**NOTICE OF AWARD**

Dear Contractor:

You are hereby awarded the above referenced contract based upon your bid in the amount of \$1,272,221,100.00 submitted at the bid opening on February 08, 2021. Within ten (10) days of your receipt of this notice of award, you are required to take the actions set forth in Paragraphs (1) through (3) below. For your convenience, attached please find a copy of Schedule A of the General Conditions to the Contract, which sets forth the types and amounts of insurance coverage required for this contract.

- (1) Execute two copies of the Agreement. Attached are the Signature Agreement pages which must be completed and returned to the agency. The Agreement must be signed by an officer of the corporation or a partner of the firm.
- (2) Submit to the Contracts Unit two properly executed performance and payment bonds. If required for this contract, copies of performance and payment bonds are attached.
- (3) Submit to the Contracts Unit the following insurance documentation: (a) original certificate of insurance for general liability in the amount required by Schedule A, and (b) original certificates of insurance or other proof of coverage for workers' compensation and disability benefits, as required by New York State Law. The insurance documentation specified in this paragraph is required for registration of the contract with the Comptroller's Office.

□

On or before the contract commencement date, you are required to submit all other certificates of insurance and/or policies in the types and amounts required by Schedule A. Such certificates of Insurance and/or policies must be submitted to the Agency Chief Contracting Office, Attention: Risk Manager, Fourth Floor at the above indicated department address.

Your attention is directed to the section of the Information for Bidders entitled "Failure to Execute Contract". As indicated in this section, in the event you fail to execute the contract and furnish the required bonds within the (10) days of your receipt of this notice of award, your bid security will be retained by the City and you will be liable for the difference between your bid price and the price for which the contract is subsequently awarded, less the amount of the bid security retained.

**As of August 16, 2019, please be advised that Contract Site Safety Plans for DDC projects must be submitted through DDC's online Site Safety Plan (SSP) application (available via our Agency Portal – *DDC Anywhere*).**

To create an account and begin your Site Safety Pan submission using SSP, click on the link below:

**DDC Portal** <https://ddcanywhere.nyc/Registration/Registration>

For questions regarding this web-based application, please contact DDC via email at: [ddcservicedesk@ddc.nyc.gov](mailto:ddcservicedesk@ddc.nyc.gov).

Sincerely,

A handwritten signature in black ink that reads "Lorraine Holley".

# **SPECIAL NOTICE TO BIDDERS**

## **NEW BID SUBMISSION PROCEDURES DUE TO COVID-19**

The bid submission and opening procedures for this contract will follow the procedures set forth below.

**THE BIDDER MUST CAREFULLY READ THE DATES AND TIMES ON ATTACHMENT 1, AS THEY NOW DIFFER FROM PREVIOUS DDC PROJECTS.**

### **Bid Submission Procedures**

1. The representative delivering the bid must maintain required social distancing measures – keep at least 6 feet away from others, and a mask or face covering must be worn.
2. The representative delivering the bid must comply with the Covid daily health screening required to enter the DDC office building at 3030 Thomson Ave. The time required to complete this screening must be accounted for in order to submit the bid on time.

**As such, please allow sufficient time for these procedures when arriving to deliver the bid so that the bid may be submitted on time.**

The screening requirements are as follows:

Any guest visiting DDC will be required to follow the same health and safety measures as DDC staff, which includes wearing a mask and completing the daily Health Screening.

Upon your arrival to 3030 Thomson Ave, please complete the health screen at the kiosk located by the left hand side of the security desk upon your entry. You will need to provide your name, email address and answer a few questions. Once you complete the health screening, you will need to receive a Green Readiness Score to enter our offices. Should you receive a Red Readiness Score, you will not be allowed to enter our offices. These steps are in place to ensure all precautionary safety measures are followed while in the office, as the health and safety of staff and visitors is our number one priority.

The health screening will follow the sample screening in the following link:  
<https://www1.nyc.gov/assets/doh/downloads/pdf/imm/covid-19-symptom-screening-businesses.pdf>

**The person dropping off the bid must be able to answer all four questions in the negative.**

If there are issues dropping off the bid, the bidder should email [CSB\\_ProjectInquiries@ddc.nyc.gov](mailto:CSB_ProjectInquiries@ddc.nyc.gov) for additional instructions.

3. All bids must be delivered by hand within the time shown on Attachment 1. No bids will be accepted by mail or parcel service (USPS, FedEx, UPS, DHL, etc.).

(revised 11/16/20)

4. Bid submissions must be in a single, sealed envelope and clearly labeled on the outside with the following:
  - a. Project ID
  - b. Project Name
  - c. e-PIN no.
  - d. Name of Contractor
  - e. Contact person
  - f. Email address
  - g. Phone number
5. Bid submissions must not contain any staples or paper clips.
6. The ACCO staff will provide a time stamp sticker to be applied to the bid envelope.
7. Please use the link indicated on Attachment 1 to join the virtual bid opening.

**NO FURTHER TEXT ON THIS PAGE**

# **NOTICE TO BIDDERS 1**

The Contractor is hereby notified that the City of New York has not finalized the property access arrangements within the following adjacent property limits:

1. Con Edison Building
2. East River Housing Corporation
3. Gouverneur Gardens Housing Corporation
4. New York City Housing Authority – Jacob Riis Houses

The City is proceeding to finalize all necessary property access arrangements including easement and access agreements. The Contractor must not commence any Work at these locations until directed by the Engineer. Upon direction, the Contractor must proceed with the components of the Project as directed and approved by the Engineer.

In the event that the necessary property access arrangements are not finalized for any reason, the City reserves the exclusive right to modify, alter and/or omit all or portions of the Work. No claim shall be made against the City for damages for delays or actions due to such alterations / modifications / omissions, as directed by the Engineer.

# **NOTICE TO BIDDERS 2**

## **Pre-Bid Questions (PBQs)**

Please be advised that PBQs should be submitted to the Agency Contact Person (CSB\_projectinquiries@ddc.nyc.gov) by the date indicated in BID INFORMATION, page A-5 of this BID BOOKLET.

All PBQs must reference the Project ID. If a bidder has multiple PBQs for the same Project ID, the PBQs must be numbered sequentially, even if they are submitted separately.

## **NYC Contract Financing Loan Fund**

*Loans at a 3% annual interest rate to perform on New York City contracts*

If your business is working as a prime or subcontractor on a project with a City agency or City-funded entity, you may be eligible for a Contract Financing Loan from a participating lender coordinated with the NYC Department of Small Business Services (SBS). Loan repayment terms align with the contract payment schedule.

**Loans of up to \$500,000 at an annual interest rate of 3% are available to eligible\* businesses to perform on New York City contracts.** Closing fees apply.

\*To be eligible for a loan, you must:

- ✓ Have an operating business, AND
- ✓ Be applying for financing as a prime or sub-contractor to use toward a contract with a City agency or City-funded entity.
- ✓ Additional Eligibility requirements may also apply.

How it works:

- Step 1: Fill out the Contract Financing inquiry form at [nyc.gov/contractfinancing](http://nyc.gov/contractfinancing)
- Step 2: If Eligible, a participating lender will contact you within two business days.
- Step 3: Begin the loan application process

For more information: **Call 311** or visit **[nyc.gov/contractfinancing](http://nyc.gov/contractfinancing)**

**(NO FURTHER TEXT ON THIS PAGE)**

## NYC Bond Collateral Assistance Fund

If your business is bidding or planning to bid on a project as a prime or subcontractor with a City agency or the NYC Economic Development Corporation (NYCEDC) and the project requires surety bonding, you may be eligible\* to receive **up to \$500,000 in Collateral Assistance to enhance your surety bond application** from a participating bond service provider coordinated with the NYC Department of Small Business Services (SBS).

\*To be eligible, you must:

- ✓ Have an operating construction business, AND
- ✓ Be bidding or planning to bid **as a prime or subcontractor** on a contract with a City agency or NYCEDC that requires bonding
- ✓ Additional Eligibility requirements may apply.

How it works:

Step 1: Fill out the Bond Collateral Assistance Fund inquiry form at [nyc.gov/bondfund](http://nyc.gov/bondfund)

Step 2: If Eligible, the bond service provider will contact you within two business days

Step 3: Begin the bond application process

For more information: **Call 311** or visit [nyc.gov/bondfund](http://nyc.gov/bondfund)

**(NO FURTHER TEXT ON THIS PAGE)**

# **NOTICE TO BIDDERS 3**

In order to expedite the processing of bid submissions, all bidders must submit a Microsoft Excel file with the Bid Schedule (B-Pages) data, as described below.

The Microsoft Excel file must be sent by email to [CSB\\_projectinquiries@ddc.nyc.gov](mailto:CSB_projectinquiries@ddc.nyc.gov) within 24 hours **AFTER THE BID OPENING.**

Required formatting:

1. File type: Microsoft Excel (.xlsx)
2. Columns:
  - A. SEQ. NO.
  - B. ITEM NUMBER
  - C. UNIT PRICE
  - D. EXTENDED AMOUNT
3. Rows: 1 per bid item. Row 1 must be a header row with the column names listed above.
4. Page numbers, headers or footers, and attempts to perfectly mimic the DDC Bid Schedule form are not necessary.

The Microsoft Excel file will be used to expedite the processing of bids and bid analysis.

All bidders who submit a bid, regardless of rank, must submit a Microsoft Excel Bid Schedule file.

The paper copy submitted on the Bid Submission date will govern in case of a discrepancy.

**(NO FURTHER TEXT ON THIS PAGE)**

# **NOTICE TO BIDDERS 4**

The bidder's attention is drawn to Volume 3, S-Pages, Article B18 – Information from Previous Advertisement.

# **SPECIAL EXPERIENCE REQUIREMENTS**

## **(A) SPECIAL EXPERIENCE REQUIREMENTS FOR THE BIDDER:**

The Special Experience Requirements set forth below apply to the bidder. Compliance with such Special Experience Requirements will be determined solely by the City prior to an award of contract. Failure to comply with the Special Experience Requirements will result in rejection of the bid as non-responsive.

**The requirements in this Section (A) apply to this contract where indicated by a blackened box (■).**

- The bidder must, within the past consecutive six (6) years have successfully completed at least (3) projects involving specialty work from the list below:

- 1.) Flood wall and flood gate construction, including:
  - a.) Press-in sheet piling
  - b.) Micropiling
  - c.) Drilled shafts
  - d.) Rock sockets
  - e.) Jet grouting
- 2.) Combined sewer structure (regulator, manhole, tide gate) reconstruction
- 3.) Marine construction, including:
  - a.) Pile supported pre-stressed concrete deck structure demolition and reconstruction
  - b.) Cut-off wall installation
  - c.) Outfall penetration installation
  - d.) Cathodic protection of existing steel pipe piles
  - e.) Marine Concrete and mass fill delivery
- 4.) Heavy movable mechanisms –Roller flood gates
- 5.) Prefabricated pedestrian bridge construction and installation
- 6.) Soil contamination remediation
- 7.) Ground improvement
- 8.) Archaeological investigation work
- 9.) Large-scale landscape construction, including:
  - a.) Plantings
  - b.) Horticultural soils
  - c.) Green roofs
- 10.) Natural and synthetic turf sports field construction
- 11.) Specialty athletic surfacing, including:
  - a.) Tennis courts
  - b.) Running track
- 12.) Irrigation system installation
- 13.) Concrete flatwork, including exposed aggregate specialty work
- 14.) Stone masonry
- 15.) Architectural precast concrete
- 16.) Architectural metal work
- 17.) Playground construction
- 18.) Park building construction including all standard building trades

Such prior projects may have been performed as a prime contractor, subcontractor or sub-subcontractor.

- The bidder must, within the last ten (10) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least two (2) projects with a construction value greater than \$400,000,000 for each individual project. The experience of Bidder's principal(s) may be used to fulfill the above experience requirements.

- The bidder must have had at least One Billion (\$1,000,000,000) in annual gross revenue for the prior fiscal year resulting from general construction work and specialty engineering work.

The Special Experience Requirements next to the blackened box below apply to the bidder. If the bidder intends to perform such work itself, it must demonstrate compliance with the Special Experience Requirements. If the bidder intends to subcontract this work, the proposed subcontractor or sub-subcontractor must demonstrate compliance with the Special Experience Requirements. The contractor, subcontractor or sub-subcontractor (hereinafter referred to as the "Entity") that will perform any specific area of work indicated by the blackened box below, may have performed the required prior project(s) as a prime contractor, subcontractor or sub-subcontractor. Once approved, no substitution will be permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City.

- Trunk Water Main Work:** The Entity that will perform the trunk water main work must, within the last seven (7) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least one (1) project similar in scope and type to the required work.
- Best Management Practice Work:** Best Management Practice ("BMP") Work is any item of work in the Bid Schedule that begins with the prefix "BMP". The Entity that will perform any BMP Work must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least three (3) projects similar in scope and type to the required work.  
For professional services in connection with BMP Work (i.e., monitoring and reporting services), the individual who will perform the required services must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least three (3) projects similar in scope and type to the required work. Additional requirements are set forth below.
  - The individual serving as the Restoration Specialist (Construction Monitor) must be a Registered Landscape Architect licensed by the state of New York, or must have equivalent professional experience.
  - The individual serving as the Erosion and Sediment Control Licensed/Certified Professional must be a Certified Professional in Erosion and Sediment Control (CPESC), certified by CPESC, Inc.
- Micro-Tunneling/Pipe Jacking Work:** The Entity that will perform the micro-tunneling/pipe jacking work must, within the last five (5) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least two (2) projects similar in scope and type to the required work.
- OTHER:** \_\_\_\_\_  
\_\_\_\_\_

**(B) SPECIAL EXPERIENCE REQUIREMENTS FOR SPECIFIC AREAS OF WORK:**

The requirements in this Section (B) apply to this contract where indicated by a blackened box (■).

The Special Experience Requirements set forth below apply to the Entity that will perform the specific area of work. **Compliance with such Special Experience Requirements will be determined solely by the City after an award of contract. Within two (2) weeks of award of contract, the contractor will be required to submit the qualifications of the Entity that will perform the specific area of work.** If the bidder intends to perform such work itself, it must demonstrate compliance with the Special Experience Requirements. If the bidder intends to subcontract this work, the proposed subcontractor or sub-subcontractor must demonstrate compliance with the Special Experience Requirements. Once approved, no substitution will be

permitted, unless the qualifications of the proposed replacement have been approved in writing in advance by the City.

Special Experience Requirements apply to the Entity that will perform any specific area of work indicated by a blackened box. The Entity may have performed the required prior project(s) as a prime contractor, subcontractor or sub-subcontractor.

■ **Hazmat Work:** Hazmat Work is any item of work in the Bid Schedule that begins with the prefix 8.01. The Entity that will perform any Hazmat Work must, within the last three (3) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least five (5) projects similar in scope and type to the required work.

■ **Pile and/or CFA Pile Work:** The Entity that will perform the Pile and/or CFA Pile Work must, within the last three (3) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least two (2) projects similar in scope and type to the required work.

For professional services in connection with Pile Work (i.e., engineering and inspection services), the individual who will perform the required services must be a Professional Engineer licensed by the state of New York. Such individual must also comply with the above requirements for prior projects.

■ **Construction Report, Monitoring and Post-Construction Report, and Continuous Real-Time Monitoring For Vibrations and Movements and Post-Construction Report Work:** The Entity that will perform the Construction Report, Monitoring For Vibrations And Movements, and Post-Construction Report Work must, within the last three (3) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least two (2) projects similar in scope and type to the required work.

For professional services in connection with Reporting and Monitoring Work (i.e., engineering and inspection services), the individual who will perform the required services must be a Professional Engineer licensed by the state of New York. Such individual must also comply with the above requirements for prior projects.

■ **OTHER (by specification section):**

1. GENERAL-Pages, Section ESCR 9.30: Qualified Inspector - Professional Engineer or a Landscape Architect licensed to practice in New York State, or a Soil and Water Conservation Society Certified Professional in Erosion and Sediment Control (CPESC) who is independent from the Contractor.
2. FLOODWALL-Pages, Section ESCR 13: Entity performing architectural concrete textured finishes: five (5) years' experience and three (3) projects of similar magnitude and complexity to the required work.
3. PARKS-Pages, Section PK-ESCR 099: Entity performing play equipment: The Entity to perform the installation work must have a minimum of three (3) years of experience working on installation of play equipment similar to the work specified in scope and complexity in accordance with ASTM F1487-Latest Rev. and CPSC guidelines.
4. PARKS-Pages, Section PK-ESCR 036: Fabricator Qualifications: A firm with a minimum of twenty-five (25) years documented experience in the production of decorative architectural precast concrete units similar to those indicated for this project and with a record of successful in-service performance. Fabricator to have minimum seven (7) years' experience with Rhino computer modeling, 3D CNC modeling and machining.
5. PARKS-Pages, Section PK-ESCR 036: Precast installer have no less than 5 years of documented experiences who has completed precast architectural concrete work similar in material, design, and extent to that indicated for this Project and whose work has resulted in construction with a record of successful in-service performance

6. PARKS-Pages, Section PK-ESCR 110: The entity performing the plant installation shall be experienced in plant installation comparable to that described herein and have at least ten (10) years of prior experience in plant installation.
7. PARKS-Pages, Section PK-ESCR 111: Synthetic turf installer: have successfully completed in a timely fashion at least five (5) projects similar in scope and type to the required work.
8. PARKS-Pages, Section PK-ESCR 468/469: The VMS Manufacturer must have a minimum of ten (10) years manufacturing LED DMS for ITS application, must be certified for the latest ISO 9001 standards and must have a minimum of 100 outdoor LED DMS. VMS installations currently in operation by similar Transportation agencies in the U.S.
9. PARKS-Pages, Section PK-ESCR 603: The enclosure manufacturer shall be a company specializing in the manufacturing of such enclosures with at least fifteen (15) years of successful field experience and be A.S.S.E. 1060 Seal Certified.
10. PARKS-Pages, Sections PK-ESCR 653, PK-ESCR 654: Solar Energy Electrical Power Generation System installer(s) must demonstrate that they have successfully installed at least four projects within the past five (5) years that, in aggregate, equal or exceed the size of the proposed project. References shall be provided for each of the referenced qualified projects.
11. PARKS-Pages, Section PK-ESCR 907: The fabricator must be experienced in the production and installation of stainless steel furnishings and/or site amenities for a minimum of five (5) years.
12. BRIDGES-Pages, SECTION 564.02010211: The hanger supplier must have a representative on site full time during all such operations. The representative shall have previous experience with strand-by-strand installation of hangers/stay cables of similar or larger size on at least two other projects within the previous five (5) years.
13. BRIDGES-Pages, SECTION 572.0002NN01: The metalizing contractor performing the work shall document previous experience in providing surface preparation for metalizing and metalizing application services in the shop and field, with a minimum history of three (3) successfully completed projects of similar complexity. The contractor shall be certified per the requirements of SSPC-QP 3.
14. BRIDGES-Pages, SECTION NYC-180002: The Manufacturer shall have successfully completed at least five (5) projects within the past 3 years of similar size, complexity, and utilizing similar systems
15. BRIDGES-Pages, SECTION ESCR 570: The contractor or subcontractor performing the anti-graffiti coating of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work. In addition, the contractor or subcontractor must be approved, or certified, or authorized by the manufacturer, and must be eligible to receive the manufacturer's warranty.
16. BUILDINGS-Pages SECTION 05 80 00: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
17. BUILDINGS-Pages SECTION 07 13 00: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work

18. BUILDINGS-Pages SECTION 07 27 10 Applicator Qualifications: A firm experienced in applying air vapor barrier materials similar in material, design, and extent to those indicated for this Project, whose work has resulted in applications with a record of successful in-service performance.
19. BUILDINGS-Pages SECTION 07 27 10 Membrane Manufacturer Qualifications: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project.
20. BUILDINGS-Pages SECTION 07 55 56 A Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work
21. BUILDINGS-Pages SECTION 07 55 66 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work
22. BUILDINGS-Pages SECTION 07 55 66: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project
23. BUILDINGS-Pages Section 07 62 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
24. BUILDINGS-Pages SECTION 07 70 00: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project.
25. BUILDINGS-Pages SECTION 07 70 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
26. BUILDINGS-Pages Section 07 92 00 Installer/Applicator: The sealant work shall be performed by a firm having five (5) years experience in the installation of specified materials on comparable projects. The firm shall have the approval of the sealant materials manufacturer
27. BUILDINGS-Pages Section 08 31 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work
28. BUILDINGS-Pages Section 08 31 00 B.Manufacturer Qualifications: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project
29. BUILDINGS-Pages Section 08 33 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
30. BUILDINGS-Pages Section 08 33 00: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project.

31. BUILDINGS-Pages SECTION 08 33 23: Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
32. BUILDINGS-Pages SECTION 08 33 23: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project
33. BUILDINGS-Pages SECTION 08 51 13: Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
34. BUILDINGS-Pages SECTION 08 80 00: D. Low 'E' Coating Producer: The fabricator/manufacturer shall must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project.
35. BUILDINGS-Pages SECTION 09 21 17 Installer Qualifications: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
36. BUILDINGS-Pages SECTION 09 67 00: Obtain primary fluid applied flooring materials including primers, resins, waterproofing membranes, hardening agents, finish or sealing coats from a single manufacturer with not less than five (5) years of successful experience in supplying principal materials for work of type and extent shown and described in this section
37. BUILDINGS-Pages SECTION 09 67 00 Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
38. BUILDINGS-Pages SECTION 09 90 00 Applicator Qualifications: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work
39. BUILDINGS-Pages SECTION 10 14 00: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
40. BUILDINGS-Pages SECTION 10 14 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work
41. BUILDINGS-Pages Section 10 16 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
42. BUILDINGS-Pages Section 10 16 00: The manufacturer providing material or equipment specified in this section must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project
43. BUILDINGS-Pages SECTION 10 28 13 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid

- opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
44. BUILDINGS-Pages SECTION 10 44 00 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
  45. BUILDINGS-Pages SECTION 10 51 13 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
  46. BUILDINGS-Pages SECTION 13 34 70 Qualified Applicator: The entity performing the anti-graffiti coating of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work
  47. BUILDINGS-Pages SECTION 28 46 00: The manufacturer providing material or equipment specified in this section must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project.
  48. BUILDINGS-Pages SECTION 23 0593: Indoor Air Quality (IAQ) Testing: The testing and balancing agency shall provide proof of having at least 3 years testing experience, as well as having successfully completed at least three (3) projects of similar size and scope.
  49. BUILDINGS-Pages SECTION 32 31 10 Qualified Installer: The entity performing the work of this section must, within the last five (5) consecutive years prior to the bid opening have successfully completed in a timely fashion at least three (3) projects similar in scope, size and type to the required work.
  50. BUILDINGS-Pages SECTION 32 31 10: The manufacturer must, for the past five (5) years, have been regularly engaged in the manufacture of material or equipment similar in type to that required for this Project
  51. PC-Pages SECTION ESCR 50.61 Equipment: The microtunnel boring machine (MTBM) must be a pressurized face, slurry machine manufactured by a company that specializes in the design and fabrication of this type of equipment and has at least ten (10) years of experience.
  52. PC-Pages SECTION ESCR 50.61 Qualifications: The microtunneling/pipe-jacking Contractor or subcontractor performing the work required under this contract must be experienced in work of this nature and must have successfully completed a minimum of two (2) tunneling projects in the last five (5) years using pressurized face microtunneling/pipe-jacking equipment with a closed face tunnel shield and positive controlled face pressure. One of the successfully completed projects must have been in similar ground conditions (strata type and hydrostatic head), as to those anticipated on this contract. The Contractor must submit a description of such projects, which must include at a minimum, a listing of the locations, dates of projects, owners, pipe types and sizes, type of equipment utilized, ground conditions, drive lengths, maximum line and grade deviations and other information relevant to the issue of the successful completion of such projects.

The microtunneling/pipe-jacking project superintendent must have at least five (5) years of recent previous experience in tunneling using the proposed MTBM equipment. Experience shall be in a minimum of five (5) previous tunneling projects of similar size, drive lengths and ground conditions with at least two (2) projects with a minimum size of 48-inch diameter. Tunneling operations shall be performed under the direction of

tunneling supervisor who shall be in responsible charge throughout the tunneling operation .

The microtunneling/pipe-jacking machine operator(s) must be experienced in tunneling with prior knowledge and ability to properly operate the MTBM systems being employed. All operators shall have minimum of five (5) years of experience performing tunneling of similar size, drive lengths and ground conditions with at least two (2) projects with a minimum 48-inch diameter.

Prior to the start of work the Contractor will be required to submit the name and resume of the microtunneling/pipe-jacking subcontractor for approval.

53. FLOODWALL Pages Section ESCR-2: The entity performing the jet grouting shall be experienced in jet grouting operations comparable to that described herein and have at least five (5) years of experience in jet grouting methods. Jet grouting experience shall include at least 5 projects of similar magnitude and complexity to that required for the program specified herein.
54. FLOODWALL Pages Section ESCR-2: The jet grouting field superintendents shall each have at least five (5) years of experience in jet grouting techniques similar to that required for the Work; including at least 2 projects, one of which within the past 5 years of similar magnitude and complexity to that required for the Work.
55. FLOODWALL Pages Section ESCR-5: Identify full-time stone column equipment operators who have been directly responsible for stone column installation for at least 5 projects in the last five (5) years. Provide a detailed resume of the equipment operator's experience and qualifications.
56. FLOODWALL Pages SECTION ESCR-13: The work of this section shall be performed by a concrete contractor who specializes in the type of finish work required for this project, with a minimum of five years documented successful experience and shall be performed by skilled workers thoroughly trained in the necessary trades to perform the work. Prior to commencing with the work, the contractor shall submit resumes, references, and photographs/locations of prior work examples of textured finish concrete surfaces for approval by the Engineer
57. FLOODWALL Pages Section ESCR-76.11: The Contractor shall submit to the Commissioner qualifications of the firm it proposes to provide the engineering services described in this section. The proposed firm must meet the following special experience requirements.
  - (1) Such firm must, within the last three (3) consecutive years, have successfully provided engineering services similar to the services described in this section on a minimum of two (2) comparable projects.
  - (2) Such firm must carry professional liability insurance as specified in Schedule "A". Compliance with such special experience requirements will be determined solely by the Commissioner. Once a firm is approved, no substitution will be permitted, unless the Commissioner has approved the qualifications of the proposed replacement in writing in advance. If the qualifications of the proposed firm are not acceptable, the Contractor shall submit the qualifications of another proposed firm within fifteen (15) days of notice to do so.

58. FLOODWALL Pages Section ESCR-76.21: The Contractor shall submit to the Commissioner qualifications of the firm it proposes to provide the engineering services described in this section. The proposed firm must meet the following special experience requirements:

- (1) Such firm must, within the last three (3) consecutive years, have successfully provided engineering services similar to the services described in this section on a minimum of two (2) comparable projects.
- (2) Such firm must carry professional liability insurance as specified in Schedule "A".

Compliance with such special experience requirements will be determined solely by the Commissioner. Once a firm is approved, no substitution will be permitted, unless the Commissioner has approved the qualifications of the proposed replacement in writing in advance. If the qualifications of the proposed firm are not acceptable, the Contractor shall submit the qualifications of another proposed firm within fifteen (15) days of notice to do so.

The firm approved for the preparation of the preconstruction report(s) in accordance with Section ESCR-76.11 - Construction Report, may also be submitted for approval to perform the monitoring and post- construction report work.

59. FLOODWALL Pages SECTION ESCR-551.993: The Contractor shall be fully experienced in all aspects of micropile design and construction, and shall furnish all necessary equipment, materials, skilled labor, and supervision to carry out the contract. The Contractor shall have successfully completed at least three projects in the previous five (5) years of similar scope and size. The Contractor shall have successfully installed a minimum of 100 micropiles in similar sites, of similar capacity to those required in the plans and specifications. The Contractor shall also provide resumes of key personnel who will be present on site (and will be materially involved) and who each have at least three (3) years of relevant experience. These personnel shall include as a minimum a superintendent and a driller. The Engineer may suspend the Work if the Contractor uses non-approved personnel. If work is suspended, the Contractor shall be fully liable for all resulting costs and no adjustment in contract time will result from the suspension.

For professional services in connection with Pile Work (i.e., engineering and inspection services), the individual who will perform the required services must be a Professional Engineer licensed by the state of New York. Such individual must also comply with the above requirements for prior projects.

60. S-Pages, Article B1, Critical Path Method (CPM) Schedule: Project Scheduler: must have a minimum of five (5) years relevant experience in the use of Oracle P6 and a minimum of five (5) years relevant experience in construction, planning, scheduling, expediting and tracking the progress of the work for projects of a similar nature, size, and complexity.

61. S-Pages, Article B3, Special Conditions for Maritime, Waterfront, and Floating Plants: Marine Surveyors: Must be accredited by the National Association of Marine Surveyors (NAMS) or the Society of Accredited Marine Surveyors (SAMS) and have at least 5 years of experience in commercial marine plant and equipment.

62. PARKS-Pages: PK-ESCR 781,782,783,784: Fiber Technicians must have a minimum of five (5) years experience in the installation of fiber optic cables, including fusion splicing, terminating and testing of single mode outside plant fibers.

**(C) SPECIFICATIONS:** In the event of any conflict, omission or inconsistency between (1) the Specifications and/or Contract Drawings, and (2) the Special Experience Requirements in Section (B) of the Special Notice to Bidders, the special experience listed in the

Specifications and/or Contract Drawings shall be controlling. The Special Experience Requirements in Section (B) of this Special Notice to Bidders are only for the convenience of the bidders.

## **M/WBE PROGRAM: M/WBE UTILIZATION PLAN**

**M/WBE Program Requirements:** The requirements for the M/WBE Program are set forth on the following pages of this Bid Booklet, in the section entitled “Notice to All Prospective Contractors.”

**Schedule B: M/WBE Utilization Plan:** The M/WBE Utilization Plan for this Contract is set forth in this Bid Booklet starting on page A-37. The M/WBE Utilization Plan (Part I) indicates whether Participation Goals have been established for this Contract. If Participation Goals have been established for this Contract, the bidder must submit an M/WBE Utilization Plan (Part II) with its bid.

**Waiver:** The bidder may seek a full or partial pre-award waiver of the Participation Goals in accordance with the “Notice to All Prospective Contractors” (See Part A, Section 10). The bidder’s request for a waiver must be submitted at least seven (7) calendar days prior to the bid date. Waiver requests submitted after the deadline will not be considered. The form for requesting a waiver of the Participation Goals is set forth in the M/WBE Utilization Plan (Part III).

**Rejection of the Bid:** The bidder must complete Schedule B: M/WBE Utilization Plan (Part II) set forth in this Bid Booklet starting on page A-39.

