless otherwise specified in the Contract Documents. However, if the Commissioner, pursuant to Paragraph H.3.b.(1) below, determines that the provision of Temporary Heat is necessary due to special and/or unforeseen circumstances, the Contractor for HVAC Work shall be responsible for the provision of Temporary Heat and such Contractor shall be paid for the same in accordance with Paragraph H.3.b.(1).

## B. ENCLOSURE OF STRUCTURES

1. Notification - The Contractor for General Construction Work shall notify all other Contractors and the Resident Engineer at least 30 days prior to the anticipated date that the building(s) will be enclosed.
2. Commissioner Determination - The Commissioner shall determine whether the building, or any portion thereof, has been enclosed. As indicated in Paragraph A above, once the building has been enclosed, the Contractor for HVAC Work shall be responsible for the provision of Temporary Heat. The Commissioner's determination with respect to building enclosure shall be based upon all relevant facts and circumstances, including without limitation, 1) whether the building meets the criteria set forth in Paragraph 3 below, and 2) whether the openings in the building, such as doorways and windows, have been sufficiently covered so as to provide reasonable heat retention and protection from the elements.
3. Criteria for enclosure
  - a. Roof Area
    - (1) A building shall be considered to be roofed when the area to be roofed is covered by a permanent structure and all openings through the permanent structure are covered and protected by temporary covers in Paragraph (c) below.
    - (2) Intermediate floor structures of multi-floor buildings shall be considered to be roofed subject to the same requirements of the building roof.
    - (3) The final roofing system need not be in place for the building or structure to be determined to be enclosed; provided, however, all openings through the permanent structure covering the roof must be covered and protected by temporary covers, as described in Paragraph (c) below.
  - b. Walls - For the walls to be determined to be enclosed, permanent exterior wall elements or facing material must be in place and all openings must be covered and protected by temporary covers, as described in Paragraph (c) below.
  - c. Temporary Covers - In order to be acceptable, temporary covers must be securely fixed to prevent the entrance of rain, snow and direct wind. The minimum material requirements for temporary covers are as follows: 1) minimum 10 mil. plastic, 2) minimum 12 ounce waterproof canvas tarpaulins, or 3) a minimum three-eighths (3/8) inch thickness exterior grade plywood.
  - d. Temporary covers for openings shall be the responsibility of the Contractor for General Construction Work, and such work shall be deemed included in the Contractor for General Construction Work's bid price.

C. TEMPERATURE REQUIREMENTS

1. Unoccupied Buildings - The temperature requirement for the provision of Temporary Heat in unoccupied buildings shall be the GREATER of the following: 1) 50 degrees Fahrenheit, or 2) the temperature requirement for the particular type of work set forth in the Contract Documents.
2. Occupied Buildings - The temperature requirement for the provision of Temporary Heat in occupied buildings, or portions thereof, shall be the GREATER of the following: 68 degrees Fahrenheit or the temperature requirement for the particular type of work set forth in the Contract Documents.

D. DURATION

1. The Contractor for HVAC Work shall be required to provide Temporary Heat until written acceptance by the Commissioner of the work of all Contractors, including punch list work, unless directed otherwise in writing by the Commissioner. The Contractor for HVAC Work shall be responsible for the provision of Temporary Heat for the time specified herein, regardless of any delays in completion of the Project, including delays that result in the commencement of the provision of Temporary Heat during a season that is later than that which may have been originally anticipated. The Contractor for HVAC Work shall include in its Total Bid Price all expenses in connection with the provision of Temporary Heat in accordance with the requirements specified herein.
2. The total Contract duration is set forth in consecutive calendar days in Schedule A of the General Conditions. The Table set forth below indicates the number of full heating seasons that are deemed included in various contract durations, which are specified in consecutive calendar days (ccds). At a minimum, a full heating season shall extend from October 15<sup>th</sup> to April 15<sup>th</sup>.

Contract Duration	Full Heating Seasons Required
up to 360 ccds	1 full heating season
360 to 720 ccds	2 full heating seasons
more than 720 ccds	3 full heating seasons

E. METHOD OF TEMPORARY HEAT

1. The method of temporary heat shall be in conformance with all applicable laws, rules and regulations. Prior to implementation, such method shall be subject to the written approval of the Commissioner.
2. The method of temporary heat shall:
  - a. Not cause the deposition of dirt or smudges upon any finished work or cause any defacement or discoloration to the finished work.
  - b. Not be injurious or harmful to people or materials.
3. No open fires will be permitted.
4. Electric heating will not be permitted unless required by Contract Documents and Specifications or otherwise approved by the Commissioner.
5. Direct-fired equipment will be allowed in construction areas where the use of such equipment will not damage or deteriorate the construction or finishes or be harmful to persons working in the area.

F. TEMPORARY HEATING SYSTEM

1. The temporary system for the provision of Temporary Heat provided by the Contractor for HVAC

Work following enclosure of the building shall be complete including, but not limited to, torpedo blowers and/or propane heaters subject to provisions of paragraph E above), boilers and fuel storage, pumps, radiators, unit heaters, water and heating piping, insulation and controls. The temporary system for the provision of Temporary Heat shall be capable of maintaining the minimum temperature requirements set forth in Paragraph C above.

G. THE CONTRACTOR FOR GENERAL CONSTRUCTION WORK

1. The Contractor for General Construction Work shall coordinate with the Contractor for HVAC Work in the work of providing Temporary Heat, and shall so coordinate its operations as to insure sufficient and timely performance of the work under all Contracts. The Contractor for General Construction Work shall supply and pay for all water required and used in the building for the operation of the heating system(s) for the purpose of Temporary Heat. The Contractor for General Construction Work shall include all expenses in connection with the supply of water for Temporary Heat in its Total Bid Price. During the period in which Temporary Heat in an enclosed building is being furnished and maintained by the Contractor for HVAC Work, the Contractor for General Construction Work shall, in order to provide proper ventilating and drying, open and close the windows and other openings when necessary for the proper execution of the work and also when directed by DDC. The Contractor for General Construction Work shall maintain all permanent or temporary enclosures at its own expense.

H. THE CONTRACTOR FOR HVAC WORK

1. Use of Permanent Heating System for Temporary Heat after Building Enclosure
  - a. The Contractor for HVAC Work shall provide all labor and materials to promptly furnish and set all required equipment and convectors and/or radiators, piping, valves, fitting, etc., in ample time for their use for the provision of Temporary Heat after enclosure of the building.
  - b. New portions of the permanent heating system that are used for furnishing Temporary Heat shall be left in near perfect condition when delivered to the City for operation. Any repairs required, other than for ordinary wear and tear on the equipment, shall be made by the Contractor for HVAC Work at his expense. The starting date for the warranty or guarantee period for such equipment shall be the date of Substantial Completion acceptance.
  - c. In the event that the Contractor for HVAC Work does not advance the installation of the permanent heating system in sufficient time to permit its use for Temporary Heat as determined by DDC, the Contractor for HVAC Work shall furnish and install a separate system for the provision of Temporary Heat as required to maintain the minimum temperature requirements set forth in Paragraph C above.
2. All equipment for the system for the provision of Temporary Heat shall be placed so as to comply with the requirements specified hereinbefore, and shall be connected, disconnected and suitably supported and located so as to permit construction work, including finish work such as wall plastering and painting, to proceed. The installation of the system for the provision of Temporary Heat by the Contractor for HVAC Work, including the placing of ancillary system equipment, shall be coordinated with the operations of all Contractors so as to insure sufficient and timely performance of the work of all Contractors. Once the permanent heating system is operating properly, the Contractor for HVAC Work shall remove all portions of the system for Temporary Heat which are not part of the permanent heating system.
3. Temporary Heat Allowance for Special Conditions or and/or Unforeseen Circumstances.
  - a. The City has established an allowance in the Contract for HVAC Work for payment of costs and expenses in connection with the provision of Temporary Heat as set forth herein. The amount of such allowance is set forth on the Bid Form for the Contract for HVAC Work and shall be included in the Total Bid Price of the Contractor for HVAC Work. The Contractor for HVAC Work shall only be entitled to payment from this allowance under the conditions and in

accordance with the requirements set forth below. In the event this allowance or any portion thereof remains unexpended at the conclusion of the Contract, such allowance shall remain the sole property of the City. Should the amount of the allowance be insufficient to provide payment for the expenses specified below, the City will increase the amount of the allowance.

b. The allowance set forth herein may be utilized only under the conditions set forth below.

- (1) In the event the Project does not involve the installation of a new permanent heating system if one did not exist previously, or the replacement, modification and/or shut down of the existing permanent heating system, or any key component thereof, and the Commissioner determines that the provision of Temporary Heat is necessary due to special and/or unforeseen circumstances, the Contractor for HVAC Work shall be responsible for the provision of Temporary Heat, as directed by the Commissioner. The City shall pay such Contractor for all costs for labor, material, and equipment necessary and required for the same. Payment shall be made in accordance with Article 26 of the Contract, except that the cost of fuel shall be as set forth in Paragraph (c) below.
- (2) In the event that after enclosure of the building, the Commissioner determines that (i) Contractors other than the Contractor for HVAC Work have not sufficiently advanced the work of their contracts that is necessary and required to permit the Contractor for HVAC Work to use the permanent or other heating equipment for the provision of Temporary Heat, and (ii) the Contractor for HVAC Work does not bear any responsibility for such other Contractors' failure to advance the work, the City shall pay the Contractor for HVAC Work for all differential costs for labor, material, and equipment necessary and required for the provision of a substitute system(s) for the provision of Temporary Heat or portions thereof in lieu of the permanent or other systems intended for Temporary Heat. Payment shall be made in accordance with Article 26 of the Contract, except that the cost of fuel shall be as set forth in Paragraph (c) below.
- (3) In the event the Commissioner determines that there is a need for maintenance of the permanent heating system by the Contractor for HVAC Work after written acceptance by the Commissioner of the work of all Contractors, and that the need for such maintenance is not the fault of the Contractor for HVAC Work, the Contractor for HVAC Work shall provide the required maintenance of the permanent heating system for the period of time directed by the Commissioner. The City shall pay the Contractor for HVAC Work for the cost of direct labor and fuel necessary and required in connection with such maintenance, excluding the cost of any foremen or other supervision. Payment shall be made in accordance with Article 26 of the Contract, except that the cost of fuel shall be as set forth in Paragraph (c) below.

- c. Payment for Fuel Costs - Payment from the allowance set forth herein for the cost of fuel necessary and required to operate the system for the provision of Temporary Heat or to maintain the permanent heating system under the conditions set forth in Paragraph b above shall be limited to the direct cost of such fuel. The Contractor for HVAC Work shall not be entitled to any overhead and/or profit for such fuel costs. In order to receive payment for such fuel costs, the Contractor for HVAC Work must present original invoices for the same. DDC reserves the right to furnish the required fuel.
- d. Deduction - In the event that any amount of the allowance set forth herein is expended for payment to the Contractor for HVAC Work under the circumstances set forth in Paragraph b.(2) above, the Commissioner shall deduct and retain such amount out of moneys that are due and owing hereunder to the other Contractor(s) responsible for the failure to advance the work, as determined by the Commissioner. In the event the amount expended from the allowance exceeds the total sum due and owing to such other Contractor(s), such excess shall be paid to the City by such other Contractor(s) immediately upon demand.

#### I. THE CONTRACTOR FOR ELECTRICAL WORK

1. The Contractor for Electrical Work shall be responsible for providing the items set forth below and shall include all expenses in connection with such items in its Total Bid Price. The Contractor for Electrical Work shall provide such items promptly when required and shall in all respects coordinate its work with the Contractor for General Construction Work and the Contractor for HVAC Work in order to facilitate the provision of Temporary Heat by the Contractor for HVAC Work.
  - a. The Contractor for Electrical Work shall provide all labor, materials, equipment and power necessary and required to furnish and maintain any temporary or permanent electrical connections to all equipment specified to be connected as part of the work of his Contract.
  - b. The Contractor for Electrical Work shall supply and pay for all power necessary and required for the operation of the system for the provision of Temporary Heat and/or the permanent heating system used for Temporary Heat by the Contractor for HVAC Work. Such power shall be provided by the Contractor for Electrical Work for the duration the Contractor for HVAC Work is required to provide Temporary Heat, as set forth in Paragraph D above.
2. In providing the items set forth in Paragraph 1 above, the Contractor for Electrical Work is advised that labor may be required seven (7) days a week and/or during other than normal working hours for the period of time required by seasonal weather conditions.

**J. THE CONTRACTOR FOR PLUMBING WORK**

1. The Contractor for Plumbing Work shall be responsible for providing all labor, materials and equipment necessary and required to furnish and maintain all temporary or permanent connections to all equipment or plumbing outlets specified to be provided as part of the work of his Contract. The Contractor for Plumbing Work shall include all expenses in connection with such items of work in its Total Bid Price. The Contractor for Plumbing Work shall provide such items of work promptly when required and shall in all respects coordinate its work with the Contractor for General Construction Work and the Contractor for HVAC Work in order to facilitate the provision of Temporary Heat by the Contractor for HVAC Work.
2. In the event portions of the permanent plumbing equipment furnished by the Contractor for Plumbing Work as part of the work of his Contract are used for the provision of Temporary Heat by the Contractor for HVAC Work, either during construction or prior to acceptance by the City of the complete plumbing system, the Contractor for Plumbing Work shall be responsible to provide such plumbing equipment to the City in near perfect condition and shall make any repairs required, other than for ordinary wear and tear on the equipment, at his expense. The starting date for warranty and/or guarantee period for such plumbing equipment shall be the date of Substantial Completion acceptance by the City.
3. For Projects requiring the installation of new and/or modified gas service, as well as associated meter installations, the Contractor for Plumbing Work shall promptly perform all required filings and coordination with the Utility Companies in order to expedite the installation, testing, and approval of the gas service and associated meter(s).

**1.16 Scaffolding and Platforms**

- A. CONFORMANCE: Unless otherwise indicated, the Contractor for General Construction is responsible for providing, erecting, installing and maintaining all temporary scaffolding and platforms which shall comply with requirements of Chapter 33 (Safeguards During Construction or Demolition) of the NYC Building Code, NYC Local Law 52 of 2005, OSHA Construction Standard 1926 Subpart L, and furnishing the following items.
- B. RESPONSIBILITY
  1. A Jobsite Monitor who shall be a competent person, designated and employed by the contractor who has a daily presence on the site during scaffold use. This designee must possess and

maintain a valid New York City Department of Buildings supported scaffold certificate of completion. An alternate shall also be designated, in the event that the Jobsite Monitor is absent. The Jobsite Monitor shall:

- a. Verify completeness of documentation and submittals (as described below).
  - b. Verify that inspections are performed, including pull tests (see below), reports are filed and reported deficiencies are corrected.
  - c. Monitor trades using scaffold.
  - d. Limit access to scaffold areas that are tagged for non-use.
  - e. Inform trades of scaffold load limitations.
  - f. Monitor loading of decks.
  - g. Verify that any ties that are temporarily removed are properly restored in the same shift.
  - h. Verify that outriggers and planks that are moved are properly set up and secured.
  - i. Verify that all scaffold decks in use have proper access/egress.
  - j. Verify that all open sides of decks in excess of 14 inches have proper guardrails and toe-boards.
  - k. Notify appropriate parties, including but not limited to the Resident Engineer, site safety coordinator / monitor, site safety consultant, scaffold users, contractor and the scaffold engineer, of misuses, non-conformances, hazards and accidents.
  - l. Keep a log of significant actions and events connected with the scaffolding.
2. The Contractor shall be responsible for erection, maintenance and dismantling of the scaffold / shed in conformance with the New York City Building Code and OSHA requirements, contract documents and engineering specifications. The Contractor shall also be guided by generally accepted standards of scaffold industry practice as promulgated by the Scaffold Industry Association.
  3. Scaffold Engineer is a New York State licensed PE engaged by the scaffold contractor / erector and responsible to ensure that the installation design conforms to the New York City Building Code and OSHA requirements, that the design comports with the capabilities of the components and the characteristics of the site, that scaffold loads on the host building, including netting, have been properly considered and that the design documents communicate information for erectors and users.
  4. Scaffold users are trade contractors assigned to work on the scaffold. Training certificates from a New York City Department of Buildings approved training provider are mandatory. These users have the duty to become familiar with the New York City Building Code and OSHA requirements germane to users, to obey the instructions of the Jobsite Monitor and inform the Jobsite Monitor of known hazards, non-conformances or violations.

C. JOBSITE DOCUMENTATION AND SUBMITTALS:

1. NYC Department of Buildings permit(s) for scaffold and side walk sheds (as applicable) including filing applications signed and sealed by A Professional Engineer licensed in the State of New York;
2. Site logistics plan / site safety plan;
3. Installation drawing(s), design and product data to be provided for all scaffold(s) and shed(s) must include, at a minimum:
  - a. Plan(s);
  - b. Elevation(s);
  - c. Duty load designation; "standard" (150 psf live load) or "heavy duty" (300 psf live load).
  - d. Details including base support, anchors and ties;
  - e. Notes and specifications including load limits, number of planked levels, tie spacing, netting, and sequence of installation and removal.
  - f. Anchorage into sound material.
  - g. Load limits based on pull tests;
  - h. Specifications for pull test(s), method, proof load and the number of trials;
  - i. Elevations, levels or heights, where anchorage is made into masonry;

- j. Specifications for frames, planks, screw jacks, anchors, and any other ancillary hardware;
- k. Samples for anchors, ties and netting;
- l. Sequence of operations for erection and demolition;
- m. Location plan, heights, widths, "jumps" over doorways and driveways;
- n. Specify size, maximum span and maximum spacing of headers and stringers;
- o. Specify legs, girts, braces, nailing and connections;
- p. All sidewalk sheds shall be designed, engineered, signed and sealed by a Professional Engineer licensed in the State of New York;
  - 1) Generic (not job specific) engineering drawings are satisfactory for standard sheds and arrangements.
  - 2) Special engineering is required for custom sheds, site-specific problems or non-standard arrangements.

**D. INSPECTIONS:**

- 1. Signed inspection reports shall be issued for each inspection and pull-test below, and shall be logged and maintained on site by the Jobsite Monitor for the duration of the project.
- 2. Pull testing shall be required during design, and during or post erection, where anchorage is made into masonry. The Scaffold Engineer shall specify the test method, proof load and the number of trials.
- 3. Sidewalk sheds shall be inspected after initial installation, major modification, or damage and thence every three months. Inspections shall be by a Scaffold Engineer for custom sheds and by a competent person employed by the Contractor for standard sheds.
- 4. Scaffolds shall be inspected by the Scaffold Engineer during erection, post-erection and prior to use and thence every three months. The Scaffold Engineer shall repeat inspections after major alteration/modification, damage.
- 5. A qualified person assigned by the Contractor shall inspect the progress of erection and dismantling, and the condition and integrity of the sidewalk sheds after high winds, major storms and at least once per month during usage.
- 6. A qualified person assigned by the Contractor shall inspect the progress of erection and dismantling at least weekly, and the condition and integrity of the scaffold after high winds, major storms and at least once per month during usage.
- 7. Scaffolds shall be inspected daily by the Jobsite Monitor or alternate prior to use by scaffold users.
- 8. At the completion of the project, submit all inspection documents to the Commissioner for record purposes.

**E. LADDERS AND STAIRS:** The Contractor for General Construction Work shall provide and maintain ladders or temporary stairs extending from the street to the first story, and to and from every floor and roof level of the project.

**F. ACCESS AND EXITS:** The ladders or temporary stairs shall be of acceptable size, number and location, so that proper and convenient access may be had by those required to proceed to and from all parts of the project.

**1.17 Hoists and Hoistways**

**A. RESPONSIBILITY -** The Contractor for General Construction Work shall provide adequate numbers of material hoists for the most expeditious performance of all parts of its work. All other Contractors are required to provide their own facilities for the hoisting of materials under their respective Contracts. However, these Contractors may make arrangements, whenever possible, with the Contractor for General Construction Work for the use of its hoist upon such terms and conditions as it may prescribe.

- B. LOCATIONS - No hoists shall be constructed at such locations as will interfere with, or affect the construction of, floor arches, or the work of other Contractors. The hoists may be located at the exterior sides of the structure or in the courtyard and extend upward adjacent to the line of window openings. The hoists shall be located a sufficient distance from the exterior walls and be so protected as to prevent any of the permanent work from being damaged, stained or marred.
- C. ELEVATOR SHAFT - Wherever possible, one or more of the permanent elevator shafts may be used as temporary hoistways providing such use meets with the Building Code of the City of New York and the approval of the Commissioner, and providing further it entails no interference with the progress of the work of any Contractor.
- D. PROTECTION FOR INTERIOR HOISTS - All interior material hoistways shall be enclosed on each floor and shall be adequately protected with appropriate safety guards. In no event shall the protection be less than that required by law.

#### **1.18 Certificates of Approval**

- A. RESPONSIBILITY - Each Contractor shall be responsible for and shall obtain all final approvals for the work installed under its Contract in the form of such certificates that are required by all governmental agencies having jurisdiction over the work of the Contract.
- B. TRANSMITTAL - All such certificates shall be forwarded to the Commissioner through the Resident Engineer before final acceptance of the work of the Contract.

#### **1.19 Acceptance Tests**

- A. GOVERNMENTAL AGENCIES - All equipment and appliances furnished and installed under the Contract shall conform with the requirements of the Specifications, and shall in no event be less than that necessary to comply with the minimum requirements of the law and all of the governmental agencies having jurisdiction.
- B. NOTICE OF TEST - Whenever the Specifications and/or any governmental agency having jurisdiction requires the acceptance test, the Contractor shall give written notice to all concerned of the time when these tests will be conducted.
- C. ENERGY - The City will furnish all energy, fuel, water and light required for tests.
- D. LABOR AND MATERIALS - The Contractor shall furnish labor and all other material and instruments necessary to conduct the acceptance tests at no additional cost to the City.
- E. CERTIFICATES - The final acceptance by the Commissioner shall be contingent upon the Contractor delivering to the Commissioner all necessary certificates evidencing compliance in every respect with the requirements of the regulatory agencies having jurisdiction.
- F. RESULTS - If the results of tests and Controlled Inspections indicate that the material or procedures do not meet requirements as set forth on the Contract Drawings or in the Specifications or are otherwise unsatisfactory, the Contractor shall only proceed as directed by the Resident Engineer. Additional costs resulting from retesting, reinspecting, replacing of material and/or damage to the work of other trades and any delay caused to the schedule shall be borne by the Contractor.

#### **1.20 Progress Photographs (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. PHOTOGRAPHER - The Contractor for General Construction Work shall employ and pay for the services of a competent photographer who shall take photographs showing the progress of the work.
- B. PHOTOGRAPHS - There shall be four (4) photographs taken each month from the commencement of the Contract to the time of completion. These photographs shall show as far as possible, the work

completed within and on the exterior of the structure. The first series of photographs shall be taken prior to the actual commencement of work at the site. In addition thereto before final payment, there shall be six (6) photographs taken of unobstructed views of the completed project or projects and site, as directed by the Commissioner and after all scaffolding, hoists, shanties, field offices or other temporary work has been removed and final cleaning done. (For demolition work included in the Contract there shall be four (4) photographs taken before commencement of demolition operations; four (4) at the mid-point of operations; and four (4) at the completion of demolition operations). The prints shall be 8" x 10" gloss finish, mounted with a one (1) inch binding flap of muslin on the left side. They shall be marked on the back with date of exposure; the title of the project; and the specific location. Three (3) copies of each photograph shall be furnished free of charge to the Department of Design and Construction. Photographs shall be taken as ordered by the Commissioner.

#### **1.21 Job Meetings**

- A. **MEETINGS SCHEDULE** - Meetings shall be held as scheduled by the Resident Engineer in his office at the site, at which time Contractors for all separate Contracts shall have their representatives present to discuss all details relative to the execution of the work.
- B. **ACCOMMODATIONS** - The Contractor for General Construction Work shall provide ample tables and chairs to accommodate all present at the meetings, and table space for Contract Drawings.
- C. **AGENDA** - The Resident Engineer shall preside over these meetings. Prior to each meeting, the Resident Engineer will consult with the Contractors and will prepare an agenda of items to be discussed. In general, after informal discussion of any item on the agenda, the Resident Engineer will summarize the discussion in a brief written statement, and each Contractor will then dictate a brief statement for the record.

The Contractor for General Construction Work shall furnish all necessary typing and printing of the minutes prepared by the Consultant Architect/Engineer. Ample copies of the printed minutes shall be furnished to the Resident Engineer for distribution to all Contractors and representatives of the Commissioner.

- D. **COORDINATION** - Job meetings shall also be called by the Contractor for General Construction Work for the purpose of coordinating, expediting and scheduling the work of all Contracts in accordance with the master coordinated Job Progress Chart. All Contractors and their subcontractors, material suppliers or vendors whose presence is necessary, are required to attend. These meetings may, at the discretion of the Contractor for General Construction Work, be held at the same place and immediately following the Job Meetings held by the Resident Engineer. Minutes of these meetings shall be recorded, typed and printed by the Contractor for General Construction Work and distributed to all parties concerned.

#### **1.22 Guarantees and Warranties - Refer to the Addendum to the General Conditions for the applicability of this article.**

- A. **SCHEDULE B** - Requirements for guarantees and warranties for the Project are set forth in Schedule B, which is included as part of the Addendum to the General Conditions.
- B. **FORM** - For all guarantee requirements set forth in Schedule B, the Contractor shall provide a written guaranty, in the form set forth on the following page.

## GUARANTY

DDC PROJECT # \_\_\_\_\_

PROJECT DESCRIPTION \_\_\_\_\_

CONTRACT # \_\_\_\_\_

SPECIFICATION SECTION # AND TITLE \_\_\_\_\_

GUARANTY TO BE IN EFFECT FROM \_\_\_\_\_

TO \_\_\_\_\_

The Contractor hereby guarantees that the work specified under the above section of the aforesaid Contract will be free from defects of material and/or workmanship, for the period indicated above.

The Contractor also guarantees that it will promptly repair, restore, rebuild or replace whichever may be deemed necessary by the City, any or all defective material or workmanship of the aforementioned section, that may appear within the guaranty period and any finished work to which damage may occur because of such defects, to the satisfaction of the City and without any cost or expense to the City.

The Contractor hereby agrees to pay to the City the cost of the repairs or replacements should the City make the same because of the failure of the Contractor to do so.

### **1.23 Removal of Rubbish and Surplus Materials**

- A. RUBBISH - Rubbish shall not be thrown from the windows or other parts of the project. Mason's rubbish, dirt and other dust-producing material shall be wetted down periodically.
- B. LOCATION - Each Contractor shall sweep up and deposit, at a location designated on each floor by the Contractor for General Construction Work, all of its rubbish, debris and waste materials, as it accumulates and when directed by the Resident Engineer. Wood cratings shall be broken up, neatly bundled, tied and stacked ready for removal and be deposited at a location designated on each floor by the Contractor for General Construction Work.
- C. LABORERS - The Contractor for General Construction Work shall be responsible for the removal of all rubbish, etc., from the site. The Contractor shall remove from the designated locations all piles of rubbish, debris, waste material and wood cratings as they accumulate and when directed by the Resident Engineer, and shall remove them from the site. The Contractor shall employ and keep engaged for this purpose an adequate number of laborers.
- D. SURPLUS MATERIALS - Each Contractor shall remove from the site all surplus materials when there is no further use for same.
- E. TOOLS AND MATERIALS - At the conclusion of the work, all erection plant, tools, temporary structures and materials belonging to the Contractor shall be promptly removed.

### **1.24 Cleaning**

Each Contractor shall thoroughly clean all equipment and materials furnished and installed and shall deliver such materials and equipment undamaged in a clean and new appearing condition at time of substantial completion.

### **1.25 Inspections by Other City Agencies**

- A. LETTER OF COMPLETION - Just prior to substantial completion of this Project, the Commissioner will file with the Department of Buildings, an application for a Letter of Completion or a Certificate of Occupancy for the structure.
- B. FINAL INSPECTIONS - In connection with the above mentioned application for a Letter of Completion or a Certificate of Occupancy and before certificates of final payments are issued, each Contractor will be required to arrange for all final inspections by the inspectional staff of the Department of Buildings or other governmental agencies having jurisdiction, and secure all reports, sign offs, certificates, etc., by such inspection staff or other governmental agencies, in order that a Letter of Completion or Certificate of Occupancy can be issued promptly.

### **1.26 Security Guards/Fire Guards on the Site (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

#### **A. SECURITY GUARDS (WATCHMEN)**

- 1. The Contractor for General Construction Work shall provide competent Security Guards on the site until final completion of the project or earlier if so notified in writing by the Commissioner. The Security Service shall commence with the start of work. There shall be no less than one (1) Security Guard on duty every day, including Saturdays, Sunday and Holidays, 24 hours a day, except between the hours of 8:00 A.M. and 4:00 P.M. on any day which is a regular working day for a majority of the trades. This exception during the working day shall not apply after the finishing painting of the plaster work is commenced; thereafter, not less than one (1) Security Guard shall be on duty continuously, 24 hours a day, until final completion of the project or earlier if so notified in writing by the Commissioner.

2. Every Security Guard shall be required to hold a "Certificate of Fitness" issued by the Fire Department. Every Security Guard shall, during their tour of duty, perform the duties of Fire Guard in addition to their security obligations.
  3. Should the Commissioner find that any Security Guard is unsatisfactory, such guard shall be replaced by the Contractor for General Construction Work upon the written demand of the Commissioner.
  4. Each Security Guard furnished by the Contractor for General Construction Work shall be instructed by the Contractor for General Construction Work to include in their duties the entire construction site including the Field Office, temporary structures, and equipment, materials, etc.
  5. Should the Contractor for General Construction Work or any other Contractor consider the security requirements outlined above inadequate, it shall provide such additional security as it thinks necessary, after obtaining the written consent of the Commissioner. The additional cost of such approved increased protection will be paid by the Contractor who provides the additional protection.
  6. Nothing contained in this Article shall diminish in any way the responsibility of each Contractor for its own work, materials, tools, equipment, nor for any of the other risks and obligations outlined hereinbefore in this Article.
- B. **COSTS** - The Contractor for General Construction Work shall employ Security Guards/Fire Guards at all times, except as otherwise modified by the detailed Specifications and as approved by the Commissioner, for the purpose of safeguarding and protecting the site. All costs for Security Guards/Fire Guards shall be borne by the Contractor for General Construction Work.
- C. **RESPONSIBILITY** - All Contractors will be responsible for safeguarding and protecting their own work, materials, tools and equipment.

#### **1.27 Contractor's Daily Reports**

- A. **DAILY REPORTS** - As soon as the Contractor has started work on the Project, it shall submit to the Resident Engineer written daily reports of the work performed the previous day by any of its employees, including the employees of its subcontractors.
- B. **INFORMATION** - The reports shall be prepared by the Contractor's Superintendent and shall bear the Contractor's Superintendent signature. Each report shall contain the following information:
1. The type of materials and/or major equipment being installed by the Contractor and the total number of employees working in each category on that particular day.
  2. The names of the subcontractors working and the type of materials and/or major equipment being installed by each, together with the total number of employees working for each subcontractor on that particular day.
  3. The major construction equipment being used by each Contractor and/or subcontractor.

#### **1.28 Alternate or Substitute Equipment**

- A. In general, the Contract Drawings and Specifications show and describe arrangements suitable for the specific items of equipment either named or described. In the event that a Contractor submits for approval, and receives such approval, a device or piece of equipment which requires connections (vacuum, gas, steam, water, air, electric, etc.) or arrangements of these services, differing from those indicated or described in the Contract Documents, it shall be incumbent upon the Contractor submitting the alternate or substitute equipment to give timely notice to the other Contractors involved so that they may make suitable alterations in the work to accommodate the substitute or alternate equipment. The Contractor making the substitution shall be responsible for any and all additional

costs incurred by any of the Contractors by virtue of the substitution of equipment for the equipment named or described in the Contract Documents.

**1.29 Sleeve and Penetration Drawings (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. As soon as practicable after the commencement of work and when the order in which concrete for the first slabs, walls, etc. to be poured is determined, the Contractors for the engineering trades (Plumbing, Heating, Ventilating and Air Conditioning, and Electrical) shall submit to the Department of Design and Construction a sketch indicating the location and size of all penetrations for sleeves, ducts, etc. which will be required to accommodate the mechanical trades, in order that it may be determined if such penetrations will materially weaken the project's structure. The sketch will be stamped and returned if approved and/or comments will be transmitted. The engineering Contractors shall continue to submit sketches as the pouring schedule and the concrete work progresses and, until approvals for the penetration sketches have been given, shall not predicate their layout work on unapproved sketches.

**1.30 Location of Partitions (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. Within three (3) weeks after the concrete slabs have been poured on each floor level, the Contractor for General Construction Work shall immediately locate accurately all of the partitions, including the door openings, on the floor slabs in a manner approved by the Resident Engineer.

**1.31 Furniture and Equipment**

- A. RESPONSIBILITY - Each Contractor is responsible for moving all loose furniture and/or equipment in all areas when such furniture and/or equipment interferes with the proper performance of its work.
- B. PROTECTION - All such furniture and/or equipment must be adequately protected with dust cloths and returned to their original locations when directed to do so by the Resident Engineer.

**1.32 Overtime Work (Ordered by Commissioner)**

- A. OVERTIME - The Commissioner reserves right to order and pay for overtime work.
1. The Commissioner can order overtime work when in the Commissioner's opinion, delay occurs and such delay is not the fault of the Contractor, or
  2. When work is of such an important nature that delay in carrying such work to completion would result in serious disadvantage to the public.
- B. ORDER FOR OVERTIME WORK - When overtime work is ordered by the Commissioner, such "Order" will be issued by the Commissioner on a special form letter over the signature of the Commissioner.
- C. CONTRACTOR'S PROCEDURE PRIOR TO COMMENCING WORK
1. Make immediate application to the Commissioner of Department of Labor, State of New York, for dispensation in accordance with Subdivision 2 of Section 220 of the Labor Law.
  2. Upon receipt of such dispensation, proceed expeditiously with ordered overtime work.

**1.33 Compliance with OSHA Regulations**

These Contract Documents and the work hereby contemplated shall be governed, at all times, by the following Federal Laws:

- A. William Steiger Occupational Safety and Health Act of 1970, Public Law 91-596;

- B. Part 1910 - Occupational Safety and Health Standards, Chapter XVII of Title 29, Code of Federal Regulations;
- C. Part 1926 - Safety and Health Regulations for Construction, Chapter XVII of Title 29, Code of Federal Regulations.

### 1.34 Temporary Services

#### PART A (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)

- A. TEMPORARY WATER - during construction shall be furnished in the following manner:
  - 1. Immediately after the Contractor for General Construction Work has been ordered by the Commissioner to start work, it shall file an application with the Dept. of Environmental Protection for the schedule of charges for water use during construction. The Contractor for General Construction Work will be responsible for payment of water charges.
  - 2. Immediately after the Contractor for Plumbing Work has been ordered by the Commissioner to start work, it shall file an application with the Department of Environmental Protection's Bureau of Water Supply and obtain its permit to install the temporary water supply system. The system shall be installed and maintained for the use of all Contractors. A copy of the above mentioned permit shall be filed with the Commissioner. The Contractor for Plumbing Work shall provide temporary water main, risers and waste stacks as directed and install on each floor, outlets with two (2) 3/4" hose valve connections over a barrel installed on a steel pan. The Contractor for Plumbing Work shall provide drains from the pans to the stack and house sewer and hose bibs to drain the water supply risers and mains. During winter months the Contractor for Plumbing Work shall take the necessary precautions to prevent the temporary systems from freezing.
- B. TOILET FACILITIES - both exterior and interior, for the use of all Contractors, shall be furnished and installed in the following manner:
  - 1. Toilet fixtures shall be furnished, installed and maintained in a satisfactory operating condition by the Contractor for Plumbing Work.
  - 2. Enclosures for the toilet fixtures shall be erected and maintained by the Contractor for General Construction Work.
  - 3. Heating for the enclosures shall be furnished, installed and maintained by the Contractor for General Construction Work.
  - 4. Electric lighting for the enclosures shall be furnished, installed and maintained by the Contractor for Electrical Work.
  - 5. The Contractor for General Construction Work shall keep the temporary toilet fixtures and enclosures in a clean and sanitary manner.
  - 6. No Contractor shall cause any sanitary nuisances to be committed by its employees in or about the work. Each Contractor shall enforce all sanitary regulations of the City and State Health Authorities.
- C. OVERTIME USE - Whenever any Contractor(s) work before or after the regular work hours hereinafter specified under Subparagraph D, or on a Saturday, Sunday or Holiday of any trade, such Contractor(s) shall pay the Contractor for Plumbing Work for the activation of the temporary water system and toilet facility services during such overtime periods. When more than one (1) Contractor is involved in overtime work, the costs thereof shall be prorated as determined by the Resident Engineer. When overtime is required by any or all Contractors on the work, the provisions for payment for regular time use of the temporary water supply system as specified in Subparagraph D shall apply.

- D. **ACTIVATION** - The Contractor for Plumbing Work shall bear the cost of keeping the temporary water supply system activated from a period of time 15 minutes before the established starting time of that trade which starts work earliest in the morning, to 15 minutes after the established quitting time of that trade which stops work latest in the evening. This applies to every day in the week which is established as a regular working day for aforementioned trades and holds until completion and final acceptance of the work of the Contractor for Plumbing Work or until the services are terminated by instructions from the Commissioner.

**PART B (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. **WATER** - The Contractor for General Construction Work will be responsible for payment of water charges. Billing will be in accordance with the Department of Environmental Protection schedule of charges for Building Purposes.
- B. **ELECTRICITY** - for temporary light and the operation of small tools, is available in the area of this project and will be furnished to the Contractor for General Construction Work by the Contractor for Electrical Work without cost.
- C. **TOILET FACILITIES** - The Contractor for General Construction Work shall arrange with the Commissioner for the temporary use of certain toilets or washrooms within the project for the use of all employees during the execution of the work.
- D. **MAINTENANCE** - The Contractor for General Construction Work shall maintain the temporary toilet facilities in a clean and sanitary manner and make all necessary repairs due to misuse.
- E. **NUISANCES** - The Contractors shall not cause any sanitary nuisance to be committed by its employees in or about the work, and shall enforce all sanitary regulations of the City and State Health Authorities.

**1.35 Temporary Use, Operation and Maintenance of Elevators during Construction**

**PART A - FOR NEW BUILDINGS UP TO AND INCLUDING 15 STORIES (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. **INSTALLATION** - The Contractor for General Construction Work shall install and complete, as indicated herein, one (1) selected main elevator in the Project for temporary operation by the Contractor for General Construction Work for the transporting of employees of all Contractors and representatives of the Department of Design and Construction and other Governmental Agencies having jurisdiction of work at the project. The Contractor for General Construction Work shall furnish, install and maintain for such elevators, all necessary hoisting ropes, governor cables, traveling conductor cables, operating devices, temporary hand reset target annunciators, temporary signal devices, and all other permanent or temporary parts. The installation and maintenance of the temporary elevator and all equipment and/or parts utilized in connection therewith shall be in accordance with the rules and regulations of all agencies and/or entities having jurisdiction over elevators in temporary use.
- B. **RESPONSIBILITY** - The Contractor for General Construction shall be responsible for any injury to persons or damage to property arising out of the temporary elevator and all equipment and/or parts utilized in connection therewith. The Contractor for General Construction shall employ and pay wages, including overtime wages if necessary, for all workers required for the operation and maintenance of the temporary elevator. The Contractor for General Construction shall be responsible for all costs for: (1) the installation of the temporary elevator, (2) maintaining the temporary elevator in clean, proper operating condition, including the cost of lubricants and/or parts for such maintenance, (3) all work in pits, shaftways and machine rooms necessary for the operation of the elevator, and (4) the replacement of the temporary elevator or parts utilized in connection therewith, if required.

- C. **ACTIVATION TIME** - The Contractor for General Construction Work shall keep the temporary elevator activated from a period of time 15 minutes before the established starting time of that trade which starts work earliest in the morning to 15 minutes after the established quitting time of that trade which stops work latest in the evening. This applies to every day in the week, which is established as a regular working day for the aforementioned trades.
- D. **COMMENCEMENT OF SERVICE** - The Contractor for General Construction Work shall begin to provide temporary elevator service using the selected main passenger elevator no later than eight (8) weeks (40 working days) after the machine room roof slab, or that portion of it surrounding the elevator shaft, has been placed. No later than three (3) weeks (15 working days) after the machine room roof slab, or that portion of it surrounding the elevator shaft, has been placed the following work shall have been completed:
1. The shaft shall have been completely enclosed by either the permanent or a temporary enclosure meeting the requirements of the law.
  2. The machine room shall have been made completely watertight either by permanent or temporary construction. Beams or other devices, either permanent or temporary shall be provided which will enable the safe and practicable hoisting of the elevator machinery for installation.
  3. There shall have been installed on all floors at the shaftway entrances to the elevator, solid substantial frames and either sliding or swing doors with substantial hardware and door locks and any necessary approved wire mesh barricades for adjacent shaftways.
  4. There shall have been furnished and installed solid substantial enclosures at front, back, sides and top of car platform enclosure, with emergency exit at top of car, excepting that the portion of the front at the elevator entrance shall have been provided with a substantial temporary door or gate.
- E. **ELECTRICAL INSTALLATION** - The Contractor for Electrical Work, not later than 20 calendar days after the machine room roof slab or that portion of its surrounding the elevator has been placed, shall have furnished and installed temporary or permanent power and light feeders as required for the elevator used for temporary service and shall have connected such feeders to the terminals on the starter panels or controllers in the machine room to the low voltage transformers and car light outlets in the center of shaftway and for the car control and signal traveling cables. The Contractor for Electrical Work shall make all these required connections as soon as the equipment is declared ready for such connections by the Resident Engineer. The cost of this work shall be included in the Contractor for Electrical Work's Contract.
- F. **REMOVAL** - When elevators for permanent use have been installed and are in condition for service, and when directed by the Commissioner, the Contractor for General Construction Work shall remove the temporary enclosures and all temporary elevator equipment and promptly proceed with the installation of the permanent equipment as is required under the Contract.
- G. **INSPECTION** - Before temporary elevator equipment has been removed, a joint inspection of the equipment shall be made by the Contractor for General Construction Work and the Commissioner to determine the condition of this equipment upon the discontinuation of its temporary use. If this inspection deems it necessary, the Contractor for General Construction Work shall furnish and install new governor and compensating ropes, new traveling cables and new controller parts, etc. The car and counterweight safeties shall be thoroughly cleaned of all dirt and all foreign matter, then properly lubricated and placed in good operating condition to the satisfaction of the Commissioner. If it is determined and ordered by the Commissioner that new hoist ropes are required, such ropes shall be installed and payment therefor will be made in accordance with Article 26 of the Contract.
- H. **REPLACEMENT** - The Contractor for General Construction Work shall replace with new, any of the equipment or parts of the temporary elevator installation that were damaged, destroyed, or that indicate excessive wear or corrosion excepting the replacement of hoisting ropes. All shaftways, pits, motor rooms and sheave spaces used for temporary operation of elevators shall be thoroughly

cleaned. Where lubricated rails are used they shall be washed down. If roller guides are used, all rust, dirt, etc., must be moved from the rails. The full cost of parts replacement, cleaning, etc., shall be borne by the Contractor for General Construction Work except for the replacement of hoisting ropes.

- I. COSTS - The Contractor for Electrical Work shall pay the costs of all electrical current used for operating the temporary elevators. The Contractor for General Construction Work shall provide all necessary conduit and wiring connections for the proper operation of the elevator and the signaling of the temporary elevators.
- J. LIMITATIONS OF USE - The temporary elevator shall not be used during its operation for hoisting of materials or removal of rubbish, but shall be limited only to the transportation of employees of all Contractors and the representatives of City Departments and other Governmental Agencies having jurisdiction of work at the project. However, the Resident Engineer may grant special permission at specified times to the various Contractors to hoist materials, which in the Resident Engineer's opinion will not overload or damage the elevator installation, but only after such times as all plastering has been completed from the second floor up. The particular Contractor using the elevator for the hoisting of its material shall be responsible for any damage to the elevator during the entire period of such use. The Contractor for General Construction Work shall give notification in writing to the Resident Engineer of any alleged damage to the elevator installation within 24 hours after the elevator has been employed for the hoisting of materials by the particular Contractor(s).
- K. PAYMENT FOR USE - The Contractor for General Construction Work shall be paid for its operation and maintenance of the temporary elevator or permanent elevator used for temporary service at the daily rate indicated under the Item of its Contract. All other costs in connection with the elevator installation and equipment, excepting electrical work done by the Contractor for Electrical Work under its Contract, shall be included in the Contractor for General Construction Work's Contract.
- L. LIQUIDATED DAMAGES - The Contractor for General Construction Work will be charged at the rate of \$100 per day for each day it fails to provide the temporary elevator service described in this section beginning with the 41<sup>st</sup> working day after the machine room roof slab, or that portion of it surrounding the elevator shaft, has been placed and stripped. This charge will be deducted from any amount due and owing to the Contractor for General Construction Work.
- M. OVERTIME USE - All Contracts. Whenever any Contractor or Contractors work before or after the regular work hours as indicated in Paragraph B above, or on a Saturday, Sunday or Holiday, such Contractor or Contractors shall pay the Contractor for General Construction Work for the operation and maintenance of the temporary elevator, if required by such Contractor or Contractors, at the daily rate indicated in the Contract but increased to reflect the difference between regular wage rates and overtime wage rates. The basic hourly charge shall be considered as one ninth (1/9) of the amount shown in the Item of the Bid form of the General Construction Work Contract. The City will not pay any Contractor for such overtime use of the elevator. When more than one (1) Contractor is involved in the overtime work, the charges shall be prorated as determined by the Resident Engineer unless otherwise agreed mutually among all the Contractors involved.

**PART B - FOR NEW BUILDINGS OVER 15 STORIES (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. INSTALLATION - The Contractor for General Construction Work shall install and complete, as indicated herein, two (2) selected main elevators in the Project for temporary operation by the Contractor for General Construction Work for the transporting of employees of all Contractors and representatives of the Department of Design and Construction and other Governmental Agencies having jurisdiction over work at the project. The Contractor for General Construction Work shall furnish, install and maintain for such elevators, all necessary hoisting ropes, governor cables, traveling conductor cables, operating devices, temporary hand reset target annunciators, temporary signal devices and all other permanent or temporary parts. The installation and maintenance of the temporary elevator and all equipment and/or parts utilized in connection therewith shall be in accordance with the rules and regulations of all agencies and/or entities having jurisdiction over elevators in temporary use. The two (2) elevators will not be operated simultaneously.

- B. **RESPONSIBILITY** - The Contractor for General Construction shall be responsible for any injury to persons or damage to property arising out of the temporary elevator and all equipment and/or parts utilized in connection therewith. The Contractor for General Construction shall employ and pay wages, including overtime wages if necessary, for all workers required for the operation and maintenance of the temporary elevator. The Contractor for General Construction shall be responsible for all costs for: (1) the installation of the temporary elevator, (2) maintaining the temporary elevator in clean, proper operating condition, including the cost of lubricants and/or parts for such maintenance, (3) all work in pits, shaftways and machine rooms necessary for the operation of the elevator, and (4) the replacement of the temporary elevator or parts utilized in connection therewith, if required.
- C. **ACTIVATION TIME** - The Contractor for General Construction Work shall keep the temporary elevator activated from a period of time 15 minutes before the established starting time of that trade which starts work earliest in the morning to 15 minutes after the established quitting time of that trade which stops work latest in the evening. This applies to every day in the week, which is established as a regular working day for the aforementioned trades.
- D. **LOW RISE ELEVATOR** - The Contractor for General Construction Work shall begin to provide temporary elevator service using one (1) selected main passenger elevator no later than six (6) weeks (30 working days) after the 12th Floor slab, or that portion of it surrounding the elevator shaft, has been placed and stripped. No later than one (1) week, five (5) working days, after the 12th Floor slab, or that portion of it surrounding the elevator shaft, has been placed and stripped the following work shall have been completed:
1. The shaft shall have been completely enclosed up to the 12th Floor by either the permanent or a temporary enclosure meeting the requirements of the law.
  2. A temporary machine room enclosure shall have been provided at the 11th Floor and shall have been made completely watertight either by permanent or temporary construction. Beams or other devices, either permanent or temporary, shall be provided which will enable the safe and practicable hoisting of the elevator machinery for installation.
  3. There shall have been installed on all floors up to and including the 9th Floor at the shaft entrances to the elevator, solid substantial wood frames and either sliding or swing doors with substantial hardware and door locks, also any necessary approved wire mesh barricades for adjacent shaftways.
  4. There shall have been furnished and installed solid substantial enclosures at front, back, sides and top of car platform enclosure, with an emergency exit at top of car, excepting that the portion of the front at the elevator entrance shall have been provided with a substantial temporary door or gate.
- E. **ELECTRICAL INSTALLATION** - The Contractor for Electrical Work, not later than 10 calendar days after the 12th Floor slab or that portion of it surrounding the elevator, has been poured and stripped, shall have furnished and installed temporary or permanent power and light feeders as required for the elevator used for temporary service and shall have connected such feeders to the terminals on the starter panels or controllers in the temporary machine room, to the low voltage transformers and car light outlets in the center of the shaftway and for the car control and signal traveling cables. The Contractor for Electrical Work shall make all these required connections as soon as the Equipment is declared ready for such connections by the Resident Engineer. The cost of this work shall be included in the Contractor for Electrical Work's Contract.
- F. **HIGH RISE ELEVATOR** - The Contractor for General Construction Work shall begin to provide temporary elevator service to all floors, using a selected main passenger elevator, no later than eight (8) weeks (40 working days) after the machine room roof slab, or that portion of it surrounding the elevator shaft, has been placed. No later than three (3) weeks (15 working days) after the machine room roof slab, or that portion of it surrounding the elevator shaft, has been placed, the following work shall have been completed:

1. The shaft shall have been completely enclosed by either the permanent or temporary enclosure, meeting the requirements of the law.
2. The machine room shall have been made completely watertight either by permanent or temporary construction. Beams or other devices, either permanent or temporary shall be provided which will enable the safe and practicable hoisting of the elevator machinery for installation.
3. There shall have been installed on all floors at the shaftway entrances to the elevator, solid substantial frames and either sliding or swing doors with substantial hardware and door locks, also any necessary approved wire mesh barricades for adjacent shaftways.
4. There shall have been furnished and installed, solid substantial enclosures at front, back, sides and top of car platform enclosure, with an emergency exit at top of car, excepting that the portion of the front at the elevator entrance shall have been provided with a substantial temporary door or gate.

- G. The Contractor for Electrical Work, not later than 20 calendar days after the machine room slab or that portion of it surrounding the elevator shaft has been placed, shall have furnished and installed temporary or permanent power and light feeders as required for the high rise elevator to be used for temporary service and shall have connected such feeders to the terminals on the motor-generator starter panels or controllers in the machine room, to the signal circuits low voltage transformers for the annunciators and car light outlets in the center of shaftway.

The Contractor for Electrical Work shall make all these required connections as soon as the equipment is declared ready for such connections by the Resident Engineer. The cost of this work shall be included in the Contractor for Electrical Work's Contract.

- H. When the high rise elevator is completed and ready for temporary operation, the low rise temporary elevator shall be shut down.
- I. When one (1) or more elevators for permanent use have been installed and are in condition for service, and when directed by the Commissioner, the Contractor for General Construction Work shall remove the temporary enclosures and all temporary elevator equipment, and promptly proceed with the installation of the permanent equipment as is required under the Contract.
- J. Before temporary elevator equipment has been removed, a joint inspection of the equipment shall be made by the Contractor for General Construction Work and the Commissioner to determine the condition of this equipment upon the discontinuation of its temporary use. If this inspection determines it necessary, the Contractor for General Construction Work shall furnish and install new governor and compensating ropes, new traveling cables, new controller parts, etc. The car and counterweight safeties shall be thoroughly cleaned of all dirt and all foreign matter, then properly lubricated and placed in good operating condition to the satisfaction of the Commissioner. If it is determined and ordered by the Commissioner that new hoist ropes are required, such ropes shall be installed and payment therefor will be made in accordance with Article 26 of the Contract.
- K. The Contractor for General Construction Work shall replace with new, any of the equipment or parts of the temporary elevator installations that were damaged, destroyed, or that indicate excessive wear or corrosion excepting the replacement of hoisting ropes. All shaftways, pits, motor rooms and sheaves spaces used for temporary operation of elevators shall be thoroughly cleaned down. Where lubricated rails are used they shall be washed down, if roller guides are used, all rust, dirt, etc., must be removed from the rails. The full cost of parts replacement cleaning, etc., shall be borne by the Contractor for General Construction Work except for the replacement of hoisting ropes.
- L. The Contractor for Electrical Work shall pay the costs of all electrical current used for operating the temporary elevators. The Contractor for General Construction Work shall provide all necessary conduits and wiring connections for the proper operation of the elevators and the signaling of the temporary elevators.

- M. No temporary elevator shall be used during its operation for hoisting of materials or removal of rubbish, but shall be limited only to the transportation of employees of all Contractors and the representatives of City Departments and other governmental agencies having jurisdiction of work at the project. However, the Resident Engineer may grant special permission at specific times to the various Contractors to hoist materials which, in the Resident Engineer's opinion, will not overload or damage the elevator installation, but only after such time as all plastering has been completed from the second floor up. The particular Contractor using the elevator for the hoisting of its material shall be responsible for any damage to the elevator during the entire period of such use. The Contractor for General Construction Work shall give notification in writing to the Resident Engineer of any alleged damage to the elevator installation within 24 hours after the elevator has been employed for the hoisting of materials by the other Contractors.
- N. The Contractor for General Construction Work shall be paid for its operation and maintenance of each temporary elevator or permanent elevator used for temporary service at the daily rate indicated under the item of its Contract. All other costs in connection with elevator installation and equipment, excepting Electrical Work done by the Contractor for Electrical Work under its Contract, shall be included in the Contractor for General Construction Work's Contract.
- O. LIQUIDATED DAMAGES - The Contractor for General Construction Work will be charged at the rate of \$100 per day for each day it fails to provide the temporary elevator service described in this Section beginning with the 31st working day after the 12th Floor slab, or that portion of the 12th Floor slab surrounding the elevator shaft, has been placed and stripped. This charge will be deducted from any amount due and owing to the Contractor for General Construction Work.
- P. OVERTIME USE - ALL CONTRACTS. Whenever any Contractor(s) work before or after the regular work hours as indicated in Subparagraph B above, or on a Saturday, Sunday or Holiday, such Contractor or Contractors shall pay the Contractor for General Construction Work for the operation and maintenance of the temporary elevator, if required by such Contractor or Contractors, at the rate indicated in the Item of the bid form of the General Construction Work Contract but increased to reflect the difference between regular wage rates and overtime wage rates. The basic hourly charge shall be considered as one ninth (1/9) of the amount shown in the item of the General Construction Work Contract. The City will not pay any Contractor for such overtime use of the elevator. When more than one (1) Contractor is involved in the overtime work, the charges shall be prorated as determined by the Resident Engineer unless otherwise agreed mutually among all the Contractors involved.

**PART C - EXISTING BUILDINGS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. The Contractor for General Construction Work may use, at the Commissioner's discretion, one (1) selected elevator in the project for temporary operation by the General Construction Work Contractor for the transportation of employees of all Contractors and representatives of the Department of Design and Construction and other Governmental Agencies having jurisdiction over work at the Project. The Contractor for General Construction Work shall maintain for such elevators, all necessary hoisting ropes, governor cables, traveling conductor cables, operating devices hand reset target annunciators, signal devices, and all other permanent or temporary parts. The installation and maintenance of the temporary elevator and all equipment and/or parts utilized in connection therewith shall be in accordance with the rules and regulations of all agencies and/or entities having jurisdiction over elevators in temporary use.
- B. The Contractor for General Construction shall be responsible for any injury to persons or damage to property arising out of the temporary elevator and all equipment and/or parts utilized in connection therewith. The Contractor for General Construction shall employ and pay wages, including overtime wages if necessary, for all workers required for the operation and maintenance of the temporary elevator. The Contractor for General Construction shall be responsible for all costs for: (1) the installation of the temporary elevator, (2) maintaining the temporary elevator in clean, proper operating condition, including the cost of lubricants and/or parts for such maintenance, (3) all work in pits, shaftways and machine rooms necessary for the operation of the elevator, and (4) the replacement of

the temporary elevator or parts utilized in connection therewith, if required.

- C. The Contractor for General Construction Work shall keep the temporary elevator activated from a period of time of 15 minutes before the established starting time of that trade which starts work earliest in the morning to 15 minutes after the established quitting time of that trade which stops work latest in the evening. This applies to every day in the week, which is established as a regular working day for the aforementioned trades.
  - D. The Contractor for General Construction Work shall replace with new any of the equipment or parts of the elevator for temporary operation installation that were damaged, destroyed, or that indicate excessive wear or corrosion excepting the replacement of hoisting ropes. All shaftways, pits, motor rooms and sheave spaces used for temporary operation of elevators shall be thoroughly cleaned down. Where lubricated rails are used they shall be washed down, if roller guides are used, all rust, dirt, etc., must be moved from the rails. The full cost of parts replacement, cleaning, etc., shall be borne by the Contractor for General Construction Work except for the replacement of hoisting ropes.
  - E. The elevator for temporary operations shall be used during its operation for hoisting of materials or removal of rubbish, but shall be limited only to the transportation of employees of all Contractors and the representative of City Departments and other Governmental Agencies having jurisdiction of work at the project. However, the Resident Engineer may grant special permission at specified times to the various Contractors to hoist materials which, in the Resident Engineer's opinion, will not overload or damage the elevator installation. The particular Contractor using the elevator for the hoisting of its material shall be responsible for any damage to the elevator during the entire period of such use. The Contractor for General Construction Work shall give notification in writing to the Resident Engineer of any alleged employee for the hoisting of materials by the particular Contractor(s).
  - F. The Contractor for General Construction Work shall pay all costs for the operation and maintenance of the elevator for temporary operation. All other costs in connection with the elevator and equipment excepting electrical work done by the Contractor for Electrical Work under its Contract, shall be included in the Contractor for General Construction Work's Contract.
  - G. LIQUIDATED DAMAGES - The Contractor for General Construction Work will be charged at the rate of \$100 per day for each day it fails to provide elevator services described in this section beginning with 15 consecutive calendar days from notice to proceed. This charge will be deducted from any amount due and owing to the Contractor for General Construction Work.
  - H. OVERTIME USE - ALL CONTRACTS - Whenever any Contractor(s) work before or after the regular work hours as indicated in Paragraph B above, or on a Saturday, Sunday or Holiday, such Contractor(s) shall pay the Contractor for General Construction Work for the operation and maintenance of the elevator, if required by such Contractor(s) at the union daily rates but increased to reflect the difference between regular wage rates and overtime wage rates. The City will not pay any Contractor for overtime use of the elevator. When more than one (1) Contractor is involved in the overtime work, the charges shall be prorated as determined by the Resident Engineer unless otherwise agreed mutually among all the Contractors involved.
- 1.36 General Mechanical Requirements (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**
- A. The General Mechanical Requirements contained herein shall be followed by all Contractors furnishing mechanical equipment under their respective Contracts.
  - B. CONCEALED PIPING - and ducts shall mean piping and ducts hidden from sight in masonry or other construction, in floor fill, trenches, partitions, hung ceilings, furred spaces, pipe shafts and in service tunnels not used for passage. Where piping and ducts run in areas that have hung ceilings, such piping and ducts shall be installed in the hung ceilings.
  - C. THE CONTRACT DRAWINGS - are in part diagrammatic and show the general arrangement of the equipment, ducts and piping included in the Contract and the approximate size and location of the

equipment. The Contractor shall follow these Contract Drawings in laying out the work and shall consult the Contract Drawings of the other Contracts to become familiar with all conditions affecting it and to verify the spaces in which it will be installed. The Contractor shall cooperate with the Public Utilities doing certain necessary work for this project. The attention of the Contractor is called to the Contract Drawings for General Construction Work for the location, arrangement and extent of plumbing and other fixtures and equipment. All work shall be installed in locations as shown on these Contract Drawings.

- D. CERTIFICATES - On completion of the work, the Contractor shall obtain certificates of inspection, approval, acceptance and of compliance with all laws from all agencies and/or entities having jurisdiction over the work and shall deliver these certificates to the Commissioner. The work shall not be deemed substantially complete until the certificates have been delivered.
- E. SHOP DRAWING SUBMITTALS - Contractors doing mechanical work shall submit, as directed, Shop Drawings, roughing drawings, manufacturer's Shop Drawings, field drawings, cuts, bulletins, etc., of all materials, equipment and methods of installation shown or specified.
  - 1. Submit sheet metal shop standards. Submit manufacturer's product data including gauges, materials, types of joints, scaling materials and installations for metal ductwork materials and products.
  - 2. Submit scaled layout drawing (3/8"=1') of metal ductwork and fittings including, but not limited to, duct sizes, locations, elevations, slopes of horizontal runs, wall and floor penetrations and connections. Show modifications of indicated requirements made to conform to local shop practice and how those modifications ensure that free area, materials and rigidity are not reduced. Layouts should include all the room plans, mechanical equipment rooms and penthouses. Method of attachment of duct hangers to building construction all with the support details. Coordinate shop drawings with related trades prior to submission.
  - 3. Indicate duct fittings, particulars such as gauges, sizes, welds and configuration prior to start of work for low-pressure systems.
  - 4. Submit maintenance data and parts lists for metal ductwork materials and products. Include this data, product data and shop drawings in maintenance manual.
- F. ACCESSIBILITY - All work shall be installed by the Contractor so as to be readily accessible for inspection, operation, maintenance and repair. Minor deviations from the arrangement indicated on the Contract Drawings may be made to accomplish this, but they shall not be made without approval by the Commissioner.
- G. CHANGES IN PIPING, DUCTS, AND EQUIPMENT - Wherever field conditions are such that for proper execution of the work, reasonable changes in location of piping, ducts and equipment are necessary and required, the Contractor shall make such changes as directed and approved, without extra cost to the City.
- H. CLEANING OF PIPING, DUCTS, AND EQUIPMENT - Piping, ducts and equipment shall be thoroughly cleaned by the Contractor of all dirt, cuttings and other foreign substances. Should any pipe, duct or other part of the several systems be obstructed by any foreign matter, the Contractor will be required to pay for disconnecting, cleaning and reconnecting wherever necessary for the purpose of locating and removing obstructions. The Contractor shall pay for repairs to other work damaged in the course of removing obstructions.
- I. STANDARDIZATION OF SIMILAR EQUIPMENT - Unless otherwise particularly specified, all equipment of the same kind, type or classification, and used for identical purposes, shall be the product of one (1) manufacturer.
- J. MACHINERY PARTS - shall conform exactly to the dimensions shown on the Contract Drawings. The equivalent parts of identical machines shall be identical so that they can be interchangeable.

- K. FITTINGS - All grease lubricating fittings on equipment shall be of a uniform type and shall be readily accessible and types proposed to be used shall be submitted for approval.
- L. GUARDS - All machinery shall be designed with protecting guards conforming with the requirements of the Industrial Code of the New York State Department of Labor or OSHA, whichever is stricter.
- M. LIMIT SWITCHES - Unless otherwise specified, limit switches and other mechanically actuated switches shall be enclosed in tight metal boxes and be installed in the proper locations ready for conduit connections. Switches shall be complete with all supports, stops, cams, arms, tripping and operating members, which shall be adjustable where required for proper functioning.
- N. ANCHORS, BOLTS, ETC. AND FOUNDATIONS - Unless otherwise specified, the Contractor shall furnish the necessary anchors, bolts, guides, track rails, bearing plates, substantial templates and all other appurtenances, and build the necessary foundations, as approved by the Commissioner, for all equipment supplied by the Contractor under its Contract.
- O. EQUIPMENT DESIGN - Equipment and appurtenances shall be designed in conformity with ASME and AIEE standards and shall be of rugged construction and of sufficient strength to withstand all stresses which may occur during fabrication, testing, transportation, installation, and all conditions of operations. Adequate stays, braces and anchors shall be provided. All bearings and moving parts shall be adequately protected against wear by bushings, or other approved means, and shall be fully lubricated by readily accessible devices. Details shall be designed for appearance as well as utility. Protruding members, joints, corners, gear covers and the like shall be finished in appearance. All exposed welds shall be ground smooth and the corners of structural shapes shall be mitered.
- P. SUPPORTING STRUCTURES DESIGNED BY THE CONTRACTOR - Unless otherwise specified, supporting structures for equipment to be furnished by the Contractor shall be designed and built by the Contractor of sufficient strength to safely withstand all stresses to which they may be subjected, within permissible deflections, and shall meet the following standards:
1. Structural Steel - ASTM Standard Specifications, AISC and NYBC.
  2. Concrete for supports for equipment shall conform to the Specifications for concrete herein, but in no case shall be less than the requirements of the NYBC for average concrete.
  3. Steel reinforcement for concrete shall be of intermediate grade and shall meet the requirements of the Standard Specifications for Billet Steel-Concrete Reinforcement Bars, ASTM.
- Q. ENGINEER'S ASSUMED DESIGN DATA - All structural steel, concrete and reinforcement indicated or specified to support the equipment or appurtenances and the area immediately adjacent thereto have been designed from data based on assumed average anticipated clearances and loading. The final structural design in these locations will be based on definite data received from the Contractor after the Commissioner approves the equipment and appurtenances to be installed. The Commissioner will then redesign, if necessary, the supporting structure to properly support and maintain the approved equipment and appurtenances. Necessary major changes in design will be covered by Supplementary Drawings that will be furnished to the Contractor. All changes indicated or necessary to accommodate the equipment and appurtenances, shall be incorporated into the Working Drawings submitted for approval, and the cost of furnishing and installing the work necessitated by these changes shall be borne by the Contractor furnishing the equipment.
- R. INSTALLATION OF EQUIPMENT - Equipment shall be erected in a neat and workmanlike manner on the foundations, at the locations and elevations shown on the Contract Drawings or as required. All equipment shall be correctly aligned, leveled and adjusted for satisfactory operation and shall be installed so that proper and necessary connections can be made readily between various units and with piping and equipment that may be installed under other Contracts. When required by the Specifications, the Contractor shall obtain the assistance of a competent and experienced Engineer or Superintendent, in the employ of the manufacturer, to install the equipment.

- S. **ELIMINATION OF NOISE** - All work provided under the Contract shall operate without objectionable noise or vibration.
1. Should operation of any one or more of the several systems produce noise or vibration which is, in the opinion of the Commissioner, objectionable, the Contractor shall at its own expense make changes in piping, equipment, etc. and do all work necessary to eliminate objectionable noise or vibration.
  2. Should noise or vibration found objectionable by the Commissioner be transmitted by any pipe or portions of the structure from equipment installed under the Contract, the Contractor shall at its own expense install such insulators and make such changes in or additions to the installations as may be necessary to prevent transmission of this noise or vibration.
- T. **GROUTING** - The Contractor shall furnish all material and labor for proper bedding on Portland Cement grout, the equipment or its supporting base. Grout shall consist of one (1) part Portland Cement and one (1) part of approved sand. The top of the masonry foundation shall be properly cleaned and wetted before grouting. Grout shall completely fill all spaces between the equipment, or base, and the foundation and it shall generally average one (1) inch in thickness. Leveling wedges shall not be removed before the grout has reached its final set. Voids left by wedges shall be pointed with grout. Exposed surfaces of the grout shall have a finished appearance.
- U. **PRELIMINARY FIELD TEST** - As soon as conditions permit, the Contractor shall furnish all necessary labor and materials for, and shall make, preliminary field tests of the equipment to ascertain compliance with the requirements of the Contract. If the preliminary field tests disclose equipment that does not comply with the Contract, the Contractor shall, prior to the acceptance test, make all changes, adjustments and replacements required.
- V. **INSTRUCTIONS ON OPERATION** - At the time the equipment is placed in permanent operation by the City, the Contractor shall make all adjustments and tests required by the Commissioner to prove that such equipment is in proper and satisfactory operating condition. The Contractor shall instruct the City's operating personnel on the proper maintenance and operation of the equipment for the period of time called for in the Specifications.

### **1.37 General Electrical Requirements**

**SCOPE** - This Article sets forth the general requirements applicable to electrical work for the Project. Such requirements are intended to be read in conjunction with the Specifications and Contract Drawings for the Project. In the event of any conflict between the requirements set forth in this Article and the requirements of the Specifications and/or the Contract Drawings, whichever requirements is the most stringent, as determined by the Commissioner, shall take precedence.

### **PART A - PROCEDURE--ELECTRICAL APPROVALS**

**SCOPE**- This Section sets forth general electrical information, as well as required approvals for all electrical work required for the Project, including ancillary electrical work which may be included in contracts for other than the Contract for Electrical Work.

- A. **ELECTRIC SERVICE** - The electric service supply is subject to commercial and operating variation of the utility company. Proper provision shall be made to have all apparatus operate normally under these conditions.
- B. **SUPERVISION AND ACCEPTANCE** - The electrical work and equipment shall be installed under the supervision of the Commissioner's representative. Final acceptance and approval of the work will be contingent upon the inspection and test of the installation by the City regulatory agency, on completion.
- C. **TESTS** - The Contractor shall notify the Commissioner when the Contractor will examine and begin

work and shall also notify the Commissioner when the Contractor has completed the work and is ready to have it inspected and tested. Upon completion of the work and prior to final payment, tests shall be made as required by the Commissioner of all electrical materials, electrical and associated mechanical equipment, and of appliances installed hereunder. The Contractor shall furnish all labor and material for such tests. Should the tests show that any of the material, appliances or workmanship are not first class or not in compliance with the Contract, the Contractor on written notice shall remove and promptly replace them with other materials in conformity with the Contract.

D. CERTIFICATE OF THE BUREAU OF ELECTRICAL CONTROL, OF THE DEPARTMENT OF BUILDINGS (B.E.C.) - Before final payment is made, there must be filed with the Department of Design and Construction, a Certificate of Inspection signed by the Director of the B.E.C., which Certificate shall certify that all materials and workmanship comply with the rules and regulations of the B.E.C. of the City of New York and with the Electrical Code of the Administrative Code of the City of New York.

E. RESPONSIBILITY FOR CARE AND PROTECTION OF EQUIPMENT

1. The Contractor furnishing any equipment shall be responsible for the equipment until it has been finally inspected, tested and accepted, in accordance with the requirements of these Specifications.
2. After delivery and before and after installation, the Contractor shall protect all equipment against theft, injury or damage from all causes. The Contractor shall carefully store all equipment received for work, which is not immediately installed. If any apparatus has been subject to possible injury by water, it shall be thoroughly dried out and put through a special dielectric test as directed by the Commissioner, at the expense of the Contractor or replaced by the Contractor without additional cost to the City.

F. UNIFORMITY OF EQUIPMENT - Any two (2) or more pieces of apparatus or materials of the same kind, type or classification and being used for identical types of service, shall be made by the same manufacturer.

G. CONTRACTOR'S ELECTRICAL DRAWINGS AND SAMPLES FOR APPROVAL

1. The Contractor shall submit to the Commissioner for approval, complete dimensional drawings of all equipment, wiring diagrams, motor test data, details of control, installation layouts showing all details and locations and including all schedules, and descriptions and supplementary data to comprise complete working drawings and instructions for the performance of the work. A description of the operation of the equipment and controls shall be included. A letter, in triplicate, shall accompany each submittal.
2. The Contractor shall submit duplicate samples of such materials and appliances as may be requested by the Commissioner for approval. These samples shall be properly tagged for identification and submitted for examination and test. After the samples are approved, one (1) sample will be returned to the Contractor and the other sample will be filed in the office of the Commissioner's representative for inspection use. After the Contract is completed, the second set of samples will be returned to the Contractor.

H. TIMELINESS - All material shall be submitted in sufficient time for the program of construction. Failure to promptly submit acceptable samples and dimensional drawings of equipment will not be accepted as grounds for an extension of time. The Commissioner may decline to consider submittals unless all related items are submitted at the same time.

I. CONTRACTOR'S STATEMENT WITH SUBMITTALS - All dimensional drawings of equipment, blueprints, catalogues, models, samples and other data relative to the equipment, the materials, the work or any part thereof submitted for approval are to be accompanied by a statement that they have been examined by the Contractor and that the drawings, data and other material submitted agree with the requirements of the Contract and Specifications and shall list and describe the points of

disagreements, if any exist. In the absence of such statement, approvals will be given with the understanding that articles of equipment or materials or methods of installation are in substantial compliance with the Contract and that if the adoption of these designs, details, articles, equipment, materials, constructions, installations, places and locations necessitate changes, alterations or replacements at an increased cost to the Contractor or others, the Contractor making the substitution for the specified equipment or material shall bear all such additional expense involved.

- J. BULLETINS AND INSTRUCTIONS - The Contractor shall furnish and deliver to the Commissioner, after acceptance of the work, four (4) complete sets of instructions, technical bulletins and any other printed matter (diagrams, prints, or drawings) required to provide complete information for the proper operation, maintenance and repair of the equipment and the ordering of spare parts.

#### PART B - TEMPORARY LIGHTING, SITE SECURITY LIGHTING & POWER

SCOPE - This Section sets forth the General Conditions and procedures relating to Temporary Lighting, Site Security Lighting and Power during the construction period, and is applicable to, and binding on, all Contracts insofar as they are affected.

A. **TEMPORARY LIGHTING (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. Energy for the Temporary Lighting System for minor rehabilitation projects (those projects whose existing distribution system is not being changed or modified under the scope of this project) may be taken from the existing electrical distribution system if the existing system is of adequate capacity for the additional temporary lighting load. The Contractor for Electrical Work is to cooperate and coordinate with the facility custodian so as not to interfere with the normal operation of the facility.
2. Energy for the Temporary Lighting system for new projects and for those existing projects that are not covered in the preceding paragraph shall be provided as in the following paragraphs.
3. CONNECTION TO UTILITY LINES - Temporary Electric Service for use during construction shall be provided as follows: The Contractor for Electrical Work shall provide adequate service for the temporary lighting system, or a minimum of 100 Amperes, 3-phase, 4-wire service for the temporary lighting system, whichever is greater, and make all necessary arrangements with the Public Utility Company and pay all charges by them for the Temporary Lighting system. The Contractor for Electrical Work shall include in its bid any charges which may be made by the Public Utility Company for extending its electrical facilities, and for making final connections. The Contractor for Electrical Work shall make payment directly to the Public Utility Company.
4. APPLICATIONS FOR METER - The Contractor for Electrical Work shall make application to the Public Utility Company and sign all documents necessary for, and pay all charges incidental to, the installation of a watt hour meter or meters for Temporary Lighting. The Contractor for Electrical Work shall pay to the Public Utility Company, all bills for Temporary Lighting energy used throughout the work, as they become due.
5. SERVICE AND METERING EQUIPMENT - The Contractor for Electrical Work shall furnish and install, at a suitable location on the site, approved service and metering equipment for the Temporary Lighting System, ready for the installation of the Public Utility Company's metering devices. The temporary service mains to and from the metering location shall be not less than 100 Amperes, 3-phase, 4-wire and shall be of sufficient capacity to take care of all demands for Temporary Lighting and Site Security Lighting and shall meet all requirements of the NYCEC.
6. The Contractor for Electrical Work shall furnish and connect to the metered service point, a system of Temporary Lighting to illuminate the entire area where work is being performed and points adjacent to the work, with separately fused circuits for stairways and bridges. Control switches for stairway circuits shall be located near entrance on ground floor.

7. ITEMS - The Temporary Lighting System shall consist of wiring, fixtures, left-hand double sockets, (one (1) double socket for every 400 square feet, with one (1) lamp and one (1) three-prong outlet) lamps, fuses, locked type guards, trailers and any other incidental material. Additional details may be outlined in the detailed Specifications for the Electrical Work. Changes may be made, provided the full equivalent of those requirements is maintained.
8. The Temporary Lighting System shall be progressively installed as required for the advancement of the work under the various Contracts.
9. RELOCATION - Any Contractor requiring the relocation or extension of the original Temporary Lighting System that is not required due to the normal advancement of the work, as determined by the Commissioner's field representative, shall bear all costs thereof.
10. TRAILERS - Trailers shall be furnished with left-hand sockets with locked type guards and 40 feet of rubber covered cable. The Contractor for Electrical Work shall furnish and distribute a minimum of three (3) complete trailers to each Contractor. See the detailed Electrical Specifications for possible additional trailers required.
11. LAMPS - The Contractor for Electrical Work shall furnish and install one (1) complete set of lamps, including those for the trailers. Broken and burned out lamps in the general lighting system shall be replaced by the Contractor for Electrical Work while those in the trailers shall be replaced by the Contractor using such equipment. All lamps shall be 100 watt.
12. CIRCUIT PROTECTION - The Contractor for Electrical Work shall furnish and install GFI protection for the Temporary Lighting and Site Security Systems.
13. ENERGIZING - The Contractor for Electrical Work shall keep the Temporary Lighting System energized from a period of time, 15 minutes before the established starting time of that trade, which starts work earliest in the morning to 15 minutes after the established quitting time of that trade which stops work latest in the evening. This applies to every day in the week which is established as a regular working day for any trade involved in the construction of this facility and holds until completion and final acceptance of the work of the Contractor for Electrical Work or until the services are terminated by instructions from the Commissioner.
14. MAINTENANCE OF TEMPORARY LIGHTS
  - a. The Contractor for Electrical Work shall maintain the Temporary Lighting System in good working order during the scheduled hours established.
  - b. The Contractor for Electrical Work is to include in its contract all charges for energy for the Temporary Lighting System.
  - c. The Contractor is advised to show the estimated cost of the installation, maintenance and energy of temporary electrical facilities in its detailed cost estimate of its Contract so as to facilitate partial payments during construction.
15. OVERTIME USE - Any Contractor requiring Temporary Lighting Service before or after hours set forth hereinbefore, or on weekends or a Holiday for all trades involved in the construction of this facility, shall pay for the additional cost of keeping the system energized and repaired. If more than one (1) Contractor is involved, the charges shall be prorated, or shared by other acceptable means previously agreed upon by the Contractors involved. When overtime is required by all Contractors on the work, the provisions for payment for regular time use of the Temporary Lighting System shall apply.
16. SERVICE BEYOND COMPLETION DATE - When failure to comply with the terms and conditions of any Contract necessitates temporary light beyond the date set for completion of the Contract for Electrical Work, the Contractor requiring such additional service shall pay for keeping it energized. When more than one (1) Contractor requires such service, the expense thereof shall be prorated

as determined by the Commissioner.

17. **ADJUSTMENT IN CONTRACT PRICE FOR TEMPORARY LIGHTING MAINTENANCE** - In the event that the temporary lighting maintenance extends beyond the Contract time through no fault of the Contractor for Electrical Work, the additional maintenance cost will be in accordance with the requirements of the following paragraphs:

- a. Payment for maintaining Temporary facilities when required will be made at the average hourly wage for electricians plus 69% of this rate, for each hour of work done upon order of the Resident Engineer. Payments will be included in partial estimates upon submission of detailed vouchers stating date, hour and time expended for each item of work.
- b. The addition of 69% of the average hourly wage rate specified above shall be deemed as the total allowance for all profit and overhead and for any and all other costs and expenses of any nature whatsoever, including but not limited to allowance for insurance, workman's compensation, unemployment insurance and other supplementary benefits.

18. **REMOVAL OF TEMPORARY LIGHTING WIRING** - The temporary lighting system shall be removed by the Contractor for Electrical Work when authorized by the Commissioner.

19. **HAND TOOLS** - The temporary electric lighting system shall not be used for power purposes, excepting that light hand tools not larger than 1/4 horsepower may be operated therefrom by any Contractor.

**B. SITE SECURITY LIGHTING (FOR NEW CONSTRUCTION ONLY) (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. The Contractor for the Electric Work shall furnish, install and maintain a system of site security lighting, as herein specified, to illuminate the construction site of the project, and it shall be connected to and energized from the Temporary Lighting System.
2. It is essential that the site security lighting system be completely installed and operating, at the earliest possible date. All Contractors must cooperate, coordinate and exert every effort to accomplish an early complete installation of the site security lighting system. After the system is installed and in operation, and a part of the system interferes with the work of any trade, that trade shall be completely responsible for the expense of removing, relocating and replacing all equipment necessary to reinstate the system to proper operating conditions.
3. The system shall consist of flood lighting by pole mounted guarded sealed-beam units. Floodlight units shall be mounted 16 feet above grade. Floodlights shall be spaced around the perimeter of the site to produce an illumination level of no less than one (1) foot candle around the perimeter of the site, as well as in any potentially hazardous area or any other area within the site that might be deemed by the Resident Engineer to require security illumination. The system shall be installed in a manner acceptable to the Resident Engineer. The first lighting unit in each circuit shall be provided with a photoelectric cell for automatic control. The photoelectric cell shall be installed as per manufacturer's recommendations.
4. All necessary poles shall be furnished and installed by the Contractor for Electrical Work.
5. The site security system shall be kept illuminated at all times during the hours of darkness. The Contractor for Electrical Work, at its own expense, shall keep the system in operation, furnishing and installing all material necessary to replace all damaged or burned out parts.
6. The Contractor for Electrical Work shall be on telephone call alert for maintaining the system during the operating period stated above.
7. All materials and equipment furnished under this section shall remain the property of the Contractor for Electrical Work and shall be removed and disposed of by the Contractor for

Electrical Work upon completion of that phase of the project.

C. TEMPORARY POWER

1. Any Contractor requiring temporary power for equipment larger than 1/4 horsepower shall arrange with the Public Utility for service and pay for all electrical energy consumed by its lines.
2. The Contractor shall provide service, metering equipment and distribution centers as required, and be responsible for keeping the system in working order.
3. When directed by the Commissioner, the Contractor shall remove its own temporary power system.

D. USE OF COMPLETED PORTIONS OF THE ELECTRICAL WORK

1. USE OF MAIN DISTRIBUTION PANEL - As soon as the permanent electric service feeders and equipment, metering equipment and main distribution panel are installed and ready for operation, the Contractor for Electrical Work shall have the temporary lighting system changed over from the temporary service points to the main distribution panel.
2. COST OF CHANGE OVER - The Contractor for Electrical Work shall be responsible for all cost due to this change over of service and it shall also make application to the Public Utility Company for a watt hour meter to be set on the permanent meter equipment.
3. The requirements for temporary lighting specified herein shall be adhered to after change over of service.
4. NO EXTRA COST - The operation of the service and switchboard equipment shall be under the supervision of the Contractor for Electrical Work, but this shall in no way be interpreted to mean the acceptance of such part of the installation or relieve the Contractor from its responsibility for the complete work or any part thereof. There shall be no additional charge for supervision by the Contractor for Electrical Work.

PART C - ELECTRICAL INSTALLATION PROCEDURE

SCOPE - This Section sets forth the general installation procedure that shall apply to all electrical work and electrical equipment appearing in any of the Contracts.

- A. INTENT OF CONTRACT DOCUMENTS - Contract Specifications and Contract Drawings are to be interpreted as a means of conveying the scope and intent of the work without giving every minor electrical detail. It is intended, nevertheless, that each Contractor shall provide whatever labor and materials are found necessary, within the scope of its Contract, for the successful operation of the installation. Specific details of individual installations are to be finally decided upon when the Contractor submits Working or Shop Drawings for approval to the Department of Design and Construction. Whenever there are two (2) or more methods to complete project work within the Contract scope, the Commissioner reserves the right to choose that method which, in the Commissioner's opinion, will afford the most satisfactory performance, lasting qualities, and accessibility for repairs, even though this selection is the most costly.
- B. SCHEMATIC PLANS - APPROXIMATE LOCATIONS - Conduits and wiring are shown on the plans for diagrammatic purposes only. Therefore, conduit layouts may not necessarily give the actual physical route of the conduits. The Contractor who installs a conduit system will also be required, as part of the work, to furnish and install all hangers and pull-boxes, including any special pull-boxes found necessary to overcome interferences, and to facilitate the pulling of electrical cables. Similarly, the locations of equipment, appliances, outlets and other items shown on Contract Drawings are only approximate and are to be definitively established when equipment Shop Drawings are submitted and approved by the Department of Design and Construction during construction.

- C. SLEEVES - required for conduits passing through walls or floors, shall be furnished and set by the Contractor installing the conduits. Sleeves in waterproofed floors shall be provided with flashing extending 12 inches in all directions from sleeve and secured to waterproofing. Flashing shall be turned down into space between pipe and sleeve and caulked watertight. Flashing shall be 20 oz. cold rolled copper. Sleeves shall be supplied with welded flanges similar to those supplied by the Contractor for Plumbing Work and shall extend one (1) inch above finished floor.
- D. COORDINATION - Each Contractor shall keep in close touch with the construction progress and obtain the necessary information for the accurate placement of its work in ample time before project construction operations obstruct its work. Each Contractor is to consult all other Contract Drawings, as well as approved equipment Shop Drawings on file in the Resident Engineer's Field Office. This will aid in avoiding interferences, omissions and errors in the electrical installation.
- E. RESPONSIBILITY FOR ERRORS OF INSTALLATION - In case of interference with the work of others or erroneous placement of work with respect to equipment or structures, each Contractor shall cooperate with other affected Contractors for an immediate agreeable solution of the affected work with each Contractor furnishing its responsible share of the labor and materials necessary to complete the installation in an approved manner.
- F. RESTORATION - If drilling or cutting is done on finished surfaces of equipment or the structure, any marring of the surface shall be repaired or replaced by the Contractor who caused the damage. Each Contractor shall be held responsible for corrective restoration due to its cutting or drilling, and for any damage to the project or its contents caused by the Contractor or the Contractor's workers. Any Contractor who pierces waterproofing because of the installation of their work shall, at their own expense, restore the waterproofing to the satisfaction of the Commissioner.
- G. ELECTRICAL WORK AT SITE - Any Contractor who is required to furnish equipment consisting of a number of related electrical devices or appliances, mounted in a single enclosure, or on a common base, shall furnish this unit complete with internal wiring, connections, terminal boxes with copper connectors and/or lugs and ample electrical leads, ready for connection and operation. The cost of any wiring, re-wiring or other work required to be done on this unit in the field, shall be borne by the Contractor who furnished the unit, without cost to the City.
- H. COOPERATION AMONG CONTRACTORS - Whenever an electrically operated unit or system involves the combined work of several Contractors for its installation and successful operation, each Contractor shall exercise the utmost diligence in cooperating with others to produce a complete, harmonious installation.
- I. DEFINITIONS
1. WIRING means both wire and raceway (rigid steel, heavy wall conduit unless specifically indicated otherwise).
  2. POWER WIRING means wiring from a panelboard or other specified source to a starter (if required) then to a disconnect (if required) then to the final point of usage such as a motor, unit or device.
  3. CONTROL and/or INTERLOCK WIRING means that wiring that signals the device to operate or shut down in response to a signal from a remote control device such as a temperature, smoke, pressure, float, etc. device (starters and disconnect switches are not included in this definition) regardless of the voltage required for the controlling device.
- J. WORK BY CONTRACTORS FURNISHING ELECTRICAL EQUIPMENT - Any Contractor who furnishes an electrically operated or motorized unit of equipment shall install same and, as part of its Contract, perform the following work in connection therewith:
1. FOUNDATIONS - Unless otherwise specified or indicated, the Contractor furnishing electrically operated equipment shall also furnish and install approved foundations for same. Special

foundations, if required, will be described in the detailed Specification.

- a. MATERIAL - All foundations, unless required otherwise, shall rest on a structural slab and shall be of poured concrete, of a mixture specified for reinforced concrete. Foundations shall present a neat, smooth appearance without voids, sharp corners or edges.
  - b. DIMENSIONS - Foundation dimensions, height above floor, methods of setting, aligning and anchoring of equipment shall be as recommended by the manufacturer of equipment and approved by the Commissioner. The minimum height of foundations above finished floor shall be four (4) inches and foundations shall extend at least six (6) inches at all sides beyond the base plates of equipment.
2. At least one (1) inch of grout shall be applied under the equipment base plate after placement and alignment of the equipment.
  3. ITEMS - Anchor plates, bolts, sleeves, nuts and washers and other necessary items for proper installation of equipment shall be provided. The Contractor shall also furnish and set required templates to locate accurately the positions of the hold down bolts.
  4. VIBRATION ISOLATION - If specifically required in the detailed Specifications for a particular unit, vibration isolators shall be provided for rotating equipment.
  5. SUPPORTS - If any motorized equipment is required to be mounted overhead or off a wall, the Contractor supplying the unit shall furnish and install a suitable platform, bracket or shelf, whichever is appropriate or specified, and mount the equipment thereon. This support shall be constructed of substantial steel members, plates, etc., and the whole securely fastened to the structure or to anchors previously embedded in the wall or slab. In case of excessive vibration transmitted to structure, isolating pads or other devices shall be installed. The Contractor shall apply one (1) coat of approved primer paint to the support and one (1) additional coat of approved paint in the field.
  6. ASSOCIATED EQUIPMENT - The Contractor who furnishes a motorized or electrically operated unit of equipment shall also furnish all associated motor starters, disconnect means, relays, control devices, lamps, or other devices, necessary for the successful functioning of the unit.
  7. POINT OF DELIVERY - Any item specified to be installed by the Contractor for Electrical Work and delivered to the site that can not be hand carried (due to bulk, weight or timeliness) to the location of its installation is to be delivered and set in place, leveled and secured by the Contractor furnishing the equipment. Such delivery shall be to the location where it is to be installed by the Contractor for Electrical Work.
  8. CONTROL AND INTERLOCK WIRING
    - a. General Construction Work and Plumbing Work.
      - (1) All control wiring associated with doors and door hardware is to be furnished and installed, unless otherwise indicated, by the Contractor furnishing the doors. Power for the door operation and for its controls shall be furnished and installed by the Contractor for Electrical Work.
      - (2) All other control wiring associated with equipment furnished by either the Contractor for General Construction Work or the Contractor for Plumbing Work is to be furnished and installed by the Contractor for Electrical Work.
    - b. Contractor for Heating, Ventilating and Air Conditioning Work
      - (1) The furnishing and installing of all control devices and all control and interlock wiring for equipment furnished under the Heating, Ventilating and Air Conditioning Contract shall be

by that Contractor, including any power required for any control device.

- (2) The Contractor for Heating, Ventilating and Air Conditioning Work shall deliver to the Contractor for Electrical Work all starters and disconnect switches specified to be furnished under the Heating, Ventilating and Air Conditioning Contract. The Contractor for Electrical Work is to install the starters and disconnect switches, and furnish and install all power wiring and make connections between the starter, disconnect switch and motor or equipment being served. The motor or equipment is to be mounted by the Contractor furnishing the motor.

9. INSTALLATION OF BURNER - The Contractor who furnishes and installs the gas/oil-fired boiler/furnace shall also include as part of its Contract, the work of furnishing, installing and connecting all equipment, controls with necessary conduits and wiring, to a service point provided by the Contractor for Electrical Work. Unless detailed otherwise in the Specific Requirements, the Contractor for Electrical Work shall furnish power from the power source to a junction box furnished and installed by the Contractor for the Electrical Work and located near the boiler/furnace control panel. The Contractor for Electrical Work shall also furnish and install an empty conduit and a junction box to be located at a remote location (outside of the boiler/furnace room) for an emergency shut-off switch. The shut-off switch and all other conduit and wire shall be furnished and installed by the Contractor furnishing the boiler/furnace.

K. WORK BY CONTRACTOR FOR ELECTRICAL WORK - The Contractor for Electrical Work shall perform the following work:

1. PANELETTE - The Contractor for Electrical Work shall furnish and install a four (4) circuit panelette in each mechanical equipment room.
2. STARTERS AND DISCONNECT SWITCHES - The associated disconnect switches and starters approved by the Department of Design and Construction which require mounting or wiring apart from a main equipment unit shall be delivered, prewired, to the Contractor for Electrical Work at the site of the project, who shall install and wire them. The electrical Contractor shall acknowledge acceptance in writing to the Contractor supplying them, and thereafter assume responsibility for their safe keeping until final acceptance of its work by the City.
3. CONTROL DEVICES - The Contractor for Electrical Work shall install conduit, wire, and make all connections for all interlock and control devices furnished under the Plumbing Work Contract and also all control and interlock devices furnished under the General Construction Work Contract, except for door control wiring. The various control and interlock devices, furnished (prewired) by the Contractors for Plumbing and General Construction Work Contractors, shall be installed and final connections made by the Contractor for Electrical Work.
4. DOOR CONTROL WIRING - Unless specifically detailed otherwise in the Contract Documents for Electrical Work, all door control and interlock devices are to be furnished and installed and wired by the Contractor furnishing the required control and interlock devices.
5. TESTS - The Contractor supplying the equipment, together with the Contractor for Electrical Work shall cooperate in making preliminary tests to establish the correctness of the installation. If a faulty operation of the unit is discovered, the Contractor whose work is the cause shall, without delay, remedy the trouble.

L. PAINTING

1. Ingredients and methods of application shall conform to that as required for similar work under the Contract for General Construction Work.
2. ALL METAL CABINETS - including switchboards, panelboards, boxes (pull, junction and outlet), trims, doors and covers shall be painted as follows:

All surfaces inside and outside, one (1) approved coat of primer. All accessible surfaces one (1) coat of approved paint inside and outside, in the field after installation.

3. **HANGERS, CONDUITS AND FITTINGS** - The Contractor who installs them shall give one (1) field applied, approved coat primer, followed by a second coat.
4. **FINAL COAT**--A final or third coat of paint, as directed, shall be applied by the Contractor installing them when the wall surfaces on which they are supported or the ceiling from which they are hung are not painted by the Contractor for General Construction Work. Pull boxes shall be neatly and legibly stenciled to show service.
5. **PAINTING OF MOTORIZED EQUIPMENT** - The Contractor furnishing electrically driven equipment shall paint motors and driven equipment, starters and controllers and other equipment provided by the Contractor. The Contractor shall provide any painting or finishing that may be required in the Specifications. For certain equipment having special corrosion resistant factory finishes, painting may be waived by special permission. Equipment shall be neatly stenciled, with legible characters to indicate service by the Contractor who supplies the equipment.
6. **NAME PLATES** - shall be left clean of all paint.

**PART D - ELECTRICAL CONDUIT SYSTEM INCLUDING BOXES (PULL, JUNCTION AND OUTLET) - (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

**SCOPE** - This Section sets forth the requirements applying to any Contract requiring the installation of electrical conduits, boxes or fittings. Rigid steel conduit shall be used through out, unless specifically indicated otherwise. **TYPES**-where the word 'conduit', without a modifier such as, rigid steel, EMT, etc., is specified to be used, it shall be interpreted to mean, rigid steel, heavy wall, threaded conduit.

**A. CONDUIT TYPES**

1. **RIGID STEEL CONDUIT** - shall be interpreted to mean rigid steel, heavy wall conduit that is hot dipped galvanized inside and outside. The conduit shall meet the requirements of the latest edition, as amended, of the "Standard for Rigid Steel Conduit" of the Underwriters' Laboratories, Inc. Unless otherwise specified in the Specifications or indicated on the Contract Drawings, rigid steel conduit shall be used for all exposed work, for all underground conduits in contact with earth and for fire alarms systems as required by the Building Code. Rigid steel conduit shall be used for all underground conduits in contact with earth, for Fire Alarm Systems and as required by authorities having jurisdiction.
2. **ELECTRICAL METALLIC TUBING (EMT)** - shall be industry standard thin wall conduit of galvanized steel only. All elbows, bends, couplings and similar fittings which constitute a part of the conduit system shall be specifically designed for use with electric metallic tubing. Couplings and terminating fittings shall be of the pressure type as approved by the Commissioner. Set screw fittings will not be acceptable. EMT shall meet the requirements of the latest edition, as amended, of the "Standard for Electrical Metallic Tubing of the Underwriters Laboratories Inc." EMT may only be used where specifically indicated. In no case will EMT be permitted in spaces other than hung ceilings and dry wall partitions.
3. **FLEXIBLE METALLIC** - For final connections to motors and motorized equipment, not more than a 4' - 0" length of flexible conduit may be used; for watertight installations, this conduit shall be of a watertight type, attached with watertight glands or fittings, for final connections from outlet box to recessed lighting fixtures and in locations only where specifically permitted by the Specifications or Contract Drawings.

**B. INSTALLATIONS AND APPLICATIONS**

1. Unless otherwise specified or indicated on the Contract Drawings, conduit runs shall be installed

concealed in finished spaces.

2. **CONDUIT SIZES** - The sizes of conduit shall be as indicated on the Contract Drawings. Wherever conduit sizes are not indicated, the conduit shall meet the requirements of the NYCEC to accommodate the conductors to be installed therein.
3. Conduits shall be reamed smooth after cutting. No running threads will be permitted. Universal type couplings shall be used where required. Conduit joints shall be screwed up to butt. Empty conduits after installation shall have all open ends temporarily plugged to prevent the entrance of water or other foreign matter.
4. Conduits being installed in concrete or masonry shall be securely held in place by the Contractor installing them during pouring and construction operations. A group of conduits terminating together shall be held in place by a template.
5. **UNDERGROUND STEEL CONDUITS** - Unless otherwise specified, all underground steel conduits in contact with earth shall be encased by the Contractor who installs them, in a covering of not less than two (2) inches of an approved concrete mixture. Concrete mix shall be one (1) part cement to four and one-half (4 ½) parts of fine and coarse aggregate.
6. **EXCAVATION RESTORATION PERMITS** - The Contractor installing underground conduits, duct banks or manholes shall perform, as part of its Contract, the work of cutting pavement, excavation shoring, keeping trenches or holes pumped dry, backfilling, restoration of surfaces to original condition and removal of excess earth and rubbish from premises. During the work, the Contractor shall provide adequate crossovers, protective barriers, lamps, flags, etc., to safeguard traffic and the public. When the work is in a public highway or street, the Contractor shall secure and pay for all necessary permits and inspection fees and pay the cost of repaving.
7. **EXPOSED CONDUIT SUPPORTS** - Exposed conduit shall be supported by zinc coated hangers with necessary inserts, beam clamps of approved design or attached to walls or ceilings by expansion bolts. Exposed conduits shall be supported or fastened at intervals not more than five (5) feet.
8. Exposed conduit shall be installed parallel or at right angles to ceiling, walls and partitions. Where direction changes of exposed conduit cannot be made with neat bends, such as required around beams or columns, conduit type fitting shall be used.
9. The conduit shall be installed with an approved expansion joint:
  - a. Wherever the conduit crosses a building expansion joint (each Contractor will be held responsible for determining where the building expansion joints are located).
  - b. Every 200 feet, when in straight runs of 200 feet or longer.
10. Conduit may only enter and leave a floating slab in the vertical direction, and then only in an approved manner. Horizontal entries into floating slabs are not permitted.
11. Conduit installed in pipe shafts shall be properly supported to carry the total weight of the raceway system complete with cable. In addition at least one (1) horizontal brace per 10 ft. section shall be provided to assure stability of the raceway system.
12. **BUSHINGS AND LOCKNUTS** - Approved bushings and locknuts shall be used wherever conduits enter outlet boxes, switch boxes, pull boxes, panel board cabinets, etc. For conduits one (1) inch in diameter or larger, insulating bushings to be O.Z. or approved equal.
13. **CONDUIT BENDS** - shall be made without kinking conduit or appreciably reducing the internal diameter. All bends in conduit of two (2) inch in diameter or larger shall be made with an hydraulic or power pipe bender. The radius of the inner edge of any bend shall not be less than six (6)

times the internal diameter of the conduit where rubber covered conductors are to be installed. And not less than 10 times the internal diameter of the conduit where lead covered conductors are to be used. Long gradual sweeps will be required, rather than sharp bends, when changes of direction are necessary.

#### 14. EMPTY CONDUITS

- a. TESTS - All conduits and ducts required to be installed and left empty shall be tested for clear bore and correct installation by the Contractor who installed them using a ball mandrel and a brush and snake before the installation will be accepted. The ball shall be of lignum vitae turned to approximately 85% of the internal diameter of the raceway to be tested. Two (2) short wire brushes shall be included in the mandrel assembly. Snaking of conduits, ducts, etc., shall be performed by the Contractor in the presence of the Electrical Inspector. Any conduits or ducts which reject the mandrel shall be cleared at once with the Contractor bearing all costs, such as chopping concrete, to replace the defective conduit and restore the surface to its original condition.
- b. TAGS - Numbers or letters shall be assigned to the various conduit runs, and as they test clear they shall be identified by a fiber tag not less than 1-¼ inch width, attached by means of a nylon cord. All conduit terminations in panel, splice or pull boxes as well as those out of the floor or ceiling shall be tagged.
- c. TEST RECORDS - As the conduit runs clear, a record shall be kept under the heading of "Empty Conduit Tested, Left Clear, Tagged and Capped" showing conduit designation, diameter, location, date tested and by whom. When complete, this record shall be signed by the Electrical Inspector and submitted in triplicate for approval. This record shall be entered on the Record drawings, which are required under "General Conditions Governing All Contracts."
- d. CAPPING - All empty conduit and duct openings, after test, shall be capped or plugged by the Contractor as directed.
- e. DRAG LINES - A drag line shall be left in all empty conduit.

#### C. BOXES

1. The Contractor shall furnish and erect all pull boxes indicated on the plans or where required. Sides, top and bottom of pull boxes shall be zinc coated and shall be built of No. 12 USSG steel reinforced at corners by substantial angle irons and riveted or welded to plates. Bottom or side of pull boxes shall be removable and held in place by corrosion resistant machine screws. Pull boxes in damp locations shall have threaded hubs and gaskets. All pull boxes shall be suspended from ceiling or walls in the most substantial manner.
2. For large boxes, sufficient suitable porcelain clamp insulators or other approved devices shall be provided in the pull boxes for supporting the cables passing through the box so that the cables will not be unsupported for a distance greater than three (3) feet and so as to permit a neat and orderly arrangement of the cables.
3. For pull boxes having the largest side more than nine (9) square feet in area, special rectangular and diagonal angle-iron bracing will be required as approved.
4. Pull boxes of special or odd shapes are required to be installed by the Contractor, even though not shown on plans, where necessary to overcome interference or to facilitate the pulling of conductors in conduits.
5. In centering outlets, the Contractor is cautioned to allow for overhead pipes, ducts and other obstructions, and for variations in arrangement and thickness of fireproofing, soundproofing and plastering. Precautions should be exercised regarding the location of window and door trims,

paneling, etc. Mistakes resulting from failure to observe these precautions, must be corrected by the Contractor without cost to the City. Outlets in hung ceilings shall be supported from the black iron or structure.

6. The exact location of all outlets in finished rooms shall be as directed. When the interior finish has been applied, the Contractor shall make any necessary adjustment of its work to properly center the outlets. All outlet boxes for local switches near doors shall be located at the strike side of doors as finally hung, whether so indicated on the drawings or not.
7. Exposed wall outlet boxes shall be erected neatly and tight against the walls and securely anchored to same.
8. All wall outlets of each type shall be set accurately at the same level on each floor, except where otherwise specified or directed. Where special conditions occur, outlets shall be located as directed.
9. MOUNTING HEIGHTS - The following heights are standard heights and are subject to correction due to coordination with Contract Drawings. All such changes must be approved by the Resident Engineer. Heights given are from finished floor to center line of outlet or device on wall or partition, unless otherwise indicated.

a. General Convenience Outlets	
(mount vertical)	1'-6"
b. Clock Outlets	8'-6" or 1'-6" below ceiling
c. Wall Lighting Switches	4'-0"
d. Motor Controllers	5'-0"
e. Motor Push-button	4'-2"
f. Telephone Outlets	As Directed
g. Fire Alarm Bells	8'-6" or 1'-6" below ceiling
h. Fire Alarm Stations	4'-0"
i. Intercom Outlet	1'-6"
j. Cooking and Refrigerator Unit	As Directed
10. Outlet boxes shall be of approved design and construction; of form and dimensions suited and adapted to its specific location; the kind of fixture to be used and the number and arrangements of conduits, etc., connecting therewith. All ferrous outlet boxes shall meet the requirements for zinc coating as specified under Electrical Conduit Systems.
11. There shall be knockouts opened only for the insertion of conduit. Any outlet boxes with more openings than are necessary for conduit insertion, shall be sealed by the Contractor without additional charge.
12. All outlet boxes and junction boxes for exposed work shall be galvanized cast iron or cast aluminum with threaded openings. Outlet boxes for exposed inside work in damp locations shall be galvanized cast iron or cast aluminum with threaded hubs and neoprene gaskets.
13. Junction boxes shall not be less than 4 11/16" square and shall be equipped with zinc coated plates. Where plates are exposed they shall be finished to match the room decor.
14. FIXTURE SUPPORTS - Outlet boxes supporting lighting fixtures shall be equipped with fixture studs held by approved galvanized stove bolts or integral with the box. Cast iron or malleable boxes shall have four (4) tapped holes for mounting required cover or fixtures.
15. Outlet boxes exposed to the weather or indicated W.P., shall be cast iron or cast aluminum and the covers made watertight with neoprene gaskets. The boxes shall have external lugs for mounting. Drilling of the body of the fitting for mounting will not be permitted. The cover screws shall be appropriate in size, noncorrodible and not less than four (4) in number for each box opening.

**PART E - ELECTRICAL WIRING DEVICES (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. WALL SWITCHES shall be of the best specification grade, quiet type, and shall have a rating of 20 Amperes at 277 volts, as manufactured by Bryant, Hubbell or approved equal. The mechanism shall be equipped with arc snuffers. They shall be of the tumbler type, single pole. Switches of the 3-way type shall have a similar rating.
- B. RECEPTACLES
  - 1. CONVENIENCE OUTLETS - shall be of the best specification grade, duplex, two-pole, 3-wire, 15 Amperes at 125 volts. It shall have a grounding pole that shall be grounded to the conduit system. Receptacles shall be capable of both back and side wiring and shall have only one (1) grounding screw. Receptacles shall be Hubbell Cat. #5262 or approved equal.
  - 2. HEAVY DUTY RECEPTACLE OUTLETS - shall have the Ampere rating and the number of poles specified on the Contract Drawings and shall be Hubbell, Russell-Stoll, Bryant, AH & H or approved equal. Each outlet shall have a grounding pole, which shall be grounded to the conduit system.
  - 3. FLOOR RECEPTACLES - shall be Russell & Stoll #3040 or approved equal, to fit into floor box previously specified.
  - 4. NAMEPLATES - are required for all receptacles other than 120V.
- C. CLOCK HANGERS - Clock outlets for surface type clocks shall be equipped with a supporting hook and recessed faceplate to conceal the electrical cord.
- D. WATERTIGHT DEVICES - For installations exposed to weather or in damp locations, the devices shall be in a gasketed, cast iron enclosure.
- E. PLATES
  - 1. Every convenience outlet and switch outlet shall be covered by means of a stainless steel No. 302 - 0.4" antimagnetic plate with an approved finish, unless provided otherwise in the detailed Specifications.
  - 2. Where two (2) or three (3) switches are grouped together a single faceplate shall be used. Where more than three (3) switches are located at one (1) point, the faceplates may be made up in multiple units.

**PART F - ELECTRICAL CONDUCTORS AND TERMINATIONS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. CONDUCTORS FOR LIGHT AND POWER - All wire and cable shall be of annealed copper of 98% conductivity. Aluminum wire or cable will not be permitted. The insulation shall be flame retardant, moisture and heat resistant, thermoplastic, type THW or THWN rated for 600 volts at 75 degrees C. for both wet and dry locations. Wires No. 8 or larger shall be stranded. Wires and cables shall also be subject to the requirements of the NYCEC. Cables for incoming service or wire in conduits contiguous with the earth or in concrete or other damp or wet locations shall be synthetic rubber insulated with neoprene jacket, heat and moisture resistant and shall be equal to UL Type USE and rated for 600 volts at 75 degrees C. for both wet and dry locations.
- B. FIXTURE WIRE - Lighting fixtures shall be wired with No. 14 gauge wire designated as AWM and rated at 105 degrees C.
- C. OTHER TYPES - Cables and wires for interior communication systems are described in detailed

Specifications of applicable Contracts.

- D. MINIMUM SIZE - Conductors smaller than No. 12 AWG shall not be used for light or power.
- E. COLOR CODE - Wires shall have a phase color code, and multiple conductor cables shall be color coded.
- F. CABLE DATA - The Contractor shall submit for approval the following information for each size and type of cable to be furnished.
  - 1. Manufacture of Cable - Location of Plant.
  - 2. Minimum insulation resistance at standard test temperature.
  - 3. Days required for delivery to site of work after order to proceed with manufacture.
- G. ORIGINAL REELS - Cable and wire shall be delivered to the site of the work on original sealed factory reels.
- H. TESTS
  - 1. NOTIFICATION OF TEST - No cable shall be released for shipment from the mill unless authorized by the Commissioner. The Contractor shall give the Commissioner at least 10 days notice when the cable will be available for testing at the mill. The Contractor's representative or inspector shall have access during working hours to all parts of the plant where the cable is being manufactured, and all reasonable inspection and testing facilities shall be afforded to the Contractor without increase in price to the City. The Inspector shall witness the complete test of cable and receive a copy of all test data.
  - 2. TEST DATA - The Contractor shall forward to the Commissioner six (6) copies of all test data for approval before accepting shipment of the cable.
  - 3. INSPECTION DURING MANUFACTURE - The Commissioner reserves the right to dispatch a representative to the factory at any time during the period of manufacture of the cable for the purpose of expediting or checking progress. The living and traveling expenses of the City Engineers making these inspections and witness tests will be borne by the City of New York.
  - 4. TEST IN CITY LABORATORY - Sufficient additional length of conductor shall be provided on each reel, so that a six (6) foot sample may be removed for testing in the City's Laboratories. This sample shall be cut from the reel in the presence of the Inspector of the Department of Design and Construction and cut in two (2) three-foot lengths, each piece to be tagged showing reel number, size and type, manufacture, date, name or project & Contract number. Samples shall be handed to the Inspector for transmittal. If it is found as the result of test that the cable does not comply with the approved factory test the Contractor will be ordered to remove all cable which came off the reel and has been installed, and to replace the defective cable not used, without cost to the City. The Contractor will be held responsible for any delays in the construction program caused by the defective cable.
  - 5. FINAL FIELD TEST - After conductors are installed and connected, the City will test the work for overall insulation resistance. The Contractor shall furnish all test equipment necessary. To be acceptable, the test shall meet the requirements set forth in the NYCEC.
- I. WIRE INSTALLATION
  - 1. INSTALL WIRES AFTER PLASTERING - Feeder and branch circuits wiring shall not be installed in conduit before the rough plastering work is completed. No conductors shall be pulled into floor conduits before floor is poured.

2. CONDUIT SECURED IN PLACE - No conductor shall be pulled into any conduit run before all joints are made up tightly and the entire run rigidly secured in place.
3. WIRE ENDS - All wires shall be left with sufficiently long ends for proper connection and stowing.
4. PULLING COMPOUNDS - When required to ease the pulling-in of wires into conduit, only approved compounds as recommended by cable manufacturers shall be used.
5. PRESSURE CONNECTORS - for wires shall be of the cast copper or forged copper pressure plate type. Connectors shall be O.Z., Burndy, National Electric Products or approved equal.
6. Splices and feeder taps in the gutters of panel boxes shall be made by means of pressure plate type connectors encased in composition covers as manufactured by O.Z., Burndy, National Electric Products or approved equal.
7. Splices in branch wiring for sound systems and fire systems, shall be first made mechanically secure, then soldered and taped.
8. In lieu of soldered splices (except for sound and Fire Systems, which must have soldered splices) the following alternates are acceptable for operating temperatures up to 105 degrees C., for fluorescent fixtures and for the splicing of branch circuit wiring up to No. 8 AWG wire:
  - a. Mechanical splices made with mechanical connectors as manufactured by the Minnesota Manufacturing Company "Scotchlock" or approved equal. Mechanical connectors requiring a special tool (pressure connectors, insulators and locking rings) by Buchanan or approved equal. The tool used for connector application shall be as approved by the connector manufacturer.
  - b. For wire and cable No. 6 AWG and larger for branch circuit wiring the seamless tubular connector will only be accepted. Application of this connector shall be with a tool recommended by the connector manufacturer.
9. TAGS - All feeders and risers shall be tagged at both ends, and in all pull and junction boxes and gutter spaces through which they pass. Such tags shall be of fiber and have the feeder designation and size stamped thereon.
10. BRANCH CIRCUIT WIRING
  - a. The Contractor installing branch circuit wiring shall test the work for correct connections and leave all loop splices in the fixture outlet boxes properly spliced and taped. The Contractor shall provide wire ends long enough for convenient connection to device.
  - b. NEUTRALS - No common neutrals shall be used except for lighting branch circuits. Each neutral wire shall be terminated separately on a neutral busbar in the panelboard. No common neutrals will be permitted for convenience receptacle branch circuits.

#### J. TERMINATIONS

1. LUGS - All lugs for all devices and all cable terminations shall be copper. AL/CU rated lugs will not be permitted. The only exception to this requirement is when the particular device is not manufactured with copper lugs by any manufacture. Lugs for No. 6 AWG cable and larger shall be cast copper or forged copper pressure plate type. Lugs for 1/0 and larger shall be fastened with two (2) bolts.
2. All lugs shall be of the proper size to accept the cable connected to them. Any Contractor furnishing a device containing lugs is to coordinate with the Electrical Work Contract Documents to insure that the device terminations are adequate for the wire or cable (whose size may be larger than expected due to voltage drop considerations) connected to the device. This requirement

applies to both the Contractor for Electrical Work whose branch circuit protector must have lugs of the proper size, as well as to the Contractor who furnishes the device who may have to increase the size of that particular device.

**PART G - CIRCUIT PROTECTIVE DEVICES (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

SCOPE - This Section sets forth the circuit protective devices such as circuit breakers and safety switches, used in connection with Motor Control Equipment, Distribution Centers, Panelboards and Service Entrance.

**A. CIRCUIT BREAKERS**

1. CIRCUIT BREAKERS shall be operable in any position and shall be of the quick-make, quick-break type on manual operation. The handle shall be trip free, preventing contacts from being held in closed position against abnormal overloads or short circuits. Positive visual indication of automatic tripped position of breaker shall be provided, in addition to the "On" and "Off" indication. All circuit breakers shall be of the bolted type.
2. TRIP RATING - Circuit breakers shall be provided with the required number of trip elements, calibrated at 40 degrees C., ambient temperature, in accordance with wire sizes or motor currents as shown on Contract Drawings or indicated in the Specifications.
3. POLE BARRIERS - Multipole pole breakers shall be designed to break all poles simultaneously. They shall be provided with barriers between poles and arc suppressing devices.
4. ELEMENTS - Multipole circuit breakers shall have frames of not less than a 100 Ampere rating. Multipole circuit breakers for 480 volts AC operation shall have an NEMA interrupting rating of 18,000 Amperes, unless a higher rating is specified in the Specific Requirements or indicated on the Contract Drawings.
5. For circuit breakers with frame size up to and including 225 Amperes, the breakers may be provided with non-interchangeable trip elements. For frame ratings above 225 Amperes, the breakers shall be provided with interchangeable trip elements, which can be replaced readily.
6. The trip rating of all circuit breakers shall not exceed 70% of frame rating.
7. Single pole circuit breakers for branch circuits shall have a frame size of no less than 100 Amperes, and shall be rated at 125 volt A.C. with a NEMA interrupting rating of 10,000 Amperes, unless a higher rating is specified in the Specific Requirements or indicated on the Contract Drawings.
8. INVERSE TIME ACTION - The circuit breakers shall be dual element type, one (1) element with time limit characteristics, so that tripping will be prevented on momentary overloads, but will occur before dangerous values are reached, the other with instantaneous trip action. Inverse time delay action shall be effective between a minimum tripping point of 125% of rating of breaker and an instantaneous tripping point between 600% and 700% of rated current.
9. CONSTANCY OF CALIBRATION - The tripping elements shall insure constant calibration and be capable of withstanding excessive short circuit conditions without injury.
10. CONTACTS shall be non-welding under operating conditions and of the silver to silver type.
11. TEMPERATURE RISE - Current carrying parts, except thermal elements shall not rise in temperature in excess of 30 degrees C. while carrying rated current at rated frequency.
12. NUMBERING - Each circuit breaker shall be distinctly numbered when installed in a group with other breakers. The calibration of trip element shall be indicated on each breaker.

**B. SAFETY SWITCHES**

NEMA TYPE HD - When safety switches are permitted to be used for service entrance, motor disconnecting means or to control other types of electrical equipment, they shall be of the type HD of a rating not less than 30 Amperes. Enclosures shall be provided with means for locking. For ratings above 60 Amperes terminals shall have double studs.

**PART H - DISTRIBUTION CENTERS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

SCOPE - This Section sets forth the construction and installation procedure for Switchboards, Panelboards and Cabinets.

- A. **PANELBOARDS--GENERAL TYPE** - The panelboards shall be of the automatic circuit breaker type with individual breakers for each circuit, removable without disturbing the other units. Circuit breakers shall be in accordance with the requirements outlined under "Circuit Protective Devices."
- B. **NUMBER AND RATING OF CIRCUIT BREAKERS** - The Contract Drawings show a layout of each panel, giving the number, frame, size and trip setting of circuit breakers and number of branch circuits and spare breakers. Each branch circuit shall be distinctly numbered.
- C. **BUS-BAR CONSTRUCTION AND SUPPORT** - Panel Boards shall be of the deadfront type and shall have bus bars and branch circuits designed to suit the system and voltage. Current carrying parts, exclusive of circuit breakers shall be copper and based on a maximum density of 1,000 Amperes per square inch. Bus bars for the main switchboard shall be designed for the frame rating of the Service Breaker. Bus bars shall run up the center of the panel, unless otherwise indicated, and shall have connected thereto the various branch circuits. Unless otherwise specified, bus bars for each panelboard shall be equipped with main lugs only and capacity as required on Contract Drawings. Where main protection is required, automatic circuit breakers shall be used. A neutral bus of at least the same capacity as a live bus bar shall be provided for the connection of all neutral conductors. Each terminal shall be identified. All current carrying parts, exclusive of circuit breakers, shall be of copper with a minimum number of joints. The bus bar structure shall be a self supporting unit, firmly fastened to a ½ inch plastic board, extending the full length and width of assembly which shall serve to insulate the bus structure from the back of panel box. Other methods affording equally effective bus structure support and insulation will be given consideration. An insulating barrier shall separate neutral bus from other parts of panel.
- D. **CIRCUIT BREAKER ASSEMBLY** - The entire circuit breaker and bus bar assembly shall be mounted on an adjustable metal base or pan and secured to the back of panel box. The panel shall have edges flanged for rigidity.
- E. **PANEL MOUNTING** - The panel shall be centered in the panel box to line up with door openings and set level and plumb so that no live parts are exposed with the door open.
- F. **PANEL CABINET CONSTRUCTION AND SUPPORT**
  - 1. Panel boxes shall be fabricated from No. 12 USSG sheet steel of no more than three-piece construction, reinforced at the corners and with continuous welds. Boxes having a back whose area is larger than 16 square feet, shall be of No. 10 USSG sheet steel and reinforced to provide ample stiffness and to prevent buckling. Boxes shall be of sufficient size to afford a clear gutter space on all sides, of not less than six (6) inches.
  - 2. **PANEL CABINET INSTALLATION** - When installed surface, or in panel closets, they shall be mounted on Kindorf channel, supported from floor slab to ceiling slab.
  - 3. Where cabinets cannot be set entirely flush due to shallow walls or partitions or where cabinet is extra deep, the protruding sides of cabinet shall be trimmed with a metal or hardwood return

molding of approved design and fastened to cabinet so as to conceal the intersection between the wall and cabinet.

- G. CABINET TRIM - Trim for both lighting and power panelboards shall be door-in-door type installation as depicted in DETAIL A TRIM FOR LIGHTING AND POWER PANELBOARDS. Construction details are to be as described in the following paragraphs.

#### DETAIL A TRIM FOR LIGHTING AND POWER PANELBOARD

1. CABINET TRIM - The trim and doors for lighting and power panels shall be made of No. 12 USSG full finish sheet steel in one (1) piece. Cabinet trim larger than 16 square feet shall be made of No. 10 USSG. The inner door shall cover the circuit breaker section only and be provided with appropriate brass hinges. The outer door shall cover the entire gutter space and shall be attached to the border type flange with appropriate hinges. Both doors for power panels shall be provided with a New York City Lock No. 511S, with key change to No. 47 and two (2) keys. For lighting panels, the inner door shall be provided with a substantial catch. All hinges shall be of the concealed type. Locks shall be flush with trim. In addition, for panels requiring doors over 48 inches in height, furnish a vault handle and a 3-point catch arranged to fasten door at top, bottom and center.
  2. The door shall close against a flange or rabbet to afford a dust tight fit. All space between the panel and the cabinet trim shall be closed by means of a sectional plate secured to the trim.
  3. The border flange of the trim shall be fastened to the box with oval head screws finished to prevent corrosion or with approved trim clamps.
  4. To facilitate installation of trim, a suitable angle iron shall be spot welded across the bottom of each trim to carry the weight of the trim while the holding screws are being put in place.
- H. MOTOR CONTROL CENTERS - Motor centers shall be furnished by the Contractor as indicated in the Specifications or Contract Drawings, but shall be installed by the Contractor for Electrical Work.
- I. NAMEPLATES - Nameplates where required, shall be made of engraved Lamicoid sheet, or approved

equal. Letters and numbers shall be engraved white on a black background (except for Firehouse projects which shall have white letters on a red background) the Contractor shall submit an engraved sample for approval as to design and style of lettering before proceeding with the manufacture of the nameplate. Nameplates shall be of suitable size and shall also be provided at the top of the switchboard or section thereof and on the trim at the top of all lighting and power panels. Similar nameplates shall also be provided for each distribution circuit breaker giving the breaker number, the number of the feeder, and the name of the equipment fed.

- J. SHOP DRAWINGS - showing all details of boxes, panels, etc., shall be submitted for approval.
- K. DIRECTORIES - A directory shall be fastened with brass screws and consist of a noncorrosive metal frame with dimensions not less than five (5) inches x eight (8) inches and a transparent window of Plasticile, Plexiglass, Lucite or approved equal that is not less than 1/16 inch thick over cardboard or heavy paper. The directory shall be typewritten and show the number of each circuit, the name of circuit and lighting or equipment supplied. The size of riser feeder shall be as indicated on directory. The dimensions of directory shall be submitted for approval for each size of panel.
- L. CONSTRUCTION
  - 1. FINISH - Panel boxes, doors and trim for installation in dry locations, shall be zinc coated after fabrication by the hot-dip galvanizing or electroplate process on inside and outside surfaces. In damp locations, panelboards shall be enclosed and gasketed NEMA 3R type. Panelboards located outdoors or exposed to the weather shall be cast iron.
  - 2. PAINTING - Panel boxes, doors and trim shall receive a coat of approved priming paint and a second coat of approved paint in the field after installation. Paint shall be applied to the inside and outside of boxes and on both sides of trim. Panel trims and doors shall receive a third or finishing coat on the outside after installation. Approval as to texture and color must be obtained before the final coat is applied. All of the aforementioned painting is to be done by the Contractor who furnishes the boxes and trim. Where panel trims or boxes are installed on walls which are to be painted, the previously mentioned third or finishing coat of paint shall be included in the work of the Contractor who has the Contract for general interior painting.

#### **PART I - MOTORS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

SCOPE - This Section sets forth the general design, construction and performance requirements, which shall apply to all motors furnished in any of the Contracts.

- A. MOTOR DESIGN - All motors shall be designed to comply with the New York State Energy Code currently in effect. Motors shall have standard NEMA frames and shall have nameplate ratings adequate to meet the specified conditions of operation. Motor performance under variable conditions of voltage and frequency shall be within the limits set in NEMA standards, unless modified in present Specifications. Motors shall be expressly designed for the hazard duty load, voltage and frequency as specified in the Contract. All motor windings shall be copper. All motors intended to operate on a 208 volt system shall be designed and rated for 200 volts.
- B. MOTORS OF SAME MANUFACTURER - Unless expressly permitted otherwise by the Commissioner, all motors under the same Contract shall be manufactured by the same company. Exceptions may be granted in the case of motors of 1/4 horsepower rating and smaller, or for a motor that is an integral part of the equipment, with its housing especially built for this purpose.
- C. STANDARDS OF COMPARISON - In general, the best standard products of the leading motor manufacturers shall be considered as a standard for comparison. The requirements of the NEMA standards for motors and generators shall be deemed to contain the minimum requirements of performance and design.
- D. OBJECTIONABLE NOISES - Objectionable noises will not be tolerated and exceptionally quiet motors

may be required for certain specified locations. Noise control tests as per the Building Code of the City of New York may be performed as directed by the Commissioner. Such motors shall bear a nameplate lettered "Quiet Motor." Springs and slip rings shall be of approved non-ferrous material.

E. BEARINGS

1. Bearings, unless specified otherwise, shall be of the ball or roller type. Motors one (1) horsepower and larger that are equipped with ball roller bearings shall also have lubrication of the pressure-relief greasing type. Each Contractor who furnishes four (4) or more such motors shall also furnish, as part of its Contract, a pressure grease gun of rugged design, of approximately 10 ounce capacity, complete with necessary adapters. The Contractor shall also provide 10 pounds of approved gun grease.
2. For any particular unit where sleeve bearings are deemed desirable, permission for their use may be granted by the Commissioner. Motors one (1) horsepower and larger that are equipped with sleeve type bearings shall in addition to having protected accessible fittings for oiling be provided with visible means for determining normal oil level. Lubrication shall be positive, automatic and continuous.

F. MOTOR TERMINALS AND BOXES - Each motor shall be furnished with flexible leads of sufficient length to extend for a distance of not less than three (3) inches beyond the face of the conduit terminal box. This box shall be furnished of ample size to make and house motor connections. These requirements shall be met irrespective of any other standards or practices. Size of cable terminals and conduit terminal box holes shall be subject to approval. For motors five (5) horsepower or larger, each terminal shall come with two (2) cast or forged copper pressure type connectors with bolts, nuts and washers. For motors of smaller ratings, connectors of other acceptable types may be furnished. For installations exposed to the weather or moist locations, terminal boxes shall be of cast iron with threaded hubs and gasketed covers. Cover screws shall be of non-corrosive material.

G. MOTOR TEMPERATURE RISES - The motor nameplate temperature rises for the various types of motor enclosures shall be as listed below:

- |   |               |
|---|---------------|
| 1. Open Frame                               | 40 degrees C. |
| 2. Totally enclosed and enclosed fan cooled | 55 degrees C. |
| 3. Explosion proof and submersible          | 55 degrees C. |
| 4. Partially enclosed and drip proof        | 40 degrees C. |

The temperature of the various parts of a motor shall meet the requirements of NEMA standards for the size and type of the motors. Tests for heating shall be made by loading the motor to its rated horsepower and keeping it so loaded for the rated time interval or until the temperature becomes constant.

H. SPECIAL CODE INSTALLATIONS - Electrical installations covered by special publications of NBFU and by special City rulings and regulations shall comply in design and safety features with such applicable codes, regulations and rulings, and shall be furnished and installed complete with all accessories and safety devices as therein specified.

I. MOTORS ON LIGHTING PANELS - The largest A.C. motor permitted on branch circuits of lighting panels shall not exceed 1/4 horsepower.

J. MOTORS RATED 1/2 horsepower and larger shall be polyphase.

K. TESTS

1. FACTORY INSPECTION - Electrical equipment and devices (except portable) not covered by standard Specifications or tests herein prescribed shall be inspected and witnessed on test at the factory with the tested equipment being completely assembled and connected under conditions approved by the Commissioner as equivalent to the actual working conditions. Suitability and

ruggedness of the design for the specified purpose will be a condition for acceptance.

2. **SHOP TESTS** - to determine the load performance of motors shall be made in accordance with Standard C-50, of the ASA. Motors shall meet the requirements of C-50 for insulation resistance, dielectric strength, efficiency and temperature rise. Efficiency (and power factor for A.C. motors) shall be established for 50, 75 and 100 percent of rated horsepower but for motors of 100 horsepower or larger, the 125 percent loading shall be included.
  3. **TEST REPORTS** - The result of shop tests shall be submitted to the Commissioner for approval and shall be on forms approved by the City. The evaluated test data shall include a signed statement confirming the fact that the equipment meets the requirements of the standards of performance.
  4. **MANNER OF TEST** - For motors of 100 horsepower or smaller, check tests against complete tests of similar motors will be accepted. For motors larger than 100 horsepower, complete tests for each motor furnished shall be made, and certified test data sheets shall be submitted for approval, unless shop tests are required by the Detailed Specifications.
  5. **PREFERRED METHODS** - The efficiency of fractional horsepower motors shall be determined by the input-output method; for larger motors up to and including 100 horsepower, the separate loss method as specified in ASA Standards C-50 will be accepted unless otherwise required in the Specifications.
- L. **SPARE PARTS** - The Contractor who furnishes motors, including fractional horsepower, shall provide the following spare parts and accessories in connection therewith:
1. **BRUSHES** - One (1) additional set of brushes for each motor equipped with them.
  2. **BEARINGS** - For each group of three (3) and fraction thereof, of each type and size of motor, the Contractor shall furnish one (1) set of extra bearing linings or ball or roller bearings. Where less than three (3) of any type of motor is involved, one (1) set of extra bearings shall be furnished.
  3. **SPRINGS** - One (1) set of brush springs used in slip ring motor or universal type motors.
  4. **WRAPPER MARKING** - All parts shall be delivered neatly and securely wrapped and boxed, plainly tagged and marked for identification and reordering.

**PART J - MOTOR CONTROL EQUIPMENT (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

**SCOPE** - This Section sets forth the requirements for motor controllers and associated devices, which are applicable to all Contracts under which motor control equipment is furnished or installed.

- A. **MANUFACTURER** - All control equipment furnished under one (1) Contract shall be the product of a single manufacturer. Exceptions to this rule may be granted in the case of controllers for fractional horsepower motors driving special equipment, the various units of which have been engineered to obtain specific performance.
- B. **CONTROL ITEMS REQUIRED** - The Contractor who furnishes a motor shall also furnish therewith complete disconnecting, starting and control equipment as required by the detailed Specifications, the various code authorities and for the successful operation of the driven equipment. These items include circuit breaker, magnetic starter with overload protection and low voltage release or protection, push button stations, pilot lights and alarms, float, pressure, temperature and limit switches, load transfer switches, devices for manual operation and speed controllers, etc. The Contractor shall furnish as many of these items as are required for the successful operation of the driven unit.
1. Where a motor is to be located out of sight of the controller, the Contractor who furnishes the motor shall furnish an approved disconnecting means to be mounted near motor.

## C. TYPES OF STARTERS

1. SQUIRREL CAGE - A.C. motors of the squirrel cage type, rated from one (1) to 30 horsepower shall have magnetic across the line starters; motors rated above 30 horsepower shall be furnished with reduced voltage (autotransformer type) starter or part winding start with time delay to reduce inrush current. Size of starters shall be based on 200V. operation.
2. SLIP RING - A.C. Motors of the slip-ring type shall be furnished with primary across the line starters interlocked with secondary starting and regulating equipment. The interlocking feature shall prevent starting of the motor when the secondary controller is off the initial starting point.
3. MAGNETIC - For fractional horsepower motors, magnetic type starters are not required unless the particular method of controlling the driven equipment makes them necessary. Where individual single phase fractional horsepower motors or the sum of fractional horsepower motors controlled by an automatic device are  $\frac{1}{2}$  horsepower or more, magnetic starters and circuit breakers shall be used. Single phase A.C. motors smaller than  $\frac{1}{2}$  horsepower or three-phase A.C. motors smaller than one (1) horsepower where manual control is specified may be furnished with starters of toggle switch or push button type with inbuilt thermal protection. No additional disconnecting means is required to be furnished with this type of starter. This type of starter may also be used in series with automatic control devices such as thermostats, float and pressure switches, provided the individual motor or the sum of fractional horsepower motors is less than  $\frac{1}{2}$  horsepower. Means for manual operation shall be provided.

D. DISCONNECTING BREAKER - All motor starters, unless otherwise specified shall be provided with a disconnecting means in the form of a circuit breaker of the type specified under "CIRCUIT PROTECTIVE DEVICES" of the General Conditions. This disconnecting means shall be contained in the same housing with the starter and shall be operable from outside. Means shall be provided for locking the handle of the circuit breaker in the "OFF" position if it is desired to take the equipment out of service and prevent unauthorized starting.

E. CONTROL CABINET - DRY LOCATIONS - all starters shall be furnished with general purpose, NEMA Type 1, sheet metal enclosures with hinged covers and baked enamel finish.

F. CONTROL CABINET - WATERTIGHT - In wet locations, cast iron watertight enclosures with threaded hubs, galvanized and gasketed hinged covers shall be provided.

G. 1. PANELS - Motor control devices and appliances shall be mounted on approved insulating slabs with all wiring and connections made on the back of the slabs.

2. WIRING AND TERMINALS - Wiring connections for currents of 100 Amperes or less may be made with copper wire or cable with special flameproof insulating coverings. Such wires shall be installed in a neat workmanlike manner, flat against the slab, and held in place by clips. Connections shall be made with pressure connectors for No. 8 AWG and larger wires, and with grommets for small stranded wires. Except for incoming and outgoing main leads, all connections shall terminate on approved connector blocks, which may be installed on the face of the slab. For small, across the line starters the above requirements may be modified if satisfactory connections are provided.

3. COPPER BUS - For currents exceeding 100 Amperes, copper bus shall be used in place of wires. The bus shall be constructed of copper rods, tubing or flat strap, bent and shaped properly and securely attached to the slab in a neat and workmanlike manner. The cross section of copper shall provide sufficient areas to keep current density at not more than 1,000 Amperes per square inch.

H. COOPERATION - The Contractors who furnish electrically operated equipment shall give to the Contractor for Electrical Work full information relative to sizes and locations of apparatus furnished by them which require electrical connections.

Equipment being installed by the Contractor for Electrical Work shall be delivered to the Contractor for Electrical Work by other Contractors in proper time and sequence so that the Contractor for Electrical Work shall be able to meet the Contractor for Electrical Work working schedule.

**I. SPARE PARTS**

1. FURNISH - Each Contractor shall furnish the following spare parts pertaining to equipment furnished by each Contractor.

One (1) set of contact fingers and springs and thermal elements for each three (3) (or fraction) of each size of magnetic contactor starter.

One (1) holding coil for each three (3) (or fraction) of each size of magnetic contactor starter.

2. WRAPPER MARKING - All parts shall be delivered to the Resident Engineer neatly wrapped and boxed and plainly tagged and marked for identification and reordering.

**PART K - SCHEDULE OF ELECTRICAL EQUIPMENT**

Schedule D requirements for electrical motor equipment may be included in one or more of the Specifications for the separate contracts for the Project. SCHEDULE D delineates the responsibilities of each separate contractor for electrical motor control equipment. SCHEDULE D is included in the Addendum to the General Conditions. In the event of any conflict between the Specifications and SCHEDULE D, SCHEDULE D shall take precedence; provided, however, in the event of an omission from SCHEDULE D (i.e., SCHEDULE D omits either a reference to or information concerning electrical motor equipment which is set forth in the Specifications), such omission from SCHEDULE D shall have no effect and the Contractor's obligation with respect to the electrical motor control equipment, as set forth in the Specifications, shall remain in full force and effect.

**1.38 Safety**

- A. Each Contractor shall provide and maintain all necessary temporary closures, guard rails, and barricades to adequately protect all workers and the public from possible injury. Any Contractor requiring removal of these items shall be responsible for the replacement of same.

**1.39 Interruption of Services and of Project Facilities**

- A. EVENING AND WEEKEND WORK - Where the work makes temporary shutdowns of the services unavoidable, they shall be made at night or on weekends or at such times that will cause no interferences with the established routines and operations of the projects in question.

1. Where weekend or evening work is required due to unavoidable service shutdowns, such work shall be performed at no extra cost to the City.

**B. INTERRUPTION OF PROJECT FACILITIES**

1. The Contractor shall not interrupt any of the services of the project nor interfere with these in any way without the permission of the Commissioner. Such interruption, or interferences, shall be made as brief as possible, and only at such time stated.
2. Under no circumstances will the Contractor, or its workers, be permitted to use any part of the project as a shop, without the permission of the Commissioner.
3. Unnecessary noise shall be avoided at all times and necessary noise shall be reduced to a minimum.
4. The facility operates 24 hours per day seven (7) days a week. Toilet facilities, water and electricity

must be operational at all times. No services of the project can be interrupted in any way without the permission of the Commissioner. Careful coordination of all work with the Resident Engineer must be done to maintain the operational level of the project personnel.

5. Contractors shall schedule their work to avoid noise interference that will affect the normal functions of the project. In particular, construction operations producing noises that are objectionable to the project functions will be scheduled at times of day or night, day of the week, or weekend, which will not interfere with the project personnel. Any additional cost resulting from this scheduling shall be borne by the specific Contractor.
6. The Contractor shall arrange to work continuously, including overtime, if required, to assure that services will be shut down only during the time actually required to make the necessary connections to the existing work.
7. The Contractor shall give ample written notice in advance to the Commissioner and project personnel of any required shutdown.

**1.40 Separation of Work Between Trades (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- A. SCHEDULE E – Requirements for various items of work are included in the Specifications for the separate contracts for the Project and in the General Conditions. Schedule E delineates the responsibilities of each separate contractor for various items of work, as well as the extent to which certain items involve coordination between trades. Schedule E is included in the Addendum to the General Conditions. The delineation set forth in Schedule E shall be taken as specific instruction to the Contractor that it is responsible for the listed items of work. Schedule E is not intended to limit the Contractor's responsibility for supervision and coordination as set forth in Paragraph B below. In the event of any conflict between the Specifications, the General Conditions and Schedule E, Schedule E shall take precedence; provided, however, in the event of an omission from Schedule E (i.e., Schedule E omits either a reference to or information concerning an item of work which is set forth in the Specifications or the General Conditions), such omission from Schedule E shall have no effect and the Contractor's obligation to perform the work, as set forth in the Specifications or the General Conditions, shall remain in full force and effect.
- B. SUPERVISION AND COORDINATION - Each Contractor is required to supply all necessary supervision and coordination information to any other trades who are to supply work to accommodate their installations.

**1.41 Shop Drawing and Material Samples Schedule**

- A. SCHEDULE F – Schedule F sets forth all submittal requirements for shop drawings and material samples. Schedule F is included in the Addendum to the General Conditions. At the kick-off meeting, each Contractor must review this Schedule with the Commissioner's Representative and the Consultant. Within 10 days after the kick-off meeting, the Contractor must complete information on Schedule F concerning the submission date, the required delivery date and the fabrication time. For all required submittals of shop drawings and material samples, the Schedule F provided by the Contractor must indicate a submission date which is at least 20 days prior to the date of the manufacture of the item or materials to be installed. In addition, if so directed by the Commissioner, the Schedule F provided by the Contractor must indicate a submission date for shop drawings and/or material samples of specified items or materials which is within 60 days after the kick-off meeting. In the event of any conflict between the Specifications and Schedule F, Schedule F shall take precedence; provided, however, in the event of an omission from Schedule F (i.e., Schedule F omits either a reference to or information concerning a submittal requirement which is set forth in the Specifications), such omission from Schedule F shall have no effect and the Contractor's submittal obligation, as set forth in the Specifications, shall remain in full force and effect.
- B. COORDINATION - The Resident Engineer for this project will coordinate and review the data submitted by various Contractors. Upon acceptance by the Resident Engineer, the Resident Engineer

will date and sign the schedule as approved and transmit it to the Consultant, Contractors and Project Manager within the Department of Design and Construction.

- C. ARTICLE 11 - Thereafter, this schedule will be subject to the provisions of Article 11 of the agreement and must be strictly adhered to by the Contractor.

**1.42 Specific Requirements**

- A. The work of this article shall be the responsibility of the Contractor for General Construction Work, unless otherwise indicated.

**B. FIELD MEASUREMENTS**

1. Each Contractor shall verify all dimensions and conditions on the job so that all work will properly join the existing work.
2. Each Contractor, before commencing work, shall examine all adjoining work on which each Contractor's work is in any way dependent on good workmanship in accordance to the intent of the Specification and Contract Drawings. The Contractor shall report to the Commissioner any condition that will prevent any Contractor from performing work that is below the required standard.

**C. BORINGS (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. REFERENCE DRAWINGS - The Boring Drawings as listed on the title sheet are for information to the bidder and are to be used under the conditions as follows:
2. BORING LOGS - shown on the Boring Drawings, record information obtained under engineering supervision in the course of exploration carried out by or under the direction of forces of the Department of Design and Construction at the site.
3. SOIL AND ROCK SAMPLES - All inferences are drawn from the indications observed as made by engineering and scientific personnel. All such inferences and all records of the work including soil samples and rock cores, if any, are available to bidders for inspection.
4. CERTIFICATION OF SAMPLES - The City certifies that the work was carried out as stated, and that the soil samples and rock cores, if any were referred to, were actually taken from the site at the times, places and in the manner indicated. The samples are available for inspection in the Department of Design and Construction Subsurface Exploration Section.
5. BIDDER'S RESPONSIBILITY - The bidder, however, is responsible for any conclusions to be drawn from the work. If the bidder accepts those of the City, it must do so at its own risk. If the bidder prefers not to assume such risk, the bidder is under the obligation of employing its own experts to analyze the available information, and must be responsible for any consequences of acting on their conclusions.
6. CONTINUITY NOT GUARANTEE - The City does not guarantee continuity of conditions shown at actual boring locations over the entire site. Where possible, borings are located to avoid all obstructions and previous construction which can be found by inspection of the surface and the bidder is required to estimate the influence of such features from its own inspection of the site.

**D. DEFERRED CONSTRUCTION**

1. Where necessity for deferred construction is certified by the Commissioner, in order to permit the installation of any item or items of equipment required to be furnished and installed under any other Contract in effect concurrent with the time allowed for doing and completing the work of the Contract, the Contractor shall defer construction work limited to adequate areas as approved by

the Commissioner.

2. The Contractor shall confer with the affected Contractors and ascertain arrangements, time and facilities necessary to be made by the Contractor in order to execute the provisions specified herein.

**E. WORK FENCE ENCLOSURE (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. The Contractor shall furnish and erect a wood fence to the extent shown on the drawings enclosing the entire project on all sides. All materials used shall be new. Any permit required for the installation and use of said fence shall be borne by the Contractor.
2. THE FENCE shall be 7'-0" high with framing construction of yellow pine, using 4" x 4" posts on not more than 6'-0" centers, with three (3) rails of at least 2" x 4" size to which shall be secured boards, 3/4" x 6" tongue and groove, laid solid and surface and double nailed to each bearing. Posts shall be firmly fixed in the ground at least 30" and thoroughly braced. Top edge of fence shall be trimmed with a rabbeted edge mould. Provide on the street traffic sides of fence, observation openings as directed. The Contractor has the option of using 1/2" exterior grade plywood in lieu of the 3/4" x 6" tongue and groove boards.
3. GATES - Provide an adequate number of double gates, complete with hardware, located as approved by the Resident Engineer. Double gates shall have a total clear opening of 14'-0" with two (2) 7'-0" hinged swinging sections. Hanging posts shall be 6" x 6" and shall extend high enough to receive and be provide with tension or sag rods for the swinging sections.
4. PAINTING - The fence and gates shall be entirely painted on the street and public sides with two (2) coats of approved lead and oil paint. The below-grade section of the posts shall be first creosoted or given a coat of tar base paint. Black stenciled signs reading "POST NO BILLS" shall be painted on fence with three (3) inch high letters on 25 foot spacings for the entire length of fence on street traffic sides. Signs shall be stenciled five (5) feet above the sidewalk.
5. It shall be the obligation of the Contractor to remove all posters, advertising signs, and markings, etc., immediately.
6. Where sidewalks are used for "drive over" purposes for Contractor vehicles, a suitable wood mat or pad shall be provided for protection of sidewalks.
7. Where required, make provision for fire hydrants, lampposts, etc.
8. REMOVAL - When directed by the Resident Engineer, the fence shall be removed.

**F. PUMPING**

1. Furnish and install all necessary automatically operated pumps of adequate capacity with all required piping to run-off agencies, so as to maintain the excavation, cellar floor, pits and exterior depressions and excavations free from accumulated water during the entire period of construction and up to the date of final acceptance of work of the Contract.
2. All pumps shall be maintained at all times in proper working order.

**G. RESIDENT ENGINEER'S OFFICE**

**1. OFFICE SPACE IN EXISTING BUILDING (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- a. The Resident Engineer will arrange for office space for sole use in the building where work is in progress. The Contractor for General Construction Work shall provide and install a lockset

for the door to secure the equipment in the room. The Contractor for General Construction Work shall provide two (2) keys to the Resident Engineer. After completion of the project the Contractor for General Construction Work shall replace the original lockset on the door and ensure its proper operation.

- b. The Contractor for General Construction Work shall provide one (1) telephone, where directed, for the exclusive use of the Resident Engineer. The Contractor for General Construction Work shall pay all costs for telephone service for calls within New York City limits for the duration of the project. The telephone service shall continue for a period of 90 days following substantial completion.
- c. The Contractor for General Construction Work shall provide the following equipment:
  - (1) Two (2) single pedestal desks, 42" x 32"; two (2) swivel chairs with arms and three (3) side chairs without arms to match desk. Two (2) lockers, metal olive green or gray, single units, 15" x 18" x 78" overall including 6" legs. Lockers to have flat key locks with two (2) keys each, General Steel products or approved equal. Two (2) full ball bearing suspension four (4) drawer vertical legal filing cabinets with locks approximately 52"H x 28 1/2"D x 18"W in a grey finish by Art Steel No. 2904L or approved equal.
  - (2) One (1) 9000 B.T.U. air conditioner or as directed by Commissioner. Wiring for the air conditioner shall be minimum No. 12 AWG fed from individual circuits in the fuse box.
  - (3) Two (2) metal wastebaskets, 13 inches square 15 inches high with rubber feet and corners by Art Metal Company No. 168 or approved equal.
  - (4) One (1) fire extinguisher one (1) quart vaporizing liquid type, brass, wall mounted by Pyrene No. C21 or approved equal.
  - (5) One (1) Crystal Springs water cooler with bottled water, Model No. LP14058 or approved equal to be furnished for the duration of the Contract as required.

**2. TRAILER OFFICE (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

- a. The Contractor for General Construction Work shall provide at its own cost and expense a trailer and install and connect all utility services to trailer within twenty (20) days of start of work. The trailer shall have equipment having the minimum requirements hereinafter specified. Any permit required for the installation and use of said trailer shall be borne by the Contractor.
- b. The trailer shall remain the property of the Contractor for General Construction Work except that the file cabinets herein specified, shall become the property of the City of New York.
- c. Trailer shall be office type trailer of the following general minimum dimensions:
  - 1. Length, overall: 35 feet.
  - 2. Length, inside: 32 feet.
  - 3. Width, overall: 8 feet.
  - 4. Width, inside: 7 feet, 5 inches.
- d. Trailer shall be manufactured by International Trailer Company, Model No. 1 MU-35-D or Atlantic Trailer Corporation, Model No. F-36 or approved equal.
- e. The exterior of the trailer and the wheels shall be given an approved coat of exterior enamel. The enamel finish coat shall be DUPONT orange lacquer or approved equal. The trailer shall be lettered with black block lettering of the following heights with white borders:

CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
DIVISION OF STRUCTURES  
RESIDENT ENGINEER'S OFFICE

2-1/2"  
3-3/4"  
3-1/2"  
2-1/2"

NOTE: In lieu of painting letters on trailer the Contractor for General Construction Work may substitute a sign constructed of a good quality lumber with the same type and size of lettering above.

- f. All windows and doors shall have insect aluminum screens and wire mesh protective screening.
- g. The interior shall be finished in 1/4 inch plywood. Plywood shall be finished in natural color, with two (2) coats of varnish or lacquer.
- h. The interior shall be divided by partitions into one (1) large room in front of trailer, and a private office approximately 6' x 7' at rear of trailer and a washroom located adjacent to the private office.
- i. The washroom shall be equipped with a flush toilet, wash basin with two (2) faucets, medicine cabinet, complete with supplies by Hospital Supply and Watters Labs., Inc., Model No. 1 or approved equal and a toilet roll tissue holder. Plumbing and fixtures shall be approved house type, with each appliance trapped and vented and a single discharge connection. Five (5) gallon capacity automatic electric heater for domestic hot water shall be furnished.
- j. The heating system shall consist of thermostatically controlled electric baseboard heaters capable of delivering not less than 30,000 BTU per hour and heaters shall be as manufactured by Chromalox or approved equal, sized per area with individual approved thermostats.
- k. The trailer shall be equipped with an approved two-circuit, 110-120 volt armored cable wiring system of adequate capacity complete with entrance connector with provision for grounding, enclosed fused service switch and branch circuit fuse box. The circuits for lighting, water heater, heater and convenience outlets, etc. shall be two-conductor, No. 12. The circuits for the space heaters shall be sized minimum No. 12 wire led from individual circuits in the branch circuit fuse box. Metal boxes shall be provided at all outlet points. All wiring shall conform to the requirements of the Electrical Code of the City of New York for armored cable wiring systems.
- l. Lighting to be furnished by a minimum of four (4) 48 inch, single tube, fluorescent fixtures for the large rooms and an incandescent fixture for the washroom. Lighting fixtures shall be provided with built-in pull-chain switches. A minimum of six (6) duplex convenience outlets shall be installed; four (4) in the larger room and two (2) in the smaller room. These outlets shall be in addition to connections for electric space heaters and heaters for domestic hot water.
- m. In addition to the washroom and private office, the following shall be built-in to the trailer:
  - 1. The drafting or reference table at least 60 inches long by 36 inches wide with cabinet below, head shelf at each end of the trailer, wall type plan rack at least 42 inches wide and wardrobe opposite washroom.
- n. The following movable equipment shall be furnished:
  - 1. Four (4) single pedestal desks, 42" x 32"; two (2) swivel chairs with arms and three (3) side chairs without arms to match desk. Four (4) lockers, metal olive green or gray, single units, 15" x 18" x 78" overall including 6" legs. Lockers to have flat key locks with two (2) keys each, General Steel products or approved equal. Two (2) full ball bearing suspension four (4) drawer vertical legal filing cabinets with locks approximately 52" H x 28 1/2" D x 18"W in a grey finish by Art Steel No. 2904L or approved equal.
  - 2. One (1) 6000 B.T.U. and one (1) 9000 B.T.U. air conditioner. Wiring for the air conditioners shall be minimum No. 12 AWG fed from individual circuits in the fuse box.

3. Two (2) metal wastebaskets, olive green or grey finish, 13 inches square 15 inches high with rubber feet and corners by Art Metal Company No. 168 or approved equal.
  4. One (1) fire extinguisher one (1) quart vaporizing liquid type, brass, wall mounted by Pyrene No. C21 or approved equal.
  5. One (1) Crystal Springs water cooler with bottled water, Model No. LP14058 or approved equal to be furnished for the duration of the Contract as required.
- o. TRAILER TEMPORARY SERVICE - Plumbing and electrical work required for the trailer will be furnished and maintained as below.
1. PLUMBING WORK - shall include all water supply and drainage piping required for a complete installation. Contractor to provide a temporary water service from the City's water main and extend in the trailer and properly connect up all fixtures requiring water supply. Provide all necessary soil, waste, vent and drainage piping.
    - a. Plumbing Contractor to frost-proof all water pipes to prevent freezing.
    - b. REPAIRS, MAINTENANCE - The Plumbing Contractor provide repairs when and as required for a period of thirty (30) days after the date of substantial completion acceptance.
    - c. DISPOSITION OF PLUMBING WORK - At the expiration of the time limit set forth in Subparagraph 3, the water drainage connections and piping to the office trailer shall be removed and shall be plugged at the mains. All piping shall become the property of the Contractor for Plumbing Work and shall be removed from the site, all as directed. All repair work due to these removals shall be the responsibility of the Contractor for General Construction Work.
  2. ELECTRICAL WORK - The Contractor for Electrical Work shall furnish, install and maintain a temporary electric feeder to the trailer to be used by the Resident Engineer immediately after it is placed at the job site.
    - a. The temporary electric feeder shall be at least three (3) No. 6RH wire and shall be protected by a 60 Ampere fused safety switch, complying with codes and utility requirements having jurisdiction.
    - b. Make all arrangements and pay all costs to provide electric service.
    - c. Pay all costs for current consumed and for maintenance of the system in operating condition, including the furnishing of the necessary bulb replacements lamps, etc., for a period of thirty (30) days after the date of substantial completion acceptance.
    - d. Disposition of Electric Work: At the expiration of the time limit set forth, the temporary feeder, safety switch, etc., shall be removed and disposed of as directed.
    - e. All repair work due to these removals shall be the responsibility of the Contractor.
- p. MAINTENANCE
1. The Contractor for General Construction Work shall provide and pay all costs for hot and cold water, heat and fuel and regular daily janitor service. Furnish toilet paper, cloth towels and soap and maintain the field office in first-class condition, including all repairs, until 30 days after the date of substantial completion acceptance.
  2. Provide fire, extended coverage and vandalism, malicious mischief and burglary and theft

insurance coverage for the Resident Engineer's field office equipment in the amount of \$10,000. All insurance coverage shall be provided by a company licensed and authorized to do business in the State of New York. Such coverage must, under the loss payable clause or by endorsement thereon, state the following: "loss, if any, payable to the City of New York."

3. At 30 days after the date of substantial completion acceptance, or sooner as directed by the Commissioner, the Contractor for General Construction Work shall have all services disconnected and capped to the satisfaction of the Resident Engineer.
- q. The Contractor for General Construction Work shall provide and pay all costs for the following telephone services for the Resident Engineer's trailer:
  1. Two (2) desk phones
  2. One (1) wall phone (with six (6) foot extension cord) at plan table.
  3. A remote bell located on outside of trailer
  4. The telephone service shall continue for a period of 90 days following substantial completion.
- r. Should it become necessary to relocate the trailer or move the field office from one (1) location to another, Contractor for General Construction Work shall be responsible for move or moves and of reconnecting all utilities described above at new location, and shall assume all costs incurred.
- s. PERMITS - The Contractor for General Construction Work shall make the necessary arrangements and obtain all permits required for this work.
- t. The Contractor for General Construction Work has the option of providing, at its cost and expense, rented office or store space in lieu of trailer. Said space shall be in the immediate area of the Project and have adequate plumbing, heating and electrical facilities. Space chosen by the Contractor for General Construction Work must be approved by the Commissioner before the area is rented. All insurance maintenance and equipment required for trailer field office shall also apply to rented spaces.

**H. ADDITIONAL EQUIPMENT FOR THE RESIDENT ENGINEER (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. The Contractor for General Construction Work shall supply photo equipment not to exceed \$250. Said equipment to be specified by Resident Engineer. At the completion of the project, the equipment shall become the property of the City of New York.
2. The Contractor for General Construction Work shall provide a copy machine for paper sizes 8½ x 11 & 8½ x 14. Copier shall remain at job site 30 days beyond the Substantial Completion date.
3. The Contractor for General Construction Work shall furnish a fax machine and a telephone answering machine at commencement of the project. All materials shall be new, sealed in manufacturer's original packaging and shall have manufacturers' warranties. All items shall remain the property of the City of New York at the completion of the project.
4. Computer Workstation (Refer to the Addendum to the General Conditions for the number of Computer Workstations to be provided):

Computers shall be provided for all contracts that have a total duration of 180 Consecutive Calendar Days (CCDs) or more, as set forth in Schedule "A". Contracts that have a total duration of less than 180 CCDs shall not require computers. Computer workstations shall be provided for

the duration of the contract.

(1) Personal Computer(s) - Workstation Configuration.

- (a) Make and Model: Dell, Gateway, Toshiba, HP, IBM, or an approved equal. (Note: an approved equal requires written approval of the Assistant Commissioner of ITS.)
- (b) Processor: 3.0 GHz Pentium 4 or faster computer - Single Processor.
- (c) System RAM: Minimum of 1 GB (Gigabytes) of SDRAM or DDR.
- (d) Hard Disk Drive(s): 80 GB (Gigabytes) or larger.
- (e) CD-RW: Internal CD-RW, 48x Speed or faster.
- (f) 16xDVD+/RW: DVD Burner (with double layer write capability) 16x Speed or faster
- (g) I/O Ports: Must have at least one (1) Serial Port one, (1) Parallel Port, 2 USB Ports. Serial Ports must consist of UART 16550 Chip or better.
- (h) Video Display Card: PCI Interface with a minimum of 64 MB of RAM.
- (i) Monitor: 17" TFT LCD monitor.
- (j) Available Exp. Slots: System as configured above shall have at least two (2) full size PCI Slots available.
- (k) Fax/Modem: Internal Fax/Modem 56 Kbps speed, featuring 3COM or US Robotics Chipset and supporting a minimum of V.92 and MNP5 compliant. Integrated 10/100/1000 Ethernet.
- (l) Other Peripherals: Optical scroll Mouse, 101 Key Keyboard, Mouse Pad and all necessary cables.
- (m) Software Requirements: Microsoft Windows XP Professional, Microsoft Office 2003 Professional, Microsoft Project 2002 Professional, Adobe Acrobat reader, Anti-Virus software package with one year updates subscription, Win Zip and Auto Cad 2008 LT.

(2) All field offices requiring computers shall be provided with the following:

- (a) One (1) broad-band internet service account. This account will be active for the life of the project.
- (b) One (1) 600 DPI HP Laser Jet Printer (twelve (12) pages per minute or faster) with one (1) Extra Paper Tray (Legal Size)
- (c) All necessary Cabling
- (d) Storage Boxes for and Blank CDs/DVDs
- (e) Printer Table
- (f) UPS/Surge Suppressor combo

(3) All Computer Hardware shall come with a three (3) year warranty for on-site repair or replacement. Additionally, and notwithstanding any terms of the warranty to the contrary, the Contractor is responsible for rectifying all computer problems or equipment failures within one (1) business day.

- (4) An adequate supply of blank CD's/DVD's, and paper and toner cartridges for the printer shall be provided by the Contractor, and shall be replenished by the Contractor as required by the Engineer.
- (5) It is the Contractor's responsibility to ensure that electrical service and phone connections are also available at all times; that is, the Field Office Computer(s) is to be powered and turned on twenty four (24) hours each day.

Broadband connectivity is preferred at each field office location. Please take into consideration that an extra phone line dedicated to the modem must be ordered as part of the contract unless Internet broadband connectivity, via Cable or DSL, is available at the planned field office location. Any questions regarding this policy should be directed to Raul Canabal, Assistant Commissioner of Information Technology Services at 718-391-1668.

**I. PUBLIC TELEPHONE (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. The Contractor shall provide a public telephone located on the site, where directed, for the duration of the Contract.

**J. HEAD PROTECTION (HARD HATS)**

1. The Contractor shall provide a minimum of 10 standard protective helmets for the exclusive use of Department of Design and Construction personnel and their visitors. Helmets shall be turned over to the Resident Engineer and kept in the office of the Resident Engineer.
2. Upon completion of the project, the helmets shall become the property of the Contractor.

**K. RODENT AND INSECT CONTROL**

1. **DESCRIPTION** - The General Contractor shall provide all labor, materials, plant and equipment, and incidentals required to survey and monitor rodent activity and to control any infestation or outbreak of rodents, rats, mice, water beetles, roaches and fleas within the project area. Special attention should be paid to the following conditions or areas:
  - a. Wet areas within the project area, including all temporary structures.
  - b. All exterior and interior temporary toilet structures within the project area.
  - c. All Field Offices and shanties within the project area of all Contractors and the Department of Design and Construction (DDC).
  - d. Wherever there is evidence of food waste and/or discarded food or drink containers, in quantity, that would cause breeding of rodents or the insects herein specified.
  - e. Any other portion of the premises requiring such special attention.
2. **MATERIALS:** All materials shall be approved by the New York State Department of Environmental Conservation and comply with the New York City Health Code, OSHA and the laws, ordinances and regulations of State and Federal agencies pertaining to such chemical and/or materials
3. **PERSONNEL:** All pest control personnel must be supervised by an exterminator licensed in categories 7A & 8.
4. **METHODS**

- a. Application and dosage of all materials shall be done in strict compliance with the manufacturer's recommendations.
- b. Under the Maintenance of Site item (section 1.42.L), any unsanitary conditions, such as uncollected garbage or debris, resulting from the General Contractor's activities which will provide food and shelter to the resident rodent population shall be corrected by the General Contractor immediately after notification of such condition by the Commissioner.

#### 5. RODENT CONTROL WORK

- a. In wetlands, woodlands and areas adjacent to a stream, special precautions must be taken to protect water quality and to ensure the safety of other wildlife. To prevent poisoned bait from entering streams, no poisoned bait shall be used in areas within seventy-five (75) feet of all streambanks. Live traps must be used in these seventy-five (75) foot buffer zone areas and within wetland and woodland areas.
- b. In areas outside the seventy-five (75) foot zone of protection adjacent to streams, and in areas outside wetlands and woodlands, tamper proof bait stations with poisoned bait shall be placed during the period of construction and any consumed or decomposed bait shall be replenished as directed.
- c. At least one month prior to initiation of the construction work, and periodically thereafter, live traps and/or rodenticide bait in tamper proof bait stations, as directed above, shall be placed at locations that are inaccessible to pets, human beings, children and other non-target species, particularly wildlife (for example-birds) in the project area.
- d. The General Contractor shall be responsible for collecting and disposing of all trapped and poisoned rodents found in live traps and tamper proof bait stations. The General Contractor shall also be responsible for posting and maintaining signs announcing the baiting of each particular location.

The General Contractor, under his/her Maintenance of Site operations, shall be responsible for the immediate collection and disposal of any visible rodent remains found on streets or sidewalks within the project area.

- e. It is anticipated that public complaints will be addressed to the Commissioner. The General Contractor, where directed by the Commissioner, shall take appropriate actions, like baiting, trapping, proofing, etc., to remedy the source of complaint within the next six (6) hours of normal working time which is defined herein for the purposes of this section as 7 A.M. to 6 P.M. on Mondays through Saturdays.
- f. Emergency service during the regular workday hours (Monday through Friday) shall be rendered within 24 hours, if requested by the Commissioner, at no additional cost to the City.

#### 6. EDUCATION & TRAINING

- a. The General Contractor shall post notices on all Construction Bulletin Boards advising workers, employees, and residents to call the Engineer's Field Office to report any infestation or outbreak of rodents, rats, mice, water beetles, roaches and fleas within the project area. The General Contractor shall provide and distribute literature pertaining to IPM techniques of rodent control to affected businesses and superintendents of nearby residential buildings to ensure their participation in maintaining their establishments free of unsanitary conditions, harborage removal and rodent proofing.
- b. Prior to application of any chemicals, the General Contractor shall furnish to the Commissioner copies or sample labels for each pesticide, antidote information, and Material Data Safety Sheets (MSDS) for each chemical used.

## 7. RECORDS AND REPORTS

- a. The General Contractor shall keep a record of all rodent and waterbug infestation surveys conducted by him/her and make available, upon request, to the Commissioner. The findings of each survey shall include, but not be limited to, recommended Integrated Pest Management (IPM) techniques, like baiting, trapping, proofing, etc., proposed for rodent and waterbug pest control.
- b. The General Contractor shall maintain records of all locations baited along with the type and quantity of rodenticide and insecticide bait used.

## L. SITE SECURITY/PERIMETER SIGNAGE

1. In order to properly convey notice to persons entering upon a City construction site, the Contractor shall furnish and install a sign at the entrance (gates) as follows:

---

**NO TRESPASSING**

**AUTHORIZED PERSONNEL ONLY**

---

2. If no construction fence exists at the site, this notice shall be conveyed by incorporating the above language into safety materials (barriers, tape, and signs).

## M. MAINTENANCE OF SITE AND ADJOINING PROPERTY

1. Take over and maintain the site, after order to start work.
2. Until the work of the Contract is completed and accepted, the Contractor shall be responsible for the safety of the adjoining property, including sidewalks, paving, fences, sewers, water, gas, electric and other mains, pipes and conduits etc. The Contractor shall, at its own expense, except as otherwise specified, protect same and maintain them in least as good a condition as that in which the Contractor finds them.
3. All pavements, sidewalks, roads and approaches to fire hydrants shall be kept clear at all times, maintained and repaired to serviceable condition with materials to match existing.
4. Provide and keep in good repair all bridging and decking necessary to maintain vehicular and pedestrian traffic.
5. The Contractor shall also remove all snow and ice as it accumulates on the sidewalks within the Contract Limits Lines.

## N. SAFETY PRECAUTIONS FOR CONTROL CIRCUITS

1. Control circuits, the failure of which will cause a hazard to life and property, shall comply with the New York City Dept. of Buildings, Bureau of Electrical Control requirements.

## O. OBSTRUCTIONS IN DRAINAGE LINES

1. The Contractor shall be responsible for all obstructions occurring in all drainage lines, fittings and fixtures after the installations and cleaning of these drainage lines, fittings and fixtures as certified by the Resident Engineer. Roof drains shall be kept clear of any and all debris. Any stoppage shall be repaired immediately at the expense of the Contractor for General Construction Work.

## P. MAINTENANCE OF PROJECT SITE

1. Take over and maintain all project areas, after order to start work.
2. Until the work of the Contract is completed and accepted, the Contractor shall be responsible for the safety of all project areas, including water, gas, electric and other mains and pipes and conduits and shall at the Contractor's own expense, except as otherwise specified, protect same and maintain them in at least as good condition as that in which the Contractor finds them.
3. All pavements, sidewalks, roads and approaches to fire hydrants shall be kept clear at all times, maintained, and if damaged, repaired to serviceable conditions with materials to match existing.
4. The Contractor shall keep the space for the Resident Engineer in a clean condition.

Q. PROJECT SIGN AND RENDERING  
PART A – PROJECT SIGN

1. Responsibility: The Contractor shall produce and install one (1) project sign which shall be posted and maintained upon the site of the project at a point and in a position where directed by the Commissioner. The Contractor shall protect the sign from damage during the continuance of work under the Contract and shall do all patching of lettering, painting and bracing thereof necessary to maintain same in first class condition and in proper position. Prior to fabrication, contractor shall submit an 8-1/2" x 11" color match print proof from the sign manufacturer of completed sign for approval by the Commissioner.
2. Sign Quality: The Contractor shall provide all materials required for the production of the sign as specified herein. Workmanship shall be of the best quality, free from defects and shall be produced in a timely manner.
3. Schedule: Upon project mobilization, the Contractor shall commence production and installation of the sign.
4. Removal: At the completion of all work under the Contract, the Contractor shall remove and dispose of the project sign away from the site.
5. Sign construction:
  - a. Frame: The frame shall be from quality dressed 2"x2" pine, fire retardant, pressure treated lumber, that surrounds the inside back edge of the sign. The sign shall have one (1) intermediate vertical and two (2) diagonal supports, glued and screwed for rigidity. Frame shall be painted white with two (2) coats of exterior enamel paint, prior to mounting of sign panel.
  - b. Edging: U-shaped, 22 gauge aluminum edging, with a white enameled finish to match sign background, shall run around entire edging of sign panel and frame. Corners shall be mitered for a tight fit. Channel dimensions shall be 1" inch (overlap to sign panel face) x 1 3/4" (or as required across frame depth) x 1" (back overlap).
  - c. Sign Panel: 4' x 8' panel shall be constructed in one (1) piece of 14 gauge (.0785") 6061-T6 aluminum. This panel shall be prefinished both sides with a glossy white baked-on enamel finish and be flush with edge of 2" x 2" wood frame. Samples must be submitted for approval.
  - d. Fastening: Fasten sign panel to wood frame using cadmium plated no. 8 sheet metal screws at 1/2" below edge of panel and 8" on center. The U-shaped aluminum channel shall be applied over the wood frame edge and fastened with cadmium plated no. 8 sheet metal screws at 12" on center around the entire perimeter.
6. Sign Graphics:
  - a. All visual components of the sign are in an Adobe \*.pdf file, which is provided by the

Commissioner's representative. The file is to be opened in Acrobat Professional or Acrobat Approval in order to be saved with project information. The Commissioner's representative shall insert the project name and names and titles of personnel (3 or more) and any other required information associated with the project. At no point in the update, saving or renaming of the file should it be locked by any user. The digital file shall be provided by DDC to the Contractor (on a CD or via E-mail) for printing.