The bidder’s submission of Schedule B must include both the Vendor Certification and Required Affirmations (see Section V of Part II). If the bidder does not provide a complete Schedule B submission at the time of bid, the Agency will deem the bid to be non-responsive, unless a full waiver of the Participation Goals is granted (Schedule B, Part III). In the event that the City determines that the bidder has submitted a Schedule B where the Vendor Certification and Required Affirmations are completed but other aspects of the Schedule B are not complete, or contain a copy or computation error that is at odds with the Vendor Certification and Required Affirmations, the bidder will be notified by the Agency and will be given four (4) calendar days from receipt of notification to cure the specified deficiencies and return a completed Schedule B to the Agency. Failure to do so will result in a determination that the Bid is non-responsive. Receipt of notification is defined as the date notice is emailed or faxed (if the bidder has provided an email address or fax number), or no later than five (5) calendar days from the date of mailing or upon delivery, if delivered.

**Impact on LBE Requirements:** If Participation Goals have been established for the participation of M/WBEs, the contractor is not required to comply with the Locally Based Enterprise Program (“LBE”). The LBE Program’s requirements are set forth in Article 67 of the Contract.

## **NOTICE TO ALL PROSPECTIVE CONTRACTORS**

### **PARTICIPATION BY MINORITY-OWNED AND WOMEN-OWNED BUSINESS ENTERPRISES IN CITY PROCUREMENT**

#### **ARTICLE I. M/WBE PROGRAM**

Local Law No. 129 of 2005 added and Local Law 1 of 2013 amended Section 6-129 of the Administrative Code of the City of New York (hereinafter "Section 6-129"). Section 6-129 establishes the program for participation in City procurement ("M/WBE Program") by minority-owned business enterprises ("MBEs") and women-owned business enterprises ("WBEs"), certified in accordance with Section 1304 of the New York City Charter. As stated in Section 6-129, the intent of the program is to address the impact of discrimination on the City's procurement process, and to promote the public interest in avoiding fraud and favoritism in the procurement process, increasing competition for City business, and lowering contract costs. The contract provisions contained herein are pursuant to Section 6-129, and the rules of the Department of Small Business Services ("DSBS") promulgated thereunder.

**If this Contract is subject to the M/WBE Program established by Section 6-129, the specific requirements of MBE and/or WBE participation for this Contract are set forth in Schedule B of the Contract (entitled the "M/WBE Utilization Plan"), and are detailed below. The Contractor must comply with all applicable MBE and WBE requirements for this Contract.**

All provisions of Section 6-129 are hereby incorporated in the Contract by reference and all terms used herein that are not defined herein shall have the meanings given such terms in Section 6-129. Article I, Part A, below, sets forth provisions related to the participation goals for construction, standard and professional services contracts. Article I, Part B, below, sets forth miscellaneous provisions related to the M/WBE Program.

#### **PART A**

##### **PARTICIPATION GOALS FOR CONSTRUCTION, STANDARD AND PROFESSIONAL SERVICES CONTRACTS OR TASK ORDERS**

1. The **MBE and/or WBE Participation Goals** established for this Contract or Task Orders issued pursuant to this Contract, ("**Participation Goals**"), as applicable, are set forth on Schedule B, Part I to this Contract (see Page 1, line 1 Total Participation Goals) or will be set forth on Schedule B, Part I to Task Orders issued pursuant to this Contract, as applicable.

The **Participation Goals** represent a percentage of the total dollar value of the Contract or Task Order, as applicable, that may be achieved by awarding subcontracts to firms certified with New York City Department of Small Business Services as MBEs and/or WBEs, and/or by crediting the participation of prime contractors and/or qualified joint ventures as provided in Section 3 below, unless the goals have been waived or modified by Agency in accordance with Section 6-129 and Part A, Sections 10 and 11 below, respectively.

2. If **Participation Goals** have been established for this Contract or Task Orders issued pursuant to this Contract, Contractor agrees or shall agree as a material term of the Contract that Contractor shall be subject to the **Participation Goals**, unless the goals are waived or modified by Agency in accordance with Section 6-129 and Part A, Sections 10 and 11 below, respectively.

3. If **Participation Goals** have been established for this Contract or Task Order issued pursuant to this Contract, a Contractor that is an MBE and/or WBE shall be permitted to count its own participation toward fulfillment of the relevant **Participation Goal**, provided that in accordance with Section 6-129 the value of Contractor's participation shall be determined by subtracting from the total value of the Contract or Task Order, as applicable, any amounts that the Contractor pays to direct subcontractors (as defined in Section 6-129(c)(13)), and provided

further that a Contractor that is certified as both an MBE and a WBE may count its own participation either toward the goal for MBEs or the goal for WBEs, but not both.

A Contractor that is a qualified joint venture (as defined in Section 6-129(c)(30)) shall be permitted to count a percentage of its own participation toward fulfillment of the relevant **Participation Goal**. In accordance with Section 6-129, the value of Contractor's participation shall be determined by subtracting from the total value of the Contract or Task Order, as applicable, any amounts that Contractor pays to direct subcontractors, and then multiplying the remainder by the percentage to be applied to total profit to determine the amount to which an MBE or WBE is entitled pursuant to the joint venture agreement, provided that where a participant in a joint venture is certified as both an MBE and a WBE, such amount shall be counted either toward the goal for MBEs or the goal for WBEs, but not both.

4. A. If **Participation Goals** have been established for this Contract, a prospective contractor shall be required to submit with its bid or proposal, as applicable, a completed Schedule B, M/WBE Utilization Plan, Part II (see Pages 2-4) indicating: (a) whether the contractor is an MBE or WBE, or qualified joint venture; (b) the percentage of work it intends to award to direct subcontractors; and (c) in cases where the contractor intends to award direct subcontracts, a description of the type and dollar value of work designated for participation by MBEs and/or WBEs, and the time frames in which such work is scheduled to begin and end. In the event that this M/WBE Utilization Plan indicates that the bidder or proposer, as applicable, does not intend to meet the **Participation Goals**, the bid or proposal, as applicable, shall be deemed non-responsive, unless Agency has granted the bidder or proposer, as applicable, a pre- award waiver of the Participation Goals in accordance with Section 6-129 and Part A, Section 10 below.

B. (i) If this Contract is for a master services agreement or other requirements type contract that will result in the issuance of Task Orders that will be individually registered ("Master Services Agreement") and is subject to M/WBE **Participation Goals**, a prospective contractor shall be required to submit with its bid or proposal, as applicable, a completed Schedule B, M/WBE Participation Requirements for Master Services Agreements That Will Require Individually Registered Task Orders, Part II (page 2) indicating the prospective contractor's certification and required affirmations to make all reasonable good faith efforts to meet participation goals established on each individual Task Order issued pursuant to this Contract, or if a partial waiver is obtained or such goals are modified by the Agency, to meet the modified **Participation Goals** by soliciting and obtaining the participation of certified MBE and/or WBE firms. In the event that the Schedule B indicates that the bidder or proposer, as applicable, does not intend to meet the **Participation Goals** that may be established on Task Orders issued pursuant to this Contract, the bid or proposal, as applicable, shall be deemed nonresponsive.

(ii) **Participation Goals** on a Master Services Agreement will be established for individual Task Orders issued after the Master Services Agreement is awarded. If **Participation Goals** have been established on a Task Order, a contractor shall be required to submit a Schedule B – M/WBE Utilization Plan For Independently Registered Task Orders That Are Issued Pursuant to Master Services Agreements, Part II (see Pages 2-4) indicating: (a) whether the contractor is an MBE or WBE, or qualified joint venture; (b) the percentage of work it intends to award to direct subcontractors; and (c) in cases where the contractor intends to award direct subcontracts, a description of the type and dollar value of work designated for participation by MBEs and/or WBEs, and the time frames in which such work is scheduled to begin and end. The contractor must engage in good faith efforts to meet the **Participation Goals** as established for the Task Order unless Agency has granted the contractor a pre-award waiver of the Participation Goals in accordance with Section 6-129 and Part A, Section 10 below.

C. **THE BIDDER/PROPOSER MUST COMPLETE THE SCHEDULE B INCLUDED HEREIN (SCHEDULE B, PART II). A SCHEDULE B SUBMITTED BY THE BIDDER/PROPOSER WHICH DOES NOT INCLUDE THE VENDOR CERTIFICATION AND REQUIRED AFFIRMATIONS (SEE SECTION V OF PART II) WILL BE DEEMED TO BE NON-**

**RESPONSIVE, UNLESS A FULL WAIVER OF THE PARTICIPATION GOALS IS GRANTED (SCHEDULE B, PART III). IN THE EVENT THAT THE CITY DETERMINES THAT THE BIDDER/PROPOSER HAS SUBMITTED A SCHEDULE B WHERE THE VENDOR CERTIFICATION AND REQUIRED AFFIRMATIONS ARE COMPLETED BUT OTHER ASPECTS OF THE SCHEDULE B ARE NOT COMPLETE, OR CONTAIN A COPY OR COMPUTATION ERROR THAT IS AT ODDS WITH THE VENDOR CERTIFICATION AND AFFIRMATIONS, THE BIDDER/PROPOSER WILL BE NOTIFIED BY THE AGENCY AND WILL BE GIVEN FOUR (4) CALENDAR DAYS FROM RECEIPT OF NOTIFICATION TO CURE THE SPECIFIED DEFICIENCIES AND RETURN A COMPLETED SCHEDULE B TO THE AGENCY. FAILURE TO DO SO WILL RESULT IN A DETERMINATION THAT THE BID/PROPOSAL IS NON-RESPONSIVE. RECEIPT OF NOTIFICATION IS DEFINED AS THE DATE NOTICE IS E-MAILED OR FAXED (IF THE BIDDER/PROPOSER HAS PROVIDED AN E-MAIL ADDRESS OR FAX NUMBER), OR NO LATER THAN FIVE (5) CALENDAR DAYS FROM THE DATE OF MAILING OR UPON DELIVERY, IF DELIVERED.**

5. Where an **M/WBE** Utilization Plan has been submitted, the Contractor shall, within 30 days of issuance by Agency of a notice to proceed, submit a list of proposed persons or entities to which it intends to award subcontracts within the subsequent 12 months. In the case of multiyear contracts, such list shall also be submitted every year thereafter. The Agency may also require the Contractor to report periodically about the contracts awarded by its direct subcontractors to indirect subcontractors (as defined in Section 6-129(c)(22)). **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5) (i.e., a contract valued at or below \$3M for projects in New York City) or if the Contract is subject to a project labor agreement in accordance with Labor Law §222, and the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades (plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring), the Contractor must identify all those to which it intends to award construction subcontracts for any portion of the Wicks trade work at the time of bid submission, regardless of what point in the life of the contract such subcontracts will occur. In identifying intended subcontractors in the bid submission, bidders may satisfy any Participation Goals established for this Contract by proposing one or more subcontractors that are MBEs and/or WBEs for any portion of the Wicks trade work.** In the event that the Contractor's selection of a subcontractor is disapproved, the Contractor shall have a reasonable time to propose alternate subcontractors.

6. MBE and WBE firms must be certified by DSBS in order for the Contractor to credit such firms' participation toward the attainment of the **Participation Goals**. Such certification must occur prior to the firms' commencement of work. A list of MBE and WBE firms may be obtained from the DSBS website at [www.nyc.gov/buycertified](http://www.nyc.gov/buycertified), by emailing DSBS at [buyer@sbs.nyc.gov](mailto:buyer@sbs.nyc.gov), by calling (212) 513-6356, or by visiting or writing DSBS at 110 William St., New York, New York, 10038, 7th floor. Eligible firms that have not yet been certified may contact DSBS in order to seek certification by visiting [www.nyc.gov/getcertified](http://www.nyc.gov/getcertified), emailing [MWBE@sbs.nyc.gov](mailto:MWBE@sbs.nyc.gov), or calling the DSBS certification helpline at (212) 513-6311. A firm that is certified as both an MBE and a WBE may be counted either toward the goal for MBEs or the goal for WBEs, but not both. No credit shall be given for participation by a graduate MBE or graduate WBE, as defined in Section 6-129(c)(20).

7. Where an **M/WBE** Utilization Plan has been submitted, the Contractor shall, with each voucher for payment, and/or periodically as Agency may require, submit statements, certified under penalty of perjury, which shall include, but not be limited to,: the total amount the Contractor paid to its direct subcontractors, and, where applicable pursuant to Section 6-129(j), the total amount direct subcontractors paid to indirect subcontractors; the names, addresses and contact numbers of each MBE or WBE hired as a subcontractor by the Contractor, and, where applicable, hired by any of the Contractor's direct subcontractors; and the dates and amounts paid to each MBE or WBE. The Contractor shall also submit, along with its voucher for final payment: the total

amount it paid to subcontractors, and, where applicable pursuant to Section 6-129(j), the total amount its direct subcontractors paid directly to their indirect subcontractors; and a final list, certified under penalty of perjury, which shall include the name, address and contact information of each subcontractor that is an MBE or WBE, the work performed by, and the dates and amounts paid to each.

8. If payments made to, or work performed by, MBEs or WBEs are less than the amount specified in the Contractor's **M/WBE Utilization Plan**, Agency shall take appropriate action, in accordance with Section 6-129 and Article II below, unless the Contractor has obtained a modification of its **M/WBE Utilization Plan** in accordance with Section 6-129 and Part A, Section 11 below.

9. Where an **M/WBE Utilization Plan** has been submitted, and the Contractor requests a change order the value of which exceeds the greater of 10 percent of the Contract or Task Order, as applicable, or \$500,000, Agency shall review the scope of work for the Contract or Task Order, as applicable, and the scale and types of work involved in the change order, and determine whether the **Participation Goals** should be modified.

10. Pre-award waiver of the **Participation Goals**. (a) A bidder or proposer, or contractor with respect to a Task Order, may seek a pre-award full or partial waiver of the **Participation Goals** in accordance with Section 6-129, which requests that Agency change one or more **Participation Goals** on the grounds that the **Participation Goals** are unreasonable in light of the availability of certified firms to perform the services required, or by demonstrating that it has legitimate business reasons for proposing a lower level of subcontracting in its **M/WBE Utilization Plan**.

(b) To apply for a full or partial waiver of the **Participation Goals**, a bidder, proposer, or contractor, as applicable, must complete Part III (Page 5) of Schedule B and submit such request no later than seven (7) calendar days prior to the date and time the bids, proposals, or Task Orders are due, in writing to the Agency by email at [MWBEModification@ddc.nyc.gov](mailto:MWBEModification@ddc.nyc.gov). Bidders, proposers, or contractors, as applicable, who have submitted requests will receive an Agency response by no later than two (2) calendar days prior to the due date for bids, proposals, or Task Orders; provided, however, that if that date would fall on a weekend or holiday, an Agency response will be provided by close-of-business on the business day before such weekend or holiday date.

(c) If the Agency determines that the **Participation Goals** are unreasonable in light of the availability of certified firms to perform the services required, it shall revise the solicitation and extend the deadline for bids and proposals, or revise the Task Order, as applicable.

(d) Agency may grant a full or partial waiver of the **Participation Goals** to a bidder, proposer or contractor, as applicable, who demonstrates—before submission of the bid, proposal or Task Order, as applicable—that it has legitimate business reasons for proposing the level of subcontracting in its **M/WBE Utilization Plan**. In making its determination, Agency shall consider factors that shall include, but not be limited to, whether the bidder, proposer or contractor, as applicable, has the capacity and the bona fide intention to perform the Contract without any subcontracting, or to perform the Contract without awarding the amount of subcontracts represented by the **Participation Goals**. In making such determination, Agency may consider whether the **M/WBE Utilization Plan** is consistent with past subcontracting practices of the bidder, proposer or contractor, as applicable, whether the bidder, proposer or contractor, as applicable, has made efforts to form a joint venture with a certified firm, and whether the bidder, proposer, or contractor, as applicable, has made good faith efforts to identify other portions of the Contract that it intends to subcontract.

11. Modification of **M/WBE Utilization Plan**. (a) A Contractor may request a modification of its **M/WBE Utilization Plan** after award of this Contract. **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5) (i.e., a contract valued at or below \$3M for projects in New York City) or if the Contract is subject to a project labor agreement in accordance**

with Labor Law §222, and the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades (plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring), the Contractor may request a Modification of its M/WBE Utilization Plan as part of its bid submission. The Agency may grant a request for Modification of a Contractor's M/WBE Utilization Plan if it determines that the Contractor has established, with appropriate documentary and other evidence, that it made reasonable, good faith efforts to meet the **Participation Goals**. In making such determination, Agency shall consider evidence of the following efforts, as applicable, along with any other relevant factors:

- (i) The Contractor advertised opportunities to participate in the Contract, where appropriate, in general circulation media, trade and professional association publications and small business media, and publications of minority and women's business organizations;
- (ii) The Contractor provided notice of specific opportunities to participate in the Contract, in a timely manner, to minority and women's business organizations;
- (iii) The Contractor sent written notices, by certified mail or facsimile, in a timely manner, to advise MBEs or WBEs that their interest in the Contract was solicited;
- (iv) The Contractor made efforts to identify portions of the work that could be substituted for portions originally designated for participation by MBEs and/or WBEs in the M/WBE Utilization Plan, and for which the Contractor claims an inability to retain MBEs or WBEs;
- (v) The Contractor held meetings with MBEs and/or WBEs prior to the date their bids or proposals were due, for the purpose of explaining in detail the scope and requirements of the work for which their bids or proposals were solicited;
- (vi) The Contractor made efforts to negotiate with MBEs and/or WBEs as relevant to perform specific subcontracts, or act as suppliers or service providers;
- (vii) Timely written requests for assistance made by the Contractor to Agency's M/WBE liaison officer and to DSBS;
- (viii) Description of how recommendations made by DSBS and Agency were acted upon and an explanation of why action upon such recommendations did not lead to the desired level of participation of MBEs and/or WBEs.

Agency's M/WBE officer shall provide written notice to the Contractor of the determination.

(b) The Agency may modify the **Participation Goals** when the scope of the work has been changed by the Agency in a manner that affects the scale and types of work that the Contractor indicated in its M/WBE Utilization Plan would be awarded to subcontractors.

12. If this Contract is for an indefinite quantity of construction, standard or professional services or is a requirements type contract and the Contractor has submitted an M/WBE Utilization Plan and has committed to subcontract work to MBEs and/or WBEs in order to meet the **Participation Goals**, the Contractor will not be deemed in violation of the M/WBE Program requirements for this Contract with regard to any work which was intended to be subcontracted to an MBE and/or WBE to the extent that the Agency has determined that such work is not needed.

13. If **Participation Goals** have been established for this Contract or a Task Order issued pursuant to this Contract, at least once annually during the term of the Contract or Task Order, as applicable, Agency shall review the Contractor's progress toward attainment of its M/WBE Utilization Plan, including but not limited to, by reviewing the percentage of work the Contractor has actually awarded to MBE and/or WBE subcontractors and the payments the Contractor made to such subcontractors.

14. If **Participation Goals** have been established for this Contract or a Task Order issued pursuant to this Contract, Agency shall evaluate and assess the Contractor's performance in meeting those goals, and such evaluation and assessment shall become part of the Contractor's overall contract performance evaluation.

## **PART B: MISCELLANEOUS**

1. The Contractor shall take notice that, if this solicitation requires the establishment of an **M/WBE** Utilization Plan, the resulting contract may be audited by DSBS to determine compliance with Section 6-129. See §6-129(e)(10). Furthermore, such resulting contract may also be examined by the City's Comptroller to assess compliance with the **M/WBE** Utilization Plan.
2. Pursuant to DSBS rules, construction contracts that include a requirement for an **M/WBE** Utilization Plan shall not be subject to the law governing Locally Based Enterprises set forth in Section 6-108.1 of the Administrative Code of the City of New York.
3. DSBS is available to assist contractors and potential contractors in determining the availability of MBEs and/or WBEs to participate as subcontractors, and in identifying opportunities that are appropriate for participation by MBEs and/or WBEs in contracts.
4. Prospective contractors are encouraged to enter into qualified joint venture agreements with MBEs and/or WBEs as defined by Section 6-129(c)(30).
5. By submitting a bid or proposal the Contractor hereby acknowledges its understanding of the M/WBE Program requirements set forth herein and the pertinent provisions of Section 6-129, and any rules promulgated thereunder, and if awarded this Contract, the Contractor hereby agrees to comply with the M/WBE Program requirements of this Contract and pertinent provisions of Section 6-129, and any rules promulgated thereunder, all of which shall be deemed to be material terms of this Contract. The Contractor hereby agrees to make all reasonable, good faith efforts to solicit and obtain the participation of MBEs and/or WBEs to meet the required **Participation Goals**.

## **ARTICLE II. ENFORCEMENT**

1. If Agency determines that a bidder or proposer, as applicable, has, in relation to this procurement, violated Section 6-129 or the DSBS rules promulgated pursuant to Section 6-129, Agency may disqualify such bidder or proposer, as applicable, from competing for this Contract and the Agency may revoke such bidder's or proposer's prequalification status, if applicable.
2. Whenever Agency believes that the Contractor or a subcontractor is not in compliance with Section 6-129 or the DSBS rules promulgated pursuant to Section 6-129, or any provision of this Contract that implements Section 6-129, including, but not limited to any **M/WBE** Utilization Plan, Agency shall send a written notice to the Contractor describing the alleged noncompliance and offering the Contractor an opportunity to be heard. Agency shall then conduct an investigation to determine whether such Contractor or subcontractor is in compliance.
3. In the event that the Contractor has been found to have violated Section 6-129, the DSBS rules promulgated pursuant to Section 6-129, or any provision of this Contract that implements Section 6-129, including, but not limited to, any **M/WBE** Utilization Plan, Agency may determine that one of the following actions should be taken:
  - (a) entering into an agreement with the Contractor allowing the Contractor to cure the violation;
  - (b) revoking the Contractor's pre-qualification to bid or make proposals for future contracts;
  - (c) making a finding that the Contractor is in default of the Contract;
  - (d) terminating the Contract;
  - (e) declaring the Contractor to be in breach of Contract;
  - (f) withholding payment or reimbursement;
  - (g) determining not to renew the Contract;
  - (h) assessing actual and consequential damages;
  - (i) assessing liquidated damages or reducing fees, provided that liquidated damages may be based on amounts representing costs of delays in carrying out the purposes of the M/WBE Program, or in meeting the purposes of the Contract, the costs of meeting utilization goals

through additional procurements, the administrative costs of investigation and enforcement, or other factors set forth in the Contract;

- (j) exercising rights under the Contract to procure goods, services or construction from another contractor and charge the cost of such contract to the Contractor that has been found to be in noncompliance; or
- (k) taking any other appropriate remedy.

4. If an **M/WBE** Utilization Plan has been submitted, and pursuant to this Article II, Section 3, the Contractor has been found to have failed to fulfill its **Participation Goals** contained in its **M/WBE** Utilization Plan or the **Participation Goals** as modified by Agency pursuant to Article I, Part A, Section 11, Agency may assess liquidated damages in the amount of ten percent (10%) of the difference between the dollar amount of work required to be awarded to MBE and/or WBE firms to meet the **Participation Goals** and the dollar amount the Contractor actually awarded and paid, and/or credited, to MBE and/or WBE firms. In view of the difficulty of accurately ascertaining the loss which the City will suffer by reason of Contractor's failure to meet the **Participation Goals**, the foregoing amount is hereby fixed and agreed as the liquidated damages that the City will suffer by reason of such failure, and not as a penalty. Agency may deduct and retain out of any monies which may become due under this Contract the amount of any such liquidated damages; and in case the amount which may become due under this Contract shall be less than the amount of liquidated damages suffered by the City, the Contractor shall be liable to pay the difference.

5. Whenever Agency has reason to believe that an MBE and/or WBE is not qualified for certification, or is participating in a contract in a manner that does not serve a commercially useful function (as defined in Section 6-129(c)(8)), or has violated any provision of Section 6-129, Agency shall notify the Commissioner of DSBS who shall determine whether the certification of such business enterprise should be revoked.

6. Statements made in any instrument submitted to Agency pursuant to Section 6-129 shall be submitted under penalty of perjury and any false or misleading statement or omission shall be grounds for the application of any applicable criminal and/or civil penalties for perjury. The making of a false or fraudulent statement by an MBE and/or WBE in any instrument submitted pursuant to Section 6-129 shall, in addition, be grounds for revocation of its certification.

7. The Contractor's record in implementing its **M/WBE** Utilization Plan shall be a factor in the evaluation of its performance. Whenever Agency determines that a Contractor's compliance with an **M/WBE** Utilization Plan has been unsatisfactory, Agency shall, after consultation with the City Chief Procurement Officer, file an advice of caution form for inclusion in PASSPort as caution data.

## **PRE-AWARD PROCESS**

The bidder is advised that as part of the pre-award review of its bid, the Agency will require the three lowest apparent responsive and responsible bidders to submit the information described in Sections (A) through (D) below. These bidders will be notified by DDC (by email, facsimile, or in writing), and the Agency's notice will specify the types of information that the bidder must submit to the Agency. The types of information the bidder may be required to submit are described below. Once notified, the bidder must submit such information to the Agency within five (5) business days following receipt of notification from DDC that it is among the low bidders. In the event the bidder fails to submit the required information within the specified time frame, the Agency may reject the bid as being non-responsive.

In the event the bidder fails to submit the required information within the specified time frame, the Agency may reject the bid as being nonresponsive.

\*\*\*\*\*

- (A) **Project Reference Form:** The bidder must complete and submit the Project Reference Form set forth starting on page A-53 of this Bid Booklet. The Project Reference Form consists of three (3) parts: (1) Contracts Completed by the Bidder, (2) Contracts Currently Under Construction by the Bidder, and (3) Pending Contracts Not Yet Started by the Bidder.
- (B) **Copy of License:** The bidder must submit a copy of the license under which the bidder will be performing the work. Such license must clearly show the following: (1) Name of the Licensee, (2) License Number, and (3) Expiration date of the License. A copy of the license will be required from bidders for the following contracts: Plumbing Work, Electrical Work and Asbestos Abatement.
- (C) **Financial Information:** The bidder must submit the financial information described below:
  - (1) **Audited Financial Statements:** Financial statements (Balance Sheet and Income Statement) of the entity submitting the bid, as audited by an independent auditor licensed to practice as a certified public accountant (CPA). Audited financial statements for the three (3) most recent fiscal years must be submitted. Each such financial statement must include the auditor's standard report.

If the bidder does not have audited financial statements, the bidder must submit an affidavit attesting to the fact that the bidder does not have such statements. In addition, the bidder must submit the following documentation covering the three (3) most recent fiscal years: signed federal tax returns, unaudited financial statements, and a "certified review letter" from a certified public accountant (CPA) verifying the unaudited financial statements.

Unless the most recent audited or unaudited financial statement was issued within ninety (90) days, the bidder must submit interim financial information that includes data on financial position and results of operation (income data) for the current fiscal year. Such information may be summarized on a monthly or quarterly basis or at other intervals.
  - (2) Schedule of Aged Accounts Receivable, including portion due within ninety (90) days.
- (D) **Project Specific Information:** The bidder must submit the project specific information described below:
  - (1) Statement indicating the number of years of experience the bidder has had and in what type of construction.
  - (2) Resumes of all key personnel to be involved in the project, including the proposed project superintendent.

- (3) List of significant pieces of equipment expected to be used for the contract, and whether such equipment is owned or leased.
- (4) Description of work expected to be subcontracted, and to what firms, if known.
- (5) List of key material suppliers.
- (6) Preliminary bar chart time schedule
- (7) The bidder's expected means of financing the project. This submission should be based on the assumption that the contractor is required to finance two times (2X) the average monthly billings for the project throughout the contract period.
- (8) Any other issues the bidder sees as impacting the contractor's ability to complete the project according to the contract.

In addition to the information described in Sections (A) through (D) above, the bidder shall submit such additional information as the Commissioner may require, including without limitation, an explanation or justification for specific unit price items.

The bidder is further advised that it may be required to attend a pre-award meeting with DDC representatives. If such a meeting is convened, the bidder will be advised as to any additional material to be provided.

## **PASSPort COMPLIANCE**

All vendors that intend to do business with the City of New York must complete a disclosure process in order to be considered for a contract. This disclosure process was formerly completed using Vendor Information Exchange System (VENDEX) paper-based forms. The City of New York has moved collection of vendor disclosure information online. In early August 2017, the New York City Mayor's Office of Contract Services (MOCS) launched the **Procurement and Sourcing Solutions Portal (PASSPort)**, a new online procurement system that replaced the paper-VENDEX process. In anticipation of awards, all bidders must create online accounts in the new PASSPort system, and file all disclosure information using PASSPort. **Paper submissions, including certifications of no changes to existing VENDEX packages, will not be accepted in lieu of complete online filings using PASSPort.**

All vendors that intend to do business with the City, but specifically those that fall into any of the following categories, are required to enroll:

- Have a pending award with a City Agency; or
- Hold a current contract with a City Agency and have either an expiring VENDEX or expiring Certificate of No Change.

The Department of Design and Construction (DDC) and MOCS hereby notifies all proposers that the PASSPort system is available, and that disclosure filing completion is required prior to any award through this competitive bid.

To enroll in PASSPort and to access the PASSPort website (including online training), please visit [www.nyc.gov/passport](http://www.nyc.gov/passport). Contact MOCS at [passport@mocs.nyc.gov](mailto:passport@mocs.nyc.gov) for additional information and technical support.

## **CONSTRUCTION EMPLOYMENT REPORT**

All bidders will be required to submit either a Construction Employment Report (CER) if the bid amount is \$1,000,000 or greater.

The CER template form is available online at:

[https://www1.nyc.gov/assets/sbs/downloads/pdf/businesses/DLS\\_Constru\\_Employ\\_Rpt.pdf](https://www1.nyc.gov/assets/sbs/downloads/pdf/businesses/DLS_Constru_Employ_Rpt.pdf)

Instructions for completing the Construction Employment Report are available online at:

[https://www1.nyc.gov/assets/sbs/downloads/pdf/businesses/DLS\\_Cons\\_Employ\\_Rpt\\_Inst.pdf](https://www1.nyc.gov/assets/sbs/downloads/pdf/businesses/DLS_Cons_Employ_Rpt_Inst.pdf)

If Bidder is a Corporation, fill in the following blanks:

Organized under the laws of the State of \_\_\_\_\_

Name and Home Address of President: \_\_\_\_\_

Name and Home Address of Secretary: \_\_\_\_\_

Name and Home Address of Treasurer: \_\_\_\_\_

(\*) -- Iovino Affiliates JV is a tri-venture of MLJ Contracting Corp., J-Track LLC, and Welkin Mechanical LLC

## BID FORM

---

The above-named Bidder affirms and declares:

1. The said bidder is of lawful age and the only one interested in this bid; and no person, firm or corporation other than hereinbefore named has any interest in this bid, or in the Contract proposed to be taken.
2. By submission of this bid, each bidder and each person signing on behalf of any bidder certifies, and in the case of a joint bid each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief: (1) the prices in this bid have been arrived at independently without collusion, consultation, communication or agreement, for the purpose of restricting competition, as to any matter relating to such prices with any other bidder or with any competitor; (2) unless otherwise required by law, the prices quoted in this bid have not been knowingly disclosed by the bidder and will not knowingly be disclosed by the bidder prior to opening, directly or indirectly, to any other bidder or to any competitor; and (3) No attempt has been made or will be made by the bidder to induce any other person, partnership or corporation to submit or not to submit a bid for the purpose of restricting competition.
3. No councilman or other officer or employee or person whose salary is payable in whole or in part from the City Treasury is directly or indirectly interested in this bid, or in the supplies, materials, equipment, work or labor to which it relates, or in any of the profits thereof.
4. The bidder is not in arrears to the City of New York upon debt or contract or taxes, and is not a defaulter, as surety or otherwise, upon any obligation of the City of New York, and has not been declared not responsible, or disqualified, by any agency of the City of New York or State of New York, nor is there any proceeding pending relating to the responsibility or qualification of the bidder to receive public contracts except as set forth on the Affirmation included as page C-6 of this Bid Booklet.