- b. The DDC \*.pdf file with names provided by the commissioner shall be reproduced at the Sign Panel size of 4' x 8' on 3M High Performance Vinyl or approved equal. The sign manufacturer is required to print from the Acrobat \*.pdf provided, and must match the following colors specified by Pantone: 3025 C, 119 C, 131 C, 1805 C, 1817 C in their exact locations as indicated in the \*.pdf file, and on the DDC website: [www.nyc.gov/buildnyc](http://www.nyc.gov/buildnyc).
- c. Color shall be created in a four-color process to reproduce Pantone Colors (per Pantone formula).
  1. Pantone color 3025 C (C-100, M-17, Y-0, K-51).
  2. Pantone color 119 C (C-0, M-12, Y-100, K-49).
  3. Pantone color 131 C (C-0, M-32, Y-100, K-23).
  4. Pantone color 1805 C (C-0, M-91, Y-100, K-23).
  5. Pantone color 1817 C (C-0, M-90, Y-100, K-66).

The typeface, Helvetica shall be used in all text-fields as is specified in the settings of the Acrobat \*.pdf.

Note: 3M High Performance Vinyl or equivalent shall be guaranteed for nine (9) years. Guarantee must cover fading, peeling, chipping or cracking.

**PART B – PROJECT RENDERING (REFER TO THE ADDENDUM TO THE GENERAL CONDITIONS FOR THE APPLICABILITY OF THIS ARTICLE)**

1. Responsibility: In addition to the Project Sign, the Contractor shall furnish and install one (1) sign showing a rendering of the project. From an approved image file provided by the DDC, the Project Rendering is to be sized, printed, and mounted in an identical manner as described in Part A above for the Project Sign. Any area of the 4' X 8' panel area not filled by the rendering shall be printed in Pantone color 3025 (c-100, M-17, y-0, K-51). A color match print proof from the sign manufacturer of the Rendering Sign printed from the supplied file is to be submitted to DDC for approval before fabrication. The Rendering Sign is to be posted at the same height as the Project Sign. Where possible, the Rendering Sign shall be mounted with a perfect match of the short sides of the rectangle so that the Rendering Sign and the Project Sign together will create one long rectangle.
2. Removal: At the completion of all work under the Contract, the Contractor shall remove and dispose of the project rendering away from the site.

**R. PLANT PEST CONTROL REQUIREMENTS and TREE PROTECTION REQUIREMENTS**

1. Plant Pest Control Requirements: The Contractor for General Construction Work (the "Contractor") and its subcontractors, including the Certified Arborist described below, shall comply with all Federal and New York State laws and regulations concerning Asian Longhorned Beetle (ALB) management, including protocols for ALB eradication and containment promulgated by the New York State Department of Agriculture and Markets (NYSDAM). The Contractor is referred to: (1) Part 139 of Title 1 NYCRR, Agriculture and Markets Law, Sections 18, 164 and 167, as amended, and (2) State Administrative Procedure Act, Section 202, as amended.

- a. All tree work performed within the quarantine areas must be performed by New York State Department of Agriculture and Markets (NYSDAM) certified entities. Transportation of all host material, living, dead, cut or fallen, inclusive of nursery stock, logs, green lumber, stumps, roots, branches and debris of a half inch or more in diameter from the quarantine areas is prohibited unless the Contractor or its sub contractor performing tree work has entered into a compliance agreement with NYSDAM. The terms of said compliance agreement shall be strictly complied with. Any host material so removed shall be delivered to a facility approved by NYSDAM. For the purpose of this contract host material shall be ALL species of trees.
  - b. Any host material that is infested with the Asian Longhorned Beetle must be immediately reported to NYSDAM for inspection and subsequent removal by either State or City contracts, at no cost to the Contractor.
  - c. Prior to commencement of tree work, the Contractor shall submit to the Commissioner a copy of a valid Asian Longhorned Beetle compliance agreement entered into with NYSDAM and the Contractor or its sub contractor performing tree work. If any host material is transported from the quarantine area the Contractor shall immediately provide the Commissioner with a copy of the New York State 'Statement of Origin and Disposition' and a copy of the receipt issued by the NYSDAM approved facility to which the host materials are transported.
  - d. Quarantine areas, for the purpose of this contract shall be defined as all five boroughs of the City of New York. In addition, prior to the start of any tree work, the Contractor shall contact the NYC Department of Parks & Recreation's Director of Landscape Management at (718) 699-6724, to determine the limits of any additional quarantine areas that may be in effect at the time when tree work is to be performed. The quarantine area may be expanded by Federal and State authorities at any time and the Contractor is required to abide by any revisions to the quarantine legislation while working on this contract. For further information please contact: NYSDAM (631) 288-1751.
2. Tree Protection Requirements: The Contractor shall retain a Certified Arborist, as defined by New York City Department of Parks and Recreation (NYCDPR) regulations, to provide the services described below.
- a. Surveys and Reports: The Certified Arborist shall, at the times indicated below, conduct a survey and prepare a plant material assessment report which includes: (1) identification, by species and pertinent measurements, of all plant material located on the project site, or in proximity to the project site, as described below, including all trees, significant shrubs and/or planting masses; (2) identification and plan for the containment of plant pests and pathogens, including the ALB, as described above; (3) evaluation of the general health and condition of any infected plant material.
  - b. Frequency of Reports: The Certified Arborist shall conduct a survey and provide a plant material assessment report at two (2) points in time: (1) prior to the commencement of construction work; and (2) at the time of substantial completion. In addition, for projects exceeding 24 months in duration, the Certified Arborist shall conduct a survey and prepare a report at the midpoint of construction. Copies of each plant material assessment report shall be submitted to the Resident Engineer within two (2) weeks of the survey.
  - c. Proximity to Project Site: Off-site trees, significant shrubs and/or planting masses shall be considered to be located in proximity to the project site under the circumstances described below.
    1. The tree trunk, significant shrub, or primary cluster of stems in a planting mass is within 50 (fifty) feet of the project's Contract Limit Lines (CLLs) or Property Lines (PLs).
    2. Any part of the tree or shrub stands within 50 (fifty) feet of: (a) a path for site access for vehicles and/or construction equipment; or (b) scaffolding to be erected for construction

activity, including façade remediation projects.

3. The Certified Arborist determines that the critical root zone (CRZ) of an off-site tree, significant shrub, or primary cluster of stems in a planting mass extends into the project site, whether or not that plant material is located within the 50-foot inclusionary perimeter as outlined above.
- d. Tree Protection Plan: The Certified Arborist shall prepare, and the Contractor shall implement, a Tree Protection Plan, for all trees that may be affected by any construction work, excavation or demolition activities, including without limitation, (1) on-site trees, (2) street trees, as defined below, (3) trees under NYCDPR jurisdiction as determined by the Department of Transportation, and (4) all trees that are located in proximity to the project site, as defined above. The Tree Protection Plan shall comply with the NYC DPR rules, regulations and specifications. The Contractor is referred to Chapter 5 of Title 56 of the Official Compilation of the Rules of the City of New York. Copies of the Tree Protection Plan shall be submitted to the Resident Engineer prior to the commencement of construction. Implementation of the Tree Protection Plan for street trees and trees under NYCDPR jurisdiction shall be in addition to any tree protection requirements specified or required for the project site.  
For the purpose of this article, a "street tree" means the following: (1) a tree that stands in a sidewalk, whether paved or unpaved, between the curb lines or lateral lines of a roadway and the adjacent property lines of the project site, or (2) a tree that stands in a sidewalk and is located within 50 feet of the intersection of the project's site's property line with the street frontage property line.
3. No Separate Payment. No separate payment shall be made for compliance with Plant Pest Control Requirements or Tree Protection Requirements. The cost of compliance with Plant Pest Control Requirements and Tree Protection Requirements shall be deemed included in the Contractor's bid for the Project.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT A – BIDDERS QUESTIONS AND RESPONSES TO QUESTIONS**

No.	Bidders' Questions	DDC Responses
1	<p>There is a note on Drawing A-118 referencing intumescent mastic on the upper lidding room beams and to reference Note No. 12 on Drawing A-500.</p> <p>Note No. 12 on A-500 does not exist. Please provide correct reference note.</p>	<p>Drawing A-500 is modified by Addendum No. 1 to show the missing notes. See Attachment D, Revisions to Drawings.</p>
2	<p>Schedule A specifies that no more than 60% of the project can be sub-contracted. On a project of this magnitude the percentage of work to be sub-contracted is typically between 80% to 90%. Can you advise if the subcontracting limit requirements can be either eliminated or increased to a more practical percentage?</p>	<p>The allowable subcontractor work has been changed to 80 percent. See Attachment E, Revisions to the Addendum to the General Conditions.</p>
3	<p>Please provide pre-bid info and any other bidding information, thanks.</p>	<p>Project pre-bid information and other bidding information is available for download on DDC's website, or is available as noted in Attachment 1 – Bid Information at DDC Contract Section, 30-30 Thomson Avenue – First Floor, Long Island City, NY 11101.</p>
4	<p><b>Drawing Reference: C-019 and A-900.</b> Can you please clarify the extent of ornamental fencing - Specification 02822? Drawing C-016 identifies a 10 ft high chain link fence along the perimeter of the parking lot which appears to travel along the pedestrian sidewalk to the main entry area. On Drawing A-900 at the main entry area, there is a note for an open grille fence near the entry to the pedestrian sidewalk from the entry gates.</p> <p>Is this area the extent of the ornamental fencing or does the ornamental fencing follow the pedestrian sidewalk and stop at the area where the outboard vehicle scale is located?</p>	<p>Drawing A-900 is clarified by Addendum # 1. See Attachment D, Revisions to Drawings.</p>

No.	Bidders' Questions	DDC Responses
5	<p>We respectfully request an immediate four (4) week extension of the current bid date, Monday 9/27/12, to Tuesday, 10/25/12. This request is being made to allow sufficient time for us to solicit as many proposals as possible from the many Specialty Subcontractors and Suppliers needed for a Project of this type. This additional time will allow us to prepare an accurate and competitive bid.</p> <p>We thank you in advance for your consideration of this request.</p>	<p>The Bid Opening date is revised to October 11, 2012.</p>
6	<p>Is there a time preferably next week we can schedule for a secondary walk-through so that our sub-contractors may see the site?</p>	<p>No secondary walk-through will be scheduled.</p>
7	<p><b>Final Utilities</b> On Sheet C027.00, the Storm Sewer pipe from ST MH-9 &amp; ST MH-11 changes in size from 18" to 27". Please clarify the size of the pipe.</p>	<p>Drawing C-027 will be revised in Addendum #2.</p>
8	<p><b>Final Utilities</b> On Sheet C028.00, the note for the 2" HP gas pipes states, "2' HP GAS SERVICE TO BE INSTALLED BY KEYSpan, TRENCHING PROVIDED BY CONTRACTOR FOR CONTINUATION SEE FINAL UTILITIES OVERALL PLAN DWG." However on sheet C028.00, the gas service line is shown as 4" LP Gas pipe. Is this pipe also to be installed by Keyspan, trenching provided by the contractor? If not please clarify if the pipe size is 2" or 4".</p>	<p>Drawing C-028 will be revised in Addendum #2. This note will be deleted from the drawing.</p>
9	<p><b>Final Utilities</b> On Sheet C027.00, the 10" Sanitary Pipe from SMH-7 to SMH-8 is shown to slope towards SMH-8. Similarly, the 12" sanitary pipe from SMH-8 to SMH-9 slopes towards SMH-8. Please clarify the direction of flow.</p>	<p>Drawing C-027 will be revised in Addendum #2. Flow will be redirected from SMH-8 toward SMH-9.</p>
10	<p><b>Final Utilities</b> On Sheet C028.00, the Storm Sewer pipes from ST MH-7 to ST MH-4 &amp; ST MH-4 to ST MH-3 do not have a size associated with them. Please clarify the size of the pipe.</p>	<p>Drawing C-028 will be revised in Addendum #2.</p>

No.	Bidders' Questions	DDC Responses
11	<b>Final Utilities</b> On Sheet C028.00, the pipe size is not labeled. This occurs often on short runs from the CBs. We assume them to be 12". Is this correct?	Drawing C-028 will be revised in Addendum #2. Sewer lines connecting catch basins to stormwater manholes are 12-inch diameter.
12	<b>Final Utilities</b> On Sheet C028.00, the storm sewer pipe from ST MH-6 to ST MH-7 is labeled 16". We do not know of 16" concrete pipe. Is this supposed to be 18"?	Drawing C-028 will be revised in Addendum #2.
13	<b>Final Utilities</b> On Sheet C027.00, storm sewer pipe from ST MH-14 to ST MH-13, should the flow be reversed?	Drawing C-027 will be revised in Addendum #2.
14	<b>Final Utilities</b> On Sheet C028.00, the Stormwater Treatment System 1 occupies the same plan space as EMH-2. Please clarify.	Drawing C-028 will be revised in Addendum #2. EMH-2 will be relocated away from Stormwater Treatment System 1 toward EMH-1.
15	<b>Final Utilities</b> On Sheet C026.00, what is the structure that ST MH-15 & ST MH-16 connect to with 10" pipes?	Drawing C-026 will be revised in Addendum #2. The structure is Stormwater Treatment Unit 3. Additional details will be provided in Addendum #2.
16	<b>10" Storm Sewer Pipe on Sketch RRC-RFI-003 (attached)</b> 1. This 10" Storm Sewer Pipe shows up quite often. There is no reinforced concrete for 10" size. Please provide type of pipe and spec.	Per the schedule in Section 02503 Installation of Buried Piping, material is Ductile Iron for 6" to 10" Storm Sewer pipe. Specifications for ductile iron pipe can be found in Section 15051 Ductile Iron Pipe.
17	<b>Final Utilities</b> Note 5 on Sheets C-026 & C-027 states, "FOR ADDITIONAL DETAILS ON BILGE WATER COLLECTION PIPING, SEE MECHANICAL PIER LEVEL DRAWINGS". There is not bilge water collection info on Mech. Pier Level drawings. Please advise where to find it.	Drawings C-026 and C-027 will be revised in Addendum #2. Note will be revised to "FOR ADDITIONAL DETAILS ON BILGE WATER COLLECTION PIPING SEE CIVIL SITE WORK DETAILS".
18	<b>Final Utilities (Regarding the Storm Manhole Schedule on Dwg C-030)</b> 1. Please help us find the location of STS 3, and please help us find a detail for STS 3.  2. ST MH-16 is nowhere near STS2. Please advise correction.	1. Drawing will be revised in Addendum #2. Location of stormwater treatment unit three is shown at the box to the northwest corner of the pier. A detail drawing of this unit will be provided in Addendum #2.  2. Drawing will be revised in Addendum #2. A revised storm manhole schedule will be provided in Addendum #2.

No.	Bidders' Questions	DDC Responses
	3. It appears that ST MH-12 is branch to STS 2, not STS 3. STS 3 is still missing in action.	3. Drawing will be revised in Addendum #2.
19	<b>Final Utilities (Refer to Sketch RRC-RFI-006-Q-4-5)</b> This 18" ST slope direction seems incorrect. Please advise	4. Drawing C-027 will be revised in Addendum #2. The direction of the slope shown on the drawing is incorrect. The direction of the slope between ST MH-13 and ST MH-14 will be reversed and a revised drawing C-027 will be provided in Addendum #2.
20	<b>House Trap Pit</b> Sheet P-063.00 shows the House Trap Pit Slab to be 6'x6' while Sheet S-610.00 shows it to be 8'x8'. Which is the correct detail?	The House Trap Pit Slab shall be built per the structural details shown on drawing S-610.00. Drawing P-063.00 is revised in Addendum No. 1.
21	<b>Utilities (See Sketch RRC-RFI-008-Q1)</b> 1. There is no 4" SAN (BILGE) shown on C-026 nor C-028; only 8" is shown. Which is correct?	1. The sanitary bilge water line is 8-inches. Drawing C-044 will be revised in Addendum #2.
22	<b>Utilities (See Sketch RRC-RFI-008-Q2)</b> 2. There is no pipe shown here as CONTINUATION on Site Drawing C-027. Which is correct?	2. Continuation of stormwater line will be provided in a revised C-027 to be issued in Addendum #2.
23	<b>Utilities (See Sketch RRC-RFI-008-Q3)</b> 3. This is labeled as 15" ST not 10" as shown here. Which is correct?	3. Civil Drawings (Final Utilities ) will be revised in Addendum #2.
24	<b>Regarding Oil Water Separator on Dwg C-036</b> For the Oil Water Separator, please provide manufacturer, specification, dimensions, volumes, flow characteristics, materials, anchor slab dimensions, thickness of Top Slab, or equal.	Specification section 11311 – Oil Water Separator provides acceptable manufacturers (paragraph 2.01.A), volume of the unit (paragraph 2.02.B), flow characteristics (paragraph 2.02), materials (paragraph 2.02), as well as top slab requirements (paragraphs 1.04.F and 3.01.F of section 11311 and Section 03300 – Cast in Place Concrete). Dimensions are provided on the drawing. Please also see note 2 on the drawing regarding dimensions of the unit.
25	<b>Question: House Trap Pit</b> 1. Sheet S-120.00 note for Pile Tip elevation indicates that Pile Region A has a minimum pipe tip elevation of -50 with an estimated elevation of -118. Similarly, Pile Region B has -60 & -200 for minimum & estimated elevation respectively. This is an enormous gap between minimum & estimated & can alter the price per foot depending on the total length. Please clarify.	1. The minimum tip elevation is the minimum elevation to which the pile tip must be driven to penetrate through the non-bearing and compressible soils, regardless of whether the required ultimate driven capacity has been achieved at a higher elevation. The estimated tip elevation is based on the geotechnical investigation and reflects the tip elevation at which the pile is anticipated to 'fetch up' and achieve the required ultimate driven capacity.

No.	Bidders' Questions	DDC Responses
26	<p><b>Question: House Trap Pit</b></p> <p>2. On Sheet S-610.00, STS 1 &amp; 2, Electrical Manholes are shown to have steel pipe piles. Considering the size of the OWS slab, should it also rest on pipe piles?</p>	<p>2. The geotechnical analysis of the weights of each site structure, as well as the bearing capacity of the soil at each location, resulted in the need for pile supported foundations of the Storm Treatment Systems And Electrical Manholes, but the Oil/Water separator was able to be supported on a prepared subgrade of geotextile-wrapped crushed stone.</p>
27	<p>Please refer to Volume 1 of 3, Bid Booklet, sheet 21-3 of the Contractor's Bid Schedule. In the left-hand column titled "Unit Price" column it states "TOTAL BID ITEMS 1 through 31." Please clarify what Item 31 is for the Bid Schedule.</p>	<p>The Bid Schedule and Bid Form are revised. See Attachment B, Revisions to the Bid Booklet.</p>
28	<p>On drawing R-211.00, sheet 396, the legend calls for 1 drilled shaft to orient each pile, however in this specification there is no mention of drilled shafts, please advise.</p>	<p>Legends on both Dwgs R-211 and R-011 are revised by Addendum #1. See Attachment D, Revisions to Drawings.</p>
29	<p>On Drawing R-215.00, sheet 400, the Partial Foundation Plan At Truck Weighing Scale calls for a 6" diameter drain pipe, while the approach structure section on the same drawing calls for a 4" diameter drain pipe, which size shall be used?</p>	<p>Drawings R-215.00, sheet 400 and R-015, sheet 347 are correct as shown. Pipe diameter at location of Section 1 is 4" diameter and at the outlet the diameter is 6".</p>
30	<p>On Drawing S-100.00, the existing pile plan seems to have been cut off in both directions towards the side of the page. To the right side of page, it seems that 12 pile caps were cut off, with approximately 38 piles in them. To the left side of the page, it seems that the left half of the caps depicted via Section 7 was cut off, but that the octagon should have 48 existing piles, not the 29 depicted. Please confirm.</p>	<p>Existing pile foundations shown are based on available print copies of original design drawings. As-built drawings are not available. Exact number and extent of existing piles to be demolished shall be the responsibility of the Contractor to determine after demolition of the concrete base slab and pile caps.</p>
31	<p>Please provide the existing contract and/or as-built drawings from the prior contract related to the incinerator slab to be demolished (or provide more sections to fully detail the structure to be demolished).</p>	<p>Drawings S-010 and S-011 are the extent of the information available regarding the existing base slab, receiving pit and foundations.</p>

No.	Bidders' Questions	DDC Responses
32	Please refer to Section 2 on Drawing S-132. It seems to indicate that the Centerline of the first structural wall begins 7'-8" from the "B" line. The Substructure Framing Plan (S-106) shows the Centerline of the first structural wall 17'4" away from the "B" line. Further, Section 2 shows 9'8" between walls, S-106 shows 9'4". Please confirm which drawing governs and the final design intent.	The dimensions in plan on Drawing S-106 are correct. In Section 2 on Drawing S-132, the horizontal dimension that reads 7'-8" shall be revised to read 17'-4" and the horizontal dimension that reads 9'-8" shall be revised to read 9'-4".
33	Please advise to the design intent of the new slab over the existing receiving pit. With the existing receiving pit be backfilled the base slab placed on top? If left open, will there be any access to the existing pit from the slab level? From a constructability standpoint, it would seem to make a giant inaccessible void space, which would make removing form work extremely impractical at best and impossible without additional considerations being taken.	At the Contractor's option, the existing receiving pit may be backfilled up to the elevation of the underside of the base slab of the box-beam structure spanning the pit. If that option is taken, a concrete workmat shall be provided to support the bottom mat of reinforcing for the bottom slab of the box-beam structure.
34	Similar to above, please advise to the design intent of the new structure over the existing receiving pit. From a constructability standpoint, it seems to create 14 completely enclosed void spaces (between the base slab and the pier level slab). This would make removing form work from the pier level slab pour extremely impractical at best and impossible without additional considerations being taken. Would setting precast deck panels be a possible alternative?	Formwork design and construction sequence shall consider that the spaces between the top and bottom slab of the box-beam structure will be inaccessible after construction. Requests to substitute pre-cast panels in lieu of the cast-in-place Pier Level slab (the top, compression slab of the box-beam structure spanning the existing pit) will not be entertained.
35	Please refer to Section 2 on Drawing S-131. Does the line showed 3'-2" below the bottom of the slab near Line "H" and 18 inch below bottom of slab near line "G" correspond to top of fill? If so, should the formwork in both of these areas be void form? Similar to above, stripping any slab form work would be impossible without additional considerations being taken.	The horizontal line 3'-2" below the underside of the pier deck south of Column Line H represents the B8 grade beam that spans north-south between the south wall of the box-beam structure and pile cap H/15. This 3'-2" dimension is incorrect and should have been 2'-10" to correspond to the dimensions for a type B8 grade beam as shown in the Grade Beam Schedule on Drawing S-127. The horizontal line 18" below the underside of the box-beam structure top slab represents the underside of the elevated beams that span north-south between the east-west full-depth walls of the box-beam structure. To eliminate the conflict between the Grade Beam Schedule and the 3'-2" dimensions shown

No.	Bidders' Questions	DDC Responses
		<p>in Section 2 on Drawing S-131, the 3'-2" dimension is deleted from Drawing S-131 by Addendum #1. See Attachment D, Revisions to Drawings.</p>
36	<p>Per Drawing S-127 the Top Bar Schedule for Grade Beam #7 is 12 ea - #10 for the top bars (@4" o.c.). In the bar "C1" splice area, maintaining the 3 inch clear on the sides and equal spacing between the C1 barset (2 ea) and the C bars (1 ea) would leave only 3/4" between each bar. This would seem to make the concrete pouring impractical. Even if we stacked the splice bars by hanging one below the stirrup and the placing of the other above instead of placing them in plane on the stirrup, the space would only be 1-3/8". Would it be possible to increase the bar size and reduce the number of bars to allow for adequate space between the rebar to pour concrete? Is there a different design mix which would be allowed to pour in this area? (This also doesn't account for the interference of the slab rebar which is also continuous through the grade beam area.) Similar issues exist throughout the grade beam schedule where 4 inch spacing is called for.</p>	<p>Please refer to TYPICAL GRADE BEAM TOP BAR PLACING PLAN on Drawing S-127 as well as the various grade beam sections on Drawing S-134 which all show the grade beam top reinforcing bars not only falling outside of the grade beam stirrups but beyond the width of the beam itself, extending out into the pier slab. Top bars shall be placed in strict accordance with the spacings given in the GRADE BEAM SCHEDULE on Bid Drawing S-127. It should not therefore be necessary, nor will it be acceptable, to modify the grade beam reinforcing size/quantity or provide a modified concrete mix design.</p>
37	<p>Per Drawing S-127, the grade beam schedule for "B17" calls for a "B" Detail for the top bars. This grade beam does not seem to have a stepped ledge that would require a "B" schedule of bars. Please advise or provide a section to clarify.</p>	<p>The only instance of grade beam type B17 is located at the eastern edge of the Equipment Platform east of Column Line 17. This particular grade beam has a large depression along most, but not all of its length to accommodate the stairway from the parking lot to the Equipment Platform. The bars indicated as B TOP BARS in the GRADE BEAM SCHEDULE on Bid Drawing S-127 are to be placed at the top of the grade beam in the portion that is full-height, while the C TOP BARS are to be placed the full-length of the grade beam at the elevation corresponding to the depressed portion of the grade beam at the stair. See Drawing S-129 for information on the geometry of the Equipment Platform.</p>

No.	Bidders' Questions	DDC Responses
38	Drawing S-131 calls for #6 @ 8" reinforcing (typ) for the top and bottom mat traveling from Line "14" to Line "17". Plan drawing S-111 shows #5 @ 8" reinforcing (typ) in that area. Please advise.	Slab reinforcing shown in plan (Drawings S-111 and S-112) is for the typical Pier Level slab, but not the box-beam structure over the existing receiving pit (hence the absence of reinforcing over the receiving pit in each plan). Section 1 on Drawing S-131 (cut between Column Lines F and G on Drawing S-112) reflects the typical reinforcing for the box-beam structure. The reinforcing for the top slab of the box-beam structure can be found in the sections on Drawings S-131 and S-132. Call-outs of Pier Level slab reinforcement shown on Drawing S-111 are unrelated to Section 1 on Bid Drawing S-131.
39	On Drawings S-103 and S-104, there is a dimensional clash for the pile layouts of Lines "K" and "L" between Lines "10" and "13". The distance between 10 and 13 is 27'. The sum of distances between the piles ( 7'0", 6'5", 5'7", and 7'11" to the column line) adds up to 26'11". We believe the 7'11" should be 8'0". Please confirm which dimension holds.	See Attachment D, Revisions to Drawings for revised dimensions.
40	Is it possible to provide a "to scale" AutoCAD drawing of the existing pile layout? We are trying to analyze how many of the existing piles will need to be cut down for the new concrete.	Existing pile foundations shown are based on available print copies of original design drawings, as as-built drawings are not available. Exact number and extent of existing piles to be demolished shall be the responsibility of the Contractor to determine after demolition of the concrete base slab and pile caps.
41	Regarding the concrete ramp, will a precast option (barrier, superstructure) be accepted by the owner? Using precast will help us in the constructability of the job.	Concrete ramp structure shall be cast-in-place as per contract drawings.
42	Regarding the concrete ramp, please provide the manufacturer details on MSES wall structure.	It is not clear what contractor is asking for here. Please clarify question.
43	Drawing S-610 shows Section 5/ S-610 drawn through the house trap pit with 12 3/4" Steel Pipe Piles. There is no Bid Item for these piles. Please provide.	The House Trap Pit slab detailed on Drawing S-610 shall be supported by the 16" diameter pipe piles detailed on the same drawing. See Attachment D, Revisions to Drawings for clarification of pipe pile dimension. The Bid Item for 16" diameter pipe piles will be applicable to these piles.

No.	Bidders' Questions	DDC Responses
44	<p>Drawings S-120 and S-600 show 20" 150 ton steel pipe pile detail: a) please advise whether these piles require reinforcing steel. a) please advise whether these piles require reinforcing steel. None is shown, if required please provide; b) The pipe pile detail on Drawing S-120 shows estimated pile tip elevation as -118 for Region A and -200 for Region B. Drawing S-600 shows estimated tip elevation as -198.75. Please advise the meaning of these elevations for bidding purposes.</p>	<p>a. The concrete fill of the steel pipe piles shall be unreinforced. \</p> <p>b. The estimated tip elevation is based on the geotechnical investigation and reflects the tip elevation at which the pile is anticipated to 'fetch up' and achieve the required ultimate driven capacity.</p>
45	<p>The lighting fixture schedule specifies that light fixture Type "B1" is 1' x 8' however, the drawings indicate this fixture to be 1'x4' in size. Please clarify the dimensions of this light fixture.</p>	<p>The schedule is correct. B1 is an 8 foot fixture and contains 2-4 foot lamps. That will make it have the same brightness as the B fixtures which are 4 foot and contain 1-4 foot lamp. 8 foot lamps are not acceptable on this project.</p>
46	<p>On the Feeder Schedules on Drawings E-121 and E-122 there are numerous line items labeled as "Not Used" however, these same feeders are indicated on the drawings (for instance 2M11B and 2M29B). Please clarify</p>	<p>The schedule is correct. The E-316 and E-317 drawings will be updated in Addendum #2 to match the Lidding System block diagram on E-112.</p>
47	<p>Can you please advise if it will be acceptable to perform an on-site crushing operation of the concrete removed as part of the demolition of the existing incinerator slab for reuse as structural fill?</p>	<p>The existing slab has not been tested to determine its structural quality, environmental characteristics or any other characteristics that could affect its suitability. Therefore, acceptability of this proposal will not be evaluated or approved prior to bid opening. Although such a proposal may be entertained for approval during shop drawing review, there is no guarantee it would be accepted.</p>
48	<p>There are conflicting guidelines for the demolition of piles. Sheets S-010 and S-011 call for existing pile demolition not to exceed 1'-0" below bottom of new structure. The specification calls for limits of 4'-0" below final finished grade or 2'-0" below bottom of new structure. Please confirm which dimension should govern.</p>	<p>As per section 02222 Article 3.02.A ("... Where no limits are shown or noted, the limits shall be 4 feet below final finished grade or 2 feet below underside of structure, ..."). This requirement applies "where no limits are shown or noted." Therefore, where the drawings show or note a limit, the drawings take precedence.</p>

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT B – REVISIONS TO THE BID BOOKLET**

The Bid Form and Bid Schedule pages of the Bid booklet are revised as follows:

Delete existing BID SCHEDULE PAGES 21, 21-1, 21-2, 21-3, and include attached BID SCHEDULE pages 13-0, 13-1, 13-2, 13-3.

Delete existing BID FORM page 13, and include attached BID FORM page 13-R.

Delete pages 'Certificate of No Change Form' from the Bid Booklet Part B, and replace with the attached pages 'Certificate of No Change Form'. The revised attached forms are 2 pages each, 4 pages total.

**PROJECT ID: S216-399A**

## **BID SCHEDULE**

**Submission:** Bidders are advised that the requirement to submit a Bid Schedule applies to the contract for which an "X" is indicated before the word "Yes". If required, the bidder must submit, with its bid, a completed Bid Schedule. Failure to provide a completed Bid Schedule may result in rejection of the bid as non-responsive.

      X            YES                                      NO

### **Instructions for Preparing Bid Schedule:**

- (A) The following bid prices on the Bid Schedule are to be paid for the actual quantities of the item numbers in the completed work or structure, and they cover the cost of all work, labor, material, tools, plant and appliances of every description necessary to complete the entire work, as specified, and the removal of all debris, temporary work and appliances.
- (B) In preparing its Bid Schedule, the bidder shall submit prices that include all costs for overhead and profit. Overhead shall include, without limitation, all costs in connection with the following: administration, management, superintendence, small tools, insurance, bonds, and provision of services or items required by the General Conditions [except for Security/Fire Guard Services and Temporary Heat]. If the Project requires Security/Fire Guard Services and/or Temporary Heat, such service(s) will be included as separate line items in the Bid Schedule.
- (C) The Agency may reject a bid if it contains unbalanced bid prices. An unbalanced bid is considered to be one containing lump sum or unit items which do not reflect reasonable actual costs plus a reasonable proportionate share of the Bidder's anticipated profit, overhead costs, and other indirect costs, anticipated for the performance of the items in question.
- (D) If an item is not set forth in the Bid Schedule, but is included in the Contract Documents (Drawings, Specifications, General Conditions, and/or Addenda), the bidder is advised to add the item to its Bid Schedule and include the cost of the item in its grand total. In an attachment to its Bid Schedule, the bidder shall provide a list of all items added.

**PLEASE BE SURE A LEGIBLE BID IS ENTERED FOR EACH ITEM.**  
**THE BIDDER SHALL INSERT THE TOTAL BID PRICE ON**  
**THE BID SCHEDULE ON PAGE 13-R OF THIS BID BOOKLET**

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT C – REVISIONS TO THE SPECIFICATIONS**

Specification Section 01120 Contract Summary, Page 01120-2

1. Part 1.04A.2: Change the date “December 12, 2003” to read “December 19, 2003.
2. Part 1.04A.3: Change the word “Inspections” to read “Inspection”.
3. Part 1.04A.4: Revise to read as follows:

*“Draft Report on Geotechnical Investigation, Southwest Brooklyn Marine Transfer Station Conversions, New York City Department of Sanitation, April 2005.”*

4. Part 1.04A.6: Revise to read as follows:

*“6. Summary of Sediment Sampling at Department of Sanitation MTS Conversion Program Sites, May 2004.”*

Specification Section 01355 Regulated Materials Control

1. Page 01355-1, Part 1.02A: Delete this part in its entirety.
2. Page 01355-8
  - a. Part 1.09A.5: Revise to read as follows:

*“In addition to the submittal requirements specified in this Part, the Contractor shall comply with the submittal requirements presented in the Information for Bidders Section 41 - DDC Safety Requirements.”*

- b. Part 1.09E: Delete this part in its entirety.

Specification 02224 Removal of Arsenic-Impacted Wood – Environmental Requirements

1. Page 02224-1, Part 1.02B. Delete this part in its entirety.
2. Page 02224-5, Part 3.03A. Revise “Section 01356 – Safe and Healthful Working Conditions” to read “in the Information for Bidders Section 41 – DDC Safety Requirements”.

Specification 02225 Impacted Soil Handling

1. Page 02225-1, Part 1.02B. Delete this part in its entirety.
2. Page 02225-6
  - a. Part 3.06A: Revise “Section 01356 – Safe and Healthful Working Conditions” to read “Information for Bidders Section 41 – DDC Safety Requirements”.
  - b. Part 3.07A: Revise “Section 01356 – safe and Healthful Working Conditions” to read “the Information for Bidders Section 41 – DDC Safety Requirements”.

Section 02240 Dewatering, Page 02240-10

Part 3.05H: Revise "Section 01356 – Safe and Healthful Working Conditions" to read "the Information for Bidders Section 41 – DDC Safety Requirements".

Specification 02291 Air Monitoring Program

1. Page 02291-1

- a. Part 1.02B. Delete this part in its entirety.
- b. Part 1.03A. Revise "Section 01356 – Safe and Healthful Working Conditions" to read "the Information for Bidders Section 41 – DDC Safety Requirements".
- c. Part 3.04A. Revise "Section 01356 – Safe and Healthful Working Conditions" to read "the Information for Bidders Section 41 – DDC Safety Requirements".

Specification 02325 Dredging and Dredged Material Disposal, Page 02325-7

1. Page 02325-1, Part 1.03A: At the end of this paragraph, insert the following: "the cost thereof shall be included in the unit price for dredging."

2. Page 02325-2

- a. Part 1.03E. Revise to read as follows:

"The Contractor shall pay dredged material disposal and debris disposal charges and include them in its corresponding price paid for dredging. The Contractor must submit to the City of New York copies of sworn representations by any third party accepting the dredged material and debris for disposal that (i) it acknowledges that it takes title to the material upon receipt; (ii) it is responsible to ensure that disposal is done in accordance with all applicable law; and (iii) it will hold the City of New York harmless from any liabilities related to disposal of the material. No separate payment will be made for disposal costs."

- b. Part 1.04.A: Revise "Plans" to read "Drawings".
  - c. Part 1.04.B: Revise "2008" to read "1968"
  - d. Part 1.05.B: After "HydroQual, Inc. " insert ", available as described in Section 01120 - Contract Summary."
3. Page 02325-4
- a. Part 1.06.A.4.a: Delete "and post dredge". Delete "and results".
  - b. Part 1.07.A: Revise "City of New York will perform a preconstruction sounding survey of the site to" to read "sound surveys of the site will".
  - c. Part 1.07.B: Delete this part in its entirety.
4. Page 02325-7, Part 1.11.B: Revise "Section 01356 – Safe and Healthful Working Conditions" to read "in the Information for Bidders Section 41 – DDC Safety Requirements".
5. Page 02325-7
- a. Part 3.01.B: Revise "milestone dates" to read "project schedule".

- b. Part 3.01.H: Revise "such findings may be considered as Changed Conditions" to read "the provisions of Chapter VI of the Standard Construction Contract shall apply".
- 6. Page 02325-9, Part 3.02.D: Revise "City" to read "City of New York".
- 7. Page 02325-10
  - a. Part 3.04.A.5: Revise "City of New York" to read "City of New York, Department of Sanitation".
  - b. Part 3.04.B: Revise "all other contractors, the Port Authority of New York & New Jersey, New York City" to read "City of New York". Delete "there is".
- 8. Page 02325-11
  - a. Part 3.05.C: Revise "contract" to read "Contract"
  - b. Part 3.06.A: After "disposal site" insert ", in accordance with Paragraph 3.01.G"
- 9. Page 02325-12
  - a. Part 3.07.A: Revise "as close to" to read "before". Delete "as possible, but not more than 14 calendar days prior to commencement of work".
  - b. Part 3.07.B: Revise to read as follows:
    - "B. The Contractor shall perform a post-dredge survey after completion of the work for each complete dredge area."
  - c. Part 3.07.C: Revise to read as follows:
    - "C. All areas found to be in compliance with the Contract requirements will be measured for payment in accordance with Section 01270 - Measurement and Payment. If the post-dredge survey data indicates that the dredged area is not at the required depth (within the overdredge allowance), the Contractor will be directed to resume dredging to complete the work to project depth and to perform another post-dredge survey."
  - d. Part 3.07.D: Revise "The material removed will be measured by cubic yards in place, by means of the soundings taken before and after dredging. Soundings shall be" to read "The material removed will be measured by cubic yard in place, by means of soundings taken before dredging and after accepted completion of the dredging. Soundings shall be conducted by the Contractor".
  - e. Part 3.07.D: Revise "having his representative" to read "being".
- 10. Page 02325-13, Part 3.10: Revise to read as follows:

**"3.10 FINAL EXAMINATION AND ACCEPTANCE**

- A. As soon as practicable after the completion of the work of this section, a final examination of the work will be conducted by the Commissioner. Should any shoals, lumps, or other lack of contract depth be disclosed by this examination, the Contractor will be required to remove same by mechanical dredge. However, if the

bottom is soft and the shoal areas are small and form no material obstruction to navigation, the removal of such shoal may be waived at the discretion of the Commissioner. The Contractor or its authorized representative will be notified when hydrographic surveying will be performed, and will be permitted to accompany the survey. When the area is found to be at the required depth(s) and slope(s) within the overdredge allowances, it will be accepted finally.

- B. Should more than two sounding operations by the City of New York be necessary over an area because of additional work to remove shoals disclosed by a prior sounding, a charge will be assessed against the Contractor to compensate the City of New York for its actual comprehensive costs caused by the need for additional operations. This charge will be calculated based on the actual costs incurred by the City of New York while engaged in sounding or during which its equipment is enroute to or from the site or held at or near the site for the third and any subsequent sounding operations. After the work of this section has been finally accepted, no additional dredging will be required of the Contractor to remove material which may have deposited in the dredge area."

Specification 02380 Rock Works, Page 02380-1

Part 1.02A: Delete this part in its entirety.

Specification Section 02839 Mechanically Stabilized Earth (MSE) Retaining Walls, Page 02839-8

Part 1.05G. After this part, add the following:

- "H. The details of ground improvement excavation and replacement required to achieve 4ksf within MSE footprint. Or details of alternative ground improvement method. See contract drawings for details.

1.06 MEASUREMENT AND PAYMENT

A. Measurement

1. Payment of MSE walls shall be included under the lump sum Ramp Construction item detailed in Specification 01270, section 1.02B. Where ever MSE walls are utilized, the following items shall be included within the Contractor's lump sum bid amount.
2. All MSE appurtenances shall be included in Ramp Construction price including the items below and the associated ground improvement below wall footprint:
  - a. Separate payment will not be made for foundation excavation, concrete leveling pads, precast wall elements, reinforcing strips, joint materials, fasteners, select specified backfill, Coarse Aggregate, Size No. 57, Porous fill, Filter fabric, Concrete in Barrier Parapets, C.I.P. Moment Slab, Reinforcement Steel, Impervious Membrane, Drainage Pipe, perforated corrugated metal underdrain pipe (PCMP), Temporary Sheet piling to Remain, riprap, Concrete slab in front of the abutments, Concrete coping, waterproofing, and all other appurtenant within the common structure volume, the cost of which shall be included in the cost of the various MSE Abutment Walls.

- b. Separate payment will not be made for earthwork within the common structure volume, the cost of which shall be included in the cost of the various MSE Abutment Walls.
- c. Separate payment will not be made for any bump-out not shown on the contract plans and the cost of which shall be included in the cost of the various MSE Walls.
- d. Separate payment will not be made for temporary sheeting, dewatering, excavation and backfilling required in footprint of MSE walls, or any alternative ground improvement methods, used to improve soil quality under ramps to the required 4 kips per square foot.
- e. Separate payment will not be made for any utility relocation required within the footprint of the MSE wall. Note that any relocations required shall meet the requirements of the associated agency or owner of such utilities."

Specification Section 03350 Concrete Finishes, Page 03350-11

Part 3.02.A.8: Revise to read as follows:

- "8. Type "H" - Heavy Duty Abrasive Shake-on Hardened Finish: Provide broadcast-applied hardener finish by applying a specially graded, non-metallic, natural mineral aggregate concurrently with the application of a floated, Type "C" finish with a minimum FF25 flat finish tolerance in accordance with ACI 117. Apply hardener in strict accordance with the manufacturer's instructions. After the concrete has sufficiently hardened, the final finish is to be completed with a power trowel fitted with float shoes to create a swirled slightly roughened finish where the concrete surface is closed."

Specification Section 03450 Plant-Precast Architectural Concrete, Page 03450-7

Part 2.07.A: Revise to read:

- A. Cellular Plastic Weep/Vent: One piece, flexible extrusion made from UV resistant polypropylene copolymer, 3/8" wide x 3 3/8 inches high x 4 inches long, in color clear. Install at shelf angles or foundation walls at each vertical joint and horizontally 24 inches on center."

Specification Section 07115 Bituminous Dampproofing, Page 07115-1

Part 1.02E: Revise to read as follows:

- "E. Transformer Building: Within this structure, Consolidated Edison Co. specifications and drawings take precedence over other contract documents."

Specification Section 07141 Surface Applied Interior Waterproofing, Page 07141-1

Part 1.02E: After this part, add the following:

- "F. Transformer Building: Within this structure, Consolidated Edison Co. specifications and drawings take precedence over other contract documents."

Specification Section 07410 Metal Wall Panels, Page 07410-9

Part 2.02A.2.a.(2): Revise to read:

- “(2) Color: Custom color matching Pantone Matching System (PMS) Color - Cool Gray No. 2U or approved equal.”

Specification Section 09967 Coating for Steel Waterfront Structures, Page 09967-1

Part 1.02B. Delete this part in its entirety.

Specification Section 13125, Resident Engineer's Field Office Trailer, Page 13125-1

Part 1.04A: Delete the phrase “Article 4 of”.

Specification 13287 Environmental Waste Transportation and Disposition, Page 13287-1

Part 1.02B. Delete this part in its entirety.

Specification Section 14640 Container Gantry Crane

1. Page 14640-12, Part 2.02A.8: After “Part 2” in the second line, delete “Parts,”.
2. Page 14640-15
  - a. Part 2.03B: After “Part 2,” in the first line, delete “Parts,”.
  - b. Part 2.03C: After “Part 2,” in the first line, delete “Parts,” and after “Part 2,” in the fourth line, delete “Parts,”.
  - c. Part 2.03E: After “Part 2,” in the first line, delete “Parts,”.
  - d. Part 2.03F: After “Part 2,” in the first line, delete “Parts,”.
  - e. Part 2.03G: After “Part 2,” in the fifth line, delete “Parts,” and after “Part 2,” in the ninth line, delete “Parts,”.
3. Page 14640-21, Part 2.06C.5:
  - a. Change “Part 1” to “Part 2”.
  - b. Change “Articles 1.03 and 1.04” to “Articles 2.03 and 2.04”.
4. Page 14640-104, Part 3.02A.4: Change “13 and 14” to “1.19, 1.36 and 1.37”.
5. Page 14640-106, Part 3.02E.2.b: Change “Part 1, General, Article 1.04.A” to “Part 2, Products, Article 2.04.A.”

Specification Section 15051 Ductile Iron Pipe, Page 15051-10

Part 3.01B. Delete the phrase “of the Plumbing Contract”.

Specification Section 15081 Piping Insulation

1. Page 15081-1, Part 1.02E: After this part, insert the following:

“F. Section 15120 - Interior and Exposed Piping Schedules”
2. Page 15081-2, Part 1.07: After this part, insert the following:

“1.08 REFERENCES

  - A. ASTM C552 - Cellular Glass Block and Pipe Thermal Insulation
  - B. ASTM E84 - Test Method for Surface Burning Characteristics of Building Materials

- C. NFPA 255 - Surface Burning Characteristics of Building Materials
- D. UL 723 - Surface Burning Characteristics of Building Materials"

3. Page 15081-3, Part 2.01A.1.b: After this part, insert the following:

"2. Closed-Cell Insulation

- a. Armacell
- b. Or approved equal

2. Page 15081-3, Part 2.02B: After this part, insert the following:

"C. Close-Cell Insulation: Provide waterproof, closed-cell type with a zero water vapor transmission rate, temperature range of -10 degree F to +200 degree F and which do not contain corrosive constituents associated with stress corrosion failure of copper tube. Provide insulation which has excellent resistance to chemicals, ozone and solvents. Provide seam joining to be moisture proof using non-toxic sealant. Insulation shall have a thermal conductivity 0.25 BTU-in/hr. ft<sup>2</sup>-°F."

3. Page 15081-9, Part 3.08: Revise this part to read as follows:

"3.08 INSULATION APPLICATION SCHEDULE

A. Indoor Mechanical/Process Services: Dust Suppression, Odor Control, Odor Control Drain & Service Water

- 1. Operating Temperature: 60 to 140 deg F
- 2. Insulation Material: Cellular Glass
- 3. Vapor Retarder: Yes
- 4. Jacket: Refer to Schedule in Section 15120 – Interior and Exposed Piping Schedules
- 5. Insulation Thickness: Refer to Schedule in Section 15120 – Interior and Exposed Piping Schedules

B. HVAC Liquid Line Refrigerant Piping

- 1. Operating Temperature: 0 to 39 deg. F
- 2. Insulation Material: Closed-cell
- 3. Vapor Retarder: Yes
- 4. Jacket: none
- 5. Insulation Thickness
  - a. Pipe size - 1 inch and smaller, insulation -1 inch thick
  - b. Pipe size - Over 1 inch, insulation - 1 ½ inch thick

C. HVAC Hot Gas Refrigerant Piping

- 1. Operating Temperature: up to 200 deg. F
- 2. Insulation Material: Closed-cell
- 3. Vapor Retarder: Yes
- 4. Jacket: none

5. Insulation Thickness
  - a. Pipe size - 1 inch and smaller, insulation -1 inch thick
  - b. Pipe size - 1-¼ inch to 2 inch, insulation - 1 ½ inch thick
  - c. Pipe size - Over 2-1/2 inch, insulation - 2 inch thick
- D. Indoor Plumbing Services: Domestic Hot and Recirculated Hot Water, Domestic Cold Water
  1. Operating Temperature: 60 to 140 deg F
  2. Insulation Material: Cellular Glass
  3. Vapor Retarder: Yes
  4. Jacket: Stainless Steel
  5. Insulation Thickness
    - a. Pipe size - ¾ inch to 1 ½ inch, insulation -1 inch thick
    - b. Pipe size - 2 inch to 2 ½ inch, insulation - 1 ½ inch thick
    - c. Pipe size - 3 inch to 4 inch, insulation - 2 inch thick
- E. Indoor Plumbing Services: Sanitary and Storm Drainage
  1. Operating Temperature: 60 to 140 deg F
  2. Insulation Material: Cellular Glass
  3. Vapor Retarder: Yes
  4. Jacket: Stainless Steel
  5. Insulation Thickness
    - a. Pipe size - 2 inch to 2 ½ inch, insulation -1 1/2 inch thick
    - b. Pipe size - 3 inch to 15 inch, insulation - 2 inch thick
- F. Fire Protection Piping, Indoor
  1. Operating Temperature: 60 to 140 deg F
  2. Insulation Material: Cellular glass
  3. Vapor Retarder: Yes
  4. Jacket: Stainless Steel
  5. Insulation Thickness
    - a. Pipe size - ¾ inch to 1 ½ inch, insulation -1 inch thick
    - b. Pipe size - 2 inch to 2 ½ inch, insulation - 1 ½ inch thick
    - c. Pipe size - 3 inch to 4 inch, insulation - 2 inch thick
- G. Fire Protection Piping (Wet Sprinkler, Siamese & Standpipe Systems)
  1. Operating Temperature: -20 to 140 deg F
  2. Insulation Material: Cellular glass
  3. Vapor Retarder: Yes
  4. Jacket: Stainless Steel
  5. Insulation Thickness:
    - a. Pipe size - 1 ½ inch, insulation -1 inch thick

- b. Pipe size - 2 inch to 2 ½ inch, insulation - 1 ½ inch thick
- c. Pipe size - 3 inch to 8 inch, insulation – 2 inch thick”

Specification Section 16751 Access Control System

1. Page 16751-1, Part 1.01B:
  - a. Before the first sentence, add the following:

“Coordination with Other DSNY MTS Contracts:”
  - b. Change “located at other City of New York Transfer Stations” to read “provided under the previous DSNY Contract for construction of the North Shore Marine Transfer Station”.
2. Page 16751-2, Part 1.04C.4: After this part, add the following:

“5. Furnish building floor plan and equipment room layouts showing cable and conduit routing and space allocation of equipment.”
3. Page 16751-3, Part 1.06D: Change “City of New York” to read “DSNY”.
4. Page 16751-5, Part 2.01B: At the end of this paragraph, add “Other manufacturers of equivalent products may be submitted for approval.”
5. Page 16751-16, Part 2.03A: Change “City of New York’s” to read “DSNY’s”.
6. Page 16751-24, Part 3.01A: Change “Resident Engineer” to read “Commissioner”.
7. Page 16751-25
  - a. Part 3.03B: Change “City of New York” to read “DSNY”.
  - b. Part 3.03C: Change both phrases of “City of New York” to read “DSNY”.
  - c. Part 3.04C: Change “City’s” to read Commissioner’s”.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT D – REVISIONS TO THE DRAWINGS**

**REFER TO DRAWING C-013.00**

Replace Drawing C-013.00 with Drawing C-013.01, a copy of which is attached hereto.

**REFER TO DRAWING C-015.00**

Replace Drawing C-015.00 with Drawing C-015.01, a copy of which is attached hereto.

**REFER TO DRAWING C-017.00**

Replace Drawing C-017.00 with Drawing C-017.01, a copy of which is attached hereto.

**REFER TO DRAWING C-018.00**

Replace Drawing C-018.00 with Drawing C-018.01, a copy of which is attached hereto.

**REFER TO DRAWING A-111.00**

1. Delete orphan text and leader reading "FLOOR STRIPING" located between Column Lines 1 and 2 and C and D just above the floor elevation tag.
2. Delete orphan text and leader reading "FLOOR STRIPING", dimension lines, and angle call-out located between Column Lines 16 and 17 and Column Line D and the match line.

**REFER TO DRAWING A-112.00**

1. Reposition tag call-out 125-1 located between Column Lines 15 and 16.8 and F and D to actually point to the door.
2. Delete orphan "CJ" callout located along Column Line 16.8 between column line E and F.
3. Delete orphan "CJ" callout located between Column Lines E and F and 1 and 2.
4. Delete orphan text and leader reading "RAMP ABOVE" located by Column E17.

**REFER TO DRAWING A-113.00**

Replace Drawing A-113.00 with Drawing A-113.01, a copy of which is attached hereto.

**REFER TO DRAWING A-114.00**

Replace Drawing A-114.00 with Drawing A-114.01, a copy of which is attached hereto.

**REFER TO DRAWING A-115.00**

Replace Drawing A-115.00 with Drawing A-115.01, a copy of which is attached hereto.

**REFER TO DRAWING A-117.00**

1. In the Electrical Room #2 Space 310 add a length dimension line to the internal free standing wall to read 17'-6".
2. Add a dimension line to position the wall from the immediate east wall to read 5'-6" and one to position the wall from the immediate north wall to read 3'-10".

**REFER TO DRAWING A-119.00**

Delete parallel phantom lines running east west, and continuous lines running north south over the Electrical Room #2 located between Column Lines C and D and 1 and 2.

**REFER TO DRAWING A-121.00**

Delete railing running north south along column lines 1 and 17.

**REFER TO DRAWING A-141.00**

Replace Drawing A-141.00 with Drawing A-141.01, a copy of which is attached hereto.

**REFER TO DRAWING A-147.00**

Replace Drawing A-147.00 with Drawing A-147.01, a copy of which is attached hereto.

**REFER TO DRAWING A-200.00**

1. Delete siamese connections and call out shown by columns lines 1 and 17.
2. Delete orphan leader by column line 1 at EL 7.50.

**REFER TO DRAWING A-203.00**

Add a siamese connection by column line A at EL 11.50 centered in the first precast panel module. Delete text and leader by column line G reading "INSULATED BLANK-OFF PANELS WITH BIRD-SCREEN".

**REFER TO DRAWING A-221.00**

Delete railing shown at EL. 68.00 Mechanical Mezzanine level.

**REFER TO DRAWING A-223.00**

1. Delete railing shown at EL. 68.00 Mechanical Mezzanine level.
2. Flip to the opposite side the double door next to column line C.
3. Change the 8'-0" suspended ceiling height dimension at the intermediate landing of the stair in vestibule to read 7'-6".

**REFER TO DRAWING A-401.00**

1. Detail D3. Extend concrete wall between stair flights to be 4'-10" from the wall along column line C.
2. Detail D1. Shift right most wall at El. 11.5, between El. 11.5 and El. 28.08, 3'-4 right. Extend suspended ceiling to abut new wall location.

**REFER TO DRAWING A-405.00**

1. Detail C6. Delete orphan text and leader reading "ROOF HATCH PROJECTION" located immediately below detail A6 callout bubble. Point leader arrow from remaining "ROOF HATCH PROJECTION" callout to the square around the top of the ladder.
2. Detail C3. Draw missing stair stringer line.

**REFER TO DRAWING A-500.00**

Add the following notes to this Drawing:

- "11. 2 HR intumescent mastic at vertical lateral bracing where exposed to view typ (UL X625, UL X632).
12. 1½ HR intumescent mastic on beams (UL X625, UL X632) at tipping level in loading bay where indicated."

**REFER TO DRAWING A-900.00**

Replace Drawing A-900.00 with Drawing A-900.01, a copy of which is attached hereto.

**REFER TO DRAWING A-610.00**

Detail A1. Delete black squares and dotted lines around them.

**REFER TO DRAWING S-103.00**

In the dimension string locating the piles along Column Line L, replace the dimension immediately west of Column Line 10 that reads "5'-0"" with "4'-11"" and replace the dimension immediately east of Column Line 10 that reads "7'-0"" with "7'-1"".

**REFER TO DRAWING S-131.00**

In Section 2, delete the vertical dimension at the far left of the section that reads "3'-2"".

**REFER TO DRAWING S-132.00**

In Section 2, replace the two (2) horizontal dimensions at the top of the section and left of Column Line B, the one that reads, "9'-8"" with "9'-4"" and the one that reads "7'-8"" with "17'-4"".

**REFER TO DRAWING S-610.00**

In Section 5, in the call-out of the pile centerline, replace the pile size "12-3/4"" with "16"" and in the dimension string below which identifies the edge distance of the piles to the pile cap, replace both dimensions that read "18"" with "SEE PLAN".

**REFER TO DRAWING R-011.00**

In the LEGEND, revise "DRILLED SHAFT NO. 1 FOR ORIENTATION OF PILE CAP" to read "PIPE PILE NO. 1 FOR ORIENTATION OF PILE CAP".

**REFER TO DRAWING R-102.00**

Replace Drawing R-102.00 with Drawing R-102.01, a copy of which is attached hereto.

**REFER TO DRAWING R-211.00**

In the LEGEND, revise "DRILLED SHAFT NO. 1 FOR ORIENTATION OF PILE CAP" to read "PIPE PILE NO. 1 FOR ORIENTATION OF PILE CAP".

**REFER TO DRAWING R-215.00**

Near the bottom center of the drawing, revise the section title "APPROACH STRUCTURE SECTION 1/R-015" to read "APPROACH STRUCTURE SECTION 1/R-215".

**REFER TO DRAWING R-302.00**

Replace Drawing R-302.00 with Drawing R-302.01, a copy of which is attached hereto.

**REFER TO DRAWING M-114.00**

1. Near the upper right corner, add a label pointing to the break at the end of the 4" CW CL EL 21.50, with text for the label reading 'SEE PLUMBING DRAWINGS FOR CONTINUATION'.
2. Near the upper right corner, locate the 4" CW at CL EL 21.50. Follow the 4" CW horizontally to the left until the pipe turns 90 degrees at the 4" CW CL EL 23.50. At this 90-degree bend, insert an elbow down from EL 23.50 to EL. 21.50 so that the plan matches Section 7 on Drawing M-216.

**REFER TO DRAWING M-121.00**

1. Delete the following five outside pipes that are shown to the right of Column Line 17:
  - a. 4" PD
  - b. 4" CW
  - c. 6" SIA
  - d. (2) 6" FPW
2. Delete the dashed outline enclosing the five pipes described above. Also delete the text 'UNDER RAMP (SEE NOTE 2 & 4)' that appears below these pipes.
3. Delete the ten heat trace triangle symbols associated with the deleted pipes.
4. Delete the text in Note 2 and replace with "NOTE 2 NOT USED".
5. Delete Note 4.

**REFER TO DRAWING M-124.00**

Replace Drawing M-124.00 with Drawing M-124.01, a copy of which is attached hereto.

**REFER TO DRAWING M-216.00**

Replace Drawing M-216.00 with Drawing M-216.01, a copy of which is attached hereto.

**REFER TO DRAWING M-310.00**

1. At the lower left corner, change the dashed line on the 1" CW to a solid, heavy line and change the label to read "4 CW".
2. At the lower left corner, add a leader pointing to the break at the end of the 4" CW with the leader text indicating "SEE DRAWING M-311 FOR CONTINUATION".
3. At the lower left corner, change the gate valve (light line weight) to a reducer (heavy line weight).
4. To the right of the new reducer, add a leader with text "1" CW".
5. At the lower left corner, delete the limit of work symbol and the associated text "P" and "G".
6. On the 1" CW branch feeding the odor control equipment, add a gate valve. Locate the gate valve to the left of the dashed outline for the skid-mounted odor control equipment.
7. At the left side, add a gate valve on the vertical 1" CW. Locate the gate valve between the odor control skid and the dust suppression skid.

**REFER TO DRAWING M-311.00**

1. At the left side, add a leader pointing to the break at the end of the 4" CITY WATER with leader text reading "SEE PLUMBING DRAWINGS FOR CONTINUATION."
2. At the left side, add a vertical branch to the 4" CITY WATER. Locate the branch between the gate valve and the dashed outline for the skid-mounted service water system. Draw the branch vertically down to near the bottom of the page. Place a break symbol at the end of the branch and add a leader pointing to this end with text reading "SEE DRAWING M-310 FOR CONTINUATION."

**REFER TO DRAWING M-312.00**

1. Delete Circuits 13-22 in Heat Tracing System No. 1 F-HTS-01 Block Diagram.
2. Delete Note 3.

**REFER TO DRAWING P-014.00**

At the upper right corner of the Odor Control Room near door, delete the leader "1" PUGGED VALVE FOR ODOR CONTROL WATER SERVICE" along with the associated valve and 1" pipe branch

**REFER TO DRAWING P-020.00**

Replace Drawing P-020.00 with Drawing P-020.01, a copy of which is attached hereto.

**REFER TO DRAWING P-063.00**

Replace Drawing P-063.00 with Drawing P-063.01, a copy of which is attached hereto.

**REFER TO DRAWING P-080.00**

In the "INTERIOR AND EXPOSED PIPING SCHEDULE" revise the following:

1. Delete "INSULATION THICKNESS" column.
2. Delete "JACKET MATERIAL" column.
3. In the "REMARKS" column, delete "SEE NOTE 5" from row titled "SANITARY WASTE UNDERGROUND".
4. In the "REMARKS" column, delete "SEE NOTE 5" from row titled "STORM DRAINAGE PIPING UNDERGROUND".

**DDC PROJECT #:** S216-399A

**PROJECT NAME:** SOUTHWEST BROOKLYN MARINE TRANSFER STATION

**ATTACHMENT E – REVISIONS TO THE ADDENDUM TO THE GENERAL CONDITIONS**

Delete Schedule A page 8 of the Addendum to the General Conditions and replace with Schedule A page 8-R, Rev. Addendum #1, included with this Addendum.

**SCHEDULE A (FOR PUBLICLY BID PROJECTS)**  
**Contract Requirements**

Various Articles of the Contract refer to requirements which are set forth in Schedule A of the General Conditions. The Schedule set forth below specifies the following: (1) the referenced Articles of the Contract, and (2) the specific requirements applicable to the contract.

REFERENCE	ITEM	CONTRACT FOR GENERAL CONSTRUCTION			
Article 14 Contract	Time of Completion	Consecutive Calendar Days	Milestone 1 – 730 ccd Milestone 2 – 1,095 ccd		
Article 15 Contract	Liquidated Damages	For each consecutive calendar day over completion time	\$	Milestone 1 – \$5,000/day Milestone 2 - \$5,000/day	
Article 17 Contract	Sub- contracts	Not to exceed percent of Contract Price	80%		
Article 21 Contract	Retainage	Percent of voucher	If 100% bonds are required	5%	
			If 100% bonds are not required, and Contract Price is less than \$500,000	10%	
			If 100% bonds are not required, and Contract Price is more than \$500,000	10%	
Article 24 Contract	Maintenance & Guaranty	Percent of Contract Price	1%		
Article 77 Contract	MWBE Program	See Subcontractor Utilization Plan in the Bid Booklet			

# ADDENDA CONTROL SHEET

**TITLE: Southwest Brooklyn Marine Transfer Station – Building Construction**

**GENERAL  
COUNSEL**

DATE \_\_\_\_\_

[illegible]

THE CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
DIVISION OF STRUCTURES

September 26, 2012

**ADDENDUM No. # 2**

FOR FURNISHING ALL LABOR AND MATERIAL NECESSARY AND REQUIRED FOR:

**S216-399A**

**Southwest Brooklyn Marine Transfer Station – Building Construction**

This addendum is issued for the purpose of amending the requirements of the Bid and Contract Documents and is hereby made a part of said Bid and Contract Documents to the same extent as though it were originally included therein.

The bidder is advised that the items listed below apply to the project:

1. **The Bid Opening for the contract described below scheduled for October 11, 2012, at 2:00 pm is rescheduled to October 25, 2012, at 2:00 pm.**

Contract #1 – General Construction Work

2. **Bidders Questions and Responses to Questions:**

See Attachment A.

3. **Revisions to the Addendum to the General Conditions:**

See Attachment B

4. **Revisions to Specifications:**

See Attachment C.

5. **Revisions to Drawings:**

See Attachment D.

6. **Revisions to the Bid Booklet:**

See Attachment E.

7. **Revisions to Volume 2:**

See Attachment F.

THIS ADDENDUM MUST BE SIGNED BY ALL BIDDERS AND ATTACHED TO THEIR BIDS.

If additional information is required, please contact the Department of Design and Construction, Contract Section at (718) 391-2200, (718) 391-1727, or by fax at (718) 391-2615.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT A – BIDDERS QUESTIONS AND DDC RESPONSES**

No.	Bidders' Questions	DDC Responses
1	Can you please advise if the fenced in parking area east of the building site which currently houses impounded vehicles will be available to the General Contractor for a site staging area?	The fenced in parking area east of the building will not be available for site storage and staging. Revised Drawing C013 provided in Addendum #2 shows the space available for site storage and staging. See Attachment D, Revisions to Drawings.
2	Will the area of land along the existing marina south retaining wall be accessible for construction equipment (crane, excavator, loader) and material deliveries (armor stone)?	The marina's retaining wall is adjacent to the DSNY property line. There is no strip of land on the DSNY side of the property line – this area is under water.
3	What is the depth (tip elevation) of the existing fender piles on the North bulkhead?	Available design drawings for the existing fendering indicate the pile tips to be at Elevation - 45'. The as-built condition may differ.
4	Do the new PSP900 King piles have to be coated on the interior, meaning can be coated after assembled as doubles? Or do they have to be coated as singles so all surfaces of the pile are covered?	The interior king pile cavity need not be coated. Each double king pile should be coated externally as a unit after fabrication. An addendum will specify casting a 2 foot deep concrete plug on top of each double king pile cavity after driving, cut-off and coating touch-up, to seal the cavity.
5	On Drawing S-803. 00, how is the contractor expected to install the concrete encasement around the 18 inch diameter RCP in between the bulkhead and cofferdam space of 2'-8" which is partially below mean low water?	Addendum #2 shows demolition of the existing corner segment of concrete walkway. See Attachment D, Revisions to Drawings. This will allow access for excavation of fill between the PZ bulkhead and cofferdam cells before positioning the RCP outfall. As shown in Section 3 on drawing S-803.00, the space between the cofferdam and bulkhead is much wider than 2'-8" on the east side, due to the curvature of the cofferdam's corner cell. Concrete can be placed underwater in conformance with paragraph 3.05.G of Section 03300, cast on screeded excavated subgrade with side forms. Backfill would then be placed to refill between the cell and the bulkhead, and the corner segment of walkway would then be rebuilt to match existing.
6	What are the dimensions and thickness of the steel plate in Section 1/S-904?	The steel plate shown in the referenced section is the flange of the HP12 fender pile.
7	What diameter and wall thickness is the "3X strong" pipe on Detail 2/S-903?	The intended call out is for a 3 inch diameter extra strong (meaning Schedule 80) pipe.
8	What thickness are the corner gussets on Detail 2/S-903?	As indicated in Detail 2, gussets are typically 3/8" thick.

No.	Bidders' Questions	DDC Responses
9	Are the 3/4" diameter x 4" long and 8" long studs for the PZ35 sheet piles shown on Drawing S-801 bare/black uncoated steel?	Yes.
10	Are there any as-builds / details / drawings of the existing marina seawall adjacent to the new King Pile combination wall available for review? Is bracing of this wall mandatory during pile driving?	We are not aware of any as-built drawing for the marina seawall. Bracing is not mandatory, but may be proposed by the contractor as part of his means and methods to avoid exceeding wall movement limits specified in the monitoring program.
11	What spec is to be followed for the ladder shown on Drawing S-804?	Section 05500 for the steel work; Section 09967 for the coating.
12	Can /will the bid date of September 27th be extended?	The Bid Opening date is revised to October 25, 2012 in Addendum #2.
13	Question: Water main tap 1. Are these "Wet Taps"? 10" branch cannot tap off an 8" of main. We can offer an 8x8 wet tap with 8" tapping valve and then use an increaser 8"x10" to connect the 10" FP. Is this acceptable?	The connection of the 10" branch to the 8" main should be done on the junction box shown on Drawing C-028.
14	<p>Question: Final Utilities 3 (Refer to Bidder's Sketch RRC-RFI-004)</p> <p>1. Sketch RRC-RFI-004 says "EXPOSED". Does it apply to exterior, buried piping?</p> <p>2. Sketch RRC-RFI-004 says "City Water 4" Copper". If this applies for exterior buried piping then please permit us to say that It is unusual for domestic water services as large as 4" to be copper; they are usually ductile iron. Please confirm copper.</p> <p>3. Sketch RRC-RFI-004 says Sanitary Sewer 4"-8" shall be ductile iron. There is a quantity of 10" and 12" Sanitary Sewer. May we assume that to be ductile iron with RPOJ (and Restrained Mechanical Joint Fittings) as well?</p>	<p>These questions refer to the schedule located at the end of Section 15120 Interior and Exposed Piping.</p> <p>1. For the schedule in Section 15120, "EXPOSED" applies to exposed interior and exposed exterior piping. The schedule in 15120 does not apply to buried piping. The schedule for buried piping shown on the Civil Final Utilities drawings can be found in Section 02503 Installation of Buried Pipelines. Underground piping shown on Plumbing Drawings shall use the schedule indicated on the plumbing drawings.</p> <p>2. The schedule in 15120 does not apply to buried City Water pipe. See Section 02503 for buried piping schedule.</p> <p>3. The schedule for buried piping shown on the Civil Final Utilities drawings can be found in Section 02503 Installation of Buried Pipelines. Underground piping shown on Plumbing Drawings shall use the schedule indicated on the plumbing drawings.</p>

No.	Bidders' Questions	DDC Responses
	<p>4. Sketch RRC-RFI-004 says Soldered joints. If indeed this is for exterior, buried piping, it is extremely unusual for soldered joints to be used underground. Please advise.</p> <p>5. Sketch RRC-RFI-004 says "Restrained Push On Joints". We assume it also applies as "Restrained Mechanical Joints" where fittings are required. Please confirm.</p> <p>6. Sketch RRC-RFI-004 says "Restrained Push On Joints". We assume it also applies as "Restrained Mechanical Joints" where fittings are required. Please confirm.</p>	<p>4. The schedule in 15120 does not apply to buried piping. The schedule for buried piping shown on the Civil Final Utilities drawings can be found in Section 02503 Installation of Buried Pipelines. Underground piping shown on Plumbing Drawings shall use the schedule indicated on the plumbing drawings.</p> <p>5. Correct</p> <p>6. Correct</p>
15	<p>(Refer to Sketch RRC-RFI-006-Q-4-5) Question 5: Is this electrical conduit sloping for drainage?</p>	<p>Drawing C-027 is revised in Addendum #2. Per Note 4 on Drawing C- 030, lighting duct banks are not required to be sloped. Minimum slope for other duct banks is described in Note 4 on Drawing C-030. Note 4 on Drawing C-030 is clarified in Addendum #2. A revised electrical manhole schedule is provided in Addendum #2. See Attachment D, Revisions to Drawings. Also see Note 3 on Drawing C-048.</p>
16	<p>Spec. Section 01561. Can you please advise if the supply of security guards for the project will be required? The supplemental General Conditions refer one to Specification Section 01561 - Site Security; however, Section 01561 refers one back to the General Conditions.</p>	<p>Section 01561 does not replace the requirements of the General Conditions. The intent is that Section 01561 supplements the requirements of General Conditions Article 1.26. See Attachment B, Revisions to the Addendum to the General and Attachment C, Revisions to Specifications.</p>
17	<p>On C-030.00, the Storm Manhole Schedule does not correspond to the Final Utilities drawings (Sheets C-25 to C-29) in CL coordinates or corresponding branches and invert elevations. For example, ST-MH-8 is shown on drawings C-028.00 after roughly Northing 153,670.00 and Easting 985,008.00 with piping running from from STS-1 (Invert: 0.5 per C-032.00) and out to an 18" Outfall at the bulkhead (Invert: -3.42 per C-032.00). On the schedule, ST MH-8 is located at Northing 154,052.84 and Easting 984,727.43 with branches from STS-1 (Invert: 1.73) and RFD-4 (Invert: 1.38). Similar errors occur throughout the ST MH Schedule. Please</p>	<p>Both the drawings and the manhole schedule have been updated. Revised drawings C-025 through C-030 are provided in Addendum #2. See Attachment D, Revisions to Drawings.</p>

No.	Bidders' Questions	DDC Responses
	update either the drawings or the schedule so that the items match.	
18	The CL Coordinates of the "Electrical and Telephone Manhole Schedule" do not seem to correspond to their locations on the drawings (comparing C-030.00 and C-028.00). Please advise.	The E/W coordinate grid on the civil drawings is incorrect. The coordinate grid is revised in Addendum #2. See Attachment D, Revisions to Drawings.
19	Please provide the details for the existing manholes to be demolished (diameter, depth, etc.).	All available details on the existing manholes are provided on the contract drawings.
20	Please provide the depths of all existing utilities to be demolished.	All available details on the existing utilities are provided on the contract drawings.
21	The CL coordinates of the "Catch Basin Schedule" on Drawing C-030. 00 do not seem to correspond to their locations on the drawings (C-028.00, et al.). Please advise.	The E/W coordinate grid on the civil drawings is incorrect. The coordinate grid is revised in Addendum #2. See Attachment D, Revisions to Drawings.
22	Please provide details for the "Proposed 10 Ft Chain-Link Fence" shown on C-016 and the "12 ft Chain Link Fence" shown on C-018.	Drawings C-016 and C-018 are revised in Attachment D of Addendum #2. References to the fence height have been corrected to read "8'".
23	The location of the building per coordinates provided on Drawing S-100 and the Site Survey Property Lines provided on Drawing A-008 do not match the survey grid provided on the utilities drawings (Drawings C-025 through C-29). Please confirm which drawings should govern.	The E/W coordinate grid on the civil drawings is incorrect. The coordinate grid is revised in Addendum #2. See Attachment D, Revisions to Drawings.
24	Drawing C-030, Electrical Schedules refer to Dwg No C-045 for details. Drawing C-045 does not provide manhole details. Please provide.	A revised Drawing C-030 is provided in Addendum #2. See Attachment D, Revisions to Drawings.
25	The Bid Schedule for pricing the work is very disjointed. Where would you like us to price the cost of for Division 13 and the balance of Divisions 14 and 15?	See Attachment C for revised section 01270 Measurement and Payment, and Attachment E for revised Bid Schedule and revised Contractor's Bid Schedule.
26	To properly bid a project of this magnitude, a thorough review of the plans and quantity take-offs are required. This process generates necessary RFIs and Clarifications to the owner. Adequate time to generate and get their questions answered mitigates ambiguity and affords the best possible price and project for the owner. Unfortunately, adequate time has not been afforded here. In addition, there are other large-scale projects competing with your bid date. In light of the above we request an additional five weeks to properly prepare your bid.	The Bid Opening date is revised to October 25, 2012 in Addendum #2.

No.	Bidders' Questions	DDC Responses
27	(Refer to Sketch RRC-RFI-012A) 1. This says "18" ST OUTFALL ON CONC CRADLE AND PILE SUPORTED" 2. Does the "PILE SUPPORT" extend this length along the 18 inch ST?	1. Drawing C-023 is revised in Addendum 2. The note should read "18" ST OUTFALL ON CONC CRADLE". 2. Revised Drawing C-032 is provided in Addendum #2. See Attachment D, Revisions to Drawings.
28	(Refer to Sketch RRC-RFI-012B) 3. Sketch RRC-RFI-012B does not show any pile support. Is there a reason it is not shown? 4. This does not show any pile support. Is there any pile support along here?	3. Revised Drawing C-032 is provided in Addendum 2. See Attachment D, Revisions to Drawings. 4. Revised Drawing C-032 is provided in Addendum 2. See Attachment D, Revisions to Drawings.
29	(Refer to Drawing C-042, Upper right corner) This detail is entitled "CONC CRADLE ON PILES DETAIL". Yet it does not show any piles support. Is there a reason it is not shown?	This detail is deleted in Addendum #2. Drawing C-042 is revised in Addendum #2. See Attachment D, Revisions to Drawings.
30	(Refer to Sketch RRC-RFI-012C) 6. Does this "CONC CRADLE" extend all the way to the STS 1? If not, where does it stop?	Revised drawings C-032 and C-033 are provided in Addendum 2. See Attachment D, Revisions to Drawings.
31	(Refer to Sketch RRC-RFI-012D) 7. Please provide further details on the dimensions of RRC-RFI-012D "CONC ENCASEMENT" 8. What is this? 9. To what does this dimension of "3" MIN" refer?	Revised Drawing C-032 is provided in Addendum 2. See Attachment D, Revisions to Drawings.
32	(Refer to Sketch RRC-RFI-013A) 1. Sketch RRC-RFI-013A is a 15" ST and 2. Sketch RRC-RFI-013A is a 10" ST that connects to it and 3. Sketch RRC-RFI-013A is a 10" ST that connects to it.  (Refer to Sketch RRC-RFI-013B) 4. Sketch RRC-RFI-013B says that Storm and Sanitary 12" to 30" shall be RCP Class V, so the 15" ST is RCP Class V 5. Sketch RRC-RFI-013B also says that Storm And Sanitary 6" to 10" shall be DI Class 56. Please provide details how to connect 10" DI to 15" RCP.	The piping schedule found in Section 02503 does not apply to storm piping shown on the P drawing series. Storm Piping shown on the P drawings shall comply with the piping schedule shown on P-080 and to specification Section 15160. (Note, however, that Specification Section 15160 does not apply to piping shown on the C drawing series.)  The piping schedule found in Section 02503 applies to the C drawing series.
33	Sheets R-051 and R-251 indicate both asphalt pavement and concrete deck with micro silica wearing surface at the MSE section of proposed ramp. Which is correct? Heavy duty or light duty pavement? Concrete deck thickness? Please clarify.	For Drawing R-051, asphalt pavement (heavy duty) is to be installed from station 10+65 to station 11+90, which is along the M.S.E.S wall limits minus the approaches. Concrete deck slab with micro silica wearing surface shall be installed at locations as called for in the drawing.

No.	Bidders' Questions	DDC Responses
		<p>For Drawing R-251, asphalt pavement (heavy duty) is to be installed from station 10+65 to 10 feet before the end of the M.S.E.S wall shown on drawing R-252. <b>The "CONCRETE DECK SLAB WITH MICRO SILICA WEARING SURFACE" callout located to the left of the matchline A-A on drawing R-251 will be deleted.</b> Change is reflected in Addendum 2 (see Attachment D, Revisions to Drawings). Concrete deck slab with micro silica wearing surface shall be installed at the truck scale as called out in the drawing R-251.</p> <p><b>In addition, for Drawing R-252, the precast barrier unit will terminate before the approach slab.</b> This is corrected in Addendum 2. See Attachment D, Revisions to Drawings.</p> <p>For all concrete deck thicknesses refer to the contract drawings.</p>
34	<p>Contractors Bid Schedule does not include the following:</p> <ol style="list-style-type: none"> <li>1. Marine Fendering</li> <li>2. Building Excavation</li> <li>3. New Steel Bulkhead</li> <li>4. Division 13-Special Construction</li> <li>5. Division 14-Conveying Systems</li> </ol>	<p>See Attachment C for revised section 01270 Measurement and Payment, and Attachment E for revised Bid Schedule and revised Contractor's Bid Schedule.</p>
35	<p>On drawing C-001, guidelines for removal of existing foundation piles are to extract any that interfere with new pile locations and cut 3' below final grade or building base slab elevation if they don't interfere. Spec 02316-5 calls for piles to be cut 18 inches below bottom new footings.</p>	<p>Requirements for removal of existing foundation piles are clarified in Addendum # 2 by revisions to Section 02316 and Drawing C-001. See Attachment C, Revisions to Specifications and Attachment D, Revisions to Drawings.</p>
36	<p>Drawing C-042 provides a section called "CONC CRADLE ON PILES DETAIL". It does not show or describe the piles, and we cannot find other references to piles underneath utilities in the bid documents. Please confirm if piles are required underneath any of the new utilities required for the contract.</p>	<p>Drawing is revised per Addendum 2. See Attachment D, Revisions to Drawings.</p>
37	<p>If possible, please provide estimated quantity (LF) of demolition of the following items located underneath the existing incinerator</p> <p>slab and referenced on Drawing C-001, Note 5: HVAC, Plumbing, Electrical, Piping,</p>	<p>The Contract Drawings already show the extent of the information available regarding these existing items.</p>

No.	Bidders' Questions	DDC Responses
	Valves, ductwork, Conduit, etc.	
38	The slab form work for stair "B" at Pier Level (on the exterior of the building) cannot be stripped after the pour. Please advise if backfilling to underside of slab is a feasible alternative, or if forms should be buried under pour. If forms buried, please specify void forms or regular soffit form work.	The exterior landings and access stair outboard of Column Line 17 and between Column Lines C and D may be constructed by backfilling the void to the underside of the reinforced concrete slabs.
39	On Drawing S-138, the stair slab shown at 7.00 does not show a concrete workmat or grade elevation on the drawing. Please confirm if this slab should be poured slab-on-grade with a 3" concrete workmat underneath it.	Confirmed. For this interior stair, a 3" concrete workmat shall be utilized beneath the lower stair slab at elevation 7.00 similar to the typical Pier Level slab at elevation 11.50.
40	On Drawing S-138, only one direction of the rebar mat for the slab at elevation 7.00 is specified (#6 @ 8"). Should the rebar in the other direction match the dowels called out (#7 @ 8"). Please confirm.	The call-out that reads "#6@8 T&B" shall apply to the reinforcing steel in both directions of both the top and the bottom reinforcing mats.
41	Drawing S-129 does not show a concrete workmat or grade elevation on the drawing. Please confirm if the slab should be poured slab-on-grade with a 3" concrete workmat underneath it.	The exterior landings and access stair outboard of the exterior Pier Level equipment platform may be constructed by backfilling the void to the underside of the reinforced concrete slabs.
42	Note on Drawing S-112 reads "9" x 1'-6" POCKET (6 THUS) SEE DWG S-126". Eight carriage rails are shown. Please confirm the correct quantity.	The note is revised by Addendum #2 to correctly identify the presence of eight (8) carriage rail pockets. See Attachment D, Revisions to Drawings.
43	Please refer to Drawing S-105. At the pilecaps along Lines "J" through "M", it seems the construction joints from the Pier Level Slab have been carried through to the caps. For the joint 6'-9 1/2" to the left of Line "4", it seems the joint would interfere with the pile layout in that area for Lines "J" and "M". Should the joint be moved over to accommodate the pile, and then also moved over at the slab level, or should the pile be shifted? Is there a minimum desired distance between center of pile and a construction joint?	It is acknowledged that the construction joint in the pile caps along Column Lines J and M fall on a proposed location for a new building pile. Due to embedded crane hardware above, this was found to be the most appropriate location for the construction joint through the pier structure. Since the pile cap reinforcement is continuous through the construction joint, the structural capacity is adequate to support the expected loads and the pile bearing will not be affected.
44	On Drawing C-030, Note 6 of "General Utility Notes", please clarify. We cannot envision any condition where the 18" vertical clearance (assumed when pipes cross) would not already be covered under the 10' horizontal clearance.	Note 6 on Dwg C-030 is revised by Addendum #2. See Attachment D, Revisions to Drawings.
45	On Drawing C-035, the coordinates provided for Stormwater Treatment System 2 don't	Coordinates are revised by Addendum #2. See Attachment D, Revisions to Drawings.

No.	Bidders' Questions	DDC Responses
	match up with its location on Drawings C-025 and C-027. They also don't match the orientation or the system, as the opposite corners have the same E/W coordinate. They are only 13'-4 9/16" apart, when they should be 17'-6", assuming 6" walls.	
46	On Drawing C-036, the coordinates provided for the Oil Water Separator don't match up with its location on Drawings C-025 and C-027. Also, the distance between the points is 16'-0 1/4" while the distance between corners of the slab is 17'-3 1/4".	Coordinates are revised by Addendum #2. See Attachment D, Revisions to Drawings.
47	On Drawing S-002, Detail #10 is for "Expansion Joint Detail at Walls and Slabs". There do not seem to be any expansion joints called out on the drawings, specifically within the substructure elements (pilecaps, grade beams, pier level slab, stairs, etc.). Is there any limit dimensionally to concrete beams, walls, or slabs before an expansion joint is required, or are we strictly following joints called out on the drawings?	All joints in reinforced concrete elements shall be placed as shown on the Contract Drawings or as dictated by the Contract Specifications. The standard structural detail of an expansion joint is included in the Contract Drawings to provide direction to the Contractor should a situation arise during construction which may necessitate the introduction of an expansion joint into a reinforced concrete element.
48	With regards to Specification 15810, Section 2.02 C states that "Unless otherwise noted, all duct and fittings shall be constructed per SMACNA's Duct Construction Standards (-6 inch W.G.) as shown in the latest edition of the Round Industrial Duct Standards, Chapter 11, Tables 11-5.1 minimum required gage based on bending loads and Table 11-5.1 minimum required gage for Class 5 Stainless Steel Spiral Pipe". Specification 15810 - Section 2.02 D states that "All fittings ends shall come factory equipped with a double lipped, U-profile EPDM rubber gasket." The double lipped, U-profile EPDM rubber gasket is not suitable for use in spiral duct built to the specified pressure class. Please provide an alternate construction standard or the name of a manufacturer who can provide the specified spiral duct construction.	There are at least two options to meet the specification requirements. They are as follows: 1. The SPIRAL HELIX SHG "self-sealing" dual wall gasket can be manufactured with the rolled edges. Delta Sheet Metal Corp. in Long Island City, NY is one of many potential manufacturers. They can be contacted at (718) 429 - 5805. 2. NORDFAB Ducting can manufacture the gasketed connection for spiral stainless steel ductwork. Either Application Associates (732 - 627 - 9400) or Bisco Enterprise (630 - 628 - 2454) can be contacted to help with this application. All of the connections come factory equipped with a double lipped U-profile EPDM rubber gasket suitable for the specified pressure class. The spiral ductwork gauge can be modified (with the engineer's approval) to meet the gasketed connection manufacturer's recommendations.
49	On Drawing S-011, the drawings call for 8" diameter pipes to be installed at eight feet on center in the existing receiving pit. What is the design intent of these pipes? Are they to remain strictly throughout the demolition and then removed, or are they to be permanent, reburied in backfill with the receiving pit slab (Elev. 2.00 through 3.50) placed on top of	The 8" diameter steel pipes are intended to brace the vertical walls of the existing receiving pit that become unsupported once the existing base slab is demolished. (The uncontrolled fill currently in the receiving pit is not assumed to offer any passive resistance against the structural backfill assumed to be present outside of the pit.) The pipe struts are permanent and shall be left in place when the

No.	Bidders' Questions	DDC Responses
	them?	upper portion of the receiving pit is backfilled prior to construction of the box-beam structure to span the Pier Level slab over the pit.
50	Addendum to the General Conditions, Item V, "Applicability of Articles and Amended Articles" states a number of the articles in the General Conditions as "Applies as amended". We understand that to mean the existing General Conditions for the Contract have had those Articles already amended and should be followed as written. Please confirm. Likewise if the articles "Does Not Apply", it can be struck from the existing General Conditions. Please confirm.	See page 4 of the <i>Addendum to the General Conditions</i> for a description of amended articles. Articles listed as "Does Not Apply" are deleted from the existing General Conditions.
51	On Drawing S-610, what is the depth of the anchor slab, 24" (as per Section 3) or 18" (as per Section 1)?	The depth of the oil/water separator anchor slab shall be 18" as shown in Section 1 on Contract Drawing S-610.00. The erroneous dimension on Section 3 of the same drawing is removed by Addendum #2. See Attachment D, Revisions to Drawings.
52	Referring to Drawing S-610, the specifications call out select fill backfill while the plans call out pea gravel backfill for the oil-water separator. Please confirm which type is required.	Pea Gravel shall be placed between the Oil Water Separator and the concrete slab as shown on Drawing S-610.
53	In reference to Section 02317, "Backfilling". Right now the specification calls out the products Select Fill and Common Fill. Common Fill is further divided into Granular Materials and Cohesive Materials. It is not clear where these materials are required. In the MSE overcut you call out Structural Backfill. Is that Select Fill or Granular Material? Please provide a specification for Structural Backfill.	Specification Section 02317 states in <u>Part 3.06 STRUCTURE BACKFILL, Paragraph B. Use of Select Fill</u> : "Use select fill underneath all structures ...". Therefore where STRUCTURAL BACKFILL is called out on the plans use Select Fill.
54	What Structural Backfill specification do you require for the "MSE" walls?	Specification Section 02317 states in <u>Part 3.06 STRUCTURE BACKFILL, Paragraph B. Use of Select Fill</u> : "Use select fill underneath all structures ..." Where STRUCTURAL BACKFILL is called out on the plans use Select Fill.
55	On Specification Page 02741-5, please clarify your specification for "Bottom Course." Is this City DOT or State DOT? It appears to have been mixed up.	In specification page 02741-5, section B, Bottom Course; paragraph refers to "NYCDOT, Bureau of Highway Operations Standard Specifications, Section, Section 403 2.02, Aggregate-Coarse". The section "403 2.02" is incorrect. The correct section is 2.02. Specification 02741 is revised in Addendum #2 to refer to the correct NYCDOT

No.	Bidders' Questions	DDC Responses
		specification section. See Attachment C, Revisions to Specifications.
56	Regarding the MSE Wall Construction, what is the material specification for "Compacted Embankment Backfill" shown on Drawing R-218? Section 02317 does not call this out.	<p>In drawings R-018 and R-218, detail " TYPICAL M.S.E.S SECTION 1" the callout "Compacted Embankment Backfill" is deleted and replaced with "Select Fill" in Addendum #2. See Attachment D, Revisions to Drawings.</p> <p>For other locations where Compacted Embankment Backfill is called for: Specification Section 02317 states in <u>Part 3.08 EARTH EMBANKMENTS, Paragraph A.</u> "Make all earth embankments of approved cohesive common fill material." Therefore where COMPACTED EMBANKMENT BACKFILL is called out on the plans use Common Fill, Cohesive Materials.</p>
57	Regarding Drawing R-218, what asphalt pavement section is required above the MSE Wall?	See "TYPICAL HEAVY DUTY ASPHALT" detail on drawing C-041.
58	Sheet A-201 at the entry door is shown what looks like a DSNY logo plaque and lettering. We found no details or dimensions. Please clarify.	Details C2 and C4 on sheet A602 show sign and text to be used at main entrance. Same logo and text is to be used at location in question. Scale down text and sign provided to satisfy design intent shown on drawing A-201.
59	The purpose of this RFI is to clarify the steel piling coating requirements and confirm the properties of the welded double king pile as shown in the project plans. LB Foster is an integrator and supplier of the Combi-wall system as shown on the plan page S.-800 to S.-804. The Double PSp 900 King Piles derives its Section Modulus and MOI properties utilizing a welded connection with the locking bars. For the greatest project economy and quality, the assembly of this double box beam king pile is to take place at the producing mill per the manufacturer's recommendations. Key to this strength and published values is that the Double King Pile locking bar is a welded connection, compared to the mechanical interlock connection between the sheet piles interlocks. The joint connection is reflected under 09967 Coating for Steel Waterfront Structures section 3.5 (A through F). Requirement C. states "Coat all exposed steel surfaces of fender piles and ladders after completion of steel fabrication, including surfaces to received timber contact panels". Please confirm that due in part to the	The interior king pile cavity need not be coated. Each double king pile should be coated externally as a unit after fabrication. An addendum will specify casting a 2 foot deep concrete plug on top of each double king pile cavity after driving, cut-off and coating touch-up, to seal the cavity.

No.	Bidders' Questions	DDC Responses
	<p>manufacturing process that the inside of the double king pile box is excluded from coating requirements. This portion of the King Pile is not exposed to the outside elements of the Combi-wall system. The inside of the King Pile behaves much like the inside diameter of pipe pile, which rarely requires a coating system applied to the inside of the pipe. Please clarify and confirm the inside of the box double King Pile does not require coating.</p> <p>Please clarify and confirm in responses to bidding contractors that the interlocking bar between King Piles requires a welded connection.</p>	<p>The interlocking bars between king piles require welded connections, as explicitly detailed on drawing S-802.</p>
60	<p>The Con Ed Drawings included with the bid documents do not match the drawings listed in Schedule B of the Supplemental General Conditions. Please provide the drawings listed in Schedule B if they are to be part of this scope of work.</p>	<p>Schedule B of the Addendum to the General Conditions does not contain any reference to Con Ed. However, Schedule C does contain a drawing list which has several incorrect titles for these drawings. This Schedule C is revised in Addendum #2. See Attachment B, Revisions to the Addendum to the General Conditions. Please clarify your question if you were not referring to Schedule C.</p>
61	<p>Is the General Contractor responsible to rig and set the transformers in the block house or will Con Ed perform this operation?</p>	<p>The Contractor shall receive (units delivered to the property line by ConEdison), insure, transport, store (if needed), protect, install and connect and test the Utility transformers in accordance with the applicable Con Edison requirements. Refer to section 16210 Electric Service and drawing E-432 Division of Responsibility.</p>
62	<p>Sheet C-026.00 shows a structure SW of STMH-5. Is this structure STS #3? Is this an existing structure? Please clarify.</p>	<p>Drawing C-026.00 is revised in Addendum 2. The structure southwest of STMH-5 is storm water treatment unit 3. Details for the unit are provided on revised Drawing C-035 of Addendum #2. See Attachment D, Revisions to Drawings.</p>
63	<p>Per project S216-399A - Southwest Brooklyn Marine Transfer Station-Building Construction, our company is interested in the construction of the barges that will be necessary for transport of waste to this facility. Could you please provide an estimated timeline of this project? Most notably, (1) could you please provide the anticipated release date of a solicitation for the vessel construction, (2) the number of vessels that would be procured for this effort, (3) potentially the desired specifications of the barges needed, and (4) and estimated delivery</p>	<p>Procurement and construction of barges is not included in this contract. DSNY is currently nearing completion of the barge procurement process with barge vendors.</p>

No.	Bidders' Questions	DDC Responses
	schedule? We are eager to participate in this project and provide pricing for the transport of this waste.	
64	<p>1. Addenda #1 missing drawings A113.01, A114.01, A115.01, A141.01, A147.01, A900.01, R102.01, R302.01, M124.01, M216.01, P020.01 &amp; P063.01. Please provide.</p> <p>2. Schedule A from PLA missing, Please provide.</p> <p>3. Dwgs S701, S702 and S703 referred to. Please provide.</p>	<p>1. These drawings were mailed to purchasers of bid documents. Also, these drawings are now available on the website of New York City Department of Design and Construction (DDC) as of 9/18/12.</p> <p>2. Revised Schedule A is included in Addendum #1.</p> <p>3. Please clarify your question - references to Drawings S701, S702 and S703 could not be found.</p>
65	Can you please provide the Umbrella Liability Insurance Requirements, if any, for this project?	Insurance requirements are provided in the bid document Refer to Schedule A and Article 22 of the Contract for insurance provision requirements.
66	<p>{Drawing C-044.00, Bilge Water Hydrant Detail}</p> <p>This says "3" COUPLER W/ELBOW SWIVEL SEE SPECIFICATIONS". Please advise what specification. This says "3" ADAPTER (VALVE) SEE SPECIFICATIONS". Please advise what specification.</p> <p>2. This says "3" Female NPT x CAM AND GROOVE ADAPTER (HOSE CONNECTION)" and "3" MALE NPT X CAM AND GROOVE ADAPTER". Please provide assembly detail as to how these pieces connect to 'swivel'.</p>	<p>See Section 02081-6 Fire Hydrants, Post Hydrants and Appurtenances, Part 2.04.</p> <p>2. Swivel function is provided by the COUPLER W/ELBOW SWIVEL.</p>
67	Is the sign/plaque identified on Drawing A-201 located near the building entry part of this contract? If so, can you please provide the details for this sign/plaque identified on Drawing A-201 located near the building entry? Please provide sign type, sign dimensions, mounting details, and a specification, etc.	See response to Question 61.
68	Tag number 124-2 hardware set 10A is not in section 08711-20. Tag number 314-2 hardware set 18B is not in section 08711-20.	Hardware requirements are clarified in Addendum #2 by updating the Door Hardware Sets in Section 08711 and by clarifying the Door Schedule on Dwg A-604. See Attachment C, Revisions to Specifications and Attachment D, Revisions to Drawings.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT B – ADDENDUM TO GENERAL CONDITIONS**

1. Addendum to General Conditions, Amended Articles, Page 4 of 50. Revise “Article 1.26 Security Guards/Fire Guards on The Site is replaced with Section 01561 Site Security” to read “Article 1.26 Security Guards/Fire Guards on The Site is amended to include Section 01561 Site Security”.
2. Addendum to General Conditions, Schedule C – Contract Drawings, Page 18 of 50
  - a. For Sheet Number 34, Drawing Number C-034, revise "CONNECTION TO EXISTING BOX CULVERT" to read "SECTIONS".
3. Addendum to General Conditions, Schedule C – Contract Drawings, Page 28 of 50
  - a. For Sheet Number 644, Drawing Number E-339, revise "#343580, TRANSFORMER VAULT SECTIONS" to read "NOT USED".
  - b. For Sheet Number 645, Drawing Number E-340, revise "#343581, TRANSFORMER VAULT SECTIONS AND DETAILS" to read "NOT USED".
  - c. For Sheet Number 646, Drawing Number E-341, revise "#343582, DIVISION OF RESPONSIBILITY" to read "NOT USED".
  - d. For Sheet Number 647, Drawing Number E-342, revise "#343583, TRANSFORMER VAULT STRUCTURAL 1 OF 3" to read "CON EDISON DRAWING 343606-0-1 DIVISION OF RESPONSIBILITY".
  - e. For Sheet Number 648, Drawing Number E-343, revise "#343584, TRANSFORMER VAULT STRUCTURAL 2 OF 3" to read "CON EDISON DRAWING 343603-0-1 TRANSFORMER ENCLOSURE LAYOUT".
  - f. For Sheet Number 649, Drawing Number E-344, revise "#350764, MANHATTAN STRUCTURAL 3 OF 3" to read "CON EDISON DRAWING 343604-0-2 TRANSFORMER ENCLOSURE LAYOUT SECTION".
  - g. For Sheet Number 650, Drawing Number E-345, revise “#351052 PHYSICAL TRANSFORMER CONNECTION & NETWORK PROTECTOR INSTALLATION (PLAN)” to read "CON EDISON DRAWING 343605-0-1 TRANSFORMER VAULT DETAILS".
  - h. For Sheet Number 651, Drawing Number E-346, revise “#351053 PHYSICAL TRANSFORMER CONNECTION & NETWORK PROTECTOR INSTALLATION (SECTION A-A)” to read "CON EDISON DRAWING 343607-0-0 STRUCTURAL 1 OF 4 SECTION".
  - i. For Sheet Number 652, Drawing Number E-347, revise “#351054 PHYSICAL TRANSFORMER CONNECTION & NETWORK PROTECTOR INSTALLATION (SECTION B-B, C-C, D-D, E-E)” to read "CON EDISON DRAWING 343608-0-0 STRUCTURAL 2 OF 4 SECTION".
  - j. For Sheet Number 653, Drawing Number E-348, revise “#351055 PHYSICAL TRANSFORMER CONNECTION & NETWORK PROTECTOR INSTALLATION (DETAILS)” to read "CON EDISON DRAWING 350765-0-1 STRUCTURAL 3 OF 4 SECTION".
  - k. For Sheet Number 654, Drawing Number E-349, revise “#351056 PHYSICAL TRANSFORMER CONNECTION & NETWORK PROTECTOR INSTALLATION (DETAILS 30 THRU 38)” to read "CON EDISON DRAWING 350766-0-0 STRUCTURAL 4 OF 4 SECTION".

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT C – REVISIONS TO THE SPECIFICATIONS**

**Specification Section 01270 Measurement and Payment, Page 01270-1**

1. Part 1.02.A: Revise this part to read "Lump Sum Bid Item 1 (a) through (m) will constitute full compensation for all work and costs to complete the Project, with the exception of the other lump sum bid items, unit price bid items and allowances. Any work not specifically included in other Bid Schedule Lump Sum Items, Bid Schedule Unit Price Items, or Bid Schedule Allowances will be deemed included in Lump Sum Bid Item 1. Any work not specifically itemized in Lump Sum Bid Items 1 (a) through (l) will be deemed included in the Lump Sum Bid Item 1 (m)."

**Specification Section 01561 Site Security, Pages 01561-1**

2. Part 1.02.A: Revise this part to read "Comply with the requirements of General Conditions Article 1.26."
3. Part 1.03: Revise "ADDITIONAL SECURITY" to read "ADDITIONAL SECURITY REQUIREMENTS".
4. Part 1.03.A: Revise this part to read "Any security services furnished by the Contractor shall meet the requirements of the New York State Security Guard Act of 1992."
5. Part 1.03.B: Delete this part in its entirety.

**Specification Section 02316 Excavation, Page 02316-5**

Part 3.01.D.3: Revise to read "Whenever abandoned existing piles are encountered during excavation, they shall be demolished in accordance with Section 02222 – Demolition and Removals, unless otherwise indicated on the Contract Drawings."

**Specification Section 02371 Dust, Soil Erosion and Sedimentation Control, Pages 02371-1 through 02371-10**

Delete Section 02371 in its entirety and replace with new Section 02371, a copy of which is attached hereto.

**Specification Section 02457 Steel Sheet Piles, Page 02457-9**

Part 3.03L: In the second sentence, delete "on the piers".

**Specification Section 02741 Asphaltic Concrete Pavements, Page 02741-5**

Part 2.02.B. Revise "NYCDOT, Bureau of Highway Operations Standard Specifications, Section 403 2.02" to read "NYCDOT, Bureau of Highway Operations Standard Specifications, Section 2.02"

**Specification Section 08342, Overhead High Speed Fabric Doors, Page 08342-6**

Part 2.02.E.3: Revise to read as follows:

- "3. Provide covers at jamb mechanisms with swinging service panels. Lift-off panels will be allowed as required by adjacent curbs, rails or other obstructions."

**Specification Section 08711 Door Hardware, Page 08711-24**

Add the following "HS10A" before "HS11":

HS10A

Specification Section 11141 Diesel Fuel Dispensing Piping

1. Page 11141-1, Part 1.01.B: Replace "with integral pumps and meters" with ", submersible turbine pumps"
2. Page 11141-2
  - a. Part 1.04.A.1: Delete "Design a".
  - b. Part 1.04.B.1: At the end of this paragraph insert the following:
 

"a. Fuel system components shall be listed and approved by a third party testing laboratory for the types of fuels required herein."
3. Page 11141-4
  - a. Part 1.05.F: After this section insert the following:
 

"G. Submit proof of UL or other independent testing laboratory listing with submittal of equipment. Documentation shall show listed fuel compatibility as reviewed by third party testing laboratory."
  - b. Part 1.06.c: After this section insert the following:
 

"D. Furnish a list of additional items recommended by the manufacturer to assure efficient operation at this particular installation. Parts shall be completely identified with a numerical system to facilitate parts inventory control and stocking. A separate number shall properly identify each part."
4. Page 11141-7
  - a. Part 2.02.A.4: Replace "dispenser" with "fuel storage tank".
  - b. Part 2.02.B.1: Revise this part to read: "Weatherproof, lockable access door with continuous piano type hinge."
  - c. Part 2.02.B.5: Delete "per Section 15112 – Valves Smaller than 4 Inches"

- d. Part 2.02.B.6: Revise this part to read "20-gallon capacity spill catch pan with leak detector and one (1) gpm hand pump for spill removal with shutoff and check valves"
- e. Part 2.02.B.7: After this section insert the following:

"8. NEMA 4X rated"

- 5. Page 11141-8, Part 2.03.A.1: Delete ", gasoline, 85% ethanol (E85) and biodiesel (B20)"
- 6. Page 11141-9, Part 2.02.C.1: Delete ", fully removable," and "Hinges on access door shall not be acceptable".
- 7. Page 11141-12
  - a. Part 2.06.B: Delete "for diesel fuel".
  - b. Part 2.06.C: Delete "Section 15052, steel and stainless steel pipe and".
  - c. Part 2.06.G: Revise "tank s" to read "tanks".
  - d. Part 2.06.H: After this section insert the following:

"I. All fuel lines running through the building shall be encased in reinforced concrete as shown.

J. Piping shall be installed in accordance with manufacturer's recommendations and Section 15191 – Diesel Fuel Piping."

#### Specification Section 13851 Fire Alarm and Detection System

- 1. Page 13851-6, Part 1.06B.1.k: After this part, insert the following:

"1. Send an alarm signal to the Gas Safety Shut-Off Valve."

- 2. Page 13851-7, Part 1.06.F.3: After this part, insert the following:

"4. The system shall also provide a Post Fire Smoke Purge capability to enable the FDNY to operate fans so as to clear smoke from the building after a fire has been suppressed."

- 3. Page 13851-17, Part 2.03A: Revise the first sentence to read as follows:

"A Purge Panel shall be provided to allow for a "post Fire Smoke Purge" by the Fire Department."

#### Specification Section 13915 Fire-Suppression Piping

- 1. Page 13915-1, Part 1.02L: After this part, insert the following:

"M. Section 15771 – Heat Tracing System  
N. Section 15140 – Domestic Water Piping"

- 2. Page 13915-2, Part 1.03A.16: After this part, add the following:

"17. City of New York Local Law 58/09  
18. City of New York Local Law 63/09"

- 3. Page 13915-3

- a. Part 1.05C.2.d: After this part, insert the following:

- "e. Fire Protection and Plumbing Room: Ordinary Hazard Group I"
  - b. Part 1.05C.3.d: After this part, insert the following:
    - "e. Fire Protection and Plumbing Room: 130 sq.ft.
4. Page 13915-5, Part 1.07F: In the second line, after "Building Code of the City of New York" insert ", NFPA 14".
5. Page 13915-6
  - a. Part 1.07G:
    - (1) After "new sprinkler" insert "and standpipe".
    - (2) After "test connections" insert ", fire hoses".
  - b. Part 1.08A: After "equipment" insert "monorails, soffits".
6. Page 13915-9, Part 2.03A: After "180 deg F" insert ", UL-listed or FM approved".
7. Page 13915-10, Part 2.04A: After "system fluid" insert ", UL-listed or FM approved".
8. Page 13915-17, Part 2.09A.3.a: After "UL listed" insert "or FM approved".
9. Page 13915-18
  - a. Part 2.09A.3.b: After "F-AIC-01" insert "F-AIC-02".
  - b. Part 2.10.B: After this part, insert the following:

"C. Corrosion-resistant sprinklers shall be installed in areas exposed to atmospheric and other corrosive conditions."
10. Page 13915-21, Part 2.11D: Revise "UL approved" to read "UL-listed or FM approved".
11. Page 13915-28, Part 3.10M: After "NFPA 13" insert ", structural specifications".
12. Page 13915-30, Part 3.10V: After this part, insert the following:

"W. Corrosion protective coating shall be applied to all unprotected exposed surfaces of the wet and dry sprinkler systems and standpipe system."
13. Page 13915-31, Part 3.12A.2: Delete "Pendent sprinklers".

Specification Section 13921 Electric-Drive, Centrifugal Fire Pumps

1. Page 13921-1, Part 1.02A-F: Revise to read as follows:
- A. Section 07842 - Fire Resistive Joint System
  - B. Section 09912 - Interior Painting
  - C. Section 10520 - Fire-Protection Specialties
  - D. Section 13851 - Fire Alarm and Detection Devices
  - E. Section 13915 - Fire Suppression Piping
  - F. Section 13953 - Foam/Water Fire Suppression System
  - G. Section 15060 - Hangers and Supports
  - H. Section 15076 - Piping and Equipment ID
  - I. Section 16060 - Grounding

J. Section 16121 - Wires and Cables 600 Volts and Below"

2. Page 13921-5, Part 2.01D.1: Revise "F-FP-01" to read "F-FRP-01".

Specification Section 13953 Foam/Water Fire-Suppression System

1. Page 13953-1, Part 1.02A: Revise "07582" to read "07842".
2. Page 13953-2
  - a. Part 1.03O: After this part, insert the following:

"P. City of New York Local Law 58/09  
Q. City of New York Local Law 63/09"
  - b. Part 1.04A: After "AFFF" insert "(aqueous film forming foam)".
3. Page 13953-7
  - a. Part 2.02A.2: Revise "polymerr" to read "polymer".
  - b. Part 2.02A.5: After this part, add the following:

"6. 55-Gallon Drums Foam Concentrate: Provide 4 (four) 55-gallon drums of 3% AR-AFFF Foam Concentrate to allow tank to be refilled after testing."
4. Page 13953-8, Part 2.04D: After "temperatures" insert "and corrosion conditions".
5. Page 13953-11, Part 2.08A: After "180 deg F " insert "UL-listed or FM approved".
6. Page 13953-12, Part 2.09A: After fluid insert "UL-listed or FM approved".
7. Page 13953-17
  - a. Part 3.05J: Revise to read as follows:

"J. Hangers and Supports: Comply with NFPA 13, structural specification and Specification Section 15060 for stainless steel hanger materials. All hangers and supports shall be UL listed or FM approved, stainless steel and double nutted.

    1. Install sprinkler piping according to NFPA 13 and NFPA 16."
  - b. Part 3.06A: After "Install" insert "UL-listed or FM approved".
8. Page 13953-18, Part 3.07A.1: After this part, insert the following:

"2. Install corrosion-resistant sprinkler heads in Foam-Water Fire Suppression System."

Specification Section 14511 Container Transport System

1. Page 14511-4, Part 1.04E.5. After this part, add the following:

"6. The shuttle's battery system will be sized to operate for a full 16 hours with or without opportunity charging."
2. Page 14511-6, Part 2.01A: Revise to read as follows:

"A. Acceptable manufacturers are listed below. Other manufacturers of equivalent products may be submitted for approval.

1. Jervis B. Webb, Farmington Hills, Michigan (formerly Mentor AGVS)
  2. Bruno Engineering, PC, Price, Utah
  3. Or approved equal"
3. Page 14511-9, Part 2.02B.7.a: Delete the words "and be".

Specification Section 14601 Container Lidding System

1. Page 14601-4, Part 1.08A.4: Delete "and be packaged separately for each of the two stations".
2. Page 14601-6, Part 2.02A.17: After "handrail" insert "with toe plate".
3. Page 14601-10
  - a. Part 2.02B.8: After "mounted on the" insert "top of the".
  - b. Part 2.02B.9.b: Revise "position" to read "station".
  - c. Part 2.02B.9.g.(1): Revise "twist-loc" to read "twist-lock".
4. Page 14601-12, Part 3.01D: in the eighth line, revise "contractor" to read "Contractor".

Specification Section 14696 Mooring Capstans

1. Page 14696-4, Part 2.02E.4: Revise "45 FPM single speed" to read "35 FPM variable speed".
2. Page 14696-6, Part 3.01B.3: Revise "zero speed" to read "no specified speed".

Specification Section 15121 Pipe Expansion and Seismic Fittings

Page 15121-3, Part 2.01C: Delete this part in its entirety.

Specification Section 15190 Fuel Gas Piping, Page 15190-4

1. Part 2.01A.6.b: Delete this part in its entirety.
2. Part 2.01A.6.c: Delete this part in its entirety.

Specification Section 15540 Fuel Fired Heaters

1. Page 15540-3, Part 2.02B.1: Revise to read as follows:

"1. The gas heat section shall be natural gas, indirect fired and shall be completely factory assembled, wired and tested at the factory before shipment. The indirect gas heater consists of the heat exchanger, power burner, gas train, flame management controls and control panel. The entire section shall bear a UL or CUL label for Commercial-Industrial Gas Heating Equipment (ANSI / UL Standard 795) and Industrial Gas-Fired Package Furnaces (CGA Standard 3.2-1976). It shall have double wall construction with fiberglass insulation and a burner access door on the same side as the fan motor access. All burner and control components shall be housed in the burner vestibule complete with a combustion air intake louver. It is an integral part of the entire air-handling system."

Specification Section 15900 HVAC Controls

1. Page 15900-8, Part 2.02A.2: Revise to read as follows:

- “2. Coordinate power and wiring requirements for all equipment provided under Division 15 with Division 16.”
2. Page 15900-9, Part 2.02B: Revise to read as follows:
- “B. Provide all power wiring, control wiring and communication wiring, associated conduit, transformers and appurtenances interconnecting all equipment provided under Division 15, except as specifically specified to be provided otherwise, including but not limited to the following:”
3. Page 15900-9, Part 2.02C: Revise to read as follows:
- “C. Provide all equipment, control wiring, communication wiring and associated conduit, transformers and appurtenances interconnecting the following equipment provided under Division 15.”
4. Page 15900-9, Part 2.02D: Revise to read as follows:
- “D. Wiring and associated conduit for the following equipment provided by Division 15 is provided under Division 16.”
5. Page 15900-10, Part 2.02E: Revise to read as follows:
- “E. Provide power equipment and control wiring terminations in the TCP under Division 15. Control wiring and conduit between the MCC and TCP is provided under Division 16.”
6. Page 15900-10, Part 2.02F: Revise to read as follows:
- “F. Power, control and communications wiring and associated conduit interconnecting certain pieces of equipment provided under Division 15 to certain pieces of equipment provided under Division 16 are provided under Division 16.”
7. Page 15900-9, Part 2.02G.1: Revise to read as follows:
- “1. The communication wiring and conduit between TCP(s), and SCADA System is provided under Division 16.”
8. Page 15900-45, Part 3.03JA.2: Change the word “Foreman’s” to read “Supervisor’s”.

Specification Section 16060 Grounding, Page 16060-3

Part 2.04B: After this part, insert the following:

“2.05 EXPOSED REFERENCE GROUND BUS

- A. Provide copper bar of ¼” x 2” dimension where indicated.
- B. Provide insulated standoffs to securely fasten and support the ground bar from the wall or other surface where they are located.

- C. Use two hole Elugs and permanent connection to same from grounding electrode conductors and bonds."

Specification Section 16210 Electric Service

1. Page 16210-1, Part 1.04B: Revise to read as follows:

"B. The facility services will continue from EMH-1A and EMH-1B through manholes EMH-2A & 2B, respectively, and on to the MTS building. They shall extend, as shown on Contract Drawings. Upon entering the footprint of the facility they will run under the pier level, above the pit topping slab, below the grade and support beams, to Electric Room 1- where they will terminate in the Utility structures at each end of the Facility main switchgear."

2. Page 16210-2, Part 1.04C: Revise to read as follows:

"C. Primary, medium voltage feeders shall extend from the property line Manholes EMH-1 & EMH-2, respectively, to the termination at the Utilities transformers which are located in the Blockhouse."

Specification Section 16230 Packaged Engine Generator Systems

1. Page 16230-1

- a. Part 1.01A: Revise "750kW" to read "900kW".  
b. Part 1.02.8: After this part, insert the following:

- "9. Section 16443 – Panelboards  
10. Section 16460 – General Purpose Dry Type Transformers  
11. Section 16491 – Control Components and Devices"

2. Page 16230-2

- a. Part 1.03A.10: After this part, insert the following:

"11. FEIS - DSNY Final Environmental Impact Study

- b. Part 1.04B: Revise "750 kW" to read "900 kW".

3. Page 16230-5

- a. Part 2.01A.4.b: After this part, add the following:

"c. Simplx"

- b. Part 2.01A.5.c: After this part, add the following:

"d. Robinson"

4. Page 16230-6, Part 2.02A.6: Revise the last sentence to read:

"Exhaust noise and other enclosure noises shall be within the limits set by the NYC Noise Control Ordinances and the DSNY FEIS."

5. Page 16230-7, Part 2.02B.1: Revise "750 kW, 937 kVA" to read "900 kW, 1125 kVA".

6. Page 16230-8, Part 2.02D.1 through Part 2.02D.3: Revise to read as follows:
  - “1. Provide one low-voltage, power circuit breaker rated at 1400T/1600F amperes at 480 volts, 3-phase, 60-hertz to serve the 480 main switchgear B bus.
  2. Provide one low-voltage, power circuit breaker rated at 600T/ 800F amperes at 480 volts, 3-phase, 60-hertz to serve the fire pump controller automatic transfer switch. Install in an enclosure separated by 12” minimum from the non-emergency loads in the output panel enclosure.
  3. Provide one 700T/800F amperes low voltage power circuit breaker rated at 480 volts, 3-phase, 60-hertz to serve the Load Bank.”
7. Page 16230-9, Part 2.02D.6. Revise to read as follows:
  - “6. Provide instrument and relay current transformers and potential transformers as required within the structure housing the circuit breakers.”

Specification Section 16443 Panelboards

1. Page 16443-2, Part 2.02B: Delete the sentence “The total number of overcurrent protective devices shall be limited to 42 single pole connections or the equivalent multi-pole load.”
2. Page 16443-2, Part 2.02B.1: Delete the word “Provide”.
3. Page 16443-3, Part 2.02B.7. Revise to read as follows:
  - “7. Provide a Fused Cut Out Panel (FCO) of the type required by the NYCEC and the FDNY for emergency power supply to the Building Wide Alarm System Loads.”
4. Page 16443-4, Part 2.03H: After this part, insert the following:

“2.04 FUSES

  - A. Provide 120 volt fuses for branch circuit application in the FCO panel. Fuse interrupting ratings shall be 10,000 amps.”

Specification Section 16445 Motor Control Centers

1. Page 16445-5, Part 2.01A.2: Revise “Transient Voltage Surge Suppression (TVSS)” to read “Surge Protective Devices (SPD)”.
2. Page 16445-8, Part 2.02E.8: Revise to read as follows:
  - “8. Provide communication cables from the microprocessor-based metering system and microprocessor-based overload protection systems as well as cables for monitoring the status of SPDs to a single terminal block located in the incoming line structure.
  9. Provide terminals for all external control or monitoring functions at each starter or circuit protective device (MCP or MCCB).”
3. Page 16445-9
  - a. Part 2.02F.5: Revise to read as follows:

“5. Equip each starter with seal in and all required auxiliary contacts.”

b. Part 2.02G. At the end of this part, add the following:

“Base interrupting rating on assembled equipment nameplate per recognized standards.”

4. Page 16445-10, Part 2.02I. Revise the last sentence to read as follows:

“No Q or G frame or miniature circuit breakers will be accepted.”

5. Page 16445-11, Part 2.02L. At the end of this part, add the following:

“Devices shall be “Machine Tool Rated”.

6. Page 16445-12, Part 2.02P: Revise to read as follows:

“P. Wiring Schematic: Provide a schematic wiring diagram of each unit and affix it to the inside of the door of that unit. Schematic shall include all devices, internal and external to the unit and motor control center and all required terminations for control and monitoring. Tag all terminals with number and description.”

Specification Section 16600 Lighting Controls, Pages 16600-1 through 16600-14  
Insert new Section 16600 Lighting Controls, a copy of which is attached hereto.

Specification Section 16745 Telephone System

1. Page 16745-2, Part 1.05D: After this part, insert the following:

“E. The Owner shall contract with the telephone/data utility for service to the MTS and for T-1 Head-End equipment and Instruments. The Contractor shall supply site preparation for the Head End equipment, all in site complex distribution, including raceway, boxes and cabinets, wiring per the applicable Div 16 specification.

F. In addition to the VOIP and Data distribution the Contractor shall install “Hard Wired” instruments and copper conductors to independent outside lines. The Owner shall arrange for these “Outside-Direct Lines” and those instruments with the Utility supplier.”

2. Page 16745-5, Part 2.01A.1: Delete this part in its entirety.

3. Page 16745-7, Part 2.03A. Revise “Supply Systems” to read “Supplies”.

4. Page 16745-9, Part 2.07: Revise “PERSONNEL AREA SERVER ROOM EQUIPMENT RACKS” to read “SERVER ROOM EQUIPMENT RACKS”.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT D – REVISIONS TO THE DRAWINGS**

**REFER TO DRAWING C-001.00**

1. Revise the first line of General Note 12 to read “EXCEPT WHERE INDICATED ON OTHER CONTRACT DRAWINGS, REMOVAL OF EXISTING FOUNDATION PILES SHALL BE AS FOLLOWS:”
2. Revise General Note 12.b to read “ “STEEL OR TIMBER PILES NOT INTERFEREING WITH FOUNDATION PILE LOCATIONS FOR NEW WORK SHALL BE EXTRACTED AS ABOVE OR CUT AS SPECIFIED IN SECTION 02222 – DEMOLITION AND REMOVALS.”

**REFER TO DRAWING C-002.00**

**ATTACHMENT E – REVISIONS TO THE BID BOOKLET**

1. MWBE PROGRAM SUBCONTRACTOR UTILIZATION PLAN, page 5 of the Bid Booklet:

The following text is added to this page:

“The current Mayor’s Office of Contracts’ List of Services memo outlines the procurement categories for various subcontracted services. Services that are procured under “Standard Service” do not count toward either TSP or MBE participation goal requirements for this construction project.”

2. Delete Bid Schedule page 13-0 of the Bid Booklet and replace with revised Bid Schedule page 13-0-R, included with this Addendum.
3. Delete Contractor’s Bid Schedule pages 13-1, 13-2 and 13-3 of the Bid Booklet and replace with revised Contractor’s Bid Schedule pages 13-1-R, 13-2-R and 13-3-R included with this Addendum.

PROJECT ID: S216-399A

## BID SCHEDULE

**Submission:** Bidders are advised that the requirement to submit a Bid Schedule applies to the contract for which an "X" is indicated before the word "Yes". If required, the bidder must submit, with its bid, a completed Bid Schedule. Failure to provide a completed Bid Schedule may result in rejection of the bid as non-responsive.

      X       YES                      NO

### Instructions for Preparing Bid Schedule:

- (A) The following bid prices on the Bid Schedule are to be paid for the actual quantities of the item numbers in the completed work or structure, and they cover the cost of all work, labor, material, tools, plant and appliances of every description necessary to complete the entire work, as specified, and the removal of all debris, temporary work and appliances.
- (B) In preparing its Bid Schedule, the bidder shall submit prices that include all costs for overhead and profit. Overhead shall include, without limitation, all costs in connection with the following: administration, management, superintendence, small tools, insurance, and bonds.
- (C) The Agency may reject a bid if it contains unbalanced bid prices. An unbalanced bid is considered to be one containing lump sum or unit items which do not reflect reasonable actual costs plus a reasonable proportionate share of the Bidder's anticipated profit, overhead costs, and other indirect costs, anticipated for the performance of the items in question.
- (D) The bidder shall refer to section 01270, Measurement and Payment for specific explanation of Bid Schedule Items, and Attachment C, Addendum 2 for revised Article 1.02 A) of Section 01270, Measurement and Payment.

**PLEASE BE SURE A LEGIBLE BID IS ENTERED FOR EACH ITEM.**  
**THE BIDDER SHALL INSERT THE TOTAL BID PRICE ON**  
**THE BID SCHEDULE ON PAGE 13-R OF THIS BID BOOKLET**

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT F – REVISIONS TO VOLUME 2**

**Volume 2:** Volume 2 of the Bid and Contract Documents is amended to include the Notice to Bidders/Proposers (page 1 of 2 to this Addendum).

**Standard Construction Contract (Sept. 2008):** The Standard Construction Contract dated September 2008 is amended to include the provision entitled Whistleblower Protection Expansion Act Rider (page 2 of 2 to this Addendum).

## **NOTICE TO BIDDERS, PROPOSERS, CONTRACTORS, AND RENEWAL CONTRACTORS**

This contract includes a provision concerning the protection of employees for whistleblowing activity, pursuant to New York City Local Law Nos. 30-2012 and 33-2012, effective October 18, 2012 and September 18, 2012, respectively. The provisions apply to contracts with a value in excess of \$100,000.

Local Law No. 33-2012, the Whistleblower Protection Expansion Act ("WPEA"), prohibits a contractor or its subcontractor from taking an adverse personnel action against an employee or officer for whistleblower activity in connection with a City contract; requires that certain City contracts include a provision to that effect; and provides that a contractor or subcontractor may be subject to penalties and injunctive relief if a court finds that it retaliated in violation of the WPEA. The WPEA is codified at Section 12-113 of the New York City Administrative Code.

Local Law No. 30-2012 requires a contractor to prominently post information explaining how its employees can report allegations of fraud, false claims, criminality, or corruption in connection with a City contract to City officials and the rights and remedies afforded to employees for whistleblowing activity. Local Law No. 30-2012 is codified at Section 6-132 of the New York City Administrative Code.

## WHISTLEBLOWER PROTECTION EXPANSION ACT RIDER

1. In accordance with Local Law Nos. 30-2012 and 33-2012, codified at sections 6-132 and 12-113 of the New York City Administrative Code, respectively,
  - (a) Contractor shall not take an adverse personnel action with respect to an officer or employee in retaliation for such officer or employee making a report of information concerning conduct which such officer or employee knows or reasonably believes to involve corruption, criminal activity, conflict of interest, gross mismanagement or abuse of authority by any officer or employee relating to this Contract to (i) the Commissioner of the Department of Investigation, (ii) a member of the New York City Council, the Public Advocate, or the Comptroller, or (iii) the City Chief Procurement Officer, ACCO, Agency head, or Commissioner.
  - (b) If any of Contractor's officers or employees believes that he or she has been the subject of an adverse personnel action in violation of subparagraph (a) of paragraph 1 of this rider, he or she shall be entitled to bring a cause of action against Contractor to recover all relief necessary to make him or her whole. Such relief may include but is not limited to: (i) an injunction to restrain continued retaliation, (ii) reinstatement to the position such employee would have had but for the retaliation or to an equivalent position, (iii) reinstatement of full fringe benefits and seniority rights, (iv) payment of two times back pay, plus interest, and (v) compensation for any special damages sustained as a result of the retaliation, including litigation costs and reasonable attorney's fees.
  - (c) Contractor shall post a notice provided by the City in a prominent and accessible place on any site where work pursuant to the Contract is performed that contains information about:
    - (i) how its employees can report to the New York City Department of Investigation allegations of fraud, false claims, criminality or corruption arising out of or in connection with the Contract; and
    - (ii) the rights and remedies afforded to its employees under New York City Administrative Code sections 7-805 (the New York City False Claims Act) and 12-113 (the Whistleblower Protection Expansion Act) for lawful acts taken in connection with the reporting of allegations of fraud, false claims, criminality or corruption in connection with the Contract.
  - (d) For the purposes of this rider, "adverse personnel action" includes dismissal, demotion, suspension, disciplinary action, negative performance evaluation, any action resulting in loss of staff, office space, equipment or other benefit, failure to appoint, failure to promote, or any transfer or assignment or failure to transfer or assign against the wishes of the affected officer or employee.
  - (e) This rider is applicable to all of Contractor's subcontractors having subcontracts with a value in excess of \$100,000; accordingly, Contractor shall include this rider in all subcontracts with a value in excess of \$100,000.
2. Paragraph 1 is not applicable to this Contract if it is valued at \$100,000 or less. Subparagraphs (a), (b), (d), and (e) of paragraph 1 are not applicable to this Contract if it was solicited pursuant to a finding of an emergency. Subparagraph (c) of paragraph 1 is neither applicable to this Contract if it was solicited prior to October 18, 2012 nor if it is a renewal of a contract executed prior to October 18, 2012.

# ENCLOSURES

**Section 02371**  
**DUST, SOIL EROSION AND SEDIMENTATION CONTROL**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. The Contractor shall provide all labor, materials, tools, equipment, and incidentals required to assure adequate environmental protection including implementation of all erosion and sediment control measures and maintenance of storage areas as directed by the Commissioner.
- B. The Contractor shall provide an Erosion and Sediment Control Plan (ESCP) that addresses measures to prevent migration of contaminated storm water and sediment and to prevent erosion of features of the Work.
- C. The Contractor shall prevent discharge of sediment or erosion to watercourses, public streets or private property from dewatering operations. The Contractor shall provide methods to prevent demolition and construction debris from contaminating storm water runoff.
- D. The Contractor shall comply with all applicable regulatory requirements and all Federal, State, or local laws, codes, ordinances and regulations that govern the control of sediment, erosion and storm water during excavation.
- E. The Contractor shall provide Best Management Practices (BMP) including but not limited to: reinforced silt fences, catch basins sediment traps, stabilized construction entrances, turbidity curtains or other approved means as a temporary structural practice to minimize erosion and sediment runoff.
- F. The Contractor shall provide and implement a Storm Water Pollution Prevention Plan (SWPPP) prepared in accordance with the current New York State Department of Environmental Conservation (NYSDEC) State Pollution Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Construction Activities. The SWPPP shall be prepared in accordance with the approved SWPPP.
- G. The Contractor shall control dust and noise caused by operation and movement of vehicles and equipment in accordance with the latest NYC DEP, and OSHA standards, and all other applicable Federal, State and local regulations.
- H. The Contractor shall comply with the requirements given in the NYS DEC approved Stormwater Pollution Prevention Plan for the project. Any changes intended to be made to the SWPPP recommendations should be submitted in conformance with Article 1.07.

## 1.02 RELATED SPECIFICATIONS

- A. Section 02240 - Dewatering

## 1.03 REFERENCES

- A. Comply with applicable provisions and recommendations of the following except as otherwise shown or specified.

1. ASTM D 3786 - Hydraulic Bursting Strength of Knitted Goods and Nonwoven Fabrics - Diaphragm Bursting Strength Tester Method
2. ASTM D 4354 - Sampling of Geosynthetics for Testing
3. ASTM D 4355 - Deterioration of Geotextiles from Exposure to Ultraviolet Light and Water (Xenon-Arc Type Apparatus)
4. ASTM D 4439 - Standard Terminology for Geotextiles
5. ASTM D 4491 - Water Permeability of Geotextiles by Permittivity
6. ASTM D 4533 - Trapezoid Tearing Strength of Geotextiles
7. ASTM D 4632 - Test Method for Grab Breaking Load and Elongation of Geotextiles
8. ASTM D 4751 - Method for Determining Apparent Opening Size of a Geotextile
9. ASTM D 4759 - Method for Determining the Specification Conformance of Geosynthetics
10. ASTM D 4873 - Method for Identification, Storage, and Handling of Geotextiles
11. ASTM D 1556 - Density and Unit Weight of Soil in Place by the Sand-Cone Method
12. ASTM D 1557 - Test Methods for Moisture-Density Relations of Soils and Soil-Aggregate Mixtures Using 10-lb Hammer and 18-in. Drop
13. ASTM D 2922 - Test Methods for Density of Soil and Soil-Aggregate in Place by Nuclear Methods (Shallow Depth)

14. AISC Specifications for the Design, Fabrication, and Erection of Structural Steel for Buildings
15. Most recent version of the NYSDEC SPDES General Permit for Stormwater Discharges from Construction Activity,
16. OSHA Standard, Title 29, Code of Federal Regulations, Part 1926, Section 650 (Subpart p - Excavations)
17. Most recent version of New York State DEC General Discharge Permit
18. Most recent version of New York State Stormwater Management Design Manual
19. Most recent version of New York State Standards and Specifications for Erosion and Sediment Controls
20. Most recent version of SWPPP approved by the NYS DEC.

#### 1.04 DEFINITIONS

- A. Primary System: Consists of one or more of the following components: reinforced silt fence, sediment traps, stabilized construction entrances, sumps, pumps, piping, or other means determined by the Contract Documents. Components shall be of sufficient size to handle the temporary sediment, storm water and erosion control as required by the Contract Documents.
- B. Backup Components: Components such as backup pumps, piping and other components which shall be sufficiently sized and prepared to incorporate them into the system if there is potential for the failure of a primary system component (i.e., if generators are part of the primary system, have generators readily available in the event of a power failure).
- C. Best Management Practices: Physical, structural, and/or managerial practices that, when used singly or in combination, prevent or reduce pollution of water, and have been approved by the New York City Department of Protection or other accepted certified agency.
- D. Commencement of Construction: The initial removal and disturbance of soils and vegetation associated with clearing, grading, excavation, fabrication, or installation activities.
- E. Erosion: The wearing away of the land surface by running water, wind, ice, or other geological agents, including such processes as geological creep, detachment, movement of soil or rock fragments by water, wind, ice, or gravity.

- F. Erosion/Sediment Control: Any temporary or permanent measures taken to reduce erosion, control siltation and sedimentation, and ensure that sediment-laden water does not leave the site.
- G. Final Stabilization: All soil-disturbing activities at the site have been completed and uniform, perennial vegetative cover with the density of eighty (80) percent has been established or equivalent stabilization measures (such as the use of mulches or geotextiles) have been employed on all unpaved areas and areas not covered by permanent structures.
- H. Receiving Waters: Bodies of water or surface water systems receiving water from upstream manmade (or natural) streams.
- I. Sediment: Fragmented material that originates from weathering and erosion of rocks and unsolicited deposits, and is transported by, suspended in, or deposited in water.

#### 1.05 SYSTEM DESCRIPTION

- A. Reinforced Silt Fences: The Contractor shall provide reinforced silt fences as a temporary structural practice to minimize erosion and sediment runoff. Silt fences shall be properly installed to effectively retain sediment immediately after completing each phase of work where erosion would occur in the form of sheet and rill erosion (i.e. clearing and grubbing, excavation, embankment, and grading). Silt fences shall be installed in the locations required and shown on the approved working drawings. Final removal of silt fence barriers shall be upon approval by the Commissioner.
- B. Sediment Traps: Sediment trap basins shall be provided around the catch basins to intercept sediment laden runoff and retain the sediment. Proposed locations of sediment traps are shown in the SWPPP. In addition, the Contractor shall provide sediment traps around any other temporary stormwater outlets from the construction site. Upon approval by the Commissioner, the sediment trap shall be removed and the area stabilized when the constructed drainage area has been properly stabilized.
- C. Stabilized Construction Entrances: The Contractor shall provide a stabilized pad of aggregates underlain with geotextile at all construction vehicle ingress and egress locations to eliminate tracking of sediments onto public rights of way. Representative locations of the stabilized constructions are shown in the SWPPP.

#### 1.06 SUBMITTALS

- A. Provide all submittals in accordance with Section 4 of the General Conditions and Section 01330 - Shop Drawings.

- B. Working Drawings: The Contractor shall submit to the Commissioner for approval Working Drawings and other documentation required to show conformance with the requirements specified and shown on the Contract Drawings.
1. Working drawings shall show details of the Sediment and Storm Water Control System. The working drawings shall include, at a minimum, the following:
    - a. Plan locations of all components of the Sediment/Storm water Control System.
    - b. Detail of silt fence, sediment traps, stabilized construction entrances, and other installations and other applicable BMPs.
  2. The Contractor shall submit manufacturer's descriptive literature and installation instructions for stockpile liner and cover material.
- C. Erosion and Sediment Control Plan (ESCP): The Contractor shall develop and submit for approval, 30 days following Notice to Proceed, an ESCP, in accordance with the SWPPP. The ESCP shall address schedules and measures that will be taken to prevent migration of contaminated storm water/sediment, and to prevent erosion of features of the Work. The ESCP shall include the following at a minimum:
1. Stormwater runoff.
  2. Provisions for silt fences, sediment traps, stabilized construction entrances and other measures to limit migration of sediments.
  3. Diversion of storm water: The Contractor shall include provisions for controlling storm water runoff in and around excavation areas.
  4. Soil Storage Area: All details of temporary soil storage to be implemented as specified in this section in accordance with specification section 02225 Impacted Soil Handling and 02106 Ex-Situ Soil Sampling Testing and Lab Analysis.
  5. Soil Stabilization practices: All details of soil stabilization practices to be implemented, as specified in this section.
  6. Provisions for all other applicable Best Management Practices.
- D. The Contractor shall develop and submit for approval a Storm Water Pollution Prevention Plan (SWPPP) for all work areas prepared pursuant to New York State Department of Environmental Conservation (NYSDEC) and New York Soil and Water Conservation Society (SWCS) requirements. The SWPPP shall be submitted prior to the initiation of construction activities. In addition to the details included in

the NYSDEC approved SWPPP, the contractor's SWPPP shall include the following at a minimum:

1. Provide background information about the scope of the project, including the location, type of size of project.
2. Provide a site map for the project, including a general location map. The site map should show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent off-site surface water(s), wetlands and drainage patterns that could be affected by the construction activity; existing and final slopes; locations of off-site material, waste, borrow or equipment storage areas; and location (s) of the storm water discharge(s);
3. Provide a description of the soil(s) present at the site;
4. Provide a construction-phasing plan describing the intended sequence of construction activities, including clearing and grubbing, excavation and grading, utility and infrastructure installation and any other activity at the site that results in soil disturbance. Consistent with the New York Guidelines for Urban Erosion and Sediment Control, there shall not be more than five (5) acres of disturbed soil at any one time without prior written approval from the Department;
5. Provide a description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a pollutant source in the storm water discharges;
6. Provide a description of construction and waste materials expected to be stored on-site with updates as appropriate, and a description of controls to reduce pollutants from these materials including storage practices to minimize exposure of the materials to storm water, and spill prevention response;
7. Describe the temporary and permanent structural and vegetative measures to be used for soil stabilization, runoff control and sediment control for each stage of the project from initial land clearing and grubbing to project closeout;
8. Identify and show on a site map the specific location(s), size(s), and length(s) of each erosion and sediment control practice;
9. Provide the dimensions, material specifications, and installation details for all erosion and sediment control practices, including the siting and sizing of any temporary sediment basins;
10. Identify temporary practices that will be converted to permanent control measures;

11. Provide an implementation schedule for staging temporary erosion and sediment control practices, including the timing of initial placement and the placement and the duration that each practice should remain in place;
  12. Provide a maintenance schedule to ensure continuous and effective operation of the erosion and sediment control practices;
  13. Provide an inspection program which shall comply with the requirements of the NYSDEC SPDES General Permit for Stormwater Discharges from Construction Activity.
  14. Provide the name(s) of the receiving water(s);
  15. Provide a delineation of SWPPP implementation responsibilities for each part of the site;
  16. Provide a description of structural practices to divert flows from exposed soils, store flows, or otherwise limit runoff and the discharge of pollutants from exposed areas of the site to the degree attainable; and
  17. Provide any existing data that describes the storm water runoff characteristics at the site.
  18. Concrete Truck Washing: Contractor shall prevent concrete wash water from entering waterways, storm drains and groundwater. All concrete waste and wash water shall be returned with each concrete truck for disposal at the concrete batch plant. Truck wash and debris, if any, disposed in the site shall have a proper containment place included in the SWPPP and approved by the Commissioner.
  19. Construction Sequence Scheduling Plan: The Contractor shall provide a schedule to handle all work associated with operations included in preconstruction, construction and post-construction.
  20. Temporary and Permanent Soil Stabilization Plan: A temporary and permanent soil stabilization plan in accordance with the standards referenced in Article 1.03.
- E. Following commencement of construction, the Contractor shall submit site inspection reports. Qualified Inspector shall have the credentials as required by Part III of the SPDES General Permit for Stormwater Discharges from Construction Activities. During each inspection, the qualified professional shall record the following information:
1. On a site map, indicate the extent of all disturbed site areas and drainage pathways. Indicate site areas that are expected to undergo initial disturbance or significant site work within the next 14-day period;

2. Indicate on a site map all areas of the site that have undergone temporary or permanent stabilization;
  3. Indicate all disturbed site areas that have not undergone active site work during the previous 14-day period;
  4. Inspect all sediment control practices and record the approximate degree of sediment accumulation as a percentage of the sediment storage volume (for example, 10 percent, 20 percent, 50 percent);
  5. Inspect all erosion and sediment control practices and record all maintenance requirements such as verifying the integrity of barrier or diversion systems (earthen berms or silt fencing) and containment systems (sediment basins and sediment traps). Identify any evidence of rill or gully erosion occurring on slopes and any loss of stabilizing vegetation or seeding/mulching. Document any excessive deposition of sediment or ponding water along barrier or diversion systems. Record the depth of sediment within containment structures, any erosion near outlet and overflow structures, and verify the ability of rock filters around perforated riser pipes to pass water; and
  6. All deficiencies that are identified with the implementation of the SWPPP.
  7. Inspection reports shall be maintained in a logbook at the site with the SWPPP. Contractor shall submit inspect and prepare reports consistent with requirement of the SWPPP, the current NYSDEC SPDES General Permit for Stormwater Discharges from Construction Activities, and the current NYSDEC SPDES General Permit for Stormwater Discharges from Municipal Separate Storm Sewer Systems. A sample inspection report is enclosed in the SWPPP. A monthly summary of the site inspection activities shall be provided to the Commissioner.
- F. Contractor's Certification Statement: A Contractor's signed "Certification Statement" as required by Part III of the NYSDEC's SPDES General Permit for Stormwater Discharges from Construction Activity shall be completed prior to the commencement of construction activity and incorporated in the on-site copy of the SWPPP. The original signed copy of the certification statement shall be kept in the on-site copy of the SWPPP. The certification page shall also identify the specific elements of the SWPPP that each contractor and subcontractor will be responsible for and include the name and title of the person providing the signature; the name and title of the trained individual(s) responsible for SWPPP implementation; the name, address and telephone number of the firm; the address of the site; and the date the certification statement is signed.

## 1.07 QUALITY ASSURANCE

- A. The Contractor shall obtain all necessary permits and be responsible for implementing the terms and requirements of these permits as needed and for payment of all fees.
- B. Handle all material in compliance with applicable requirements of OSHA and other governing authorities having jurisdiction.
- C. Codes and Standards: State and City of New York laws and code requirements shall govern the hauling and disposal of trees, shrubs, stumps, roots, rubbish, debris and other matter.
- D. The Contractor and subcontractors shall identify at least one person from their company that will be responsible for implementation of the SWPPP pursuant to the requirements in Part III of the NYSDEC's SPDES General Permit for Stormwater Discharges from Construction Activity. This person shall be known as the *trained contractor*. At least one trained contractor shall be on site on a daily basis when soil disturbance activities are being performed.
- E. Stabilization. The contractor shall initiate stabilization measures as soon as practicable in portions of the site where construction activities have temporarily or permanently ceased.
- F. Maintenance. The Contractor shall maintain the erosion and sedimentation control system to ensure the efficacy of the system. Comply with the maintenance requirements of this Specification Section and with the NYSDEC's SPDES General Permit for Stormwater Discharges from Construction Activity
- G. The SWPPP shall be kept current. If there is a significant change in construction which may have a significant effect on the potential for the discharge of pollutants to the waters of the United States and which has not otherwise been addressed in the SWPPP, the SWPPP shall be updated to reflect those required changes. The SWPPP shall also be amended if it proves to be ineffective in eliminating or significantly minimizing pollutants from sources identified in the SWPPP or achieving the general objectives of controlling pollutants in storm water discharges from permitted construction activity. Additionally, the SWPPP shall be amended to identify any new subcontractor.
- H. Monitoring
  - 1. During the course of construction, monitoring of discharge(s) from the permitted construction activity may be required. Notification of the basis for such monitoring, the parameters and frequency at which monitoring shall occur and the associated reporting requirements will be provided.

2. General Permit 02-01 prohibits the discharge of materials other than storm water and all discharges which contain a hazardous substance in excess of reportable quantities established by 40 Code of Federal Regulations (CFR) 117.3 of 40 CFR 302.4, unless a separate NPDES permit has been issued to regulate those discharges. Permits for storm water discharges associated with construction activity must meet all applicable provisions of Sections 301 and 402 of the Clean Water Act.
3. The Contractor shall implement the SWPPP and monitoring program and retain all records for a period of at least three (3) years after construction is completed.

#### 1.08 ENVIRONMENTAL REQUIREMENTS

- A. Soil Stabilization: The stabilization practices to be implemented shall include one or a combination of the following: temporary seeding, mulching, geotextiles, sod stabilization, vegetative buffer strips, erosion control mats, protection of trees and preservation of mature vegetation. Stabilization practices shall be as approved by the Commissioner. The Contractor shall record the dates when the major grading activities occur (i.e., clearing and grubbing, excavation, embankment and grading); when construction activities temporarily or permanently cease on a portion of the site; and when stabilization practices are initiated. Except as provided in Paragraphs 1.08A.1 and 1.08A.2, stabilization practices shall be initiated as soon as practicable, but no more than 14 days after construction activities have temporarily or permanently ceased.
  1. Unsuitable Conditions: Where the initiation of stabilization measures by the fourteenth day after construction activity temporarily or permanently ceases is precluded by unsuitable conditions caused by the weather, stabilization practices shall be initiated as soon as practicable after conditions become suitable.
  2. Temporary Inactivity Less than 21 Days: Where construction activity will resume on a portion of the site within 21 days after it temporarily ceases, no stabilization practices will be required.
- B. Erosion and Sediment Control: Sediment and storm water control components shall be operational at all times during the Work, specifically during excavation, backfilling and restoration, and decontamination operations. The sediment and storm water control system shall be capable of handling storm water during construction. Damage to excavation slopes and the migration of contaminated soil to downstream areas resulting from storm events shall be repaired or remediated by the Contractor, at the Contractor's expense.
- C. Storm water: At no time shall the Contractor allow storm water from site operations, or water from decontamination operations to migrate off of, or percolate into, the ground below the decontamination area, so as to impact non-contaminated areas. The Commissioner will monitor any overflow or leakage that occurs, and

may, at his discretion, require the Contractor to perform soil sampling within non-contaminated areas affected by such overflow. Any soils that have been contaminated by such overflow shall be removed, treated and disposed of by the Contractor. All sampling, analyses, treatment and disposal of soils required as a result of overflow on formerly non-contaminated soil shall be performed by the Contractor at no additional cost to the City of New York.

- D. Disposal of Water: Water collected from decontamination areas, dewatering operations shall be handled in accordance with Section 02240 - Dewatering.

#### 1.09 PROJECT CONDITIONS

- A. Existing Work: All silt fences, sediment traps, construction entrances, sumps, pumps, piping, and other sediment/storm water controls shall be installed such that other aspects of the Work are not adversely impacted or endangered. The sediment traps should be installed avoiding any interference with the construction traffic. All installations shall be subject to the approval of the Commissioner.
- B. Dust Control: The Contractor shall be responsible for controlling visible dust caused by Work operations and the moving of vehicles and equipment. Dust control shall be implemented when soils are exposed, before, during and after Work activity ceases. Dust control will also be required on the weekends. The Contractor shall apply water or use other methods, subject to the Commissioner's approval, when visible dust is present on-site, in accordance with the Health and Safety Plan. The use of chemicals, including calcium chloride for dust control, will not be permitted.
1. All excavation, loading and transport of materials shall minimize the formation of dust and shall conform to 02316 Excavation. To prevent dust generation, application of water to roadways and active work areas shall be utilized as required. The Contractor's operations shall include air monitoring and dust minimization measures, consistent with the Health and Safety Plan (HASP) required by the Information for Bidders' Section 41 - DDC Safety Requirements.
- C. Silt and Sediment Disposal: All silt and sediment which accumulates behind silt fences or other erosion control structures shall be removed and disposed of off-site in accordance with all applicable Federal, State and local regulations.

#### 1.10 STORAGE, HANDLING AND REMOVAL

- A. Filter fabric shall be identified, stored and handled in accordance with ASTM D 4873.
- B. The Contractor shall store, handle, and remove material and equipment consistent with requirements of the SWPPP and NYSDEC SPDES General Permit for

Stormwater Discharges from Construction Activities (Permit No. GP-0-08-001) or latest version.

- C. Removal of all waste shall be in accordance with Detailed Specification 01733-Construction Waste Management.

## PART 2 PRODUCTS

### 2.01 MATERIALS

#### A. Components for Reinforced Silt Fences

1. **Filter Fabric:** Geotextile fabric that consists of a woven pervious sheet of plastic yarn as defined by ASTM D 123-90 and ASTM D 4439. The geotextile fabric shall be one that is recommended for such use by the manufacturer. The geotextile fiber shall consist of a long-chain synthetic polymer composed of at least 85 percent by weight of propylene, ethylene, ester, amide and shall contain stabilizers and inhibitors added to the base plastic, if necessary, to make the filament resistant to deterioration due to ultraviolet and heat exposure. The edges of the geotextile fabric shall be finished to prevent the outer fiber from pulling away.
2. **Seams:** The seams of the geotextile fabric shall be sewn with thread of material compatible with the fabric given above for geotextile yarn. Factory seams shall be tested in accordance with Method ASTM D1683-90, using 1-inch square jaws and 12 inches per minute constant rate of traverse. The strengths shall be not less than 90 percent of the required tensile strength of the geotextile fabric in any direction.

Filter Fabric Physical Requirements		
Physical Property	Test Procedure	Acceptable Values
Weight	ASTM D3776	5.6 oz/sy
Thickness	ASTM D1777	24 mils
Grab Tensile Strength Elongation (%)	ASTM D 4632	10 lbs./ %
Burst Strength	ASTM D3786	500+ psi
Trapezoid Tear Strength	ASTM D4533	115 x 90 lb.

3. **Silt Fence Stakes and Posts:** Provide wooden stakes or steel posts for fence construction. Wooden stakes utilized for silt fence construction, shall have a minimum cross section of 2 inches by 2 inches when oak is used and 4 inches by 4 inches when pine is used, and shall have a minimum length of 5 feet. Steel posts (standard "U" or "T" section) utilized for silt fence construction,

shall have a minimum mass of 1.33 pounds per linear foot and a minimum length of 5 feet.

4. Reinforcement: Provide wire fence for reinforcement, minimum 14 gauge construction with a maximum 6-inch mesh opening or as approved.

**B. Components for Stabilized Construction Entrances**

1. Aggregates: The aggregates to be used shall be a matrix of 1-4 inch stone, or reclaimed or recycled concrete equivalent.
2. The geotextile shall be woven or nonwoven fabric consisting only of continuous chain polymeric filaments or yarns of polyester. The fabric shall be inert to commonly encountered chemicals, hydro-carbons, mildew, rot resistant, and conform to the fabric properties as shown:

Fabric Properties	Test Procedure	Acceptable Values
Grab Tensile Strength (lbs)	ASTM D1682	220
Elongation at Failure(%)	ASTM D1682	50
Mullen Burst (psi)	ASTM D3786	430
Puncture Strength (lbs)	ASTM D751 modified	125
Slurry Flow Rate (gal/min/sf)	-	0.3
Equivalent Opening Size	Us Std Sieve CW-02215	40-80
Aggregate Depth	-	10
Ultraviolet Radiation Stability (%)	ASTM G-26	90

- C. Mill Certificate: A mill certificate or affidavit shall be provided attesting that the fabric and factory seams meet chemical, physical, and manufacturing requirements specified above. The mill certificate shall specify the actual Minimum Average Roll Values and shall identify the fabric supplied by roll identification numbers. The Contractor shall submit a mill certificate signed by an authorized official from the company manufacturing the filter fabric.

**PART 3 EXECUTION**

**3.01 INSTALLATION**

- A. Silt Fences: Silt fences shall extend a minimum of 16 inches to a maximum of 34 inches above the ground surface. Filter fabric shall be from a continuous roll cut to the length of the barrier to avoid the use of joints. When joints are unavoidable, filter fabric shall be spliced together at a support post, with a minimum 6-inch

overlap, and securely sealed. A trench shall be excavated, approximately 4 inches wide and 4 inches deep, on the up slope side of the location of the silt fence. The 4-inch by 4-inch trench shall be backfilled and the soil compacted over the filter fabric. Silt fences may only be removed upon approval by the Commissioner.

- B. **Sediment Traps:** The volume of sediment storage of the traps shall be 3600 cubic feet per acre of contributory drainage. All excavations for the trap shall be carried in such a way that the erosion and water pollution shall be minimal. All cut slopes of the basin shall be 1:1 or flatter.
- C. **Stabilized Construction Entrances:** Stabilized Construction Entrances shall have a minimum thickness of six inches. The width shall be at least 12 foot but not less than the full width of points where ingress or egress occurs. However, the width shall be a minimum of 24-foot if there is only one access to the site. Stabilized Construction Entrances shall be at least 50 feet long. Geotextile shall be placed over the entire area to be covered with aggregate. Piping of surface water under entrance shall be provided if required. If piping is impossible, a mountable berm with 5:1 slopes will be permitted.
- D. **Turbidity Curtain** is a flexible impenetrable barrier used to trap sediments in water bodies. This curtain is weighted at the bottom to achieve closure while supported at the top through a floatation system. Turbidity curtain shall be used wherever applicable to prevent the migration of silt from the work site into the East River.
- E. **Maintenance:** The Contractor shall maintain the temporary and permanent vegetation, erosion and sediment control measures, and other protective measures in good and effective operating condition by performing routine inspections to determine condition and effectiveness, by restoration of destroyed vegetative cover, and by repair of erosion and sediment control measures and other protective measures. The following procedures shall be followed to maintain the protective measures.
  - 1. **Silt Fence Maintenance:** Silt fences shall be inspected in accordance with Article 3.02 of this Section. Any required repairs shall be made promptly. Close attention shall be paid to the repair of damaged silt fence resulting from end runs and undercutting. Should the fabric on a silt fence decompose or become ineffective, and the barrier is still necessary, the fabric shall be replaced promptly. Sediment deposits shall be removed and disposed of off-site when deposits reach one-third of the height of the barrier. When a silt fence is no longer required, it shall be removed. The immediate area occupied by the fence shall be shaped to an acceptable grade and stabilized.
  - 2. **Sediment Trap maintenance:** Sediment traps shall be inspected after each rain and repairs made as needed. Sediments from sediment traps shall be removed and the trap restored to its original dimensions when the sediment has accumulated to half the design depth of the trap. Removed sediment shall be

deposited in a suitable area and stabilized in such a manner that it will not erode.

3. Stabilized Construction Entrance maintenance: The entrances shall be maintained in a condition which will prevent tracking or flowing of sediment onto public rights-of-way. Periodic top dressing with additional aggregate shall be done as needed. All sediment spilled, dropped or washed onto the public area must be removed immediately. When necessary, wheels must be cleaned to remove sediment prior to entrance onto public right-of-ways. All sediment shall be prevented from entering storm drains, ditches or watercourses. Periodic inspection and needed maintenance shall be provided after each rain. When washing is required, it shall be done on an area stabilized with stone and which drains into an approved sediment trapping device.

### 3.02 FIELD QUALITY CONTROL

- A. Inspections: The Contractor shall inspect disturbed areas of the construction site, areas used for storage of materials that are exposed to precipitation that have not been finally stabilized, stabilization practices, structural practices, other controls, every 7 days during periods without rainfall, daily during periods of prolonged rainfall, and within 24 hours of the end of any storm that produces 1/2 inch (13 mm) or more rainfall at the site. Where sites have been finally stabilized, such inspection shall be conducted at least once every month. Inspect areas where vehicles exit the site daily. Inspections shall be conducted by a Qualified Inspector.
  1. Inspections Details: Disturbed areas and areas used for material storage that are exposed to precipitation shall be inspected by the Contractor for evidence of, or the potential for, pollutants entering the local drainage system. Erosion and sediment control measures identified in the ESCP shall be observed to ensure that they are operating correctly. Discharge locations or points shall be inspected to ascertain whether erosion control measures are effective in preventing significant impacts to receiving waters. Locations where vehicles exit the site shall be inspected for evidence of offsite sediment tracking.
  2. Inspection Reports: For each inspection conducted, the Contractor shall prepare a report summarizing the scope of the inspection, name(s) and qualifications of personnel making the inspection, the date(s) of the inspection, major observations relating to the implementation of the SSCP, maintenance performed, and actions taken. The report shall comply with the requirements of Article 1.06. The report shall be furnished to the Commissioner. A copy of the inspection report shall be maintained on the job site.
  3. Corrective Actions: Within one business day after completion of an inspection, submit notification identifying any corrective actions that must be

taken. Within one business day of this notification, the Contractor shall begin implementing corrective actions and shall complete corrective actions within a reasonable time frame.

3.03 CLEANING

- A. Clean all silt and sediment from sumps during and at the conclusion of the Work. Interim cleaning shall be such that the performance of the sump, pumps and piping, used in the performance of work, is not hindered, or at the direction of the Commissioner.

-END OF SECTION-

**Section 16600**  
**LIGHTING**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Furnish and install a lighting control system consisting of a workstation, lighting control and energy management program, monitoring, relays, controls and accessories including all required wire, raceways and connections as specified or required for a complete and operating system. Provide a system in accordance with the requirements specified under this section, as shown on the Contract Drawings and as required for the lighting system to comply with the NYCEC.

**1.02 RELATED SPECIFICATIONS**

- A. Section 16050 – Basic Electrical Materials and Methods
- B. Section 16055 – Electrical Requirements for Shop Assembled Equipment
- C. Section 16121 – Wires and Cables 600 volt and Below
- D. Section 16130 – Electrical Raceway Systems
- E. Section 16140 – Wiring Devices
- F. Section 16264 – Uninterruptible Power Supplies
- G. Section 16443 – Panel boards
- H. Section 16491 – Control Components and Devices
- I. Section 16511 – Lighting

**1.03 REFERENCES**

- A. Lighting fixtures and devices shall comply with the latest applicable provisions and recommendations of the following:
  - 1. NEC - National Electrical Code
  - 2. NYCBC - New York City Building Code
  - 3. NYSEC - New York State Energy Code
  - 4. UL 924 - Emergency Lighting and Power Equipment
  - 5. LCA - Lighting Controls Association
  - 6. EPA - Energy Policy Act

**1.04 SUBMITTALS**

- A. Furnish all submittals, as specified in Section 01330 – Shop Drawings and Section 16050 - Basic Electrical Materials and Methods.

## B. Contractor shall submit the following:

1. Manufacturer's catalog data sheets indicating all technical information and construction details for each type of lighting controls and energy management system component
2. Lighting Control Cabinet Shop Drawings, including all relays, contactors, communication cards, wireways, timers, indicating lights and terminal strips.
3. Point to point wiring diagrams for lighting control panels
4. Complete Hardware and Software documentation for PC and Accessories.
5. Operations and maintenance manuals for lighting control system
6. Complete facility floor plans indicating all components, raceways, cabinets and wiring of the Lighting Control System.

## 1.05 QUALITY ASSURANCE

- A. All equipment, controls, monitors and devices shall be UL listed and approved for use in the City of New York. All shall be in accordance with the applications indicated on the Contract drawings and these specifications. The descriptions and catalog numbers serve to establish the quality, appearance and performance of the specified items.
- B. All items shall be the products of lighting controls equipment manufacturers who have previously demonstrated, by performance and reputation, the ability to manufacture products of the quality specified. Such manufacturers must maintain an organization and manufacturing facility capable of actually manufacturing the specified lighting controls.
- C. The Contractor shall be responsible for reviewing all drawings and coordinating with all trades the installation of lighting controls and devices. They shall be compatible with the lighting fixtures and accessories supplied under Division 16 Section 16511 Lighting.
- D. All devices, controls, monitors and equipment shall be of the highest quality material and construction for their respective types.
- E. The supplier shall have a minimum of 5 years successful experience in design, installation and operation of lighting control of the type specified herein. In addition the contractor shall supply evidence of the works' compliance to the NYSEC.

- F. Installer shall be certified by the various manufacturers and engineered systems suppliers contributing to this system, as qualified to design and install their products.
- G. Sensors, switches and other operable components of the Lighting Control System located in areas other than offices shall be suitable for installation in industrial locations and for hard service as appropriate

#### 1.06 SYSTEM DESCRIPTION

##### A. General

- 1. The Contractor shall furnish all labor, services and materials necessary to furnish and install a complete, functional NYSEC compliant and approved Lighting Control system including controls, wire, raceways and connections. The System shall comply in all respects with all pertinent codes, rules, regulations and laws of the New York State Energy Codes, local jurisdiction, and NYC Construction Codes as they apply to this building. The System shall comply in all respects with the requirements of the specifications, manufacturer's recommendations and Underwriters Laboratories Inc. (UL) listings. The system shall be suitable for the intended application.
- 2. The Lighting Control system shall consist of:
  - a. Lighting Control workstation
  - b. Software and graphics for monitoring and control
  - c. Lighting Control relay panels
  - d. Local switches and occupancy sensors
  - e. Level Control Panels
  - f. Photocells and Timers
  - g. Connection to the SCADA System for monitoring
  - h. Connection to a remote central monitoring station. The City shall dedicate one direct outside access data line for this service:

- B. The system shall be designed to monitor and control the building's exterior and interior lighting fixtures and monitor the status of each of the buildings lighting areas using the following type of control devices:

- 1. On - Off Controls
  - a. Wall Switches (1 and 3 way)
  - b. Photocell
  - c. Timer
  - d. Occupancy Sensor

2. Level Controls

- a. Bi-Level Ballasts
- b. Multi-Level Switching
- c. Photocell

3. Relays and Multi Pole Contactors

- a. Timer Controlled
- b. Multi-circuit contactors

C. The following types of control will be required:

1. Pier Level

- a. Offices: Multi-Level Switching, Occupancy Sensors
- b. Personnel and Gallery Circulation: Time Based Switching
- c. Toilets, Lockers, Showers: Occupancy Sensors
- d. Storage: Occupancy Sensors
- e. Equipment Rooms and Machine Shop: Local Switches
- f. Lunch Room: Occupancy Sensors

2. Outdoor Parking and Circulation Areas

- a. Small Vehicle, Photocell and Time Based Switching
- b. Ramps, Gates and Outbound Scales: Photocell and Multi-Level Time Base
- c. Roadway, Photocell and Multi-Level Time Base

3. Loading and Tipping Levels

- a. Supervisors Office, Local Switches
- b. Operations Office, Occupancy Sensor
- c. Toilets, Occupancy Sensors
- d. General Overhead Lighting, Multi-level time base
- e. Equipment Rooms: Local Switches

4. Maintenance Shop

- a. Maintenance Bay: Two level local switching for HID
- b. Storage Area: Occupancy Sensor
- c. Office: Multi Level Switching

5. Mechanical Level

- a. Mechanical, Local On-Off with monitoring

6. Outdoor Lighting

- a. Flood and Canopy Lights, photocell on- Time Clock Off
- b. Security and Sign Lighting, Photocell On and Off

1.07 DELIVERY, STORAGE AND HANDLING

- A. Lighting control and Energy Management equipment and devices shall be delivered, stored and handled in accordance with the Specifications and the manufacturer's instructions.

1.08 EXTENDED WARRANTY

- A. Manufacturers of lighting control system and emergency lighting power system shall provide an extended warranty for minimum of two years.

1.09 SPARE PARTS

- A. The spare parts shall be listed in an index and packed in containers suitable for long term storage, bearing labels clearly designating the manufacturer's part number with complete information for use and reordering.
- B. The following spare parts shall be furnished:
  - 1. 10 percent of each type of occupancy sensor and photocell but not less than 5 each.
  - 2. 10 percent of each type relay, timer, switch and contactor, but not less than 2 each.
  - 3. 1 spare monitor of each type.
  - 4. 5 backup copies of the software program for the system on digital disks
  - 5. Two (2) start-up copies for the PC operating system.
- C. Packaging: Deliver all spare parts neatly wrapped or boxed, indexed and tagged with complete information for use and reordering.

PART 2 PRODUCTS

2.01 MANUFACTURERS

- A. General: The lighting control and energy management descriptions and catalog numbers listed herein are used to indicate the acceptable quality, design and performance characteristics of approved components.

- B. Acceptable manufacturers are listed below. Other manufacturers of equivalent products may be submitted for approval.

1. Controller, Relays and Devices
  - a. General Electric Company
  - b. Lutron
  - c. Sensorswitch
  - d. Hubble Incorporated
  - e. Lighting Controls and Design
2. Workstation
  - a. Hewlett Packard
  - b. Dell
  - c. Sony
3. Photocells
  - a. Tork
  - b. Intermatic
  - c. Paragon
4. Lighting Contactor
  - a. Square D, Class 8903
  - b. ASCO
  - c. General Electric
5. Timers
  - a. Intermatic
  - b. Agastat
  - c. Eagle

## 2.02 LIGHTING CONTROL SYSTEM

- A. General: Provide a lighting control and energy management system that consists of lighting relay control panels, dimming modules, occupancy sensors, photocells and timers connected to a local workstation and directly as hereinafter specified.
- B. Change of State Enunciation: States for all lighting control relays shall be transmitted to the workstation and the SCADA within 2 seconds or last change. Transmit all Programmable System Switch input changes of state.

- C. Activity Logs: System shall store the last 1500 relay events including the time, new state, and cause for the change in state. Annunciate to the workstation and SCADA when the table is 25%, 50%, 75% and 100% full.
- D. Workstation: Provide a personal computer having following minimum features:
1. Form Factor: Tower or Mini-Tower
  2. Processor: Dual Core Intel Xeon Processor at 3.0 GHz minimum
  3. Memory: 2GB of DDR2 SDRAM
  4. Monitor
    - a. 23" 16/9 LCD Type: TFT active matrix
    - b. Video Input Signal: Analog RGB and digital HDMI
    - c. Pixel Pitch: No greater than 0.294 mm
    - d. Viewing Angle: 85 degrees nominal
    - e. Contrast Ratio: 600:1
    - f. Brightness: 250 nits
    - g. Prime Mode: 1280 x 1024 (SXGA)
    - h. Mounting: VESA-compliant adapter plate
  5. Graphics accelerator card 256 MB minimum
  6. Hard Drive: 500 GB SATA 3 Gb/s, 7200 RPM minimum
  7. Optical Drive: 16X DVD+/- RW/CD-ROM and Blue Ray
  8. Mouse: Microsoft System Intellimouse
  9. Network Card: Broadcom NetXtreme 10/100/1000 Gigabit Ethernet controller-PCI Express or equal
  10. Keyboard: 104+ keys
  11. Documentation: Provide all documentation, manuals and licenses
  12. Warranty: 3 Year Basic Warranty and 3 Year NBD On-Site Service
  13. Safety/Regulatory: UL, FCC B, approved
  14. Latest revision of software at time of bid required:
    - a. Windows XP Professional
    - b. Microsoft Office Professional
    - c. McAfee Virus Scan
    - d. Roxio Easy CD/DVD Creator
  15. External Inputs: Ethernet, optical, USB 2.0 and 3.0, telephone.
  16. Outputs: Audio Speakers and Printer
  17. Speakers: Two small full range speakers for desk top mounting with superior articulation for this application.

E. Operator's Software: Provide lighting control system operator's software that has the following minimum features:

1. All programming and editing shall occur offline on a PC. Data shall be entered through a simple menu-driver software package. All operating data for all relay panels shall be entered on the PC database.
2. Basic operating software shall include English descriptions of relay's "circuit designation", "circuit description" and "direct wired low voltage switches" can be programmed. Panel master switches, programmable system switches, and telephone override code info can also be entered. Automatic carryover of descriptions to all other program/monitor/control functions. System shall be capable of printing above information.
3. Up to 12 different passwords per site.
4. Software shall be programmed to enable transmission of information about the buildings lighting system and control status and operation to the SCADA System or remote from the building monitoring facility.

F. Dataline Power Supply: Provide a dataline power supply capable of powering up to 4000 feet of dataline having the following features:

1. Ambient Temperature: 0 to 55 degrees C
2. Humidity: 0 to 95 percent, non-condensing
3. Power Requirements: 115VAC

G. Dataline Interface: Provide a dataline interface that converts the dataline communications signal to an RS232 output having the following features:

1. Ambient Temperature: 0 to 55 degrees C
2. Humidity: 0 to 95 percent, non-condensing
3. Power Requirements: 115VAC
4. Visual indication:
  - a. Power On
  - b. On-Line Status
  - c. Dataline Power
  - d. Link Failure
  - e. Field Failure

5. Alarm Contact: 2 amps at 28VAC.

H. Lighting Relay Control Panels: Relay control relay panels shall be provided for the on-off control of lighting fixture branch circuits adjacent to each lighting power panel. Relay control relay panels shall be UL listed and consist of the following:

1. Enclosure: NEMA 12 rated steel enclosure sized to accept 48 relays, terminal blocks, control devices and cards. Finish shall be corrosion resistant and appropriate for the location where installed.
2. Cover: Surface with captive screws in a hinged, lockable configuration. A wiring schedule directory card shall be affixed to the cover's back to allow identification of circuits/relays/loads controlled if the door is open or the cover is off.
3. Interior: Bracket and circuit board backplane with pre-mounted relays. Interiors shall be equipped with up to 48 relays and provide true ON/Off indication of relays status through LEDs mounted on the circuit board. Each relay shall be capable of direct ON/OFF control by a low voltage switch or occupancy sensor. Relays shall be momentary-pulsed mechanically latching contactors rated at 20 amps, 277 VAC. They shall attach to the Interior by a single plug-in connector.
4. Power Supply: Transformer assembly with two 40VA transformers with separate secondary's; one providing power to relays and associated low voltage switches and sensors, the second providing power to the LEDs and optional automation cards. Transformers include internal overcurrent protection with automatic reset and metal oxide varistor protection against power line spikes. Power supply shall be rated for available power supply (277 or 120 VAC), 50/60Hz. +/-10%.
5. Relays shall be included which perform bi-level lighting control functions for designated lighting circuits controlled from the system workstation or SCADA. HID startup control box (Hubbell SLIP-3 Panel or equal) shall be provided to interface with the light fixtures for bi-level lighting control.
6. Plug-in Intelligence Cards: Plug-in intelligence cards in each panel shall provide programmable operation and networking capability with the following capabilities:
  - a. Status and Runtime Data - store the current status of all relays with historical runtime data.
  - b. Communications: Support of two communications ports, an RS232 port and a dataline port. Either or both may be used for programming, monitoring, and control. The dataline shall allow simultaneous operation of multiple lighting relay control panels to the personal computer.
  - c. Off-Line Programming: The program shall be provided with English descriptors of all loads, windows, and help screens.