The bidder hereby affirms that it has paid all applicable City income, excise and other taxes for all years it has conducted business activities in New York City.

5. The bidder, as an individual, or as a member, partner, director or officer of the bidder, if the same be a firm, partnership or corporation, executes this document expressly warranting and representing that should this bid be accepted by the City and the Contract awarded to the bidder, the bidder and the bidder's subcontractors engaged in the performance: (1) will comply with the provisions of Section 6-108 of the Administrative Code of the City of New York and the non-discrimination provisions of Section 220a of the New York State Labor Law, as more expressly and in detail set forth in the Agreement; (2) will comply with Section 6-109 of the Administrative Code of the City of New York in relation to minimum wages and other stipulations as more expressly and in detail set forth in the Agreement; (3) have complied with the provisions of the aforesaid laws since their respective effective dates, and (4) will post notices to be furnished by the City, setting forth the requirements of the aforesaid laws in prominent and conspicuous places in each and every plant, factory, building and structure where employees engaged in the performance of the Contract can readily view it, and will continue to keep such notices posted until the supplies, materials and equipment, or work labor and services required to be furnished or rendered by the Contractor have been finally accepted by the City. In the event of any breach or violation of the foregoing, the Contractor may be subject to damages, liquidated or otherwise, cancellation of the Contract and suspension as a bidder for a period of three years. (The words, "the bidder" where used herein shall mean the individual bidder, firm, partnership or corporation executing this bid).

### 6. Compliance Report

The bidder, as an individual, or as a member, partner, director, or officer of the bidder, if the same be a firm, partnership, or corporation, (1) represents that the bidder's attention has been

specifically drawn to Executive Order No. 50, dated, April 25, 1980, on Equal Employment Compliance of the contract, and (2) warrants that the bidder will comply with the provisions of Executive Order No. 50. The Employment Report must be submitted as part of the bid.

The bidder, as an individual, or as a member, partner, director, or officer of the bidder, if the same be a firm, partnership, or corporation, executes this document expressly warranting that the bidder will comply with: (1) the provision of the contract on providing records, Chapter 8.

7. By submission of this bid, the bidder certifies that it now has and will continue to have the financial capability to fully perform the work required for this contract. Any award of this contract will be made in reliance upon such certification. Upon request therefor, the bidder will submit written verification of such financial capability in a form that is acceptable to the department.

8. In accordance with Section 165 of the State Finance Law, the bidder agrees that tropical hardwoods, as defined in Section 165 of the State Finance Law, shall not be utilized in the performance of this Contract, except as the same are permitted by the foregoing provision of law.

9. The bidder has visited and examined the site of the work and has carefully examined the Contract in the form approved by the Corporation Counsel, and will execute the Contract and perform all its items, covenants and conditions, and will provide, furnish and deliver all the work, materials, supplies, tools and appliances for all labor and materials necessary or required for the hereinafter named work, all in strict conformity with the Contract, for the prices set forth in the Bid Schedule.

10. **M/WBE UTILIZATION PLAN:** By signing its bid, the bidder agrees to the Vendor Certification and Required Affirmations set forth below, unless a full waiver of the Participation Goals is granted. The Vendor Certification and Required Affirmations will be deemed to satisfy the requirement to complete Section V of Part II of Schedule B: M/WBE Utilization Plan.

**Section V - Vendor Certification and Required Affirmations:**

I hereby:

- 1) acknowledge my understanding of the M/WBE participation requirements as set forth in this Contract and the pertinent provisions of Section 6-129 of the Administrative Code of the City of New York and the rules promulgated thereunder;
- 2) affirm that the information supplied in support of the M/WBE Utilization Plan is true and correct;
- 3) agree, if awarded this Contract, to comply with the M/WBE participation requirements of this Contract, the pertinent provisions of Section 6-129, and the rules promulgated thereunder, all of which shall be deemed to be material terms of this Contract;
- 4) agree and affirm that it is a material term of this Contract that the Vendor will award the total dollar value of the M/WBE Participation Goals to certified MBEs and/or WBEs, unless a full waiver is obtained or such goals are modified by the Agency; and
- 5) agree and affirm, if awarded this Contract, to make all reasonable, good faith efforts to meet the M/WBE Participation Goals, or if a partial waiver is obtained or such goals are modified by the Agency, to meet the modified Participation Goals by soliciting and obtaining the participation of certified MBE and/or WBE firms.

1720 Whitestone Expressway, Suite 300, Whitestone, NY 11357

hereinafter referred to as the "Principal", and \_\_\_\_\_  
Liberty Mutual Insurance Company  
175 Berkeley St., Boston, MA 02116

hereinafter referred to as the "Surety" are held and firmly bound to THE CITY OF NEW YORK,  
hereinafter referred to as the "CITY", or to its successors and assigns in the penal sum of \_\_\_\_\_

Ten Percent of Proposal Price

(\$ 10% of P.P.), Dollars lawful money of the United States, for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

Whereas, the Principal is about to submit (or has submitted) to the City the accompanying proposal, hereby made a part hereof, to enter into a contract in writing for Project ID: SANDRESM1,

Installation of East Side Coastal Resiliency from Montgomery Street to East 15th Street, Including Flood Protection System, Roller and

Swing Gates, Park Reconstruction, Sewer, Pedestrian Bridges, Park, Buildings, Ground Improvement, Street Lighting and Traffic Work Together With All Work Incidental Thereto, Borough of Manhattan, City of New York

NOW, THEREFORE, the conditions of this obligation are such that if the Principal shall not withdraw said Proposal without the consent of the City for a period of forty-five (45) days after the opening of bids and in the event of acceptance of the Principal's Proposal by the City, if the Principal shall:

(a) Within ten (10) days after notification by the City, execute in quadruplicate and deliver to the City all the executed counterparts of the Contract in the form set forth in the Contract Documents, in accordance with the proposal as accepted, and

(b) Furnish a performance bond and separate payment bond, as may be required by the City, for the faithful performance and proper fulfillment of such Contract, which bonds shall be satisfactory in all respects to the City and shall be executed by good and sufficient sureties, and

(c) In all respects perform the agreement created by the acceptance of said Proposal as provided in the Information for Bidders, bound herewith and made a part hereof, or if the City shall reject the aforesaid Proposal, then this obligation shall be null and void; otherwise to remain in full force and effect.

## BID BOND 2

In the event that the Proposal of the Principal shall be accepted and the Contract be awarded to the Principal the Surety hereunder agrees subject only to the payment by the Principal of the premium therefore, if requested by the City, to write the aforementioned performance and payment bonds in the form set forth in the Contract Documents.

It is expressly understood and agreed that the liability of the Surety for any and all claims hereunder shall in no event exceed the penal amount of this obligation as herein stated.

There shall be no liability under this bond if, in the event of the acceptance of the Principal's Proposal by the City, either a performance bond or payment bond, or both, shall not be required by the City on or before the 30th day after the date on which the City signs the Contract.

The surety, for the value received, hereby stipulates and agrees that the obligations of the Surety and its bond shall in no way be impaired or affected by any postponements of the date upon which the City will receive or open bids, or by any extensions of the time within which the City may accept the Principal's Proposal, or by any waiver by the City of any of the requirements of the Information for Bidders, and the Surety hereby waives notice of any such postponements, extensions, or waivers.

IN WITNESS WHEREOF, the Principal and the Surety have hereunto set their hands and seals and such of them as are corporations have caused their corporate seals to be hereto affixed and these presents to be signed by their proper officers the 3rd day of February, 2021.

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV - OFFICERS: Section 12. Power of Attorney.

Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII - Execution of Contracts: Section 5. Surety Bonds and Undertakings.

Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation - The President of the Company, acting pursuant to the Bylaws of the Company, authorizes David M. Carey, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization - By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 3rd day of February, 2021.

By: Renee C. Llewellyn, Assistant Secretary

# SCHEDULE B – M/WBE Utilization Plan

## Part 1: M/WBE Participation Goals

### Contract Overview (To be completed by contracting agency)

APT E-Pin# 85021B0024 FMS Project ID# SANDRESM1  
 Project Title INSTALLATION OF EAST SIDE COASTAL RESILIENCY FROM MONTGOMERY STREET TO EAST 15TH STREET TOGETHER WITH ALL WORK INCIDENTAL THERETO INCLUDING FLOOD PROTECTION SYSTEM BOILER AND Agency PIN# 8502021RC0001C  
 Contracting Agency Department of Design and Construction Bid/Proposal Response Date FEBRUARY 8TH, 2021  
 Agency Address 30-30 Thomson Ave. City Long Island City State NY ZIP 11101  
 Contact Person Janelle Husain Title MWBE Outreach & Compliance Analyst  
 Telephone (718) 391-1322 Email Husainja@ddc.nyc.gov

### Project Description (attach additional pages if necessary)

**INSTALLATION OF EAST SIDE COASTAL RESILIENCY FROM MONTGOMERY STREET TO EAST 15TH STREET TOGETHER WITH ALL WORK INCIDENTAL THERETO INCLUDING FLOOD PROTECTION SYSTEM BOILER AND**

Bidder or proposer  is required OR  is not required to specifically identify the contact information of all M/WBE firms they intend to use as a subcontractor on this contract, including the M/WBE vendor name, address and telephone number in the space provided below in Part 2 Section 4.

### M/WBE Participation Goals for Services

Enter the percentage amount for each category or for an unspecified Goal.

Prime Contract Industry \_\_\_\_\_  
 Category and Breakdown:  
 Unspecified 16.00 %  
 Black American \_\_\_\_\_ %  
 Hispanic American \_\_\_\_\_ %  
 Asian American \_\_\_\_\_ %  
 Women \_\_\_\_\_ %  
 Total Participation Goals 16.00 %  
 Line 1

## Part 2: M/WBE Participation Plan

(To be completed by the bidder/proposer unless granted a full waiver, which must be submitted with the bid/proposal in lieu of this form)

### Section 1: Prime Contractor Contact Information

Tax ID# \_\_\_\_\_ Will be applied for if low Bidder \_\_\_\_\_ FMS Vendor ID# \_\_\_\_\_  
 Business Name IPC Resiliency Partners Contact Person Richard Ocken  
 Business Address 1720 Whitestone Expwy., Suite 304 City Whitestone State NY ZIP 11357  
 Telephone 646-813-6770 Email rocken@mljcontracting.com

### Section 3: Contractor M/WBE Utilization Plan

Please review the Notice to Prospective Contractors for more information on how to obtain credit for M/WBE participation. Check applicable box. The Proposer or Bidder will fulfill the M/WBE Participation Goals:

- As an M/WBE Prime Contractor that will self-perform and/or subcontract to other M/WBE firms a portion of the contract the value of which is at least the amount located on Lines 2 or 3 in the panels in Section 2, as applicable. The value of any work subcontracted to non-M/WBE firms will not be credited towards fulfillment of M/WBE Participation Goals. Please check all that apply to Prime Contractor:  MBE  WBE
- As a Qualified Joint Venture with an M/WBE partner, in which the value of the M/WBE partner's participation and/or the value of any work subcontracted to other M/WBE firms is at least the amount located on Lines 2 or 3 in the panels in Section 2, as applicable. The value of any work subcontracted to non-M/WBE firms will not be credited towards fulfillment of M/WBE Participation Goals.
- As a non-M/WBE Prime Contractor that will enter into subcontracts with M/WBE firms the value of which is at least the amount located on Lines 2 or 3 in the panels in Section 2, as applicable.

### Section 2: M/WBE Utilization Goal Calculation

#### Prime Contractor Adopting Agency Participation Goals

For Prime Contractors (including Qualified Joint Ventures and M/WBE firms) adopting Agency M/WBE Participation Goals.

Total Bid/Proposal Values 1,372,221,100.00  
 multiplied by x  
 Total Participation Goals 16 %  
 (Line 1 above)  
 Calculated M/WBE Participation Amount \$ 23,555,536  
 Line 2

OR

#### Prime Contractor With Partial Waiver Approval Adopting Revised Participation Goals

For Prime Contractors (including Qualified Joint Ventures and M/WBE firms) adopting Revised M/WBE Participation Goals.

Total Bid/Proposal Value \$ \_\_\_\_\_  
 multiplied by x  
 Total Revised Participation Goals \_\_\_\_\_ %  
 Calculated M/WBE Participation Amount \$ \_\_\_\_\_  
 Line 3

**Section 4: General Contract Information**

What is the expected percentage of the total contract dollar value that you expect to award in subcontracts for services, regardless of M/WBE status? 32% <sup>Ⓟ</sup>

Enter a brief description of the type(s) and dollar value of subcontracts for all services you plan to subcontract if awarded this contract, along with the anticipated start and end dates for such subcontracts. For each item, indicate whether the work is designated for participation by an M/WBE. Where the contracting agency's solicitation has indicated a requirement that the bidder or proposer specifically identify the contact information of all M/WBEs they intend to use on this contract, vendors must also include the M/WBE vendor name, address and telephone number in the space provided below. Use additional sheets if necessary.

**Section 5: Vendor Certification and Required Affirmations**

I hereby:

- acknowledge my understanding of the M/WBE participation requirements as set forth herein and the pertinent provisions of Section 6-129 of the Administrative Code of the City of New York ("Section 6-129"), and the rules promulgated thereunder;
- affirm that the information supplied in support of this M/WBE Utilization Plan is true and correct;
- agree, if awarded this Contract, to comply with the M/WBE participation requirements of this Contract, the pertinent provisions of Section 6-129, and the rules promulgated thereunder, all of which shall be deemed to be material terms of this Contract;
- agree and affirm that it is a material term of this Contract that the Vendor will award the total dollar value of the M/WBE Participation Goals to certified MBEs and/or WBEs, unless a full waiver is obtained or such Goals are modified by the Agency; and
- agree and affirm, if awarded this Contract, to make all reasonable, good faith efforts to meet the M/WBE Participation Goals, or if a partial waiver is obtained or such Goals are modified by the Agency, to meet the modified Participation Goals by soliciting and obtaining the participation of certified MBE and/or WBE firms.

**Section 4: General Contract Information**

**What is the expected percentage of the total contract dollar value that you expect to award in subcontracts for services, regardless of M/WBE status?**

32 %

Enter a brief description of the type(s) and dollar value of subcontracts for all services you plan to subcontract if awarded this contract, along with the anticipated start and end dates for such subcontracts. For each item, indicate whether the work is designated for participation by an M/WBE. Where the contracting agency's solicitation has indicated a requirement that the bidder or proposer specifically identify the contract information of all M/WBEs they intend to use on this contract, vendors must also include the M/WBE vendor name, address and telephone number in the space provided below. Use additional sheets if necessary.

	Description of Work	Start Date (MM/YY)	End Date (MM/YY)	Planned \$ Amount	Designated for M/WBE		M/WBE Vendor Name	M/WBE Address	M/WBE Telephone

# SCHEDULE B – Part 3

## Request for Waiver of M/WBE Participation Requirement

**Contract Overview**

Tax ID# \_\_\_\_\_ FMS Vendor ID# \_\_\_\_\_  
 Business Name \_\_\_\_\_ Contact Name \_\_\_\_\_  
 Email \_\_\_\_\_ Telephone \_\_\_\_\_  
 Contracting Agency \_\_\_\_\_  
 APT E-Pin# \_\_\_\_\_ Bid/Proposal Due Date \_\_\_\_\_

**M/WBE Participation Goals for Services**

Defined by AGENCY in bid/solicitation documents  
 Percent of the total contract value to be subcontracted to M/WBE vendors for services and/or credited to an M/WBE Qualified Joint Venture.

Unspecified \_\_\_\_\_ %  
 Black American \_\_\_\_\_ %  
 Hispanic American \_\_\_\_\_ %  
 Asian American \_\_\_\_\_ %  
 Women \_\_\_\_\_ %

**Total Participation Goals \_\_\_\_\_ %**

**Basis for Waiver Request: Check appropriate box & explain in detail below (attach additional pages if needed)**

- Vendor does not subcontract services, and has the capacity and good faith intention to perform all such work itself with its own employees.
- Vendor subcontracts some of this type of work but at a lower % than bid/solicitation describes, and has the capacity and good faith intention to do so on this contract. Identify your subcontracting plan in the vendor certification section below.
- Vendor has other legitimate business reasons for proposing the M/WBE Participation Goal requested here. Explain under separate cover.

Proposed by VENDOR seeking waiver  
 Percent of the total contract value anticipated in good faith by the bidder/proposer to be subcontracted to M/WBE businesses for services. Or if M/WBE Qualified Joint Venture, percent of total contract value anticipated to be credited to M/WBE vendor(s).

Unspecified \_\_\_\_\_ %  
 Black American \_\_\_\_\_ %  
 Hispanic American \_\_\_\_\_ %  
 Asian American \_\_\_\_\_ %  
 Women \_\_\_\_\_ %

**Total Participation Goals \_\_\_\_\_ %**

**Vendor Contract History**

Using the attached Excel template, list all contracts (for City and Non-City work) performed within the last 3 years and provide the requested information for each contract.

From the list of all contracts, provide reference information below for the 5 most relevant contracts in size, scale and scope (performed for New York City or any other entity) to the bid or proposal for which you are submitting this waiver request. Provide the requested information for each subcontract awarded during the life of the listed reference contract.

Please make sure to highlight the 5 reference contracts provided below among the comprehensive list of all your contract awards within the attached Excel template.

**Reference 1**

Agency/Organization \_\_\_\_\_ Contract # \_\_\_\_\_  
 Reference Contact \_\_\_\_\_ Telephone \_\_\_\_\_ Email \_\_\_\_\_  
 Contract Start Date \_\_\_\_\_ Contract End Date \_\_\_\_\_ Total Contract Value \$ \_\_\_\_\_

**Prime Contract description**

Did the vendor perform as a Prime Contractor or as a Subcontractor?  Prime Contractor  Subcontractor  
 Was the Prime Contract subject to any Goals?  City M/WBE Goals  State Goals  Federal Goals  No Applicable Goals  
 Did the Prime Contractor meet Goal requirements?  Yes  No  N/A

If the Prime Contractor did not meet Goal requirements or contract is still ongoing, please explain

If you performed as the Prime Contractor, please provide a description and value of all work subcontracted to other vendors.	\$ _____
	\$ _____
	\$ _____
	\$ _____
	\$ _____
	\$ _____
	\$ _____
Percentage of total contract value subcontracted to other vendors	_____ %

If you performed as the Subcontractor, please provide a description and value of work areas you self-performed. \$ \_\_\_\_\_

## **APPRENTICESHIP PROGRAM REQUIREMENTS**

Bidders are advised that the Apprenticeship Program Requirements set forth below apply to each contract for which a "X" is indicated before the word "Yes". Compliance with these requirements will be determined solely by the City.

  X   YES             NO

### **(1) Apprenticeship Program Requirements**

Notice to Bidders: Please be advised that, pursuant to the authority granted to the City under Labor Law Section 816-b, the Department of Design and Construction hereby requires that the contractor awarded a contract as a result of this Invitation for Bids, and any of its subcontractors with subcontracts worth two million dollars or over, have, prior to entering into such contract or subcontract, apprenticeship agreements appropriate for the type and scope of work to be performed that have been registered with, and approved by, the New York State Commissioner of Labor. In addition, the contractor and its subcontractors will be required to show that such apprenticeship program/s have successfully passed the two year Probation period following the initial registration date of such program/s with the New York State Department of Labor.

The failure to prove, upon request, that these requirements have been met shall result in the contract not being awarded to the contractor or the subcontract not being approved.

Please be further advised that, pursuant to Labor Law Section 220, the allowable ratio of apprentices to journeypersons in any craft classification shall not be greater than the ratio permitted to the contractor as to its workforce on any job under the registered apprenticeship program.

### **(2) Apprenticeship Program Questionnaire**

The bidder must submit a completed and signed Apprenticeship Program Questionnaire. The Questionnaire is set forth on the following pages of the Bid Booklet.

## APPRENTICESHIP PROGRAM QUESTIONNAIRE ("APQ")

Bidder Name: IPC Resiliency Partners

Project ID Number SANDRESM1

The Bidder MUST complete, sign and submit this Apprenticeship Program Questionnaire with its bid.

1. Does the bidder have any Apprenticeship Program agreement(s) appropriate for the type and scope of work to be performed? (Note: Participation may be by either direct sponsorship or through collective bargaining agreement(s).)

YES                       NO

2. Has/have the bidder's Apprenticeship Program agreement(s) been registered with, and approved by the New York State Commissioner of Labor ("NYSDOL Commissioner")?

YES                       NO

3. Has/have the bidder's Apprenticeship Program successfully passed the two-year Probation period following its initial registration with the New York State Department of Labor ("NYSDOL")?

YES                       NO

If the answers to Questions 1, 2, and 3 are "Yes". The bidder shall, in the space below (and/or attached herewith where applicable), provide the contact information for such Apprenticeship Program(s) as well as information demonstrating that such Apprenticeship Program(s) have passed the two-year Probation period following its initial registration with the NYSDOL. (The bidder may attach additional pages if necessary).

- **Where the bidder directly sponsors any such apprenticeship Program(s), the bidder shall provide the following:**
  - The trade classification(s) covered by such program(s), and the date(s) such program(s) was/were approved by the NYSDOL Commissioner; and/or
  - A copy of a letter(s) from the NYSDOL, on NYSDOL's letterhead, executed by an official thereof, which verifies/verify the trade classification(s) covered by such program(s), and the date(s) such program(s) was/were approved by the NYSDOL Commissioner and the Active status of such program(s).
  
- **Where the bidder participates in any such Apprenticeship Program(s) through its membership in an employer organization(s) that directly sponsors such program(s) or where the employer association(s) participates in such program(s) through collective bargaining, the bidder shall provide the following:**
  - The contact information for the employer organization(s), and the apprenticeable trade(s) covered pursuant to the bidder's affiliation therewith, and the date such program(s) was/were approved by the NYSDOL Commissioner; or
  - A letter(s) from such employer organization(s), on letterhead of such organization(s), executed by an officer, delegate or official thereof, which verifies/verify the trade classification(s) covered by such program(s) was/were approved by the NYSDOL Commissioner, and that the bidder is both a member in good standing of the identified employer organization and is subject to the provisions of the Apprenticeship Program agreement(s) sponsored thereby.

**PROJECT REFERENCE FORMS**

A. PROJECT REFERENCES – CONTRACTS COMPLETED BY THE BIDDER

List all contracts substantially completed within the last four (4) years, up to a maximum of 10 projects, in descending order of date of substantial completion.

1	Trunk Watermain - 48" - East New York Avenue	BED776	Brooklyn	G.C.	\$ 77,221,635	TBD	\$ -	TBD	NYCDDC	TBD	TBD	TBD

**(NO TEXT ON THIS PAGE)**

The Bidder must indicate its Intrastate and Interstate EMR for the past three years. [Note: For contractors with less than three years of experience, the EMR will be considered to be 1.00].

YEAR	INTRASTATE RATE	INTERSTATE RATE
2021	.75	N/A
2020	.91	N/A
2019	1.00	N/A

*2019*

*1.00*

*N/A*

If the Intrastate and/or Interstate EMR for any of the past three years is greater than 1.00, the Bidder / Contractor must attach, to this questionnaire, a written explanation for the rating and identify what corrective action was taken to correct the situation resulting in that rating.

**4. OSHA Information:**

YES     NO    Contractor has received a willful violation issued by OSHA or a New York City Department of Buildings (NYCDOB) construction-related violation within the last three years.

YES     NO    Contractor has had an incident requiring OSHA notification within 8 hours (all work-related fatalities) or an incident requiring OSHA notification within 24 hours (work-related in-patient hospitalization, amputation and all loss of an eye).

The OSHA Form 300 "Log of Work-Related Injuries and Illnesses" and OSHA Form 300A "Summary of Work-Related Injuries and Illnesses" must be submitted for the last three years for Contractors with more than ten employees.

The Bidder / Contractor must indicate the total number of hours worked by its employees, as reflected in payroll records for the past three (3) years.

The Bidder / Contractor must submit the Incident Rate for Lost Time Injuries (the Incident Rate) for the past three (3) years. The Incident Rate is calculated in accordance with the formula set forth below. For each given year, the total number of incidents is the total number of non-fatal injuries and illnesses reported on the OSHA Form 300 and OSHA Form 300A. The 200,000 hours represents the equivalent of 100 employees working forty hours a week, fifty (50) weeks per year.

$$\text{Incident Rate} = \frac{\text{Total Number of Incidents} \times 200,000}{\text{Total Number of Hours Worked by Employees}}$$

YEAR	TOTAL NUMBERS OF HOURS WORKED BY EMPLOYEES	INCIDENT RATE
2020	225,250	4.4
2019	66,540	3.0
2018	8,231	0

The Bidder must indicate its Intrastate and Interstate EMR for the past three years. [Note: For contractors with less than three years of experience, the EMR will be considered to be 1.00].

YEAR	INTRASTATE RATE	INTERSTATE RATE
<u>2021-2022</u>	<u>N/A</u>	<u>0.99</u>
<u>2020-2021</u>	<u>N/A</u>	<u>0.85</u>
<u>2019-2020</u>	<u>N/A</u>	<u>0.79</u>
<u>2018-2019</u> <i>RAJ</i>	<u>N/A</u>	<u>0.90</u>

If the Intrastate and/or Interstate EMR for any of the past three years is greater than 1.00, the Bidder / Contractor must attach, to this questionnaire, a written explanation for the rating and identify what corrective action was taken to correct the situation resulting in that rating.

2017-2018 *RAJ* N/A 0.84

**4. OSHA Information:**

- YES  NO Contractor has received a willful violation issued by OSHA or a New York City Department of Buildings (NYCDOB) construction-related violation within the last three years.
- YES  NO Contractor has had an incident requiring OSHA notification within 8 hours (all work-related fatalities) or an incident requiring OSHA notification within 24 hours (work-related in-patient hospitalization, amputation and all loss of an eye).

The OSHA Form 300 "Log of Work-Related Injuries and Illnesses" and OSHA Form 300A "Summary of Work-Related Injuries and Illnesses" must be submitted for the last three years for Contractors with more than ten employees.

The Bidder / Contractor must indicate the total number of hours worked by its employees, as reflected in payroll records for the past three (3) years.

The Bidder / Contractor must submit the Incident Rate for Lost Time Injuries (the Incident Rate) for the past three (3) years. The Incident Rate is calculated in accordance with the formula set forth below. For each given year, the total number of incidents is the total number of non-fatal injuries and illnesses reported on the OSHA Form 300 and OSHA Form 300A. The 200,000 hours represents the equivalent of 100 employees working forty hours a week, fifty (50) weeks per year.

$$\text{Incident Rate} = \frac{\text{Total Number of Incidents} \times 200,000}{\text{Total Number of Hours Worked by Employees}}$$

YEAR	TOTAL NUMBERS OF HOURS WORKED BY EMPLOYEES	INCIDENT RATE
<u>2020</u>	<u>247,670</u>	<u>3.23</u>
<u>2019</u>	<u>204,974</u>	<u>0.98</u>
<u>2018</u>	<u>272,325</u>	<u>4.4</u>

**If the Bidder's / Contractor's Incident Rate for any of the past three years is one point higher than the Incident Rate for the type of construction it performs (listed below), the Bidder / Contractor must attach, to this questionnaire, a written explanation for the relatively high rate.**

General Building Construction .....	8.5
Residential Building Construction .....	7.0
Nonresidential Building Construction .....	10.2
Heavy Construction, except building.....	8.7
Highway and Street Construction .....	9.7
Heavy Construction, except highways .....	8.3

Concrete Work.....	8.6
Specialty Trade Contracting.....	8.6

**5. Safety Performance on Previous DDC Project(s)**

YES     NO    Fatality or an incident requiring OSHA notification within 24 hours (work-related in-patient hospitalization, amputation and all loss of an eye) on DDC Project(s) within the last three (3) years.

DDC Project Number(s): \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_

The Bidder hereby affirms that all the information provided in this Safety Questionnaire and all additional pages and/or attachments, if applicable, consist of accurate representations.

Date: 3/11/2021                      By:   
(Signature of Bidder: Owner, Partner, Corporate Officer)

Title: President

## **SAFETY QUESTIONNAIRE**

The Bidder must include, with its bid, all information requested on this Safety Questionnaire. Failure to provide a completed and signed Safety Questionnaire at the time of bid opening may result in disqualification of the bid as non-responsive. This Safety Questionnaire will be reviewed as per Section V of the Safety Requirements for Construction Contracts, found in Volume 2 of the Contract.

**1. Bidder Information:**

Company Name: Welkin Mechanical LLC  
 DDC Project Number: SANDRESM1  
 Company Size:      Ten (10) employees or less  
                            Greater than ten (10) employees  
 Company has previously worked for DDC:    YES            NO

**2. Type(s) of Construction Work:**

Identify the types of work that the Bidder has performed in the last three years, and the types of work that are part of this Contract.

<u>TYPE OF WORK</u>	<u>LAST 3 YEARS</u>	<u>THIS PROJECT</u>
General Building Construction	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Residential Building Construction	<input type="checkbox"/>	<input type="checkbox"/>
Nonresidential Building Construction	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Heavy Construction, except building	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Highway and Street Construction	<input type="checkbox"/>	<input type="checkbox"/>
Heavy Construction, except highways	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Plumbing, Heating, HVAC	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Painting and Paper Hanging	<input type="checkbox"/>	<input type="checkbox"/>
Electrical Work	<input type="checkbox"/>	<input type="checkbox"/>
Masonry, Stonework and Plastering	<input type="checkbox"/>	<input type="checkbox"/>
Carpentry and Floor Work	<input type="checkbox"/>	<input type="checkbox"/>
Roofing, Siding, and Sheet Metal	<input type="checkbox"/>	<input type="checkbox"/>
Concrete Work	<input type="checkbox"/>	<input type="checkbox"/>
Specialty Trade Contracting	<input type="checkbox"/>	<input type="checkbox"/>
Asbestos Abatement	<input type="checkbox"/>	<input type="checkbox"/>
Other (specify) _____	<input type="checkbox"/>	<input type="checkbox"/>

**3. Experience Modification Rate:**

The Experience Modification Rate (EMR) is a rating generated by the National Council of Compensation Insurance (NCCI). This rating is used to determine the contractor's premium for worker's compensation insurance. The Bidder / Contractor may obtain its EMR by contacting its insurance broker or the NCCI. If the Bidder cannot obtain its EMR, it must submit a written explanation as to why.