- d. Dataline Communications: Twisted pair (18/2) dataline with random access and bus arbitration capability of up to 500 panels and no loss of data.
- e. Relay driver cards: Each card shall provide 12 relay outputs and 3 programmable switch inputs.
- f. Panel controller card: Each controller shall be capable of providing all logic, control, runtime data, status information, and communications functions for up to 48 relays.

I. Printer

- 1. Provide an office type printer/scanner/copier/fax inkjet color printer as an accessory to the workstation.
- 2. Printer shall be high quality and provide high speed printing.
- 3. Printer shall be capable of duplex (both side) printing
- 4. Printer shall handle letter, legal and 11x17 paper.
- 5. Printer shall be capable of network operation.
- 6. Printer shall handle standard and legal paper.
- 7. Provide a moveable cart with paper storage to support the printer.

2.03 OCCUPANCY SENORS

A. General: Occupancy sensors shall be provided for individual control of Offices, Locker, Control and Storage Rooms and small spaces in the Personnel and Maintenance Areas of the building.

- 1. Sensors shall be line voltage type for direct control of the lighting fixtures in small offices and spaces as indicated on the plans.
- 2. Where multi-level switching of the area is required sensors shall have 2 dual relays and dual override switches shall be required. Each relay shall have independent programmable occupancy time delays.
- 3. Sensors shall offer a minimum on timer of at least 16 minutes.
- 4. Sensor setting adjustments shall be digital and be made using a pushbutton.
- 5. In high humidity or cold environments sensors shall be coated and rated for condensing humidity and -20 ° Fahrenheit operation.

6. Sensors shall have 5 year warranty.
7. Sensors in wall switch enclosures and shall be capable of auto on, manual on and be able to detect small hand motion at 20' in small areas and 40' in large areas.
8. All wall sensors shall have a "predictive off mode where user can manually turn off the lights when leaving and have them come automatically on when returning.
9. Line and load wire connections shall be interchangeable, such that an installer cannot make an improper connection.
10. Ceiling mounted sensors requiring multi level switching shall have two dual relays. Each relay shall have independent programmable occupancy time delays.
11. Sensors shall be 120 or 277 volt rated whichever is required for the supply voltage.
12. Ceiling mounted sensors shall be dual mode type capable of detecting minor motion successfully.
13. Where dual mode sensors are inappropriate a single mode (ultrasonic) type may be used.

#### 2.04 LIGHTING CONTACTORS

- A. Multiple contact, electrically held type, continuous duty for all type of lamp loads including high intensity discharge (HID) lamps. Number of poles per contactor and ampere ratings shall be as indicated on the Contract Drawings.
- B. Construction: Flush dead back design with arc shields and barriers to prevent pole-to-pole flashover. All parts accessible for inspection and maintenance. Contacts readily replaceable from front of panels. Contactors suited for non-inductive loads. Interrupting capacity 150% of rating with no derating for high inrush loads.
- C. Enclosure: NEMA 12 surface type enclosure complete with lighting contactors, control relays, Hand-Off-Automatic selector switches, and provision for pad-locking Provide relays, push buttons, selector switches and indicating lights as specified in Section 16491 - Control Components and Devices.
- D. Selector switches and coil voltages of lighting contactors and control relays shall be rated 277V.

## 2.05 PHOTOELECTRIC CONTROLS

- A. Photoelectric controls shall be cadmium sulphide hermetically sealed cell, fully temperature compensated, with minimum of 15-second time delay to prevent false switching and adjustable activation from 1-5 fc "On" and 3-15 fc "Off".
- B. Voltage rating shall be 277V or 120 V as needed.
- C. Photoelectric cells shall be provided with nipple for conduit mounting, adjustable swivel with locking nut, and gasketed polycarbonate housing. Photocells shall be installed where indicated on the Contract Drawings.

## PART 3 EXECUTION

## 3.01 INSTALLATION OF DEVICES

## A. Lighting Control Relay Panels

- 1. Panels shall be mounted rigidly and securely to the building structure or to supporting devices, which are rigidly and securely supported to the building structure.
- 2. Panels shall be fastened with bolts and expansion shields on concrete or brick, with toggle bolts on hollow masonry units and with machine screws or welded studs on metal.
- 3. All panels shall be mounted parallel or perpendicular to walls, such that panels are installed in a neat and professional manner.
- 4. Provide adequate clearance for inspection, maintenance and replacement of panel components.
- 5. Panels in damp or corrosive areas shall be mounted on channels off the wall to permit air circulation behind them.
- 6. Panels in industrial or adverse environments shall have their electronics conformal coated.
- 7. Panels shall be mounted adjacent to the Lighting Panel containing the circuits they are controlling.

## B. Occupancy Sensors

- 1. Ceiling mounted sensors controlling the same load shall be wired in parallel.
- 2. Equipment shall be installed in accordance with manufacturers' instructions and recommendations.

3. Avoid locating ceiling mounted sensors near HVAC air diffusers.
4. Sensors shall be installed at locations indicated on contract drawings. Sensor layout was based on Sensorswitch, Contractor is responsible for location and quantity of sensor if alternate manufacturer is used.

C. Photocells

1. Photocells: Install photocells 6-inches above roof peak with the lens facing North.

3.02 FIELD TESTS

- A. After installation, the completed lighting control system shall be field tested for operation and conformance. The field tests shall be witnessed by the Resident Engineer and certified by the Contractor. The Contractor shall provide testing consisting of the following:
  1. Wiring continuity test shall be performed.
  2. Fixture and control operation test for individual control areas shall be performed.
- B. The Contractor shall provide a field test report. The report shall identify the test performed and the results obtained.

3.03 MANUFACTURER'S FIELD SERVICES

- A. Furnish a qualified manufacturer's service representative to assist in the installation of the lighting control, check the installation before it is placed into operation, assist in the performance of field tests, observe the initial operation and train the plant operations and maintenance staff in the care, operation and maintenance of the system.
- B. The Contractor shall provide equipment start-up services, programming, and training to ensure that the lighting system is fully operational.
- C. The Contractor shall provide a field report from the manufacturer's representative for each visit to the site. The report shall include complete information on time, schedule, tasks performed, persons contacted, problems corrected, tests results,

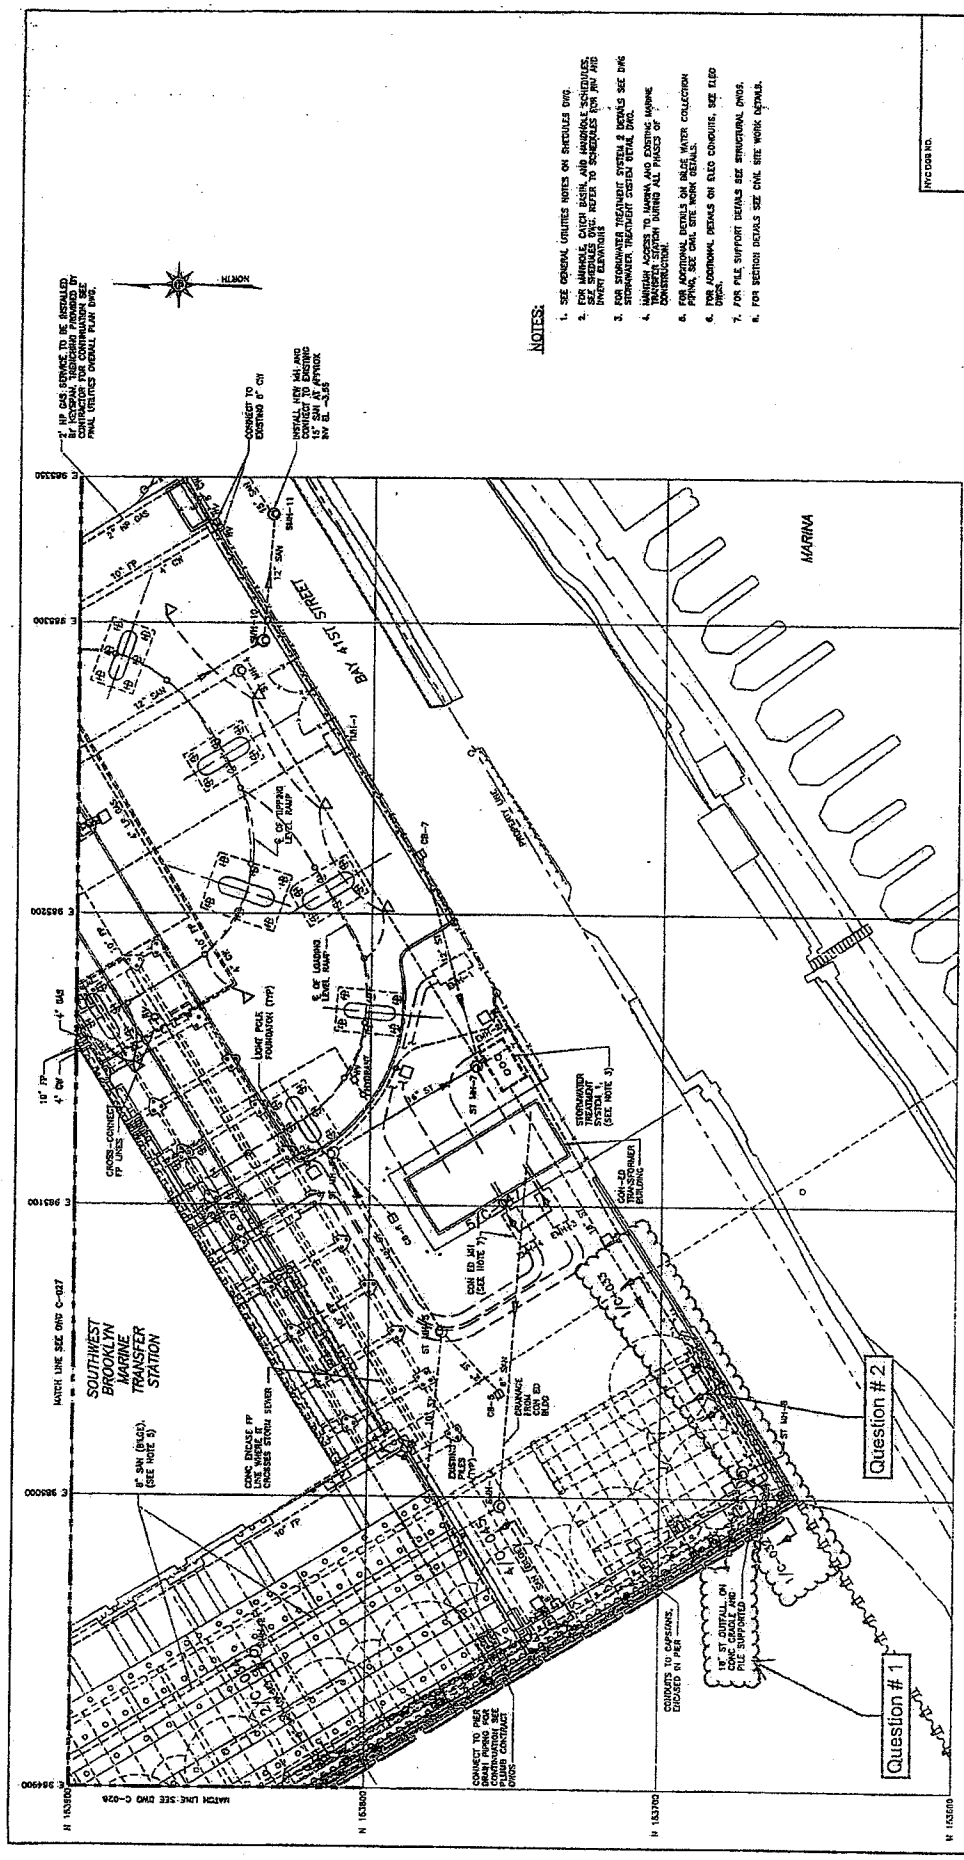

3.04 CLEANING OF DEVICES

- A. Devices shall be cleaned inside and out to remove construction dust prior to substantial completion.

3.05 ADJUSTING

- A. Occupancy Sensors: Adjust location as required to obtain satisfactory performance.
- B. Photocells: Adjust direction, height and location as well as sensitivity (turn on and turn off levels) to obtain satisfactory performance.
- C. Test all low voltage switches for satisfactory operation.

-END OF SECTION-

# ADDENDA CONTROL SHEET

**TITLE: Southwest Brooklyn Marine Transfer Station – Building Construction**

## GENERAL COUNSEL

[illegible]

THE CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
DIVISION OF STRUCTURES

October 18, 2012

**ADDENDUM No. # 3**

FOR FURNISHING ALL LABOR AND MATERIAL NECESSARY AND REQUIRED FOR:

**S216-399A**

**Southwest Brooklyn Marine Transfer Station – Building Construction**

---

This addendum is issued for the purpose of amending the requirements of the Bid and Contract Documents and is hereby made a part of said Bid and Contract Documents to the same extent as though it were originally included therein.

---

The bidder is advised that the items listed below apply to the project:

1. **The Bid Opening for the contract described below scheduled for October 25, 2012, at 2:00 pm is rescheduled to November 15, 2012, at 2:00 pm.**

Contract #1 – General Construction Work

Please note that all Questions must be submitted in writing no later than October 24, 2012

2. **Bidders Questions and Responses to Questions:**

See Attachment A.

3. **Revisions to Addendum #2:**

See Attachment B.

4. **Revisions to Addendum to the General Conditions:**

See Attachment C.

5. **Revisions to Specifications:**

See Attachment D.

6. **Revisions to Drawings:**

See Attachment E.

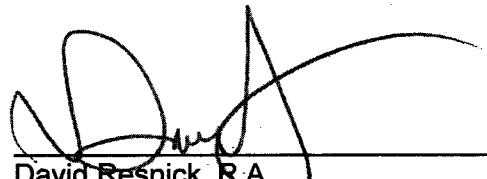

7. **Revisions to the Bid Booklet:**

See Attachment F.

---

THIS ADDENDUM MUST BE SIGNED BY ALL BIDDERS AND ATTACHED TO THEIR BIDS.

If additional information is required, please contact the Department of Design and Construction, Contract Section at (718) 391-2200, (718) 391-1727, or by fax at (718) 391-2615.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT A – BIDDERS QUESTIONS AND DDC RESPONSES**

No.	Bidders' Questions	DDC Responses
1	Please reference spec section 02839-14 for MSE Retaining Walls. The course aggregate size No. 57 is a clean ½" stone blend. We don't believe you can get the compactive effort of 95 percent modified Proctor density specified for this material. Please advise if you feel it is possible. We understand you need a relatively free draining material here but is this what you want, or are you looking for a well graded subbase blend with 0-10% passing the No. 200 sieve?	We call for 57 stone and do believe that it is possible to get 95% compaction. Reinforced Earth Company has stated the following: "#57 is a self compacted material but not to the desired 95%, grading with 4 passes by a roller are often used to get you to 95%."
2	Is concrete cradle required under all storm sewer piping or only under the 18" RCP outfall?	The concrete cradle has been removed and is not used to support any storm sewer piping. See Revised Drawings C-032.01 and C-033.01 issued in Addendum 2. Also, Drawing C-028 is revised in Addendum 3. See Attachment E – Revisions to Drawings.
3	Please provide typical trench details for each utility.	Refer to Specification Sections 02316 – Excavation, Section 02317 – Backfilling, and 02503 – Installation of Buried Pipelines.
4	Please refer to Schedule B of the Addendum to the General Conditions. Under Schedule B, Guarantees and Warranties, a number of the materials or equipment state the length of warranty as "lifetime". Is that meant to be the "lifetime" of the facility? If so, what is the expected "lifetime" of the facility? The manufacturers are expressing concern.	Schedule B of the Addendum to the General Conditions is revised in Addendum #3. See Attachment C - Revisions to the Addendum to the General Conditions.
5	Page 4 of 50 of the Addendum to the General Conditions under Amended Articles states that Article 1.26, Security Guards/Fire Guards on the site is replaced with Section 01561, Site Security. Under Part 1, 1.02 of Section 01561, Site Security, it refers you back to the Conditions for Security Guards and Fire Guards (the article that was just replaced). Are these Amended Articles supplementary or replacing? Do you require security guards?	This was clarified in Addendum 2. See Attachment A (question no. 16), Attachment B - Revisions to Addendum to the General Conditions and Attachment C - Revisions to Specifications in Addendum #2.
6	Drawing S-120 details limits of foundation insulation in plan view and has a note to "See	Provide horizontal, under slab insulation as indicated in Addendum #3. See Attachment E -

No.	Bidders' Questions	DDC Responses
	Arch Dwgs (Typ)". Drawing A-520 shows a section of exterior wall at pier and grade level, but the note where the insulation would be says "See Structural for Additional Information." Please advise as to dimensions of any horizontal insulation and any applicable details that aren't in the specification.	Revisions to Drawings.  Provide perimeter insulation on vertical surfaces as indicated in specification Section 07211, Part 3.04.A.1. Also, Drawing A-501 is revised by Addendum #3 to clarify vertical insulation. See Attachment E - Revisions to Drawings.
7	The hard copy of the Addendum #1 drawings are not to scale (roughly 92% of scale), similar to the contract drawings. Can you please supply the addendum drawings on your website so that we can adjust the scale accordingly during our reproduction and/or please supply a disc for all addenda drawings?	PDF files for Addendum 1 drawings are available on the website.
8	As reflected above, numerous pre-bid questions are still being generated in our efforts to clarify ambiguities in the Contract or requests for additional information. In addition, the present Bid Date of October 11, 2012 falls directly on the same date as the MTA's multi-billion dollar East Side Access Contract, CM-012. This demand has caused many common subcontractors to both projects to elect to focus on CM-012, given its magnitude, and ignore for the time quoting SW Brooklyn MTS unless there is a postponement to later in October. In light of the above, please consider making the final day for Pre-Bid Questions Friday, October 12, 2012 with a revised Bid Date of two to three weeks following final Pre-Bid Questions.	The Bid Opening date is revised to November 15, 2012.
9	This letter (fax) is Skyline Steel's formal request for spiralweld pipe to be included in the acceptable pipe pile manufacturing processes on the Brooklyn Marine Transfer Center Project. We believe, and our experience has proven, that spiralweld pipe performs and installs with the same expected quality of any other pipe manufacturing process. Our experience also suggests that spiralweld will be cost effective and delivered quicker to the project site than other manufacturing processes.	Requests for substitutions may be submitted in accordance with the requirements of the Contract Documents for review during construction.

No.	Bidders' Questions	DDC Responses
	<p>There are many examples where spiralweld is accepted and installed with no problems reported or expected. One such example is the California Department of Transportation (CALTRANS) for use in large bridge structures in extreme seismic zones. A second example, spiralweld pipe is accepted by the Alaska Department of Transportation for bridge construction in extreme cold environments and even larger seismic events than those in California. And, lastly, spiralweld pipe is accepted by the US Corps of Engineers and all DOTs across the nation.</p> <p>We have carefully reviewed the specification for the Project and spiralweld meets or exceeds all the requirements listed. The ultrasonic test required is a test that all spiralweld producers can perform. The double submerged arc butt weld is the welding process used by all producers. The dimensional requirements set forth are met or exceeded by all producers. All welders and welding systems are qualified and certified to AWS D1.1 WPSs and PQRs are utilized on all pipe production. MTRs and Certificates of Compliances (COC) are produced with every manufactured pipe project. So you can see that the spiralweld process can and does produce a measurable excellent quality pipe pile.</p> <p>There are a couple of examples where the NYCDOS installed spiralweld pipe piles with no problems reported. The Marine Transfer Station Conversion Program, North Shore Marine Transfer project in Queens, NY installed 30" diameter pipe with 5/8" steel walls. Also, the Hamilton Ave. Transfer Station in Brooklyn installed 18" diameter pipe with 1/2" steel walls.</p> <p>Skyline would be very happy to answer any questions your Department might have and would be glad to arrange a plant inspection tour if you desire.</p>	
10	DDC response to Question 27, Addendum #2 in reference to Sketch RRC-RFI-012A states 18" ST OUTFALL ON CONC. CRADLE." Addendum #2 drawing, Sheet C-032.01 and	The concrete cradle for the 18" ST has been deleted. See revised drawings C-032.01 and C-033.01 issued under Addendum 2.

No.	Bidders' Questions	DDC Responses
	C-033.01 indicates by clouding that there is no concrete cradle on 18" storm sewer outfall. Please clarify.	
11	Regarding DDC Response 49, Addendum #2, which states "the 8" diameter steel pipes are intended to brace the vertical walls of the existing receiving pit that become unsupported once the existing base slab is demolished." What is meant by "base slab?" Please clarify.	The reference to "existing base slab" is that of the incinerator building that previously occupied the site and which continues to brace the top of the receiving pit walls. Demolition of that existing base slab is included in this contract.
12	Regarding DDC Response 49, Addendum #2, which states "the uncontrolled fill currently in the receiving pit is not assumed to offer any passive resistance against the structural backfill assumed to be present outside of the pit." The fill to +El 1.00 will have to be removed in order to demolish upper portion(s) of reinforced concrete walls of the receiving pit. Sheet S-011.00 shows existing sheet piling left in place along perimeter of receiving pit base slab reducing earth loads on the 5 ft. thick reinforced concrete portion of receiving pit to remain. Can the 8" steel pipe braces be eliminated? Please clarify.	Any sheet piling shown in the demolition drawings is depicted as represented on the original design drawings for the incinerator building which previously occupied this site. The existence and condition of the sheeting is not verified and cannot be relied upon, therefore no, the pipe braces cannot be eliminated and must be installed as shown on the Contract Drawings.
13	Drawings R-206.00 and R-207.00 show a "Micro-Silica concrete wearing surface" on the ramp structure. Specification section 03300 paragraph 2.01.B gives a chart with an "Exterior Ramp Overlay Bonded" With Class 50DP concrete. Is the Class 50DP concrete referring to the micro-silica overlay?	The "Micro-Silica concrete wearing surface" shown on the Ramp drawings refers to the Class 50DP concrete overlay described in Specification 03300.
14	Drawing M-640.00 has a column titled Specification Reference. In that column It references Section 10410 - Interior Signs. Section 10410 does not exist, on the other hand Section 10440 - Interior Signs does exist. Please clarify.	The correct reference is Specification Section 10440 - Interior Signs. Drawing M-640 is revised in Addendum 3. See Attachment E - Revisions to Drawings.
15	The following deals with Specification Section 14696 - Mooring Capstans: Currently, these specifications call out a 15 HP unit and 12,450 lbs of line pull @ 45 fpm. The required efficiency to run a capstan at this speed and this horsepower exceeds 100%. It is our opinion that there are no gearboxes that can achieve even a consistent 100% efficiency rating. There are capstans that can run at that speed and line pull, but to rate the capstans for that load is not possible, as it would require a rating system of above	Section 14696 is revised in Addendum 3. See Attachment D - Revisions to Specifications.

No.	Bidders' Questions	DDC Responses
	100% efficiency. Even a 94% efficient gearbox would require 17.988 HP to achieve the loads listed. Therefore, we would like clarity that it is either A) acceptable to provide the highest producing capstan in a 15 HP model, or B) provide any 20 HP model to meet your requirements. Please clarify.	
16	There appears to be a discrepancy on drawing S-802.00 regarding the bolts attaching the rubber fenders to the king piles. In the front view it shows 1-1/4" dia SS bolts (14 required). In the elevation it shows 5/8" dia galvanized bolts. Can you clarify exactly what bolts are required and where?	Bolts shall be 1-1/4" diameter galvanized A307 bolts with galvanized washer, tapered washer & double nuts. The number of bolts should correspond to the number bolt holes on the fender units, which are typically spaced as shown in the "Front View" on Drawing S-802.01. The number will vary based on fender length. Drawing S-802.01 is revised in Addendum No. 3 to reflect the correct bolts as described above. See Attachment E - Revisions to Drawings.
17	On Architectural Drawings, the plan 'Notes #C' indicate that all partitions are type 1, unless noted. The detail at the top of the CMU wall to the underside of the slab does not indicate any clip angles. However within the notes shown on Drawing A -500 [Note #3] indicates that all 'Rated' walls require clip angles. What is required? What are the sizes and spacing? On Drawing A -601, here does detail 'D3' occur- [walls at anchor points]?	Drawings A-500 and A-601 are modified by Addendum 3. See Attachment E - Revisions to Drawings.
18	On drawing A-308/Det. C3 [Countertops] shows that a stainless steel tubular support frame is required under the countertop in the Machine Shop Office. This counter does not have a sink.	Provide stainless steel tubular support frame under the countertop in the machine shop office even though it doesn't have a sink.
19	On revised drawing A-900 the gates and fences have been revised to 'open grilles'. However what happens to the supports? Are we to use the details shown on drawings A - 901 & A-902?	Yes
20	There are numerous inconsistencies between the control and instrumentation conduit and cables that appear on drawing E-122 and those that are represented in the schematic diagrams sheet #1 through #5 on drawing E-110 thru E-115. Please provide a clarification. Reference conduits C-7, C-12, C-16, C-17, C-37, C-38, C-80, C-83, C-84, C-104 and C-105.	Please see Addendum 2, Attachment D - Revisions to Drawings, Drawings E-122 and E-110 - E-115 for revisions to the control and instrumentation drawings and resubmit any subsequent questions.
21	Bid Item 15 is for either the unit price for 103,400 lf in length of 20" Steel Pipe Piles vs. 669 each of quantity of 150-Ton Composite	The standard 150-ton pile included in Specification Section 02364 was designed by the Engineer and therefore able to be estimated. The

No.	Bidders' Questions	DDC Responses
	Tapered Piles. In order for the Authority and the contractor to evaluate the alternates on an equal basis we respectfully request that the bid pricing options be either bid as both "each" or both "linear feet".	<p>Bid Form unit price measurement of "linear feet" is appropriate based on the Engineer having estimated a total length of piles, while still affording protection to the Contractor due to any variability in actual driving conditions.</p> <p>The alternate 150-ton pile type, which is an optional bid item, is based on the performance requirements of Specification Section 02365, and represents a design to be performed by the Contractor. The total length of alternate pile cannot be estimated uniformly due to the fact that multiple potential pile designs may meet the specified requirements. As such, to be able to compare all proposed alternates that may be included in competing bids, the Bid Form unit price measurement of "per pile" is appropriate.</p>
22	In Contract Specification Section 15815 – Duct Insulation, the footer in the bottom right hand corner of the pages is labeled "Fans". Please clarify.	The footer is revised by Addendum 3. See Attachment D – Revisions to Specifications.
23	Section 02360, Part 3.01C states that shoring systems that retain earth on which the support or stability of existing structures or utilities is dependent shall be left in place at the completion of the work. Please verify that in the area of the MSE wall this temporary sheeting may be removed after construction of the MSE wall. If this sheeting is to remain at completion of the project, please specify if this temporary sheeting is to be coated?	The temporary sheeting used during the over-excavation and replacement of the soils at the MSE wall may be removed at completion. If at the MSE wall area the contractor is directed to leave temporary sheeting in place as described in Section 02360, Part 3.01C, coating is not required.
24	Do second and third tier subcontractors qualify either under the target participation plan 10% and/or 50% of the total M/WBE subcontractor participation goal?	No, not at this time.
25	Can suppliers contribute to the target participation plan of 10% or subcontractor participation goal of 50%.	<p>Supply purchase, <u>alone</u>, <b>does not</b> count toward either participation goal.</p> <p>"Purchase/Install" <b>does</b> count toward either participation goal.</p>
26	Drawing S-110 indicates that the top of slab at the pier level is 11.50 unless otherwise indicated (note on center of drawing indicates el. 11.00 which we believe to be incorrect). Drawing S-110 also indicates a slab thickness of 18" north of column H and 24" south of column H. The pile cap schedule on S-120 indicates the depth of PC4A to be 4' 6". This would mean that the bottom of pile cap	<p>Drawing S-110.00 is revised in Addendum 3. See Attachment E, Revisions to Drawings. The correct top of slab high point elevation is 11.50 as stated in Note 2.1 and Note 3.1 on Drawing S-110.</p> <p>On Contract Drawing S-120, the bottom of pile cap elevations are confirmed to be correct as-is. Not all piles caps are located immediately below</p>

No.	Bidders' Questions	DDC Responses
	elevation, of PC4A, should be 5.50. Pile cap schedule on S-120 shows bottom of pile cap elevation as 0.50. Please confirm bottom of pile cap elevations of all pile caps on the pile cap schedule.	the Pier Level slab. While this is the case for interior pile caps, perimeter pile caps are significantly lower to account for the 4'-0" +/- elevation difference between finished grade outside and the Pier Level slab inside the MTS. Please refer to the various sections and details depicting this configuration on Contract Drawings S-127 through S-138.
27	In Addendum #2, Question 27, you state that Drawing C-023 is revised in Addendum #2. We did not see that drawing in the revised packet. Did you mean Drawing C-028? If so, the note regarding Pile Supported was circled as a revision but did not change. Please advise if this note should be "18" ST Outfall, on Concrete Cradle and Pile Supported," per your answer in Addendum #2, Question 27.	In Addendum #2, the reference to C-023 was incorrect. The correct reference is C-028. The concrete cradle has been removed.  Also, note Drawing C-028 is revised in Addendum 3 (see Attachment E, Revisions to Drawings).
28	Please refer to Drawing Z-002 (Sheet 52). It shows dredge limits and references Note 5, which states "Remove all materials & debris within dredge limits to project depth." It is very difficult for the bidder to establish a cost for this work, not having pay lines to go by and not having information to establish what quantity of material to estimate. We respectfully request that the Agency establish an allowance item to pay for this work.	Dredging is a unit cost item. An assumed dredge quantity is provided in the Bid Schedule.
29	Per Addendum #2, the "Conc Cradle on Pile Detail" on Drawing C-042 was deleted and Drawings C-032 and C-033 were revised to remove the cradle shown. However, per notes and specifications to follow NYCDEP Sewer Main Standards, cradle would be required under all storm and sanitary piping. Please either provide typical sections for the various utilities or confirm sanitary and storm systems shown will require cradle under them per NYDEP standards referenced.	The pipes do not require concrete cradle supports. Also see response to question 3.
30	In reviewing the revised Utilities Schedule on Drawing C-030.01 (issued in Addendum #2), we still do not believe the inlet and outlet elevations for the various manholes work in providing adequate sloping between the manholes. For example, the pipe run from ST MH-7 to ST MH-6 is an ~60' run without any elevation change (1.63 is shown for MH-7 Outlet and MH-6 Inlet). Similar problems	Revisions to the storm manhole schedule and sanitary manhole schedule are provided in Addendum 3. See Attachment E, Revisions to Drawings.

No.	Bidders' Questions	DDC Responses
	exist throughout the schedules. Similarly, the pipe run from St MH-10 to ST MH-11 runs uphill (-0.82 to -0.10). Similarly, the pipe run from ST MH-4 to ST MH-3 runs uphill (1.18 to 2.32). Please advise as to minimum required slope and whether or not a revised schedule will be required/provided to meet that slope. It is very hard to ascertain trench depths and encasement requirements without the proper elevations. Similar issues exist in both storm and sanitary piping.	
31	Please refer to Interior Metal Stairs, Specification Section 05512-7, Part 2, Paragraph C.1. It calls for treads and platforms to be 1-1/4 x 3/16 NAAMM Designation W-15-4. Structural Drawings S-450, 452, 459 and 460 (Stairs E & F and the roof access stair) show grating to be 2" in depth based on top of steel elevation to top of grating elevation. What is the correct depth of the grating?	See response to question 35. Maintain top of landings indicated and adjust grating depth as required to comply with specification section 05512-1.03 Performance Requirements.
32	We cannot identify or locate the ship ladder shown in Section A1/A406.00 (between Elevation 10.5 and Elevation 15.75). Where are they on the project?	Refer to drawing A-720 ENLARGED LIDDING AREA SECTION 1, upper left portion: Ship ladder shown on 1/A406 depicts detail for stair identified in detail callout D4-A531.
33	We cannot find elevation or details for five ship ladders between finger catwalks (Elevation 21.5) and transverse catwalk (Elevation 26.7) shown on A-115.01 & A-307.00.	See detail D4-A531 for stair elevation. See detail A1-A406 for stair section. See response to question No 33.
34	Drawing A-307.00 has the finger catwalk at Elevation 21.50 and a traverse catwalk at Elevation 26.70. Drawing A-720.00 looks to show the same area in section but the elevations are 22.75 and 28.00, respectively. What are the correct elevations?	Drawing A-307 is revised in Addendum 3. See Attachment E, Revisions to Drawings.
35	In Addendum #1, Question #8, it was asked to clarify whether the 4" LP piping was to be installed by Keyspan or the contractor. In response, a section of pipe on Drawing C-028 was highlighted as 2" HP pipe to be installed by Keyspan with trenching provided by contractor, but the remainder of the 4" pipe remained unchanged. On Drawing C-025.01, a note was added clarifying that Keyspan will install piping only up to the Gas Meter/Regulator, but the updated pipe on Drawing C-028 was located after the Gas	Drawing C-025.01 correctly shows the size of the HP gas line and limits of Keyspan's work. Drawing C-028.01 is revised by Addendum #3 to clarify the discrepancy. See Attachment E, Revisions to Drawings.

No.	Bidders' Questions	DDC Responses
	Meter/Regulator. Please clarify the discrepancy.	
36	<p>Reference: Bid Booklet, Contractor's Bid Schedule</p> <p>a. Which line item should the steel King Piles be included in?</p> <p>b. Please confirm the 850 lf of Marine Timber Piles for line item 22 refers to the Dolphin Pile.</p> <p>c. Which line item should the Rock Works be included in?</p> <p>d. Note 1A on Drawing E-204 states that the contractor is responsible for the material, labor and supervision required for the installation of the equipment that is supplied by</p>

No.	Bidders' Questions	DDC Responses
	include the transformers and network protector equipment and would be in conflict with the division of responsibility drawing E-342 stating that this equipment is to be provided by ConEdison. Historically, ConEdison is responsible for the furnishment of this equipment. Please confirm the correct scope for this work.	Con Edison.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT B – REVISIONS TO ADDENDUM NO. 2**

**Bidder's questions and DDC Responses, Response to Question #27**

Revise "C-023" to read "C-028"

Specification Section 14696 Mooring Capstans, Page 19

Item 1: Revise to read as follows:

- "1. Page 14696-4, Part 2.02E.4: Revise "45 FPM single speed" to read "0-35 FPM variable speed".

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT C – ADDENDUM TO GENERAL CONDITIONS**

1. Page 16, Schedule B. In the line for Section 08342 – Overhead High Speed Fabric Doors Type 1, revise “Lifetime” to read “2 years for balance springs, mechanical and electrical components; five (5) years for door fabric”.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT D – REVISIONS TO THE SPECIFICATIONS**

Specification Section 02222 Demolition and Removals, Page 02222-1

Part 1.01.B. After “marine piles” insert “, piles”.

Specification Section 02222 Demolition and Removals, Page 02222-6

Part 3.02.A. After “marine piles” insert “, piles”.

Specification Section 03300 Cast-in-Place Concrete, Page 03300-25

Part 2.02H.13: After “on exterior ramp structures” insert “and vehicle scales deck surfaces”.

Specification Section 08342

1. Page 08342-3, Part 1.08A.1.a: Revise this part to read as follows:

- “a. Door Type 1: Balance springs, mechanical and electrical components for two (2) years from date of Substantial Completion and door fabric for five (5) years from date of Substantial Completion.”

2. Page 08342-9

a. Part 2.03E.3: Revise this part to read as follows:

- “3. Automatic Mode Operation: The door shall be opened and closed automatically based on controls and sensors provided by the door supplier. A microwave-based vehicle detection system, installed to detect oncoming traffic, shall open the door. Photo-eyes, installed in the doorframes, shall close the door shortly after the vehicle passes through the door.”

b. Part 2.03F.3: Revise this part to read as follows:

- “3. Automatic Mode Operation: The door shall be opened and closed automatically, based on controls and sensors provided by the door supplier. Two microwave-based vehicle detection systems shall be installed to detect oncoming traffic on either side of the door. Either microwave detector, sensing a vehicle, shall open the door. The opposing microwave detector shall close the door after the vehicle passes through the door.”

3. Page 08342-10, Part 2.03G: Revise this part to read as follows:

- “G. Vehicle Detection: Vehicle detection shall be by a microwave-based detection system as shown. Door controller shall use microwave detector input to determine location of vehicle. Detection system shall include all power supplies, interposing relays, enclosures and appurtenances to comprise a complete operating system.”

Specification Section 09967 Coating for Steel Waterfront Structures

1. Page 09967-1, Part 1.02B: Delete this part in its entirety.

2. Page 09967-6, Part 2.01B: Revise this part to read as follows:

“B. Finish coating for steel fender panels and exterior ladders shall be an Epoxy-Polyamide system conform to:

1. System: SSPC PS 13.01
2. Paints: SSPC Paint 22
3. Color: Black

Ladder rungs shall additionally be coated with an ablative anti-fouling coating such as C-Flex 1-2-3 by Carboline Co. or approved equal. Color shall be red.”

Specification Section 10290 Bird and Pest Control

1. Page 10290-2, Part 2.01A.3: After this part, insert the following:

“4. Bird-X”

2. Page 10290-4, Part 2.02F: After this part, insert the following:

“G. Ultrasonic Bird Repeller

1. Product: Bird-X Model No. BB-PRO-110 or approved equal.
2. General Requirements
  - a. Provide bird repellents capable of controlling bird pests without harming them. Include a combination of distress cries, predator cries, harassments, and ultrasonic waves.
  - b. Include settings for delay periods, time of operation, and random operation.
  - c. Provide control boxes suitable for controlling four directional speakers. Provide speakers and control panels as shown on the Electrical drawing set, having the following adjustments:
    - (1) Volume: Ultrasonic sounds 95-102 dB at a distance of 1 meter, Sonic sounds 105-110 dB at a distance of 1 meter
    - (2) Frequency: Ultrasonic sounds 16-23 kHz, Sonic sounds 3-5 kHz
  - d. Provide speakers having a coverage area of 2,500 square feet and include 100 feet of wire per speaker.
  - e. Mount the control box in a NEMA 4X enclosure. The enclosure shall be constructed with molded fiberglass polyester and include a hinged window cover.
3. Electrical Requirements
  - a. Provide control panels with a 110VAC adapter to receive 120 volt power from a nearby convenience outlet.”

Specification Section 10881 Vehicle Scales, Page 10881-5

Part 2.01E.4: After this part, add the following:

- “a. Provide microsilica admixture for Class 50 DP bonded overlay in accordance with Section 03300.

Specification Section 13915 Fire-Suppression Piping, Page 13915-18

Part 2.09A.3.b: Revise this part to read as follows:

“Air Compressor: F-AIC-01 and F-AIC-02, UL Listed, fractional horsepower, 460-V ac, 60 Hz, three phase (NEMA 4X control Panel)”

Specification Section 13921 Electric-Drive, Centrifugal Fire Pumps

1. Page 13921-6, Part 2.02A.3: Revise “NEMA 12” to read “NEMA 4X”.

2. Page 13921-9, Part 2.02C.1: Revise “NEMA 12” to read “NEMA 4X”.

3. Page 13921-10, Part 2.04B: Revise “NEMA 12” to read “NEMA 4X”.

Specification Section 13953 Foam/Water Fire-Suppression System, Page 13953-6

Part 2.01B.1: Revise this part to read as follows:

“Pull stations for manual activation shall be compatible with release control plan and rated for NEMA 4X applications.”

Specification Section 14696 Mooring Capstans, Page 14696-4

Part 2.03C.2: Delete this part in its entirety.

Specification Section 15191 Diesel Fuel Piping, Page 15191-5

Part 3.01F: After this part, insert the following:

“G. All fuel lines inside the building shall be encased in reinforced concrete as shown and which conform to Sections 03100 – Concrete Forms and Accessories, 03200 – Concrete Reinforcement, 03300 – Cast-in-place Concrete, and ASTM C33 – Specification for Concrete Aggregates. Encasements shall contain no other services.”

Specification Section 15815 Duct Insulation, pages 15815-1 through 15815-8

In the footer of all pages, revise “Fans” to read “Duct Insulation”.

Specification Section 16411 Disconnect Switches, Page 16411-3

Part 2.02E: In the table, revise “Corrosive areas as defined in Section 16050 –Basic Electrical Materials and Methods or as shown” to read as follows:

“The Fire Pump Room and the corrosive areas as defined in Section 16050 – Basic Electrical Materials and Methods or as shown”

Section 16415 Automatic Transfer Switches, Page 16415-6

Part 2.06C: Revise this part to read as follows:

“Provide NEMA 4X enclosure and watertite “Meyers” hubs for conduit entries to ATS-2 located in the Fire Pump Room.”

Specification Section 16752 Digital Video System, Pages 16752-01 through 16752-31

Delete Section 16752 in its entirety and replace with new Section 16752, a copy of which is attached hereto.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT E – REVISIONS TO THE DRAWINGS**

**REFER TO DRAWING C-003.01**

Add the following note to the drawing: "BATHYMETRY CONTOURS REFER TO THE FEET BELOW THE BROOKLYN BOROUGH DATUM, WHICH IS 2.547 ABOVE NGVD-29."

**REFER TO DRAWING C-017.02**

Revise spot elevation "5.74" above Con Ed Transformer Facility to read "6.00".

**REFER TO DRAWING A-110.00**

1. Provide horizontal under slab insulation for the area defined by Column Lines A and C and 1 and 17
2. Provide horizontal under slab insulation for the area defined by Column Lines C and D and 6 and 17.
3. Provide horizontal under slab insulation for the area defined by the following spaces: storage, drum storage Electrical Room No. 1, BWAS Room and Odor Control Room.
4. Change room label for storage room between Column Lines 2 and 3 to "STORAGE 4".
5. Change room label for storage room between Column Lines 4 and 6 to "STORAGE 1".
6. Change room label for storage room between Column Lines 6 and 7 to "STORAGE 2".
7. Change room label for storage room between Column Lines 9 and 11 to "CRANE STORAGE".

**REFER TO DRAWING A-111.00**

1. Provide horizontal under slab insulation for the area defined by Column Lines A and C and 1 and 17.
2. Provide horizontal under slab insulation for the area defined by Column Lines C and D and 6 and 17.
3. Provide horizontal under slab insulation for the area defined by the following spaces: 114 storage - 115 storage - 116 storage - 117 storage - 118 drum storage - 120 electrical room No. 1 and 130 BWAS room.
4. Add 24" x 24" access hatch, with door swinging to the North, to Eastern wall of shaft in Room 101 located near Column A1.

5. Add 36" x 30" access hatch, with door swinging to the East, to South wall of shaft in Room 112 located near Eastern most wall of the Machine Shop Storage.
6. Add 36" x 30" access hatch, with door swinging to the West, to Northern wall of shaft in Room 104 located near Column B11.
7. Add 16" x 24" access hatch, with door swinging to the North, to Western wall of shaft in Room 109 located near Column A17.
8. Add room number "104" to room label Men's Lockers and Toilets located between Column Lines 4 and 6.
9. Change room label "MACHINE SHOP" to "MACHINE SHOP STORAGE".
10. Add note "CONCRETE PADS" to one of four rectangles shown on plan in HVAC Room 111.
11. Add note "LOCKERS TYP" with leader pointing towards 22 rectangles shown on plan between Column Lines 7 and 9 in Room 104.
12. Remove 10" dimension from Column Line 16 to the center of bollard at BWAS Room.
13. Add "10" TYP" dimension from outside corner of BWAS Room to the center of bollard.

**REFER TO DRAWING A-112.00**

1. Provide horizontal under slab insulation for the area defined by the following spaces: 114 storage - 115 storage - 116 storage - 117 storage - 118 drum storage - 120 electrical room No. 1 and 121 odor control room.
2. Add 24" x 30" access hatch, with door swinging to the South, to Western wall of shaft in Room 113 located near Door 113-2.
3. Remove "CJ" note from Room 113 along Column Line F.
4. Remove "CJ" note from Room 113 between Column Lines E and F.
5. Remove "CJ" note from center of Room 114.
6. Remove "CJ" note from wall in Room 121 near Column Line 12.
7. Remove 3'-8" dimension located to the north of Column F1.
8. Remove 2'-10" dimension located to the south of Column F1.
9. Remove 8'-7" dimension located to the south of Column E16.8.
10. Remove 4'-5" TO CTR LINE dimension string near Column F16.8.

**REFER TO DRAWING A-114.01**

1. Add 24" x 30" access hatch, with door swinging to the East, to Northern wall of shaft in Room 202 located near Column Line 17.

2. Add 36" x 30" access hatch, with door swinging to the South, to Western wall of shaft in Room 215 located near Column Line C.
3. Add Door Tag "211-1" to door along Column Line C in Room 211.
4. Add note "8" PERIMETER CURB / FLASHING C1/ A-521" in Room 201 with leader pointing towards wall at Column Line 1.
5. Remove 2" dimension from CMU wall along Column Line B.
6. Remove 10'-2" dimension from CMU wall along Column Line 14.
7. Remove 8 "CJ" notes to the north of Column Line C.
8. Remove 3'-6" dimension from Column C16.
9. Relocate note "FLOOR DRAIN SEE CONTRACT 4-P DRAWINGS" to drain along Column Line 6 between Column Lines C and D.

**REFER TO DRAWING A115.01**

1. Add 36" x 30" access hatch, with door swinging to the East, to South wall of shaft in Room 217 located near Eastern most wall of the Secure Storage Room.
2. Add 20'-2" dimension in Room 209 from west wall to Column Line 3.
3. Add 10'-8" dimension in Room 209 from Column Line 3 to shaft wall.
4. Add 5'-11 1/2" dimension in Room 209 from shaft wall to Eastern wall.
5. Remove Door Tag 210-1 from Vestibule B.

**REFER TO DRAWING A-116.00**

1. Replace room label "CORRIDOR" with "VESTIBULE C" in room to the East of Supervisor's office.
2. Replace room label "MENS TOILET" to the North of Vestibule C with "MENS TOILET 2".
3. Replace room label "WOMENS TOILET" to the North of Vestibule C with "WOMENS TOILET 2".
4. Replace room label "MENS TOILET" to the South of Vestibule C with "MENS TOILET 3".
5. Replace room label "WOMENS TOILET" to the South of Vestibule C with "WOMENS TOILET 2".

**REFER TO DRAWING A-117.0**

1. Add "6'-0" TYP" dimension to bollards outside the Supervisor's Office.
2. Add 36" x 30" access hatch, with door swinging to the North, to East wall of shaft in room 310 located near Northern most wall of Electrical Room #2.

3. Remove East to West wall with no wall hatch from Electrical Room.
4. Remove wall hatch from within the opening for door 310-2.
5. Remove 2'-4" dimension from Electrical Room.
6. Remove 10'-3" dimension from Electrical Room.

**REFER TO DRAWING A-118.00**

1. Add 36" x 30" access hatch, with door swinging to the East, to South wall of shaft in room 312 located near Eastern most wall of the Shaft.
2. Add label "STAIR E" to stair between column lines 3 and 5 in the Upper Lidding Room.
3. Add note "DN" with arrow pointing to the South at stair between doors 311-1 and 312-1.
4. Add "RAILING" note with leader pointing between "CHAIN" notes near Column Line 13.
5. Adjust leader on "CHAIN" note to point to line segment west of "PLATFORM" leader between Column Lines 13 and 15.

**REFER TO DRAWING A-119.00**

Add 36" x 30" access hatch, with door swinging to the South, to West wall of shaft on roof of Supervisor's Office located near the southern wall of the middle shaft space.

**REFER TO DRAWING A-121.00**

Replace word "CODUITS" with "CONDUITS" in note near Column C9.

**REFER TO DRAWING A-144.00**

Replace room label "FOREMAN'S OFFICE" with "SUPERVISOR'S OFFICE".

**REFER TO DRAWING A-151.00**

Replace room label "FOREMAN'S OFFICE" with "SUPERVISOR'S OFFICE".

**REFER TO DRAWING A-203.00**

1. Add detail callout "D2/A-504" at North end of translucent wall panel and canopy located at EL 39.50.
2. Add detail callout "D2/ A-504 OPP" to Southern end of Translucent Wall Panel and extending from EL 15.50 up to top of the Zinc Roof Canopy.

**REFER TO DRAWING A-220.00**

1. Add space label "INTERSTITIAL SPACE" above the corridor at EL 11.50 and below the loading level slab at EL 27.50, between Column Lines D and A.
2. Add detail call out "D2/A-502" at Column Line H.
3. Add detail call out "D1/A-501" at Column Line A.
4. Add detail callout "D2/ A-502" to Column Line H from EL 27.50 to crane power rail structure on roof.

5. Add detail callout "D1/ A-501" to Column Line A from EL 11.50 to above roof.
6. Remove note "INTERSTITIAL SPACE" from area above suspended ceiling in corridor between Column Lines C and B.

**REFER TO DRAWING A-221.00**

1. Add detail callout "D1/A-502" at Column Line H along the entire height of the wall.
2. Add detail callout "D1/A-502" to Column Line H from EL 27.50 to crane power rail structure on roof.

**REFER TO DRAWING A-300.00**

1. Add "6'-0" TYP" to bollards west of Supervisor's Office and north of Column Line D.
2. Replace room label "Corridor" with "VESTIBULE C" in room to the East of Supervisor's Office.
3. Replace room label "VESTIBULE" with "VESTIBULE D" for Room 306.

**REFER TO DRAWING A-303.00**

1. Change detail number "B3/A-303" to "C3/A-303".
2. Change detail name "TOILETS ELEVATION 5/A-303" to "TOILET STALL PARTITION DET".

**REFER TO DRAWING A-307.00**

1. Detail B1/A-307 Section 1, Stair E:
  - a. Replace "Replace "SERVICE CATWALK EL+39.00" text to read SERVICE CATWALK EL +38.42.
  - b. Replace "T/LANDING EL 33.63" text to read T/LANDING EL 33.33.
  - c. Replace dimension text "10'-9 3/16"" between elevations 25.25 and 39.00 to read 10'-2".
  - d. Replace dimension text "5'-4 5/8"" between El 28.25 and El 33.63 to read 5'-1".
  - e. Replace dimension text "5'-4 5/8"" between El 33.63 and El 39.00 to read 5'-1".
2. Detail B2/A-307 Stair E Plan at El 11.00:
  - a. Replace "STAIR E PLAN AT EL 11.00" text to read STAIR E PLAN AT EL 11.50.
  - b. Replace dimension text "12 EQ TREADS" to read 13 EQ TREADS.
3. Detail B3/A-307 Enlarged Lidding Area Plan, EL 27.75, 26.20
  - a. Replace "ENLARGED LIDDING AREA PLAN, EL 27.75, 26.20" text to read ENLARGED LIDDING AREA PLAN, EL 28.25, 26.70.
  - b. Replace "T/LANDING EL 27.25" text to read T/LANDING EL 28.25.
  - c. Replace dimension text "12 EQ TREADS" to read 13 EQ TREADS.
4. Detail B4/A-307 Stair E Plan at El 37.91:
  - a. Replace "STAIR E PLAN AT EL 37.91" text to read STAIR E PLAN AT EL 38.42.
  - b. Replace "8 EQ. TREADS" text to read 9 EQ. TREADS.
5. Detail D2/A-307 Enlarged lidding area plan, EL 27.50, 26.20
  - a. Replace "ENLARGED LIDDING AREA PLAN, EL 27.50, 26.20" text to read ENLARGED LIDDING AREA PLAN, EL 28.25, 26.70.
  - b. Replace "T/LANDING EL 28.00" text to read T/LANDING EL 28.25.

6. Drawing A-307.00 detail D4/A-307 Section 2 Stair F:
  - a. Replace "PIER LEVEL LANDING" TEXT EL 12.25 to read PIER LEVEL LANDING TEXT EL 11.50.
  - b. Replace "T/LANDING EL 20.63" to read T/LANDING EL 19.875.
  - c. Replace "LANDING LEVEL EL 29.00" to read LANDING LEVEL EL 28.25.

**REFER TO DRAWING S-452.01**

1. In Section 5/S-450, replace the elevation label for the roof access catwalk that reads "T/C10 EL 76.67" to read "T/C10 SEE NOTE 2".

2. In the general sheet notes at the bottom of the sheet, after Note 1, add the following

“2. TOP OF STEEL ELEVATION AT STAIR LANDINGS SHALL BE COORDINATED WITH THICKNESS OF STEEL GRATING.”

**REFER TO DRAWING S-458.00**

1. In PARTIAL PIER LEVEL PLAN, replace the elevation label for the Stair E landing that currently reads “T/LANDING EL 19.75” with “T/LANDING EL. 19.875”.
2. In Section 1/S-458:
  - a. Replace the elevation label at the upper intermediate landing that currently reads “T/C10 EL 33.17” with “T/C10 SEE NOTE 2”.
  - b. Replace the elevation label at the lower intermediate landing that currently reads “T/GRATING EL 19.75” with “T/GRATING EL 19.875”.
  - c. Replace the elevation label at the lower intermediate landing that currently reads “T/C10 EL 19.58” with “T/C10 SEE NOTE 2”.
3. In Section 2/S-458:
  - a. Replace the elevation label at the landing that currently reads “T/GRATING EL 19.75” with “T/GRATING EL 19.875”.
  - b. Replace the elevation label at the landing that currently reads “T/C10 EL 19.58” with “T/C10 SEE NOTE 2”.
4. In Detail 3/S-458:
  - a. Delete the elevation label that reads “T/GRATING EL 33.33”.
  - b. Delete the elevation label that reads “T/C10 EL 33.17”.
5. In the general sheet notes at the bottom of the sheet, after Note 1, add the following “2. TOP OF STEEL ELEVATION AT STAIR LANDINGS SHALL BE COORDINATED WITH THICKNESS OF STEEL GRATING.”

**REFER TO DRAWING S-459.00**

1. In Detail 1/S-458:
  - a. Replace the note beneath the detail title that currently reads “T/STEEL EL 19.58 UNLESS NOTED THUS ( )” with “T/STEEL EL SEE NOTE 2”.
  - b. Replace the note beneath the detail title that currently reads “T/GRATING EL 19.75 UNLESS NOTED THUS ( )” with “T/GRATING EL 19.875 UNLESS NOTED THUS ( )”.
2. In Detail 2/S-458, replace the note beneath the detail title that currently reads “T/STEEL EL 33.17 UNLESS NOTED THUS ( )” with “T/STEEL EL SEE NOTE 2”.
3. In Detail 6/S-458, 460:
  - a. Replace the elevation label at the landing that currently reads “T/GRATING EL 19.75” with “T/GRATING EL 19.875”.
  - b. Replace the elevation label at the landing that currently reads “T/C10 EL 19.58” with “T/C10 SEE NOTE 2”.
4. In the general sheet notes at the bottom of the sheet, after Note 1, add the following “2. TOP OF STEEL ELEVATION AT STAIR LANDINGS SHALL BE COORDINATED WITH THICKNESS OF STEEL GRATING.”

**REFER TO DRAWING S-460.00**

1. In PARTIAL PIER LEVEL PLAN, replace the elevation label for the Stair F landing that currently reads "T/LANDING EL 19.75" with "T/LANDING EL. 19.875".
2. In Section 1/S-460:
  - a. Replace the elevation label at the intermediate landing that currently reads "T/GRATING EL 19.75" with "T/GRATING EL 19.875".
  - b. Replace the elevation label at the intermediate landing that currently reads "T/C10 EL 19.58" with "T/C10 SEE NOTE 2".
3. In Section 2/S-460:
  - a. Replace the elevation label at the landing that currently reads "T/GRATING EL 20.50" with "T/GRATING EL 19.875".
  - b. Replace the elevation label at the landing that currently reads "T/C10 EL 19.58" with "T/C10 SEE NOTE 2".
4. In Detail 3/S-460:
  - a. Replace the note beneath the detail title that currently reads "T/STEEL EL 19.58 UNLESS NOTED THUS ( )" with "T/STEEL EL SEE NOTE 2".
  - b. Replace the note beneath the detail title that currently reads "T/GRATING EL 19.75 UNLESS NOTED THUS ( )" with "T/GRATING EL 19.875 UNLESS NOTED THUS ( )".
5. In the general sheet notes at the bottom of the sheet, after Note 1, add the following "2. TOP OF STEEL ELEVATION AT STAIR LANDINGS SHALL BE COORDINATED WITH THICKNESS OF STEEL GRATING."

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT F – REVISIONS TO THE BID BOOKLET**

1. Delete Special Experience Requirements pages 3, 3a in the Bid Booklet and replace with revised pages 3-R, 3a-R, included with this Addendum.

## SPECIAL EXPERIENCE REQUIREMENTS

Special Experience Requirements apply as indicated below.

Bidder:	General Construction	<u>  X  </u>	YES	<u>      </u>	NO
Specific Areas of Work:	General Construction	<u>  X  </u>	YES	<u>      </u>	NO
	Plumbing Work	<u>      </u>	YES	<u>  X  </u>	NO
	HVAC Work	<u>      </u>	YES	<u>  X  </u>	NO
	Electrical Work	<u>      </u>	YES	<u>  X  </u>	NO
Manufacturers:	General Construction	<u>  X  </u>	YES	<u>      </u>	NO
	Plumbing Work	<u>      </u>	YES	<u>  X  </u>	NO
	HVAC Work	<u>      </u>	YES	<u>  X  </u>	NO
	Electrical Work	<u>      </u>	YES	<u>  X  </u>	NO

(A) **EXPERIENCE REQUIREMENTS FOR THE BIDDER:** The special experience requirements set forth below apply to the bidder indicated above. Compliance with such special experience requirements will be determined solely by the City prior to an award of contract. Failure to comply with the special experience requirements will result in the rejection of the bid as non-responsive.

- (1) The bidder must, within the last seven (7) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least one (1) large construction project involving the following areas: (1) marine construction (for example, dredging, bulkheads, gantry crane systems), (2) highway ramp construction, (3) construction of underground utilities (such as sanitary and storm sewers, high pressure gas lines, power distribution) and (4) heavy building construction. A large construction project, for the purposes of this definition shall mean a project of at least One hundred million (\$100,000,000.00) Dollars. The bidder may submit more than one project to demonstrate experience in the specified areas, however, at least one of those projects must have a value of at least One hundred million (\$100,000,000.00) Dollars.

(B) **QUALIFICATION FORM:** For each project submitted to demonstrate compliance with the special experience requirements, the bidder must complete the Qualification Form included in the Bid Booklet. The City will only evaluate a project if the following criteria are met: (1) the project is described on the Qualification Form, and (2) all information on the Qualification Form is provided. The City will not evaluate any project which does not comply with the criteria set forth herein, including any project which is referred to only on the resume of an individual.

(C) **CONDITIONS:** The City may, in determining compliance with the special experience requirements set forth above, consider prior projects completed by principal(s) or other employees of the bidder while affiliated with another entity, subject to the conditions set forth below.

- (1) Any principal or other employee on whose prior experience the bidder is relying to demonstrate compliance with these special experience requirements must have held the following: (a) a significant management role in the prior entity with which he/she was affiliated, and (b) a significant management role in the entity submitting the bid for a period of six months or from the inception of the bidding entity. If the bidder is relying on the prior experience of a principal or employee, it must submit documentation confirming the position held by such principal or employee in the prior entity, as well as in the bidding entity.
- (2) The bidder may not rely on the experience of its principals or other employees to demonstrate compliance with any other requirements, including without limitation, financial requirements or requirements for a specified minimum amount of annual gross revenues.

(D) **JOINT VENTURES:** In the event the bidder is a joint venture, at least one firm in the joint venture must

meet the above described experience requirements.

- (E) **EXPERIENCE REQUIREMENTS FOR SPECIFIC AREAS OF WORK:** The special experience requirements set forth below apply to the contractor or subcontractor that will perform specific areas of work. Compliance with such experience requirements will be evaluated after an award of contract. Within two (2) weeks of such award, the contractor will be required to submit the qualifications of the contractor or subcontractor that will perform these specific areas of work. If the bidder intends to perform these specific areas of work with its own forces, it must demonstrate compliance with the special experience requirements. If the bidder intends to subcontract these specific areas of work, its proposed subcontractor(s) must demonstrate compliance with the special experience requirements. Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City. The bidder is advised to carefully review these special experience requirements prior to submitting its bid, as such experience requirements will be strictly enforced.

- (1) Special experience requirements apply to the contractor or subcontractor that will perform specific areas of work specified in the section(s) set forth below.

General Construction

- (a) Section 07610: Sheet Metal Roofing

- (2) Special experience requirements applicable to the contractor or subcontractor that will perform specific areas of work are summarized below. Such experience requirements are set forth in full in the Addendum to the General Conditions.

- (a) The contractor or subcontractor performing the work of this section must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least three (3) projects similar in scope and type to the required work. In addition, the contractor or subcontractor must be licensed, certified or approved by the manufacturer.

- (3) For each project submitted to demonstrate compliance with the special experience requirements for specific areas of work, the contractor or proposed subcontractor will be required to complete the Qualification Form included in the Bid Booklet. The City will only evaluate a project if the following criteria are met: (1) the project is described on the Qualification Form, and (2) all information on the Qualification Form is provided. The City will not evaluate any project which does not comply with the criteria set forth herein, including any project which is referred to only on the resume of an individual.

- (F) **EXPERIENCE REQUIREMENTS FOR MANUFACTURER(S):** The special experience requirements set forth below apply to the manufacturer that will supply or fabricate specific material or equipment. Compliance with such experience requirements will be evaluated after an award of contract. Within two (2) weeks of award, the contractor will be required to submit the qualifications of the proposed manufacturer(s). Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City.

- (1) Special experience requirements apply to the manufacturer(s) of material and/or equipment specified in the section(s) set forth below.

General Construction

- (a) Section 07610: Sheet Metal Roofing

- (2) Special experience requirements applicable to the manufacturer(s) of specified material or equipment are summarized below. Such experience requirements are set forth in full in the Addendum to the General Conditions.

- (a) The manufacturer providing the material or equipment specified in this section must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project. Such similar material or equipment provided by the manufacturer must have been in satisfactory service for not less than five (5) years.

**Section 16752**  
**DIGITAL VIDEO SYSTEM**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Provide a complete digital video system. The system shall include all necessary workstations, software, digital video recording equipment, cameras, IP Encoders, IP Decoders, command consoles, equipment racks, networking switching hardware, and real-time video monitoring equipment, power supplies, conduit, cable and accessories for a complete operational digital video system.

**1.02 RELATED SPECIFICATIONS**

- A. Section 01821 - Training
- B. Section 16050 - Basic Electrical Materials and Methods
- C. Section 16121 - Wires and Cables - 600 Volts and Below
- D. Section 16130 - Electrical Raceway Systems
- E. Section 16264 - Uninterruptible Power Supplies
- F. Section 16511 - Lighting
- G. Section 16723 - Fiber Optic Cable

**1.03 REFERENCES**

- A. Codes and standards referred to in this Section are:
  - 1. NEC - National Electrical Code
  - 2. NYCBC - New York City Building Code
  - 3. ONVIF - Open Network Video Interface Forum

**1.04 SUBMITTALS**

- A. General: Furnish all submittals, including the following, as specified in Section 01330 - Shop Drawings and Section 16050 - Basic Electrical Materials and Methods.
- B. Product Data and Information: Furnish manufacturer's data on all equipment and devices in the assembly, including voltages, number of phases, current ratings, capacities and other relevant data as stated in the specifications.
- C. Shop Drawings: Furnish shop drawings for the digital video system including the following:
  - 1. Furnish Documentation of qualification of integrators and installers meeting the criteria of section 1.07 QUALIFICATIONS.

2. Furnish wiring diagrams for assemblies that show connections to electrical power and communication. Clearly differentiate between shop-installed portions of wiring and field installed portions.
3. A manufacturer's standard connection diagram or schematic showing more than one method of connection is not acceptable unless the intended method is clearly identified.
4. Furnish front elevations of panels and racks showing space allocation of equipment.
5. Furnish building floor plan and equipment room layouts showing cable and conduit routing and space allocation of equipment.
6. Provide system narrative that explains the proposed devices work together to meet the requirements within the specification. Explain how the software will be set up for operations.

#### 1.05 REFERENCE ABBREVIATIONS

A. This specifications references abbreviations in accordance with the following list:

#### 1.06 SYSTEM DESCRIPTION

- A. This section specifies the minimum requirements for a Digital Video Monitoring, Recording and Storage System (DVMRS).
- B. The DVRS shall have the capability to scale to accommodate a minimum of 100 cameras installed strategically throughout the MTS site. The majority of the installed cameras will be placed indoors with a certain number of additional cameras to be installed outdoors. The system will support both fixed and PTZ cameras as outlined in the engineering drawings.

## 1.07 QUALIFICATIONS

- A. Manufacturer: Company specializing in manufacturing the Products specified in this section with minimum three years documented experience with service facilities within 100 miles of Project.
- B. Supplier: Authorized distributor of specified manufacturer with minimum three years documented experience.
- C. Integrator: Authorized certified integrator and installer of Digital Video server

## 1.08 WARRANTY

- A. Furnish a written 3-year minimum warranty covering software, and all equipment associated with the digital video system including parts and labor from the digital video system manufacturer.

## 1.09 SPARE PARTS

- A. Furnish the following spare parts:
  - 1. One of each type of camera provided
  - 2. One of each type of lens provided.
  - 3. One type of each type of converter, network terminating units, midspan
  - 4. One type of each type of camera housing
  - 5. Twenty percent but not less than two, of each type of power supply.
- B. Packaging: Plainly tag and mark spare parts for identification and for reordering and properly box and wrap spare parts to prevent deterioration. Completely identify the box on the outside.

## PART 2 PRODUCTS

## 2.01 MANUFACTURERS

- A. Acceptable manufacturers are listed below. Other manufacturers of equivalent products may be submitted for approval.
  - 1. Camera and Accessories
    - a. Axis Communications
    - b. Bosch Security Systems
    - c. Sony Corporation

2. Digital Video Servers
  - a. GENETEC, Inc. – Omnicast
  - b. Milestone
  - c. Salient Systems
  - d. OnSSI
3. Ethernet Media Converters/Fiber Optic Transmitters and Multiplexers
  - a. Allied Telesis
  - b. IFS (Interlogics/UTC/GE)
  - c. Siquira
4. Equipment Racks
  - a. Provide Equipment racks that meet the requirements of Division 16 section "Telephone and Data Systems."
5. Network Switch
  - a. Provide Equipment racks that meet the requirements of Division 16 section "Telephone and Data Systems."
6. Industrial Monitors
  - a. Allen Bradley
  - b. VarTech Systems Inc.

2.02 GENERAL STANDARDS

- A. All equipment and materials used shall be standard components that are regularly manufactured and utilized in the manufacturer's system.
- B. All equipment and components used shall have been thoroughly tested and proven in actual use.
- C. All equipment and components used shall be CE-marked and FCC-certified.
- D. All systems and components shall be provided with the availability of a toll-free (US and Canada), technical assistance program (TAP) from the manufacturer. The TAP shall allow for immediate technical assistance for either the dealer/integrator/installer or the City at no charge.
- E. Each dealer/integrator/installer and DSNY shall have access to a password-protected e-support Web site for Web-based technical assistance on a 24-hour basis. This site will enable downloads of software updates, manuals, review of frequently asked questions, and generation of service tickets with a 24-hour maximum response time.

- F. All systems and components shall be provided with a three working days turnaround repair express and 24-hour parts replacement. The repair and parts express service shall be guaranteed by the manufacturer for warranty and non-warranty items.

## 2.03 DIGITAL VIDEO RECORDING SYSTEM MANAGEMENT

### A. Digital Video Recording System Configuration

#### 1. General

- a. The DVMRS shall be configured to provide a minimum of 30 days of video archival, stored automatically on hard drive disks. The storage requirement for this system shall be based on a configuration where the all cameras, will be on a recording video schedule initially set for 24 hours per day, Monday through Sunday.. The storage system should be expandable.
- b. The IP based compressed signals will be transmitted into a Network switch. The Digital Video Recorder units will receive the data streams directly from the Network Switch via TCP/IP transmission protocols. The Digital Video Recorder units will then take the compressed video signal and store the video using internal hard drives for archival storage. The Digital Video Appliances shall offer the ability to leverage multiple quality settings (Low, Medium and High).
- c. Recorders and servers shall consist of rack-mountable PCs connected to the Local Area Network (LAN).
- d. Video and other data managed by the DVRS shall be accessible from the workstation PCs connected directly to the LAN.
- e. The DVMRS shall include Graphical User Interface (GUI) based client server software Suite designed to run on PC workstations running the latest version of Microsoft Windows Professional operating system.
- f. The DVMRS GUI software functions shall include specific software applications within the software Suite that shall include; System Setup and Administration, Live Monitoring, Live and Recorded video retrieval with PTZ camera control, Video playback; Video export, Robust alarm Global monitoring, and other capabilities as described below.

2. Compatibility with Digital Video Cameras: The DVRS shall work with a wide variety of IP Cameras. The Digital Video Recorders will utilize a standard Ethernet connection for video input via TCP/IP transmission

protocols. The DVRS shall be fully scalable to accommodate future camera recording and video management up to 100 cameras.

3. Storage: The DVRS shall be capable of supporting unlimited video storage capacity by offering a hardware architecture that is scalable and configurable to allow external devices such as AIT Tape Libraries or SANS storage devices to be added in the future.
4. Workstations: The DVRS shall be a distributed, multi-user, multi-tasking system capable of supporting simultaneous request from multiple workstations for video call-up and Alarm monitoring.
5. Video Recording Tasks: The DVRS shall be capable of the following tasks:
6. Simultaneous Tasks: The DVR units shall be capable of performing multiple tasks simultaneously, and within practical limits no task shall interfere with any other task. The DVR units shall prioritize tasks so that recording and alarm processing will continue uninterrupted regardless of any number of requests being received from workstations at any given time. DVR units shall be capable of performing the following tasks simultaneously:
  - a. Recording Tasks
    - (1) Storing video to internal hard drives for storage.
    - (2) Maintain an accurate index of video files stored on local disks.
    - (3) Delete older files as needed to free up space to record newer video clips.
    - (4) Be able to selectively transfer recorded video to long-term storage media upon request, automatically if necessary.
  - b. Alarm Tasks
    - (1) Execute video image analysis algorithms including activity detection and video loss detection as well as providing detailed alarm messages.
    - (2) Alarm messages shall allow for priority color-coding of specific cameras and audible audio notification output for all cameras if required.
    - (3) Sending alarm messages to the server or workstation for proper management of alarm responses.

- (4) Processing alarm response instructions including calling camera presents, changing recording modes, and controlling alarm relay outputs.
  - c. Workstation Tasks
    - (1) Supplying one or more live video streams with a maximum of 64 live streams of video in the Software GUI.
    - (2) Support up to 16 windows of Live and Recorded video streams in the software GUI at the same time for review.
    - (3) Enabling one or more users to play back previously recorded video, including "Instant Replay" of video recorded within the last few seconds of video capture.
    - (4) Sending real-time commands to PTZ cameras for live camera control.
7. Recording Modes: DVR units shall support the following recording modes:
  - a. Continuous Recording: DVRS shall be capable of recording 24 hours a day, 7 days a week on a full time recording schedule.
  - b. Scheduled Recording: Establish a recording schedule for each camera based on hours of the day and days of the week including recorder settings such as frame rate, resolution, bandwidth and quality settings.
  - c. Alarm Recording: Enable the System Administrator to define alarm responses including:
    - (1) Instructions to trigger recording of specified cameras at specified frame rates and quality settings. Alarm responses to include the following recording capabilities:
      - (a) Start recording cameras not currently being recorded.
      - (b) Supplement continuous or scheduled recording by changing the recording mode or triggering recording of the same camera on a different recorder in a different video format.
      - (c) Selectively copy video to long-term storage media upon alarm.
    - (2) System Administrators shall determine whether video will be retained on long-term storage media for each continuous or

scheduled recording instruction. Automatically retain video on long-term storage media when video is recorded as a part of a defined response to an alarm event.

- d. On Demand Recording: The DVRS shall allow authorized users to stop and start recording from within the GUI application software.

8. Workstation Software

- a. Multi-Tasking: GUI application software shall enable users to manage multiple windows and perform multiple tasks simultaneously, including the following:

- (1) Monitoring progress as one or more video clips are retrieved from a long-term storage media and made ready for playback.
- (2) Allow for scheduling of clips to be downloaded at a specific time for a specific authorized end user.
- (3) Exporting video to digital media or to an analog output device for permanent, long term storage or investigative usage.

9. Video Window Layouts: Users shall be able to select from the following video window layouts with live or recorded video:

- a. Single Camera view – 1 camera displayed in the entire GUI workspace.
- b. Quad camera view – 4 cameras arranged in two rows of two individual windows displayed in the entire GUI workspace.
- c. Three by Three (3 x 3) – 9 total cameras arranged in three rows of three individual windows displayed in the entire GUI workspace.
- d. Four by Four (4 x 4) – 16 total cameras arranged in four rows of four individual windows displayed in the entire GUI workspace.
- e. Free: Open, move and size multiple independent video windows as needed in a tile or cascade layout.

10. Aspect Ratio: The software shall ensure that the ratio of the width and height of the displayed video images always matches the ratio that was originally captured regardless of the size of the video window.

11. Zoom: During viewing of live and/or recorded video, the GUI shall allow the user to select an area of interest and zoom in without pausing the video.

12. Image Toolkit: When viewing live or recorded video, the software shall provide functions to work with an individual video image in a paused video window including the following capabilities:
  - a. Print the image to any standard PC based printer.
  - b. Save the image to a common image file format. Image file formats shall include, but not be limited to: .JPG, .BMP, .PSD, Tiff and Targa.
  - c. Copy the image to a clipboard so the image can be pasted into any PC based software application.
  - d. Adjust the brightness and/or contrast of the image.
  - e. Convert the image from color to grayscale.
  - f. Apply filters to the image to de-speckle, smooth, or sharpen the image.
  - g. Apply edge detection to highlight borders or surfaces of objects within the image.
  - h. Add the date and time onto the image.
  - i. Add descriptive text annotation onto the image.
13. Processing Video Requests: When a user submits a video request, the DVRS shall automatically perform whatever tasks are necessary to make the requested video available for playback, regardless of the video storage location.
14. Multiple Video Requests and Video Clips: The DVRS shall enable users to submit and manage multiple requests for video in the following fashion:
  - a. The GUI organizes video requests in a tree structure to maintain the hierarchical relationship between video requests and corresponding video clips.
  - b. Use icons and text to indicate status of requests and video clips.
  - c. The GUI shall list cameras in the group and show a separate video clip icon for each camera, if a request is based on a group of cameras.
  - d. The GUI shall show every available video clip that matches the video request when a camera recorded in more than one video format by more than one recorder at a requested time.

- e. The GUI shall facilitate viewing video clips from a sequence of camera views. For example, clips showing a subject walking through a facility or a package moving along a conveyer belt.
  - f. The GUI to enable the user to use drag-and-drop to re-order the video clips within a group to create the desired sequence of cameras.
  - g. Include a GUI hotkey to open the next video clip in sequence. A function to pause playback in the current video window and open the next video clip in sequence in a new video window. The next video clip shall be positioned to the same time where the previous video clip paused, and the next video clip shall start playing automatically. By pressing the "Next Video Clip" hotkey each time the subject is leaving the camera view, the user can conveniently follow the subject or object through the sequence of video clips.
  - h. The DVRS shall support time-synchronized playback of recorded video on up to 16 windows simultaneously.
15. Controlling Video Playback: After opening a video window to play back a video clip, the GUI shall enable a user to control all aspects of playback.
- a. Playback Controls
    - (1) Single button to start and stop video playback.
    - (2) Single button to step forward or backward through the video in single time increments.
    - (3) Single button to step forward or backward through the video in single frame increments.
    - (4) Single button to step forward or backward through the video in multiple frame increments.
    - (5) Single button for moving through the video frames in Reverse playback mode.
    - (6) The ability to cause the video to loop continuously through a recorded video clip segment.
  - b. Positioning Controls: Slider bars and buttons to quickly and conveniently position to the beginning, end or any other time period within the video clip.
  - c. Speed Control: The DVRS shall incorporate a slider bar to control the rate of playback. Enable the user to select playback speeds that are

slower than, equal to, faster than the rate at which the video was originally recorded.

16. Scanning Recorded Video for Activity: The DVRS shall provide a function to rapidly process video clips and locate images with activity. Activity scanning provides an intelligent substitute for manual "fast forward" and scanning including the following:

- a. Enables the user, through the GUI, to specify a scanning interval to control the percentage of recorded images that will be checked for activity.
- b. Provide a GUI function to enable the user to select one or more areas of interest and/or adjust the sensitivity for those scanned areas.
- c. When activity is detected, the GUI will display a thumbnail of the corresponding video image with a timestamp. The sequence of thumbnails will provide high level overview of the activity in the video clip, allowing the user to make a quick assessment of whether further review is warranted.
- d. Support Multi-tasking of other investigative functions while Activity Scanning.
- e. Click on a thumbnail to position the video for the user in the GUI while scanning is still in progress.
- f. Support video playback of the related clip and/or unrelated clips while scanning is in progress.

17. Requesting Live Video

- a. The GUI shall enable the user to open live video windows by using the mouse to drag a camera or group of cameras from the camera tree directly into the video window area of the application window.
- b. The GUI shall enable users to view live video from multiple DVR units and sites simultaneously.

18. Controlling Live Video Windows

- a. Live video windows shall be consistent with video playback windows in appearance and operation.
- b. Live video windows shall maintain a cache of recent images. Enable the user to pause live video and quickly review recent images, then resume live video.

**B. System Monitoring and Problem Notification**

1. The DVRS shall monitor each system component, and generate system alert messages to notify system administrators of any component, and generate system alert messages to notify system administrators of any component that is not operating normally.
2. Provide a normally open dry contact that closes when any alarm occurs to activate a "Trouble Alarm" at SCADA.

**C. Security:** The DVRS shall include login security to control the following functions available to each system user:

1. Grant and/or deny rights to individual users or groups of users.
2. Restrict the ability to modify the system configuration.

**D. Additional System Integration Capabilities:** The DVRS shall be a non-proprietary system providing an open system architecture with the capability of being integrated with other systems (Analog or Digital) through a variety of methods.**E. Extendible GUI with Add-On Module Architecture:** The DVRS GUI shall support an add-on module architecture that enables the DVRS Manufacturer to add custom windows and menu options without modifying or recompiling the GUI application code. The DVRS Manufacturer shall provide a software development kit that enables developers to create custom applications and web pages with seamlessly integrated digital video features.**F. Advanced DVRS Functionality**

1. The DVRS shall provide a flexible platform framework to allow for expansion and enhancement as technology becomes available
2. Advanced Outdoor Motion Detection: The DVRS shall have the ability to leverage Intelligent Motion detection providing the ability to discriminate against motion that is not of interest based on the following parameters:
  - a. Show motion, so the user can see all movement that the motion detection algorithm sees.
  - b. Target size, minimum and maximum.
  - c. Compensate for distance from the camera.
  - d. Target speed, minimum and maximum.
  - e. Length of time target has been in field of view.

- f. Global change to compensate for events like a panning camera.
  - g. Target minimum movement.
  - h. Mask region.
  - i. Support arbitrarily shaped masks.
  - j. Contrast both global and local.
  - k. Target aspect ratio.
3. Web Based Video Retrieval: The DVRS shall support Web Based Video View or the Internet.

2.04 DVRS HARDWARE SYSTEM CONFIGURATION REQUIREMENTS:

- A. The DVRS shall be configured to provide the specific hardware specifications outlined:
- 1. DVRS Master Communication Server, which is a Windows Server based service used to control all of the data flow in the DVRS. The Master Communications Server shall be a redundant component offering two, hot-swappable power sources and two mirrored drives so that the SQL database maintaining the indexing schema for the DVRS' Video clips is protected.
  - 2. IP Based Digital Video Appliances
    - a. The DVRS shall utilize Digital Video Appliances (DVA) to compress and digitize the composite Analog video signals generated by the cameras. The DVA's shall be able to support multiple frame rates (CIF and 4 CIF) and multiple quality settings (Low, Medium, and High) for maximum user flexibility. The DVA's shall have the flexibility to support multiple digital streaming speeds from 1 Fps to 30 Fps and utilize a M-JPEG-4 compression algorithm.
    - b. IP Based Digital Video Recorders shall minimally have 32 inputs, 6 TB Hard Drive storage; DVR shall provide resolution capability of 1080P. DVR shall be compatible with motion JPEG.
  - 3. IP Based Digital Video Storage Recorders: The DVRS shall be configured to provide the specific software specifications outlined:
    - a. Recording rate and scheduling: The DVRS shall record all cameras at 10 FPS. The cameras can be defined as security cameras shall be initially configured for 24 hours per day. The other cameras are for process observation and no recording is required.

- b. Alarming functionality: The DVRS shall be fully capable of supporting robust alarm sources and offers robust alarm responses to those sources. These capabilities include the following abilities for alarm sources:
- (1) Alarm Inputs: Include DVR units or system components that accept alarm inputs from electrical devices. Inputs shall be configurable as normally open or normally closed.
  - (2) Video Activity Detection: DVR units capable of analyzing video images to detect activity. The absence of activity to correspond to the OFF state of the alarm source, and when activity is detected the state of the alarm source shall be ON.
    - (a) Provide a way to define the area(s) of interest for activity detection for a particular camera. The GUI to provide flexible drawing tools to enable the user to include and exclude multiple areas with rectangular or irregular shapes.
    - (b) Activity detection sensitivity to be configurable. When properly configured, the Network Digital Video Management System (NDVMS) to detect all legitimate activity while avoiding excessive false detection due to minor fluctuations in lighting or other insignificant changes in the video images.
  - (3) Video Loss Detection: DVR units to detect lost camera signals.
  - (4) Serial Alarm Interfaces: The NDVMS shall be able to receive messages from access control systems and other similar systems through serial communication interfaces. The NDVMS will interpret messages from the serial interface as state changes for one or more logical alarm contacts.
  - (5) Alarm Responses: Include a comprehensive feature set for responding to alarm messages.
    - (a) Alarm Responses: Include a comprehensive feature set for responding to alarm messages.
    - (b) Send instructions to multiple devices and system components in response to any alarm message, regardless of the source of the alarm message.
    - (c) Base alarm source configurations and alarm responses on a schedule. The alarm source configuration and alarm

responses to depend on the time of day and/or day of the week.

- (d) Alarm response to consist of various types of instructions to be executed by the NDVMS in response to each alarm message that can be generated by an alarm source.
  - (e) Recording Instructions: Start recording or change the recording mode for one or more cameras connected to one or more recorders.
  - (f) Call camera presets and call cameras to monitors for viewing live video associated with the alarm event.
  - (g) Relay Output Instructions: Control the state of one or more alarm relay outputs.
  - (h) Alarm Display Instructions: Specify how alarms shall be shown on alarm monitoring stations, including the colors to be used to indicate the alarm urgency, any messages to be displayed, whether video shall automatically display on the alarm monitoring station, etc.
  - (i) Termination Instructions: This type of instruction causes other instructions to stop.
- c. Failover Recording Mode: The DVRS shall require 100 available inputs for failover recording for the system. The failover requirement shall allow the system to have redundancy for up to 100 total cameras in the event of a system outage.
- d. Camera Presets: The DVRS shall provide comprehensive features to take advantage of camera presets in the System Software. The GUI software shall support the following features:
- (1) Setting Up Camera Presets: Provide GUI functions to enable authorized users to view and modify camera preset definitions when the PTZ cameras allow camera presets to be defined through a computer interface.
    - (a) Each preset to have a preset number and a description.
    - (b) Provide a button in the preset setup function to set the camera shot and a separate button to call the camera shot in order to verify that the preset is working properly.
    - (c) Allow user to designate one preset as the default preset, or to specify that autopan is the default. The NDVMS to

return the camera to the default preset or autopan mode when a user finishes controlling a camera or when a task ends that specified a different preset.