The Bidder must indicate its Intrastate and Interstate EMR for the past three years. [Note: For contractors with less than three years of experience, the EMR will be considered to be 1.00].

YEAR	INTRASTATE RATE	INTERSTATE RATE
2020 - 2021	N/A	0.85
2019 - 2020	N/A	0.79
2018 - 2019	N/A	1.01
<i>2017-2018</i>	<i>N/A</i>	<i>0.84 SA</i>

If the Intrastate and/or Interstate EMR for any of the past three years is greater than 1.00, the Bidder / Contractor must attach, to this questionnaire, a written explanation for the rating and identify what corrective action was taken to correct the situation resulting in that rating.

4. OSHA Information:

YES  NO Contractor has received a willful violation issued by OSHA or a New York City Department of Buildings (NYCDOB) construction-related violation within the last three years.

YES  NO *PAS* Contractor has had an incident requiring OSHA notification within 8 hours (all work-related fatalities) or an incident requiring OSHA notification within 24 hours (work-related in-patient hospitalization, amputation and all loss of an eye).

The OSHA Form 300 "Log of Work-Related Injuries and Illnesses" and OSHA Form 300A "Summary of Work-Related Injuries and Illnesses" must be submitted for the last three years for Contractors with more than ten employees.

The Bidder / Contractor must indicate the total number of hours worked by its employees, as reflected in payroll records for the past three (3) years.

The Bidder / Contractor must submit the Incident Rate for Lost Time Injuries (the Incident Rate) for the past three (3) years. The Incident Rate is calculated in accordance with the formula set forth below. For each given year, the total number of incidents is the total number of non-fatal injuries and illnesses reported on the OSHA Form 300 and OSHA Form 300A. The 200,000 hours represents the equivalent of 100 employees working forty hours a week, fifty (50) weeks per year.

$$\text{Incident Rate} = \frac{\text{Total Number of Incidents} \times 200,000}{\text{Total Number of Hours Worked by Employees}}$$

YEAR	TOTAL NUMBERS OF HOURS WORKED BY EMPLOYEES	INCIDENT RATE
2020	180,442	2.2
2019	171,441	<del>1.16</del> 0 <i>PAS</i>
2018	142,164	<del>1.4</del> 0 <i>PAS</i>

## **SAFETY QUESTIONNAIRE**

The Bidder must include, with its bid, all information requested on this Safety Questionnaire. Failure to provide a completed and signed Safety Questionnaire at the time of bid opening may result in disqualification of the bid as non-responsive. This Safety Questionnaire will be reviewed as per Section V of the Safety Requirements for Construction Contracts, found in Volume 2 of the Contract.

### 1. Bidder Information:

Company Name: Posillico Civil, Inc.

DDC Project Number: SANDRESM1

Company Size:       Ten (10) employees or less  
                            Greater than ten (10) employees

Company has previously worked for DDC:    YES       NO

### 2. Type(s) of Construction Work:

Identify the types of work that the Bidder has performed in the last three years, and the types of work that are part of this Contract.

<u>TYPE OF WORK</u>	<u>LAST 3 YEARS</u>	<u>THIS PROJECT</u>
General Building Construction	<input type="checkbox"/>	<input type="checkbox"/>

## **SAFETY QUESTIONNAIRE**

The Bidder must include, with its bid, all information requested on this Safety Questionnaire. Failure to provide a completed and signed Safety Questionnaire at the time of bid opening may result in disqualification of the bid as non-responsive. This Safety Questionnaire will be reviewed as per Section V of the Safety Requirements for Construction Contracts, found in Volume 2 of the Contract.

### 1. Bidder Information:

Company Name: CAC TPO JUSTICE INCDDC Project Number: SANDRESM1

Company Size:  Ten (10) employees or less  
 Greater than ten (10) employees

Company has previously worked for DDC:  YES  NO

### 2. Type(s) of Construction Work:

Identify the types of work that the Bidder has performed in the last three years, and the types of work that are part of this Contract.

<u>TYPE OF WORK</u>	<u>LAST 3 YEARS</u>	<u>THIS PROJECT</u>
General Building Construction	<input type="checkbox"/>	<input type="checkbox"/>
Residential Building Construction	<input type="checkbox"/>	<input type="checkbox"/>
Nonresidential Building Construction	<input type="checkbox"/>	<input type="checkbox"/>
Heavy Construction, except building	<input type="checkbox"/>	<input type="checkbox"/>
Highway and Street Construction	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Heavy Construction, except highways	<input type="checkbox"/>	<input type="checkbox"/>
Plumbing, Heating, HVAC	<input type="checkbox"/>	<input type="checkbox"/>
Painting and Paper Hanging	<input type="checkbox"/>	<input type="checkbox"/>
Electrical Work	<input type="checkbox"/>	<input type="checkbox"/>
Masonry, Stonework and Plastering	<input type="checkbox"/>	<input type="checkbox"/>
Carpentry and Floor Work	<input type="checkbox"/>	<input type="checkbox"/>
Roofing, Siding, and Sheet Metal	<input type="checkbox"/>	<input type="checkbox"/>
Concrete Work	<input type="checkbox"/>	<input type="checkbox"/>
Specialty Trade Contracting	<input type="checkbox"/>	<input type="checkbox"/>
Asbestos Abatement	<input type="checkbox"/>	<input type="checkbox"/>
Other (specify) _____	<input type="checkbox"/>	<input type="checkbox"/>

### 3. Experience Modification Rate:

The Experience Modification Rate (EMR) is a rating generated by the National Council of Compensation Insurance (NCCI). This rating is used to determine the contractor's premium for worker's compensation insurance. The Bidder / Contractor may obtain its EMR by contacting its insurance broker or the NCCI. If the Bidder cannot obtain its EMR, it must submit a written explanation as to why.

The Bidder must indicate its Intrastate and Interstate EMR for the past three years. [Note: For contractors with less than three years of experience, the EMR will be considered to be 1.00].

YEAR	INTRASTATE RATE	INTERSTATE RATE
<u>2020</u>	<u>.92</u>	<u>N/A</u>
<u>2019</u>	<u>.85</u>	<u>↓</u>
<u>2018</u>	<u>.82</u>	<u>↓</u>

If the Intrastate and/or Interstate EMR for any of the past three years is greater than 1.00, the Bidder / Contractor must attach, to this questionnaire, a written explanation for the rating and identify what corrective action was taken to correct the situation resulting in that rating.

**4. OSHA Information:**

- YES     NO    Contractor has received a willful violation issued by OSHA or a New York City Department of Buildings (NYCDOB) construction-related violation within the last three years.
- YES     NO    Contractor has had an incident requiring OSHA notification within 8 hours (all work-related fatalities) or an incident requiring OSHA notification within 24 hours (work-related in-patient hospitalization, amputation and all loss of an eye).

The OSHA Form 300 "Log of Work-Related Injuries and Illnesses" and OSHA Form 300A "Summary of Work-Related Injuries and Illnesses" must be submitted for the last three years for Contractors with more than ten employees.

The Bidder / Contractor must indicate the total number of hours worked by its employees, as reflected in payroll records for the past three (3) years.

The Bidder / Contractor must submit the Incident Rate for Lost Time Injuries (the Incident Rate) for the past three (3) years. The Incident Rate is calculated in accordance with the formula set forth below. For each given year, the total number of incidents is the total number of non-fatal injuries and illnesses reported on the OSHA Form 300 and OSHA Form 300A. The 200,000 hours represents the equivalent of 100 employees working forty hours a week, fifty (50) weeks per year.

Incident Rate = 
$$\frac{\text{Total Number of Incidents X 200,000}}{\text{Total Number of Hours Worked by Employees}}$$

YEAR	TOTAL NUMBERS OF HOURS WORKED BY EMPLOYEES	INCIDENT RATE
<u>2020</u>	<u>759,621</u>	<u>0.52</u>
<u>2019</u>	<u>796,912</u>	<u>0.50</u>
<u>2018</u>	<u>793,504</u>	<u>1.51</u>

If the Bidder's / Contractor's Incident Rate for any of the past three years is one point higher than the Incident Rate for the type of construction it performs (listed below), the Bidder / Contractor must attach, to this questionnaire, a written explanation for the relatively high rate.

General Building Construction .....	8.5
Residential Building Construction .....	7.0
Nonresidential Building Construction .....	10.2
Heavy Construction, except building .....	8.7
Highway and Street Construction .....	9.7
Heavy Construction, except highways .....	8.3
Plumbing, Heating, HVAC .....	11.3
Painting and Paper Hanging .....	6.9
Electrical Work .....	9.5
Masonry, Stonework and Plastering .....	10.5
Carpentry and Floor Work .....	12.2
Roofing, Siding, and Sheet Metal .....	10.3
Concrete Work .....	8.6
Specialty Trade Contracting .....	8.6

**5. Safety Performance on Previous DDC Project(s)**

YES  NO Fatality or an incident requiring OSHA notification within 24 hours (work-related in-patient hospitalization, amputation and all loss of an eye) on DDC Project(s) within the last three (3) years.

DDC Project Number(s): \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_

The Bidder hereby affirms that all the information provided in this Safety Questionnaire and all additional pages and/or attachments, if applicable, consist of accurate representations.

**(NO TEXT ON THIS PAGE)**

## **IRAN DIVESTMENT ACT COMPLIANCE RIDER**

### **FOR NEW YORK CITY CONTRACTORS**

The Iran Divestment Act of 2012, effective as of April 12, 2012, is codified at State Finance Law (“SFL”) §165-a and General Municipal Law (“GML”) §103-g. The Iran Divestment Act, with certain exceptions, prohibits municipalities, including the City, from entering into contracts with persons engaged in investment activities in the energy sector of Iran. Pursuant to the terms set forth in SFL §165-a and GML §103-g, a person engages in investment activities in the energy sector of Iran if:

- (a) The person provides goods or services of twenty million dollars or more in the energy sector of Iran, including a person that provides oil or liquefied natural gas tankers, or products used to construct or maintain pipelines used to transport oil or liquefied natural gas, for the energy sector of Iran; or
- (b) The person is a financial institution that extends twenty million dollars or more in credit to another person, for forty-five days or more, if that person will use the credit to provide goods or services in the energy sector in Iran and is identified on a list created pursuant to paragraph (b) of subdivision three of Section 165-a of the State Finance Law and maintained by the Commissioner of the Office of General Services.

A bid or proposal shall not be considered for award nor shall any award be made where the bidder or proposer fails to submit a signed and verified bidder’s certification.

Each bidder or proposer must certify that it is not on the list of entities engaged in investment activities in Iran created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law. In any case where the bidder or proposer cannot certify that they are not on such list, the bidder or proposer shall so state and shall furnish with the bid or proposal a signed statement which sets forth in detail the reasons why such statement cannot be made. The City of New York may award a bid to a bidder who cannot make the certification on a case by case basis if:

- (1) The investment activities in Iran were made before the effective date of this section (i.e., April 12, 2012), the investment activities in Iran have not been expanded or renewed after the effective date of this section and the person has adopted, publicized and is implementing a formal plan to cease the investment activities in Iran and to refrain from engaging in any new investments in Iran: or
- (2) The City makes a determination that the goods or services are necessary for the City to perform its functions and that, absent such an exemption, the City would be unable to obtain the goods or services for which the contract is offered. Such determination shall be made in writing and shall be a public document.

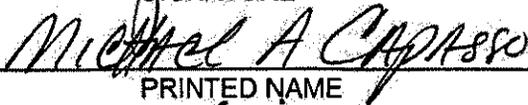

**BIDDER'S CERTIFICATION OF COMPLIANCE WITH  
IRAN DIVESTMENT ACT**

Pursuant to General Municipal Law Section 103-g, which generally prohibits the City from entering into contracts with persons engaged in investment activities in the energy sector of Iran, the bidder/proposer submits the following certification:

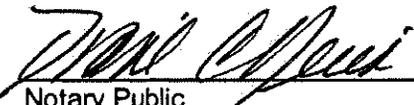

[Please Check One]

**BIDDER'S CERTIFICATION**

- By submission of this bid or proposal, each bidder/proposer and each person signing on behalf of any bidder/proposer certifies, and in the case of a joint bid each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief, that each bidder/proposer is not on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law.
  
- I am unable to certify that my name and the name of the bidder/proposer does not appear on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law. I have attached a signed statement setting forth in detail why I cannot so certify.

## **B. BID SCHEDULE (B-PAGES)**

The following pages contain the Bid Schedule. Items listed in the Bid Schedule shall comply with the requirements of the corresponding sections of the specifications detailed in the table below. All references to the Standard Specifications, Details, Standards and Drawings shall be to the version in effect at the time of bid.

**NOTES:**

- “XXX” in the table below signifies any possible combination of characters and spaces.
- The table below may contain item formats which are not included in the Bid Schedule.  
***Please refer to the Bid Schedule to determine which specifications apply.***

Item Number Format	Applicable Specifications
4.XXX 6.XXX 7.XXX 8.XXX <i>(Except 8.01 XXX; see below)</i> 9.XXX HW-XXX	NYC Department of Transportation (“DOT”) Standard Highway Specifications, as amended in the R-Pages, located in Volume 3 of 3 herein;  <p style="text-align: center;"><b>AND</b></p> NYC DOT Standard Details of Construction;  <p style="text-align: center;"><b>OR,</b></p> <b><i>if the item is not contained within the Standard Specifications,</i></b> then see the applicable New Sections in the I-Pages, located in Volume 3 of 3 herein.
1.XXX 50.XXX through 55.XXX 60.XXX through 66.XXX 70.XXX through 79.XXX <i>(Except 79.11XXX; see below)</i> DSS XXX DSW XXX	NYC Department of Environmental Protection (“DEP”) Standard Sewer and Water Main Specifications, as amended in the R-Pages and SW-Pages, located in Volume 3 of 3 herein;  <p style="text-align: center;"><b>AND</b></p> NYC DEP Specifications for Trunk Main Work;  <p style="text-align: center;"><b>AND</b></p> NYC DEP Sewer Design Standards;  <p style="text-align: center;"><b>AND</b></p> NYC DEP Water Main Standard Drawings;  <p style="text-align: center;"><b>OR,</b></p> <b><i>if the item is not contained within the Standard Specifications,</i></b> then see the Amendments to the Standard Sewer and Water Main Specifications in the SW-Pages, located in Volume 3 of 3 herein.
GI-XXX PM-XXX ROW XXX	New Sections in the I-Pages, located in Volume 3 of 3 herein  <p style="text-align: center;"><b>AND</b></p> NYC DEP Standards for Green Infrastructure.
UTL-XXX	Gas Cost Sharing Standard Specifications in the EP7-Pages, located in Volume 3 of 3 herein.

Item Number Format	Applicable Specifications
83X.XXX MX.XXX MP XXX NYC-XXX NYCT-XXX NYPD-XXX P XXX PK-XXX	New Sections in the I-Pages, located in Volume 3 of 3 herein.
BMP-XXX	Specifications for Construction of Best Management Practice (BMP) and Mitigation Area in the BMP-Pages, located in Volume 3 of 3 herein.
E XXX ME XXX	Specifications for the Specialty Electrical Works in the EL-Pages, located in Volume 3 of 3 herein.
SL-XXX	NYC DOT Division of Street Lighting Specifications <p style="text-align: center;"><b>AND</b></p> NYC Division of Street Lighting Standard Drawings.
T-XXX	NYC DOT Specifications for Traffic Signals and Intelligent Transportation Systems <p style="text-align: center;"><b>AND</b></p> NYC DOT Traffic Signal Standard Drawings.
JB XXX	Joint Bid Specifications in the JB-Pages, located in Volume 3 of 3 herein.
8.01 XXX	Specifications for Handling, Transportation and Disposal of Nonhazardous and Potentially Hazardous Contaminated Materials in the HAZ-Pages, located in Volume 3 of 3 herein.
67.XXX	Specifications for Abatement of Coal Tar Wrap Asbestos Containing Materials in the ASB-Pages, located in Volume 3 of 3 herein.
79.11XXX	Specifications for Abatement of Transit Authority Duct Insulation Asbestos Containing Materials in the ASB-Pages, located in Volume 3 of 3 herein.

## BID SCHEDULE

- NOTE:** (1) The Agency may reject a bid if it contains unbalanced bid prices. An unbalanced bid is considered to be one containing lump sum or unit items which do not reflect reasonable actual costs plus a reasonable proportionate share of the Bidder's anticipated profit, overhead costs, and other indirect costs, anticipated for the performance of the items in question.
- (2) The following bid prices on Unit Price Contracts are to be paid for the actual quantities of the item numbers in the completed work or structure, and they cover the cost of all work, labor, material, tools, plant and appliances of every description necessary to complete the entire work, as specified, and the removal of all debris, temporary work and appliances.
- (3) PLEASE BE SURE A LEGIBLE BID IS ENTERED, IN INK, FOR EACH ITEM.  
Alterations must be initialed in ink by the bidder.
- (4) The Extended Amount entered in Column 6 shall be the product of the Estimated Quantity in Column 3 times the Unit Price Bid in Column 5.
- (5) Prospective bidders must examine the Bid Schedule carefully and, before bidding, must advise the Commissioner, in writing, if any pages are missing, and must request that such missing pages be furnished them. The pages of this Bid Schedule are numbered consecutively, as follows:  
B - 3 [REVISION # 1] Through B - 150 [REVISION # 1]

PLEASE BE SURE A LEGIBLE BID IS ENTERED FOR EACH ITEM.  
THE BIDDER SHALL INSERT THE TOTAL BID PRICE IN  
THE BID FORM IN THIS BID BOOKLET.

### NYCDOT Standard Details of Construction

DRAWING NO.	DESCRIPTION
H-1003B	PEDESTRIAN CROSSWALKS-MALL TYPE B
H-1004	TYPICAL TEMPORARY PEDESTRIAN PASSAGEWAY IN ROADWAY AREA DURING CONSTRUCTION
H-1005	BUS STOP IN NEW ROADWAY
H-1010	STEEL FACED CONCRETE CURB, STEEL FACING TYPE D
H-1011	SIDEWALK PEDESTRIAN RAMPS
H-1012	TIMBER CURB
H-1013	ILLUMINATED TIMBER BARRICADE
H-1014	TEMPORARY PEDESTRIAN STEEL BARRICADE
H-1015	STEEL FACED DROP CURB DRIVEWAYS
H-1017	BAR PICKET FENCE (4'-0" HIGH)
H-1034	TYPICAL CONSTRUCTION JOINTS FOR CONCRETE BASE FOR PAVEMENT
H-1036	CONCRETE POURED-IN-PLACE MALL CURB
H-1037	UNDER SIDEWALK DRAIN
H-1038	TYPE III BREAKAWAY BARRICADE
H-1040	TRANSVERSE CONSTRUCTION JOINTS FOR CONCRETE BASE
H-1044	CONCRETE CURB
H-1045	CONCRETE SIDEWALK
H-1046	STREET TREE PLANTING DETAIL TYPE 1
H-1046A	PROTECTIVE TREE BARRIER
H-1047	TYPICAL CURB DETAIL AT EXISTING TREES
H-1049	PLASTIC BARREL
H-1051	TEMPORARY WOODEN STEPS
H-1053	DETAILS FOR CONSTRUCTING AREAS OF ADJUSTMENT AND TRANSITION SECTIONS
H-1054	LIMITS OF MEASUREMENT FOR PAYMENT OF TEMPORARY ASPHALT PAVEMENT

<b>DRAWING NO.</b>	<b>DESCRIPTION</b>
H-1055	PAVEMENT KEY TYPE A, B-1, B-2, C
H-1057	TEMPORARY STORAGE AREA
MS-1000	NEW YORK CITY COMPARISON OF DATUM PLATES
MS-1001	SIDEWALK PAVEMENT LIMITS
MS-1003	TYPICAL ROADWAY CROSS-SECTION/RESURFACING
MS-1005	ADJUSTMENT AT CATCH BASINS

### **NYCDEP Sewer Design Standards**

<b>DRAWING NO.</b>	<b>DESCRIPTION</b>
SE1	STANDARD FOR VITRIFIED CLAY PIPE ON CONCRETE CRADLE ON EARTH OR ON ROCK
SE3	STANDARD FOR CIRCULAR REINFORCED CONCRETE PIPE ON CONCRETE CRADLE ON EARTH OR ON ROCK
SE11	STANDARD FOR MANHOLE ON 8" DIA. TO 30" DIA. PIPE SEWERS IN DRY LOCATION
SE12	STANDARD FOR MANHOLE ON 8" DIA. TO 30" DIA. PIPE SEWERS ON PILE IN DRY LOCATION
SE14	STANDARD FOR MANHOLE ON 8" DIA. TO 30" DIA. PIPE SEWERS IN WET LOCATION
SE28A, SE28B, SE28C, & SE28D	STANDARD FOR 4'-0" DIAMETER PRECAST MANHOLE (4 DWGS)
SE31A & SE31B	STANDARD FOR PRECAST MANHOLE DETAILS (2 DWGS)
SE32	STANDARD FOR ALTERNATE MONOLITHIC BASE SECTION FOR PRECAST MANHOLES (POURED IN PLACE)
SE35	STANDARD FOR REMOVABLE PRECAST REINFORCED CONCRETE SLAB
SE39	STANDARD FOR 27" DIAMETER CAST IRON MANHOLE FRAME AND COVER
SE40	STANDARD FOR 27" DIAMETER CAST IRON EXTENSION RING FOR 27" DIAMETER MANHOLE FRAME AND COVER
SE43	STANDARD FOR CAST IRON MANHOLE STEP
SE44	STANDARD FOR CAST IRON MANHOLE STEP (BOLT-ON TYPE)

<b>DRAWING NO.</b>	<b>DESCRIPTION</b>
SE45	STANDARD FOR CIRCULAR CAST IRON MANHOLE STEP (BOLT-ON TYPE)
SE46	STANDARD FOR PLASTIC MANHOLE STEP
SE47	STANDARD FOR TYPE 1 CATCH BASIN (WITH CURB PIECE)
SE48	STANDARD FOR TYPE 2 CATCH BASIN (WITHOUT CURB PIECE)
SE49B	STANDARD FOR TYPE 3 CATCH BASIN (WITH CURB PIECE)
SE52A & SE52B	STANDARD FOR PRECAST TYPE 1 CATCH BASIN (2 DWGS)
SE53A	STANDARD FOR PRECAST TYPE 2 CATCH BASIN
SE53B	STANDARD FOR SPLIT PRECAST TYPE 2 CATCH BASIN
SE54B	STANDARD FOR PRECAST TYPE 3 CATCH BASIN (WITH CURB PIECE)
SE55C	STANDARD FOR PRECAST DOUBLE CATCH BASIN
SE57	STANDARD FOR CAST IRON FRAME FOR CATCH BASINS (WITH CURB PIECE)
SE58A	STANDARD FOR CAST IRON FRAME FOR CATCH BASINS (WITHOUT CURB PIECE)
SE58B	STANDARD FOR CAST IRON FRAME FOR TYPE 3 CATCH BASINS (WITH CURB PIECE)
SE59A & SE59B	STANDARD FOR CAST IRON GRATING, BACK PLATE, AND CURB PIECE FOR CATCH BASINS (2 DWGS)
SE60	STANDARD FOR CAST IRON HOOD AND HOOKS FOR CATCH BASINS
SE61	STANDARD FOR DUCTILE IRON PIPE ALTERNATIVE
SE62	STANDARD FOR HOUSE CONNECTIONS
SE67	STANDARD FOR CONSTRUCTION OF CATCH BASIN (NO EXISTING CURB)
SE70	STANDARD FOR MINIMUM LOAD DIAGRAM FOR NON-WATERTIGHT SHEETING DESIGN
SE71	STANDARD FOR MINIMUM LOAD DIAGRAM FOR WATERTIGHT SHEETING DESIGN

## NYCDEP Water Main Standard Drawings

DRAWING NO.	DESCRIPTION
10240-A-Z	VALVE BOX SKIRT, CAST IRON
10241-A-Z	HYDRANT VALVE BOX, CAST IRON
11576-A-Z	FOUNDATIONS FOR VALVE BOXES
13547-B-Z	WIDE FLANGE MANHOLE HEAD & COVER, CAST IRON
22809-Z	HYDRANT DRAIN BASE
31050-Z	STANDARD METHODS FOR HYDRANT DRAINAGE, 31050-Z SUPERSEDES 11522-Z
44292-B-Z	GRAVEL OR BROKEN STONE BEDDING AND FILTER FABRIC INSTALLATION FOR DUCTILE CAST IRON PIPES
44387-Z-B	RODDING ALL SPECIAL CASTINGS, LEAD & MECHANICAL JOINTS ON LOW PRESSURE WATER MAINS, PUSH-ON JOINT PIPE
45161-A-Z	STANDARD STEEL HYDRANT FENDER
45700-W	STANDARD SUPPORTS FOR WATER MAINS INSTALLED AT SUBWAYS AND IN EXTREMELY YIELDING SOIL
46464-Z	METHOD FOR PROTECTING D.I. WATER MAINS WITH SHALLOW (LESS THAN 24") COVER
WM0401	PAVEMENT EXCAVATION LIMITS FOR PERMANENT RESTORATION IN STREETS NOT PROTECTED BY N.Y.C. ADM. CODE § 19.144, WATER MAINS 20" AND LESS IN DIAMETER
WM0402	PAVEMENT EXCAVATION LIMITS FOR PERMANENT RESTORATION IN STREETS PROTECTED BY N.Y.C. ADM. CODE § 19.144, WATER MAINS 20" AND LESS IN DIAMETER
WM0403	PAVEMENT EXCAVATION LIMITS FOR PERMANENT RESTORATION, WATER MAINS 24" AND LARGER IN DIAMETER

ADDENDUM NO. 1

DATED: 12/28/2020

THIS ADDENDUM IS HEREBY MADE A PART OF THE CONTRACT DOCUMENTS

1. **Refer** to Volume 3;  
**Incorporate** the attached revised specifications, as detailed in Attachment C.  
*[Number of attachments: 16 pages, 1 attachment]*

***Note the convention for SANDRESM1 Addenda. Not all Addenda will have all attachments.***

Attachment A – Non-Bid Schedule Changes to Volume 1

Attachment B – Changes to Bid Schedule (Volume 1)

Attachment C – Changes to Specifications (Volume 3)

Attachment D – Changes to Drawings

**END OF ADDENDUM NO. 1**

**By signing in the space provided below, the bidder acknowledges receipt of this Addendum consisting of one (1) page and SEVENTEEN (17) page of attachments.**

**THIS ADDENDUM MUST BE SIGNED BY ALL BIDDERS AND ATTACHED TO THEIR BID**

# NOTES

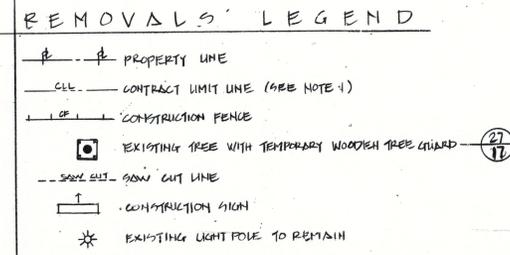

1. CONTRACT LIMIT LINE FOLLOWS LINE OF CONSTRUCTION FENCE UNLESS OTHERWISE NOTED.
2. ABANDONED UTILITY LINES TO BE REMOVED AS REQUIRED TO ACCOMMODATE NEW WORK.
3. THE CONTRACTOR IS TO USE EXTREME CARE DURING CONSTRUCTION TO AVOID DISTURBING OR DAMAGING ADJACENT FACILITIES AND PAVEMENTS. ANY DAMAGE RESULTING FROM THIS CONSTRUCTION WILL BE THE CONTRACTOR'S RESPONSIBILITY AND SHALL BE RESTORED AT THE CONTRACTOR'S EXPENSE TO THE SATISFACTION OF THE PARKS DEPARTMENT.
4. THE CONTRACTOR SHALL INSPECT THE SITE, VERIFY ALL DIMENSIONS AND EXISTING CONDITIONS PRIOR TO THE START OF WORK. ANY DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE PARKS DEPARTMENT.
5. SPECIAL CARE SHALL BE TAKEN TO PRESERVE ALL EXISTING TREES AND THEIR ROOT SYSTEMS DURING CONSTRUCTION. NO HEAVY MACHINES, EQUIPMENT, OR STOCK PILING OF MATERIAL IS PERMITTED WITHIN 15' RADII OF THE TRUNKS OR WITHIN DRIP LINE OF ALL EXISTING TREES.
6. ALL ABANDONED PIPES GREATER THAN 4" DIAMETER TO BE PLUGGED AT BOTH ENDS. TO BE PAID FOR UNDER THE ITEM "UNCLASSIFIED EXCAVATION".
7. CONTRACTOR IS TO CALL THE "ONE CALL CENTER" AT 1-800-272-4400 2 TO 10 DAYS PRIOR TO THE START OF EXCAVATION TO INFORM ALL UTILITY COMPANIES OF WORK TO BE PERFORMED.
8. CONTRACTOR SHALL TAKE APPROPRIATE CARE TO SAFEGUARD ALL UTILITIES DURING CONSTRUCTION OPERATIONS.
9. ALL TREES WITH TREE GUARDS SHALL RECEIVE COMPENSATORY PRUNING AND RESTORATION.
10. CONSTRUCTION SITE IS TO BE PROTECTED WITH AN 8'-0" CONSTRUCTION FENCE AS SHOWN ON PLAN. EXISTING CHAIN LINK FENCE 8'-0" OR HIGHER MAY SERVE AS A CONSTRUCTION FENCE. CONTRACTOR IS RESPONSIBLE TO KEEP CONSTRUCTION SITE SECURE FOR ENTIRE CONTRACT DURATION.
11. ALL CONCRETE CURBS UNDER FENCES TO BE REMOVED UNDER THE ITEM "UNCLASSIFIED EXCAVATION".
12. QUANTITIES OF PAVEMENT AND CURB REMOVALS IN REMOVALS SCHEDULE ARE APPROXIMATE.

A.R.	ACER RUBRUM 'OCTOBER GLORY'	OCTOBER GLORY RED MAPLE	3 1/2" CAL	B+B	1	
L.S.	LINDAHPARK STYRACIFLUA	SWEET GUM	4-4 1/2" CAL	B+B	1	
Q.B.	QUERCUS BOREALIS PURA	NORTHERN RED OAK	3-3 1/2" CAL	B+B	1	

NOTE: ADD 6" OF NEW TOPSOIL WHERE ASPHALT HAS BEEN REMOVED IN THIS SEED BED

NOTE: NEW CURB TO MEET EXISTING CURB FLUSH CURVE OF NEW CURB TO HAVE A SMOOTH FINISH. MAINTAIN CONSTANT WIDTH OF PATH TO EQUAL EXISTING PATH

**LAYOUT & PLANTING PLAN**

SCALE: 1" = 10'-0"

**LAYOUT LEGEND**

- #—#— PROPERTY LINE
- CONTRACT LIMIT LINE (SEE NOTE 1)
- ☀ EXISTING LIGHT POLE TO REMAIN
- ⊙ NEW ASPHALT PAVEMENT
- ▨ NEW GRANITE BLOCK PAVEMENT
- 6"— NEW 6" CONCRETE CURB (SEE NOTE 9)
- ▤ NEW WORLDS FAIR BENCH
- ⊕ NEW DRINKING FOUNTAIN (SEE ENLARGEMENT 'A' FOR LAYOUT)
- ⊖ NEW SEED BED AREA (SEE SPEC'S; CONSTRUCT LAWN) (SEE NOTE 12)
- EXISTING TREE
- + NEW TREE
- ⊙ EXISTING FLOOD LIGHT TO REMAIN
- ⊕ PROPOSED CATCH BASIN
- ⊖ ASPHALT BLOCK (SEE NOTE 11)
- ▨ CONCRETE PAVEMENT

**LAYOUT NOTES (CONT)**

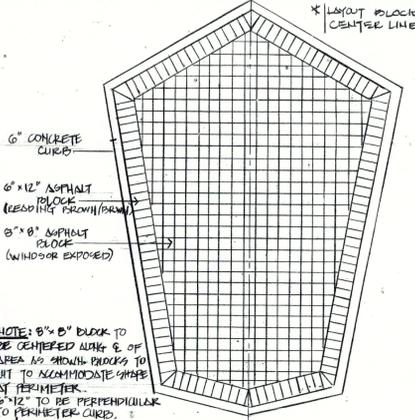

1. SEED BED AREAS WHERE NO LAWN OR PLANTING PREVIOUSLY EXISTED IS TO RECEIVE 6" OF NEW TOPSOIL PLUS ALL NECESSARY AMENDMENTS TO SOIL (SEE SPEC'S). NO TOPSOIL REQUIRED FOR SEED BED AREAS WHERE LAWN PREVIOUSLY EXISTED EXCEPT AS NECESSARY TO MEET PROPOSED GRADE. ALL HEIGHTS TO BE ADDED TO EXISTING SOIL AND SOIL MUST BE PREPARED PRIOR TO APPLICATION OF SEED AS PER SPEC'S.

**LAYOUT ENLARGEMENT 'A'**

SCALE: 1" = 10'-0"

**LAYOUT NOTES**

1. CONTRACT LIMIT LINE FOLLOWS LINE OF CONSTRUCTION PENCE UNLESS OTHERWISE NOTED. (SEE REMOVAL PLAN, SHEET 3)
2. THE CONTRACTOR IS TO USE EXTREME CARE DURING CONSTRUCTION TO AVOID DISTURBING OR DAMAGING ADJACENT UTILITIES AND PAVEMENTS. ANY DAMAGE RESULTING FROM THIS CONSTRUCTION WILL BE THE CONTRACTOR'S RESPONSIBILITY AND SHALL BE RESTORED AT THE CONTRACTOR'S EXPENSE TO THE SATISFACTION OF THE PARKS DEPARTMENT.
3. THE CONTRACTOR SHALL INSPECT THE SITE, VERIFY ALL DIMENSIONS AND EXISTING CONDITIONS PRIOR TO THE START OF WORK. ANY DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE PARKS DEPARTMENT.
4. SPECIAL CARE SHALL BE TAKEN TO PRESERVE ALL EXISTING TREES AND THEIR ROOT SYSTEMS DURING CONSTRUCTION. NO HEAVY MACHINERY, EQUIPMENT OR STOCKPILING OF MATERIAL IS PERMITTED WITHIN 15' RADIUS OF THE TRUNK OR WITHIN THE DRIP LINE OF ALL EXISTING TREES.
5. CONTRACTOR SHALL TAKE APPROPRIATE CARE TO SAFEGUARD ALL UTILITIES DURING CONSTRUCTION OPERATIONS.
6. ALL TREES WITH TREE CHAIRS SHALL RECEIVE COMPENSATORY PRUNING AND FERTILIZATION (SEE REMOVAL PLAN, SHEET 3)
7. CONTRACTOR IS NOT TO DIMENSION DIRECTLY OFF PLAN ANY DISCREPANCIES IN LAYOUT DIMENSIONS SHOULD BE BROUGHT TO THE ATTENTION OF THE PARKS DEPARTMENT IMMEDIATELY.
8. PRIOR TO EXCAVATION FOR SITTING AREA, CONTRACTOR IS TO VERIFY EXISTING DIMENSIONS AND CONFIRM THAT NEW LAYOUT DOES NOT INTERFERE WITH EXISTING TREES. IF DISCREPANCIES OCCUR, AND EXISTING TREES INTERFERE WITH PROPOSED LAYOUT, ADJUSTMENTS MAY BE MADE ONLY WITH THE APPROVAL OF THE PARKS DEPARTMENT DESIGN DIVISION.
9. NEW CONCRETE CURBS TO BRIDGE EXISTING TREE ROOTS AS PER DETAIL 27 ON SHEET 17 AS REQUIRED TO AVOID DAMAGE TO TREE ROOTS.
10. ALL RADIUS DIMENSIONS ARE TO OUTSIDE EDGE OF CURB UNLESS OTHERWISE NOTED.
11. ASPHALT BLOCK SHALL BE WINDSOR EXPOSED AND BEARING BROWN/BROWN AS MANUFACTURED BY HASTINGS PAVERS OR APPROVED EQUAL - SEE LAYOUT ENLARGEMENT 'B'. CONTRACTOR TO CHECK SHOP DRAWINGS OF LAYOUT!!

**LAYOUT ENLARGEMENT 'B'**

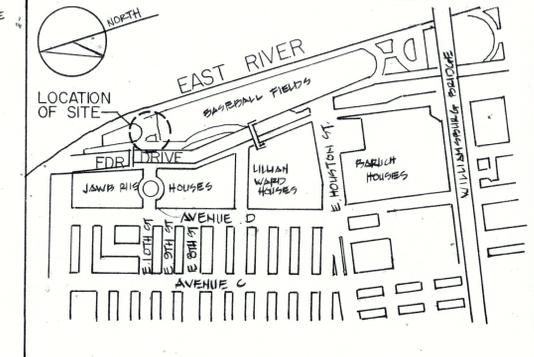

SCALE: 1/4" = 1'-0"

**GRADING NOTES**

1. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO VERIFY ALL SITE CONDITIONS BOTH ABOVE AND BELOW THE SURFACE OF THE GROUND PRIOR TO COMMENCING HIS WORK. ANY DISCREPANCIES BETWEEN INFORMATION SHOWN ON THE DRAWINGS AND ACTUAL FIELD CONDITIONS SHOULD BE BROUGHT TO THE ATTENTION OF THE DEPT. OF PARKS.
2. SHAPE THE GROUND TO AVOID OBSTACLES WHERE NEW GRADING MEETS EXISTING GROUND. MAINTAIN CONSTANT GRADIES BETWEEN FINISHED GRADE ELEVATIONS AND.
3. USE EXTREME CARE TO PROTECT EXISTING TREES. EXCAVATE BY HAND ONLY WITHIN THE DRIP LINE OF EXISTING TREES. UTILITY TRENCHES ARE TO BE LOCATED OUTSIDE THE DRIP LINE OF EXISTING TREES WHEREVER POSSIBLE. NO EQUIPMENT OR MATERIALS SHALL BE STORED WITHIN THE DRIP LINE OF EXISTING TREES.
4. THE CONTRACTOR SHALL REMOVE ALL DEBRIS & GUT FROM THE EXISTING DRAINAGE STRUCTURES AND PIPING FOR POSITIVE DRAINAGE FLOW. (SEE SHEET #5)
5. MINIMUM COVER FOR PIPE TO BE 1'-0" COMPUTED FROM FINISHED GRADE.
6. ALL WATER PIPE TO BE PITCHED 1/8" PERCENT MINIMUM, AS INDICATED BY LEGENDS, WITHOUT PROTECT, TO DRAIN.
7. THE LOCATION OF DRAINAGE PIPING TO BE AT THE LOW POINT OF THEIR RESPECTIVE AREAS AS DETERMINED IN THE FIELD. LOCATION ON PLAN IS DIRECTIONAL.
8. LOCATION OF ALL UTILITIES SHOWN ARE APPROXIMATE WHERE SEWER OR WATER LINES CROSS EXISTING UTILITIES, THE CONTRACTOR SHALL MAKE PRELIMINARY INVESTIGATION INCLUDING ALL NECESSARY EXCAVATION TO DETERMINE IF WORK CAN BE DONE AS SHOWN ON PLANS. CHANGES MAY BE MADE AS REQUIRED BY FIELD CONDITIONS AND AS DIRECTED BY FIELD ENGINEER.
9. CONTRACTOR IS TO USE CARE DURING CONSTRUCTION TO AVOID DISTURBING OR DAMAGING EXISTING PAVEMENTS, CURBS, STRUCTURES, FENCES, ETC., TO REMAIN AT THE CONTRACTOR'S OWN EXPENSE TO THE SATISFACTION OF THE SITE ENGINEER. SEE LAYOUT PLAN ABOVE FOR LOCATION OF DRAINAGE STRUCTURES.
10. NEW CURBS, PAVEMENTS, ETC., SHALL MEET EXISTING STRUCTURES & PAVEMENTS SMOOTHLY & EVENLY.
11. WHEN BACKFILLING AROUND STRUCTURES SUCH AS DRY WELLS, CATCH BASINS, ETC., USE PROPER FILL MATERIAL WHICH IS FREE FROM ORGANIC MATTER, FROZEN MATERIAL, DEBRIS, BOULDERS & OTHER UNDESIRABLE MATERIAL. COMPACT PINK-FILL CAREFULLY IN 6" LAYERS.
12. PRIOR TO ANY GRADING OPERATIONS, THE CONTRACTOR IS REQUIRED TO NOTIFY THE ONE CALL CENTER AT 1-800-272-4400 TO ASSURE UTILITY LOCATIONS ARE PROPERLY MARKED.
13. THE CONTRACTOR SHALL ENSURE THE POSITIVE DRAINAGE IS ACHIEVED THROUGHOUT THE ENTIRE DRAINAGE SYSTEM. SHOULD THE CONTRACTOR FAIL TO ACHIEVE POSITIVE DRAINAGE, CORRECTIVE MEASURES SHALL BE TAKEN AT THE CONTRACTOR'S EXPENSE AS DIRECTED BY THE ENGINEER.
14. FOR MAXIMUM PAYMENT LINES FOR EXCAVATION, SEE DETAIL 27 ON SHEET 21. OF THIS CONTRACT DOCUMENT SET.
15. REMOVE EXISTING PIPING AS NECESSARY TO INSTALL NEW PIPE.
16. FOR WATER DETAILS, SEE SHEET 20 & 21.
17. FOR DRAINAGE DETAILS, SEE SHEETS 20 & 21.
18. CONTRACTOR IS TO ENSURE POSITIVE DRAINAGE FLOW AWAY FROM BUILDING.
19. ALL EXISTING PIPING TO BE ABANDONED IS TO BE PLUGGED AT BOTH ENDS. SEE REMOVALS PLAN, SHEET 3.
20. FOR UTILITY SERVICES TO BUILDING AND NEW WATER SUPPLY, SEE SHEET #5.
21. 6" CONCRETE CURBS FOR GRANITE BLOCK TREE PITS TO BE FLUSH WITH ADJACENT ASPHALT PAVEMENT.
22. 6" CONCRETE CURBS AROUND TREE LAWN AREAS ARE TO HAVE A 2" REVEAL ON PAVEMENT SIDE (TYPICAL).
23. GRASS LAWN AREAS ADJACENT TO SITTING AREAS TO AVOID FILLING OR CUTTING AROUND EXISTING TREES, GRADE LAWN AREAS TO HAVE POSITIVE DRAINAGE TO ADJACENT PAVEMENTS, AVOID LOW POINTS IN LAWN AREAS.

25. ADJUST TOPS OF UTILITY STRUCTURES TO GRADE AS REQUIRED.
26. CONTRACTOR SHALL TAKE EVERY PRECAUTION TO AVOID EXISTING INTERCEPTING SEWERS DURING CONSTRUCTION, WHERE SEWER INTERFERES WITH PROPOSED WORK, ADJUSTMENTS MAY BE MADE WITH THE APPROVAL OF THE PARKS DEPARTMENT (REFER TO NOTE 9).
27. FOR DRAINAGE STRUCTURE AND PIPING INFORMATION, SEE SITE UTILITIES PLAN, SHEET #5.

## NOTES

1. SEE GRADING PLAN ON SHEET #4 FOR ADDITIONAL GRADING AND DRAINAGE INFORMATION AROUND PROPOSED BUILDING.
2. CLEAR EXISTING UTILITY FACILITIES AS SHOWN ON PLAN (SEE SPECS)
3. EXISTING UTILITY INFORMATION MAY NOT BE COMPLETE OR ACCURATE. CONTRACTOR SHALL VERIFY LOCATION OF ALL EXISTING UTILITIES THAT AFFECT NEW WORK OR MAY INTERFERE WITH NEW WORK PRIOR TO ANY EXCAVATION.
4. LOCATION OF ALL UTILITIES SHOWN ARE APPROXIMATE. WHERE SEWER OR WATER LINES CROSS EXISTING UTILITIES, THE CONTRACTOR SHALL MAKE PRELIMINARY INVESTIGATION INCLUDING ALL NECESSARY EXCAVATION TO DETERMINE IF WORK CAN BE DONE AS SHOWN ON PLANS. CHANGES MAY BE MADE AS REQUIRED BY FIELD CONDITIONS AND AS DIRECTED BY FIELD ENGINEER.
5. THE LOCATION OF DRAINAGE PIPING TO BE AT THE LOW POINT OF THEIR RESPECTIVE AREAS AS DETERMINED IN THE FIELD.
6. LOCATIONS ON PLAN ARE DIAGRAMMATIC.
7. REFER TO DETAIL 27 ON SHEET #2 FOR MAXIMUM PIPEMENT LINES FOR PIPE TRENCHING EXCAVATION.
8. CONTRACTOR SHALL COORDINATE INSTALLATION OF NEW WATER LINE WITH ELECTRICAL CONTRACTOR WHERE NEW ELECTRICAL CONDUIT CROSSES NEW WATER PIPING.
9. PIPE UNDER EXISTING CURBS TO REMAIN TO AVOID DAMAGE TO CURBS DURING EXCAVATION. DAMAGED CURBS TO BE REPAIRED BY CONTRACTOR EXPENSIVE TO THE SATISFACTION OF THE ENGINEER.
10. REFER TO ADDITIONAL GRADING AND UTILITY NOTES ON GRADING PLAN, SHEET #4.
11. CONNECT NEW 3" CT TO EXISTING 3" SUPPLY WITH DIALECTRIC FITTING.
12. CONNECT EXISTING 2" CUS WATER LINE TO NEW 3" CT WITH DIALECTRIC FITTING. EXISTING 2" CUS AND 1 1/4" CUS BELOW POINT OF CONNECTION TO BE DISCONNECTED. SEE RENOVALS PLAN SHEET #3.
13. CONTRACTOR SHALL DISCONNECT ELECTRIC POWER BEFORE ANY EXCAVATION. CONTRACTOR SHALL COORDINATE ELECTRICAL OUTAGE WITH D.O.T. DIVISION OF STREET LIGHTING-MANHATTAN BOROUGH ENGINEER PHONE # (718) 786-4672, & CON-ED. FOR OTHER UTILITIES.
14. GENERAL CONTRACTOR SHALL ALSO COORDINATE HIS WORK WITH THE ELECTRICAL CONTRACTOR (CONTRACT # M144-294) WHO SHALL BE RESPONSIBLE TO REROUTING THE 4 #2 IN 2" CONDUIT AS SHOWN ON DRAWING.
15. CONTRACTOR SHALL TAKE EXTREME CARE DURING EXCAVATION SO AS NOT TO DAMAGE THE TWO EXISTING RULL BOXES.
16. ALL DRAINAGE STRUCTURES PROPOSED IN EXISTING PAVEMENTS TO REMAIN SHALL MEET PLUMB WITH SURROUNDING PAVEMENT.
17. CONTRACTOR SHALL TAKE EXTREME CARE DURING EXCAVATION SO AS NOT TO DAMAGE EXISTING UTILITIES - (DRAWINGS FOR ADDITIONAL UTILITIES NOT SHOWN ON THIS DRAWING CAN BE OBTAINED FROM THIS OFFICE) SAW-CUT AND PATCH WHERE NECESSARY.

GENERAL NOTES
1. THE CONTRACTOR SHALL SUPPLY ALL LABOR, TOOLS, MATERIALS AND EQUIPMENT NECESSARY TO COMPLETE THE WORK AS CALLED FOR ON THE DRAWINGS AND SPECIFICATIONS.
2. THE CONTRACTOR SHALL AT ALL TIMES, KEEP THE PREMISES FREE FROM ACCUMULATION OF WASTE MATERIALS OR RUBBISH CAUSED BY HIS WORK OR EMPLOYEES. UPON COMPLETION, THE CONTRACTOR SHALL REMOVE ALL DEBRIS AND LEAVE THE PREMISES IN A "BROOM CLEAN" CONDITION.
3. ALL REMOVED MATERIAL & DEBRIS SHALL BE LEGALLY DISPOSED OF AWAY FROM THE PREMISES.
4. OMISSIONS FROM THE DRAWINGS OR SPECIFICATIONS OR THE MISDESCRIPTION OF DETAILS OF WORK WHICH ARE MANIFESTLY NECESSARY TO CARRY OUT THE INTENT OF THE DRAWINGS AND SPECIFICATIONS, OR WHICH ARE CUSTOMARILY PERFORMED, SHALL NOT RELIEVE THE CONTRACTOR FROM PERFORMING SUCH WORK, BUT SHALL BE PERFORMED AS IF CORRECTLY SET FORTH AND DESCRIBED TO FURNISH A COMPLETE INSTALLATION IN ACCEPTABLE CONDITION.
5. ALL EXISTING AREAS OF THE BUILDING THAT ARE DAMAGED BY THE CONTRACTOR SHALL BE RESTORED TO MATCH THE EXISTING AT NO ADDITIONAL COST TO THE OWNER.
6. THE CONTRACTOR SHALL VERIFY AND CHECK ALL DIMENSIONS AND CONDITIONS AT THE SITE BEFORE BIDDING AND PROCEEDING INTO CONSTRUCTION AND SHALL BE RESPONSIBLE FOR SAME.
7. THE CONTRACTOR SHALL GUARANTEE ALL WORK PERFORMED UNDER THIS CONTRACT FOR A PERIOD OF ONE YEAR AFTER COMPLETION AND FINAL ACCEPTANCE BY THE OWNER.
8. THE CONTRACTOR SHALL COORDINATE ALL OPERATIONS WITH THE OWNER: SUCH AS WORK AREAS USED FOR MATERIAL STORAGE, ACCESS TO AND FROM THE WORK AREAS, TIMING AND SEQUENCE OF WORK, SPECIAL CONSIDERATIONS OF NOISY OPERATIONS, INTERFERENCES FOR MECHANICAL AND ELECTRICAL SERVICES, ETC.
9. ALL WORK PERFORMED BY THE CONTRACTOR SHALL BE DONE IN A GOOD WORKMANSHIP LIKE MANNER AND TO THE APPROVAL AND ACCEPTANCE OF THE OWNER.
10. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR HIS WORK AND FOR COORDINATION BETWEEN HIS RESPECTIVE SUB-CONTRACTORS AND THEIR PORTION OF WORK.
11. ANY DISCREPANCIES IN THE PLANS OR DETAILS SHALL BE BROUGHT TO THE ATTENTION OF THE OWNER BEFORE PROCEEDING.
12. THE CONTRACTOR SHALL CHECK DETAILS FOR LOCATIONS OF ITEMS NOT DIMENSIONED ON THE PLANS.
13. THE CONTRACTOR SHALL PROVIDE AND MAINTAIN TEMPORARY FACILITIES FOR PROTECTION AND/OR ENCLOSURE OF AREAS OF WORK & PROTECTION OF AREAS WHERE THERE IS NO FURTHER WORK.
14. REMOVE TEMPORARY FACILITIES WHEN NO LONGER REQUIRED.
15. ALL WORK SHALL BE MANUFACTURED IN AMPLE TIME SO AS NOT TO DELAY THE PROGRESS OF WORK AND SHALL BE DELIVERED AT SUCH TIME AS REQUIRED FOR PROPER COORDINATION OF THE WORK.
16. THE SCOPE OF ALL DEMOLITION AND REMOVAL WORK TO BE PERFORMED SHALL NOT BE LIMITED BY THE DRAWINGS OR SPECIFICATIONS BUT SHALL INCLUDE ANY AND ALL WORK THAT SHALL BE REQUIRED OR DIRECTED BY THE ARCHITECT TO FACILITATE THE NEW WORK.
17. THE CONTRACTOR MUST TAKE EVERY MEASURE POSSIBLE TO LIMIT DUST, NOISE, VAPORS, ETC. TO DESIGNATED AREAS. METHOD FOR PROTECTION MUST BE APPROVED BY THE RESIDENT ENGINEER.
18. CHECK DETAILS FOR LOCATION OF ALL ITEMS NOT DIMENSIONED ON PLANS.
19. THE CONTRACTOR SHALL NOT HAVE EXCLUSIVE USE OR OCCUPANCY OF THE SITE BUT SHALL COORDINATE IN EVERY WAY WITH THE OTHER CONTRACTOR, G.C. TO ACQUAINT THEMSELVES WITH OTHER JOB PRIOR TO BIDDING WORK. ALL DISPUTES AS TO THE RIGHTS OF CONTRACTORS SHALL BE SETTLED BY THE ENGINEER, AND HIS/HER DECISION SHALL BE FINAL.

BUILDING DEPARTMENT NOTES:
20. GENERAL CONTRACTOR SHALL COORDINATE W/ CONTRACTORS FOR PLUMBING, HEATING, & VENTILATING, AND ELECTRICAL WORK TO FORM OPENINGS IN FLOOR, WALLS, AND ROOF TO ACCOMMODATE THE INSTALLATION OF THEIR WORK. DRAWINGS ARE DIAGRAMMATIC. ACTUAL OPENINGS SHALL BE DETERMINED BY LAYOUT IN THE FIELD.
21. "U" VALUES ARE IN COMPLIANCE WITH ENERGY CODE AS FOLLOWS: WALLS - 'U' - 0.07 ROOF - 'U' - 0.02
22. CONTROLLED INSPECTION - SEE SPECS & SHEET NO. S-1
23. N.Y.C. PARKS DEPT. AND G.C. WILL COMPLY WITH L.L. 58/87, PER N.Y.C. BLDG. CODE REQUIREMENTS.
24. N.Y.C. PARKS DEPT. AND G.C. WILL COMPLY WITH L.L. 7/74, PER N.Y.C. BLDG. CODE REQUIREMENTS.
25. N.Y.C. PARKS DEPT. WILL COMPLY WITH N.Y.C. FIRE DEPT REGULATIONS. - WILL PROVIDE C.O. FIRE EXTINGUISHER IN STORAGE ROOM.
26. N.Y.C. PARKS DEPT WILL COCOMPLY WITH N.Y.C. ENERGY CODE.
27. FIRE RATING WILL CONFORM WITH CLASS 1A BLDG. CODE - TABLE 3-4
28. HANDICAP REQUIREMENTS WILL CONFORM TO L.L. 58

BUILDING DEPARTMENT NOTES
1. ALL WORK SHALL CONFORM TO THE BUILDING CODE OF THE CITY OF NEW YORK AS AMENDED TO DATE.
2. THE CONTRACTOR MUST OBTAIN ALL PERMITS AND FINAL APPROVAL OF COMPLETION OF WORK FROM THE NEW YORK CITY BUILDING DEPARTMENT.
3. AT LEAST 24 HOURS WRITTEN NOTICE SHALL BE GIVEN TO THE BUILDING DEPARTMENT PRIOR TO COMMENCEMENT OF ANY WORK AS PER C26-188.5
4. ALL LUMBER TO BE GRADE MARKED. LUMBER TO BE AS PER DRAWINGS. PLYWOOD SHALL BEAR IDENTIFICATION AS TO GRADE, TYPE, SPECIES OR IDENTIFICATION INDEX. LUMBER TO BE FIR #1 OR #2, 2c-1450 PSI EXCEPT WHERE SPECIFIED OTHERWISE ON PLAN.
5. ALL STRUCTURAL STEEL FABRICATION AND ERECTION SHALL BE IN ACCORDANCE WITH THE LATEST ASTM SPECIFICATIONS FOR A-36 STEEL, WITH A DESIGN STRESS OF 24,000 PSI. THE CONTRACTOR SHALL FILE AN AFFIDAVIT OF THE PRODUCER OF STEEL CERTIFYING THAT THE PROVISIONS OF THE BUILDING CODE ARE MET. ALL WELDING TO BE PERFORMED BY A LICENSED WELDER. ALL STEEL SURFACES SHALL RECEIVE A SHOP COAT OR APPROVED RUST INHIBITOR PAINT.
6. THE CONTRACTOR SHALL FILE A FINAL SURVEY OF THE PROJECT WITH THE BUILDING DEPARTMENT AS PER C26-121.7 AT THE COMPLETION OF THE PROJECT.
7. CONTROLLED INSPECTION ITEMS: ALL MATERIALS DESIGNATED FOR CONTROLLED INSPECTIONS SHALL BE INSPECTED AND TESTED TO VERIFY COMPLIANCE WITH CODE REQUIREMENTS, UNLESS OTHERWISE SPECIFICALLY PROVIDED BY CODE PROVISIONS. ALL REQUIRED INSPECTIONS AND TESTS OF MATERIALS SHALL BE MADE AND WITNESSED BY OR UNDER THE SUPERVISION OF A REGISTERED ARCHITECT OR LICENSED ENGINEER RETAINED BY OR ON BEHALF OF THE OWNER. TEST REPORTS AND CERTIFICATE OF INSPECTION SHALL BE FILED WITH THE BUILDING DEPARTMENT. THE FOLLOWING ITEMS SHALL BE SUBJECT TO CONTROLLED INSPECTIONS: SUB SOIL & FOOTING BOTTOM 27-723 FIRE PROTECTION 27-345 VENTILATION 27-779 CONCRETE SLAB 27-
8. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE RULES AND REGULATIONS OF THE NEW YORK CITY BUILDING CODE.
9. THE CONTRACTOR SHALL, UNTIL ACCEPTANCE BY THE OWNER, MAINTAIN THE BUILDING IN A SAFE CONDITION, AS PER C26-105.D.
10. THE OWNER SHALL BE RESPONSIBLE FOR THE SAFE MAINTENANCE OF THE BUILDING AND ITS FACILITIES C26-106.0 AFTER ACCEPTANCE FROM CONTRACTOR.
11. ALL MATERIALS, ASSEMBLIES, FORMS AND METHODS OF CONSTRUCTION AND SERVICE EQUIPMENT SHALL COMPLY WITH THE REQUIREMENTS OF SECTION C26-106.2.
12. ALL ELEVATIONS SHALL BE REFERRED TO DATUM USED BY TOPOGRAPHICAL BUREAU, OF THE BOROUGH OF BROOKLYN. ALL ELEVATIONS INDICATED ARE ACTUAL ELEVATIONS AND REFER TO DATUM USED BY TOPOGRAPHICAL BUREAU, BOROUGH PRESIDENT'S OFFICE, BROOKLYN.
13. FIRESTOPPING TO BE NOT LESS THAN 2" THICKNESS WITH TIGHT JOINTS OR TWO LAYERS OF 1" THICKNESS ASSEMBLED SO THAT THEY ARE NOT THROUGH JOINTS. THE INSTALLATION OF ALL FIRESTOPPING TO BE SUBJECT TO CONTROLLED INSPECTION. NON-COMBUSTIBLE FIRESTOPPING SHALL BE USED IN FIRE DIVISIONS, FIREPLACES, FLUES AND CHIMNEYS.
14. ALL NEW WORK SHALL COMPLY WITH THE APPLICABLE SECTION OF THE NEW YORK STATE ENERGY CODE, AS AMENDED TO DATE.
15. ALL PLUMBING WORK SHALL BE PERFORMED BY A LICENSED PLUMBER AND SHALL CONFORM TO ALL HEALTH REQUIREMENTS.
16. ALL ELECTRICAL WORK SHALL BE DONE IN ACCORDANCE WITH THE NEW YORK CITY ELECTRICAL CODE AS AMENDED TO DATE AND ANY OTHER HAVING JURISDICTION.
17. ALL CONCRETE SHALL BE AIR ENTRAINED AND HAVE A MINIMUM COMPRESSIVE STRENGTH OF 3,000 PSI PLAIN CONCRETE SHALL HAVE A MINIMUM CEMENT FACTOR OF FIVE BAGS PER CUBIC YARD OR CONCRETE. THE CONTRACTOR SHALL HAVE THREE (3) TEST CYLINDERS PROVIDED FOR EACH FIFTY CUBIC YARDS OF CONCRETE PLACED IN ONE DAY AND SHALL SUBMIT TEST REPORTS FOR CONCRETE TO BE FILED BY AMENDMENT BY THE CONTRACTOR.
18. ALL MASONRY SHALL BE LAID IN TYPE "M" OR "S" PORTLAND CEMENT MORTAR 1:3 MIX WITH NOT MORE THAN 10% LIME BY VOLUME.
19. ALL SERVICE EQUIPMENT SHALL BE MEA APPROVED.