- (2) Access to Camera Presets when Viewing Live Video: Provide buttons and/or a dropdown list to select a camera preset when viewing live video (either on-screen or on an analog monitor controlled via the GUI). Interface to support selection of the autopan mode.
  - (3) Using Camera Presets for Scheduled Recording: Enable user to specify the camera preset to be used when defining scheduled recording tasks. The NDVMS to call the camera preset automatically when initiating the scheduled recording task.
  - (4) Using Camera Presets for Alarm Recording: Enable user to specify the camera preset to be used when defining recording instructions as part of an alarm response. The NDVMS to call the camera preset automatically when initiating the alarm recording task.
  - (5) Prioritizing Camera Presets: The NDVMS to use task priorities to determine which camera preset shall be called when multiple tasks are requesting different presets for the same camera. If a higher priority task overrides the preset for a lower priority task, the lower priority task's preset restored when the higher priority task ends.
  - (6) Using Camera Presets Associated with Camera Groups: The NDVMS to enable authorized users to define group presets for cameras. This is a camera preset that is called whenever the user drags and drops the group onto a monitor icon.
4. Camera Tours: The DVRS shall support robust camera tour functionality so that live viewing and monitoring of the site location is made easy for the surveillance staff. The DVRS software shall support the following set of features:
- a. Provide GUI functions to enable authorized users to view and modify camera tour definitions.
    - (1) NDVMS allows for creation of multiple camera tours.
    - (2) Each camera tour has multiple numbers of cameras.
    - (3) Each camera can have an associated preset and dwell time.

- (4) Dwell time can be set for all cameras in a camera tour in one operation.

## 2.05 CAMERAS

### A. High Resolution Color Camera:

1. Manufacturer: AXIS Communications 221 Network Camera, or equal.
2. General Requirements
  - a. This product shall be manufactured by a firm whose quality system is in compliance with the I.S./ISO 9001/EN29001, QUALITY SYSTEM.
  - b. The manufacturer shall be ISO 14000 Certified and adhere to an Environmental Management System that strives to reduce the impact its products and processes have on the environment.
  - c. This camera is designed to use a high quality IR-sensitive 1/3" progressive scan CCD sensor. Be equipped with a removable IR-cut filter, providing so-called day/night functionality. Be fitted with a high quality F1.4 Varifocal IR-corrected DC-iris lens and provide pictures down to 0.65 lux at F1.0 while in day mode (with IR-filter in use) and down to 0.08 lux while in night mode (with IR-filter removed).
  - d. The camera shall be able to deliver high-quality video in at least 15 different resolutions up to 640x480 pixels over IP networks.
  - e. The camera shall allow the transmission of images at up to 45 frames per second in all resolutions, using standard Motion JPEG format.
  - f. The camera shall incorporate Automatic and Manual White Balance and an electronic shutter operating in the range 2 and 1/12500 second.
  - g. The camera shall support both fixed IP addresses and dynamically assigned IP addresses provided by a Dynamic Host Control Protocol (DHCP) server.
  - h. The camera shall support both fixed IP addresses and dynamically assigned IP addresses provided by a Dynamic Host Control Protocol (DHCP) server.
  - i. The camera shall provide support for restricting access to pre-defined IP addresses only, so-called IP address filtering.
  - j. Customer-specific settings, including statically assigned IP address, the local time & date, event functionality and video configuration,

shall be stored in a nonvolatile memory and shall not be lost during power cuts or soft reset.

- k. Be equipped with LEDs, capable of providing visible status information. LEDs shall indicate the camera's operational status and provide information about power, communication with receiver, the network status and the camera status.

3. Electrical Specifications

- a. When powered via 24 VAC , the camera shall be synchronized to the power line zero crossing to ensure roll-free vertical interval video switching and recording. The vertical phase delay shall be adjustable from 0 to 358 degrees.
- b. Video output: The camera shall be equipped with one 100BASE-TX Fast Ethernet-port, using a standard RJ-45 socket.
- c. Rated Voltage and Range
  - (1) Power over Ethernet according to IEEE 802.3af - Class 2
  - (2) 7-20 VDC, max 7 W

4. Mechanical Specifications

- a. Weight: 1.2 lb. (0.55 kg)
- b. Dimensions (less lens/including connectors)
  - (1) 1.5 H x 3.4W x 6.2 L inch (38 x 88 x 157mm)

5. Environmental Specifications

- a. Operating Temperature: 32 degrees F to + 122 degrees F. (0 degrees C to + 50 degrees C)
- b. Operating humidity: 20% to 80% non-condensing

6. Cameras Lens: Be equipped with a Varifocal 3.0 – 8.0mm F1.0, DC- iris, CS mount.

7. Housing: Axis T92A20 Housing

- a. Technopolymer(Polycarbonate), 3 removable cable glands
- b. Outdoor
- c. -4F to +122F (-20C to +50C)
- d. Power: 230VAC/ 44W

## B. Fixed Dome Network Camera

1. Manufacturer: AXIS Communications M3301 Fixed Dome Network Camera, or equal
2. General Requirements
  - a. This product shall be manufactured by a firm whose quality system is in compliance with the I.S./ISO 9001/EN29001, QUALITY SYSTEM.
  - b. The manufacturer shall be ISO 14000 Certified and adhere to an Environmental Management System that strives to reduce the impact its products and processes have on the environment.
  - c. Be designed to provide video streams at 30 frames per second in Motion JPEG, MPEG-4 or H.264, supporting resolutions up to 640x480 pixels.
  - d. Use a high quality 1/4" progressive scan sensor. Be fitted with a lens: Varifocal 2.8-10mm, F1.3, DC-iris.
  - e. The camera shall be able to deliver at least two individually configurable full resolution H.264 video streams over IP networks.
  - f. Support Motion JPEG encoding in a selectable range from 1 up to 30 frames per second in all resolutions. Support H.264 encoding in a selectable range from 1 up to 30 frames per second in all resolutions.
  - g. The camera shall support both fixed IP addresses and dynamically assigned IP addresses provided by a Dynamic Host Control Protocol (DHCP) server.
  - h. The camera shall incorporate Automatic and Manual White Balance and an electronic shutter operating in the range 1/4 and 1/5.000 second.
  - i. The camera shall provide backlight compensation with automatic and definable exposure zones.
  - j. Provide support for restricting access to pre-defined IP addresses only, so-called IP address filtering.
  - k. Be equipped with LEDs, capable of providing visible status information. LEDs shall indicate the camera's operational status and provide information about power, communication with receiver, the network status and the camera status.

## 3. Electrical Specifications

- a. When powered via 24 VAC , the camera shall be synchronized to the power line zero crossing to ensure roll-free vertical interval video switching and recording. The vertical phase delay shall be adjustable from 0 to 358 degrees.
- b. Video output: The camera shall be equipped with one 100BASE-TX Fast Ethernet-port, using a standard RJ-45 socket and shall support auto negotiation of network speed (100 MBit/s and 10 MBit/s) and transfer mode (full and half duplex).
- c. Rated Voltage and Range: Power over Ethernet according to IEEE 802.3af – Class 1.

## 4. Mechanical Specifications

- a. Weight: 1.0 lb. (0.43 kg)
- b. Dimensions (less lens/including connectors): 3.7 H x 5.2 W x 5.2 L inch (94 x 132 x 132mm)
- c. Power Connections: Power over Ethernet according to IEEE 802.3af - Class 2 RJ-45 connector

## 5. Environmental Specifications

- a. Operating Temperature: 32 degrees F to + 122 degrees F. (0 degrees C to + 50 degrees C)
- b. Operating humidity: 20% to 80% non-condensing

## C. Exterior Dome Network Camera

- 1. Manufacturer: AXIS Communications P5522-E PTZ Network Dome Cameras, or equal
- 2. General Requirements
  - a. This product shall be manufactured by a firm whose quality system is in compliance with the I.S./ISO 9001/EN29001, QUALITY SYSTEM.
  - b. The manufacturer shall be ISO 14000 Certified and adhere to an Environmental Management System that strives to reduce the impact its products and processes have on the environment.

- c. Camera shall be designed to provide simultaneous Motion JPEG and MPEG-4 video, and support resolutions up to 720x480 pixels.
- d. Provide high speed pan and tilt functions, contain so called day/night functionality and be equipped with 18x optical and 12x digital zoom.
- e. The camera shall use a high quality IR-sensitive 1/4" CCD sensor and be equipped with a removable IR-cut filter, providing so-called day/night functionality.
- f. The camera shall be equipped with a high quality F1.4 – F3.0 DC-iris lens with 18x optical zoom providing a horizontal angle of view between 48° and 2.8°.
- g. Provide pictures down to 0.3 lux at F1.4 while in day mode (with IR-filter in use) and down to 0.005 lux while in night mode (with IR-filter removed).
- h. Be equipped with accurate high-speed pan-tilt functionality with 360° endless pan range.
- i. The camera shall be able to deliver high-quality video in at least 5 different resolutions up to 704x480 pixels (NTSC) or 704x576 pixels (PAL) over IP networks.
- j. The dome camera shall allow the transmission of images at up to 30 frames per second (NTSC) or 25 frames per second (PAL) in all resolutions, using Motion JPEG.
- k. The dome camera shall provide simultaneous support for both Motion JPEG and MPEG-4.
- l. Automatic and Manual White Balance, backlight compensation and electronic shutter operating in the range 1 and 1/10,000 second.
- m. The camera shall support both fixed IP addresses and dynamically assigned IP addresses provided by a Dynamic Host Control Protocol (DHCP) server.
- n. Provide a guard tour functionality which allow the dome to automatically move between selected presets using an individual speed and viewing time for each preset.
- o. The camera shall provide support for restricting access to pre-defined IP addresses only, so-called IP address filtering.

- p. Customer-specific settings, including statically assigned IP address, the local time & date, event functionality and video configuration, shall be stored in a nonvolatile memory and shall not be lost during power cuts or soft reset.
- q. Be equipped with LEDs, capable of providing visible status information. LEDs shall indicate the camera's operational status and provide information about power, communication with receiver, the network status and the camera status.

### 3. Electrical Specifications

- a. When powered via 24 VAC, the camera shall be synchronized to the power line zero crossing to ensure roll-free vertical interval video switching and recording. The vertical phase delay shall be adjustable from 0 to 358 degrees.
- b. Video Output: The dome camera shall be equipped with one 100baseTX Fast Ethernet-port, using a standard RJ-45 socket and shall support auto sensing of network speed.
- c. Rated Voltage and Range
  - (1) 19-28 VAC, max 25 VA
  - (2) 24-40 VDC, max 20W

### 4. Mechanical Specifications

- a. Weight: 4 lb. (1.8 kg)
- b. Dimensions (less lens/including connectors): 8.9 H x 5.7 W x 5.7 L inch (225 x144 X 144mm)

### 5. Environmental Specifications

- a. Operating Temperature: 41 degrees F to + 122 degrees F. (5 degrees C to + 50 degrees C)
- b. Operating humidity: 20% to 80% non-condensing

### 6. Cameras Lens: F1.4-3.0, f=4.1mm wide to 73.8mm tele, autofocus; Focus range: 35mm (wide) or 800mm(tele) to infinity

### 7. Enclosure: Axis Pendant Dome

- a. Heavy Duty Rate Exterior with Heater

## D. Hybrid Camera

1. Manufacturer: Sony SNC-ZB550, or equal
2. General Requirements
  - a. This product shall be manufactured by a firm whose quality system is in compliance with the I.S./ISO 9001/EN29001, QUALITY SYSTEM.
  - b. The manufacturer shall be ISO 14000 Certified and adhere to an Environmental Management System that strives to reduce the impact its products and processes have on the environment.
  - c. This camera is designed to Use a high quality 1/3" progressive scan Exmor CMOS sensor.
  - d. The camera shall be able to deliver high-quality video in at least 15 different resolutions up to 1280 x 1024 pixels over IP networks.
  - e. The camera shall allow the transmission of images at up to 30 frames per second in all resolutions, using standard Motion JPEG format.
  - f. Be equipped with LEDs, capable of providing visible status information. LEDs shall indicate the camera's operational status and provide information about power, communication with receiver, the network status and the camera status.
3. Electrical Specifications
  - a. When powered via 24 VAC , the camera shall be synchronized to the power line zero crossing to ensure roll-free vertical interval video switching and recording. The vertical phase delay shall be adjustable from 0 to 358 degrees.
  - b. Video output: The camera shall be equipped with one NTSC standard/ PAL standard
4. Mechanical Specifications
  - a. Dimensions (with lens/not including projecting parts)

(1) 2 7/8 H x 2 1/2 W x 7 7/8 L inch (72 x 63 x 197mm)
5. Environmental Specifications
  - a. Operating Temperature: 41 degrees F to + 113 degrees F. (5 degrees C to + 45 degrees C)

- b. Operating humidity: 20% to 80% non-condensing
- 6. Cameras Lens: Be equipped with a high quality CS mount
- 7. Housing: Axis T92A20 Housing
  - a. Technopolymer(Polycarbonate), 3 removable cable glands
  - b. Outdoor
  - c. -4F to +122F (-20C to +50C)
  - d. Power: 230VAC/ 44W

## 2.06 HYBRID RECEIVER

A. Manufacturer: Sony SNCA-ZX104, or equal

B. General Requirements:

- 1. This product shall be manufactured by a firm whose quality system is in compliance with the I.S./ISO 9001/EN29001, QUALITY SYSTEM.
- 2. The manufacturer shall be ISO 14000 Certified and adhere to an Environmental Management System that strives to reduce the impact its products and processes have on the environment.
- 3. Supports 4 hybrid cameras
- 4. Inputs: 4- BNC
- 5. Outputs: 4- BNC, 1 RJ45(100Base-TX/10Base-T)
- 6. Serial Interface: RS-485

C. Electrical Specifications

- 1. Requirements: DC12V (AC 100V to AC 127V, AC200V to AC 240V, 50/60Hz for AC adaptor)
- 2. Consumption: 8.5W/9.0W (AC100V/AC 240V) with AC adaptor

## 2.07 MIDSPAN POWER INJECTOR

A. Power of Ethernet (PoE) midspan power injector allow the follow of both power and data in one cable. Supporting standards IEEE 802.3af (Power over Ethernet), RFC 3621 (Power over Ethernet MIB)

## B. Connection

1. PoE ports and management port: Rj-45, shielded, EIA 586A and 586B
2. Electrical
  - a. Power Supply: 110 VAC, Input Current 4A@110V,
  - b. Output Voltage: 48VDC, Power 15.4 W minimal
3. Environmental
  - a. Operating Temperature: 0 to 40 degrees C (32 to 104 degrees F)
  - b. Operating Humidity: 10 to 90%, non-condensing
4. Management
  - a. SNMPv3 and Telnet
  - b. Multiple agents accessible through single management entity
  - c. Web-management via PowerView Pro application

## C. Security

1. MD5 authentication
2. DES privacy algorithm

- D. Manufacturer: PowerDesign PD-6512/AC/M 12-port and PD-6506/AC/M 6-port, Provided as needed with 20% spare capacity minimal.

## 2.08 ETHERNET MEDIA CONVERTERS/ FIBER OPTIC TRANSCEIVERS/ MULTIPLEXERS

- A. General: Contractor shall supply all components required for a fully operational system including mounting and housing hardware.

## B. Power supply Cabinet

1. The power supply cabinet shall be 19" 3HU rack mountable, while housing and powering twelve (12) single width rack mount modules. Power supply cabinets shall have all connections on the front side of the cabinet. Cabinets shall have reversible mounting brackets to allow for connections to be concentrated at the front or rear of the rack. Cabinets shall have two (2) built in fans for efficient cooling. Main voltage of the power supply cabinets shall be 100-120 Vac with a frequency of 50/60 Hz. Maximum drop out time shall be 10ms, and power efficiency at full load shall be greater than 90%. Maximum DC output power shall be 80 Watts.

2. The operating temperature of the cabinet shall be 0 degrees C to 40 degrees C, and have dimensions of LxWxH 9.4" (23.8cm) x19.0" (48.2cm) x 5.18"(13.2cm).
3. Contractor shall supply all mounting hardware where racks are not used.
4. The power supply cabinet shall be Allied Telesis model AT-MCR12-10 or approved equal.

C. Ethernet Media Converters

1. Media converter shall be able to convert media from both Ethernet and Fiber Optics to the other.
2. Media supported: Twisted Pair, Fiber (multi-mode)
3. Power Supply requirements: 100-240vAC 50/60Hz +/- 3%
4. Standard: IEEE 802.3U-LAN
5. Packet Transmission Characteristics:
  - a. Round Trip Delay: 0.4s Maximum
  - b. Bit Error Rate (BER): <10<sup>-12</sup>
6. The receiver shall be Allied Telesis model MC101XL-10 series or approved equal.

2.09 EQUIPMENT RACKS

- A. Provide equipment racks that meet the requirements of Section 16745 Telephone System.

2.10 UPS

- A. Provide UPS with a minimum of 4 hours continuous running time for all digital video equipment meeting the requirements of Section 16264 - Uninterruptible Power Supplies.

2.11 NETWORK SWITCH

- A. Provide network switches that meet the requirements of Section 16745 Telephone System.

## 2.12 MASTER COMMUNICATIONS SERVER

### A. General

1. The Communications Server controls all data flow.
2. The Communications Server tracks where each video clip resides, synchronizes all CPU time clocks, coordinates alarm responses, and manages recorder fail over functions.

### B. Dedicated Server and Workstations: Provide Dedicated Server and workstations having following minimum features:

### C. Dedicated Server

1. Processor: Dual Xeon, Dual Core CPU at 2.93GHz and 8MB cache, 1333 MHz FSB
2. Memory: 8GB of SDRAM
3. Monitor: 17-inch Rack mountable LCD
4. Hard Drive: 73GB 15K RPS SCSI hard drive
5. Network Card: Dual 10/ 100/ 1000 Ethernet Communication
6. 48X IDE CD-RW/DVD
7. Digital Tape Backup System
8. Pullout Keyboard and trackball
9. Graphics accelerator Card
10. Documentation: Provide all documentation, manuals and licenses.
11. Safety/Regulatory: UL, FCC B, approved
12. Latest revision of software at time of bid required:
  - a. Windows Server
  - b. Microsoft Office Professional
  - c. McAfee Virus Scan
13. Operator's Software: Provide necessary software to support video software program.

## D. Workstation

1. Processor: 3rd Generation Intel Core i7 – 3770 quad-core processor (3.4 GHz, 8MB Shared Cache).
2. Memory: 8GB of SDRAM
3. Monitor
  - a. LED LCD Type: 24-inch TFT active matrix
  - b. Video Input Signal: Analog RGB and digital DVI-D
  - c. Viewing Angle: 170 degrees horizontal, 160 degree vertical @ Contrast Ratio > 10:1
  - d. Contract Ratio: 1000:1
  - e. Brightness: 300cd/m2
  - f. Prime Mode: 1920 X 1080
  - g. Panel Surface Anti-glare, hard-coating
  - h. Mounting: VESA-compliant adapter plate)
4. Graphics Accelerator Card
5. Hard Drive: 1 TB minimum
6. DVDRW: 4X minimum
7. Mouse: Microsoft Trackball Explorer
8. Network Card: Gigabit 10/100/1000 PCI Network Interface
9. Keyboard: 104+ keys
10. Documentation: Provide all documentation, manuals and licenses
11. Safety/Regulatory: UL, FCC B, approved
12. Latest revision of software at time of bid required
  - a. Windows Professional
  - b. Microsoft Office Professional
  - c. McAfee Virus Scan
15. Video Software Package: Provide necessary software to support video software program.

## 2.13 INDUSTRIAL MONITORS

### A. Products

1. Allen Badley Model No. 6186-M15SSTR
2. Vartech Systems Inc. Model No. VT150PSS with resistive touchscreen
3. or approved equal

### B. Provide industrial monitors to allow viewing of specific camera locations. The industrial monitors that are UL Listed and shall have the following features:

1. Field monitors shall be a 15" stainless steel panel-mount LCD display, located in a NEMA 4X stainless steel enclosure.
  - a. LCD Type: 15-inch color TFT active matrix
  - b. Video Input Signal: Analog RGB and digital DVI-D
  - c. Contrast Ratio: 500:1
  - d. Brightness: 250 nits
  - e. Prime Mode: 1024 x 768
  - f. Anti reflective protective faceplate.
  - g. NTSC Ethernet, HD15/5BNC and coaxial cable input compatible.
  - h. Input Voltage: 120 V, 60Hz
  - i. Power Consumption: 24 W
  - j. Operational Temperature: 0°C to +50°C (32°F to +122°F)
  - k. Humidity: 10% to 90% relative, non-condensing.
  - l. Weight: (20 lbs)
  - m. Dimensions: 122 in H x 16.2 in W x 2.3 in D

## 2.14 RACEWAY SYSTEM

### A. A complete raceway system shall be provided for digital video systems in accordance with riser diagrams shown meeting the requirements of Section 16130 - Electrical Raceway Systems.

### B. Empty conduits shall be provided with pull wire to facilitate pulling of cables.

## 2.15 CABLING

### A. Wire and cable meet the requirements for digital video system cable in Section 16121 - Wire and Cable - 600 Volts and below.

### B. Fiber optic cables meeting the requirements for digital video system cable in Section 16723 - Fiber Optic Cable.

**PART 3 EXECUTION****3.01 EXAMINATION**

- A. Examine areas and conditions under which digital video system's conduit systems and plywood mounting panels are to be installed. Correct conditions detrimental to proper completion of the work. Do not proceed with work until unsatisfactory conditions have been corrected in a manner acceptable to the Resident Engineer.

**3.02 INSTALLATION**

- A. General: Install digital video system as shown or required. Comply with requirements of the Electrical Code for the City of New York, NEC and local electrical codes.
- B. Pole Mounted Cameras: Coordinated mounting details for camera installed on lighting with lighting poles manufacture as specified in Section 16511 – Lighting.
- C. Install conduit systems wiring, and plywood mounting panels as indicated and in accordance with the drawings and with recognized industry practices.
- D. Install system per the manufacturer's guidelines.
- E. Verify the operational compatibility and configuration requirements of all devices.
- F. Provide independent support from building structure for all devices.
- G. Submit typical mounting arrangement for all devices.

**3.03 TESTING AND COMMISSIONING**

- A. The supplier shall be responsible for final system hardware hook-up and checkout prior to commissioning the system to the DSNY.

**3.04 PROGRAMMING SERVICES**

- A. Additional programming services shall be provided by the system manufacturer's representatives in the following areas:
  - 1. Database/importation
  - 2. Customized system programming
  - 3. Operational programming
  - 4. Custom report design/development generation
  - 5. Custom video badge design
  - 6. Graphical map design/development and test
  - 7. Camera naming
  - 8. CCTV camera call-up and recording features

9. Alarm responses
10. System database backup

### 3.05 SOFTWARE SUPPORT

- A. The manufacture shall supply all software upgrades and support for two (2) years after acceptance.

### 3.06 FIELD SERVICES

- A. Manufacturer's Representative: Provide a factory-trained experienced, competent, and authorized representative of the digital video system manufacturer to visit the site of the Work and inspect, check, adjust if necessary, approve the equipment installation and provide training as specified in Section 01821 – Training. Provide all instruments and equipment necessary to conduct required tests, adjustments and training. Submit copies of these documents executed and signed by the manufacturer's representative. Have the representative present when each equipment item is placed in operation. Provide representative service as often as necessary until all problems are corrected and each equipment item is installed and operating satisfactorily.
- B. All equipment shall be tested for proper operation. Testing shall be observed by DSNY for general compliance with the intended use.
- C. Training: Following completion of installation and field testing provide training for 12 employees of the DSNY in the proper operation, troubleshooting and maintenance of the equipment as outlined below. All training will be at the DSNY's facilities at a time agreeable to the DSNY:
  1. Operational Training: A minimum of two 4-hour sessions combining both classroom and hands-on instruction, excluding travel time.
  2. Maintenance Training: A minimum of two 4-hour sessions combining both classroom and hands-on instruction, excluding travel time.

### 3.07 CLEANING AND REPAIR

- A. Contractor shall clean out and discard all materials used in the construction of the system.
- B. All damage caused during installation shall be repaired to the original state by the Contractor.
- C. All repairs shall meet the Resident Engineer's satisfaction to be acceptable.

### 3.08 SCHEDULE OF CAMERA EQUIPMENT

A. Abbreviations used in the schedule are as follows:

Service

S – Security

PO- Process Observation

Camera Types

HRCC - High Resolution Color Camera

FDNC – Fixed Dome Network Camera

EDNC – Exterior Dome Network Camera

HC - Hybrid Camera

# ADDENDA CONTROL SHEET

**TITLE: Southwest Brooklyn Marine Transfer Station – Building Construction**

[illegible]

THE CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
DIVISION OF STRUCTURES

November 2, 2012

**ADDENDUM No. # 4**

FOR FURNISHING ALL LABOR AND MATERIAL NECESSARY AND REQUIRED FOR:

**S216-399A**

**Southwest Brooklyn Marine Transfer Station – Building Construction**

This addendum is issued for the purpose of amending the requirements of the Bid and Contract Documents and is hereby made a part of said Bid and Contract Documents to the same extent as though it were originally included therein.

The bidder is advised that the items listed below apply to the project:

1. **The Bid Opening for the contract described below scheduled for November 15, 2012, at 2:00 pm is rescheduled to November 20, 2012, at 2:00 pm.**

Contract #1 – General Construction Work

2. **Bidders Questions and Responses to Questions:**

See Attachment A.

3. **Revisions to Addendum #2:**

See Attachment B.

4. **Revisions to Specifications:**

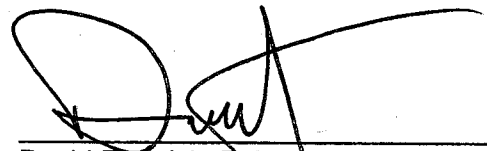

See Attachment C.

5. **Revisions to Drawings:**

See Attachment D.

THIS ADDENDUM MUST BE SIGNED BY ALL BIDDERS AND ATTACHED TO THEIR BIDS.

If additional information is required, please contact the Department of Design and Construction, Contract Section at (718) 391-2200, (718) 391-1727, or by fax at (718) 391-2615.

**DDC PROJECT #: S216-399A**

**PROJECT NAME: SOUTHWEST BROOKLYN MARINE TRANSFER STATION**

**ATTACHMENT A – BIDDERS QUESTIONS AND DDC RESPONSES**

No.	Bidders' Questions	DDC Responses
1	Regarding specification section 16742-1.07, please provide the radio frequencies that are currently being used at another City of New York transfer station.	Radio frequencies have not been finalized at the transfer stations that are currently under construction.
2	Spec 15810-5 2.02-C calls for all spiral ductwork to be 6" W.G. Spec 15810-5 2.01-H1 "Refer to equipment schedules for duct system pressures and seal classifications." The majority of the ductwork required by the equipment schedule on this project will be 2" W.G. Please confirm all spiral duct is to be 6" W.G.  What pressure class should the rectangular duct be built to?	Provide ductwork classified as follows: <ul style="list-style-type: none"> <li>• For fan systems with 0.0-1.5" ESP: Provide 2" pressure class ductwork.</li> <li>• For fan systems with 1.5-3.5" ESP: Provide 4" pressure class ductwork.</li> <li>• For fan systems with 3.5" or greater ESP: Provide 6" pressure class ductwork.</li> </ul>
3	Spec 15810-7 3.01-B states "Provide duct lining at the following locations: Ductwork and plenums conveying outside air, extending from intake louvers through to the inlet side of all air-handling units." Please confirm duct lining is required at these locations.  Also, please specify a type.	Provide duct lining as required in Specification 15810 Section 3.01.B. Do not provide duct insulation where duct is lined, per Specification 15815, Section 3.02.A.  Provide duct liner per Specification 15815, Section 2.02.D:  D. Internal Duct Liner Insulation - Acoustical Insulation: <ol style="list-style-type: none"> <li>1. Type: Fiberglass duct liner board with black surface</li> <li>2. Density: Minimum 1-1/2 lbs. per cubic foot</li> <li>3. Thickness: 1-1/2 inch minimum</li> <li>4. Thermal Conductivity: 0.23 Btu-Inch/HR.FT2. °F @ 75F mean temperature</li> </ol>
4	Re: Appendix I To what elevation does the existing fendering system extend to?	The top of the existing fendering system extends to +4.5' above the Brooklyn Highway Datum, as shown on drawing S-902.00.
5	Re: Concrete Restoration 03930 Please advise as to the possible locations concrete restoration will be required.	As indicated in Section 03930, Part 1.01.B:  "B. The concrete restoration work specified herein is applicable to existing structural concrete elements that are to remain and become incorporated in the final structures. The actual

No.	Bidders' Questions	DDC Responses
		<p>extent of the work shall be determined on the basis of field inspections conducted jointly by the Contractor and the Commissioner."</p> <p>Although the exact locations and extent of work will be determined on the basis of these field inspections, potential locations of concrete restoration include existing concrete surfaces to remain after demolition operations are complete.</p>
6	<p>On Contract Drawing S-100, Notes 1 through 3 describe the procedure for demolition and survey of the existing piles. Please confirm the expected time duration (work or calendar days) between submittal of an existing pile survey and a response with direction regarding revised pile locations and construction methods.</p>	<p>The Contractor's survey of existing foundation piles, performed following the demolition of the existing base slab, will be processed and reviewed similar to other Contractor submittals.</p>
7	<p>Please refer to Specification 01330, "Shop Drawings," Page 01330-5, Paragraph 1.06H. The Commissioner states that "a reasonable time should be allowed for" submittals to be reviewed and returned. Please confirm, in work or calendar days, expected turnaround times for submittals.</p>	<p>Although every effort will be made to return submittals within 10 working days, there is no firm commitment or guarantee for submittal turnaround time. Actual turnaround time will depend on many variables, including the size, complexity, completeness and proper sequencing of the submittals.</p>
8	<p>In Addendum #3, Attachment E – Revisions to the Drawings, a note is made to "Refer to Drawing C-003.01 and make changes. We do not believe we have received Drawing C-003.01 in any of the addendum. Please confirm when this drawing was made available.</p>	<p>There is no Drawing C-003.01 in Addendums #1 through #3. Drawing C-003.00 was not re-issued. Addendum #3 should have referred to Drawing C-003.00.</p> <p>Note, however, that Drawing C-003.00 was revised in Addendum 2, but not re-issued.</p>
9	<p>With regards to the concrete formwork of the ramp top slab (formwork within the diaphragms), please advise if we can use stay-in-place void forms off of the bridge concrete.</p>	<p>All formwork is to be removed as per drawings R-001 &amp; R-201 General Note 15.</p>
10	<ol style="list-style-type: none"> <li>On Drawing C-035.00 under Note 1 it states that the treatment capacity for STS 1 is 6.0cfs-8.5cfs and STS 2 is 14cfs-17.5cfs. What is the actual required treatment flow rate for each of the locations? Is the capacity given in the notes the peak flow rates or actual design flows?</li> <li>If the exact treatment flow capacity at each location is not known, at what flow rate do I provide an equal for? The range of capacity at each location is not specific enough for us to provide an equal. There</li> </ol>	<p>Three units are to be provided. Please see drawing C-029.01, C-028.1, C-026.02, and C-035.01 for locations and details.</p> <ol style="list-style-type: none"> <li>The range provides the average flow and the peak flow (average cfs - peak cfs). The units should be sized to adequately capture and treat the peak flows as follows: STU-1 peak flow of 8.5 cfs, STU-2 peak flow of 17.5 cfs, and STU-3 peak flow of 8.5 cfs.</li> <li>See response above. Provide units that meet the peak flow requirements for each stormwater treatment unit as indicated in the</li> </ol>

No.	Bidders' Questions	DDC Responses
	is roughly an \$8,000 cost difference from a unit that can treat 14 cfs and a unit rated for 17.5 cfs.	response above.

**ATTACHMENT C – REVISIONS TO THE SPECIFICATIONS**

Specification Section 14640 Container Gantry Crane

1. Page 14640-10, Part 2.02A.16: After this part, add the following:

“A warning plate stating “CAUTION CONTAINER STACKS MAXIMUM 2 HIGH ON PIER OR BARGE” shall be installed in the operator’s cab within the operator’s normal line-of sight.”

2. Page 14640-40, Part 2.07B.10.d: Revise the second sentence to read as follows:

“The bus bar shall be provided with a PVC cover and electric heat tracing to prevent ice accumulation.”

Specification Section 15551 Chimney Automation System, Page 15551-4

Part 2.02E.1. Revise to read as follows:

- “1. Upon a call for heat all the appliance(s) connected to the chimney automation system, including the water heater will satisfy all internal safeties, and before the gas valve is opened the call for heat will land at the controller so the draft fan can start. Once the proof of flow for the draft fan has occurred and the adjustable pre purge time delay has elapsed the controller will send the start command back to the appliance so the gas valve can open and the appliance can start. All appliances are to be interlocked with either (lead or lag) controller.

THE CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
DIVISION OF STRUCTURES

**ADDENDUM TO THE GENERAL CONDITIONS**

---

**The General Conditions are hereby amended in accordance  
with the terms and conditions set forth in this Addendum.**

---

**I. PROJECT DESCRIPTION**

**FMS #: SA216-399A**

**PROJECT NAME: Southwest Brooklyn Marine Transfer Station**

**PROJECT DESCRIPTION:** This Project consists of the construction of a new marine transfer station. The principal items of work include construction of a new marine transfer station with access ramps, demolition of existing fendering systems, site work, utilities, equipment, dredging, HVAC systems, plumbing systems, fire protection, and electrical systems.

**PROJECT LOCATION: 1824 Shore Parkway**  
**BOROUGH: Brooklyn**  
**CITY OF NEW YORK**  
**ZIP CODE: 11214**  
**COMMUNITY BOARD #: 11**

**PROJECT MANAGEMENT:**

- ☐ DDC shall publicly bid and enter into a single Contract for the Project. DDC shall manage the Project using its own personnel.
- ☒ DDC shall publicly bid and enter into a single Contract for the Project. A Construction Management firm (the "CM") hired by DDC shall manage the Project. The Contractor is advised that the CM shall serve as the representative of the Commissioner at the site and shall, subject to review by the Commissioner, be responsible for the inspection, management, coordination and administration of the required construction work, as delineated in the article of the Standard Construction Contract (September 2008) entitled "The Resident Engineer".
- ☐ DDC has entered into CM/Build Contract for the Project. The CM/Build Contractor shall be responsible for conducting a competitive bid process and entering into the contract(s) for the Project.

**II. CM / BUILD CONTRACT: REVISIONS TO THE GENERAL CONDITIONS**

Not Used

### III. CONTRACTS FOR THE PROJECT

The Project consists of a single contract, the Contract for General Construction Work. The Contractor for General Construction Work is responsible for the performance of all required work for the Project as set forth in the Contract Documents (General Conditions, Drawings and Specifications), including all responsibilities and obligations assigned to separate Contractors for the following subdivisions of the work: Plumbing Work, HVAC Work, and Electrical Work. All responsibilities and obligations in the Contract Documents assigned to separate Contractors for such subdivisions of the work are the responsibility of the Contractor for General Construction Work.

### IV. SCHEDULES

The Contractor is advised that Schedules A through F are attached to, and incorporated as part of, this Addendum to the General Conditions. These schedules contain important information that is specific to this Project. The Contractor is advised to carefully review these schedules.

### V. APPLICABILITY OF ARTICLES AND AMENDED ARTICLES

The Contractor is advised that various Articles in the General Conditions may not apply to this Project or may apply as amended. Such Articles advise the Contractor to "Refer to the Addendum to the General Conditions for the applicability of this Article." Such Articles are set forth below. A check mark indicates whether the Article (1) applies to the Project, (2) does not apply to the Project, or (3) applies to the Project as amended. If no box is checked, the Article, as set forth in the General Conditions, applies to the Project. Amended Articles, if any, are set forth following this list of Articles.

<u>Article No.</u>	<u>Article</u>	<u>Sub-Article or PART</u> (if applicable)	<u>Applies</u>	<u>Does not Apply</u>	<u>Applies as Amended</u>
1.02	Scope and Intent	B )	PROGRESS SCHEDULE		X
1.04	Contract Drawings	C )	PRINTS	X	
1.05	Shop Drawings and Record Drawings	A )	SHOP DRAWINGS		X

		PART B – PROJECT RENDERING		X	

#### COMPUTER WORKSTATIONS

H) Number of Computer Workstations to be provided as outlined in Article 1.42 H, item 4: 10

## AMENDED ARTICLES

The Contractor is advised that the amended Articles set forth below are included in the General Conditions and apply to the Project.

- Article 1.02 B) **Progress Schedule** is replaced with Section 01321 Construction Progress Scheduling
- Article 1.05 A) **Shop Drawings** is amended to include Section 01330
- Article 1.09 **Surveys** is replaced with Section 01435 Monitoring Survey
- Article 1.13 **Sleeves and Hangers** is replaced with Section 15060 Hangers and Supports
- Article 1.15 **Temporary Heat** is replaced with Section 01512 Temporary Heating and Ventilating Facilities
- Article 1.26 **Security Guards/Fire Guards on the Site** is replaced with Section 01561 Site Security
- Article 1.34.PART B.B **Temporary Services - Electrical** is replaced with Section 16020 Temporary Electrical System
- Article 1.37 **General Electrical Requirements** is replaced with Sections 01513 Temporary Power Facilities, 16050 Basic Electrical Materials and Methods, 16121 Wires and Cables – 600 Volts and Below, 16122 Medium Voltage Cables, 16130 Electric Raceway System, 16140 Wiring Devices, 16220 Electric Motors, Section 16411 Disconnect Switches, 16430 480 Volt Switchgear, 16443 Panelboards and 16445 Motor Control Centers
- Article 1.42.G **Specific Requirements – Resident Engineer's Office** and Article 1.42 H **Additional Equipment for the Resident Engineer** is replaced with Section 13125 Resident Engineer's Field Office Trailer

## VI. ADDITIONAL ARTICLES

The Contractor is advised that the additional Articles set forth below are included in the General Conditions and apply to the Project.

### 1.43 DDC Safety Requirements

The Department of Design and Construction Safety Requirements included with the Information for Bidders are revised to include the following:

- A) The Contractor shall employ a properly qualified safety professional familiar with all work under the Contract whose duties shall be to initiate, review, and cause implementation of measures for the protection of health and the prevention of accidents. The Contractor shall also employ a full-time onsite safety representative(s) whose duties shall be to work under the direct supervision of the safety professional to implement the safety program for the work of that Contractor. Subcontractors shall employ a properly qualified safety professional for work that is of a nature that is not within the area of safety expertise of the prime Contractor's safety professional and onsite safety representative. The safety representatives shall not be the Contractor's or any of the subcontractor's project manager, engineer, superintendent, or anyone else working on the project.
- B) **Safety Professional Qualifications:** Recognition as a safety professional shall be based on a minimum of: certification by the Board of Certified Safety Professionals as a Certified Safety Professional; certification by the New York State Department of Labor pursuant to 12 NYCRR Section 59 1.12; certification by the American Board of Industrial Hygiene as a Certified Industrial Hygienist; certification by the World Safety Organization as a Certified Safety Manager or Certified Safety Specialist; and 3 years of professional safety management experience in the types of construction and conditions expected to be encountered on the site.
- C) **Safety Representative Qualifications:** Qualifications of the safety representative(s) shall include a minimum of: 3 years of relevant construction experience (2 years of which were exclusively in construction safety management), successful completion of a 30-hour Occupational Safety and Health Administration (OSHA) Construction Safety and Health training course, 40-hour OSHA Hazardous Materials training course (if involved in demolition and waste handling), excavation competent person training, and Confined Space training.

## VII. SPECIAL EXPERIENCE REQUIREMENTS FOR THE PROJECT

- (1) **GENERAL:** The following are set forth below: (a) Special Experience Requirements applicable to the contractor or subcontractor that will perform specific areas of work, and (b) Special Experience Requirements applicable to the manufacturer that will provide specific material or equipment.
- (2) **REVISION OF SPECIFICATIONS AND DRAWINGS:** In the event the Specifications and/or the Contract Drawings contain any Special Experience Requirement that is not set forth below, such Special Experience Requirement is deemed deleted, except as otherwise expressly provided in Section VIII of this Addendum.
- (3) **SPECIAL EXPERIENCE REQUIREMENTS FOR SPECIFIC AREAS OF WORK:** The special experience requirements set forth below apply to the contractor or subcontractor that will perform specific areas of work. Compliance with such experience requirements will be evaluated after an award of contract. Within two (2) weeks of such award, the contractor will be required to submit the qualifications of the contractor or subcontractor that will perform these specific areas of work. If the contractor intends to perform these specific areas of work with its own forces, it must demonstrate compliance with the special experience requirements. If the contractor intends to subcontract these specific areas of work, the proposed subcontractor(s) must demonstrate compliance with the special experience requirements. Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City.
  - (a) **Special Experience Requirement #1:** The contractor or subcontractor performing the work of this section must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least three (3) projects similar in scope and type to the required work. In addition, the contractor or subcontractor must be certified, licensed or approved by the manufacturer. This Special Experience Requirement applies to the contractor or subcontractor that will perform specific areas of work specified in the sections set forth below.

General Construction:

- Section 07610: Sheet Metal Roofing

- (4) **SPECIAL EXPERIENCE REQUIREMENTS FOR MANUFACTURERS:** The special experience requirements set forth below apply to the manufacturer that will supply or fabricate specific material or equipment. Compliance with such experience requirements will be evaluated after an award of contract. Within two (2) weeks of award, the contractor will be required to submit the qualifications of the proposed manufacturer(s). Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City.
  - (a) **Special Experience Requirement #2:** The manufacturer providing the material or equipment specified in this section must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project. Such similar material or equipment provided by the manufacturer must have been in satisfactory service for not less than five (5) years. This Special Experience Requirement applies to the manufacturer that will provide material or equipment specified in the section(s) set forth below.

General Construction:

- Section 07610: Sheet Metal Roofing

## VIII. REVISIONS: SPECIFICATIONS AND CONTRACT DRAWINGS

The Specifications and the Contract Drawings for the Project are revised in accordance with the provisions set forth below.

- (1) Owner: Wherever the term "Owner" is used in the Specifications and/or the Contract Drawings, such term shall mean the City of New York.
- (2) Other Entities: In the event any entity other than the City of New York is referred to or named as the "Owner" in the Specifications and/or the Contract Drawings, the name of such other entity is deemed deleted and replaced with the "City of New York".
- (3) Architect / Engineer: Wherever the words "Architect", "Engineer", "Architect / Engineer" or "Architect and/or Engineer" are used in the Specifications and/or the Contract Drawings, such words are deemed deleted and replaced with the word "Commissioner".
- (4) Products / Manufacturers: Wherever the Specifications and/or the Contract Drawings require the contractor to provide a particular product (i.e., material and/or equipment) from a designated manufacturer and/or vendor, the term "or approved equal" is deemed inserted, even if only one product and/or manufacturer is specified, except as otherwise provided below.
  - (a) Proprietary Items: If the Bid Booklet contains a Notice which identifies a particular product from a designated manufacturer as a "Proprietary Item", the Contractor shall be required to provide such specified product. In such case, no substitution or "approved equal" will be permitted.
- (5) Special Experience Requirements: Special Experience Requirements for the Project, if any, are set forth in the Bid Booklet. Special Experience Requirements may apply to contractors, subcontractors, installers, manufacturers and/or suppliers. If the Specifications and/or the Contract Drawings contain any Special Experience Requirement that is not set forth in the Bid Booklet, such Special Experience Requirement is deemed deleted, except as otherwise provided below.
  - (a) Any Special Experience Requirement that provides that the entity performing the work or supplying the material must have more than three (3) years of experience, is revised to provide that the entity performing the work or supplying the material must have three (3) years of experience, except as described in paragraph (b) below.
  - (b) Any Special Experience Requirement that pertains to the abatement of hazardous materials shall not be subject to the deletion and/or revision set forth above. Such Special Experience Requirement shall remain in full force and effect.
  - (c) Any Special Experience Requirement that provides that the entity performing the work must be licensed, authorized, certified, approved by or acceptable to the manufacturer, is deemed deleted and replaced with the requirement that such entity must be properly trained for the specified work.
  - (d) Any Special Experience Requirement that provides that the individual workers performing the work must be licensed, authorized, certified, approved by or acceptable to the manufacturer, is deemed deleted and replaced with the requirement that such individual workers must be properly trained for the specified work.
- (6) Alternate Bids: If the agency is requesting the submission of Alternate Bids, a Notice regarding such Alternate Bids is set forth in the Bid Booklet. In the event of any conflict or inconsistency between (1) the Notice regarding Alternate Bids set forth in the Bid Booklet and (2) a provision in the Specifications and/or the Contract Drawings regarding Alternate Bids, the Notice set forth in the Bid Booklet shall prevail. If the agency is not requesting the submission of Alternate Bids, as indicated by the absence of a Notice in the Bid Booklet, and the Specifications and/or the Contract Drawings contain any provision regarding Alternate Bids, such provision is deemed deleted.
- (7) Contractor Retained Engineer: If the Specifications and/or the Contract Drawings require the Contractor to retain an Engineer to provide engineering services for the Project, the following sentence is deemed inserted: "Such Engineer must be a Professional Engineer, licensed in the State of New York."

- (8) LEED Related Provisions: If the Specifications and/or the Contract Drawings require the Contractor to purchase FSC certified wood, rapidly renewable materials, or materials within 500 miles, such provisions are deemed deleted and replaced with the requirement that if the contractor has purchased FSC certified wood, rapidly renewable materials, or materials within 500 miles, the contractor shall submit such forms or documentation as may be required by the City in order for the USGBC to certify that the Project qualifies for the related LEED credit(s).
- (9) Guarantees: Requirements for Guarantees and Maintenance are set forth in Schedule B, which is included in the Addendum to the General Conditions. In the event of any conflict or inconsistency between (1) a guarantee and/or maintenance requirement set forth in the Specifications and/or the Contract Drawings and (2) a guarantee and/or maintenance requirement set forth in Schedule B, the guarantee and/or maintenance requirement set forth in Schedule B shall prevail.
- (10) Warranties: Requirements for Warranties are set forth in Schedule B, which is included in the Addendum to the General Conditions.
- (a) In the event of any conflict or inconsistency between (1) a warranty requirement set forth in the Specifications and/or the Contract Drawings and (2) a warranty requirement set forth in Schedule B, the warranty requirement set forth in Schedule B shall prevail.
- (b) In the event a warranty requirement set forth in the Specifications and/or the Contract Drawings is omitted from Schedule B, such omission from Schedule B shall have no effect and the Contractor's obligation to provide the manufacturer's warranty, as set forth in the Specifications and/or the Contract Drawings, shall remain in full force and effect.
- (c) In the event a warranty requirement for a particular item of material or equipment is omitted from Schedule B, as well as from the Specifications or the Contract Drawings, and the manufacturer of such item actually provides a warranty, the Contractor shall be obligated to obtain and deliver to the Commissioner the highest level of warranty actually provided by that manufacturer.
- (11) Exculpatory Provisions: In the event the Specifications and/or the Contract Drawings contain any provision whereby the consultant and/or any of its officers, employees or agents, including subconsultants, is absolved of responsibility for any act or omission, such provision is deemed deleted.
- (12) Insurance: Provisions regarding insurance coverage the Contractor is required to provide are set forth in Article 22 of the City of New York Standard Construction Contract and Schedule A, which is included in the Addendum to the General Conditions. In the event the Specifications and/or the Contract Drawings contain any provision regarding insurance requirements, such provision is deemed deleted.
- (13) Indemnification: Provisions regarding indemnification are set forth in Articles 7, 12, 22 and 57 of the City of New York Standard Construction Contract. In the event the Specifications and/or the Contract Drawings contain any provision regarding indemnification, such provision is deemed deleted.
- (14) Dispute Resolution: Provisions regarding dispute resolution are set forth in Article 27 of the City of New York Standard Construction Contract. In the event the Specifications and/or the Contract Drawings contain any provision regarding dispute resolution, such provision is deemed deleted.
- (15) Payment to Other Entities: In the event the Specifications and/or the Contract Drawings contain any provision which requires the Contractor to make payments to an entity other than a subcontractor and/or supplier providing services and/or material for the project, such provision is deemed deleted.
- (16) General Conditions: In the event of any conflict or inconsistency between (1) the Specifications and/or the Contract Drawings and (2) the General Conditions, the General Conditions shall prevail.
- (17) Standard Construction Contract: In the event of any conflict or inconsistency between (1) the Specifications and/or the Contract Drawings and (2) the City of New York Standard Construction Contract, the City of New York Standard Construction Contract shall prevail.

**SCHEDULE A (FOR PUBLICLY BID PROJECTS)****Contract Requirements**

Various Articles of the Contract refer to requirements which are set forth in Schedule A of the General Conditions. The Schedule set forth below specifies the following: (1) the referenced Articles of the Contract, and (2) the specific requirements applicable to the contract.

REFERENCE	ITEM	REQUIREMENTS	CONTRACT FOR GENERAL CONSTRUCTION
Article 14 Contract	Time of Completion	Consecutive Calendar Days	Milestone 1 – 730 ccd Milestone 2 – 1,095 ccd
Article 15 Contract	Liquidated Damages	For each consecutive calendar day over completion time	Milestone 1 – \$5,000/day Milestone 2 – \$5,000/day \$
Article 17 Contract	Sub- contracts	Not to exceed percent of Contract Price	<b>60%</b>
Article 21 Contract	Retainage	Percent of voucher	If 100% bonds are required <b>5%</b> If 100% bonds are not required, and Contract Price is less than \$500,000 <b>10%</b> If 100% bonds are not required, and Contract Price is more than \$500,000 <b>10%</b>
Article 24 Contract	Maintenance & Guaranty	Percent of Contract Price	<b>1%</b>
Article 77 Contract	MWBE Program	See Subcontractor Utilization Plan in the Bid Booklet

## **SCHEDULE B**

### **Guarantees and Warranties**

(Reference: Article 1.22 of the General Conditions)

#### **GUARANTY FROM CONTRACTOR**

(1) **Contractor's Guaranty Obligation:** The Contractor shall promptly repair, replace, restore or rebuild, as the Commissioner may determine, any finished Work in which defects of materials or workmanship may appear or to which damage may occur because of such defects, during the one (1) year period subsequent to the date of Substantial Completion (or use and occupancy in accordance with the Contract), except for the areas of Work set forth below:

- Roofing and Waterproofing Work. For roofing work and waterproofing work, the guarantee period shall be (2) two years.
- Trees and/or Plant Material. For trees and/or plant material furnished and installed, the guarantee period shall be (2) two years. During the guarantee period, the Contractor shall provide all maintenance services set forth in the Specifications.

(2) **Guaranty Period:** The obligation of the Contractor, and its Surety under the Performance Bond, is limited to the period(s) of time specified above.

(3) **Other Provisions Deemed Deleted:** In the event the Specifications and/or the Contract Drawings contain any provisions regarding guaranty requirements, such provisions are deemed deleted and replaced with the guaranty requirements set forth in this Schedule B.

\*\*\*\*\*

#### **WARRANTY FROM MANUFACTURER**

(1) **Contractor's Obligation to Provide Warranties:** The items of material and/or equipment for which manufacturer warranties are required are listed below. For each item of material and/or equipment listed below, the Contractor shall obtain a written warranty from the manufacturer. Such warranty shall provide that the material or equipment is free from defects for the period set forth below and will be replaced or repaired within such specified period. The Contractor shall deliver all required warranties to the Commissioner.

(2) **Required Warranties:**

Specification Number	Material or Equipment	Length of Warranty
02396	Elastometric Fenders	10 years
02762	Pavement Markings	6 months
02822	Components of ornamental fences, rails, and gates	2 years
02822	Ornamental fence and gate powder coat and polyurethane finish	10 years
02827	Swing gate operators	5 years
05675	Crane Rail System	2 years
05830	Expansion joint systems	1 year
07140	Waterproofing system	2 years
07141	Surface applied waterproof coatings	5 years
07410	Components of metal wall panel assemblies	2 years
07410	Metal wall panel fluoropolymer finish	20 years

<b>Specification Number</b>	<b>Material or Equipment</b>	<b>Length of Warranty</b>
07410	Metal wall panel weather-tightness	10 years
07610	Sheet metal roofing/siding	20 years
07721	Roof hatch fluoropolymer finish	20 years
07811	Fire resistive materials	2 years
07921	Elastomeric joint sealant	10 years
08342	Overhead high speed fabric doors type 2	5 years
08342	Overhead high speed fabric doors type 1	lifetime
08520	Aluminum windows	3 years
08520	Aluminum windows metal finishes	15 years
08520	Aluminum windows glass	10 years
08630	Translucent insulated panels	5 years
08630	Fiberglass-sandwich-panel	10 years
08630	Translucent insulated panels aluminum finish	20 years
08660	Security screen	1 year
08711	Door hardware	3 years
08711	Door hardware electromagnetic, delayed-egress locks & exit devices	5 years
08711	Door hardware manual closers & concealed floor closers	10 years
08800	Coated glass products & Insulating glass	10 years
08800	Laminated glass	5 years
10200	Finishes on louvers & screens	20 years
10290	Polyethylene netting against UV breakdown	10 years
10436	Porcelain enamel signs	25 years
10436	Dimensional character/medallion sign finish	15 years
10505	Phenolic lockers and benches	3 years
10520	Portable fire extinguishers	6 years
10801	Bathroom mirrors	15 years
10881	Load Cells	5 years
11010	Fall restraint system defects	1 year
11010	Fall restraint system maintenance	1 year
11141	Diesel fuel dispensing system	5 years
11141	Diesel Fuel Piping	lifetime
11142	Fluid dispensing system against electrochemical corrosion	20 years
11211	Service Water System	1 year
11311	Oil water separator	1 year
11451	Domestic-type appliances	5 years
11570	Dust Suppression	1 year
13111	Impressed current-cathodic protection system	1 year
13852	Radiation detection system	3 years
13861	Odor Control Systems	1 year
14512	Containers	1 year
14640	Container Gantry Cranes	3 years
15076	Signs identifying piping/equipment	10 years
15486	Domestic water heater storage tanks	10 years

Specification Number	Material or Equipment	Length of Warranty
15486	Domestic water heater circulators	8 years
15486	Domestic water heater burner assemblies	5 years
15486	Domestic water heater complete heat exchanger assembly	3 years
15551	Chimney automation system	2 years
15551	Chimney automation system fans	10 years
15670	Condensing unit parts	1 year
15720	Air handling units parts	1 year
16122	Medium voltage cables	40 years
16511	Lighting control system computer	3 years
16751	Access control system proximity cards & readers	lifetime
16752	Digital video system	3 years
16122	Medium voltage cables	40 years
16230	Packaged Engine Generator Systems	2 years
16264	Uninterruptible Power Supply System	3 years
16511	Lighting control system computer	3 years
16511	Lighting Control System and Emergency Lighting Extended Warranty	2 years
16751	Access control system proximity cards & readers	Lifetime
16752	Digital video system	3 years

**(3) Application:** The obligations under the warranty for the periods specified above shall apply only to the manufacturer of the material or equipment, and not to the Contractor or its Surety; provided, however, the Contractor retains responsibility for obtaining all required warranties from the manufacturers and delivering the same to the Commissioner.

**(4) Other Provisions:** The warranty requirements set forth in this Schedule B are also included in the Specifications.

- (a) In the event of any conflict between a warranty requirement set forth in the Specifications and a warranty requirement set forth in Schedule B, the warranty requirement set forth in Schedule B shall take precedence.
- (b) In the event a warranty requirement set forth in the Specifications is omitted from Schedule B, such omission from Schedule B shall have no effect and the Contractor's obligation to provide the manufacturer's warranty, as set forth in the Specifications, shall remain in full force and effect
- (c) In the event a warranty requirement for a particular item of material or equipment is omitted from both Schedule B and the Specifications, and the manufacturer of such item actually provides a warranty, the Contractor shall be obligated to obtain and deliver to the Commissioner the highest level of warranty actually provided by that manufacturer.
- (d) In the event a warranty requirement is provided for a particular item of material or equipment, and such requirement specifies a warranty period that is longer than that which is actually provided by any of the specified manufacturers, the Contractor shall be obligated to obtain and deliver to the Commissioner the highest level of warranty actually provided by any of the specified manufacturers, unless otherwise directed in writing by the Commissioner.

## SCHEDULE C

### Contract Drawings

(Reference: Article 1.04(A) of the General Conditions)

The Schedule set forth below lists all Contract Drawings for the Project.

Sheet No.	Drawing No.	Title
<b><u>GENERAL</u></b>		
	G-001.00	COVER SHEET
I	G-002.00	DRAWING INDEX - SHEET 1

## **SCHEDULE D**

### **Electrical Motor Control Equipment**

Requirements for electrical motor equipment may be included in one or more sections of the Specifications for the Contract for the Project. Schedule D set forth below delineates specific information for electrical motor control equipment. In the event of any conflict between the specifications and this Schedule D, Schedule D shall take precedence; provided, however, in the event of an omission from Schedule D (i.e., Schedule D omits either a reference to or information concerning electrical motor equipment which is set forth in the Specifications), such omission from Schedule D shall have no effect and the Contractor's obligation with respect to the electrical motor control equipment, as set forth in the Specifications, shall remain in full force and effect.

## SCHEDULE F

### Shop Drawing and Material Samples Schedule

(Reference: Article 1.41 of the General Conditions)

The Schedule set forth below lists all submittal requirements for the Contract. In the event of any conflict between the Specifications and this Schedule F, Schedule F shall take precedence; provided, however, in the event of an omission from Schedule F (i.e., Schedule F omits either a reference to or information concerning a submittal requirement which is set forth in the Specifications), such omission from Schedule F shall have no effect and the Contractor's submittal obligation, as set forth in the Specifications, shall remain in full force and effect.

**Section 01120**  
**CONTRACT SUMMARY**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Location of work
- B. Description of Work
- C. Site Characterization Reports and Information

**1.02 LOCATION OF WORK**

- A. The work of this contract will be performed at Southwest Brooklyn, Borough of Brooklyn, on Gravesend Bay, south of 25th Avenue (Paper Street) and west of Shore Parkway.

**1.03 DESCRIPTION OF WORK**

- A. The following is a general description only, and shall not be construed as a complete description of the work to be performed.
- B. The principal items of work are:
  - 1. Demolition of existing fendering system, site structures and equipment.
  - 2. Dredging in area of new transfer station.
  - 3. Construction of new underground utility system and utility system foundation.
  - 4. Construction of new marine transfer station.
  - 5. Construction and installation of new container gantry crane.
  - 6. Construction and installation of new container transport system.
  - 7. Construction of new roadways and parking areas.
  - 8. Construction of new bulkhead walls and property line fence.
  - 9. Final grading and landscaping of land surrounding the new construction.
  - 10. Furnishing, installing, testing, and placing into operation complete HVAC systems, including new air distribution equipment, heat transfer equipment, ductwork, air monitoring systems, controls, and system testing and balancing.

11. Furnishing, installing, testing and placing into operation complete plumbing systems, including hot and cold water systems, storm drainage and sanitary drainage systems, fixtures and trim, and a new natural gas service from the utility company.
12. Furnishing, installing, testing and placing into operation fire protection pumping systems.
13. Furnishing, installing, testing and placing into operation complete electrical systems including a new substation, power distribution system, lighting and receptacle system.
14. Furnishing, installing, testing and placing into operation the following complete ancillary systems:
  - a. Fire detection, alarm and warning system
  - b. Lightning protection system
  - c. Security system
  - d. Telephone and paging system
  - e. Communication - intercom system
  - f. Closed-circuit television system

#### 1.04 SITE CONDITIONS AND SUBSURFACE CHARACTERIZATION REPORTS

- A. For the purposes of design, borings have been made, samples taken, and environmental investigations and topographical surveys have been made at the proposed Sites. The following documents are available for inspection by bidders.
  1. *Draft Initial Soil and Groundwater Sampling Program Summary Report*, April 2004.
  2. *Southwest Brooklyn Marine Transfer Station Design Repair Inspection, Appendix I, Supplemental Report of Findings*, December 12, 2003.
  3. *Southwest Brooklyn Marine Transfer Station Special Underwater Inspections, Report of Findings*, July 10, 2003.
  4. *Draft Preliminary Geotechnical Investigation Report, Southwest Brooklyn DSNY Marine Transfer Station, Brooklyn, NY*, October 24, 2003.
  5. *Survey of Mooring Equipment at Marine Transfer Stations*, May 11, 1994.
  6. *Stormwater Pollution Prevention Plan (SWPPP) Covering Construction at the Southwest Brooklyn Marine Transfer Station*
- B. Application for inspection of geotechnical data and other reports should be made to DSNY Bureau of Long Term Export, 7th Floor, 44 Beaver Street, NY, NY 10004. All such material and information relating to boring records and subsurface

conditions are expressly excluded from and are not a part of this Contract and are available for information purposes only. The DSNY does not warrant the accuracy of these documents.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01140**  
**WORK RESTRICTIONS**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Working hours

**1.02 RELATED SPECIFICATIONS**

- A. Section 01271 – Milestones, Incentives, and Liquidated Damages
- B. Section 01321 – Progress Schedule

**1.03 WORKING HOURS**

- A. The normal working hours for the project will be an 8-hour work day between the hours of 7:00 AM and 6:00 PM as directed by the Commissioner, Monday through Friday. However, due to the Construction Schedule, the Contractor is advised that he has the option to work a second shift and/or additional scheduled overtime, as needed, to complete all intermediate activities and to meet the date of substantial completion of the work as defined by Article 14 of the Standard Construction Contract and not later than the scheduled dates as defined in Sections 01271 – Milestones, Incentives, and Liquidated Damages, and 01321 - Progress Schedule, and the General Conditions.
- B. The Contractor shall have sufficient forms, shoring and other construction material; labor; permanent materials; equipment; tools and supervision available to support a second shift and/or scheduled overtime.
- C. The Contractor shall review the schedules to ensure his ability to comply therewith. The Contractor shall not be entitled to any extra compensation beyond the Contract price in order to meet the scheduled dates.
- D. The Contractor will be directed to take remedial actions as necessary to recover lost time as determined from the Construction CPM Schedules and in accordance with Section 01321 – Progress Schedule. The Contractor shall make no claim for extra compensation solely because of additional costs to meet the schedules dates or to recover slippage due to Contractor-caused delays.
- E. The Contractor must receive the Commissioner's approval in writing to perform work outside of normal working hours. Except in case of emergency involving danger to persons or property, when work is scheduled to be performed beyond the normal hours, a second shift, at night or during weekends, the Contractor shall request approval for such work at least 5 days in advance of the beginning of such work. It is each Contractor's responsibility to adhere to any local laws or ordinances that may govern or restrict the performance of such work.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01270**  
**MEASUREMENT AND PAYMENT**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Description of all Bid Items to be included in the total bid. Payments shall be made as described in the following paragraphs of this Specification.

**1.02 LUMP SUM BID ITEMS**

- A. Lump Sum Bid Item 1 will constitute full compensation for all work and costs to complete the Project, with the exception of other lump sum bid items, unit price bid items and allowances. Any work not specifically included in allowances or unit price contract items will be deemed included in lump sum Bid Item 1.
- B. Lump Sum Bid Item 2: Ramp Construction. Under Bid Item 2 the Contractor shall perform all work to construct the new ramp from the property line to the new marine transfer station. The Contractor has the choice of two options for completion of this Bid Item. Option 1 includes completion of the ramp as shown on Drawings R-001 through R-102. The second option includes completion of the ramp as shown on Drawings R-201 through R-302. Each option includes pile caps, support piers, scale pit, bearings, superstructure, traffic barriers, screen walls, catch basins, pavement markings and all other appurtenances required for a complete installation.
- C. Lump Sum Bid Item 3: Site Work and Landscaping. Under Bid Item 3 the Contractor shall perform all site work, grading, landscaping and site utility work required for completion of the Contract, including utilities on the ramp and site utility demolition. This work is shown primarily on the Civil/Site Work Contract Drawings.
- D. Lump Sum Bid Item 4: Container Gantry Cranes. Under Bid Item 4 the Contractor shall furnish, install, test and place into operation container gantry cranes, including power rails as described in accordance with Section 14640 – Container Gantry Crane.
- E. Lump Sum Bid Item 5: 3-Year Service Agreement for Container Gantry Cranes. Under Bid Item 5 the Contractor shall furnish a 3-year service agreement for the container gantry cranes as described in Section 14640 – Container Gantry Crane.
- F. Lump Sum Bid Item 6: Heating, Ventilation and Air Conditioning. Under Bid Item 6 the Contractor shall perform all heating, ventilation and air conditioning work for the new marine transfer station. The principal items of work include furnishing, installing, testing, and placing into operation complete HVAC systems, including new air distribution equipment, heat transfer equipment, ductwork, air

monitoring systems, controls, and system testing and balancing. This work is shown primarily on the HVAC Contract Drawings.

- G. Lump Sum Bid Item 7: Plumbing. Under Bid Item 7 the Contractor shall perform all plumbing work for the new marine transfer station. The principal items of work are shown on the Plumbing Contract Drawings and include:

1. Furnishing, installing, testing and placing into operation complete plumbing systems, including hot and cold water systems, storm drainage and sanitary drainage systems, fixtures and trim, and a new natural gas service from the utility company.
2. Furnishing, installing, testing and placing into operation fire protection pumping systems.

- H. Lump Sum Bid Item 8: Electrical Work. Under Bid Item 8 the Contractor shall perform all electrical work for the new marine transfer station. The principal items of work are shown on the Electrical Contract Drawings and include:

1. Demolition: De-energizing equipment prior to demolition and removal
2. Furnishing, installing, testing and placing into operation complete electrical systems including a new substation, power distribution system, lighting and receptacle system.
3. Furnishing, installing, testing and placing into operation the following complete ancillary systems:
  - a. Fire detection, alarm and warning system
  - b. Lightning protection system
  - c. Security system
  - d. Telephone and paging system
  - e. Communication - intercom system
  - f. Closed-circuit television system

- I. Not Used.

- J. Not Used.

#### 1.03 ALLOWANCES

- A. The following allowances shall be included in the total bid for the Contract. Descriptions of each allowance are included in the sections referenced. Any unexpended balances of allowances will be retained by the City of New York. If the Contractor anticipates an allowance will be exceeded, he must request a Change Order for the amount of the exceedance.

1. Bid Item 11: Hazardous material remediation work, in the amount shown on the Bid Form, as described in Section 01355 – Regulated Materials Control.
2. Bid Item 12: Con Edison Electrical Service Work, in the amount shown on the Bid Form. This allowance will be used to pay fees associated with work performed by Con Edison to bring electrical service to the site. When directed by the Commissioner, the Contractor shall pay the amount indicated to Con Edison within 48 hours of notification. The Contractor will be reimbursed from the allowance for the amount paid, with no provision for overhead and profit.

#### 1.04 UNIT PRICE BID ITEMS

1. Bid Item 13: Dredging
  - a. Under Bid Item 13, the Contractor shall perform all dredging as shown on the Contract Drawings and specified, in accordance with Section 02325 – Dredging and Dredged Material Disposal.
  - b. Payment for dredging will be made at the unit price bid per cubic yard for Bid Item 13.
2. Bid Items 14, 15 and 16: Steel Pipe Piles
  - a. Under Bid Items 14 through 16, the Contractor shall furnish and install concrete-filled steel pipe piles in accordance with Section 02364 - Steel Pipe Piles.
  - b. Payment for concrete-filled steel pipe piles will be made at the unit price bid per linear foot for the following Bid Items:

<u>Bid Item</u>	<u>Description</u>
14	16-inch diameter Steel Pipe Piles
15	20-inch diameter Steel Pipe Piles OR 150-Ton Composite Tapered Piles
16	36-inch diameter Steel Pipe Piles

- c. For Bid Item 15, the Contractor has the option to bid either 20-inch diameter steel pipe piles as described above or 150-ton composite tapered piles in accordance with Section 02365 – Composite Tapered Piles. If the Contractor chooses to bid a price for 150-ton composite tapered piles in lieu of 20-in diameter steel pipe piles, payment for composite tapered piles will be made at the unit price bid per pile.
- d. For Bid Item 16 the quantity and total length of piles will depend on which option the Contractor chooses for construction of the ramp, as described in Bid Item 2 and as shown on the Bid Form.

## 3. Bid Item 17: Pile Driving Analyzer Load Tests

- a. Under Bid Item 17, the Contractor shall perform pile driving analyzer load testing in accordance with Section 02364 - Steel Pipe Piles.
- b. Payment for pile driving analyzer load tests will be made at the unit price bid per test for Bid Item 17.

## 4. Bid Items 18, 19, 20, and 21: Pile Load Tests

- a. Under Bid Items 18 through 21, the Contractor shall perform pile load testing in accordance with Section 02456 - Pile Load Tests.
- b. Payment for pile load testing will be made at the unit price bid per test for the following Bid Items:

<u>Bid Item</u>	<u>Description</u>
18	Compression Pile Load Tests - Steel Pipe Piles, 20-inch diameter
19	Compression Pile Load Tests - Steel Pipe Piles, 36-inch diameter
20	Lateral Pile Load Tests - Steel Pipe Piles, 20-inch diameter OR Composite Tapered Piles
21	Lateral Pile Load Tests - Steel Pipe Piles, 36-inch diameter

## 5. Bid Item 22: Marine Timber Piles

- a. Under Bid Item 22, the Contractor shall furnish and install marine timber piles in accordance with Section 02464 - Marine Timber Piles.
- b. Payment for marine timber piles will be made at the unit price bid per linear foot for Bid Item 22.

## 6. Bid Items 23, 24, 25, 26, and 27: Concrete Repair

- a. Under Bid Items 23 through 27, the Contractor shall perform concrete repair in accordance with Section 03930 - Concrete Restoration.
- b. Payment for concrete repair will be made at the unit price bid for the following Bid Items:

<u>Bid Item</u>	<u>Description</u>
23	Shallow Concrete Repair
24	Deep Concrete Repair

<u>Bid Item</u>	<u>Description</u>
25	Concrete Crack Repair – Type A
26	Concrete Crack Repair – Type B
27	Concrete Crack Repair – Type C

7. Bid Item 28: Additional Excavation

a. Description

- (1) Under Bid Item 28, the Contractor shall perform all additional excavation which may be ordered in writing by the Commissioner.
- (2) The work shall be in accordance with Section 02316 - Excavation.
- (3) The work includes all clearing, temporary sheeting, bracing and shoring, removal of water, transportation and disposal of surplus excavated material, and other work appurtenant to the additional excavation as ordered.

b. Measurement for Payment

- (1) The quantity of additional excavation, in cubic yards, to be measured for payment under this Bid Item shall be the total earth excavated as ordered and approved by the Commissioner beyond and outside the lines and grades necessary to perform the work under Bid Items 1, 2, and 3, measured in place before excavation.
- (2) Unauthorized additional excavation will not be measured or paid for.
- (3) Excavation made to permit placement of select fill materials or concrete cradle or encasement ordered in writing by the Commissioner and not shown on the Contract Drawings will be measured for payment under this Contract Item.

c. Payment for additional excavation, ordered in writing, will be made at the Contract unit price bid per cubic yard for Bid Item 28.

8. Bid Item 29: Additional Select Fill Material

a. Description

- (1) Under Bid Item 29, the Contractor shall furnish, transport and place additional select fill material where ordered in writing by the Commissioner.
- (2) The work shall be in accordance with Section 02317 - Backfilling.

- b. Measurement for Payment: The quantity of additional select fill material, in cubic yards, to be measured for payment under this Bid Item will be the actual volume of material placed, measured in place within the appropriate limiting lines established by the Commissioner. Select fill materials used to fill voids resulting from unauthorized excavation will not be measured or paid for, even though their use is ordered by the Commissioner.
  - c. Payment for additional select fill material, ordered in writing, will be made at the Contract unit price bid per cubic yard for Bid Item 29.
9. Bid Item 30: Additional Common Fill Material
- a. Description
    - (1) Under Bid Item 30, the Contractor shall furnish, transport and place additional common fill material where ordered in writing by the Commissioner.
    - (2) The work shall be in accordance with Section 02317 - Backfilling.
  - b. Measurement for Payment: The quantity of additional common fill material, in cubic yards, to be measured for payment under this Bid Item will be the actual volume of material placed, measured in place within the appropriate limiting lines established by the Commissioner. Common fill materials used to fill voids resulting from unauthorized excavation will not be measured or paid for, even though their use is ordered by the Commissioner.
  - c. Payment for additional common fill material, ordered in writing, will be made at the Contract unit price bid per cubic yard for Bid Item 30.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01271**  
**MILESTONES AND LIQUIDATED DAMAGES**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. This section addresses Milestone Items, assessments of liquidated damages, and scheduling constraints for timely completion of the work.

**1.02 GENERAL**

- A. This Project is critical and TIME IS OF THE ESSENCE. The timely completion of this project is essential to the implementation of the City's Solid Waste Management Plan (SWMP). Therefore, the City will assess liquidated damages in the event that the Contractor fails to achieve certain Milestones during the course of the Project and liquidated damages in the event that the Contractor fails to meet the contractual completion schedule for the Project.

**1.03 MILESTONE ITEMS**

- A. In order to ensure timely completion, Milestone Items for which liquidated damages and incentives for early completion will be applicable are as follows.
  - 1. MILESTONE 1 - Complete construction of the pier level platform: Completion of this Milestone includes, but is not limited to, completion of the new MTS foundations and completion of the pier level platform, construction and enclosure of the new Marine Transfer Station superstructure including exterior walls, elevated slabs and walkways, stair towers, masonry and roof, enclosed, watertight and completed in accordance with Article 1.15.B of the General Conditions - Enclosure of Structures.
  - 2. MILESTONE 2 -The Contract Time for Completion as described in the Standard Construction Contract and Schedule "A." Milestone 2 includes Substantial Completion of all Contract Work necessary in order to allow DSNY to occupy the building and operate without any restrictions whatsoever, including but not limited to, administrative, maintenance and repair areas and operability of all building operating systems and HVAC systems.

- B. Time for Completion of each Milestone Item is shown below.

Milestone	Time for Completion (CCD)
1	730
2	1095

#### 1.04 LIQUIDATED DAMAGES

- A. Liquidated damages for failure to achieve timely completion of the Work (Milestone 2) will be assessed as described in Article 15 of the Standard Construction Contract and in Schedule "A". The liquidated damages described in this Section for Milestone Items are assessed for failure to complete all the Contract Work within the time prescribed in Schedule "A."
- B. Should Milestone Completion within Milestones 1 or 2 occur after the scheduled Time for Completion set for that Milestone, plus authorized time extensions pursuant to Article 13 of the Standard Construction Contract, or if the Contractor, in the sole determination of the Commissioner, should abandon the work, the City will assess liquidated damages against the Contractor in an amount determined as follows: the liquidated damage amount for that Milestone as stated in Paragraph (4) of this Subsection, below, multiplied by the number of calendar days in which Milestone Completion of that Milestone of the work occurs after the scheduled Time for Completion set for that Milestone, plus authorized extensions; which said sum, in view of the difficulty of accurately ascertaining the loss which the City will suffer by reason of delay in the completion of the work hereunder, is hereby fixed and agreed as the liquidated damages that the City will suffer by reason of such delay, and not as a penalty. This article shall also apply to the Contractor if it is defaulted pursuant to Chapter X of this Standard Construction Contract. Neither the failure to assess liquidated damages nor the granting of any time extension shall operate as a waiver or release of any claim the City may have against the Contractor for either actual or liquidated damages.
- C. Calculation: For the purposes of calculating the number of calendar days for liquidated damage assessment, such calculation shall not include the day of scheduled Milestone completion.
- D. Liquidated damages for milestones will be assessed against the Contractor as set forth herein should the Contractor fail to complete the Milestone within the scheduled Time for Completion of that Milestone plus any authorized time extensions. Liquidated damages will be assessed against the Contractor for those days or portion thereof as to which the Contractor is deemed responsible for the Milestone Item not being completed within the Time for Completion listed in Paragraph 1.03 above.

- E. The amount of liquidated damages will be determined as follows: the liquidated damages value stated in Paragraph 1.06 multiplied by the number of calendar days (or portion thereof) that the date of completion of the Milestone Item occurs after the scheduled Time for Completion.
- F. In the event liquidated damages are assessed, the City will deduct and retain out of the monies which may become due under this Contract, the amount of any liquidated damages assessment. If such amount due under the Contract shall be less than the liquidated damages assessment, the Contractor shall be liable to pay the difference upon demand by the City. Liquidated damages for failure to complete a Milestone Item within the scheduled time for completion shall be assessed even should the Contractor abandon the work.

1.05 DETERMINATION OF MILESTONE COMPLETION

- A. A Milestone within the Contract shall have achieved "Milestone Completion" when, in the sole determination of the Commissioner, all construction work associated with the specific Milestone as defined in Paragraph 1.03 above, together with any and all change order work, have been completely installed, tested, made operational, and accepted by the City. The determination of Milestone Completion will be made solely by the Commissioner, and his decision with respect thereto shall be accepted as final, binding and conclusive.
- B. For the purpose of determining the Time for Completion, the construction start date will be the date indicated on the Notice to Proceed.

1.06 LIQUIDATED DAMAGE VALUES

- A. Liquidated Damage values for each Milestone Item are as follows:
  - 1. Milestone 1: \$5,000/day
  - 2. Milestone 2: \$5,000/day
- B. The Commissioner, in the exercise of his sole and absolute discretion, may reduce assessments of liquidated damages for Milestones not achieved by the Contractor if later Milestone dates are achieved.
- C. There will be no limit to the amount of liquidated damages which may be assessed for the failure to achieve each Milestone.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01310**  
**PROJECT COORDINATION**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Contractor cooperation
- B. Daily work plans
- C. Project meetings
- D. Coordination drawings

**1.02 RELATED SPECIFICATIONS**

- A. Section 01321 - Construction Progress Scheduling

**1.03 CONTRACTOR COOPERATION**

- A. The Contractor shall allow the City of New York, the Commissioner and their agents, to enter upon the work for the purpose of constructing, operating, maintaining, removing, repairing, altering or replacing such pipes, sewers, conduits, manholes, wires, poles, or other structures and appliances which may be required to be installed at or in the work. The Contractor shall cooperate with all the aforesaid parties and shall allow reasonable provisions for the prosecution of any other work by the City of New York, or others, to be done in connection with its work, or in connection with normal use of the facilities.
- B. The Contractor shall cooperate fully with the City of New York, the Commissioner, and any other contractors employed on the work, to effect proper coordination and progress to complete the project on schedule and in proper sequence. Insofar as possible, decisions of all kinds required from the Commissioner shall be anticipated by the Contractor to provide ample time for inspection, or the preparation of instructions.

**1.04 DAILY WORK PLANS**

- A. The Contractor shall submit a Daily Work Plan to the Resident Engineer by 2:00 p.m. of the previous workday, stating the types and locations of the work to be performed the following day. The Daily Work Plan may be handwritten and faxed to his attention.

## 1.05 PROJECT MEETINGS

- A. General: Meetings will be held at the site as scheduled by the Resident Engineer, at which time the Contractor shall have representatives present to discuss all details relative to the execution of the work.
1. The Contractor shall provide ample office space, tables and chairs to accommodate all present at the meetings, and table space for Drawings.
  2. The Resident Engineer will preside over these meetings and will record the minutes thereof. Prior to each meeting the Resident Engineer will consult with the Contractor and prepare an agenda of items to be discussed. In general, after informal discussion of any item on the agenda, the Resident Engineer will summarize the discussion in a brief written statement and the Contractor shall then dictate a brief statement for the record. The Resident Engineer will distribute copies of the meeting minutes to all parties within 3 days of the meeting.
  3. Project meetings shall conform to the requirements of the General Conditions.
- B. Preconstruction conferences will be held prior to beginning certain items of work, as specified. Attendance and will be mandatory unless otherwise specified.
1. Attendees: Authorized representatives of the City of New York, the Commissioner; Contractor and its superintendent; major subcontractors; suppliers; and other concerned parties shall attend the conference. All participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
  2. Agenda: Discuss items of significance that could affect progress, including the following:
    - a. Tentative construction schedule
    - b. Phasing
    - c. Critical work sequencing and long-lead items
    - d. Designation of key personnel and their duties
    - e. Procedures for processing field decisions and Change Orders
    - f. Procedures for requests for interpretations (RFIs)
    - g. Procedures for testing and inspecting
    - h. Procedures for processing Applications for Payment
    - i. Distribution of the Contract Documents
    - j. Submittal procedures
    - k. Preparation of Record Documents
    - l. Use of the premises
    - m. Work restrictions
    - n. Responsibility for temporary facilities and controls
    - o. Construction waste management and recycling
    - p. Parking availability

- q. Office, work, and storage areas
  - r. Equipment deliveries and priorities
  - s. First aid
  - t. Security
  - u. Progress cleaning
  - v. Working hours
  - w. Procedures for required subcontractor approval requests
- C. Preinstallation conferences will be held at Project site before each construction activity that requires coordination with other construction. Preinstallation conferences will be held when required by the technical specifications and as directed by the Resident Engineer.
- 1. Attendees: Installer and representatives of manufacturers and fabricators involved in or affected by the installation and its coordination or integration with other materials and installations that have preceded or will follow, shall attend the meeting. Advise Resident Engineer of scheduled meeting dates.
  - 2. Agenda: Review progress of other construction activities and preparations for the particular activity under consideration, including requirements for the following:
    - a. The Contract Documents
    - b. Options
    - c. Related requests for interpretations (RFIs)
    - d. Related Change Orders
    - e. Purchases
    - f. Deliveries
    - g. Submittals
    - h. Review of mockups
    - i. Possible conflicts
    - j. Compatibility problems
    - k. Time schedules
    - l. Weather limitations
    - m. Manufacturer's written recommendations
    - n. Warranty requirements
    - o. Compatibility of materials
    - p. Acceptability of substrates
    - q. Temporary facilities and controls
    - r. Space and access limitations
    - s. Regulations of authorities having jurisdiction
    - t. Testing and inspecting requirements
    - u. Installation procedures
    - v. Coordination with other work
    - w. Required performance results
    - x. Protection of adjacent work
    - y. Protection of construction and personnel
    - z. Status of pending and anticipated future subcontractor approval requests

3. Resident Engineer will record significant conference discussions, agreements, and disagreements, including required corrective measures and actions.
  4. Do not proceed with installation if the conference cannot be successfully concluded. Initiate whatever actions are necessary to resolve impediments to performance of the Work and reconvene the conference at earliest feasible date.
- D. Progress meetings will be conducted at intervals as directed by the Resident Engineer. The progress meetings specified herein are in addition to the monthly progress meetings specified in Section 01321 – Construction Progress Scheduling.
1. Attendees: In addition to the City of New York and the Resident Engineer, each Contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
  2. Agenda: Review and correct or approve minutes of previous progress meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.
    - a. Contractor's Construction Schedule: Review progress since the last meeting. Determine whether each activity is on time, ahead of schedule, or behind schedule, in relation to Contractor's Construction Schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
      - (1) Review schedule for next period.
    - b. Review present and future needs of each entity present, including the following:
      - (1) Interface requirements
      - (2) Sequence of operations
      - (3) Status of submittals
      - (4) Deliveries
      - (5) Off-site fabrication
      - (6) Access
      - (7) Site utilization
      - (8) Temporary facilities and controls
      - (9) Work hours
      - (10) Hazards and risks
      - (11) Progress cleaning
      - (12) Quality and work standards

- (13) Status of correction of deficient items
  - (14) Field observations
  - (15) Requests for interpretations (RFIs)
  - (16) Status of proposal requests
  - (17) Pending changes
  - (18) Status of Change Orders
  - (19) Pending claims and disputes
  - (20) Documentation of information for payment requests
  - (21) Subcontractor approval requests
3. Schedule Updating: Revise Contractor's Construction Schedule after each progress meeting where revisions to the schedule have been made or recognized. Issue revised schedule concurrently with the report of each meeting.
- E. Daily coordination meetings will be held as directed by the Resident Engineer. Project coordination meetings are in addition to specific meetings held for other purposes, such as progress meetings and pre-installation conferences.
- 1. Attendees: In addition to the City of New York and the Resident Engineer, each Contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
  - 2. Agenda: Review and correct or approve minutes of the previous coordination meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.
    - a. Construction Schedule: Review progress since the last coordination meeting. Determine whether each contract is on time, ahead of schedule, or behind schedule, in relation to the Construction Schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
    - b. Schedule Updating: Revise the Construction Schedule after each coordination meeting where revisions to the schedule have been made or recognized. Issue revised schedule concurrently with report for each meeting.
    - c. Review present and future needs of each contractor present, including the following:
      - (1) Interface requirements
      - (2) Sequence of operations

- (3) Status of submittals
- (4) Deliveries
- (5) Off-site fabrication
- (6) Access
- (7) Site utilization
- (8) Temporary facilities and controls
- (9) Work hours
- (10) Hazards and risks
- (11) Progress cleaning
- (12) Quality and work standards
- (13) Change Orders
- (14) Subcontractor approvals

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01321**  
**CONSTRUCTION PROGRESS SCHEDULING**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. General requirements for Critical Path Method (CPM) Schedule.
- B. Progress meeting and reports.
- C. Remedial measures.