- STRUCTURAL NOTES:
- CONTRACTOR SHALL PROVIDE TEMPORARY SHORING AND BRACING AND MAKE SAFE ALL FLOORS, ROOFS, WALLS AND ADJACENT PROPERTY AS PROJECT CONDITIONS REQUIRE.
  - ALL FOOTINGS SHALL REST ON UNDISTURBED SOIL OF MINIMUM BEARING CAPACITY EQUAL TO 2000 PSF. BOTTOM OF FOOTING ELEVATIONS SHALL BE ADJUSTED AS REQUIRED IN THE FIELD.
  - ALL CONCRETE SHALL BE NORMAL WEIGHT AGGREGATE AND AIR ENTRAINED OF MINIMUM COMPRESSIVE STRENGTH EQUAL TO 4000 PSI AT AGE 28 DAYS. CONCRETE WORK SHALL CONFORM TO ACI 301, "SPECIFICATIONS FOR CONCRETE FOR BUILDINGS", AND ALL RECOMMENDED PRACTICES CONTAINED THEREIN SHALL BE CONSIDERED MANDATORY FOR THIS PROJECT.
  - REINFORCING STEEL SHALL BE DEFORMED BARS CONFORMING TO ASTM A615, GRADE 60.
  - WELDED WIRE FABRIC (WWF) SHALL CONFORM TO ASTM A185.
  - SLAB ON GRADE SHALL BE 5" CONCRETE REINFORCED WITH 6 X 6 W2.0 X W2.0 WWF ON 10 MIL. POLY. VAPOR BARRIER ON 6" CRUSHED STONE.
  - CONCRETE MASONRY UNITS SHALL BE HOLLOW LOAD BEARING UNITS CONFORMING TO ASTM C90, GRADE N1. FILL ALL VOIDS SOLID WITH LIGHT WEIGHT AGGREGATE CONCRETE (ASTM C-330, SOLITE OR APPROVED EQUAL) OF MIN. COMP. STRENGTH: 3000 PSIA/28 DAYS. MORTAR SHALL BE ASTM C270, TYPE S. WORKMANSHIP SHALL CONFORM TO NCMA SPECIFICATIONS FOR CONCRETE MASONRY.
  - STRUCTURAL STEEL: ALL PLATES AND SHAPES SHALL BE ASTM A36. ALL PIPES SHALL BE ASTM A53, TYPE E OR S, GRADE B. STRUCTURAL STEEL SHALL CONFORM TO THE AISC "SPECIFICATIONS FOR THE DESIGN, FABRICATION AND ERECTION OF STRUCTURAL STEEL FOR BUILDINGS", NOVEMBER 1, 1978.
  - BOLTS SHALL BE A307, 3/4" DIA. MINIMUM, U.O.N.
  - WELDING ELECTRODES SHALL BE ASTM A233, CLASS 370XX.
  - CONTROLLED INSPECTIONS REQUIRED BY THE NEW YORK CITY BUILDING CODE SHALL BE PERFORMED BY A TESTING AGENCY PROVIDED BY THE OWNER, FOR THE FOLLOWING:
    - QUALITY CONTROL OF CONCRETE MATERIALS, BATCHING, STRENGTH, SLUMP, AIR CONTENT, UNIT WEIGHT, TEMPERATURE, FORMS, SIZE AND PLACEMENT OF REINFORCEMENT.
    - WELDING.
    - HIGH-STRENGTH BOLTING.
    - SUBGRADE FOR FOUNDATIONS.
  - REINFORCE ALL CMU WALLS WITH LADDER TYPE HORIZONTAL REINFORCING SPACE AT 16" O.C. VERTICALLY AND NOT MORE THAN 8" FROM TOP OF WALL.

ADDENDUM NO. 2

DATED: 12/31/2020

THIS ADDENDUM IS HEREBY MADE A PART OF THE CONTRACT DOCUMENTS

1. **Refer** to Volume 1;  
**Incorporate** the attached revised pages as detailed in Attachment A.  
*[Number of attachments: 1 attachment and 4 pages of Bid Booklet]*
2. **Refer** to Volume 3;  
**Incorporate** the attached revised specifications as detailed in Attachment C.  
*[Number of attachments: 1 attachment and 1 page of specifications]*
3. **Refer** to the list of the Drawings in Attachment D;  
**Incorporate** the revised drawings notes as detailed in Attachment D.  
**Replace** the contract drawing marked with status "Replacement" in the attached drawings list;  
*[Number of attachments: 1 attachment; Number of drawings: 88]*

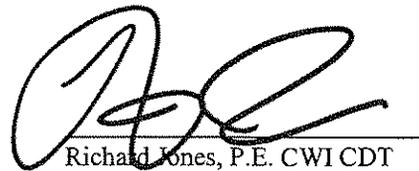

**Note the convention for SANDRESM1 Addenda. Not all Addenda will have all attachments.**

Attachment A – Non-Bid Schedule Changes to Volume 1  
Attachment B – Changes to Bid Schedule (Volume 1)  
Attachment C – Changes to Specifications (Volumes 2 and 3)  
Attachment D – Changes to Drawings

END OF ADDENDUM NO. 2

**By signing in the space provided below, the bidder acknowledges receipt of this Addendum consisting of one (1) page and NINETY- SIX (96) pages of attachments.**

**THIS ADDENDUM MUST BE SIGNED BY ALL BIDDERS AND ATTACHED TO THEIR BID**

# INTRODUCTION

# Changes from Previous Advertisement

Refer to Volume 3, S-Pages, Article B18

Project ID: SANDRESM1

## B18. Information from Previous Advertisement.

This contract was previously advertised, but bids were not opened. The previous advertisement contained 18 addenda, and these Contract Documents include the addenda revisions in their final form, except as noted below.

(a) Changes in this Advertisement: As a guide to the bidders, the following changes were made to the Contract Documents from the previously advertised documents:

### Volume 1:

1. Contract date on cover page
2. New Notice to Bidders 4
3. Updated PIN and ePIN numbers
4. Updated Attachment 1
5. Special Experience Requirements for the Bidder
6. Schedule B: M/WBE Goal revised
7. Bid Schedule: Remove items:
  - a. ESCR-7.13 PK1
  - b. ESCR-7.13 PK2
  - c. ESCR-7.13 PK3
  - d. ESCR-7.13 SI

### Volume 2:

1. Contract date on cover page

### Volume 3:

1. Contract date on cover page
2. Table of Contents: Update JB-Pages numbers
3. GENERAL-Pages: Remove Section ESCR-7.13 PK
4. S-Pages, Article B-7, Work Restrictions: Remove line 1 ("No area of East River Park can be closed before September 7, 2020")
5. S-Pages, Article B-15, U.S. Army Corps of Engineers Requirements: New attached permit
6. S-Pages, Article B-18, Information from Previous Advertisement: New Article
7. JB-Pages: Addition of ConEd document "CONST-029 Revision Number 4" starting on page JB-12.

Please note that the above list is just a guide, and the actual text of the Contract Documents governs.

(b) Previously answered Pre-Bid Questions (PBQ): Additionally, the PBQ that were received and answered are attached to these S-Pages. PBQs that were solely related to the previous procurement (such as postponement requests) have been redacted to avoid confusion. Please note that many discrepancies identified by PBQ were corrected in subsequent addenda and these revisions are already reflected in the Contract Documents.

For clarity, the PBQ attached are part of the Contract Documents, and are not PBQ as part of this procurement.

Attached are 150 pages of PBQs and the supplemental attachments that were originally provided with the PBQs when they were issued.

---

# ACCO – DONNA POPE

# Payee Information Portal

## PAYEE INFORMATION PORTAL (PIP)

The Prime contractor is required to report first-tier subcontractors via the NYC Payee Information Portal (PIP). PIP is a service that allows a vendor for the City of New York to manage their own account information, view their financial transactions with the City and much more.

With regard to DDC contracts, Prime Contractors must report first-tier subcontractors via PIP and a hard copy Request for Approval of Subcontractor (RFAS) form. Be advised both PIP and hardcopy RFAS are REQUIRED for all DDC contracts registered under Local law 1 or DDC cannot approve a subcontractor.

## HireNYC: Goods and Services – Contractor Overview

### Program Overview

HireNYC: Goods and Services is part of the Mayor's larger HireNYC program, announced in *One New York: The Plan for a Strong and Just City and Career Pathways: One City Working Together*. It is a partnership between the City, employers and jobseekers to leverage the City's purchasing power to connect low-income and underserved New Yorkers to employment opportunities. HireNYC: Goods and Services is a hiring process that requires businesses that contract with the City to share entry and mid-level positions with the City, and interview the qualified candidates that the City refers. It provides free, high quality recruitment services to employers and high-quality employment services to jobseekers. Contractors will work with the Department of Small Business Services' Workforce1 System (Workforce1), a free employment service, to find qualified candidates to fill openings across their organization.

### HireNYC: Goods and Services Requirements

On applicable contracts, all contractors will be required to:

- Enroll with the HireNYC Portal within thirty (30) days after registration of the contract;
- Provide information on all entry to mid-level job opportunities<sup>1</sup> arising from a contract that will be performed in the City;
- Interview qualified candidates sourced from Workforce 1 for those opportunities;
- Provide feedback to Workforce 1 related to referred candidates that were interviewed and employment information related to referred candidates that were hired; and
- If no applicable employment opportunity related to a contract arose, to certify as such.

These requirements were designed to assist contractors with finding employees if openings occur throughout the term of the contract. Though contractors will be required to interview qualified candidates referred by Workforce1, contractors will not be required to hire anyone.

### Enroll Contracts through the HireNYC Portal

All contractors must enroll qualifying contracts through the HireNYC Portal to attest to possible hiring needs arising from the contract. Enrollment must be completed within 30 days of the contract registration date. HireNYC: Goods and Services requirements apply to all new contracts with a value of \$1 million or more for:

- Goods and services contracts;
- Construction contracts with non-trade position openings; and
- Human services contracts that are not subject to the Public Assistance Hiring Rider

HireNYC Portal Enrollment Screen

<sup>1</sup> Entry to mid-level job opportunities include those requiring no more than an associate degree, as provided by the New York State Department of Labor (see Column F of <https://labor.ny.gov/stats/2012-2022-NYS-Employment-Prospeets.xls>)

Enrollment through the HireNYC Portal includes:

1. Providing the name, phone number and email address for the person who will be the contractor's primary contact with the City for all communications related to HireNYC: Goods and Services;
2. Providing basic information about the contractor, including business name, address, EIN and City Vendor ID Number;
3. Providing the Contract ID Number; and
4. Attesting to whether the contractor intends to hire any entry or mid-level position(s) for work arising from the contract to be performed in the City, and if so providing the approximate start date for the first hire.

If new positions become available during the life of the contract, those hiring requirements must be submitted through the HireNYC Portal. Contractors will be required to re-enroll through the HireNYC Portal every 365 days throughout the life of the contract.

### Work with Workforce1 Recruiters to Find Qualified Candidates

If a contractor plans to hire for any entry or mid-level position(s) arising from a qualified contract, position profiles must be created in the HireNYC Portal for each position no less than 3 weeks before the intended date of employment. Once a position profile has been created, a recruiter from Workforce1 will contact the contractor within 3 business days to confirm the details of the position(s), discuss the screening process and recruitment timeline. The Workforce1 recruiter will work with the contractor's primary contact to develop a recruitment plan that aligns with the contractor's specific hiring needs. The contractor's primary contact should be knowledgeable of the contractor's hiring needs and/or have the ability to hire on behalf of the contractor.

After finalizing the recruitment plan with the contractor, Workforce1 will recruit candidates for the open positions and screen qualified candidates based on the contractor's specifications and hiring needs.

Workforce1 will notify the contractor about qualified candidates and provide information, such as a resume with contact details, to allow the contractor to review the candidate profiles and schedule interviews. If the contractor does not consider a candidate to be qualified for an interview, they must provide a reason to Workforce1 for why the candidate is being disqualified.

### Provide Feedback on Interviews and Hires

The contractor must provide to Workforce1 information about the outcomes of the interviews. For candidates that were hired, this includes the start date as well as wage and hours per week. The contractor will be able to provide this information through the HireNYC Portal.

HireNYC Portal Candidate Feedback Screen

For general HireNYC questions, contact [HireNYCQuestions@cityhall.nyc.gov](mailto:HireNYCQuestions@cityhall.nyc.gov)

For questions about the HireNYC Portal, contact [HireNYCSupport@sbs.nyc.gov](mailto:HireNYCSupport@sbs.nyc.gov)

# PROJECT OVERVIEW

---

# PROJECT OVERVIEW

# PROJECT OVERVIEW

**LINE OF WORK**  
**PEDESTRIAN BRIDGES**  
**CORLEARS HOOK FERRY TERMINAL**

---

# GENERAL CONTRACT INFORMATION

# GENERAL CONTRACT INFORMATION

## Items of Importance

- Time for Completion
- MBE/WBE Requirement
- Contractor Must Self-Perform a Minimum of 51% of the Work
- Engineer's Field Office
- HUD Funding
- Section 3
- Envision (Following Slides)

# GENERAL CONTRACT INFORMATION – Increasing Sustainability via ENVISION

## ESCR-5 Construction & Demolition Waste

- At least fifteen percent (15%) of the total project materials, supplies, and equipment must meet explicit environmental standards
- At least five percent (5%) of all project materials must include recycled content
- Divert at least fifty percent (50%) of all demolition and general construction waste from landfills

## ESCR-6 Conservation of Water & Energy

- Implement two (2) of the listed strategies to reduce construction energy consumption
- Implement one (1) of the listed strategies to reduce construction water consumption

---

# PHASING

# PHASING

## Overall Contract Drawings

- Contractors to develop work plan that encompass phasing, interim working conditions and means/methods

## Suggested Phasing Plan

- 42% (min.) of East River Park to remain open at all times
- Section ESCR-HW-901 –(GENERAL Pages)
- Park amenities show to be maintained in each phase

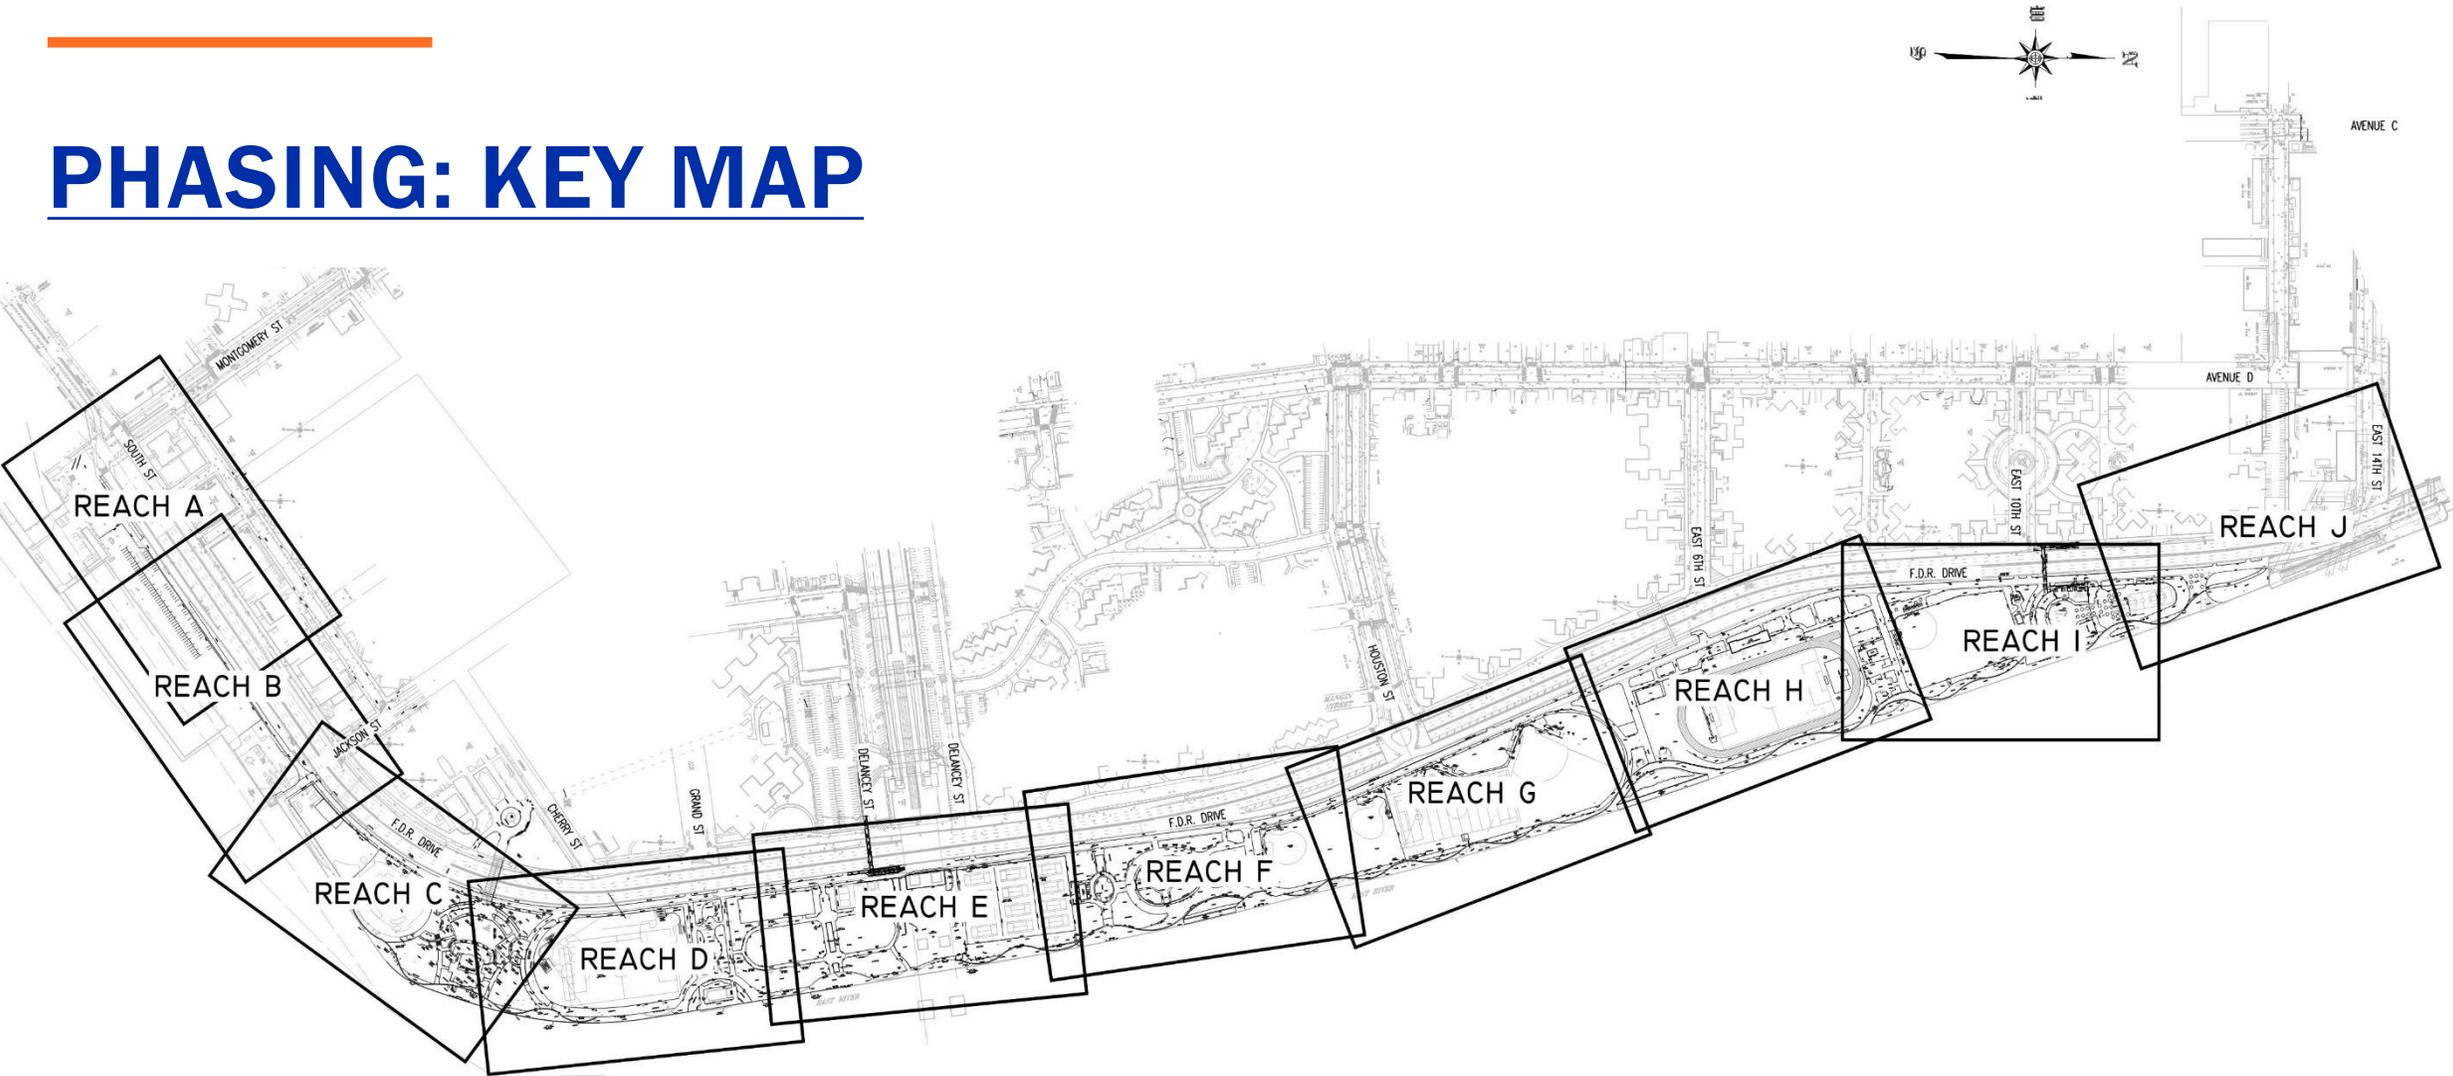

## Contractor's Phasing Plan: Submittal and Approval

- Specific phasing plan to be submitted for approval
- Must meet criteria shown on Contract Drawings

## Shared Use Path for Access

- Accessibility to emergency vehicles 24/7
- Flaggers for pedestrians
- Con Edison fiber wrapping

# PHASING: KEY MAP

# PHASING: PHASE I

# PHASING: PHASE II

# PHASING: GENERAL NOTES

## NOTES FOR SUGGESTED PHASING OF EAST RIVER PARK:

- SUGGESTED PHASE LIMITS ARE INDICATED IN THE FOLLOWING DRAWINGS.
- MUST MAINTAIN ACCESS INTO THE OPEN EAST RIVER PARK ZONES.
- MUST PROVIDE, PAVE, AND MAINTAIN, AS NECESSARY AND AS DIRECTED BY THE ENGINEER, A SHARED ACCESS ROAD ACROSS CLOSED ZONES FOR CITY MAINTENANCE, EMERGENCY ACCESS AND OTHER AGENCIES.
- SHARED ACCESS ROAD MUST HAVE SUFFICIENT GATES AT THE LIMITS OF THE CLOSED ZONE. GATES MUST BE SECURED AND UTILIZE A GUARD SERVICE TO PROVIDE ACCESS FOR EMERGENCY VEHICLES, OTHER CONTRACTORS AND ALL CITY AGENCIES 24 HOURS PER DAY, YEAR-ROUND, FOR THE DURATION OF THE PROJECT.
- PHASE LIMITS MAY BE CHANGED AS APPROVED AND ACCEPTED BY THE CITY. THE FOLLOWING CRITERIA, NOT LIMITED TO, WILL BE CONSIDERED:
  - OPEN SPACE MUST BE AT LEAST 42% OF THE EAST RIVER PARK TOTAL.
  - PARK AMENITIES ARE NOT DIMINISHED.
  - ACCESS IS MAINTAINED TO OPEN ZONES OF THE EAST RIVER PARK.
- PHASING DRAWINGS ARE LIMITED TO SHOWING ONLY THE SUGGESTED PHASING AND ARE NOT ALL INCLUSIVE OF THE WORK REQUIRED BY THE CONTRACT DOCUMENTS.
- THE CONTRACTOR'S ATTENTION IS CALLED TO SPECIFICATION SECTION ESCR-HW-901, WHICH PROVIDES DETAILS, METHOD OF PAYMENT, ETC. FOR PHASING AND RELATED WORK.
- ATTENTION IS CALLED TO SPECIFICATION SECTION FOR SWPPP, WHICH INCLUDES GUIDANCE ON MAXIMUM ALLOWABLE DISTURBANCE AREAS.

## FDNY ACCESS:

- HYDRANTS MUST BE AVAILABLE FOR FDNY USE DURING ALL PHASES OF THE WORK. IN THE EVENT THAT HYDRANTS ARE RENDERED UNUSABLE OR DIFFICULT TO ACCESS LOCAL FDNY SHALL BE NOTIFIED, AND SIGNAGE PLACED AT THE AFFECTED HYDRANT DIRECTING FDNY PERSONNEL TO THE LOCATION OF THE TWO(2) NEAREST ACTIVE AND READILY AVAILABLE HYDRANTS.
- FDNY PERSONNEL MUST HAVE EMERGENCY ACCESS TO THE SITE AT ALL TIMES. COORDINATION WITH LOCAL FDNY PERSONNEL ALERTING THEM TO ACCESS POINTS DURING THE VARIOUS STAGES OF THE WORK SHALL BE REQUIRED. SIGNAGE SHALL BE PLACED, PARTICULARLY DURING THE STAGED CONSTRUCTION, DIRECTING FDNY WHERE AND HOW TO ACCESS THE SITE.

## PIER 42 CONSTRUCTION ACCESS:

- CONTRACTOR TO COORDINATE WITH PIER 42 PROJECT AS REQUIRED PER CONTRACT DOCUMENTS AND SPECIFICATION.
- THE PIER 42 CONTRACTOR SHALL BE PROVIDED UNFETTERED USE OF THE SHARED ACCESS ROAD FROM MONTGOMERY STREET IN REACHES A, B, AND C AT ALL TIMES.
- THE PIER 42 CONSTRUCTION INCLUDES THE REPLACEMENT OF TWO (2) 48" SEWER LINES THAT CROSS THE SHARED ACCESS ROAD THAT WILL BE ONGOING DURING THE WORK UNDER THIS CONTRACT.
- THE CONTRACTOR IS ADVISED THAT THE FLOODWALL WORK ALONG THE SHARED ACCESS ROAD IN REACHES A AND B SHALL BE SCHEDULED AND PERFORMED IN A MANNER THAT DOES NOT AFFECT THE PIER 42 CONTRACTORS ACCESS REQUIREMENTS.

## CORLEARS HOOK FERRY ACCESS:

- MUST MAINTAIN ACCESS TO FERRY SERVICE AT ALL TIMES FOR DURATION OF THE PROJECT.
- MUST MAINTAIN PEDESTRIAN FERRY ACCESS FROM THE GENERAL VICINITY OF THE EXISTING CORLEARS HOOK BRIDGE AT ALL TIMES DURING CONSTRUCTION OF THE REPLACEMENT BRIDGE.
- FERRY OPERATES FROM APPROX. 0630 UNTIL 2130, 7 DAYS PER WEEK (SCHEDULE SUBJECT TO CHANGE).
- A CLEAR, LIGHTED AND FENCED PAVED PATH SHALL BE CREATED AND/OR MAINTAINED FROM THE FERRY LANDING TO THE CORLEARS HOOK FDR DRIVE CROSSING. FLAGGERS SHALL BE UTILIZED AS NEEDED TO HALT VEHICULAR TRAFFIC THAT MAY CROSS THE PEDESTRIAN PATH.
- ALL COSTS, UP TO AND INCLUDING THE INSTALLATION AND REMOVAL OF A TEMPORARY PEDESTRIAN BRIDGE, SHALL BE AS DESCRIBED IN SECTION ESCR-HW-901.

PHASE	OPEN PARK AMENITIES
1	CONVERTED COMPOST YARD, AMPHITHEATER/ BANDSHELL, BASKETBALL COURTS, VOLLEYBALL COURT, MULTI-USE FIELD, TENNIS COURTS, TENNIS HOUSE DANCE CIRCLE, BASEBALL FIELDS 3 & 4
2	10TH ST. COMFORT STATION, BASKETBALL COURT, 10TH ST. PLAYGROUND, BBQ AREA UPLAND PORTION OF PIER 42, FIELDS 1&2, FIREBOAT HOUSE, LAWN LAWN, FIELDS 5 & 6 FITNESS AREA, TRACK HOUSE, TRACK & FIELD, FIELD 7, CHALLENGE COURSE

## INCENTIVES:

- N/A

## WILLIAMSBURG BRIDGE CONTRACT WB-9:

- CONTRACT WB-9, WHICH INCLUDES STRUCTURAL STEEL REPAIRS IN THE COLUMNS, IS EXPECTED TO START SPRING 2022 AND EXTEND APPROX. ONE (1) YEAR. THE CONTRACTOR SHALL COORDINATE WITH THE WB-9 CONTRACTOR AS NECESSARY.

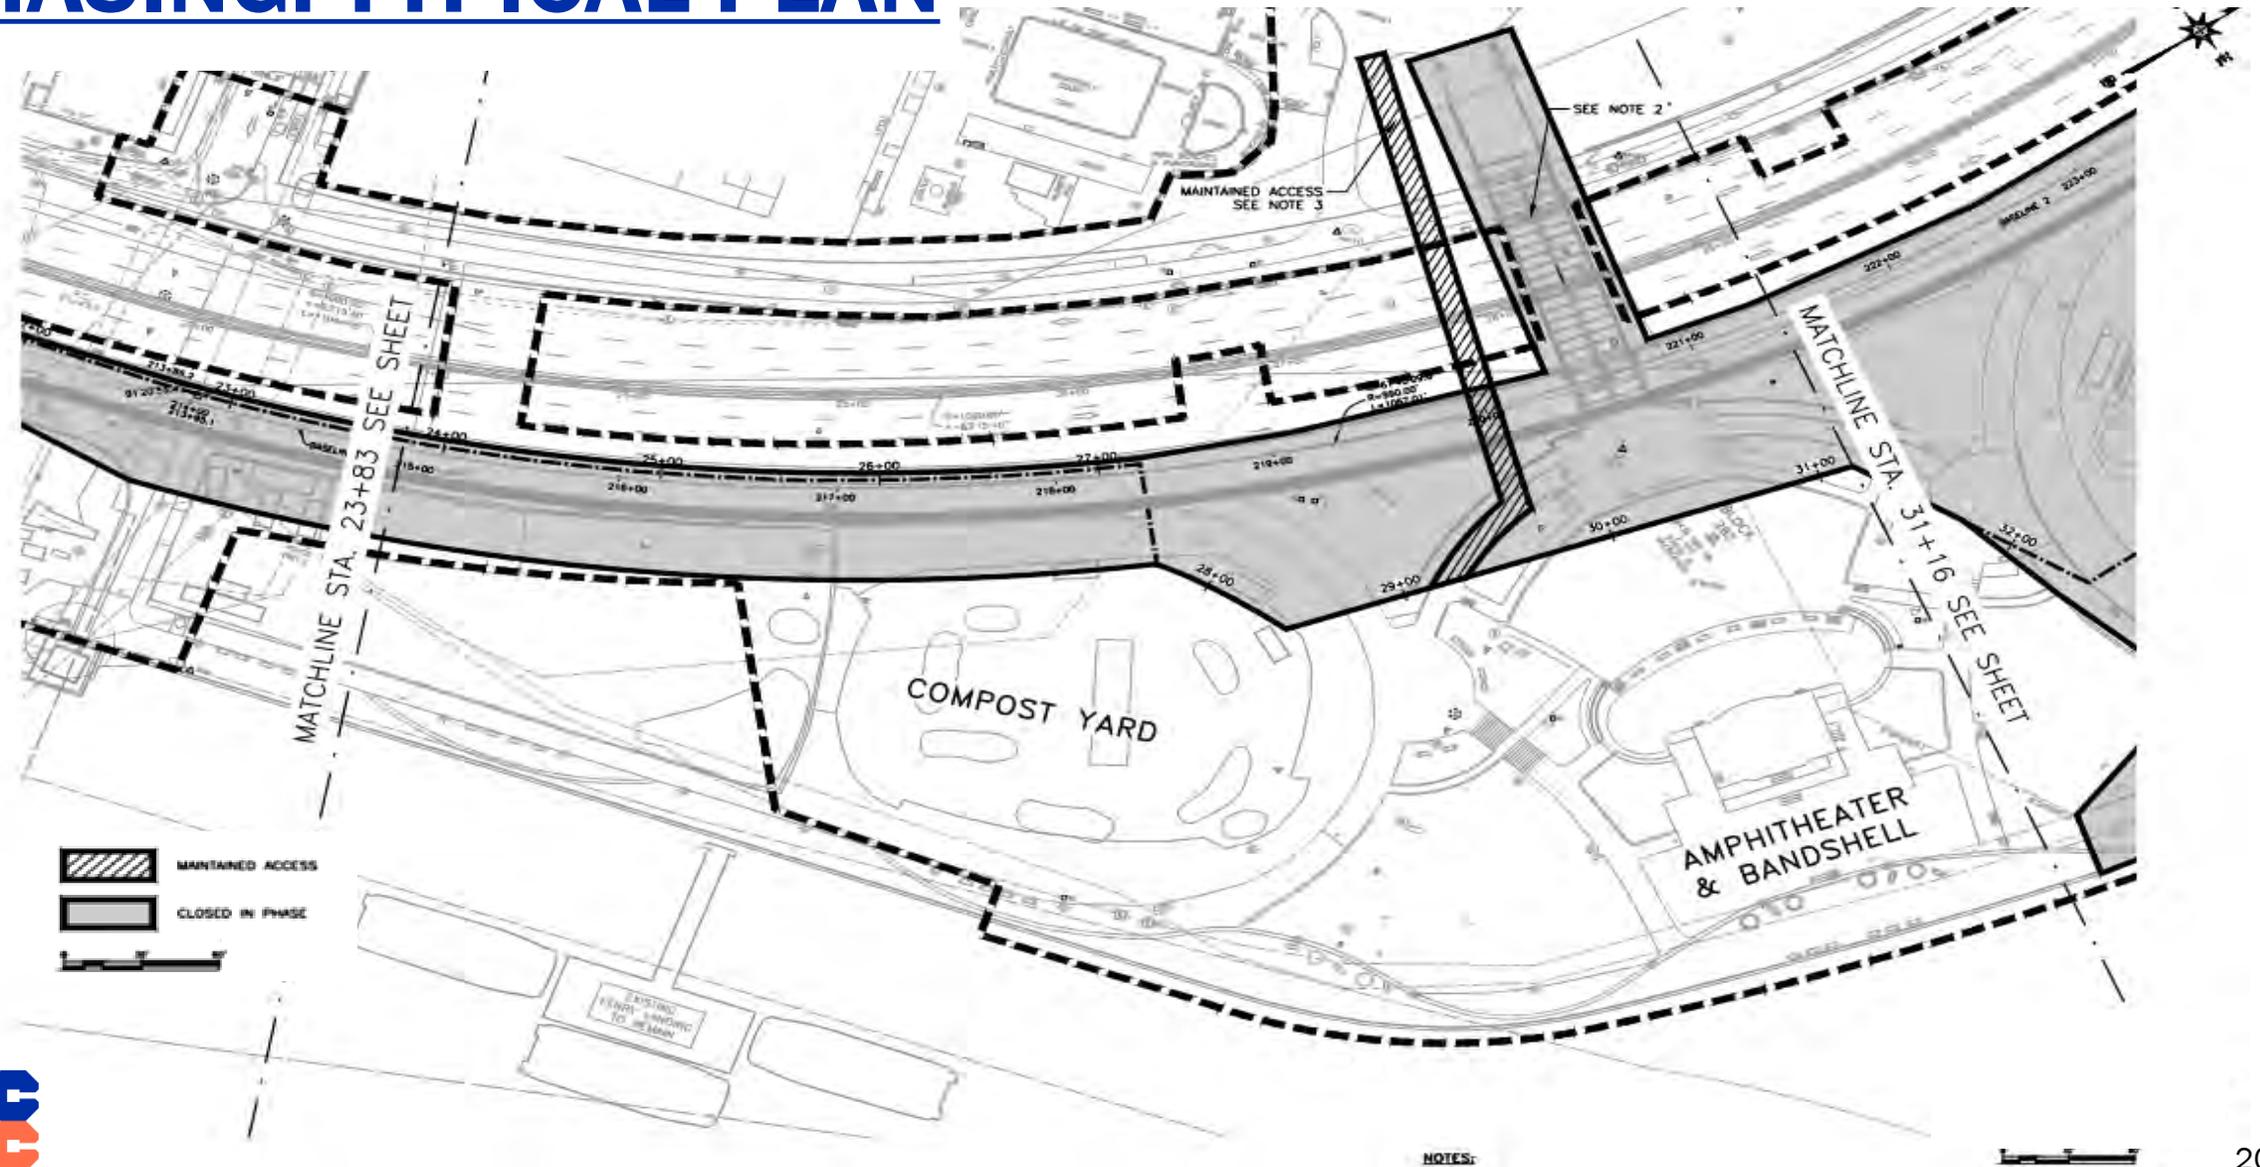

## CON EDISON TRANSMISSION LINE CARBON FIBER WRAPPING:

- ALL WORK ASSOCIATED WITH THE CARBON FIBER WRAPPING OF THE CON EDISON TRANSMISSION LINES SHALL BE COMPLETED NO LATER THAN JUNE 1, 2023 (6/1/23).

## ESSENTIAL FIRST HABITAT:

- IN ACCORDANCE WITH STIPULATIONS PROVIDED BY USACE, NO COFFERDAM INSTALLATION WORK SHALL BE PERFORMED BETWEEN JANUARY 15 TO MAY 31 TO MINIMIZE IMPACTS TO WINTER FLOUNDER EGGS AND LARVAE.

# PHASING: TYPICAL PLAN

# PHASING SPECIFICATIONS & TEMPORARY MEASURES

## Temporary Pedestrian Bridge (Corlears Hook)

- Park and ferry access

## Temporary Fencing and Security

- Maintain 24 hour access

## Grade Separation Protection

## Maintenance of Park Utilities

- Irrigation, lighting, etc.

## Sewer Flow Maintenance and Temporary Measures

- Temporary drainage lines, bulkheads, etc.

Addendum	Addendum Question No.	Bidder's Question	Response
4	1	Specification Section PK-ESCR 907 states that the fish cleaning table shall be fabricated by Forms+Surfaces. After speaking with the Contact person Jason Bajor, he informed me that they were "unable to locate vendors willing to provide the necessary rolled perimeter tubing. Therefore, we will not be able to provide a quote for this table. If the Landscape Architect is willing to redesign the table we could revisit this, but unfortunately we must pass on this request." Is the Landscape Architect willing to redesign the table, or is there a different fabricator that we could use for this item?	The table as designed has previously been fabricated by Forms +Surfaces and other manufacturers. If the bidder is not able to provide a quote from this manufacturer or the manufacture no longer produces the table, then the bidder must provide a bid price based on a alternate manufacturer that will qualify as an "approved equal" as noted in the specification.
4	2	Based on the naming conventions of the bid documents the files "Riis_Test Borings 2" and "Riis_Test Borings 3" appear to be missing. Please provide these files.	These are historic borings dated 1945. Were are not able to locate sheets 2 and 3. Please note that sheets 4 and 5 have historic borings around the 10th Street area.
4	3	At this time, bidders cannot reasonably quantify the nature and/or extent of potentially adverse impacts to the Project due to the ongoing COVID-19 pandemic. With that as a backdrop: a. Can bidders be permitted to qualify their bids to exclude adverse schedule and cost impacts due to the COVID-19 pandemic? b. Can the NYCDDC confirm that it will grant additional time and cover the Contractor's actual increased costs incurred due to adverse impacts caused by the COVID-19 pandemic? If not, what relief will the NYCDDC afford to the Contractor in the event of adverse schedule and/or cost impacts due to the COVID-19 pandemic?	a. No. b. No. Any delays and/or impacts that occur during the contract term will depend on the facts and circumstances at the time of the request and will be reviewed in accordance with the NYC Standard Construction Contract.
4	4	Please refer to contract drawings DS301. MH-B14 is bubbled from the previous bid documents and calls out pay item 51.21LB14000V. The current bid schedule does not include this pay item number. Please clarify.	51.21LB14000V is the correct item number for MH-B14 as shown on drawing DS301. See revised Bid Schedule, Addendum 4, Article 1.
4	5	Please refer to contract drawings DS102. Regulator M-24 is called out to be flood proofed and pay under item number 51.71C00M24. The current bid schedule does not include this pay item number. Please clarify	The revised drawing, DS102, will be provided post bid. Item 51.71C00M24 is not required. The bid item no. and flood proofing language callout will be removed from drawing DS102.
4	6	Please refer to contract drawing DS302. Note 2 states " For regulator strengthening, and modification schedule see sheets DS110 through DS111. Drawing DS110 is the Reach K civil demolition plan and sheet DS111 does not exist. Please advise.	The revised drawings will be provided post bid. Note No. 2 is no longer valid. Note 2 will be removed on all DS300 series drawings.
4	7	Please refer to contract drawing CU310. A note points to what looks like a detailed section of work, and states "Utility See Table CU310" There is no detail plan of this work on drawing CU310. Please clarify.	The callout "UTILITY SEE TABLE CU310" on sheet CU310 will be removed. A revised drawing CU310 will be included in the conformed set.
4	8	Please refer to drawing ESC117. No existing contours have been provided for Reach J. Please provide existing contours for this area.	Drawing ESC117 provides existing spot grades on the Phase 2 A plan view. Contours can also be found on the survey drawings provided in Appendix A, or refer to various landscape drawings.
4	9	Please confirm Items PK-ESCR 943 Bollards, the concrete base is paid under this item	PK-ESCR 943 includes concrete as indicated in the measurement and payment section of the specification.
4	10	Please confirm Items PK-ESCR 811 Concrete pavers the concrete base is paid under this item	PK-ESCR 811 includes concrete base as indicated in the measurement and payment section of the specification.
4	11	Please confirm Items PK-ESCR 50A and 50B. Canopy Area 1 and Area 2 8' H fence and gates showing on drawings A-101.01 and A250.01 are paid under the LS item	No, the fences and gates are paid under the following bid items: PK-ESCR 032 STEEL SLAT DOUBLE SWING GATE, 8'-0" HT., 35'-0" W. PK-ESCR 200 STEEL SLAT ROLLING GATE, 8'-0" HT., 25'-0" W. PK-ESCR 947 STEEL SLAT PRIVACY FENCE M&O
4	12	Please confirm Items PK-ESCR 50A and 50B. Canopy Area 1 and Area 2. Excavation, backfill, concrete, rebar and electrical are included in the LS item	Excavation, backfill, concrete, and rebar are included in the Lump Sum items for PK-ESCR 50A and 50B. Electrical is included in PK-ESCR 653 ELECTRICAL, LIGHTING AND PV WORK FOR M&O AREA 1 CANOPY and PK-ESCR 654 ELECTRICAL, LIGHTING AND PV WORK FOR M&O AREA 2 CANOPY
4	13	Please confirm Items PK-ESCR 501, 502 and 503 Excavation, backfill, concrete, rebar and Mechanical, electrical and plumbing are included in the LS item	Yes, PK-ESCR 501, 502, 503 include the referenced elements as indicated in the measurement and payment section of the specifications.
4	14	Please confirm Items PK-ESCR 943C Excavation, backfill, concrete and rebar are included in the LS item	Yes, PK-ESCR 943C includes the referenced elements as indicated in the measurement and payment section of the specifications.
4	15	Could you please provide a manufacturer(s) for item PK-ESCR 049 M+O PRE-FABRICATED BUILDING?	Manufacturers are listed in specification Section 13 34 70 of the Buildings Pages 2.1 Manufacturer
4	16	Regarding this: The bidder must, within the last ten (10) consecutive years prior to the bid opening, have successfully completed in a timely fashion at least two (2) projects with a construction value greater than \$400,000,000 for each individual project  Can those projects have been completed as Joint Ventures where [the bidder] was the lead member of the JV?	Yes.
4	17	Regarding this: The bidder must have had at least One Billion (\$1,000,000,000) in annual gross revenue for the prior fiscal year resulting from general construction work and specialty engineering work  Could that apply to a Joint Venture entity bidding SANDRESM1?	Yes.

1	PUE301	Replacement
2	PUE302	Replacement
3	PUE702	Replacement

Addendum	Addendum Question No.	Bidder's Question	Response
5	1	Specification section PK-ESCR 184 – Tennis Court Accessories Set says to reference the plans for the post and fittings. However, there are no drawings containing these items. The specifications also say to conform to NYCDOT Standard Highway Specifications and DPR Standard Detail Sheet 'Tennis Court Layout & Details'. The NYCDOT Standard Highway specifications do not contain any information about these tennis court items, and we were unable to find the DPR Standard Detail Sheet 'Tennis Court Layout & Details'. Could you please provide us with plans and specifications for these posts and fittings for the tennis courts?	Drawing LD001 includes the list of DPR Standard Details that identifies the sheet, name, number and issuance date for the 'Tennis Court Layout and Details' and also see legend. Drawing LD751 calls out details 2-9 on sheet 47 of the Parks Standard Detail Sheets.
5	2	On Drawing A503 (dwg #2374), Track & Field Building RCP, there is a note that identifies sprinklers throughout the structure and to "refer to Fire Protection Drawings". However, there are no sprinkler drawings in the package for this building, or any other on this project. Please identify where the sprinkler drawings are for this structure	Please see F-500 series drawings for the fire sprinklers for the Track and Field Building and FA-500 series drawings for the fire alarm system.
5	3	Is a PASSPort account required for newly formed Joint Ventures that do not have an EIN?	No. Each firm should register individually in Passport. If the JV wins the bid, then we will require JV registration with EIN in Passport.
5	4	Is there a specific form that should be used for projects submitted under this section [Vol. I, Page A-7, (A) Special Experience Requirements for the Bidder], or should bidders use the Qualification Form on Page A-41?	The Qualification Form on page A-41 should be used.
5	5	Is there a specific form that needs to be completed/signed for the \$1 billion annual gross revenue requirement? [Vol. I, Page A-8, (A) Special Experience Requirements for the Bidder]	There is no specific form.
5	6	Is there a specific form that should be used for projects submitted under this section [Vol. I, Page A-8, (B) Special Experience Requirements for Specific Areas of Work], or should bidders use the Qualification Form on Page A-41?	The Qualification Form on page A-41 should be used.

**Addendum 6 Attachment D**

<b>Drawing Sheet</b>		
<b>#</b>	<b>Sheet</b>	<b>New or Replacement</b>
<b>1</b>	<b>BC003</b>	<b>New</b>
<b>2</b>	<b>BC004</b>	<b>New</b>

Addendum	Addendum Question No.	Bidder's Question	Response
6	1	Due to the complex nature of the scope of work and working through these special circumstances with COVID19 which make interacting with potential subcontractors and suppliers more difficult and results in time delays, we respectfully request a six week extension to the bid date so that we can prepare a responsible and responsive proposal to the Prime bidders.	The bid date will not be changed.
6	2	Reference Corlears Hook Bridge Drawings. Sheets 107 and 108 (BC003 and BC004) are not included in this set of Drawings provided.	Refer to Addendum 6, Article 2.
6	3	Reference Drawing BC140 (150/2791): Corlears Hook Bridge Deck Sections. Under what Pay Item are the costs for the 1'8"W x 1'6"H Curbs on the bridge deck to be included ?	Curb (Parapet) shall be paid under Item 555.09, as shown on drawing BC140, Section C - DECK FASCIA SECTION.
6	4	Reference Drawing BC101 (110/2791): Corlears Hook Bridge Demolition Plan and Section 1 of 2. This drawing, as produced in the documents provided by NYC DDC, was apparently not scanned properly and portrays at a skew. Please provide a proper reproduction of this drawing.	There is no problem with drawing BC101 as provided by DDC.

## INFORMATION FOR BIDDERS

1. Description and Location of Work

The description and location of the work for which bids are requested are specified in Attachment 1, "Bid Information". Attachment 1 is included in the BID BOOKLET, VOLUME 1 OF 3.

2. Time and Place for Receipt of Bids

Sealed bids shall be received on or before the date and hour specified in Attachment 1, at which time they will be publicly opened and read aloud in the presence of the Commissioner or his or her representative, and any bidders who may desire to be present.

3. Definitions

The definitions set forth in the Procurement Policy Board Rules shall apply to this Invitation For Bids.

4. Invitation For Bids and Contract Documents

(A) Except for titles, sub-titles, headings, running headlines, tables of contents and indices (all of which are printed herein merely for convenience) the following, except for such portions thereof as may be specifically excluded, shall be deemed to be part of the Contract and the Invitation for Bids.

- (1) All provisions required by law to be inserted in this Contract, whether actually inserted or not
- (2) The Contract Drawings and Specifications
- (3) The General Conditions, the General Requirements and the Special Conditions, if any
- (4) The Contract
- (5) The Information for Bidders; Request for Proposals; Notice of Solicitation and Proposal For Bids; Bid or Proposal, and, if used, the Bid Booklet
- (6) The Budget Director's Certificate; all Addenda issued prior to the receipt of the bids; the Notice of Award; Performance and Payment Bonds, if required; and the Notice to Proceed with the Work.

(B) For particulars as to this procurement, including quantity and quality of the purchase, extent of the work or labor to be performed, delivery and performance schedule, and any other special instructions, prospective bidders are referred to the Invitation For Bids Documents. A copy of such documents can be obtained at the location set forth in Attachment 1.

(C) Deposit for Copy of Invitation For Bids Documents: Prospective bidders may obtain a copy of the Invitation For Bids Documents by complying with the conditions set forth in the Notice of Solicitation. The deposit must be in the form of a check or money order made payable to the City of New York, and drawn upon a state or national bank or trust company, or a check of such bank or trust company signed by a duly authorized officer thereof.

(D) Return of Invitation For Bids Documents: All Invitation For Bids Documents must be returned to the Department upon request. If the bidder elects not to submit a bid thereunder, the

Invitation For Bids Documents shall be returned to the Department, along with a statement that no bid will be submitted.

(E) Return of Deposit: Such deposit will be returned within 30 days after the award of the contract or the rejection of all bids as set forth in the advertisement, provided the Invitation For Bids Documents are returned to the location specified in Attachment 1, in physical condition satisfactory to the Commissioner.

(F) Additional Copies: Additional copies of the Invitation For Bids Documents may be obtained, subject to the conditions set forth in the advertisement for bids.

5. Pre-Bid Conference

A pre-bid conference shall be held as set forth in Attachment 1. Nothing stated at the pre-bid conference shall change the terms or conditions of the Invitation For Bids Documents, unless a change is made by written amendment as provided in Section 9 below. Failure to attend a mandatory pre-bid conference shall constitute grounds for the rejection of the bid.

6. Agency Contact

Any questions or correspondence relating to this bid solicitation shall be addressed to the Agency Contact person specified in Attachment 1.

7. Bidder's Oath

(A) The bid shall be properly signed by an authorized representative of the bidder and the bid shall be verified by the written oath of the authorized representative who signed the bid, that the several matters stated and information furnished therein are in all aspects true.

(B) A materially false statement willfully or fraudulently made in connection with the bid or any of the forms completed and submitted with the bid may result in the termination of any Contract between the City and the Bidder. As a result, the Bidder may be barred from participating in future City contracts as well as be subject to possible criminal prosecution.

8. Examination and Viewing of Site

(A) Pre-Bidding (Investigation) Viewing of Site -Bidders must carefully view and examine the site of the proposed work, as well as its adjacent area, and seek other usual sources of information, for they will be conclusively presumed to have full knowledge of any and all conditions on, about or above the site relating to or affecting in any way the performance of the work to be done under the Contract which were or should have been indicated to a reasonably prudent bidder. To arrange a date for visiting the work site, bidders are to contact the Agency Contact person specified in Attachment 1.

(B) Should the contractor encounter during the progress of the work subsurface conditions at the site materially differing from any shown on the Contract Drawings or indicated in the Specifications or such subsurface conditions as could not reasonably have been anticipated by the contractor and were not anticipated by the City, which conditions will materially affect the cost of the work to be done under the

Contract, the attention of the Commissioner must be called immediately to such conditions before they are disturbed. The Commissioner shall thereupon promptly investigate the conditions. If he finds that they do so materially differ, or that they could not have been reasonably anticipated by the contractor and were not anticipated by the City, the Contract may be modified with his written approval.

9. Examination of Proposed Contract

(A) Request for Interpretation or Correction: Prospective bidders must examine the Contract Documents carefully and before bidding must request the Commissioner in writing for an interpretation or correction of every patent ambiguity, inconsistency or error therein which should have been discovered by a reasonably prudent bidder. Such interpretation or correction, as well as any additional contract provisions the Commissioner may decide to include, will be issued in writing by the Commissioner as an addendum to the Contract, which will be transmitted to each person recorded as having received a copy of the Contract Documents from the Department. Transmission of such addendum will be by mail, e-mail, facsimile or hand delivery. Such addendum will also be posted at the place where the Contract Documents are available for the inspection of prospective bidders. Upon transmission as provided for herein, such addendum shall become a part of the Contract Documents, and binding on all bidders, whether or not actual notice of such addendum is shown.

(B) Only Commissioner's Interpretation or Correction Binding: Only the written interpretation or correction so given by the Commissioner shall be binding, and prospective bidders are warned that no other officer, agent or employee of the City is authorized to give information concerning, or to explain or interpret, the Contract.

(C) Documents given to a subcontractor for the purpose of soliciting the subcontractor's bid shall include either a copy of the bid cover sheet or a separate information sheet setting forth the project name, the Contract number (if available), the contracting agency and the Project's location.

10. Form of Bid

Each bid must be submitted upon the prescribed form and must contain: a) the name, residence and place of business of the person or persons making the same; b) the names of all persons interested therein, and if no other person is so interested, such fact must be distinctly stated; c) a statement to the effect that it is made without any connection with any other person making a bid for the same purpose and that it is in all respects fair and without collusion or fraud; d) a statement that no Council member or other officer or employee or person whose salary is payable in whole or part from the City Treasury is directly or indirectly interested therein or in the supplies, materials or equipment and work or labor to which it relates, or in any portion of the profits thereof; e) a statement that the bidder is not in arrears to the City or to any agency upon a debt or contract or taxes, and is not a defaulter as surety or otherwise upon any obligation to the City to any agency thereof, except as set forth in the bid.

THE BID SHALL BE TYPEWRITTEN OR WRITTEN LEGIBLY IN INK. THE BID SHALL BE SIGNED IN INK. ERASURES OR ALTERATIONS SHALL BE INITIALED BY THE SIGNER IN INK. FAILURE TO CONFORM TO THE REQUIREMENTS OF THIS SECTION 10 SHALL RESULT IN THE REJECTION OF THE BID.

11. Irrevocability of Bid

The prices set forth in the bid cannot be revoked and shall be effective until the award of the Contract, unless the bid is withdrawn as provided for in Sections 15 and 18 below.

12. Acknowledgment of Amendments

The receipt of any amendment to the Contract Documents shall be acknowledged by the bidder in its bid submission.

13. Bid Samples and Descriptive Literature

Bid samples and descriptive literature shall not be submitted by the bidder, unless expressly requested elsewhere in the Contract or Contract Documents. Any unsolicited bid samples or descriptive literature which are submitted shall not be examined or tested and shall not be deemed to vary any of the provisions of this Contract.

14. Proprietary Information/Trade Secrets

(A) The bidder shall identify those portions of the bid which it deems to be confidential, proprietary information or trade secrets, and provide justification why such materials shall not be disclosed by the City. All such materials shall be clearly indicated by stamping the pages on which such information appears, at the top and bottom thereof with the word "Confidential". Such materials stamped "Confidential" must be easily separable from the non-confidential sections of the bid.

(B) All such materials so indicated shall be reviewed by the Agency and any decision not to honor a request for confidentiality shall be communicated in writing to the bidder. For those bids which are unsuccessful, all such confidential materials shall be returned to the bidder. Prices, makes and model or catalog numbers of the items offered, deliveries, and terms of payment shall be publicly available after bid opening, regardless of any designation of confidentiality made by the bidder.

15. Pre-Opening Modification or Withdrawal of Bids

Bids may be modified or withdrawn by written notice received in the office designated in Attachment 1, before the time and date set for the bid opening. If a bid is withdrawn in accordance with this Section, the bid security, if any, shall be returned to the bidder.

16. Bid Evaluation and Award

In accordance with the New York City Charter, the Procurement Policy Board Rules and the terms and conditions of this Invitation For Bids, this Contract shall be awarded, if at all, to the responsible bidder whose bid meets the requirements and evaluation criteria set forth in the Invitation For Bids, and whose bid price is either the most favorable bid price or, if the Invitation For Bids so states, the most favorable evaluated bid price. A bid may not be evaluated for any requirement or criterion that is not disclosed in the Invitation For Bids.

Restriction: No negotiations with any bidder shall be allowed to take place except under the circumstances and in the manner set forth in Section 21. Nothing in this Section shall be deemed to permit a contract award to a bidder submitting a higher quality item than that designated in the Invitation For Bids, if that bid is not also the most favorable bid.

17. Late Bids, Late Withdrawals and Late Modifications

Any bid received at the place designated in the solicitation after the time and date set for receipt of bids is late and shall not be considered. Any request for withdrawal or modification received at the place designated in the solicitation after the time and date set for receipt of bids is late and shall not be considered. The exception to this provision is that a late modification of a successful bid that makes the bid terms more favorable to the City shall be considered at any time it is received.

18. Withdrawal of Bids.

Except as provided for in Section 15, above, a bidder may not withdraw its bid before the expiration of forty-five (45) days after the date of the opening of bids; thereafter, a bidder may withdraw its bid only in writing and in advance of an actual award. If within sixty (60) days after the execution of the Contract, the Commissioner fails to fix the date for commencement of work by written notice to the bidder, the bidder, at his option, may ask to be relieved of his obligation to perform the work called for by written notice to the Commissioner. If such notice is given to the Commissioner, and the request to withdraw is granted, the bidder waives all claims in connection with this Contract.

19. Mistake in Bids

(A) Mistake Discovered Before Bid Opening: A bidder may correct mistakes discovered before the time and date set for bid opening by withdrawing or correcting the bid as provided in Section 15 above.

(B) Mistakes Discovered Before Award

(1) In accordance with General Municipal Law (Section 103, subdivision 11), where a unilateral error or mistake is discovered in a bid, such bid may be withdrawn upon written approval of the Agency Chief Contracting Officer if the following conditions are met:

- (a) The mistake is known or made known to the agency prior to the awarding of the Contract or within 3 days after the opening of the bid, whichever period is shorter; and
- (b) The price bid was based upon an error of such magnitude that enforcement would be unconscionable; and
- (c) The bid was submitted in good faith and the bidder submits credible evidence that the mistake was a clerical error as opposed to a judgment error; and
- (d) The error in the bid is actually due to an unintentional and substantial arithmetic error or an unintentional omission of a substantial quantity of work, labor, material or services made directly in the compilation of the bid, which unintentional arithmetic error or unintentional omission can be clearly shown by objective evidence drawn from inspection of the original work paper, documents, or materials used in the preparation of the bid sought to be withdrawn; and
- (e) It is possible to place the agency in the same position as existed prior to the bid.

(2) Unless otherwise required by law, the sole remedy for a bid mistake in accordance with this Article shall be withdrawal of the bid, and the return of the bid bond, or other security, if any, to the bidder. Thereafter, the agency may, in its discretion, award the Contract to the next lowest bidder or rebid the Contract. Any amendment to or reformation of a bid or a Contract to rectify such an error or mistake

therein is strictly prohibited.

(3) If the mistake and the intended correct bid are clearly evident on the face of the bid document, the bid shall be corrected to the intended correct bid and may not be withdrawn. Examples of mistakes that may be corrected are typographical errors, errors in extending unit prices, transposition errors and arithmetical errors.

## 20. Low Tie Bids

(A) When two or more low responsive bids from responsible bidders are identical in price, meeting all the requirements and criteria set forth in the Invitation For Bids, the Agency Chief Contracting Officer will break the tie in the following manner and order of priority:

- (1) Award to a certified New York City small, minority or woman-owned business entity bidder;
- (2) Award to a New York City bidder;
- (3) Award to a certified New York State small, minority or woman-owned business bidder;
- (4) Award to a New York State bidder.

(B) If two or more bidders still remain equally eligible after application of paragraph (A) above, award shall be made by a drawing by lot limited to those bidders. The bidders involved shall be invited to attend the drawing. A witness shall be present to verify the drawing and shall certify the results on the bid tabulation sheet.

## 21. Rejection of Bids

(A) Rejection of Individual Bids: The Agency may reject a bid if:

- (1) The bidder fails to furnish any of the information required pursuant to Section 24 or 28 hereof; or if
- (2) The bidder is determined to be not responsible pursuant to the Procurement Policy Board Rules; or if
- (3) The bid is determined to be non-responsive pursuant to the Procurement Policy Board Rules; or if
- (4) The bid, in the opinion of the Agency Chief Contracting Officer, contains unbalanced bid prices and is thus non-responsive, unless the bidder can show that the prices are not unbalanced for the probable required quantity of items, or if the imbalance is corrected pursuant to Section 15.

(B) Rejection of All Bids: The Agency, upon written approval by the Agency Chief Contracting Officer, may reject all bids and may elect to resolicit bids if in its sole opinion it shall deem it in the best interest of the City so to do.

(C) Rejection of All Bids and Negotiation With All Responsible Bidders: The Agency Head may determine that it is appropriate to cancel the Invitation For Bids after bid opening and before award and to complete the acquisition by negotiation. This determination shall be based on one of the following reasons:

- (1) All otherwise acceptable bids received are at unreasonable prices, or only one bid is received and the Agency Chief Contracting Officer cannot determine the reasonableness of the bid price, or no responsive bid has been received from a responsible bidder; or
- (2) In the judgment of the Agency Chief Contracting Officer, the bids were not independently arrived at in open competition, were collusive, or were submitted in bad faith.