**1.02 PAYMENT**

- A. The Contractor shall include the cost for furnishing the Construction Scheduling services as described herein in the lump sum price bid for Bid Item 1.
- B. The first Partial Payment will be based on the actual amount of Work completed in accordance with the approved payment breakdown. However, the second Partial Payment will not be made until the CPM Schedule has been finalized and the activity costs have been approved by the City of New York.
- C. The sum of all the activity costs must total the Contract price.

**1.03 DEFINITIONS**

- A. A work activity is defined as an activity which requires time and resources, (manpower, equipment, and/or material) to complete and must be performed before the Contract is considered complete.
- B. For the purpose of determining the Time for Completion, the construction start date will be the date indicated on the Notice to Proceed.
- C. Float or slack is defined as the amount of time between the early start date and the late start date, or the early finish date and the late finish date of any of the activities in the schedule. Float or slack is not for the exclusive use of or benefit of either the City of New York or the Contractor.

**1.04 GENERAL REQUIREMENTS**

- A. The Construction Manager will provide a CPM Consultant to assist the Contractor in the preparation of a detailed working plan and schedule, and in subsequent schedule updates.
- B. The CPM Consultant will furnish a copy of the updated network analysis and monthly summary to the Contractor.

- C. The Critical Path Method (CPM) shall be used to control the progress of the job. This system will be implemented by the CPM Consultant provided by the Commissioner.
1. The Contractor shall cooperate fully with the CPM Consultant in the preparation and maintenance of the schedule. All costs incurred by the Contractor to correctly develop and implement the CPM Schedule shall be borne by the Contractor as part of the Contract. The Contractor shall be responsible for its own subcontractors and suppliers in implementing the CPM Schedule.
  2. The Contractor is deemed to have included in the bid prices sufficient monies to pay all expenses in connection with supplying the system with sufficient information to guarantee its successful operation and implementation.
- D. After the execution of the Construction Contract, the CPM Consultant will work with the Contractor to develop a comprehensive network diagram covering all portions of the Work and trades. The Contractor is obliged to supply information including work activity descriptions, sequence of Work, time estimates and dollar values for each activity to be included in the preparation of the network, all as requested by the CPM Consultant.
1. Within one week after the execution of the Construction Contract, the Contractor shall submit the name, address and telephone number of the person designated by the Contractor as its lawful CPM Representative and schedule contact.
- E. Both the early and late finish dates for construction completion on the approved CPM Schedule shall be equal to the total Contract duration. The detailed CPM network for the entire Project shall be submitted to the Commissioner as soon as possible following the Notice to Proceed. The CPM network will be reviewed by the Commissioner.
- F. The Commissioner will be the final judge as to the proper functioning of the CPM network and is empowered under the terms of the Contract to call upon the Contractor to remedy the functioning of the systems whenever deficiencies of whatever nature occur during the course of the Work. Refusal by the Contractor to maintain the progress of the Work consistent with the CPM schedule shall be interpreted as a delay of Contract.
1. Activities that have posted progress without predecessors being completed (Out-of-Sequence Progress) will not be allowed except on a case-by-case basis with the approval of the Commissioner. A written explanation of each shall be included in the monthly submittal. The Commissioner may direct that changes in schedule logic be made to correct any or all out-of-sequence work.

## PART 2 PRODUCTS

## 2.01 PROJECT PLAN AND CPM SCHEDULE

- A. Within seven working days after the Notice to Proceed of this Contract the CPM Consultant shall meet with the Contractor to develop a comprehensive and detailed working plan and schedule for all procurement items and all Work required to complete this Project.
- B. Network Diagram
  - 1. A diagram representing all the Work for this Project will be prepared by the CPM Consultant showing the priority and interdependence of activities and the sequence in which the Work is to be accomplished as planned by the Contractor. Each segment will be analyzed in sufficient detail by the Contractor, the CPM Consultant, and the Commissioner to insure reasonably accurate time durations. Time units shall be in working days and one day will be the smallest time unit shown. When completed, the network diagram shall represent the Contractor's own plan for the Project, consistent with the contract schedule.
    - a. It shall be the Contractor's responsibility to ensure that all of the Work is described by the network diagram to its satisfaction and that the diagram correctly represents the sequence, means, methods, techniques and procedures by which it plans to perform the Work. The CPM Consultant will assist the Contractor in this review only to the extent to make the Contractor's information compatible with the CPM Consultant's format. Upon completion of the diagram, the CPM Consultant will prepare a computer printout reflecting the schedule.
    - b. Network activities shown on a detailed or sub-network diagram shall include, in addition to construction activities, the submittal and approval of Samples, Shop Drawings, etc.; the procurement of materials and equipment; manufacture and/or fabrication of special material and major equipment, their shop inspection, testing and storage or delivery to the jobsite; installation; preliminary, final and performance testing. All activities and dates for completion of all or part of the Work will be shown. The selection and number of activities shall be subject to the CPM Consultant's review and Commissioner's approval.
  - 2. The Contractor shall prepare and make available to the CPM Consultant all information required within thirty days of the Notice to Proceed. During this time the Contractor shall meet with the CPM Consultant as often as necessary to supply the required information.
  - 3. The following information shall be shown on the diagrams for each activity: preceding and following event number, description of activity, cost and

activity duration. In calculating activity durations, Saturdays, Sundays, Holidays, and normal inclement weather should be considered.

4. **Summary Network:** A summary network diagram consisting of a minimum of fifty activities and a maximum of one hundred activities shall be prepared. The summary network shall be based on and supported by detailed diagrams. Related activities shall be grouped on the network.
5. **Mathematical Analysis:** On completion of the network diagram, the CPM Consultant will have computer input data prepared. A computer run will then be made to generate a schedule for the Project based on the information supplied. In the event that the schedule produced exceeds the contractual date of the Contract or interim specified milestone dates, the CPM Consultant and the Contractor will revise the working plan until a schedule is established that meets the Contract completion date.
  - a. Upon receipt of the Contractor's information, the final working plan and schedule will be completed and submitted to the Contractor and Commissioner for approval. Approval of the final working plan and schedule by the Contractor shall be given within seven calendar days, and no requisition for payment by the Contractor will be processed until approval of the schedule the Contractor is received by the Commissioner.
  - b. The following information will be furnished for each activity:
    - (1) Preceding and following event number
    - (2) Activity description
    - (3) Responsibility for activity (Contractor, Commissioner, etc.)
    - (4) Estimated duration of activity
    - (5) Earliest start date (by calendar date)
    - (6) Earliest finish date (by calendar date)
    - (7) Latest start date (by calendar date)
    - (8) Latest finish date (by calendar date)
    - (9) Slack or float (in calendar days)
    - (10) Monetary value of activity
    - (11) Percentage of activity completed
    - (12) Contractor's remaining cost on portion of activity completed, and original cost
  - c. The analysis shall also list the activities in sorts or groups as follows:
    - (1) By activity number, from lowest to highest.
    - (2) By the amount of float (slack).
    - (3) By earliest allowable start date, with a three month cutoff.

d. The formal computation shall also include the following information, if required of /or by the Contractor:

- (1) Identification of activities which are planned to be expedited by use of overtime or double shifts to be worked including Saturdays, Sundays and Holidays

## 2.02 SCHEDULE REVIEW AND UPDATING

- A. To maintain and aid in the implementation of the schedule, the CPM Consultant will review with the Contractor and the Commissioner the working plan and schedule periodically, at least monthly or more often, as required by the Commissioner for the duration of construction. These meetings are separate and apart from job meetings and coordination meetings. If necessary, the Contractor will take part in a field inspection prior to each update.
- B. All submissions, approvals, fabrication status, as well as Work completed in the preceding month, all Work in progress, and all Work scheduled to be performed during the upcoming months shall be reviewed.
- C. All Change Orders or other information which may affect the Project Schedule shall be checked against the original plan and schedule, and worked into the plan along with delays in any other critical areas as noted. A new computer run will be made to determine the effect, if any, of changes or delays made on the Contract completion date.
- D. Problems having a direct or indirect effect upon the schedule shall be discussed and responsibility for resolution documented.
- E. If the latest completion time for any significant job does not come within the time allowed by the Contract, the sequence of jobs and/or performance of that job shall be revised by the Contractor (with the assistance of the CPM Consultant as required on the format) through concurrent operations, additional manpower, additional shifts, overtime, etc., until the schedule produced indicates that all significant Contract completion and occupancy times will be met. No additional cost will be allowed the Contractor for overtime, additional manpower, equipment, additional shifts, etc. (except as provided elsewhere in the Contract Documents), if such expediting procedures are necessary.
- F. If the Contractor thereafter desires to make changes in the method of operating and scheduling, it shall notify the Commissioner, in writing, stating the reasons for the change.

## 2.03 MONTHLY SUMMARY REPORT

- A. In addition to the updated network and analysis as described, the CPM Consultant will also submit a narrative report with the updated analysis which will include, but

not be limited to, a description of the problem areas, current and anticipated, delaying factors and their impact, and an explanation of corrective actions taken or proposed by the Contractor based on information gathered at the update meetings.

- B. The monthly summary will reflect a cost summary of payments and percent completions for the Contract based on the CPM schedule used as the Contractor's periodic request for payment. The report will state the amount of Work actually completed and the schedule as of the report date and the progress along the critical path in terms of days ahead or behind the allowable dates. If the Project is behind schedule, progress along other paths with negative slack shall also be reported.

### PART 3 EXECUTION

#### 3.01 BI-WEEKLY PROGRESS MEETING AND REPORTS

- A. Once every two weeks on a date established by the Commissioner, a job-site progress meeting will be held at which time the schedule will be reviewed. The meeting shall be attended by the Commissioner, the Contractor and the CPM Consultant. The Contractor's representative(s) at the meetings shall have the competence and authority to make any necessary decisions and their statement shall commit the Contractor to the agreed procedures, sequence of operations and time schedules.
- B. Prior to the meeting, the CPM Consultant will obtain through any required means, including site meetings, the necessary information to update the CPM Schedule to reflect progress to date and to update the plan of the work for the balance of the project. The updated Schedule will be available at the meeting for review. To update the CPM Schedule, the Contractor shall:
  - 1. Enter actual start and completion dates, work days, number of shifts, crew size, and equipment used for those activities started and/or completed during the previous reporting period.
  - 2. For activities in progress, indicate the percentage complete to date. Review and revise as necessary the network logic for the balance of the work from the update to the estimated completion date.
  - 3. For activities not yet started, review and revise as necessary, the necessary logic for the durations and the estimated start and completion dates.
  - 4. Enter for each applicable activity, actual installed quantities information and corresponding cost information.
  - 5. Add authorized contract modifications.
  - 6. Annotate updated status information on the CPM Schedule in such a manner that the CPM Schedule shall graphically depict the current status of the Work.

3.02 REMEDIAL MEASURES

- A. If at any time during the project, the Contractor fails to complete any activity by its latest completion date, it will be required, within 7 days, to submit to the Commissioner a written statement as to how and when it plans to reorganize its work force to return to the current CPM Schedule.
- B. The Commissioner may require any Contractor to add to its equipment or construction forces, as well as increase the working hours, if operations fall behind the Contractor's baseline schedule at any time during the construction period.
- C. Under no circumstances will the addition of equipment or construction forces, increasing the working hours or any other method, manner or procedure to return to the CPM Schedule be considered justification for contract modification or extra work.

- C. Letter of transmittal
- D. Approval of Suppliers
- E. Shop Drawings submittal
- F. Contractor responsibilities
- G. Approval of Shop Drawings not a waiver
- H. Record-Keeping

**1.02 DEFINITION OF SHOP DRAWINGS**

- A. Shop Drawings shall mean drawings, prints, descriptive literature, test reports, calculations, schedules, materials lists and information such as special drawings, schedules, calculations and curves.

**1.03 GENERAL REQUIREMENTS FOR SUBMITTALS**

- A. The submittal of Shop Drawings and inquiries pertaining to engineering features or specification and Contract Drawing interpretations shall conform to procedures described in the General Conditions and as detailed or modified in this Section.
- B. Shop Drawings shall be provided when specifically required in the Specifications. Performance curves and detailed information on materials shall be provided when requested by the Commissioner.
- C. Samples shall be submitted as described in the General Conditions.
- D. Mock-ups shall be submitted as described in Section 01452 – Mock-Up Requirements.
- E. Submittal shall be made to the Commissioner. All submittals and drawings shall be in the English Language and US Customary Units.

## 1.04 LETTER OF TRANSMITTAL

- A. A letter of transmittal shall accompany all Shop Drawing submittals. A single letter of transmittal may accompany multiple Shop Drawing submittals, including those Shop Drawing submittals that are for different Sections of the Specifications, provided that they pertain to the same item of work. The letter of transmittal shall include the following information for each submittal: Specification Section number, submittal number, review cycle, title/description of the submittal, Shop Drawing source company name (Contractor, Subcontractor, supplier, or manufacturer), and Shop Drawing reference number if applicable. Insofar as possible, letters of inquiry concerning certain phases of the Contract shall also deal with only one Section of the Specifications.
- B. All letters of transmittal shall be sent to the Commissioner in triplicate.
- C. At the beginning of each letter of transmittal and each letter of inquiry, provide a reference heading indicating the following:

OWNER'S Name: NYC Department of Sanitation  
Project Name: \_\_\_\_\_  
Contract Number: \_\_\_\_\_  
Transmittal Number: \_\_\_\_\_

- D. If submittals show variation from the requirements of the Contract, the Contractor shall make specific mention of such variation in his letter of transmittal.

## 1.05 APPROVAL OF SUPPLIERS

- A. The Contractor shall submit the following information in triplicate to the Commissioner within 15 days from the date of Notice to Proceed issued by the Department, and prior to entering into any subcontract for the manufacture or supply of equipment and products:
1. The names and addresses of equipment and product manufacturers and locations of the shops at which the hardware and other items will be manufactured or fabricated.
  2. General descriptions and specifications of the fabricated items.
  3. A statement as to whether the item is already designed or in production.
  4. Any additional information that the Commissioner may deem necessary in order to determine the ability of the manufacturer to produce the equipment as called for by the Contract Documents.
- B. The Contractor shall not enter into any subcontracts or purchase agreements for the furnishing of any equipment and products until he has received the Commissioner's

approval in writing for the acceptance by the Department of the proposed manufacturers.

#### 1.06 SHOP DRAWINGS SUBMITTAL

- A. All Shop Drawings and other data submitted for approval shall have an identifying title.
- B. All Shop Drawings and other data submitted shall bear the stamp of approval and signature of the Contractor as evidence that they have been reviewed and approved by the Contractor and that they conform to the requirements of the Contract Documents. Shop Drawing submittals without this stamp of approval will not be reviewed by the Commissioner and will be returned to the Contractor. The stamp shall contain the following minimum information completed in ink:

Project Name: \_\_\_\_\_  
Contract No.: \_\_\_\_\_  
Contractor's Name: \_\_\_\_\_  
Date: \_\_\_\_\_  
Item: \_\_\_\_\_  
Specifications: \_\_\_\_\_  
Section: \_\_\_\_\_  
Page No.: \_\_\_\_\_  
Para. No.: \_\_\_\_\_  
Contract Drawing No.: \_\_\_\_\_ of \_\_\_\_\_  
Location: \_\_\_\_\_  
Submittal No.: \_\_\_\_\_ Review Cycle No.: \_\_\_\_\_

Shop Drawing Reference No.: \_\_\_\_\_  
Source company name: \_\_\_\_\_  
Approved By: \_\_\_\_\_

- C. Shop Drawing Submittal Numbering and Identification: In order to identify and track all Shop Drawing submittals as separate and unique items, the Contractor shall utilize a Shop Drawing submittal identification numbering system as follows:
1. Submittal Number: The Submittal Number shall be a separate and unique number correlating to each individual Shop Drawing that needs to be tracked as a separate and unique item. The Submittal Number shall be a two part, eight character, alpha/numeric number assigned by the Contractor in the following manner:
    - a. The first part of the Submittal Number shall consist of five characters that pertain to the applicable Specification Section number.

- b. The second part of the Submittal Number shall consist of three digits (the numbers 001 to 999) to number each separate and unique Shop Drawing submitted under each Specification Section.
  - c. A dash shall separate the two parts of the Submittal Number.
  - d. As an example, the Submittal Number for the third Shop Drawing submitted under Section 09900 would be 09900-003.
2. Review Cycle: The Review Cycle shall be a three-digit number indicating the initial submission or resubmission of the same Shop Drawing submittal. For example:
- 001 = first (initial) submission
  - 002 = second submission (first resubmission)
  - 003 = third submission (second resubmission)
3. As an example, the Shop Drawing submittal identification numbers for the first submission of the third Shop Drawing submitted under Section 09900 is:

<u>Submittal Number</u>	<u>Review Cycle</u>
09900-003	001

As a second example, the Shop Drawing submittal identification numbers for the second submission of the third Shop Drawing submitted under Section 09900 is:

<u>Submittal Number</u>	<u>Review Cycle</u>
09900-03	002

- D. The Contractor shall initially submit to the Commissioner a minimum of 5 copies of all submittals.
- E. Partial, incomplete, or illegible submissions will be returned to the Contractor without review, for resubmission.
- 1. After the Commissioner completes its review, the Shop Drawings will be stamped as described in the General Conditions
  - 2. Shop Drawings or other submittals not bearing the Commissioner's "Approved" or "Approved - Subject to Corrections Marked" notation shall not be issued to sub- contractors nor utilized for construction purposes. No work shall be performed or equipment installed without an "Approved" or "Approved - Subject to Corrections Marked" drawing or submittal.

- F. In the event the Contractor obtains the Commissioner's approval for the use of equipment other than that which is shown or specified, the Contractor shall, at its own expense and using methods approved by the Commissioner, make all changes to the Work, including structures, piping, and electrical equipment and controls that may be necessary to accommodate this equipment.
- G. Shop Drawings shall be submitted well in advance of the need for the material or equipment for construction and with ample allowance for time required to make delivery of material or equipment after data covering such is approved. The Contractor shall assume the risk for all materials or equipment which are fabricated or delivered prior to the approval of Shop Drawings. No materials or equipment will be permitted to be incorporated into the Work nor will such be included in monthly payment estimates until approval thereof has been obtained in the specified manner.
- H. The Commissioner will review and process all submittals promptly, but a reasonable time should be allowed for this, for the drawings being examined and returned for correction, and for time required to return the approved drawings to the Contractor.

#### 1.07 CONTRACTOR RESPONSIBILITIES

- A. It is the responsibility of the Contractor to review submittals made by its suppliers and subcontractors before transmitting them to the Commissioner to assure proper coordination of the Work and to determine that each submittal is in accordance with its desires and that there is sufficient information about materials and equipment for the Commissioner to determine compliance with the drawings and specifications. Incomplete or inadequate submittals will be returned for revision without review.
- B. Approval of Shop Drawings shall not relieve the Contractor from the responsibility of furnishing materials and equipment of proper dimension, size, quality, quantity, and all performance characteristics to efficiently perform the requirements and intent of the Contract Documents. Approval shall not relieve the Contractor from responsibility for errors of any sort on the Shop Drawings. Approval is intended only to determine conformance with the information given in the Contract Documents. The Contractor is also responsible for information that pertains solely to the fabrication processes or to the technique of construction and for the coordination of the Work of all trades.

#### 1.08 APPROVAL OF SHOP DRAWINGS NOT A WAIVER

- A. The approval of Shop Drawings submitted by the Contractor shall not constitute a waiver of any of the requirements of this Contract nor shall the City be compelled to accept any structure or apparatus unless it passes all the tests and requirements of the Contract Documents.

- B. All deviations made during construction from final Shop Drawings previously annotated by the Commissioner as "Approved", shall be corrected on the Shop Drawings, and resubmitted to the Commissioner showing conditions as constructed.

1.09 RECORD-KEEPING

- A. Records shall be kept of any changes or adjustments made during manufacture, construction, installation and testing. All affected drawings and material lists shall then be revised by the Contractor, marked, "As-Built Drawing," and be delivered to the Department prior to acceptance of the work by the Department.
- B. The Contractor shall keep one record copy of all Specifications, Plans, Addenda, Supplementary Drawings, Working Drawings, Shop Drawings, Change Orders and any other clarifications at the site in good order. These documents shall be annotated to show all changes made during the construction process, shall be available to the Commissioner and shall be delivered to the Department of Sanitation upon completion of the work.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01355**  
**REGULATED MATERIALS CONTROL**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Regulated materials
- B. Remedial action for unforeseen regulated materials
- C. Payment
- D. Air Monitoring
- E. Temporary services for the environmental remediation work
- F. Decontamination
- G. Submittals for the environmental remediation work
- H. Hazardous Waste Tax

**1.02 RELATED SPECIFICATIONS**

- A. Section 01356 – Safe and Healthful Working Conditions
- B. Section 02224 – Removal of Arsenic-Impacted Wood – Environmental Requirements
- C. Section 02225 – Impacted Soil Handling
- D. Section 02291 – Air Monitoring Program
- E. Section 13287 – Environmental Waste Transportation and Disposition

**1.03 PAYMENT**

- A. The costs for handling, disposition, and remediation of known regulated equipment and materials shall be included in the lump sum bid for Bid Item 1. Known regulated equipment and materials shall include regulated (or potentially regulated) equipment and materials described, listed, referenced or otherwise referred to in the Contract Documents or other documents available for inspection by the Contractor including, but not limited to, the SEIP and geotechnical reports.
- B. The costs associated with the work specified in this section shall be included in the lump sum price for Bid Item 1, except as described below in Paragraph 1.03C.
- C. Payment for unforeseen regulated/hazardous material remediation and disposition work shall be paid out of the Hazardous Materials Remediation allowance. The allowance shall be included by the Contractor in his total bid as shown on the bid form.

1. The allowance shall provide for any extra expenses incurred by the Contractor in implementing the remediation action and the additional health and safety precautions and permitting required to enable construction operations to proceed safely in the presence of unforeseen regulated/hazardous materials.
2. The Contract allowance may be used to pay for development and implementation of remediation plans to address the presence of unforeseen regulated/hazardous materials discovered at the project site.
3. All costs associated with amending the site-specific Health and Safety Plan (HASP) to account for the presence of unforeseen regulated/hazardous materials and for the implementation of the amended HASP shall be paid under the Contract allowance.
4. Payment for transportation and disposal of unforeseen regulated/hazardous materials will not be made until executed copies of waste disposal documentation (with complete chain of custody) are submitted to the Commissioner.
5. Payment for allowance items described above will be made in accordance with the provisions of Article 25 of the Standard Construction Contract. The balance of the allowance not expended will be retained by the City of New York of New York.
6. This Contract allowance is intended for addressing the presence of unforeseen regulated/hazardous materials and for payment of hazardous waste tax only. The Contract allowance will not be used to cover the cost of remediation of known regulated (and potentially regulated) equipment and materials. The cost of the hazardous waste tax will be paid in accordance with Article 1.10 of this Section.

#### 1.04 REGULATED MATERIALS

- A. Regulated materials and equipment that require special handling and disposition have been identified at the site. Several organic constituents and inorganics were detected at concentrations above their respective laboratory detection limits in soil and groundwater and sediment samples collected at the site as part of the environmental investigation conducted in 2003 by Blasland, Bouck & Lee, Inc. (BBL). For more details regarding approximate quantities, locations, and conditions of known regulated equipment and materials and concentrations of chemical constituents detected in environmental samples collected at the site, refer to the Supplemental Environmental Information Package (SEIP) included on the Supplement Reports CD provided with the bid documents. The SEIP includes summary tables presenting comparisons of the concentrations detected in soil, groundwater, and sediment with worker health and safety regulatory threshold

limit values. The SEIP is provided for informational purposes only and is not part of the Contract.

- B. Known regulated (and potentially regulated) materials described, listed, referenced, or otherwise referred to in the Contract Documents or in other documents available for inspection by the Contractor (not part of the Contract), shall be handled and disposed as specified elsewhere in applicable Sections, including, but not limited to, Section 02224, Section 02225, and Section 13287.
- C. The Contractor shall verify site conditions in order to develop an understanding of the conditions that may be encountered during performance of the work. Failure by the Contractor to verify existing site conditions shall not result in additional costs to the City of New York of New York.

#### 1.05 UNFORESEEN REGULATED MATERIALS

- A. The possibility exists that unforeseen regulated/hazardous materials (i.e., not listed in the Contract Documents or in the other documents available to the Contractor [e.g., SEIP]) will be encountered at locations where their presence could not be determined prior to the performance of the work. The Contractor shall be responsible for identifying additional suspect regulated/hazardous materials as they are encountered (if any). If additional suspect regulated/hazardous materials are encountered, this information shall be immediately reported by the Contractor to the Commissioner. If determined by the Commissioner to be warranted, the Commissioner will perform investigation activities and develop a remediation plan for addressing the regulated/hazardous materials encountered. If requested by the Commissioner, the Contractor shall assist the Commissioner in performance of the investigation and shall participate in the development of the remediation plan.
- B. Upon defining the scope of the remedial action for addressing additional regulated/hazardous materials, the Contractor will be requested to provide a cost proposal for addressing the additional regulated/hazardous materials in accordance with the remediation plan. The Contractor shall submit the cost proposal to the Commissioner within 10 calendar days from the date the Contractor receives such directive. Remediation work shall not commence until the Contractor receives written notice from the City of New York of New York to proceed with the work.
- C. Some of the remediation work may be critical to maintaining construction schedules. When this occurs (as determined by the Commissioner), the Commissioner will establish a time of completion.
- D. In the event that previously uncharacterized regulated/hazardous materials are encountered, the Contractor shall be responsible for waste characterization (as necessary), obtaining permits, profiling, manifesting, segregating, handling, containerizing, loading, transporting, and disposing offsite all additional

regulated/hazardous materials encountered. The work shall be performed by the Contractor in accordance with applicable regulations and requirements presented elsewhere in the Contract Documents, as applicable.

- E. Payment for remediation of unforeseen regulated materials will be made from the allowance described above in Paragraph 1.03C.

#### 1.06 AIR MONITORING

- A. Air monitoring shall be conducted in accordance with applicable regulations and provisions specified elsewhere in the Contract Documents, as applicable.

#### 1.07 TEMPORARY SERVICES

- A. The Contractor shall be responsible for the construction of support area(s), waste staging area(s), and decontamination area(s) in accordance with reviewed documentation provided by the Contractor. At a minimum, the decontamination area(s) shall be bermed and lined with two layers of polyethylene sheeting and sloped to a lined sump (minimum 1 foot depth) to allow for the collection of decontamination liquids. Precautions to protect the integrity of the low-permeability liner of the decontamination area(s) (e.g., installation of a geotextile or rubber roofing material over the liner) shall be required.
- B. The Contractor shall make provisions to mitigate any offsite tracking of materials (e.g., onto public roadways), as necessary. At a minimum, vehicle decontamination shall be as specified in Section 02371 – Dust, Soil Erosion and Sedimentation Control.
- C. The Contractor shall be responsible for acquiring all applicable permits (including fees) and providing all applicable notifications (e.g., local, state, federal) necessary to complete the environmental remediation work specified in the Contract Documents.
- D. The Contractor shall be responsible for coordinating the deactivation of utilities with the utility company(ies), as necessary, to perform the work.

#### 1.08 DECONTAMINATION

- A. All Contractor's (and their subcontractor's) equipment mobilized to the site shall be thoroughly cleaned prior to mobilization to the site. Based upon review by the Commissioner, equipment that is not visibly clean upon site mobilization shall be taken offsite and cleaned by the Contractor prior to remobilization at no additional cost to the City of New York.
- B. All non-disposable equipment that has been used during implementation of the project and has come in contact with regulated (e.g., Resource Conservation and Recovery Act- [RCRA-], Toxic Substances Control Act- [TSCA-], and/or State of

New York-regulated) materials shall be decontaminated before being removed from the site. Equipment decontamination shall be performed in a designated area (to be proposed by the Contractor and reviewed by the Commissioner). Decontamination of non-disposable equipment that does not come into contact with site-related liquids/semi-liquids (e.g., oils, petroleum) shall be deemed complete based on a visual observation by the Commissioner. Equipment that does not meet the "visibly clean" objective, as determined by the Commissioner, shall be recleaned by the Contractor at no additional cost to the City of New York. Non-disposable equipment that comes into contact with any site-related liquids/semi-liquids shall be decontaminated prior to reuse and/or removal from the site. Decontamination of such non-disposable equipment shall be conducted using a minimum of appropriate and industry-recognized non-toxic decontamination materials. Decontamination shall take place in a separately constructed decontamination area suitable for the size of the equipment to be decontaminated and using materials appropriate for the collection of the site-related liquids/semi-liquids and the decontamination materials. The Contractor shall be responsible for the collection, containerization, characterization, profiling, transportation, and disposal of the decontamination wastes in accordance with all applicable laws, rules, and regulations and these Contract Documents.

- C. Following completion of decontamination activities, the Contractor shall place all materials generated as a result of the equipment decontamination into United States Department of Transportation- (USDOT-) approved containers for subsequent characterization, transportation, and offsite disposal (by the Contractor) in accordance with Section 13287 - Environmental Waste Transportation and Disposition and applicable laws, rules, and regulations.

#### 1.09 SUBMITTALS

- A. At least 30 calendar days prior to the commencement of the environmental remediation work, the Contractor shall submit the following items for review:
  - 1. Site Management Plan. The purpose of the Site Management Plan is to summarize the materials, procedures, and controls that the Contractor intends to utilize during implementation of the environmental remediation work. The Site Management Plan shall address pertinent project and site management issues, items, and topics and shall be of sufficient detail to allow the Commissioner to fully understand the Contractor's proposed approach for completing all environmental remediation work required under the Contract. The plan shall include, but shall not be limited to, the following:
    - a. Copies of all applicable permits necessary to complete the environmental remediation work specified in the Contract.
    - b. A Project Management Chart presenting the names, titles, office locations, and office and cell phone numbers of individuals responsible

for conducting the environmental remediation work activities. At a minimum, the chart shall include the Contractor's responsible corporate officer, the office project manager, the site project manager(s)/superintendent(s), and the HASP author.

- c. A bar-graph-type schedule presenting the Contractor-proposed sequence for implementing environmental remediation work and the time required to complete each work activity from the award of the Contract. The schedule shall be prepared and revised as specified in the Standard Construction Contract, Articles 9 and 11, and coordinated with the CPM schedule described in Section 01321 – Construction Progress Scheduling.
  - d. A list of equipment to be mobilized to the site to perform the environmental remediation work.
  - e. Provisions for the safety, security, and protection of all adjacent properties.
  - f. The plan for controlling vehicular and pedestrian traffic at the entrance to the site during work activities.
  - g. A plan for the protection of Contractor-supplied materials and equipment and all waste materials to be generated during implementation of the environmental remediation work, plans for noise control, and plans for dust control measures.
  - h. Plans and sections depicting locations, sizes, and materials of construction for the Contractor-proposed staging areas, onsite storage areas, and decontamination areas.
  - i. Methods and materials to be used to mitigate offsite tracking of site-related materials.
  - j. A list of anticipated waste streams to be generated as a result of the environmental remediation work and anticipated waste volumes. Inaccuracies in the Contractor's estimate will not entitle the Contractor to additional money under this Contract.
  - k. Proposed methods for handling, containerizing, labeling, and loading each waste stream.
2. Contingency Plan. The Contractor shall prepare, submit, and implement a Contingency Plan that includes, at a minimum, the following items:
- a. A Spill Prevention Control and Countermeasures Plan for all materials brought to the site and for any liquids that may potentially be

encountered or handled during the environmental remediation work (including liquids requiring removal and liquids that remain/may be present at the site). Such liquids shall include, but not be limited to, oils within ballasts, residual liquid in bulbs, oil in equipment reservoirs, liquids in containers, and liquids in tanks and tank systems.

- b. Emergency vehicular access/egress.
  - c. Evacuation procedures of personnel from the work site.
  - d. A list of all contact personnel with mobile and office phone numbers, including the City of New York, the Commissioner, the Contractor, fire officials, ambulance service, local and state police, and local hospitals, including routes to local hospitals and procedures for notifying each. During the first day of work at the site, the Contractor shall drive the route to the hospital. Each of the Contractor's subcontractors shall drive the route to the hospital during their first day of work at the site.
  - e. Identification of responsible personnel who will be in a position at all times to receive incoming phone calls and to dispatch Contractor personnel and equipment in the event of an emergency situation.
3. Decontamination Plan. The Contractor shall prepare, submit, and implement a Decontamination Plan that identifies the following:
- a. Methods, procedures, and equipment to be employed during decontamination of personnel and equipment that have come in contact with impacted site media.
  - b. Generation, collection, and handling of solids, liquids, personal protective equipment (PPE), and other related wastes to be generated by decontamination/cleaning activities. Equipment and personnel decontamination activities shall be performed in areas to be designated by the Contractor and reviewed by the Commissioner.
4. Water Protection Plan. The Contractor shall prepare, submit, and implement a Water Protection Plan. The Water Protection Plan shall include a description of engineering controls (e.g., physical barriers) that the Contractor proposes to install and maintain to mitigate the release of any materials or debris into adjacent water bodies (either directly or indirectly) during implementation of the environmental remediation work. In the event of a release, the Contractor shall provide labor, equipment, and materials to perform emergency measures to contain releases, and to remove regulated materials for offsite disposal at no additional cost to the City of New York. The Water Protection Plan shall include a description of emergency measures the Contractor proposes to implement in the event of a release.

5. Submittals required in the following Sections:
- a. Section 01356 – Safe and Healthful Working Conditions. In addition to the submittal requirements specified in this Part, the Contractor shall comply with the submittal requirements presented in Section 01356.
  - b. Section 02224 – Removal of Arsenic-Impacted Wood – Environmental Requirements
  - c. Section 02225 – Impacted Soil Handling
  - d. Section 02291 – Air Monitoring Program
  - e. Section 13287 – Environmental Waste Transportation and Disposition
- B. Items shall be submitted for review in accordance with the submittal procedures for shop drawings specified in Section 01330 – Shop Drawings.
- C. The Commissioner will review the submittals to determine general compliance with the Contract conditions. The Commissioner's review shall in no way be construed as permitting any departure from the Contract, except where the Contractor has previously requested and received written approval from the Commissioner for such departure. The Commissioner's review does not relieve the Contractor of any responsibility to comply with applicable laws, rules, and regulations. The Contractor will not be permitted to undertake any activity that is directly or indirectly related to the item covered by the submittal until such time that the Commissioner provides notification to the Contractor.
- D. Submittals will be reviewed and marked by the Commissioner as specified in Section 01330 – Shop Drawings.
- E. Contractor's HASPs as required in Section 01356 – Safe and Healthful Working Conditions, shall be submitted for recordkeeping purposes only. A formal review of the HASPs will not be performed by the Commissioner.

#### 1.10 HAZARDOUS WASTE TAX

- A. The Contractor may be directed to pay the City of New York's New York State Hazardous Waste Tax assessment from the Regulated/Hazardous Material Remediation allowance. When directed by the Commissioner, the Contractor shall pay the amount indicated to the New York State Department of Taxation and Finance within 48 hours of notification. The Contractor will be reimbursed for the amount paid (if any), with no provision for overhead and profit, from the Hazardous Material Remediation allowance. If the Contractor is not directed to pay the City of New York's New York State Hazardous Waste Tax, then the Contractor shall supply all necessary documentation (e.g., completed manifests as

per Section 13287 – Environmental Waste Transportation and Disposition) to the Commissioner.

**PART 2 PRODUCTS (Not Used)**

**PART 3 EXECUTION (Not Used)**

**-END OF SECTION-**

**Southwest Brooklyn Marine Transfer Station**

**FMS No. S216-399A**

**NO TEXT ON THIS PAGE**

**Section 01410**  
**REGULATORY REQUIREMENTS**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Inspection by City of New York, State and Federal Government
- B. Work permits
- C. Bureau of Electrical Control
- D. Existing utilities
- E. Existing flows
- F. Disposal of water
- G. Conformance to Industrial Code
- H. Conformance to other codes and standards

**1.02 INSPECTION BY THE CITY OF NEW YORK, STATE AND FEDERAL GOVERNMENT**

- A. The Contractor shall provide proper facilities for inspection and access to the work at all times, whenever it is in preparation and progress, for authorized representatives of the City of New York, State and Federal Governments, the latter two in the presence of the Commissioner.

**1.03 WORK PERMITS**

- A. All New York City Building permits required for work under this Contract shall be obtained by the Contractor within six (6) months of Contract Notice to Proceed. Contractors shall be responsible for all costs associated with the resubmission of Building Permits applications if they fail to obtain permits within six (6) months of Contract Notice to Proceed.
- B. The Contractor shall obtain, maintain and pay for all necessary local, state and federal permits, licenses, certificates of inspection, city water connection permits and shall give all notices and pay all legal fees to City Departments in connection with the work of his Contract. The Contractor shall also be responsible for renewing these permits as often as necessary until the completion of the work and shall be responsible for the associated cost.

- C. All work performed under the Contract shall conform to the rules and regulations of the Bureau of Electrical Control, Department of Buildings; New York City Construction Codes, the New York City Plumbing Code, regulations of the Department of Air Resources, and all other City of New York, State and Federal Departments having jurisdiction.
- D. Upon completion of the various stages of construction, the Contractor shall schedule inspections and obtain certificates of approval and/or acceptance from the various agencies and Departments having jurisdiction and shall deliver these certificates to the Commissioner.

#### 1.04 BUREAU OF ELECTRICAL CONTROL

- A. The Contractor, as mandated by law, shall make application for a certificate of electrical inspection to the Bureau of Electrical Control for electrical work furnished under this Contract. Proof of filing for the certificate shall be submitted to the Commissioner in the form of the pink copy of the job posting card issued by the Bureau at the time of application. Such proof shall be submitted within fifteen (15) days after the date upon which the Contractor is notified by the City of New York to Commence Work.
- B. After completion of his work, the Contractor shall notify the local Borough Office in the Bureau of Electrical Control, Department of Buildings, by letter, requesting that a final inspection be made.
- C. Prior to final payment, there must be filed in the Office of the Comptroller of the City of New York a Certificate of Inspection signed by the Borough Superintendent of the Bureau of Electrical Control which shall certify that:
  - 1. All material and workmanship comply in every respect with the rules and regulations of the Bureau of Electrical Control and the New York City Electrical Code.
  - 2. All materials and workmanship comply in every respect with the Contract Documents approved by the Bureau of Electrical Control and fulfill the intent thereof.

#### 1.05 EXISTING UTILITIES

- A. All subsurface utility and structure information shown on the Contract Drawings was obtained from various plans, maps and field investigations; however they are not guaranteed to be complete or accurate. It shall be the Contractor's responsibility to locate all such necessary utilities or structures by the digging of test pits prior to the start of construction. No separate payment will be made for test pits.

- B. During the progress of the work, the Contractor shall protect from damage any existing utilities or services within the work areas until, they have been re-routed, disconnected or capped off.

#### 1.06 EXISTING FLOWS

- A. The Contractor shall, as approved by the Commissioner, provide and construct flumes, temporary sewers, dams and all incidental and related facilities necessary to divert or otherwise take care of groundwater and surface drainage, and to prevent any sediments from being conveyed into the existing storm sewer inlets or water courses.

#### 1.07 DISPOSAL OF WATER

- A. Water from open cut and/or sheeted excavations, manholes, structures, trenches, or from whatever source, shall be disposed of strictly in accordance with methods approved by the Commissioner.
- B. The Contractor shall submit proposed dewatering methods to the New York State Department of Environmental Conservation for the required permits. If a well point dewatering system is proposed, the Contractor shall utilize a licensed well driller. Contractor shall contact NYSDEC a minimum of 2 weeks in advance of dewatering system startup. All dewatering shall be in accordance with Section 15-1525 of the Environmental Conservation Law.
- C. When required by the Commissioner, such water shall be passed through a settling basin of acceptable size and shape and equipped with an overflow. Each settling basin shall be cleaned as required and as ordered by the Commissioner.
- D. Sufficient water to flush all sewers and drains shall be provided by the Contractor when necessary. If any sewer, drain, catch basin, inlet or gutter, that receives dirty water attributable to the Contractor's operations, should become filled or partially filled with sediment or debris, the Contractor shall promptly and satisfactorily remove such deposits.

#### 1.08 CONFORMANCE TO INDUSTRIAL CODE

- A. The Contractor's attention is directed to requirements of the Industrial Code of the State of New York, Department of Labor, Board of Standard and Appeals, latest edition and amendments or supplements thereto. All mechanical equipment with respect to manufacture, fabrication, and safety devices for protection of personnel from electrical parts and mechanically moving parts such as belts, shafts, couplings, and other apparatus, appliances or equipment, all floors, stair surfaces, ladders, equipment, access stairs and platforms, all exit enclosures, vertical openings and stairs, shall comply with this code; and all provisions therein shall be deemed included in and required by these specifications and shall be detailed for approval

and furnished without additional cost; the price thereof considered to be included in the applicable prices bid for the various Contract Items in the Contracts.

- B. For the convenience of the Contractor, the following Rules and Bulletins of the Industrial Code have been listed:

Rule No. 2 Exit enclosures, vertical opening and floors in factory buildings.

Rule No. 16 Floor and stair surfaces, railings and toeboards.

Rule No. 19 Guarding of dangerous machinery, vats and pans.

Bulletin No. 8 Construction, guarding, equipment, maintenance and operation of elevators, dumbwaiter, escalators, hoists and hoistways in factories, and mercantile establishments.

#### 1.09 CONFORMANCE TO OTHER CODES AND STANDARDS

- A. All devices, materials and installations shall conform to the current applicable requirements of the Administrative Code of the City of New York, the National Electrical Code (NFPA-70), ANSI, ASTM, IEEE, NEMA, OSHA, UL, the Contract Documents and the documents specified elsewhere in the specifications.
- B. The City of New York codes shall be followed in case of conflict. Latest edition of all codes shall apply.

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Seismic Requirements
- B. General mechanical requirements
- C. Diagrammatic drawings
- D. Ratings approximate
- E. Electrical equipment, special requirements
- F. Uniform finishes
- G. Temporary Support Structures

**1.02 DEFINITION**

- A. "Concealed" piping and ducts shall mean piping and ducts hidden from sight in masonry or other construction, in floor fill, trenches, partitions, hung ceilings, furred spaces, pipe shafts and in service tunnels not used for passage.

**1.03 SEISMIC REQUIREMENTS**

- A. The Contractor is advised that all equipment and appurtenances furnished and installed for this project shall be subject to the requirements of New York City Seismic Zone 2A for seismic loadings.
- B. Working drawings shall indicate that the equipment, equipment pads, piping, piping hangers and supports and all anchors required for a complete installation are capable of withstanding the seismic loadings.

**1.04 GENERAL MECHANICAL REQUIREMENTS**

- A. Where piping and ducts run in areas which have hung ceilings, such piping and ducts shall be installed in the hung ceilings.
- B. The Contract Drawings are in part diagrammatic and show the general arrangement of the equipment, ducts and piping included in the Contract and the approximate size and locations of the equipment. The Contractor shall follow these Drawings in laying out the Work and shall consult the Drawings of the other Contracts to

familiarize himself with all conditions affecting his work and to verify the spaces in which it will be installed.

- C. Connections to existing piping shall be made to permit ready disconnection of equipment with minimum disturbance of adjoining piping and equipment. The Contractor shall be responsible for the exact alignment of all piping with the associated equipment and under no circumstances will pipe springing be allowed.

#### 1.05 DIAGRAMMATIC DRAWINGS

- A. Various pipelines are shown on the Contract Drawings in diagram form. Where such pipelines are shown in diagram form, they shall be arranged clear of other pipelines, equipment and walking areas, and shall be accessible for maintenance. Such pipelines shall be fitted and installed in a neat and workmanlike manner in accordance with approved working drawings. An adequate number of unions shall be provided in main pipe and branch pipe runs to facilitate dismantling or removal of pipeline sections without disturbing adjacent branch or connecting lines.
- B. The final locations of valves, fittings and other such appurtenances included as a part of diagramed pipelines shall be as shown on approved working drawings or as determined in the field by the Commissioner.
- C. Diagramed pipelines shall be furnished, fabricated, erected and otherwise installed to lines, elevations, locations and dimensions as shown, specified or required for a complete installation. The Contractor shall verify all dimensions shown on the Contract Drawings and shall take such field dimensions as may be necessary to properly show on working drawings and install all diagramed pipelines.
- D. In the vicinity of overhead roll-up doors and truck ways all pipe, conduit and appurtenances shall be installed a minimum of 14'-0" above the finished grade or floor elevation, and a minimum of 8'-0" above the finished grade or floor elevation in all walking areas.
- E. Electrical conduits and wiring are in part diagrammatic and show the general arrangement and routing of conduits and wiring and the approximate size and location of devices included in the Contract. The Contractor shall follow the intent of these drawings in laying out the work. The Contractor shall verify the spaces allocated in which his work will be installed.

#### 1.06 RATINGS APPROXIMATE

- A. The ratings of the devices shown on the Electrical Drawings are approximate only and are merely indicative of the probable power requirements insofar as they can be determined in advance of the purchase of devices. The ratings of the devices furnished may be either increased or decreased according to the requirements of the equipment furnished.

- B. The Contractor shall verify the exact rating of each device before performing the work required under his Contract and modify the size of conduit, wiring and control equipment accordingly.

#### 1.07 ELECTRICAL EQUIPMENT - SPECIAL REQUIREMENTS

- A. All electrical equipment and devices manufactured and furnished under this Contract shall be of type that have been in satisfactory operation for not less than three years, except as provided in Article 5 (Materials & Equipment) of the General Conditions. Whenever similar devices or appliances are furnished, they shall be of one manufacturer and interchangeable within their ratings. If this is not feasible, the Contractor shall submit a statement for each manufacturer supplying devices, certifying the following:
  - 1. That he recommends the use of the device or devices for the specific function to be performed;
  - 2. That he fully guarantees the satisfactory operation of the device or devices in conjunction with the other elements of the equipment.
- B. Whenever standard devices or devices of a named manufacturer do not exactly fulfill the specified conditions, they shall be modified or special devices shall be furnished. All electrical devices furnished under the Contract shall be housed in metal enclosures with provisions for threaded conduit connections. The enclosures shall be designed to protect all electrical parts from local conditions.
- C. The ratings of motors and devices given in various Specification sections are approximate only and merely indicate the probable power requirements insofar as they can be determined in advance of the purchase of the equipment specified. The ratings of the motors and other devices furnished may be either increased or decreased according to the requirements of the equipment furnished and the Contractor shall verify the exact rating of each item of equipment before performing the work required under this Contract.
- D. Float switches, limit switches and other mechanically actuated electrical devices shall consist of an approved electrical system housed in rugged metal enclosures. They shall be adjustable without disturbing conduit connections. The switch actuating mechanism shall be mechanically and structurally correct for the required service and shall not subject the electrical parts to unnecessary stress or mechanical shock. Operating shafts shall be bushed and stuffed in dust-tight cases.
- E. The Contractor shall, unless otherwise directed, furnish and assemble all special lamps, indicating lamps, annunciator lamps and pilot lamps with all accessories.
- F. Electrical equipment rated greater than 1,000 watts and lighting equipment greater than 15 watts with an inductive reactance load component, shall have a power factor of not less than 85% under rated load conditions. Electrical equipment with a

power factor less than 85% shall be corrected to at least 85% under rated load conditions. Installed power factor corrective devices shall be switched with utilization equipment.

- G. Wire terminals on manufactured assemblies such as switchboards, bench boards, control panels, alarm boards, and motor control equipment shall consist of cup terminals, pronged washers, compression type solderless connectors or pressure type terminals furnished on devices.
- H. All control and indication wires within switchboards, control centers and other panels and cabinets shall be terminated on terminal blocks provided with marking strips for wire designation. The manufacturer shall identify all wires on the marking strips. All field wires will be terminated and identified by the Electrical Contractor.
- I. Provision shall be made for wire and cables installed at the plant site to be terminated by the Electrical Contractor with approved solderless copper alloy lugs. Lugs may be of the compression type, clamp type or screw type with internal pressure bar, or may be pressure-tool applied solderless connectors. Pressure tool applied solderless connectors for wires 250 MCM or larger shall have long barrels to allow double indentation. Where clamp type or screw type lugs are installed on wires 1/0 AWG and larger, wire ends shall be filled with solder, contact surfaces of lugs shall be tinned and heat shall be applied when the lugs are tightened.
- J. The Contractor shall consult with the manufacturer or his representative to assure that the electrical items will have a shelf life of at least ten (10) years. Polychlorinated biphenols (PCBs) shall not be used in any equipment on this project. Manufacturers shall have maintenance facilities in the New York City metropolitan area.
- K. All electrical equipment and work shall be in accordance with the Electrical Code of the City of New York. The Contractor shall submit proof to the Commissioner of application for an electrical inspection certificate for equipment furnished under this Contract in accordance with Article 1.37 of the General Conditions.

#### 1.08 UNIFORM FINISHES

- A. A uniform finish shall be used for all hardware, metallic nameplates and similar exposed metal parts used on any equipment or group of equipment and, as far as possible, the same finish shall be used for all such equipment items.

#### 1.09 TEMPORARY SUPPORT STRUCTURES

- A. The Contract Drawings show suggested design and construction requirements for the temporary support structures. The Contractor may submit an alternate design of any temporary support structure for approval by the Commissioner. The Commissioner may accept or reject the alternate design if the structure is not

considered temporary or if it may impose instability to the adjacent existing structure due to lateral and vertical movements. The alternate design of the temporary support shall be performed, signed and sealed by a Professional Engineer licensed in the State of New York who is qualified to determine the extent of work necessary to satisfy the temporary support requirements.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**NO TEXT ON THIS PAGE**

**Section 01431**  
**QUALITY ASSURANCE INSPECTION**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Quality assurance inspection
- B. Materials compliance
- C. Witnessed shop tests

**1.02 PAYMENT**

- A. The cost of scheduled witnessed shop test inspections as listed in Article 1.04 shall be included in each Contractor's lump sum bid.
  - 1. For the equipment to be witnessed shop tested, whether of foreign or domestic manufacture, the Contractor shall be responsible for the costs for two employees of the City of New York including all transportation, food, lodging and miscellaneous expenses for each witnessed shop test.

**1.03 MATERIALS COMPLIANCE**

- A. All materials and equipment submitted for approval by the Contractor shall have, at the time of their submittal, a current Report of Material and Equipment Acceptance from the New York City Department of Buildings, Materials and Equipment Acceptance Division, indicating acceptance of the item submitted for approval for its specified use.

**1.04 WITNESSED SHOP TESTS**

- A. Scheduled Witnessed Shop Tests: The following equipment shall be witnessed shop tested.

<u>Specification</u>	<u>Equipment</u>
14511	Container Transport System
14630	Maintenance Bay Bridge Crane
14640	Container Gantry Crane
14695	Constant Tension Mooring Winch
14696	Mooring Capstan
17101	SCADA System
13921	Fire Pumps
16230	Emergency Generators

<u>Specification</u>	<u>Equipment</u>
16430	480-Volt Switchgear

- B. Contractor shall notify the Commissioner at least four (4) weeks in advance of all scheduled witnessed shop tests to be conducted within the continental United States. Contractor shall notify the Commissioner at least six (6) weeks in advance of all scheduled witnessed shop tests to be conducted outside of the continental United States.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01435  
MONITORING SURVEY**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. The work specified in this Section consists of furnishing all labor, equipment, material and services required to perform the work specified herein. The work includes but is not limited to:
  - 1. Condition Survey: This work shall consist of performing structure condition survey(s) and preparing permanent records prior to the commencement of work, after completion of work, and at locations and times during construction as directed by the Commissioner. At a minimum, unless otherwise indicated in the contract documents, include all permanent structures within 25 feet of the construction limit line.
  - 2. Vibration Monitoring: This work shall consist of performing vibration monitoring of background and construction activities by use of seismograph instrumentation and preparing daily and summary report(s) of vibration readings during periods of demolition and construction operations which generate vibration.
  - 3. Position and Crack Monitoring Baseline: Establishing, maintaining, and developing a baseline of initial crack widths, elevations and coordinates of survey monitoring points.
  - 4. Locating and establishing remote survey benchmarks to be used in the work.
  - 5. Measuring and reporting periodic crack gage readings and elevations and coordinates of survey monitoring points.

**1.02 RELATED SPECIFICATIONS**

- A. Section 02364 – Steel Pipe Piles
- B. Section 02365 – Composite Tapered Piles
- C. Section 02390 – Fender Piles
- D. Section 02457 – Steel Sheet Piles
- E. Section 02464 – Timber Piles

**1.03 SUBMITTALS**

- A. Submit the following in accordance with Section 4 of the General Conditions and Section 01330 - Shop Drawings:

1. Shop drawings showing monitoring point and benchmark locations and details.
2. Names and credentials of surveyors performing the work.
3. Survey records of each monitoring point reading no later than one day after readings are taken. Records shall include list of monitoring points with initial and interim coordinates and elevations, and cumulative movement, both vertical and horizontal for each point surveyed.
4. Catalog cuts of crack gages.
5. Condition Survey detailing structures affected by the work, existing field conditions, cracks to be monitored and drawings detailing actual dimensions.
6. Pre-construction survey for background vibration.
7. Monitoring Scope
  - a. The scheduled start dates and lengths of construction operations which require vibration and survey monitoring.
  - b. The limits of vibration and survey and crack monitoring work, including sites on or off the project boundaries.
  - c. The location of all structures to be monitored in proximity to the construction operation.
  - d. The location of any underground or underwater utilities in proximity to the construction operation.
8. Vibration Monitoring Plan prepared by the instrumentation specialist shall be submitted to the Commissioner or approval. The vibration monitoring plan shall include, but not be limited to, the following items:
  - a. Experience and Equipment
    - (1) The name and brief resume of vibration monitoring specialist.
    - (2) Submit proof and details, as references, of two projects in the past three years where the vibration monitoring consultant performing the work has satisfactorily monitored construction operations by recording maximum Peak Particle Velocities (PPVs) and frequency. Include contact information for each reference.
    - (3) Submit information on the required 3-component seismograph, capable of measuring frequency and particle velocity data in three

mutually perpendicular directions, including: the manufacturer's name, model number, and documentation of factory calibration performed within the last 12 months.

b. Methods and Procedures

- (1) The location of adjacent structures to be monitored. If not otherwise specified, a maximum allowable PPV in accordance with the United States Bureau of Mines (USBM) Vibration Criteria (Figure 1) shall be observed at all structures.
- (2) The location of seismograph(s) placements, as directed by the instrumentation specialist, and where allowed by the owner and approved by the Commissioner.
- (3) Appropriate details for anchoring the geophone(s).
- (4) The procedure for tracking PPV throughout construction operations.

- B. Notify the Commissioner immediately in accordance with the Action Plan shown in Table 1 of Article 3.04 if movements or vibrations exceeding limits specified therein are detected.

1.04 PROJECT CONDITIONS

- A. Survey readings shall be made by a licensed Professional Land Surveyor registered in the State of New York.
- B. All readings shall be made in coordination with ongoing construction activities.
- C. Refer readings to the project coordinate system and datum.
- D. Comply with regulations and directives of the New York City Department of Buildings with regard to new foundation work in close proximity to existing foundations.

1.05 MOVEMENT CLASSIFICATION

- A. Maximum permitted movement of any structure shall not exceed 0.5 inches, unless otherwise defined in the Contract Documents.
- B. Maximum permitted change in crack width identified in the Condition Report and monitored with crack gages shall not exceed 0.10 inches.

1.06 STRUCTURE EXAMINATION

- A. Prior to starting work, the Contractor, the City of New York and the Commissioner shall make a joint inspection of the existing structures to examine and document their present conditions.
- B. Photographs shall be taken by the Contractor to record any exterior or interior conditions of a structure that may become the subject of damage claims.
- C. Prepare a Condition Report for each structure documenting all pre-existing conditions, verified by photographs, and signed by the personnel of the Contractor, the City of New York and the Commissioner participating in the investigation.

PART 2 PRODUCTS

2.01 CONDITION SURVEY EQUIPMENT

- A. Provide general photography and video equipment, analog or digital, capable of illuminating, zooming in, focusing on damage with scale bar indicators as necessary and superimposing the date and time on all images.
- B. Crack Gages: Grid type crack monitors as manufactured by Avongard Products (USA) Ltd; or approved equal. Anchors, bolts, screws, and quick-setting epoxy shall be provided as recommended by crack gage manufacturer.

2.02 VIBRATION MONITORING EQUIPMENT

- A. Provide 3-component seismographs, capable of measuring frequency ranging from 2 Hz to 250 Hz and particle velocity data down to 0.05 inches per second in three mutually perpendicular directions.
- B. Seismographs shall have been factory calibrated within past twelve (12) months. If seismographs show any indication of damage or vandalism or if the internal calibration indicates errors, as determined by the Commissioner, the seismograph shall be immediately re-calibrated in the factory or replaced.

PART 3 EXECUTION

3.01 PREPARATION

- A. Engage the services of a firm capable of furnishing a New York State licensed Professional Engineer to conduct a condition survey of the existing structure(s) and an experienced vibration monitoring specialist qualified in field instrumentation, to develop, install, operate, maintain, measure, interpret, and report results prior to and during construction operations.

- B. For position monitoring, establish and maintain at least two (2) remote permanent benchmarks and other reference points at approved locations, as required.
- C. Position monitoring points shall be located on the site at 50 feet on center at above ground structures and underground utilities. The monitoring points shall consist of a suitable mark, not anticipated to be subject to fading, damage or removal. Monitoring points for underground structures and utilities shall consist of a suitable mark or fixture at ground surface not easily removed or damaged. Provide a suitable numbering scheme, giving each point a unique identification number.
- D. Take initial reading, including background vibration, of all monitoring points and crack gages one week before construction activity in the area begins.

### 3.02 CONDITION SURVEY

- A. Provide, as a minimum, the following information:
  - 1. Photographic and video documentation of the interior and exterior condition of the structure(s) within the limits specified or as directed by the Commissioner.
  - 2. Extent and location of existing signs of potential structural distress such as cracks, spalling, loss of section, signs of settlement, flooding, leaking, etc.
  - 3. Descriptions and locations of crack monitors installed.
- B. The Commissioner may accompany the Contractor on each condition survey for verification of the data recorded. Provide two copies of all documentation of each condition survey to the Commissioner.

### 3.03 VIBRATION MONITORING

- A. As directed by the vibration specialist, perform continuous vibration monitoring during construction operations expected to cause vibration. This includes, but is not limited to, construction operations specified in Sections 02364, 02365, 02390, 02457 and 02464. Conduct the work in a manner that will limit construction vibration at the specified locations to within the limits specified herein.
- B. Inform the Commissioner immediately each time measured particle velocities exceed 85% of the allowable peak particle velocity as indicated in Figure 1. Make equipment or procedural modifications as required to avoid exceeding the allowable vibration intensity.

Figure 1 – USBM Vibration Criteria

- C. If the measured velocities exceed the maximum allowable PPVs, stop operations immediately and notify the Commissioner. Propose changes to equipment and procedures to reduce vibrations to allowable levels. Operations shall not resume until approved by the Commissioner.
- D. If the seismographs show any indication of damage or vandalism, the seismographs shall be immediately recalibrated or replaced.
- E. The Contractor shall be in communication with his monitoring firm's personnel during vibration monitoring at all locations to verify the data recorded.
- F. Provide the Commissioner with the results of daily vibration monitoring, one work day after the readings are taken. Upon completion of the construction operations for those locations requiring vibration monitoring, the daily submittals shall be synthesized into a final report.
- G. Additional, specific vibration monitoring requirements for the concrete block marina wall, located south of the work area approximately 40 feet behind the king pile wall being installed, is specified in Section 02457 – Steel Sheet Piles.

## 3.04 MOVEMENT MONITORING

- A. During construction work that may affect the existing structures, monitor the crack gages and position monitoring points within 100 feet of the work area at a minimum frequency of once daily. When no active work is in progress, but the excavation is open, monitor the affected points at a minimum frequency of once per week.
- B. All position monitoring point readings shall consist of both coordinates and elevations. Notify the Commissioner when observed movements from crack gages or position monitoring points reach levels shown in Table 1 below.

Table 1 - Action Plan For Protecting Adjacent Structures

MAXIMUM OBSERVED MOVEMENT	MONITORING LEVEL	NOTIFY	ACTION
50% of Permitted Value	Working	None	None
100% of Permitted Value	Working	Commissioner	Modify Activities
Exceeds Permitted Value	Action	Commissioner	Stop Work & Stabilize Foundations

- C. Reference all readings to one benchmark. Periodically check remote benchmarks to confirm that reference benchmark has not moved
- D. Survey the coordinates and elevations to a precision of  $\pm 0.005$  foot.
- E. Submit readings as specified. Keep all survey records and make available to the Commissioner upon request.

-END OF SECTION-

**Southwest Brooklyn Marine Transfer Station**

**FMS No. S216-399A**

**NO TEXT ON THIS PAGE**

**Section 01451**  
**CONTRACTOR'S QUALITY CONTROL**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Experience and qualifications of supply and service companies
- B. Imperfect work, equipment or materials
- C. Welding and welding inspection
- D. Inspection and testing of concrete
- E. Leakage tests
- F. Contractor's Surveyor
- G. Field Measurements

**1.02 EXPERIENCE AND QUALIFICATIONS OF SUPPLY AND SERVICE COMPANIES**

- A. The General Conditions require the Contractor to submit certain data to the Commissioner for approval. In addition to these requirements, and within thirty (30) days (unless otherwise stated in the progress schedule) after the date upon which the Contractor is notified to Commence Work, but prior to his entering into any supply or service subcontracts, he shall submit the following information:
  - 1. Contract number, supplies or services to be provided and a general description of the proposed item(s), such as trade name, type, etc.
  - 2. The name and address of the manufacturer or service company and the location of the plant at which supplies will be manufactured and tested as required, or at which the services will be performed.
  - 3. Experimental and test data required to support the claimed performance of the supplies.
  - 4. The approximate dates of the manufacturing period.
  - 5. A description of the testing plant, including the hydraulic, electrical and other facilities, in sufficient detail to show that the plant is adequately equipped for making the tests, if such testing is required.

6. Any additional information that the Commissioner may deem necessary in order to determine the ability of the supply or service company to produce the item as called for by the Specifications.

B. The Contractor shall not enter into any subcontracts for the furnishing of supplies or services until he has received, in writing, the Commissioner's approval.

#### 1.03 IMPERFECT WORK, EQUIPMENT OR MATERIALS

A. Any defective or imperfect work, equipment, or materials furnished by the Contractor which is discovered before the final acceptance of the work, as established by the Certificate of Substantial Completion, or during the subsequent guarantee period, shall be removed immediately even though it may have been overlooked by the Commissioner and estimated for payment. Any equipment or materials condemned or rejected by the Commissioner shall be tagged as such and shall be immediately removed from the site. Satisfactory work or materials shall be substituted for that rejected.

B. The Commissioner may order tests of imperfect or damaged work, equipment, or materials to determine the required functional capability for possible acceptance, if there is no other reason for rejection. The cost of such tests shall be borne by the Contractor, and the nature, tester, extent and supervision of the tests will be as determined by the Commissioner. If the results of the tests indicate that the required functional capability of the work, equipment, or material was not impaired, consistent with the final general appearance of same, the work, equipment or materials may be deemed acceptable. If the results of such tests reveal that the required functional capability of the questionable work, equipment or materials has been impaired, then such work, equipment or materials shall be deemed imperfect and shall be replaced. The Contractor may elect to replace the imperfect work, equipment or material in lieu of performing the tests.

#### 1.04 WELDING AND WELDING INSPECTION

A. All welding that is required for the Contract work and is performed within New York City shall be performed by New York City certified welders in accordance with the latest rules of the New York Board of Standards and Appeals (BS&A) and the current provisions of the New York City Construction Codes. Additional certification requirements are as follows:

1. Certification for Welding - For all field and shop welding, the following welding qualification provisions shall apply:

a. Prior to performing any welding, the Contractor must submit for the Commissioner's approval the following certifications: Welding Procedure Specification (WPS), Procedure Qualification Record (PQR), and Welder or Welding Operator Qualification Tests (WOQ). These specifications and qualifications shall be in accordance with Section IX

of the latest edition of the ASME Code, hereafter called the Code. Only certification received within the last three years will be considered for approval.

- b. If existing certification is not approved or not submitted, then the welders/welding shop must be qualified in accordance with the above procedures and tests, as administered by an inspection agency approved by the Commissioner. All the costs associated with the required tests for certification and retests, if any, shall be borne by the Contractor. The City of New York shall be given a notice of not less than five business days prior to such tests and may elect to witness any or all of these tests.
  - c. For welding of carbon steel, in lieu of the above, the Contractor may submit for the Commissioner's approval the following certification: Welding Procedure Specifications and Qualifications in accordance with the latest edition of ANSI/AWS Specification, D-1.1 Structural Welding Code - Steel. Only certification received within the last three years will be considered for approval. If the certification is not approved, the above qualification requirements must be met.
  - d. Any deviation from the requirements stated above shall not be permitted without a written waiver from the Commissioner.
2. Welding Inspection - Welding inspection for welding in New York City shall, in general, be in accordance with the latest rules of the New York City Building Code and the Bureau of Standards and Appeals.
- a. Additionally, all shop and field welds shall be inspected as follows, unless otherwise specified elsewhere.
  - b. All stainless steel welds shall be inspected and approved by means of Liquid Penetrant Examination (PT) in accordance with Appendix 8 of Section VIII, Division 1 of the Code. Any welds failing the inspection shall be made good and reinspected by PT.
  - c. All carbon steel welds not subject to radiographic or visual inspection, and all full-penetration field welds for interior carbon steel piping, shall be inspected and approved by means of Magnetic Particle Examination (MT) in accordance with Appendix 6 of Section VII, Division 1, of the Code. Any welds failing the inspection shall be made good and reinspected by MT.
  - d. On full penetration welds not subject to radiographic inspection, both the root pass and the final weldment shall be inspected by means of MT or PT as applicable.

- e. Radiographic Examination (RT) is required on all full penetration welds for pressure vessels or vessels using pressure vessel grade steel in their construction and structural steel. RT of pressure vessel welds shall be performed in accordance with ASME Pressure Vessel Code, Section VIII, Division 1, Paragraph UW-5.1. RT of structural welds shall be performed in accordance with the New York City Building Code.
- f. Unless otherwise approved, inspection of welds shall be conducted by an inspection agency approved by the City of New York and such costs shall be included in the lump sum price bid for Contract Item 1.
- g. The City of New York may elect to witness any or all of the welding inspection. A notice of not less than five business days shall be given to the Commissioner prior to any welding and inspection of those items specifically designated by the Commissioner.

#### 1.05 INSPECTION AND TESTING OF CONCRETE

- A. All work shall be in accordance with the requirements of Section 03300 - Cast-in-Place Concrete.

#### 1.06 LEAKAGE TESTS

- A. All new pipelines and appurtenant structures and all new liquid containing structures shall be field tested for leakage after installation in accordance with the requirements contained in Section 02505 - Leakage Tests.
- B. No direct or separate payment will be made for leakage tests. The costs shall be included in the prices bid for the respective pipelines and structures.

#### 1.07 CONTRACTOR'S SURVEYOR

- A. The Contractor shall retain the services of a Licensed Land Surveyor, registered in the State of New York, to perform survey work including but not limited to establishing line and grade, in advance of the construction; and to perform other surveying services for the work included under the Contract. The surveyor to be retained by the Contractor shall not be the same surveyor engaged by the Commissioner. The surveyor shall be subject to the approval of the City of New York. Survey drawings shall be submitted to the Commissioner for approval.
- B. The Contractor shall erect, install and maintain survey platforms, targets, benchmarks and similar facilities to be used by the Commissioner in the performance of his inspection services; shall perform all survey work required before, during and after construction and shall comply with the requirements specified under the General Conditions.

- C. The cost of the Contractor's Surveyor Work specified under this Section shall be included in the lump sum price bid for Contract Item 1.

1.08 FIELD MEASUREMENTS

- A. The Contractor shall take all necessary measurements in the field to determine the exact dimensions for all work and verify all pertinent data and dimensions shown on the Contract Drawings.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01452**  
**MOCK-UP REQUIREMENTS**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. This Section includes, but is not limited to, the following:
  - 1. Composite, or multi-material mock-ups, as indicated on the Drawings.
  - 2. General requirements for mock-ups required by individual specification sections.

**1.02 RELATED SPECIFICATIONS**

- A. Section 02780 – Concrete Pavers
- B. Section 03300 – Cast-in-place Concrete
- C. Section 03410 - Plant Precast Architectural Concrete
- D. Section 03350 - Concrete Finishes
- E. Section 04201 - Unit Masonry
- F. Section 07410 - Metal Wall Panels
- G. Section 07610 - Sheet Metal Roofing
- H. Section 07620 - Sheet Metal Flashing and Trim
- I. Section 07920 - Exterior Joint Sealants
- J. Section 08630 - Translucent Insulating Panels
- K. Section 11010 - Fall Restraint System

**1.03 DEFINITIONS**

- A. Mockups: Full-size, physical assemblies that are constructed on-site or at an approved off site location. Mockups are used to verify selections made under sample submittals, to demonstrate aesthetic effects and, where indicated, qualities of materials and execution, and to review construction, coordination, testing, or operation; they are not Samples. Approved mockups establish the standard by which the Work will be judged.
- B. Laboratory Mockups: Full-size, physical assemblies that are constructed at testing facility to verify performance characteristics.

**1.04 REQUIREMENTS**

- A. Mock-Ups: Before installing portions of the Work requiring mock-ups, build mock-ups for each form of construction and finish required to comply with the following requirements, using materials indicated for the completed Work:
  - 1. After approval of all applicable submissions, build mockups in location and of size indicated or, if not indicated, as directed by Commissioner.

2. Notify Commissioner seven (7) days in advance of dates and times when mockups will be constructed.
  3. Demonstrate the proposed range of aesthetic effects and workmanship.
  4. Obtain Commissioner's written approval of mockups before starting work, fabrication, or construction.
    - a. Allow seven (7) days for initial review and each re-review of each mockup.
  5. Protect and maintain mockups during construction in an undisturbed condition as a standard for judging the completed Work.
  6. Demolish and remove mockups when directed by Commissioner, unless otherwise indicated.
- B. Composite Mock-Ups: Representative components of Composite Mockups shown on the Drawings are listed below:
1. Typical Building Corner (Dwg. A590/D3)
  2. Snow guard
  3. Fall restraint
  4. Gutter with typical drain
  5. Zinc roofing system - all layers down to steel deck (including seams and all attachments)
  6. Zinc fascia, both front and side
  7. Zinc soffit
  8. Translucent panel system, including corner, joint, head and sill trim
  9. Metal panel system, including Top and bottom trim strips, and welded corner pieces
  10. Precast panel system, including typical attachments, reveals, and corner chamfer
  11. Cast-in-place concrete base
  12. All necessary flashing and sealants for the above materials, systems, and interfaces

13. Engineered support system which uses attachments per drawings and specifications and which is capable of supporting and maintaining the mock-up under design field conditions
14. Include Factory Authorized Service Representative Inspection of mock-ups per Article 1.07 for the following:
  - a. Sheet Metal Roofing.
  - b. Translucent Insulating Panels.
  - c. Metal Wall Panels.

C. Roof / Monitor Intersection (Dwg.A-590 / B1)

1. Zinc roofing system - all layers down to steel deck, including seams and all attachments. Straight and curved roofs and vertical siding are required.
2. Zinc fascia, both front and side
3. Zinc soffit
4. Translucent panel system, including corner, joint, head, jamb and sill trim
5. All necessary flashing and sealants for the above materials, systems, and interfaces
6. Engineered support system which uses attachments per drawings and specifications and which is capable of supporting and maintaining the mock-up under design field conditions
7. Include Factory Authorized Service Representative Inspection of mock-ups per Article 1.07 for the following:
  - a. Sheet Metal Roofing
  - b. Translucent Insulating Panels

D. Roof/Gable End Wall (Dwg. A-590 / D2)

1. Zinc roofing system - all layers down to steel deck, including seams and all attachments. Both straight and curved roofs are required.
2. Zinc fascia, both front and side
3. Zinc Soffit
4. Translucent panel system, including corner, joint, head, jamb and sill trim.

5. All necessary flashing and sealants for the above materials, systems, and interfaces.
6. Engineered support system which uses attachments per drawings and specifications and which is capable of supporting and maintaining the mock-up under design field conditions.
7. Include Factory Authorized Service Representative Inspection of mock-ups per Article 1.07 for the following:
  - a. Sheet Metal Roofing.
  - b. Translucent Insulating Panels.
  - c. Metal Wall Panels.

#### 1.05 SUBMITTALS

- A. Product Data: Refer to respective specification sections for required mock-up submittal requirements.
- B. Shop Drawings: Provide fully detailed shop drawings of each composite mockup showing location of the mockup on site, materials and construction, and engineered drawings of the proposed supporting structure.
- C. Plan for protecting all mockups for the duration of construction.
- D. Samples: Refer to respective specification sections for required mock-up sample submittal requirements.

#### 1.06 QUALITY ASSURANCE

- A. General: Qualifications paragraphs in this Article establish the minimum qualification levels required; individual Specification Sections specify additional requirements.
- B. Installer Qualifications for Mockups: A firm or individual experienced in installing, erecting, or assembling work similar in material, design, and extent to that indicated for this Project, whose work has resulted in construction with a record of successful in-service performance.
  1. Where mock-up components are comprised of the work of various trades and/or specification sections, construct mockups using the firms or individuals responsible for each respective portion of the work.
- C. Manufacturer Qualifications for Mockups: A firm experienced in manufacturing products or systems similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units.

1. Where mock-up components are comprised of the work of various products and or systems of various manufacturers, construct mockups using the manufacturers responsible for each respective portion of the work.
- D. Fabricator Qualifications for Mockups: A firm experienced in producing products similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units.
1. Where mock-up components are comprised of the work of various trades and/or specification sections, construct mockups using the firms or individuals responsible for the fabrication of each respective portion of the work.
- E. Laboratory Mockups: Comply with requirements of preconstruction testing and those specified in individual Sections in Divisions 2 through 16.

#### 1.07 QUALITY CONTROL

- A. Owner Responsibilities: Where mock-ups require quality-control services that are indicated as the City of New York's responsibility, the City of New York will engage a qualified testing agency to perform these services.
1. The City of New York will furnish Contractor with names, addresses, and telephone numbers of testing agencies engaged and a description of types of mock-up testing and inspecting they are engaged to perform.
  2. Costs for retesting and re-inspecting mock-ups that replaces or is necessitated by work that failed to comply with the Contract Documents will be charged to Contractor.
- B. Mock-up Tests and inspections not explicitly assigned to the City of New York are Contractor's responsibility.
1. Where services are indicated as Contractor's responsibility, engage a qualified testing agency to perform these quality-control services.
    - a. Contractor shall not employ same entity engaged by the City of New York, unless agreed to in writing by the City of New York.
  2. Testing and inspecting of mock-ups requested by Contractor and not required by the Contract Documents are Contractor's responsibility.
  3. Submit additional copies of each written report directly to authorities having jurisdiction, when they so direct.
- C. Manufacturer's Field Services for Mock-ups: Where indicated, engage a factory-authorized service representative to inspect field-assembled components and equipment installation, including service connections. Report results in writing to the Commissioner.

- D. Retesting/Reinspecting: Regardless of whether original tests or inspections were Contractor's responsibility, provide quality-control services, including retesting and reinspecting, for construction that replaced Work that failed to comply with the Contract Documents.
- E. Coordination: Coordinate sequence of activities to accommodate required quality-assurance and control services with a minimum of delay and to avoid necessity of removing and replacing mock-ups to accommodate testing and inspecting.
  - 1. Schedule times for tests, inspections, obtaining samples, and similar activities.
  - 2. Coordinate sequence of construction to be as anticipated for the actual building.

## PART 2 PRODUCTS

### 2.01 MATERIALS

- A. General: Provide primary and secondary materials as required to construct the required mock-ups. Refer to each of the respective/individual sections of the Construction Manual for specific materials requirements. Materials employed in the mock-ups shall be identical to those materials/systems specified, and shall represent the materials, construction and assemblies proposed in the finished Work.

## PART 3 EXECUTION

### 3.01 REPAIR AND PROTECTION OF IN PLACE FIELD MOCK-UPS

- A. The following applies to mock-ups that are approved for use in the final installation. On completion of testing and approval of mock-ups in place field mock-ups, repair damaged construction and restore substrates and finishes.
  - 1. Provide materials and comply with installation requirements specified in other Specification Sections. Restore patched areas and extend restoration into adjoining areas with durable seams that are as invisible as possible.
  - 2. Comply with the Contract Document requirements for "Cutting and Patching."
- B. Protect mock-ups from damage.
- C. Repair and protection are Contractor's responsibility, regardless of the assignment of responsibility for mock-up services.
- D. Remove mock-ups that are not to be used in the final work.

3.02 SCHEDULE OF MOCK-UPS FOR TESTING

- A. Provide mock-ups for testing by the City of New York's Testing Agency as indicated in respective specifications.

3.03 MOCK-UPS FOR DESIGN APPROVAL

- A. Provide visual mock-ups for review and approval by the Commissioner as indicated in the respective sections of the Specifications.
- B. Prior to proceeding with the Work, provide composite mock-ups as shown on the Drawings for review and approval.

-END OF SECTION-

**NO TEXT ON THIS PAGE**

**Section 01512**  
**TEMPORARY VENTILATION FACILITIES**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Temporary ventilation facilities.

**PART 2 PRODUCTS**

**2.01 TEMPORARY VENTILATION SYSTEM**

- A. The Contractor shall provide all temporary ventilation for ventilating all structures and building areas, both above and below ground level, for the protection of all work and equipment or for safety of its employees, its subcontractor's employees or the employees of the other Contractors after the building or structure is enclosed.
- B. Ventilating systems may be forced or gravity type and shall be complete with fans, motors, inlets, outlets, ductwork, heaters, controls or any other equipment necessary, all furnished and installed by the Contractor. The following additional requirements shall apply:
  - 1. All temporary ventilation methods shall comply with all Federal, State and City of New York rules and regulations.
  - 2. A building or structure shall be enclosed as specified in Article 1.15 of the General Conditions.
  - 3. Ventilation air shall be heated to those temperatures as specified in Article 1.15 of the General Conditions. Where dehumidification is required to prevent mildew or moisture forming on equipment, work or structures in areas being ventilated, it shall be provided by the Contractor.
- C. Temporary ventilation equipment shall be located so as not to interfere with the operation of the new construction work. Protective devices shall be provided for the protection of the personnel.

**PART 3 EXECUTION**

**3.01 OPERATION AND MAINTENANCE**

- A. During the period in which temporary heat in an enclosed building is being furnished and maintained, the Contractor shall provide ventilation for the proper operation of the system and execution of the work.

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01513**  
**TEMPORARY POWER FACILITIES**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Under this section, the Contractor shall provide the following services:
1. Furnish, install, connect, operate and maintain the construction power system and all appurtenances required for the Structures and Equipment, HVAC, Plumbing and Electrical Contracts.
  2. Make arrangements with Con Edison immediately after notice to commence work to furnish the service supplies required for construction light and power.
  3. Provide all material and labor to distribute power from a Con Edison service entry point for electrical power service to the construction site and to the Resident Engineer's Field Office. The service shall be extended by the Contractor and distributed as 120/208V, 3-phase, 4-wire service. The Contractor shall furnish, install, connect, and maintain all circuit breakers, poles, power cables, metering center, fuses, panelboards, wiring, and accessories as specified herein and as required by Con Edison.
  4. Furnish material and labor for the maintenance of the construction light and power for the duration of the Contract work.
  5. Provide temporary lighting as described in the General Conditions.
- B. Contractor shall provide his own temporary electrical system from the service point and pay for his own energy usage.

**1.02 RELATED SPECIFICATIONS**

- A. Section 16020 – Temporary Electrical System

**1.03 GENERAL REQUIREMENTS**

- A. The temporary light and power facilities shall be provided, energized, maintained and de-energized in accordance with Section 16020 – Temporary Electrical System and as specified herein.
- B. The Contractor shall provide an electrical service point to the Resident Engineer's Field Office.

## 1.04 SERVICE PERIOD

- A. Temporary power shall be furnished 24 hours per day, 7 days per week for the duration of the Work and shall conform to Section 16020 – Temporary Electrical System.

## PART 2 PRODUCTS

## 2.01 PORTABLE GENERATOR

- A. The Contractor shall provide a portable on-site power generator for his use in the event of power outages. The generator shall be a 250 kW, 0.8 power factor, 208/120 V, 3-phase, 4-wire generator. The Contractor shall obtain any necessary approvals for use of the generator from Con Edison.

## 2.02 TEMPORARY HEATING SYSTEM FEEDER

- A. The Contractor shall furnish, install, connect and maintain all electrical connections required for the temporary heating system as described in the General Conditions.

## PART 3 EXECUTION

## 3.01 OPERATION AND MAINTENANCE

- A. The Contractor shall provide all material and labor to install, maintain, energize and de-energize the light and power system.
- B. The Contractor shall have one electrician available 24 hours per day for incidental modifications as directed by the Commissioner and to maintain the electrical equipment and power distribution systems at the site for the duration of the Contract.
- C. The Contractor shall remove all portions of the temporary light and power system when so directed by the Commissioner.

-END OF SECTION-

**Section 01520**  
**TEMPORARY CONSTRUCTION FACILITIES**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Contractor's Field Office
- B. Land for Contractor's Use

**1.02 CONTRACTOR'S FIELD OFFICE**

- A. Contractor shall furnish and maintain a field office in accordance with the General Conditions. Field Office shall be located at the site within the space shown on the Contract Drawings. Off-street parking shall be provided by the Contractor for its field office.
- B. Contractors' field offices shall present a clean and neat exterior appearance and shall be in a state of good repair. Trailers which, in the opinion of the Commissioner, require exterior painting or maintenance shall be repaired or replaced at the Commissioner's direction.

**1.03 LAND FOR CONTRACTOR'S USE**

- A. Contractor shall confine its construction activities to City of New York-owned property and to the actual area where he is performing work within the Limits of Construction as shown on the Contract Drawings. Personal vehicles of the Contractor's employees will not be permitted on the Site.
- B. The available area must be shared with the other Contractors. Should the Contractor require additional space, he shall provide the space off-site and all such costs and arrangements shall be at its expense.
- C. The City of New York reserves the option to require the Contractor to vacate its assigned areas within sixty (60) days after notice by the City of New York. No additional compensation or extension of contract time will be allowed for any such relocation.
- D. Following the completion of the Contract or as indicated on the Contract Documents or directed by the Commissioner, the Contractor shall remove its facilities, shanties, materials, equipment, etc., from the allocated site and restore the site to its original condition, satisfactory to the Commissioner.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01550**  
**VEHICULAR ACCESS AND PARKING**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Maintenance of traffic
- B. Site Access
- C. Truck routes
- D. Construction staff parking area

**1.02 MAINTENANCE OF TRAFFIC**

- A. During working hours, the Contractor shall be responsible for maintenance and control of traffic in and out of the site at all points of vehicular ingress and egress and shall provide flagmen to warn vehicles on the City of New York streets of vehicles approaching from the site. Flagmen shall be properly attired and equipped according to the regulations of the City of New York. A minimum of one lane of traffic in each direction shall be maintained on City of New York streets at all times.
- B. Modifications to existing streets and traffic patterns shall be approved by and in accordance with the requirements of the Office of Construction Coordination (OCC). Each Contractor shall be responsible for obtaining and paying for this approval whenever his construction operations require modifications to the existing streets or traffic patterns. Traffic safety devices shall be placed as per the Manual of Uniform Traffic Control Devices (MUTCD).
- C. When equipment delivered under this Contract is transported as an "oversized load" the responsible Contractor shall maintain traffic in accordance with the requirements of the various City of New York agencies having jurisdiction.
- D. During the progress of the work, the Contractor shall provide all temporary construction roads and walkways as required, and shall make ample provisions to prevent interference with the continued maintenance of vehicular traffic on roadways and shall indemnify and save harmless the City of New York and the Commissioner from any expense whatsoever due to his operations over said roadways. Any roadways damaged by the Contractor or his subcontractors or materialmen shall be restored to their original condition upon notification by the Commissioner that such repairs are required and such restoration of the roadway shall be at the responsible Contractor's expense. Temporary construction roads and walkways shall be removed, at the Contractor's expense, prior to acceptance of the Contract.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION

3.01 SITE ACCESS

- A. The Contractor shall provide and maintain the temporary access to the site of the work during the life of this Contract.
- B. The Contractor shall provide each of his employees an identification badge which shall display the employee's name, photograph, and trade, the Contractor's name and the Contract. Every employee shall wear this identification badge, prominently displayed on his person to obtain access to the site and at all times while present on the site.