(D) When the Agency has determined that the Invitation for Bids is to be canceled and that use of negotiation is appropriate to complete the acquisition, the contracting officer may negotiate and award the Contract without issuing a new solicitation, subject to the following conditions:

- (1) prior notice of the intention to negotiate and a reasonable opportunity to negotiate have been given by the contracting officer to each responsible bidder that submitted a bid in response to the Invitation for Bids;
- (2) the negotiated price is the lowest negotiated price offered by a responsible bidder; and
- (3) the negotiated price is lower than the lowest rejected bid price of a responsible bidder that submitted a bid in response to the Invitation for Bids.

22. Right to Appeal Determinations of Non-Responsiveness or Non-Responsibility and Right to Protest Solicitations and Award

The bidder has the right to appeal a determination of non-responsiveness or non-responsibility and has the right to protest a solicitation and award. For further information concerning these rights, the bidder is directed to the Procurement Policy Board Rules.

23. Affirmative Action and Equal Employment Opportunity

This Invitation For Bids is subject to applicable provisions of Federal, State and Local Laws and executive orders requiring affirmative action and equal employment opportunity.

24. PASSPort COMPLIANCE

All vendors that intend to do business with the City of New York must complete a disclosure process in order to be considered for a contract. This disclosure process was formerly completed using Vendor Information Exchange System (VENDEX) paper-based forms. The City of New York has moved collection of vendor disclosure information online. In early August 2017, the New York City Mayor's Office of Contract Services (MOCS) launched the Procurement and Sourcing Solutions Portal (PASSPort), a new online procurement system that replaced the paper-VENDEX process. In anticipation of awards, all bidders must create online accounts in the new PASSPort system, and file all disclosure information using PASSPort. Paper submissions, including certifications of no changes to existing VENDEX packages, will not be accepted in lieu of complete online filings using PASSPort.

All vendors that intend to do business with the City, but specifically those that fall into any of the following categories, are required to enroll:

- Have a pending award with a City Agency; or
- Hold a current contract with a City Agency and have either an expiring VENDEX or expiring Certificate of No Change.

The Department of Design and Construction (DDC) and MOCS hereby notifies all proposers that the PASSPort system is available, and that disclosure filing completion is required prior to any award through this competitive bid.

To enroll in PASSPort and to access the PASSPort website (including online training), please visit [www.nyc.gov/passport](http://www.nyc.gov/passport). Contact MOCS at [passport@mocs.nyc.gov](mailto:passport@mocs.nyc.gov) for additional information and technical support.

25. Complaints About the Bid Process

The New York City Comptroller is charged with the audit of contracts in New York City. Any vendor who believes that there has been unfairness, favoritism or impropriety in the bid process should inform the Comptroller, Office of Contract Administration, One Centre Street, Room 835, New York, New York; telephone number (212) 669-2323.

26. Bid, Performance and Payment Security

(A) Bid Security: Each bid must be accompanied by bid security in an amount and type specified in Attachment 1 (BID BOOKLET, VOLUME 1 OF 3). The bid security shall assure the City of New York of the adherence of the bidder to its proposal, the execution of the Contract, and the furnishing of Performance and Payment Bonds by the bidder, if required in Attachment 1. Bid security shall be returned to the bidder as follows:

- (1) Within ten (10) days after the bid opening, the Comptroller will be notified to return the deposits of all but the three (3) lowest bidders. Within five (5) days after the award, the Comptroller will be notified to return the deposits of the remaining two unsuccessful bidders.
- (2) Within five (5) days after the execution of the Contract and acceptance of the Contractor's bonds, the Comptroller will be notified to return the bid security of the successful bidder or, if performance and payment bonds are not required, only after the sum retained under Article 21 of the Contract equals the amount of the bid security.
- (3) Where all bids are rejected, the Comptroller will be notified to return the deposit of the three (3) lowest bidders at the time of rejection.

(B) Performance and Payment Security: Performance and Payment Security must be provided in an amount and type specified in Attachment 1 (BID BOOKLET, VOLUME 1 OF 3). The performance and payment security shall be delivered by the contractor prior to or at the time of execution of the Contract. If a contractor fails to deliver the required performance and payment security, its bid security shall be enforced, and an award of Contract may be made to the next lowest responsible and responsive bidder, or the contract may be rebid.

(C) Acceptable Types of Security: Acceptable types of security for bids, performance, and payment shall be limited to the following:

- (1) a one-time bond in a form satisfactory to the City;
- (2) a bank certified check or money order;
- (3) obligations of the City of New York; or
- (4) other financial instruments as determined by the Office of Construction in consultation with the Comptroller.

Whenever the successful bidder deposits obligations of the City of New York as performance and payment security, the Comptroller may sell and use the proceeds thereof for any purpose for which the principal or surety on such bond would be liable under the terms of the Contract. If the money is deposited with the Comptroller, the successful bidder shall not be entitled to receive interest on such money from the City.

(D) Form of Bonds: Security provided in the form of bonds must be prepared on the form of bonds authorized by the City of New York. Forms for bid, performance, and payment bonds are included in the Invitation for Bids Documents. Such bonds must have as surety thereunder such surety company or companies as are: (1) approved by the City of New York; (2) authorized to do business in the State of New York, and (3) approved by the Department of the Treasury of the United States. Premiums for any required bonds must be included in the base bid.

The bidder is advised that submission of a bid bond where the surety on such bond fails to meet the criteria set forth herein, shall result in the rejection of the bid as non-responsive.

The Department of the Treasury of the United States advises that information concerning approved surety companies may be obtained as follows: (1) from the Government Printing Office at 215-364-6465; (2) through the Internet at <https://www.fiscal.treasury.gov/surety-bonds/>.

(E) Power of Attorney: Attorneys in fact who sign bid, performance, or payment bonds must file with each bond a certified copy of their power of attorney to sign said bonds.

27. Failure to Execute Contract

In the event of failure of the successful bidder to execute the Contract and furnish the required security within ten (10) days after notice of the award of the Contract, the deposit of the successful bidder or so much thereof as shall be applicable to the amount of the award made shall be retained by the City, and the successful bidder shall be liable for and hereby agrees to pay on demand the difference between the price bid and the price for which such Contract shall be subsequently awarded, including the cost of any required reletting and less the amount of such deposit. No plea of mistake in such accepted bid shall be available to the bidder for the recovery of the deposit or as a defense to any action based upon such accepted bid. Further, should the bidder's failure to comply with this Section cause any funding agency, body or group (Federal, State, City, Public, Private, etc.) to terminate, cancel or reduce the funding on this project, the bidder in such event shall be liable also to the City for the amount of actual funding withdrawn by such agency on this project, less the amount of the forfeited deposit.

28. Bidder Responsibilities and Qualifications

(A) Bidders must include with their bids all information necessary for a determination of bidder responsibility, as set forth in the Specifications.

(B) The Agency may require any bidder or prospective bidder to furnish all books of account, records, vouchers, statements or other information concerning the bidder's financial status for examination as may be required by the Agency to ascertain the bidder's responsibility and capability to perform the Contract. If required, a bidder must also submit a sworn statement setting forth such information as the Agency may require concerning present and proposed plant and equipment, the personnel and qualifications of his working organizations, prior experience and performance record.

(C) Oral Examination on Qualifications: In addition thereto, and when directed by the Agency, the bidder, or a responsible officer, agent or employee of the bidder, must submit to an oral examination to be conducted by the Agency in relation to his proposed tentative plan and schedule of

operations, and such other matters as the Agency may deem necessary in order to determine the bidder's ability and responsibility to perform the work in accordance with the Contract. Each person so examined must sign and verify a stenographic transcript of such examination noting thereon such corrections as such person may desire to make.

(D) If the bidder fails or refuses to supply any of the documents or information set forth in paragraph (B) hereof or fails to comply with any of the requirements thereof, the Agency may reject the bid.

29. Employment Report

In accordance with Executive Order No. 50 (1980) as modified by Executive Order 108 (1986), the filing of a completed Employment Report (ER) is a requirement of doing business with the City of New York for construction contractors with contracts of \$1,000,000 or more and subcontractors with construction subcontracts of \$750,000 or more. The required forms and information are included in the Bid Booklet.

30. Labor Law Requirements

(A) General: The successful bidder will be required to comply strictly with all Federal, State and local labor laws and regulations.

(B) New York State Labor Law: This Contract is subject to New York State Labor Law Section 220, which requires that construction workers on the site be paid prevailing wages and supplements. The Contractor is reminded that all wage provisions of this Contract will be enforced strictly and failure to comply will be considered when evaluating performance. Noncompliance may result in the contractor being debarred by the City from future contracts. Complaints filed with the Comptroller may result in decisions which may debar a contractor from bidding contracts with any state governmental entity and other political subdivisions.

(C) Records: The Contractor is expected to submit accurate payroll reports and other required documents and verify attendance and job classifications being utilized in compliance with the law, Contract provisions and agency procedures.

31. Insurance

(A) Bidders are advised that the insurance requirements contained herein are regarded as material terms of the Contract. As required by Article 22 of the Contract, the contractor must effect and maintain with companies licensed and authorized to do business in the State of New York, the types of insurance set forth therein, when required by and in the amounts set forth in Schedule A of the General Conditions. Such required insurance must be provided from the date the contractor is ordered to commence work and up to the date of final acceptance of all required work.

(B) The contractor must, within ten days of receipt of the notice of award, submit the following insurance documentation: (a) original certificate of insurance for general liability in the amount required by Schedule A of the General Conditions, and (b) original certificates of insurance or other proof of coverage for workers' compensation and disability benefits, as required by Section 57 of the New York State Workers' Compensation Law and Section 220 of the Disability Benefits Law.

32. Lump Sum Contracts

(A) Comparison of Bids: Bids on Lump Sum Contracts will be compared on the basis of the lump sum price bid, adjusted for alternate prices bid, if any.

(B) Lump Sum Bids for “General Construction Work” which include excavation shall include all necessary excavation work defined in the Specifications as being included in the lump sum bid. The bidder shall also bid a unit price for the additional cost of excavating material which is defined in the Specifications as excavation for which additional payment will be made. The total estimated additional cost of removing such material will be taken as the quantity set forth in the Engineer’s Estimate multiplied by the unit price bid. This total estimated cost of additional excavation shall be added to the lump sum bid for the General Construction Work for the purpose of comparing bids to determine the low bidder.

(C) Variations from Engineer’s Estimate: The Engineer’s Estimate of the quantity of excavation for which additional payment will be made is approximate only and is given solely to be used as a uniform basis for the comparison of bids and such estimate is not to be considered as part of this contract. The quantities actually required to complete the contract work may be more or less than the quantities in the Engineer’s Estimate and, if so, no action for damages or for loss of profits shall accrue to the contractor by reason thereof.

33. Unit Price Contracts

(A) Comparison of Bids: Bids on Unit Price Contracts will be compared on the basis of a total estimated price, arrived at by taking the sum of the estimated quantities of such items, in accordance with the Engineer’s Estimate of Quantities set forth in the Bid Schedule, multiplied by the corresponding unit prices, and including any lump sum bids on individual items.

(B) Variations from Engineer’s Estimate: Bidders are warned that the Engineer’s Estimate of Quantities on the various items of work and materials is approximate only, given solely to be used as a uniform basis for the comparison of bids, and is not be considered part of this contract. The quantities actually required to complete the contract work may be less or more than so estimated, and if so, no action for damages or for loss of profits shall accrue to the contractor by reason thereof.

(C) Overruns: The terms and conditions applicable to overruns of unit price items are set forth in Article 26 of the Contract.

34. Excise Tax

Bidders are referred to the Specifications for information on Federal Excise Tax exemptions.

35. Licenses and Permits

The successful bidder will be required to obtain all necessary licenses and permits necessary to perform the work.

36. Multiple Prime Contractors

If more than one prime contractor will be involved on this project, all contractors are required to examine the Invitation for Bid packages for all other parts of the project.

37. Locally Based Enterprise Requirements (LBE)

This Contract is subject to the requirements of Administrative Code, Section 6-108.1, and the regulations promulgated thereunder. No construction contract will be awarded unless and until these requirements have been complied with in their entirety. The bidder is advised of the provisions set forth below, as well as the provisions with respect to the Locally Based Enterprise Program contained in Article 67 of the Contract. The contractor is advised that:

(A) If any portion of the Contract is subcontracted, not less than ten percent of the total dollar amount of the contract shall be awarded to locally based enterprises (“LBEs”); except, where less than ten percent of the total dollar amount of the Contract is subcontracted, such lesser percentage shall be so awarded.

(B) No contractor shall require performance and payment bonds from LBE subcontractors.

(C) No Contract shall be awarded unless the contractor first identifies in its bid:

- (1) the percentage, dollar amount and type of work to be subcontracted; and
- (2) the percentage, dollar amount and type of work to be subcontracted to LBEs.

(D) Within ten calendar days after notification of low bid, the apparent low bidder shall submit an “LBE Participation Schedule” to the contracting agency. If such schedule does not identify sufficient LBE subcontractors to meet the requirements of Administrative Code Section 6-108.1, the apparent low bidder shall submit documentation of its good faith efforts to meet such requirements.

(1) The “LBE Participation Schedule” shall include:

- (a) the name and address of each LBE that will be given a subcontract,
- (b) the percentage, dollar amount and type of work to be subcontracted to the LBE, and
- (c) the dates when the LBE subcontract work will commence and end.

(2) The following documents shall be attached to the “LBE Participation Schedule”:

- (a) verification letters from each subcontractor listed in the “LBE Participation Schedule” stating that the LBE will enter into a formal agreement for work,
- (b) certification documents of any proposed LBE subcontractor which is not on the LBE certified list, and
- (c) copies of the certification letter of any proposed subcontractor which is an LBE.

(3) Documentation of good faith efforts to achieve the required LBE percentage shall include as appropriate but not limited to the following:

- (a) attendance at prebid meetings, when scheduled by the agency, to advise bidders of contract requirements;

- (b) advertisement where appropriate in general circulation media, trade association publications and small business media of the specific subcontracts that would be at least equal to the percentage goal for LBE utilization specified by the contractor;
- (c) written notification to association of small, minority and women contractors soliciting specific subcontractors;
- (d) written notification by certified mail to LBE firms that their interest in the contract is solicited for specific work items and their estimated values;
- (e) demonstration of efforts made to select portions of the work for performance by LBE firms in order to increase the likelihood of achieving the stated goal;
- (f) documented efforts to negotiate with LBE firms for specific subcontracts, including at a minimum:
  - (i) The names, address and telephone numbers of LBE firms that are contacted;
  - (ii) A description of the information provided to LBE firms regarding the plans and specifications for portions of the work to be performed;
  - (iii) Documentation showing that no reasonable price can be obtained from LBE firms;
  - (iv) A statement of why agreements with LBE firms were not reached;
- (g) a statement of the reason for rejecting any LBE firm which the contractor deemed to be unqualified; and
- (h) documentation of efforts made to assist the LBE firms contacted that needed assistance in obtaining required insurance.

(E) Unless otherwise waived by the Commissioner with the approval of the Office of Economic and Financial Opportunity, failure of a proposed contractor to provide the information required by paragraphs (C) and (D) above may render the bid non-responsive and the Contract may not be awarded to the bidder. If the contractor states that it will subcontract a specific portion of the work, but can demonstrate despite good faith efforts it cannot achieve its required LBE percentage for subcontracted work until after award of Contract, the Contract may be awarded, subject to a letter of compliance from the contractor stating that it will comply with Administrative Code Section 6-108.1 and subject to approval by the Commissioner. If the contractor has not met its required LBE percentage prior to award, the contractor shall demonstrate that a good faith effort has been made subsequent to award to obtain LBEs on each subcontract until it meets the required percentage.

(F) When a bidder indicates prior to award that no work will be subcontracted, no work may be subcontracted without the prior written approval of the Commissioner, which shall be granted only if the contractor in good faith seeks LBE subcontractors at least six weeks prior to the start of work.

(G) The contractor may not substitute or change any LBE which was identified prior to award of the contract without the written permission of the Commissioner. The contractor shall make a written application to the Commissioner for permission to make such substitution or change, explaining why the contractor needs to change its LBE subcontractor and how the contractor will meet its LBE subcontracting requirement. Copies of such application must be served on the originally identified LBE by certified mail return receipt requested, as well as the proposed substitute LBE. The Commissioner shall determine whether or not to grant the contractor's request for substitution.

### 38. Bid Submission Requirements

The Bid Submission Requirements are set forth in the BID BOOKLET VOLUME 1 OF 3.

39. Comptroller's Certificate

This Contract shall not be binding or of any force unless it is registered by the Comptroller in accordance with Section 328 of the City Charter and the Procurement Policy Board Rules. This Contract shall continue in force only after annual appropriation of funds by the City of New York and certification as hereinabove set forth.

40. Procurement Policy Board Rules

This Invitation For Bids is subject to the Rules of the Procurement Policy Board of the City of New York. In the event of a conflict between said Rules and a provision of this Invitation For Bids, the Rules shall take precedence.

41. Viewing of Submitted Bid Documents

In accordance with Procurement Policy Board Rules of the City of New York, Section 3-02, the submitted bid documents will be available to view immediately after completion of the bid opening and by appointment for up to 72 hours after the bid opening.

42. DDC Safety Requirements

The DDC Safety Requirements apply to the work to be performed pursuant to the Contract. The DDC Safety Requirements are set forth on the following pages.

**CITY OF NEW YORK  
DEPARTMENT OF DESIGN AND CONSTRUCTION  
SAFETY REQUIREMENTS FOR CONSTRUCTION  
CONTRACTS**

January 2020

*THE DDC SAFETY REQUIREMENTS FOR CONSTRUCTION CONTRACTS INCLUDE THE FOLLOWING SECTIONS:*

<b>I. POLICY ON SITE SAFETY.....</b>	<b>2</b>
<b>II. PURPOSE .....</b>	<b>2</b>
<b>III. DEFINITIONS.....</b>	<b>2</b>
<b>IV. RESPONSIBILITIES.....</b>	<b>4</b>
<b>V. SAFETY QUESTIONNAIRE .....</b>	<b>7</b>
<b>VI. SITE SAFETY PLAN .....</b>	<b>7</b>
<b>VII. KICK-OFF/PRE-CONSTRUCTION MEETINGS AND SAFETY REVIEW .....</b>	<b>9</b>
<b>VIII. EVALUATION DURING WORK IN PROGRESS.....</b>	<b>9</b>
<b>IX. SAFETY PERFORMANCE EVALUATION .....</b>	<b>10</b>

## I. POLICY ON SITE SAFETY

The City of New York Department of Design and Construction (DDC) is committed to a policy of injury and illness prevention and risk management for construction work that will ensure the safety and health of the workers engaged in the projects and the protection of the general public. Therefore, it is DDC's policy that work carried out by Contractors on DDC contracts must, at a minimum, comply with the most current versions of all applicable federal, state and city laws, rules, and regulations, including without limitation:

- ❑ Code of Federal Regulations, Title 29, Part 1926 (29 CFR 1926) and applicable Sub-parts of Part 1910 – U.S. Occupational Safety and Health Administration (OSHA);
- ❑ Federal Highway Administration – Manual on Uniform Traffic Control Devices (MUTCD);
- ❑ New York Codes, Rules and Regulations (NYCRR), Title 12, Part 23 – Protection in Construction, Demolition and Excavation Operations;
- ❑ New York Codes, Rules and Regulations (NYCRR), Title 16, Part 753 – Protection of Underground Facilities;
- ❑ New York City Administrative Code, Title 28 – New York City Construction Codes;
- ❑ Rules of the City of New York, Title 15, Chapter 13 – Rules Pertaining To the Prevention of the Emission of Dust from Construction Related Activities;
- ❑ Rules of the City of New York, Title 15, Chapter 28 – Citywide Construction Noise Mitigation;
- ❑ Rules of the City of New York, Title 34 Chapter 2 – NYCDOT Highway Rules.

The Contractor will be required to comply with all new and/or revised federal, state and city laws, rules, and regulations, issued during the course of the project, at the expense of the Contractor without any additional costs to the DDC.

## II. PURPOSE

The purpose of this policy is to ensure that Contractors perform their work and supervise their employees in accordance with all applicable federal, state and city rules and regulations. Further, Contractors will be expected to minimize or eliminate jobsite and public hazards, through a planning, inspection, auditing and corrective action process. The goal is to control risks so that injuries, illnesses, and accidents to contractors' employees, DDC employees and the general public, as well as damage to city-owned and private property, are reduced to the lowest level feasible.

## III. DEFINITIONS

**Agency Chief Contracting Officer (ACCO):** The ACCO will mean the person delegated authority by the Commissioner to organize and supervise the procurement activity of subordinate Agency staff in conjunction with the City Chief Procurement Officer (CCPO).

**Competent Person:** As defined by OSHA, an individual who is capable of identifying existing and predictable hazards in the surroundings or working conditions that are unsanitary, hazardous, or dangerous to employees or the general public, and who has authorization to take prompt corrective measures to eliminate them. This individual will have completed, at a minimum an authorized 30-hour OSHA Construction Safety Course. The Contractor may be required to provide more than one competent person due to construction operations and based on the number of active work sites.

**Construction Safety Auditor:** A representative of the Office of Construction Safety who provides inspection and assessment services to enhance health and safety on all DDC construction projects. The activities of the Construction Safety Auditor include performing site audits, reviewing safety plans, reviewing construction permits, drawings, verifying Contractor's compliance with applicable federal, state and city laws, rules, regulations, and DDC Contract Safety Requirements, etc. and rendering technical advice and assistance to DDC Resident Engineers and Project Managers.

**Office of Construction Safety:** A unit of DDC Safety and Site Support that assesses contractor's safety on DDC jobsites and advises responsible parties of needed corrective actions.

**Registered Construction Superintendent:** For certain projects, as defined in New York City Construction Codes – Title 28, the contractor will provide a Construction Superintendent registered with the NYC Department of Buildings and responsible for all duties as defined in Chapter 33 of Title 1 of the Rules of the City of New York.

**Contractor:** For purposes of these Safety Requirements, the term “Contractor” will mean any person or entity that enters into a contract for the performance of construction work on a DDC project. The term “Contractor” will include any person or entity which enters into any of the following types of contracts: (1) a prime construction contract for a specific project, (2) a prime construction contract using the Job Order Contracting System (“JOCS Contract”), and (3) a subcontract with a CM/Builder (“First Tier Subcontract”).

**Daily Safety Job Briefing:** Daily jobsite safety briefings, given to all jobsite personnel at project site by the Contractor before work begins and/or if hazards or potential hazards are discovered while working, with the purpose of discussing the scheduled activities for the day, the hazards related to these activities, activity specific safety procedures, and Job Hazard Analysis associated with the scheduled construction work. Daily jobsite briefings will be documented, available at the jobsite, and will include at a minimum, topics, name and signature of the person conducting the briefing session, names and signatures of attendants, name of the designated competent person, contactor’s name, DDC Project ID, date, time, and location.

**Director – Office of Construction Safety:** Responsible for the operations of the Office of Construction Safety and the DDC Site Safety management programs.

**Job Hazard Analysis (JHA):** A process of identifying the major job tasks and any potential site-specific hazards that may be present during construction and establishing the means and methods to eliminate or control those hazards. A JHA will be documented, available at the jobsite and will include at a minimum work tasks, being performed, identified hazards, control methods for the identified hazards, contractor’s name, DDC Project ID, location, date, name and signature of certifying person. A JHA is a living document that will be re-evaluated and revised to address new hazards and tasks that may develop and will be present at the worksite and produced upon request.

**Qualified Person:** As defined by OSHA, an individual who, by possession of a recognized degree, certificate, license, or professional standing, or who by extensive knowledge, training, and experience, has successfully demonstrated his or her ability to solve problems relating to the subject matter, the work, or the project. Qualified Persons are required under regulation to address issues pertaining, but without limit, to fall protection, scaffold design, maintenance and protection of traffic, and excavation protective system, among others.

**Project Site:** Those areas indicated in the Contract Documents where the Work is to be performed.

**Project Safety Representative:** The designated Project Safety Representative will have at a minimum an OSHA 30-hour Construction Safety Course and other safety training applicable to Contractor’s/subcontractor’s project work. This individual will be responsible to oversee safety performance of the required construction work, conduct documented daily safety inspections, and implement corrective actions to maintain a safe work site. The Project Safety Representative must have sufficient experience and skills necessary to thoroughly understand the health and safety hazards and controls and must have authority to undertake corrective actions. A dedicated full-time Project Safety Representative may be required on large projects and projects deemed by DDC to be particularly high risk. DDC reserves the right to request a dedicated full-time Project Safety Representative for any reason at any time during the course of the project at the expense of the Contractor without any additional costs to the DDC. The full-time Project Safety Representative will be present at the site during all work activities.

**Resident Engineer (“RE”):** Representative of the Commissioner duly designated by the Commissioner to be his/her representative at the site of the work. The RE may be a consultant retained by DDC, including a Construction Management (CM) or Resident Engineer Inspection (REI) firm. If DDC has retained a CM, REI or other consultant firm to perform management and oversight for the Project (e.g., CM-Builder, CM-Design-Builder, Project Manager, Program Manager), that CM, REI or other consultant is the Resident Engineer for purposes of these Safety Requirements.

**Safety Questionnaire:** Used by DDC to evaluate Contractor’s current and past safety performance. It is required to be completed by all Contractors initially when submitting bids for Construction work, or when being pre-qualified and updated annually or as requested by the DDC.

**Site Safety Manager:** For certain projects, as defined in New York City Construction Codes – Title 28, the Contractor will provide a Site Safety Manager with a Site Safety Manager License issued by the New York City Department of Building.

**Site Safety Plan:** A site-specific safety plan developed by the Contractor for a DDC project. The Site Safety Plan will identify the project work scope, identify hazards associated with the project work and include project specific safety procedures and training appropriate and necessary to complete the work. The Site Safety Plan will be submitted within 30 days from the Award Date or as otherwise directed and is subject to review and acceptance by the Office of Construction Safety prior to the commencement of work at the site.

**Unsafe or Unhealthy Condition:** A condition that could be potentially hazardous to the health and safety of personnel or the public, and/or damaging to equipment, machinery, property, or the environment.

**Weekly Safety Meetings:** Weekly jobsite safety meetings, given to all jobsite personnel by Contractor, with the purpose of discussing general safety topics and job specific requirements encountered at the DDC work site. Weekly safety meetings will be documented and will include at a minimum, topics, name and signature of the person conducting the meeting, names and signatures of attendees, contractor's name, DDC Project ID, date, and location.

**Work:** The construction required by the Contractor's Contract Documents whether completed or partially completed, performed by the Contractor/ subcontractors. Work refers to the furnishing of labor, furnishing and incorporating materials and equipment into the construction and providing any service required by the Contract Documents to fulfill the Contractor's obligation to complete the Project. For the purposes of these Safety Requirements, the term "Work" includes all Utility Interference work (commonly referred to as "Section U", "EP-7", and "Joint Bid" work) performed in association with this Contract.

#### **IV. RESPONSIBILITIES**

All persons who manage, perform, and provide support for construction projects will conduct operations in compliance with the requirements identified in this Policy and all applicable governing regulatory agency requirements and guidelines pertaining to safety in construction.

##### **A. Resident Engineer**

1. Review and facilitate Contractor(s) Site Safety Plan submittals to DDC for acceptability.
2. Notify the Office of Construction Safety of the commencement of construction work.
3. Develop and implement a training verification process to ensure that all CM/REI, consultant, Contractor, and subcontractor employees are properly trained. Maintain all applicable initial and refresher training records and assures documentation availability on site.
4. Maintain documentation of and attend weekly safety meetings and daily safety job briefings.
5. Assure that Contractor(s) JHA's are current to reflect the work tasks being performed, hazards, and control methods to mitigate the identified hazards. Verify that all employees at the job site are trained on the JHAs and maintain supporting documentation on site.
6. Assure adequate planning for all critical construction activities (crane operation, excavation, confined space entry, etc.) including coordination between Contractor(s) /DDC/ other Agencies as required.
7. Maintain custody of all construction related permits, plans, approvals, drawings, etc., related to the project and assure their availability on site.
8. Recognize, minimize, or eliminate jobsite and public hazards, through required planning, inspection, verification, and corrective action process.
9. Monitor the conditions at the site for conformance with the Contractor's Site Safety Plan, DDC policies, permits, and all applicable regulations and documentation that pertain to construction safety.
10. Notify the Contractor and DDC immediately upon determination of any condition or activity existing which is not in compliance with the Contractor's Site Safety Plan, applicable federal, state or local codes or any condition that presents a potential risk of injury to the public or workers or possible damage to property. Direct the Contractor to provide such labor, materials, equipment, and supervision to remedy such conditions.
11. Notify the Office of Construction Safety and the ACCO's Insurance and Risk Management Unit of project-related accidents, incidents, and near misses as per DDC's Construction Safety Emergency and Accident Notification and Response Procedure within two (2) hours.
12. In case of an accident, incident, or near miss, RE is responsible to protect the integrity of the accident site including but not limited to: the safeguarding of all evidence, documentation of all personnel on site at the time of the accident, gather facts related to all accidents, incidents, or near miss, and prepare required DDC Construction Accident Report as per DDC's Construction Safety Emergency and Accident Notification and Response Procedure. Maintain all records pertaining to accidents, incidents, and near miss and have them available upon request.
13. Notify the Office of Construction Safety within two (2) hours of the start of an inspection by any outside/regulatory agency personnel, including NYS, OSHA, NYC DOB or any other City/State/Federal oversight entity and forward a copy of the inspection report within one business day of its receipt.
14. Escort and assist Construction Safety Auditors during all field and record audits.
15. Report any emergency conditions to the Office of Construction Safety immediately.

**Note: In addition to the responsibilities listed above, if the Resident Engineer is a CM/REI or other non-City party hired by the City to manage the Project, the Resident Engineer is also required to do the following:**

16. Provide personnel who are certified and or trained appropriately for the requirements of the project.

17. Perform an investigation for any project-related accidents, incidents, and near misses. Within 24-hours of the time of the accident, incident, or near miss, the CM/REI will submit an investigation report to the Office of Construction Safety. Such report will include proposed remedial measures and implementation of corrective actions to prevent recurrence.

DDC reserves the right to request that the CM/REI replace any CM/REI personnel for any reason at any time during the project.

## **B. Construction Contractors**

**Note: For CM-Build and CM-Design-Build Projects, the CM will meet all requirements listed in this section, as well as the Resident Engineer section above.**

1. Submit a completed Safety Questionnaire and other safety performance related documentation with its bid or as part of a pre-qualification package.
2. Submit a Site Safety Plan within 30 days from the Award Date or as otherwise directed. The Site Safety Plan is subject to review and acceptance by the Office of Construction Safety prior to the commencement of work at the site. The Site Safety Plan will be revised and updated as necessary during the course of the project. If requested by the Office of Construction Safety, the Site Safety Plan must be developed and submitted for approval using a web-based system, the Site