3.02 TRUCK ROUTES

- A. During the progress of construction, trucks entering or leaving the site shall utilize only NYCDOT-designated and DDC-directed or -approved truck routes. The Contractor shall assure that its crew members, and its subcontractors and materialmen and their crew members are fully advised of the designated and directed or approved routes.
- B. NYCDOT truck routes are identified on maps available from the NYCDOT. Copies of these maps can be obtained from the New York City Department of Transportation (NYCDOT) Office of Planning and Urban Mobility, Room 928, 40 Worth Street, New York, NY or from the NYCDOT website ([www.nyc.gov/html/dot/html/motorist/trucks.shtml](http://www.nyc.gov/html/dot/html/motorist/trucks.shtml)).

3.03 CONSTRUCTION STAFF PARKING AREA

- A. The parking area identified on the Contract Drawings is limited in extent. The area shall be utilized solely by the Construction Management staff and visitors to the Construction Management Office.
- B. The Contractor shall take appropriate actions to ensure that no personal vehicles of its employees, or employees of its subcontractors or materialmen will be permitted on the work site.

-END OF SECTION-

**Section 01560**  
**TEMPORARY BARRIERS AND ENCLOSURES**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Barricades
- B. Fencing
- C. Protection of work, personnel and materials
- D. Tree and plant protection

**1.02 RELATED SPECIFICATIONS**

- A. Section 01570 - Temporary Controls
- B. Section 02821 - Metal Fence

**1.03 BARRICADES****A. Roads, Parking Areas and Sidewalks**

1. Contractor shall provide, erect and maintain as necessary for his work, strong and suitable barricades, danger signs and warning lights along all roads, parking areas and sidewalks, accessible to the public or City of New York personnel.
2. All barricades and obstructions shall be illuminated at night and all lights for this purpose shall be kept burning from sunset to sunrise.
3. Sufficient barricades shall be erected to keep vehicles from being driven on or into work under construction.

**B. Excavations**

1. All open excavations shall be adequately safeguarded by providing temporary barricades, caution signs, lights and other means to prevent accidents to persons, and damage to property.
2. Contractor shall, at his own expense, provide suitable and safe bridges and other crossings for accommodating travel by pedestrians and workmen. Bridges provided for access during construction shall be removed when no longer required.

3. The length or size of excavation will be controlled by the particular surrounding conditions, but shall always be confined to the limits prescribed by the Commissioner. If the excavation becomes a hazard, or if it excessively restricts traffic at any point, the City of New York may require special construction procedures such as limiting the length of the open trench, prohibiting stacking excavated material in the street, and requiring that the trench shall not remain open overnight.
  4. The Contractor shall take precautions to prevent injury to the public or City of New York personnel due to open trenches. All trenches, excavated material, equipment, or other obstacles which could be dangerous to the public or City of New York personnel shall be well lighted from sunset to sunrise.
- C. Contractor's responsibility for the maintenance of barricades, signs and lights shall continue until the Project is accepted by the City of New York. Contractor shall provide and maintain such other warning signs and barricades in other areas and around their respective work as may be required for the safety of all those employed in the work, plant operating personnel, or those visiting the site.

#### 1.04 FENCING

##### A. Construction Fencing

1. At the start of the work, the Structures and Equipment Contractor shall provide and erect construction fencing to completely enclose the construction sites of this Project in accordance with the Contract Documents. Any damage to the construction fencing shall be immediately repaired by the Contractor to the satisfaction of the Commissioner.
2. Chain link fence shall be 10 feet high unless shown otherwise on the Contract Drawings and shall conform to the requirements of Section 02821 – Metal Fence. The Contractor shall also provide the size and number of gates for ingress and egress in accordance with the Contract Documents.

##### B. Safety Fencing

1. Contractor shall provide and erect, when required or directed by the Commissioner, temporary project safety fencing at the work site.
2. The safety fencing shall be a high visibility, orange colored, high density polyethylene grid or approved equal, a minimum of 42 inches high, supported and tightly secured to steel posts located on maximum 10 foot centers.

- C. Fencing shall be maintained by the Contractors during the life of the Contract and, upon completion and acceptance of the work, shall become the property of the Contractor and shall be removed from the work site.

## 1.05 PROTECTION OF WORK, PERSONNEL AND MATERIALS

- A. Until permanent walls, railings, stairs, hatches, etc., are in place, the Structures and Equipment Contractor shall be responsible for the installation and maintenance of temporary barricades and temporary railings around openings, stairwells, on temporary or permanent stairs, around the perimeter of elevated floors, landings, permanent ramps, etc. The installation shall be in accordance with the requirements of OSHA and the codes and regulations of authorities having jurisdiction.
- B. During the progress of the work and up to the date of final payment, Contractor shall be solely responsible for the care and protection of all work, personnel, and materials covered by the Contract.
- C. In order to prevent damage, injury or loss, actions taken by Contractor shall include, but not be limited to, the following:
  - 1. Store apparatus, materials, supplies, and equipment in an orderly, safe manner that will not interfere with the progress of the work or the work of any other Contractor or utility service company.
  - 2. Provide suitable storage facilities for all materials which are subject to injury by exposure to weather, theft or breakage.
  - 3. Place upon the work or any part thereof only such loads as are consistent with the safety of that portion of the work.
  - 4. Clean up frequently all refuse, rubbish, scrap materials, and debris caused by his operations, to the end that at all times the site of the work shall present a safe, orderly and workmanlike appearance.
- D. Contractor shall protect the existing work and material from damage by his workmen and shall be responsible for repairing any such damage at no additional cost to the City of New York.

## 1.06 TREE AND PLANT PROTECTION

- A. Contractor shall protect trees, shrubbery and other natural features from being cut, trimmed or injured in his area of work. Trees adjacent to the site of work shall be protected and temporary supports provided for long branches. Stored materials and equipment shall be in cleared spaces, away from all trees and shrubs, and confined to areas as directed by the Commissioner.
- B. Temporary fences or barricades shall be installed to protect trees and plants in areas subject to traffic.
- C. Within the limits of the work, water trees and plants that are to remain, in order to maintain their health during construction operations.

- D. Cover all exposed roots temporarily with burlap that shall be kept continuously wet. Exposed roots shall be covered with earth as soon as possible. Protect root systems from mechanical damage and damage by erosion, flooding, runoff or noxious materials in solution.
- E. If branches or trunks are damaged, prune branches immediately and protect the cut or damaged areas with emulsified asphalt compounded specifically for horticultural use in a manner approved by the Commissioner.
- F. All damaged trees and plants that die or suffer permanent injury shall be removed when ordered by the Commissioner and replaced by a specimen of equal or better quality at the Contractor's expense.

-END OF SECTION-

**Section 01561**  
**SITE SECURITY**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Work site security requirements.

**1.02 SECURITY GUARD AND FIRE GUARDS**

- A. Security guards and fire guards will be required as described in the General Conditions.

**1.03 ADDITIONAL SECURITY**

- A. Contractor shall provide his own site security as he deems necessary. The additional cost of such approved protection shall be paid by the Contractor. Any security services furnished by the Contractor must meet the requirements of the New York State Security Guard Act of 1992.
- B. Nothing contained herein shall diminish in any way the responsibility of the Contractor for safeguarding and protecting his own work, materials, tools and equipment.

**Section 01570  
TEMPORARY CONTROLS**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Prohibited construction procedures
- B. Pollution Control
- C. Dust, soil erosion and sedimentation control
- D. Noise Control

**1.02 RELATED SPECIFICATIONS**

- A. Section 02371 - Dust, Soil Erosion and Sedimentation Control

**1.03 GENERAL REQUIREMENTS**

- A. Contractor shall furnish all labor, materials, equipment and incidentals required to assure adequate environmental protection including implementation of all control measures as directed by the Commissioner and specified herein.
- B. Contractor shall comply with all applicable Federal, State and Local laws and regulations concerning environmental protection, restoration and erosion and sediment control.

**1.04 SUBMITTALS**

- A. Submit Environmental Plan describing proposed methods, schedules and materials for implementing the environmental protection requirements.

**1.05 PROHIBITED CONSTRUCTION PROCEDURES**

- A. The following construction procedures are prohibited:
  - 1. Dumping or wasting of spoil material into any stream corridor, any surface waters or at unspecified locations adjacent to the work area or at locations not approved by the Commissioner.
  - 2. Indiscriminate, arbitrary or capricious operation of equipment in any stream corridor or surface waters.
  - 3. Dumping of silt-laden water directly into any stream corridor or surface waters without provision for treatment as noted herein.

4. Damaging vegetation adjacent to or outside of access roads or limited rights-of-way for the work. All construction operations must be confined within the Contractor's work limits as shown and/or specified.
5. Disposal of trees, bush and other debris into any stream corridor, any wetlands or at unspecified locations.
6. Open burning of materials.

## PART 2 PRODUCTS (Not Used)

## PART 3 EXECUTION

### 3.01 POLLUTION CONTROL

- A. Contractor shall provide the methods, means and facilities required to prevent contamination of soil, water or atmosphere by the discharge of noxious substances from construction operations.
- B. Equipment and personnel shall be provided by Contractor to perform emergency measures required to contain any spillages, and to remove contaminated soils or liquids for off-site disposal.
- C. Special measures shall be taken by Contractor to prevent harmful substances from entering public waters, and to prevent disposal of wastes, effluents, chemicals, or other such substances to adjacent waterways or to sanitary or storm sewers.
- D. Contractors shall provide systems for control of atmospheric pollutants to prevent toxic concentrations of chemicals and to prevent harmful dispersal of pollutants into the atmosphere.
- E. All chemicals used during project construction or furnished for project operation, whether herbicide, pesticide, disinfectant, polymer, or reactant of other classification, must show approval of the EPA and other recognized certifying agencies. Use of all such chemicals and disposal of residues shall be in strict conformance with regulatory requirements.
- F. All Contractors' equipment used during construction shall conform to all current federal, state and local laws and regulations.

### 3.02 DUST, SOIL EROSION AND SEDIMENTATION CONTROL

- A. All Contractors shall comply with the requirements of Section 02371 - Dust, Soil Erosion and Sedimentation Control.

## 3.03 NOISE CONTROL

- A. Noise control during construction activities shall be performed in accordance with §24-219 of the New York City Noise Code.
1. Other than impulsive sound, sound from construction devices and exhausts should not exceed 85 dBA at 50 feet at a point outside the property line or in the public right-of-way. If the aggregate sound levels from a construction site exceed the allowable construction decibel level limits, compliance with the specific equipment decibel limits above does validate site compliance.
  2. Impulsive sound should not exceed 15 dBA or more above ambient at a receiving property or at a distance of 15 feet or more in a public right-of-way. Impulsive sound should be measured with the noise meter set to a "fast" response. Ambient sound should be measured with the noise meter set to a "slow" response.
  3. Sound from the transport or movement of containers and construction material shall not exceed the following noise limits:  
  
7 dBA above ambient between 10pm and 7am;  
10 dBA above ambient between 7am and 10pm; and
  4. Pneumatic discharge muffler must have a dynamic insertion loss of 5 dBA of the sound released from the air discharge of the paving breaker. Maximum sound levels emanating from the paving breaker should not exceed 95 dBA at 1 meter (75 dBA at 50 feet).
- B. Contractor shall complete a Construction Noise Mitigation Plan (CNMP) as specified in the New York City Noise Code.
1. Contractor may be required to file the CNMP with the Department of Environmental Protection (DEP) if requested, although typically not.
  2. Contractor shall provide as part of CNMP noise mitigation strategies for construction equipment such as pile drivers, bulldozers, cranes, derricks, air compressors, generators, tunneling machines, etc at construction sites. Noise mitigation strategies may include:
    - a. Site perimeter fences with acoustical blankets;
    - b. Portable barriers with acoustical blankets;
    - c. Acoustical blankets; and
    - d. Exhaust muffler testing and certification
  3. Contractor shall provide the CNMP prior to construction. For emergency activities, the CNMP must be adopted within 3 days after the start of activities.

4. Contractor shall keep CNMP on-site and available for inspection.
  5. Contractor shall amend CNMP to accommodate changes/additions to construction activities and equipment.
- C. Contractor's vehicles and equipment shall be operated and maintained so as to minimize noise to the greatest degree practicable. Noise levels shall conform to the latest regulatory standards and in no case will noise levels be permitted which interfere with the work of the on-site personnel.
1. All construction equipment powered by an internal combustion engine shall be equipped with a properly maintained muffler.
  2. Air-powered equipment shall be fitted with pneumatic exhaust silencers.

#### 3.04 NOTIFICATION OF NON-COMPLIANCE

- A. The Commissioner will notify the Contractor in writing of any non-compliance with the provisions of this Section and the action to be taken. The Contractor shall, after receipt of such notice, immediately take corrective action. Such notice, when delivered to the Contractor or his authorized representative at the site of the work, shall be deemed sufficient for the purpose.
1. If the Contractor fails or refuses to comply promptly, an order stopping all or part of the work may be issued by the City of New York until satisfactory corrective action has been taken.
  2. No part of the time lost due to any such stop orders shall be made the subject of a claim for extension of time or for excess costs or damages by the Contractor, unless it is later determined that the Contractor was in compliance with the provisions of this Section.
- B. Compliance with the provisions of this Section by subcontractors shall be the responsibility of the Contractor.

-END OF SECTION-

**Section 01631**  
**EQUIVALENT MATERIALS AND EQUIPMENT**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Requirements for substitution of materials equivalent to those specified in the Contract Documents.

**1.02 GENERAL REQUIREMENTS FOR SUBSTITUTION**

- A. Whenever materials or equipment are specified or described in the Contract Documents by using the name of a particular manufacturer, fabricator, supplier or distributor, the naming of the item is intended to establish the type, function and quality required, and an equivalent item may be submitted for approval.
- B. Where the Contractor proposes to supply a substitution for a particular manufacturer, equipment or material named in the Specification, it shall conform to the General Conditions and the requirements of this section.
- C. Requests for review of the substitute items of material and equipment will not be accepted by the Commissioner from anyone other than the Contractor. If the Contractor wishes to furnish or use a substitute item of material or equipment, the Contractor shall make written application to the Engineer for acceptance thereof, certifying that the proposed substitute will satisfactorily perform the functions and achieve the results called for by the Contract Documents, be similar and of equal substance to that specified and be suited to the same use as that specified.
  - 1. The application shall state the evaluation and acceptance of the proposed substitute will not prejudice the Contractor's timely achievement of Substantial Completion, whether or not acceptance of the substitute for use in the Work will require a change in the Contract Documents to adapt the design to the substitute and whether or not the substitute is subject to payment of any license fee or royalty.
  - 2. All variations of the proposed substitute from that specified shall be identified in the application. Available maintenance, repair and replacement service shall be indicated. The application shall also contain an itemized estimate of all costs that will result directly or indirectly from acceptance of such substitute, including costs of redesign and impact on other contractors affected by the change, all of which shall be considered by the Commissioner in evaluating the proposed substitute.
  - 3. Commissioner may require the Contractor to furnish at the Contractor's expense additional testing and data concerning the proposed substitute. The Commissioner will be allowed a reasonable time within which to evaluate the

proposed substitute. The Commissioner will be the judge of acceptability and no substitute will be ordered or installed without the Engineer's prior written acceptance.

#### 1.03 CHANGES RESULTING FROM SUBSTITUTION

- A. The Contract Documents were prepared to accommodate the equipment furnished by the manufacturers named and all motor horsepower, connecting pipe sizes, equipment dimensions, etc., shown are based on the best information available at the time of design.
- B. If the substitute equipment to be furnished is different in dimensions, horsepower requirements, pipe connection sizes or other material characteristic from that provided for on the Contract Documents, and the difference in the equipment dimensions, horsepower requirements, pipe connection sizes, or other material characteristic is not the result of changes in design conditions or concept ordered by the Commissioner, then the Contractor shall be responsible for the furnishing of all properly sized connecting piping, motor starters, motor control centers, and electrical wiring and connections, and all other work required to properly install the equipment in complete operating condition.
- C. The cost of all such revisions shall be considered to be included in the total price bid for the Contract. The Contractor shall pay all costs for changes required to related Contracts resulting from the substitution.

#### 1.04 SPECIAL PERFORMANCE GUARANTEE

- A. The Commissioner may require the Contractor to furnish, at the Contractor's expense, a special performance guarantee or other security acceptable to the City of New York.

#### 1.05 COMMISSIONER SHALL BE THE JUDGE

- A. In all cases, the Commissioner shall be the judge as to whether a proposed substitution is to be approved. The Contractor shall abide by the Commissioner's decision when proposed substitute items are judged to be unacceptable and shall in such instances furnish the item specified or indicated. No substitute items shall be used in the work without written approval of the Commissioner.
- B. The Contractor shall have and make no claim for an extension of time or for damages by reason of the time taken by the Commissioner in considering a substitution proposed by the Contractor or by reason of the failure of the Commissioner to approve a substitution proposed by the Contractor.
- C. Acceptance of any proposed substitution shall in no way release the Contractor from any of the provisions of the Contract Documents.

**FMS No. S216-399A**

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

**-END OF SECTION-**

**Southwest Brooklyn Marine Transfer Station**

**FMS No. S216-399A**

**NO TEXT ON THIS PAGE**

**Section 01651**

**TRANSPORTATION AND HANDLING OF MATERIALS AND EQUIPMENT**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Delivery and handling of products
- B. Inspection of items
- C. Supporting heavy loads

**1.02 GENERAL REQUIREMENTS**

- A. Contractor shall make all arrangements for transportation, delivery and handling of equipment and materials required for prosecution and completion of the work.
- B. Equipment shall not be delivered to the site until it can be moved directly to its concrete foundation pad and placed thereon, or to the area where it will be utilized.
- C. If necessary to move stored materials and equipment during construction, the Contractor shall move materials and equipment without any additional compensation.

**1.03 DELIVERY OF PRODUCTS**

- A. The Contractor shall arrange deliveries of products in accordance with construction schedules and in ample time to facilitate inspection prior to installation.
- B. Coordinate deliveries to avoid conflict with work and conditions at the site and to accommodate the following:
  - 1. Work of other Contractors
  - 2. Limitations of storage space
  - 3. Availability of equipment and personnel for handling products
- C. Products shall not be delivered to the project site until related Shop Drawings, including the manufacturer's recommended storage instructions, have been approved by the Commissioner.
- D. Products shall not be delivered to the site until required storage facilities have been provided.

- E. Products shall be delivered to site in manufacturer's original, unopened, labeled containers. Commissioner shall be informed of delivery of all equipment to be incorporated in the work.
- F. Partial deliveries of component parts of equipment shall be clearly marked to identify the equipment, to permit easy accumulation of parts and to facilitate assembly.
- G. Immediately on delivery, inspect shipments to assure:
  - 1. Product complies with requirements of Contract Documents and approved submittals.
  - 2. Quantities are correct
  - 3. Containers and packages are intact; labels are legible.
  - 4. Products are properly protected and undamaged.

#### 1.04 HANDLING OF PRODUCTS

- A. The Contractor shall provide equipment and personnel necessary to handle products by methods to prevent soiling or damage to products or packaging.
- B. Provide additional protection during handling as necessary to prevent scraping, marring or otherwise damaging products or surrounding surfaces.
- C. Transport and handle products in accordance with manufacturer's instructions.
- D. Handle products by methods to prevent bending or overstressing.
- E. Lift heavy components only at designated lifting points.
- F. Materials and equipment shall at all times be handled in a safe manner and as recommended by manufacturer or supplier so that no damage will occur to them. Do not drop, roll or skid products off delivery vehicles. Hand carry or use suitable materials handling equipment.

#### 1.05 INSPECTION OF ITEMS

- A. The Contractor shall inspect all items, including all boxes, crates and packages, containing equipment and materials for damage that may have occurred during shipment prior to its removal from the truck or other conveyance. Any damage shall be reported immediately to the Commissioner.
- B. The Contractor shall then carefully remove the equipment and materials from the truck or trucks on which it is shipped. The equipment and materials shall then be

transported to the place of installation at the job site. The Contractor shall be liable for loss or damage to the equipment and materials that may occur while being unloaded, transported, stored or installed.

- C. All equipment that arrives at the job site during normal working hours shall be unloaded as soon as practicable.

#### 1.06 SUPPORTING HEAVY LOADS

- A. The Contractor shall, in all cases where heavy loads are to be temporarily imposed on existing slabs, assure himself of the slab's load-sustaining ability. Whenever heavy loads are to be stored or temporarily imposed on slabs, the Contractor shall submit to the Commissioner a plan of procedure prepared by a Professional Engineer licensed in the State of New York, indicating a structural analysis of the slabs and methods of distributing loads, and providing auxiliary support so that slabs and beams are not loaded in excess of their design loadings.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01661**  
**PROTECTION OF MATERIALS AND EQUIPMENT**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Storage of product
- B. Protection of materials and equipment
- C. Protection of installed equipment

**PART 2 PRODUCTS (Not Used)**

**PART 3 EXECUTION**

**3.01 STORAGE OF PRODUCT**

- A. Store products on shelves, in bins, or in neat groups of like items, with seals and labels intact and legible, and in a manner to provide access for maintenance and inspection.
- B. Store loose granular materials on clean, solid, flat surfaces and prevent mixing with foreign matter. Store fabricated products supported above the ground on skids or blocking. Provide surface drainage to prevent erosion and ponding of water.
- C. Cover products subject to discoloration or deterioration with impervious sheet covering, and protect products from soiling and staining.
- D. Store and protect products which are subject to damage by the elements in weathertight, climate controlled enclosures and according to manufacturer's instructions. Maintain temperature, ventilation, and humidity within ranges stated in manufacturer's instructions.
- E. Attach applicable manufacturer's service instructions labeled "STORAGE SERVICE INSTRUCTIONS ENCLOSED" to exterior of each stored product.
- F. Inspect, maintain and service stored products on a regularly scheduled basis, consistent with manufacturer's instructions.
- G. Record inspection, maintenance and services performed and keep log available for review.
- H. If it becomes necessary to remove and relocate materials to avoid impeding the progress of any part of the work of any contractor, the Contractor shall relocate such materials at no additional cost to the City of New York.

### 3.02 PROTECTION OF MATERIALS AND EQUIPMENT

- A. The Contractor shall make every effort to minimize extended storage periods of materials and equipment at the Site by scheduling deliveries to coincide with construction needs.
- B. Storage of any mechanical or electrical equipment out of doors at any time is absolutely prohibited regardless of the protection furnished. Storage of mechanical and electrical equipment within structures at the Site will not be permitted unless the structures are enclosed. A structure shall be considered to be enclosed when it is roofed and has protection of doorways, windows and other opening closures.
- C. All mechanical and electrical equipment shall be coated, wrapped and otherwise protected from snow, rain, drippings of any sort, dust, mud, condensed water vapor, etc., during shipment, storage, and installation and until placed in service.
- D. All storage areas for motors shall be heated. Space heaters shall be supplied in all enclosures being utilized for storage of motors. Motors equipped with space heaters shall be properly wired and the heaters activated while the motors are in storage.
- E. Should storage of mechanical and electrical equipment become necessary before it can be stored at the Site, the Contractor shall provide storage in a weatherproof warehouse.
- F. Materials may be stored out of doors if supported above ground surface on wood runners and protected with approved, effective and durable covers.
- G. All storage and protection of materials and equipment at the Site shall be subject to the approval of the Commissioner.
- H. Prior to installation of the equipment, the Contractor shall have the manufacturer inspect the equipment and certify that its condition has not been detrimentally affected by a long storage period. If such a certification is not given, the equipment shall be judged to be defective, and shall be removed and replaced at the Contractor's expense.

### 3.03 PROTECTION OF INSTALLED EQUIPMENT

- A. The Contractor shall provide protection of installed products, as required, to prevent damage and remove protection devices/facilities, when no longer needed, prior to completion of work.
- B. Projections such as wall corners, jambs, sills and soffits of openings, shall be covered in areas used for traffic and for passage of products in subsequent work.
- C. Equipment for which shop finish paint is required shall be protected in the shop and during transportation and installation to prevent injury and abrasion. Such

equipment shall be scheduled for installation when a building is considered enclosed and as late as possible in the construction schedule. However, maintenance of schedules may require the installation of such equipment in unheated areas and in areas where masonry work, concrete finishing, steel erection, painting, and other work will be in progress.

1. Shop finished work shall be protected during and after installation by waterproof wrappings sealed to prevent condensation on surfaces. Wrappings shall be sufficient to protect surfaces from damage by drippings from masonry and painting work, and additional covering or sheeting shall be provided to protect equipment from damage which might result from work in progress in adjacent areas.
2. Prior to final completion, wrappings and coverings shall be removed, equipment shall be cleaned and all scratches and abrasions shall be refinished.

-END OF SECTION-

**NO TEXT ON THIS PAGE**

**Section 01721**  
**PROTECTION AND RESTORATION OF STRUCTURES**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Protection of existing structures and utilities
- B. Underground structures
- C. Surface structures
- D. Notice to utility companies to remove structures
- E. Notice to utility companies to support, protect, temporarily remove and replace structures within limits of work
- F. Restoration of structures and pavements

**1.02 GENERAL REQUIREMENTS**

- A. The Contractor shall execute the Work to prevent damage or injury to existing facilities and adjacent private properties and occupants thereof, which might result from work or other causes.
- B. The Contractor shall erect and maintain barriers, lights, fences, and other required protective devices in accordance with the Contract Documents and the NYC Construction Codes and the requirements of the NYC Department of Transportation.
- C. The Contractor shall be responsible for taking all precautions, providing all programs, and taking all actions necessary to protect the Work and all public and private property and facilities from damage, injury, loss or vandalism.
- D. The Contractor shall assume full responsibility for the preservation of all public and private property or facility on or adjacent to the site. If any direct or indirect damage is caused by or on account of any act, omission, neglect or misconduct in the execution of the Work by the Contractor, it shall be restored by the Contractor, at its expense, to a condition equal to that existing before the damage was done. Where necessary to protect the Work or materials from damage, the Contractor shall, at its expense, provide suitable drainage and erect such temporary structures as are necessary to protect the Work or materials from damage. The suspension of the Work or the granting of an extension of time from any cause whatever shall not relieve the Contractor of its responsibility for the Work and materials.

- E. Whenever any notice is required to be given by the City of New York or the Contractor to any adjacent or adjoining landowner or other party before commencement of any Work, such notice shall be given by the Contractor within the time limitations required for such notices.
- F. All structures and appurtenances shall be adequately supported and safeguarded against all damage or injury in performance of work under this Contract. The Contractor will be held responsible for any such damage or injury resulting from its operations and shall repair such damage immediately and to the satisfaction of the Commissioner.
- G. The Contractor shall ascertain the location of underground pipelines, conduits and other subsurface structures in those locations where the operation of its heavy construction equipment might damage such structures. The Contractor shall either avoid such locations or provide the necessary safeguards and repair any damage quickly at its own expense.
- H. The Contractor shall comply promptly with such safety regulations as may be prescribed by the Commissioner or the local authorities having jurisdiction and shall, when so directed, properly correct any unsafe conditions created by, or unsafe practices on the part of its employees. In the event of the Contractor's failure to comply, the Commissioner may take the necessary measures to correct the conditions or practices complained of, and all costs thereof will be deducted from any monies due the Contractor. Failure of the Commissioner to direct the correction of unsafe conditions or practices shall not relieve the Contractor of its responsibility hereunder.
- I. In the event of any claims for damage or alleged damage to property as a result of work under this Contract, the Contractor shall be responsible for all costs in connection with the settlement of or defense against such claims. Prior to commencement of work in the vicinity of property adjacent to the work site, the Contractor, at its own expense, shall take such surveys as may be necessary to establish the existing condition of the property. Before final payment can be made, the Contractor shall furnish satisfactory evidence that all claims for damage have been legally settled or sufficient funds to cover such claims have been placed in escrow, or that an adequate bond to cover such claims has been obtained.

#### 1.03 PROTECTION OF EXISTING STRUCTURES AND UTILITIES

- A. The term existing utilities shall be deemed to refer to both publicly-owned and privately-owned utilities such as electric power and lighting, telephone, cable television, water, gas, storm drains, process lines, sanitary sewers and all appurtenant structures.
- B. Where existing utilities and structures are indicated on the Drawings, it shall be understood that all of the existing utilities and structures affecting the work may not be shown and that the locations of those shown are approximate only. It shall be

the responsibility of the Contractor to ascertain the actual extent and exact location of existing utilities and structures. In every instance, the Contractor shall notify the proper authority having jurisdiction and obtain all necessary directions and approvals before performing any work in the vicinity of existing utilities.

- C. The work shall be carried out in a manner to prevent disruption of existing services and to avoid damage to the existing utilities. Temporary connections shall be provided, as required, to insure uninterrupted of existing services. Any damage resulting from the work of this Contract shall be promptly repaired by the Contractor at its own expense in a manner approved by the Commissioner and further subject to the requirements of any authority having jurisdiction. Where it is required by the authority having jurisdiction that they perform their own repairs or have them done by others, the Contractor shall be responsible for all costs thereof.
- D. Where excavations by the Contractor require any utility lines or appurtenant structures to be temporarily supported and otherwise protected during the construction work, the Contractor shall provide such support and protection. All such work shall be performed in a manner satisfactory to the Commissioner and the respective authority having jurisdiction over such work. In the event the Contractor fails to provide proper support or protection to any existing utility, the Commissioner may, at this discretion, have the respective authority provide such support or protection as may be necessary to ensure the safety of such utility, and the costs of such measures shall be paid by the Contractor.
- E. During the progress of the Work, the Contractor shall protect from injury any existing utilities or services within the work area until, if required, they have been re-routed, disconnected or capped off. Protection and re-routing shall conform to standards established by the utilities, agencies and governing codes.

#### 1.04 UNDERGROUND STRUCTURES

- A. Underground structures are defined to include, but not be limited to, all sewer, water, gas, and other piping, and manholes, chambers, electrical and signal conduits, tunnels and other existing subsurface work located within or adjacent to the limits of the Work.
- B. All underground structures known to the Commissioner are shown for the assistance of the Contractor in accordance with the best information available, but are not guaranteed to be correct or complete.
- C. The Contractor shall explore ahead of its trenching and excavation Work and shall uncover all obstructing underground structures sufficiently to determine their location, to prevent damage to them and to prevent interruption to the services which such structures provide. If the Contractor damages an underground structure, it shall restore it to original condition at its expense.

- D. Necessary changes in the location of the work may be made by the Commissioner, to avoid unanticipated underground structures.
- E. If the Contractor discovers utility facilities not identified in the Contract Documents or in a position different from that shown in the Contract Documents, it shall immediately notify in writing the Commissioner and the owner of the utility facility.

1.05 SURFACE STRUCTURES

- A. Surface structures are defined as all existing buildings, structures and other facilities above the ground surface. Included with such structures are their foundations or any extension below the surface.
- B. Surface structures include, but are not limited to, buildings, tanks, walls, bridges, roads, dams, channels, open drainage, piping, poles, wires, posts, signs, markers, curbs, walks and all other facilities that are visible above the ground surface.

1.06 PROTECTION OF UNDERGROUND AND SURFACE STRUCTURES

- A. The Contractor shall sustain in their places and protect from direct or indirect injury all underground and surface structures located within or adjacent to the limits of the Work. Such sustaining and supporting shall be performed carefully and as required by the party owning or controlling such structure. Before proceeding with the Work of sustaining and supporting such structure, the Contractor shall satisfy the Commissioner that the methods and procedures to be used have been approved by the party owning same.
- B. The Contractor shall assume all risks attending the presence or proximity of all underground and surface structures within or adjacent to the limits of the Work. The Contractor shall be responsible for all damage and expense for direct or indirect injury caused by its Work to any structure. The Contractor shall repair immediately all damage caused by its Work, to the satisfaction of the owner of the damaged structure.
- C. The fact that any structure or facility is not shown on the Drawings shall not relieve the Contractor of his responsibility of protecting and preserving the structure or facility.
- D. All other existing surface facilities, including but not limited to, guard rails, posts, guard cables signs, poles, markers, and curbs which are temporarily removed to facilitate installation of the Work shall be replaced and restored to their original condition at the Contractor's expense.

1.07 RESTORATION OF STRUCTURES AND PAVEMENTS

- A. Restoration of hydrants and hydrant connections and all other City of New York structures shall be in conformity with the requirements of the Contract Documents and the specifications of the respective departments having jurisdiction thereof, Bureau of Water Supply, Bureau of Electrical Control, and Fire Department.
- B. Restoration of pavements shall be made in conformity with the requirements of the NYC Department of Transportation Standard Highway Specifications, latest edition. These specifications may be examined at the Office of the Department of Transportation, Bureau of Highway Operations, 40 Worth Street, New York, New York. The Bidder shall acquaint itself with such requirements before submitting its bid. The Contractor shall give the Department of Highways four weeks written advance notice before proceeding with final restoration of pavements, walks and curbs.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01732**  
**INSTALLATION OF EQUIPMENT**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Concrete foundations, bases, anchor bolts, recesses, openings, etc.
- B. Installation of equipment
- C. Workmanship
- D. Clearance and Safeguards
- E. Alignment and Leveling
- F. Lubrication
- G. Maintenance of Installed Equipment

**1.02 GENERAL REQUIREMENTS**

- A. Contractor shall have on hand sufficient personnel, proper equipment, and machinery of ample capacity to facilitate the work.
- B. Contractor shall be responsible for locating, aligning and leveling all equipment and shall employ a licensed surveyor to set all lines and levels of equipment to the accuracy required.
- C. Complete manufacturer's installation instructions, including permissible tolerances, shall be furnished in duplicate with each unit of equipment or set of identical units.
- D. All equipment shall be installed in accordance with the approved Working Drawings; inclusive of manufacturer's specifications, drawings and tolerances; under the direct supervision of the required manufacturer's representative. In no instance shall the directions of the manufacturer's representative contravene the Commissioner's direction.
- E. Equipment shall be erected in a neat and workmanlike manner on the foundations at the locations and elevations shown on the drawings unless directed otherwise by the Commissioner during installation.

## PART 2 PRODUCTS

## 2.01 CONCRETE FOUNDATIONS, BASES, ANCHOR BOLTS, RECESSES, OPENINGS, ETC.

- A. All reinforced concrete bases and supports shall be steel reinforced and dowelled to floor slabs. Dowels shall be in place before floor slab concrete is placed where possible.
- B. Anchor bolts penetrating into existing reinforced concrete work shall be drilled in place and shall be of the expansion type and have sufficient length and configuration to resist the imposed loadings when installed in accordance with the Contract Documents and the manufacturer's recommendations, and approved by the Commissioner. Dowels and anchor bolts in existing concrete shall be installed using a bonding agent approved by the Commissioner. All concrete bases for equipment shall be treated with an approved sealer to prevent oil and grease from seeping into the concrete.
- C. Reinforced concrete bases, dowels and anchor bolts into existing and new reinforced concrete work shall be in accordance with the Contract Documents and the manufacturer's recommendations and subject to the approval of the Commissioner.
- D. The Contractor shall make provisions for sleeves, recesses, openings, chases and related items for equipment and materials to be installed where shown, specified or required.

## PART 3 EXECUTION

## 3.01 INSTALLATION OF EQUIPMENT

- A. Supervision by Manufacturers' Representatives: The Contractor shall provide the services of qualified equipment manufacturers' technical representatives who shall adequately supervise the installation and testing of all equipment and instruct the Contractor's personnel and City of New York operating personnel in its maintenance and operation.
  - 1. The manufacturers' representatives shall devote, as a minimum, the full time specified. Any additional time required to achieve successful installation and operation shall be at the expense of the Contractor.
  - 2. The manufacturers' representatives shall sign in and out in a book kept by the Commissioner on every occasion they are on the Site and shall indicate time of arrival and departure.
- B. Concrete foundations for equipment shall be of approved design and shall be adequate in size, suitable for the equipment erected thereon, properly reinforced,

drained and tied into floor slabs by means of reinforcing bars or dowels. Foundation bolts of ample size and strength shall be provided and properly positioned by means of suitable templates and secured during placement of concrete.

- C. Foundations shall be built and bolts installed in accordance with the manufacturer's certified drawings.
- D. Before mounting equipment on a foundation, the Contractor shall clean the top surface; if necessary, rough it with a star chisel and clean again; and clean out all foundation bolt sleeves. The Contractor shall provide a sufficient number of steel plate shims about 2 inches wide and 4 inches long, and of a varying thickness from 1/8 to 1/2 inch. A combination of these shims shall be placed next to each foundation bolt to bring the bottom of the bedplate or frame about 1/8 inch above the final setting. The equipment shall be lowered by changing the combination of shims. Using brass shim stock of various thicknesses, continue to level the equipment a little at a time and in rotation until it is at the correct elevation in both directions. When the equipment is level, tighten the foundation bolts a little at a time in rotation to make certain the equipment remains level and does not shift on the shims. A preliminary alignment check shall be made before grout is placed.
- E. Equipment shall be set, aligned and assembled in conformance with manufacturer's drawings or instructions. Runout tolerances by dial indicator method of alignment shall be plus or minus 0.002 inches or as directed by the manufacturer, whichever is more stringent.
- F. All blocking, wedges, shims, filling pieces, or other materials required for the proper support and leveling of equipment during installation shall be furnished by the Contractor. All temporary supports shall be removed, except steel shims, which may be left in place with the approval of the Commissioner. Any grinding necessary to bring parts to proper bearing after erection shall be done at the expense of the Contractor.
- G. Each piece of equipment or supporting base, bearing on concrete foundations, shall be bedded in grout. The Contractor shall provide a minimum of 1-1/2 inch thick grouting under the entire baseplate supporting each pump, motor drive unit and other equipment. Grout bed shall be a non-shrink grout, "Euco-N-S" by the Euclid Chemical Company or "Masterflow 713" by Master Builders, or approved equal.
- H. When motors are shipped separately from driven equipment, the motors shall be received, stored, meggered once a month, and the reports submitted to the Commissioner for information. After driven equipment is set, the motors shall be set, mounted, shimmed, millrighted, coupled and connected complete.
- I. Moving parts shall be rotated a minimum of once weekly to ensure proper lubrication and to avoid metal-to-metal welding and to prevent "flat-spotting" of bearings.

- J. Anchor and expansion bolts shall be furnished by the Contractor, as specified and required. Expansion bolts shall only be used where permitted by the Commissioner. Anchor and expansion bolts shall be of Type 316-stainless steel unless otherwise specified. Anchorage items shall conform to the applicable requirements of the Contract Documents. The nuts for anchor bolts shall be carbon steel.
- K. At threaded connections a molybdenum disulphide anti-seize compound shall be applied to all threads in mechanical connections such as bolts, studs, cap screws, tubing, etc., unless otherwise indicated.

### 3.02 WORKMANSHIP

- A. The following erection Specifications are not intended to cover all instructions, but only some of the important practices. In all cases, only the best methods known to the trades shall be employed.
- B. Only those mechanics skilled in the handling, setting, alignment, leveling and adjustment of the type of equipment supplied shall be employed in the work.
- C. An oil bath heater shall always be used to expand couplings, gears, etc. They shall not be forced or driven on equipment shafts, nor shall they be subjected to an open flame or torch.
- D. Wedging will not be permitted. Only the least number of flat shims are to be used in leveling equipment (shims are to be clean and free of slag). All shims, filling pieces, keys packing, red or white lead grout, or other materials necessary to properly align, level and secure apparatus in place shall be furnished by the Contractor. All parts intended to be plumb or level must be proven exactly so. Any grinding necessary to bring parts to proper bearing after erection shall be done at the expense of the Contractor.
- E. Proper tools shall be used in the assembly of equipment and materials to prevent marring the surface of shafts, nuts or other parts.
- F. Connections requiring gaskets shall be tightened evenly all around to ensure uniform stress over the entire gasket area.
- G. No equipment and materials shall be altered or repaired, and no burning or welding will be permitted on any parts having machined surfaces, except by written permission of the Commissioner.
- H. No rigging shall be done from any structure without the permission of the Commissioner, and the Contractor shall be completely responsible for any damage to the structure due to its operations.

- I. Only such equipment and materials as will not damage the structure or equipment and materials shall be used on the work.
- J. The Contractor shall be responsible for the exact alignment of equipment with associated piping and, under no circumstances, will "pipe springing" be allowed.
- K. Misaligned holes shall be reamed, as excessive driving of bolts or keys will not be permitted.
- L. The Contractor shall furnish and install all necessary plugs in lubrication holes to prevent entry of foreign material.

### 3.03 CLEARANCES AND SAFEGUARDS

- A. All devices, equipment and systems furnished under this Contract shall be fabricated and installed so that adequate clearances are provided for operation, maintenance, repair and replacement. It is the Contractor's responsibility to review the Contract Drawings and ensure that adequate clearances are available and to notify the Commissioner in the event that such clearances cannot be obtained.
- B. The construction arrangement, assembly locations and guarding of all equipment shall conform to the latest ANSI safety practices, the New York State Industrial Code and all standards specified in the Contract Documents.

### 3.04 ALIGNMENT AND LEVELING

- A. All couplings shall be aligned while the equipment is free from all external loads.
- B. Both angular and parallel alignment shall be checked, and the degree of misalignment shall be recorded and submitted to the Commissioner.
- C. Dial indicators shall be used for the checking of angular and parallel alignment. During rotation of the half couplings in performance of this test, they shall be maintained in the same relative position, and the dial indicator readings shall be taken at the same place on the circumference of the coupling.
- D. Misalignment shall not exceed the manufacturer's tolerances.

### 3.05 LUBRICATION

- A. All lubrication shall be performed by the Contractor in accordance with the lubricant specifications and directions furnished by the manufacturer. The Contractor shall furnish the lubricants for the equipment until it is accepted.
- B. Lubricants shall be changed upon completion of installation and as frequently as required thereafter during the period between installation and acceptance. New lubricants shall be put into the equipment at the time of acceptance.

3.06 MAINTENANCE OF INSTALLED EQUIPMENT

- A. During the time period between installation and receipt of the certificate of completion, the Contractor shall maintain all equipment in accordance with the equipment manufacturer's instructions and with the approval of the Commissioner.

-END OF SECTION-

**Section 01733**  
**CONSTRUCTION WASTE MANAGEMENT**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Requirements for construction waste management.

**1.02 SUBMITTALS**

- A. The Contractor shall prepare and submit a Construction Waste Management Plan for review and approval by the Commissioner within 15 days after receipt of Notice to Proceed and prior to the removal of any construction waste or demolition materials from the Project site.

- B. The Construction Waste Management Plan shall contain the following:

1. Analysis of the proposed job site waste to be generated during the full construction period, including types and anticipated quantities of each as well as anticipated number and type of containers to be utilized to transport each waste stream. The list of construction waste materials shall include, as a minimum but not limited to, the following materials:
  - a. Cardboard
  - b. Clean dimensional wood
  - c. Concrete
  - d. Bricks
  - e. Concrete masonry units (CMU)
  - f. Asphalt
  - g. Metals from rebar, sheetrock studs, framing, etc.
  - h. Steel sheet piling
  - i. Steel pipe piles
  - j. Structural steel
  - k. Paints, solvents, and other hazardous fluids
  - l. Glass
  - m. Roofing
  - n. Wood pallets
  - o. Fencing materials, etc.
  - p. Arsenic impacted wood
2. Materials Handling Procedures: A description of the means by which any waste materials identified in Paragraph 1.02B.1 above will be protected from contamination and a description of the means to be employed in recycling the above materials consistent with requirements of the New York City Department of Sanitation.

3. Transportation: A description of the means of transportation of the recyclable materials (whether materials will be site-separated and self-hauled to designated centers, or whether mixed materials will be collected by a waste hauler and removed from the site) and destination of such materials.
  4. Hazardous wastes: The Construction Waste Management Plan shall specifically note the proper method of disposal for anticipated hazardous wastes or potentially hazardous wastes such as oily rags, asphalt, greases, resins, epoxies, waterproofing agents, form oil, expended 55 gallon drums, concrete curing compounds, etc.
  5. The plan shall include the method of recycling office materials such as clean white paper, mixed paper, toner cartridges for laser printers, copiers and fax machines. Each item shall be recycled in accordance with the manufacturer's instructions.
  6. The plan shall specify a list of transporters, transfer stations and recyclers with addresses and phone numbers which the Contractor intends to utilize during the construction period for the purpose of complying with the Waste Management Plan. Each waste transporter or transfer station shall list the materials that they recycle and the percent of each material received which is recycled by their operations. All transporters must possess a valid transporter permit for handling the waste(s) as applicable. All disposal/reclamation/recycling facilities must be permitted in accordance with applicable regulations.
- C. Contractor shall submit to the Commissioner a record of each material recycled, reused, or salvaged and each construction waste dumpster removed from the Project on a monthly basis. The record shall include the amount of the material removed (in tons or cubic yards), the date on which it was removed, the receiving party and the cost of transportation and disposal of the material. This record shall include copies of manifests, weight tickets, receipts, or invoices for each item disposed.
- D. The Contractor shall submit executed copies of the waste manifests, bills of lading, and verification of disposal/recycling/reclamation to the City of New York to assure proper project close-out and final payment. Copies must be submitted within one week of disposal/recycling/reclamation. Final payment will not be made if the copies of manifests, bills of lading, and certificates of disposal/recycling/reclamation are not received by the City of New York and the Commissioner for all wastes transported offsite.

## PART 2 PRODUCTS

### 2.01 CONTAINERS

- A. The Contractor shall provide United States Department of Transportation (USDOT)-approved containers for containerization of all waste materials generated

as a result of the work under the Contract. If the containers are to be disposed of together with the waste they contain, the Contractor shall include costs for such containers in its lump sum bid.

### PART 3 EXECUTION

#### 3.01 GENERAL

- A. All waste streams shall be transported to approved disposal/reclamation/ recycling facilities that are permitted to accept such types of waste. The disposal/recycling/reclamation facilities shall be proposed by the Contractor and reviewed by the Commissioner. Review by the Commissioner will not release the Contractor from its obligation to comply with all applicable laws, rules, and regulations and shall not constitute a relief from the requirements of the Contract.

#### 3.02 CONSTRUCTION WASTE MANAGEMENT

- A. The Contractor shall utilize construction and demolition methods and processes that ensure the generation of as little waste as possible due to error, poor planning, breakage, mishandling, contamination, or other factors. Where economically feasible, as many of the materials from the generated waste shall be reused, salvaged, or recycled.
- B. When encountered as part of his work, the Contractor shall dispose of construction and demolition waste by recycling methods in accordance with Local Law 19/1989, Local Law 87/1992, and the Department of Sanitation "Rules Establishing Recycling Requirements for Private Carter Collected Waste" (latest version). In addition, the Contractor shall also arrange for disposal by recycling of untreated wood (scrap wood, pallets, etc.), green wood (stumps and tree parts), asphalt, brick and unpainted concrete block. All material to be recycled shall be separated from normal refuse, per Department of Sanitation (DSNY) Rules. Normal refuse and material not required to be recycled shall be disposed of by the Contractor as specified and in accordance with all State and Local codes and laws.

#### 3.03 DISPOSITION OF MATERIALS

- A. Demolition debris with adhered paint shall not be disposed of at an unlined municipal solid waste landfill.
- B. Arsenic-impacted wood (i.e., wood that failed Toxicity Characteristic Leaching Procedure [TCLP] test for arsenic) shall be disposed of as a hazardous waste at a permitted Subtitle C (hazardous) waste disposal facility.

## 3.04 RECORD KEEPING

- A. The Contractor shall be responsible for waste characterization and profiling. All disposal-associated documentation shall be submitted to the Commissioner for review prior to submittal to the disposition facility.
- B. The Contractor shall prepare the waste manifests and bills of lading for the transport and offsite disposal/reclamation of all waste materials. The Commissioner will review the waste manifests and bills of lading prior to offsite transport of waste materials. The following address shall be specified as a "Waste Generator" on the manifests and bills of lading:

New York City Department of Sanitation  
Bureau of Long Term Export – Engineering Unit  
44 Beaver Street, 7th Floor  
New York, New York 10004  
Telephone: (212) 437-5560
- C. Modifications to waste profiles, manifests, bills of lading, or any other associated documentation shall be made by the Contractor at the request of the Commissioner and/or the City of New York at no additional cost to the City of New York.
- D. The Contractor shall coordinate with disposal/recycling/reclamation facilities for a timely receipt of executed copies of hazardous waste manifests, nonhazardous waste manifests, bills of lading, and certificates of disposal/recycling/reclamation and shall provide original copies of these documents to the City of New York to the address specified in Paragraph 3.05B above for all wastes transported offsite. In addition, the Contractor shall submit copies of the above-referenced documents to the Commissioner within one week of disposal/recycling/reclamation.

-END OF SECTION-

**Section 01750**  
**SPARE PARTS AND MAINTENANCE MATERIALS**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Contractor shall furnish spare parts and maintenance materials as specified in the individual Specification Sections.
- B. Two complete spare sets of all lamps shall be supplied as a part of electrical control equipment furnished by the Contractor, unless otherwise specified.

**1.02 SUBMITTALS**

- A. Provide a letter of transmittal including the following:
  - 1. Date of letter and transfer of parts and materials
  - 2. Contract title and number
  - 3. Contractor's name and address
  - 4. A complete inventory of the parts and material, listing the applicable Specification Section for each
  - 5. A place for the City of New York to sign and signify receipt of the parts and materials
- B. A complete list of spare parts to be furnished shall be submitted to the Commissioner for approval as a part of the working drawing submittal.

**1.03 DELIVERY AND HANDLING**

- A. Parts and materials shall be furnished in manufacturers' unopened cartons, boxes, crates or other protective covering suitable for preventing corrosion or deterioration for the maximum length of storage which may be normally anticipated. They shall be clearly marked and identified.
- B. All parts shall be securely boxed and tagged, and clearly marked on the box and individually for identification as to the name of manufacturer or supplier, applicable equipment, part number, description and location in the equipment. All parts shall be protected and packaged for a shelf life of at least ten (10) years.
- C. During construction, store parts in buildings or trailers with floor, roof and closed sides and in accordance with manufacturers' recommendations. Protect from weather, condensation and humidity.

- D. Parts and materials shall be delivered to the City of New York upon completion of the Work or when the City of New York assumes beneficial occupancy. Contractor shall then place them in permanent storage rooms or areas approved by the City of New York.
- E. Contractor shall be fully responsible for loss or damage to parts and materials until they are transmitted to the City of New York.
- F. Upon acceptance of the spare parts by the Commissioner, the Contractor shall deliver the spare parts to the plant storage area.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01781  
PROJECT CLOSEOUT**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Items to be completed
- B. Final copies - working drawings and record drawings
- C. Special tools and appliances
- D. Spare parts
- E. Lubricants
- F. Maintenance and guaranty
- G. Piping and equipment identification

**1.02 ITEMS TO BE COMPLETED**

- A. As construction of the project enters the final stages of completion, the Contractor shall, in concert with accomplishing the requirements set forth in the Contract Documents, attend to or have already completed the following items:
  - 1. Scheduling equipment manufacturers' visits to site.
  - 2. Required testing of project components.
  - 3. Scheduling start-up and initial operation.
  - 4. Scheduling and furnishing skilled personnel during initial operation.
  - 5. Correcting or replacing defective work, including completion of items previously overlooked or work which remains incomplete, all as evidenced by the Commissioner's "Punch" Lists.
  - 6. Attend to any other items listed herein or brought to the Contractor's attention by the Commissioner.
- B. Before the Certificate of Substantial Completion will be issued, the Contractor shall accomplish the cleaning and final adjustment of the various building components as specified and as follows:
  - 1. Clean all glass and adjust all windows and doors for proper operation.

2. Clean all finish hardware after adjustment for proper operation.
  3. Touch up marks or defects in painted surfaces and touch up any similar defects in factory finished surfaces.
  4. Wax all resilient flooring materials.
  5. Remove bitumen from gravel stops, fascias, and other exposed surfaces.
  6. Remove all stains, marks, fingerprints, soil, spots and blemishes from all finished surfaces, tile, stone, brick and similar surfaces.
- C. In addition, and before the Certificate of Substantial Completion will be issued, the Contractor shall submit to the Commissioner certain records, certifications, etc., which are specified elsewhere in the Contract Documents. A partial list of such items appears below, but it shall be the Contractor's responsibility to submit all items which are required by the Contract Documents:
1. Test results of project components
  2. Performance Affidavits for equipment
  3. Certification of equipment or materials in compliance with Contract Documents
  4. Operation and maintenance instructions or manuals for equipment
  5. One set of neatly marked-up record drawings showing as-built changes and additions to the work under his Contract
  6. Any special guarantees or bonds
- D. The Contractor's attention is directed to the fact that required certificates and information under Paragraph 1.02C, above, must actually be submitted earlier in accordance with other Sections of the Specifications.

### 1.03 SPECIAL TOOLS AND APPLIANCES

- A. Special tools and appliances which may be needed to adjust, operate, maintain or repair the equipment furnished under this Contract shall be provided in accordance the Specifications.
- B. The Contractor shall submit a complete list of special tools and appliances to be furnished, for approval by the Commissioner, as a part of the working drawing submittal.

- C. Special tools and appliances shall be furnished in approved painted steel cases, properly labeled and equipped with good grade cylinder locks and duplicate keys.

#### 1.04 SPARE PARTS

- A. Spare parts shall be furnished in accordance with Section 01750 – Spare Parts and Maintenance Materials.

#### 1.05 LUBRICANTS

- A. The Contractor shall furnish and deliver to the Commissioner such oil, grease and any special lubricants that are necessary for proper operation of all equipment furnished under this Contract. Identification and listing of such lubricants shall be made as part of the working drawing submittal. The quantity furnished shall be sufficient for equipment start-up, operation prior to final acceptance of the work, and for operation during the guarantee period as defined in Article 24 of the Standard Construction Contract. The grade of lubricants furnished shall be in accordance with the recommendations of the equipment manufacturers made on the approved equipment working drawings.
- B. The Contractor shall furnish lubricants for all equipment supplied under this Contract in one delivery consisting of a minimum number of products, reflecting the results of the lubrication survey, as hereinafter specified.
- C. A lubrication survey, made by a lubricant supply firm, subject to the approval of the Commissioner shall be provided by the Contractor.
  - 1. The lubrication survey shall list all equipment furnished, under this Contract, with the equipment manufacturer's lubrication recommendations and an interchangeable lubricants tabulation standardizing and consolidating lubricants whenever possible.
  - 2. Twelve (12) copies of the approved Lubrication Survey shall be furnished prior to final acceptance.

#### 1.06 MAINTENANCE AND GUARANTY

- A. The Contractor must promptly repair, replace, restore or rebuild, as the Commissioner may determine, any work provided under this Contract in which defects of equipment, materials or workmanship may appear or to which damage may occur because of such defects, during the one-year maintenance and guaranty period subsequent to the date of final acceptance, except where longer periods of maintenance and guaranty are provided for in the Specifications.
- B. The Contractor shall provide the manufacturer's standard warranty for all materials and equipment furnished under this Contract unless otherwise specified. The warranty period shall begin at the time of Substantial Completion and shall extend

for the manufacturer's normal warranty period, unless a longer warranty period is defined in the specifications. Under no circumstances shall a warranty period be less than one year.

1.07 PIPING AND EQUIPMENT IDENTIFICATION

- A. The Contractor shall furnish and install identification signs for all equipment, control panels, valves and piping identification in accordance with Section 15076 - Piping and Equipment Identification.

PART 2 PRODUCTS (Not Used)

PART 3 EXECUTION (Not Used)

-END OF SECTION-

**Section 01811**  
**PRELIMINARY AND FINAL FIELD TESTS**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. System test procedures
- B. Contractor responsibilities
- C. Preliminary field tests of equipment and of systems
- D. Final field tests of equipment and systems
- E. Facility Operation test

**1.02 DEFINITION**

- A. A system for purposes of testing is defined as consisting of the component equipment, valves, piping, instrumentation, ducts, etc., which are so related as to form a complete unit. System testing is to demonstrate the capability of the equipment, interconnections and accessories to perform as specified.

**1.03 GENERAL REQUIREMENTS**

- A. All field tests, including equipment and systems tests, shall be performed in accordance with the requirements of the individual Specification sections and as described herein. The requirements contained herein shall apply, whether or not this Section is specifically referenced elsewhere in the Specifications.
- B. Field tests shall include preliminary field tests of equipment and systems and final field tests of equipment and systems at the site and a facility operation test.
  - 1. Preliminary and final field tests of equipment and systems and the facility operation test shall utilize the materials for which the equipment and systems are designed.
  - 2. All tests shall be performed in strict compliance with applicable manufacturer's and Commissioner's instructions.
  - 3. No testing of systems shall commence before the associated pipelines have been satisfactorily tested for leakage in accordance with Specification 02505 – Leakage Tests.
- C. For a successful test of equipment or system, the equipment or system shall operate trouble free for a continuous period of time as hereinafter specified. The test shall

demonstrate that the equipment and appliances are properly installed, meet their operating cycles and are free from defects such as overheating, overloading and undue vibration. If there are any interruptions in operation during the test, the test shall be repeated until the equipment or system operates trouble free for the specified time period.

- D. The successful operation of the equipment during final field testing will not constitute acceptance of the individual pieces of equipment. Acceptance will not be considered until the equipment has performed satisfactorily during the facility operation test.
- E. Nothing stated herein shall affect the requirements contained in Section 01415 - Miscellaneous Requirements; Section 01451 - Contractor's Quality Control or the testing of pressure and gravity piping systems at the test pressures specified. Such tests shall be performed at the scheduled time, prior to backfilling, encasement or enclosure, if applicable. However, checking structures and piping systems for leakage at the pressures developed, particularly for visible leakage, shall be performed as part of the tests included herein.

#### 1.04 SUBMITTALS

- A. The Contractor shall submit a preliminary and final field test schedule within 120 days after the Notice to Commence Work. The test schedule shall be updated and resubmitted every 2 months, or sooner if necessary, until completion of the required testing.
- B. The testing schedule shall include proposed test dates, preliminary or final field test, equipment or system being tested, specification references, equipment identification numbers, an indication of whether the test procedure has been submitted for approval and approval status.
- C. The Contractor shall notify the Commissioner in writing 30 days prior to any testing. The Contractor shall not proceed with any testing until the test procedure has been approved by the Commissioner.
- D. Before each test commences, the Contractor shall submit a detailed test procedure and manpower schedule for the approval of the Commissioner.

## 1.05 SYSTEM TEST PROCEDURES

- A. The following shall be considered a part of all system test procedures:
1. Variable capacity equipment shall be operated over the full capacity range of the maximum, minimum and at least three (3) intermediate points for a minimum of 30 minutes at each point.
  2. Multiple equipment groupings are to be operated both singly and together up to the maximum capacity of the system.
  3. All equipment items, including standby units shall be tested. It may be necessary to repeat system tests at maximum condition to insure that standby units are included in system tests.
  4. Each operating unit shall be run for at least one (1) hour alone (equipment field test) and for four (4) hours as a system at maximum capacity after reaching stable operating conditions.
  5. All equipment, interconnecting piping and accessories are to be checked for leakage and specified rate performance capability. Instrumentation and controls shall be tested as part of the equipment and systems to which they relate.
- B. The system shall include all equipment components, valves, piping, instrumentation, controls and accessories necessary for the proper functioning of each piece of equipment and the system as a whole.

## 1.06 CONTRACTOR RESPONSIBILITIES

- A. For preliminary field tests of equipment and systems, the Contractor shall furnish all labor, fuel, power, lubricants, materials, service and instrument air, instruments, equipment, etc., required for the tests.
- B. For the final field tests of equipment and systems, the City of New York will furnish energy, fuel, water, light and electrical instruments; and the Contractor shall furnish labor, lubricants, other materials, equipment and other instruments deemed by the Commissioner to be necessary and required for the tests.
- C. The Contractor shall furnish all labor necessary for supervision, adjustment and tuning of equipment as well as materials, instruments, equipment, etc., and any additional labor for testing not furnished by the City of New York.
- D. All testing shall be performed by the Contractor and witnessed by the Commissioner, DSNY Operations personnel and, when applicable, representatives of the Bureau of Electrical Control (BEC), Department of Buildings. Preliminary field testing of equipment and systems and final field testing of equipment and

systems shall be performed within the time periods designated in the preliminary CPM construction schedule during regular weekday daytime working hours.

- E. The Contractor shall notify the BEC in ample time before the tests so that they may observe the tests and perform tests of their own on the equipment during final test run.

## PART 2 PRODUCTS (Not Used)

## PART 3 EXECUTION

### 3.01 PRELIMINARY FIELD TESTS OF EQUIPMENT

- A. Each item of equipment shall be field tested and shall be run trouble free in accordance with the procedures prescribed in the Specifications, and shall demonstrate that equipment and appliances meet their operating cycles and are free from defects such as overheating, overloading and undue vibration.
- B. A successful test shall consist of at least one continuous hour, or longer if so specified, of trouble free operation.

### 3.02 PRELIMINARY FIELD TESTS OF SYSTEMS

- A. All systems shall be field tested and shall be run trouble free for four (4) continuous hours, or longer if so specified, for a successful test.
- B. The systems shall be tested by operating the systems equipment together as a unit with all related piping, valves, electrical controls and mechanical operations.
- C. The tests shall prove that all equipment and appurtenances of each system are properly installed, free from defects, meet their specified operating cycles and characteristics when operating as part of the system.
- D. System with automatic control systems shall be operated continuously by the automatic control system for the specified test period.

### 3.03 FINAL FIELD TESTS OF EQUIPMENT

- A. All equipment shall be tested with the materials for which the equipment was designed and shall be run trouble free for not less than four (4) hours continuously except as determined by the Commissioner, for a successful test.

### 3.04 FINAL FIELD TESTS OF SYSTEMS

- A. All systems shall be tested with the materials for which the equipment was designed and shall be run trouble free for four (4) continuous hours, or longer if so specified, for a successful test.

- B. Each system shall be tested by operating the equipment as a unit with all related piping, valves, ducting, electrical controls, instrumentation and mechanical operation. The tests shall prove that the system equipment, instrumentation, control logic and appurtenances are properly installed, free from defects, meet their operating cycles and characteristics as specified for that system.

3.05 FACILITY OPERATION TEST

- A. The facility operation test shall be conducted 16 hours per day for five consecutive calendar days.

3.06 MANUFACTURERS' REPRESENTATIVES

- A. A representative of the manufacturer of the equipment being tested shall be present during all field tests.

-END OF SECTION-

NO TEXT ON THIS PAGE

**Section 01821  
TRAINING****PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. Training of plant personnel
- B. Video recording of training
- C. Lesson plans
- D. Training aids
- E. Qualifications of training specialists

**1.02 GENERAL REQUIREMENTS**

- A. The Contractor shall include in its lump sum price bid the cost to provide the services of qualified factory trained representatives of the equipment manufacturers for all equipment furnished under the Contract, who shall provide the following services.
  - 1. Supervise and assist in the installation of the equipment to ensure a proper installation of the equipment.
  - 2. Check the installation of the equipment and make all necessary adjustments prior to placing the equipment in service.
  - 3. Supervise field testing and start-up specified in Section 01811 - Preliminary and Final Field Tests. Additional acceptance testing supervision resulting from the failure to meet the specified performance requirements shall be at the Contractor's expense.
- B. The Contractor shall coordinate all equipment start-up services and training with the City of New York, the Commissioner and the manufacturer.

**1.03 TRAINING**

- A. The City of New York will provide the necessary personnel for training in the operation and maintenance of the equipment. The City of New York's personnel shall operate all equipment.
- B. The training shall consist of both classroom and field instruction. The purpose of field instruction shall be to reinforce topics covered in the classroom and to identify the location of any valves, pushbuttons, control panels switches, and other

equipment required for operation; and to identify the location of any maintenance equipment such as grease fittings, oilers, isolation valves, safety lockout switches, and other equipment.

- C. All training shall take place at the work site at a place specified by the City of New York and shall be conducted by qualified training specialists.
- D. Separate training sessions shall be conducted for City of New York mechanical operations and maintenance personnel and for City of New York electronic and electrical maintenance personnel.
- E. The Contractor shall coordinate the manufacturer's training services with the City of New York and the Commissioner, providing a minimum of 14 days prior notice of training, subject to the approval of the Commissioner and the City of New York.
- F. In order to provide training for an adequate number of City of New York operation and maintenance personnel, a minimum of two 8-hour training days shall be provided for each item of equipment at the site, unless otherwise specified.
- G. The Contractor shall deliver all training material to the Commissioner and the City of New York a minimum of 14 days prior to the scheduled training.
- H. Training shall be limited to no more than three days per week. No training shall be conducted on Mondays or Fridays.

#### 1.04 VIDEO RECORDING

- A. The Contractor shall provide a training specialist for a minimum of three (3) days, for each item of equipment specified, to meet with the Commissioner to prepare training scripts and to participate in video-recording of training.
- B. The manufacturer shall have the right of ownership of one unedited and one edited copy of the video-recorded training.
- C. As an alternative to video-recording training at the City of New York's plant, the manufacturer may submit for approval prerecorded DVD(s) covering the equipment supplied. Approval of such DVD(s) shall be contingent upon their content meeting the lesson plan requirement of this Section. If prerecorded DVD(s) are approved by the City of New York, the City of New York shall have the right to permanent ownership and use of at least one complete copy.

#### 1.05 LESSON PLANS

- A. The Contractor shall submit the equipment manufacturer's lesson plans which shall include specific information about each item of equipment or equipment system, including controls. Lesson plans shall include but not be limited to the following information and meet the following requirements.

1. The Contractor shall submit the equipment manufacturer's lesson plans for approval by the Commissioner no less than 60 days prior to the date that the training is to take place.
2. Lesson plans shall indicate the estimated duration of each segment of the training and the training audience that the instruction is to address. The training audience refers to City of New York mechanical operation and maintenance personnel and City of New York electronic/electrical maintenance personnel, as appropriate.
3. The lesson plan shall indicate when training aids are used or referred to during the course of instruction.
4. An outline of required lesson plan contents is included below.

B. Equipment Description

1. Purpose and function of equipment and auxiliary equipment and systems
2. Physical arrangement of equipment components and electrical supply
3. General function of controls, including automatic and manual operation, interlocks, and shutdowns

C. Equipment Operation

1. Operating requirement for equipment to perform satisfactorily
2. Typical operating characteristics
3. Start-up and shutdown procedures
4. Use of controls

D. Equipment Monitoring

1. Recommended routine instrument readings and operational checking.
2. Early warning signs of developing operational or equipment problems.
3. Procedures for handling non-routine problems such as alarms, power failures, component failures, etc.

E. Equipment operational trouble-shooting procedures.

F. Safety and Housekeeping

1. Safety features of the equipment
2. Safe practices

3. Housekeeping practices
- G. Description of the use of the equipment manufacturer's O&M Manual as regards operation.
- H. Preventive Maintenance Requirements
  1. Maintenance needs for equipment
  2. Identification of procedure to satisfy maintenance need (relate to equipment manufacturer's O&M Manual, which should have detailed descriptions of maintenance procedures).
  3. Outline or summarize procedures.
  4. Recommended schedule for performing preventive maintenance.
  5. Provide preventive maintenance record forms (if available).
- I. Maintenance Inspection Program
  1. Parts, components and areas of equipment to inspect for routine preventive maintenance
  2. Recommended frequency of inspection
  3. Inspection procedures
  4. Problem identification
- J. Maintenance Trouble-Shooting
  1. Sections in O&M Manual detailing trouble-shooting procedures.
  2. Summarize trouble-shooting procedures.
  3. Testing equipment used in trouble-shooting.
    - a. Demonstration of use of specialized testing equipment if supplied with equipment.
    - b. Other testing equipment.
  4. Tests used to verify trouble-shootings findings.

## K. Disassembly and Assembly

1. Summarize disassembly and assembly procedures.
2. O&M Manual coverage of subject.
3. Testing to verify success of corrective maintenance.

## L. Equipment Calibration

1. Calibration needs and tolerances
2. Calibration equipment
3. O&M Manual listing of calibration ranges, tolerances and settings.

## 1.06 TRAINING AIDS

- A. Training aids shall be used as an integral part of the training program. Training aids shall include text and/or pictorial handouts specific to the equipment supplied. Handouts shall be legible and printed on good quality stock. Handouts shall be submitted when lesson plans are submitted.
- B. Additional training aids shall be used for maximum training effectiveness and shall include the following as appropriate:
  1. Audio visual aids, for example, films, videos, slides, posters, blueprints, diagrams, and catalogue cuts.
  2. Models and samples, for example, cutaways, spare parts, tools, miniature models, equipment assemblies, and damaged parts.
- C. The use of additional training aids shall be identified in the lesson plan, and a description of the additional training aids shall be given.

## 1.07 QUALIFICATIONS OF TRAINING SPECIALISTS

- A. The Contractor shall submit the equipment manufacturer's documentation of the qualifications of their proposed training specialists for approval by the Commissioner 60 days prior to the date of proposed training. The documentation shall include the experience of the training specialists in operation and maintenance of the equipment and a summary of training experience.
- B. Only those training specialists whose qualifications have been approved by the Commissioner shall conduct training.

**OPERATION AND MAINTENANCE MANUALS**

**PART 1 GENERAL**

**1.01 SECTION INCLUDES**

- A. Operation and maintenance manuals shall conform as specified herein.

**1.02 GENERAL REQUIREMENTS**

- A. As a prerequisite to obtaining payments in excess of fifty (50) percent of the equipment cost for equipment furnished under this Contract, the Contractor shall prepare, submit and obtain the Commissioner's approval, as designated by "No Exceptions Taken", of an Operation and Maintenance Manual for each item of equipment supplied under this Contract. Approval is a prerequisite for continuing payments for equipment furnished by the Contractor, providing instructional services and equipment start-up.
- B. Each Manual shall be prepared especially for this installation and shall include all pertinent and legible instructions, technical bulletins and other printed matter required to provide fully accurate and comprehensive information for the safe and proper operation, maintenance and repair of the equipment item.
- C. Payment for manuals shall be made only after these documents have been submitted to and approved by the Commissioner.

**1.04 GENERAL REQUIREMENTS**

- A. All fire and post hydrants shall turn clockwise to close, unless otherwise specified.
- B. All fire and post hydrants shall have permanent markings for direction to open.

C. Fire and post hydrants shall be provided with restrained mechanical joints.

D. Fire protection hydrants and valves shall be U.L. listed.

#### 1.05 SUBMITTALS

A. Submit the following Shop Drawings and other data for approval in accordance with Section 01330 – Shop Drawings:

1. Product data sheets for make and model
2. Complete catalog information, descriptive literature, specifications, and identification of materials of construction
3. Certificates of compliance with AWWA Standards for all fire hydrants
4. Certificates of acceptability by the NYC Department of General Services
5. Shop drawings and bill of materials for hose storage houses and equipment

B. Shop test results and inspection data.

C. Operation and Maintenance Data: Submit complete manuals including copies of all Shop Drawings, test reports, maintenance data and schedules, description of operation, and spare parts information.

#### 1.06 QUALITY ASSURANCE

A. Manufacturer shall have a minimum of 3 years of experience in the production of substantially similar hydrants.

B. Each type of hydrant shall be the product of one manufacturer.

#### 1.07 DELIVERY, STORAGE AND HANDLING

A. Equipment shall be delivered to the site to ensure uninterrupted progress of the Work.

B. Hydrants and appurtenances shall be handled carefully. Hydrants and hose houses which are dropped, dented, cracked or otherwise damaged will not be acceptable.

#### 1.08 SPARE PARTS

A. The Contractor shall furnish all special tools necessary to service, disassemble, repair and adjust the equipment. Deliver all spare parts, tools and supplies with the equipment, neatly boxed, indexed and tagged with complete information for use and reordering.

2.02 FIRE HYDRANTS

A. General

1. Provide hydrants in accordance with NYCDEP Bureau of Water Supply Standard Water Main Specifications for Installing Hydrants.
2. Provide compression type hydrants with breakaway flange and stem.
3. Opening shall be against flow to prevent leakage in the event of a traffic accident.
4. Barrel shall automatically drain and remain dry after use.
5. Top shall be isolated from the waterway by packing or O-rings.
6. Rising stem to indicate hydrant in the open or closed position.

**B. Materials of Construction**

1. Body and Bonnet: Cast Iron, with fusion bonded epoxy in accordance with AWWA C550
2. Main Valve: Bronze with bronze seats and rubber facing
3. Drain Valves: Bronze
4. Drain Valve Rod: Steel
5. Main Valve Stem: Solid Steel
6. Working Pressure: 150 psig
7. Shop Test Pressure: 300 psig

**C. Breakaway Features**

1. The groundline flange bolts shall be breakable.
2. A breakaway coupling shall be provided in the valve stem.

**D. Miscellaneous Features**

1. A drain valve shall be actuated when the main valve is in the closed position to maintain the barrel in a dry condition.
2. Hydrant shall have two 2-1/2 inch fire hose connections and one 4-1/2 inch pumper nozzle, each with standard NYC Fire Department threads and dust-cap with stainless steel chain. Contractor shall verify threads are compatible with NYC Fire Department standards.
3. Main valve shall be 5-1/4 inch.
4. End connection shall be 6-inch mechanical joint.
5. Hydrants shall be provided with extensions as required for the depth shown on the Contract Drawings.

**2.03 POST HYDRANTS****A. General**

1. Non-freeze type with non-turning operating rod and free-floating compression closure valve.
2. Barrel shall automatically drain and remain dry after use.

3. Top shall be isolated from the waterway by packing or O-rings.

4. Non-rising stem with lubrication hole in operating nut.

B. Materials of Construction

1. Body and Bonnet: Bronze with cast aluminum casing guard

2. Main Valve: Bronze with bronze seats

3. Drain Valves: Bronze

C. Miscellaneous Features

1. A drain valve shall be actuated when the main valve is in the closed position to maintain the barrel in a dry condition.

2. Hydrant shall have two 1-1/2 inch NPT hose connections with threaded quick disconnect adapters.

3. Operating nut shall be provided with a T-handle operating key.

4. Drain port shall be 1/2-inch, minimum.

5. Inlet shall be 2-inch threaded connection.

6. Main valve shall be 1-1/2 inch.

2.04 BILGE WATER HYDRANT COUPLER AND ADAPTER

A. General

1. 3-inch coupler with Buna seals, 90-degree swivel, and a 3-inch female NPT inlet. Coupler shall be Emco Wheaton Dry-Break model number J73C-ABN2-B or approved equal.

2. 3-inch adapter with Buna seals, a 3-inch female NPT inlet, and dust cap. Adapter shall be Emco Wheaton Dry-Break model number J73A-BBN0-B or approved equal.

B. Materials of Construction

1. Coupler body: anodized aluminum

2. Adapter body: brass

2.05 HOSE STORAGE HOUSES

A. At each fire hydrant, Contractor shall supply a hose storage house.

- B. Hose storage house shall be fabricated from 16 gauge steel with red enamel finish, top and bottom hinges, locking access doors, built-in shelf and ventilation slits.
- C. Hose house shall rest on 24-inch high support legs fabricated from structural steel shapes and adequately braced to withstand wind pressures in accordance with the New York City Building Code. Hose house shall have the following minimum dimensions: 42-inch high by 60-inch wide by 15-inch deep.
- D. Hose houses shall each contain the following minimum supplies:
  - 1. 250-feet of 2-1/2 inch rubber lined hose with screw brass coupling
  - 2. Two smooth bore, 2-1/2 inch by 1-1/8 inch nozzles
  - 3. One hydrant wrench
  - 4. Four 2-1/2 inch spanner wrenches
  - 5. Two hose and ladder straps
  - 6. One crowbar
  - 7. One 2-3/4 pound fire axe
  - 8. Two 2-1/2 inch washers

## 2.06 ANCHORAGE DEVICES

- A. All bolts, nuts and washers furnished for connection of the hose houses to the concrete structure or other structural members shall be of Type 316 stainless steel, and shall be of ample size and strength for the purpose intended. Anchor bolts shall be hooked type.

## 2.07 SURFACE PREPARATION AND PAINTING

- A. Clean and prime coat ferrous metal surfaces in the shop in accordance with Section 09911 - Exterior Painting.
- B. Finish paint ferrous metal surfaces in the shop using the manufacturer's approved standard finish system. Finish system shall be compatible with the primer specified in Section 09911 - Exterior Painting.
- C. Coat bearing, gear and similar machined, polished or non-ferrous metal surfaces with corrosion prevention compound which shall be maintained during storage and until equipment begins operation.
- D. Stainless steel shall not be painted.

## PART 3 EXECUTION

### 3.01 INSTALLATION OF FIRE AND POST HYDRANTS

- A. Install hydrants in accordance with AWWA C600 and NYCDEP Bureau of Water Supply Standard Water Main Specifications.

- B. All hydrants shall be set on a 1/3 cubic yard of 3/8" crushed gravel wrapped in engineering fabric.
- C. For hydrants not cast-in-concrete slabs, the hydrants shall be set plumb and centered in the trench. The earth fill around each hydrant shall be carefully tamped to a lateral distance of 4 feet on all sides of the hydrant, or to the undisturbed trench face if less than 4 feet.
- D. All hydrants shall have a minimum 48-inch depth of bury.
- E. Furnish each hydrant with a shut-off gate valve, valve box, fenders, and other appurtenances as shown on the Contract Drawings.

3.02 FIELD PAINTING

- A. Provide field touch up painting of scratched or damaged surfaces, using primer, intermediate and finish paints provided by the manufacturer, in accordance with Section 09911 – Exterior Painting.

3.03 FIELD TESTS AND ADJUSTMENTS

- A. All parts and components shall be adjusted as required to provide correct operation.
- B. A functional field test of each hydrant shall be conducted in the presence of the Commissioner to demonstrate that each part and all components function together correctly.
- C. Each hydrant shall be furnished with a shutoff gate valve and valve box.
- D. Hydrostatic tests shall be combined with the testing of the entire pipeline to which each hydrant is connected.

-END OF SECTION-

**Section 02105**  
**IN-SITU SOIL SAMPLING, TESTING AND LABORATORY ANALYSIS**

**PART 1 GENERAL****1.01 SECTION INCLUDES**

- A. The Contractor shall provide all labor, materials, tools, and equipment to perform all operations necessary to determine the in-situ classification, handling and disposal requirements of all soils and fill materials in the area to be excavated during construction.
- B. The Contractor shall develop and implement an In-situ Soil Sampling and Analysis Plan required for sampling, quality assurance and quality control (QA/QC) of work. Work includes, but is not necessarily limited to, sampling and analysis of on-site soils.
- C. The Contractor shall provide a Field Sampling Plan to test all soils and fill materials for presence of chemicals to determine if material is Hazardous Waste, Industrial Waste, Petroleum-contaminated Waste or Construction and Demolition Debris.
- D. The Contractor shall provide the services of a laboratory, certified by New York State Department of Health, to perform testing and chemical analyses.

**1.02 RELATED SPECIFICATIONS**

- A. Section 01330 - Shop Drawings
- B. Section 02225 - Impacted Soil Handling
- C. Section 02240 - Dewatering
- D. Section 02316 - Excavation
- E. Section 02317 - Backfilling

## M. NYS DEC Technical Administrative Guidance Memorandum (TAGM) HWR 94-4046, January 24, 1994 (Revised)

## 1.04 DEFINITIONS

- A. Analyte-free Water: Water containing less than the detection limits for volatile organics, pesticides, PCB's and inorganics. Compliance shall be verified by either the supplier or by an analytical laboratory.
- B. Excavated Material: Includes all material removed from the ground regardless of type, character, composition, moisture, or condition thereof. All material will be classified by the Commissioner, prior to excavation, following receipt of in-situ soil sampling results from the Contractor, and disposed of accordingly.
- C. Regulated Solid Waste
  1. Hazardous Solid Waste: Material shall be considered a hazardous waste when it exhibits any of the following characteristics: ignitability, corrosivity,

reactivity, or toxicity for Volatile Organic Compounds (VOCs), semi-VOCs, metals, pesticides, or herbicides, as defined in 6 NYCRR Part 371 or 40 CFR Section 261. Under New York State (NYS) regulations, a material that contains greater than 50 ppm of PCBs is considered a hazardous waste. The Environmental Protection Agency (EPA) considers greater than 50 ppm of PCB to be a PCB-contaminated waste under Toxic Substances Control Act (TSCA). All hazardous waste shall be considered unsuitable, and shall be disposed of at an approved permitted hazardous waste landfill.

## 2. Industrial Waste

- a. Solid waste generated by manufacturing or industrial processes. Such processes may include, but are not limited to the following: electric power generation; fertilizer/agricultural chemicals; inorganic chemicals; iron and steel manufacturing; organic chemicals; and all other materials as defined in 6 NYCRR Part 360. The forms of such wastes are exemplified by but not limited to: liquids such as acids, alkalis, caustics, leachate, petroleum (and its derivatives), and processes or treatment wastewaters; sludges which are semi-solid substances resulting from process or treatment operations or residues from storage or use of liquids; solidified chemicals, paints or pigments; and dredge spoil generated by manufacturing or industrial processes, foundry sand, and the end or by-products of incineration or other forms of combustion.
  - b. Soil and fill material containing industrial waste shall be considered industrial waste. Evidence that a soil or fill material contains industrial waste shall include visual identification of waste, chemical odors, vapor emission, chemical staining, and analytical data that exceeds that exceeds the concentration limits in (1) NYS DEC Technical Administrative Guidance Memorandum (TAGM) HWR-94-4046 for VOCs, semi-VOCs, organic pesticides/herbicides, and heavy metals; or (2) Spill Technology and Remediation Series (STARS) Memo # 1, NYSDEC, August 1992 guidelines, whichever is more stringent.
- ## 3. Construction and Demolition (C&D) Debris:
- Uncontaminated solid waste resulting from the construction, remodeling, repair and demolition of utilities, structures and roads; and uncontaminated solid waste resulting from land clearing. Such waste includes, but is not limited to bricks, concrete, and other masonry materials, rock, and uncontaminated soil. Uncontaminated solid waste means C&D debris that is not mixed with other solid waste (i.e., industrial waste) at the point of generation, processing or disposal, and that is not contaminated with spills of a petroleum product, hazardous waste, or industrial waste. Soil and fill material may only be considered uncontaminated if it is associated with analytical data that meets the concentration limits in the NYS DEC TAGM or STARS Memo #1, NYSDEC, August 1992 guideline, whichever is more stringent.

4. Petroleum-contaminated Waste: Exhibits a discernible petroleum-type odor, contains visible petroleum product, may be associated with a reported spill, or material associated with sample data that exceeds concentration limits in STARS Memo #1, NYSDEC, August 1992.
- 
- D. Non-regulated Solid Waste: This applies to materials that, before being beneficially used (as determined by the NYS DEC), were solid waste. Material is no longer considered solid waste when used as described: uncontaminated soil which has been excavated as part of a construction project, and which is being used as a fill material, in place of soil native to the site of disposition; non-hazardous contaminated soil which has been excavated as part of a construction project, other than a NYS DEC-approved or undertaken inactive waste disposal site remediation program, and which is used as backfill for the same excavation or excavations containing similar contaminants at the same site. Excess materials on these projects are subject to the requirements of 6 NYCRR Part 360; non-hazardous petroleum-contaminated soil which has been decontaminated to the satisfaction of the NYS DEC and is being used in a manner acceptable to the NYS DEC; recognizable, uncontaminated concrete and concrete products, asphalt pavement, brick, glass, soil and rock placed in commerce for service as a substitute for conventional aggregate; non-hazardous petroleum-contaminated soil when incorporated into asphalt pavement products by a producer authorized by the NYS DEC; and all other uses as described in 6 NYCRR Part 360, Section 360-1.15.
  - E. In-situ Soil Sampling: Samples shall be collected in-place using split spoons or shelby tubes as detailed in the Field Sampling Plan. The area to be excavated shall be divided into distinct vertical and horizontal segments, identifying the volume of soil or fill that each sample will represent. Sampling shall be continuous vertically to allow for compositing of samples for proper classification.
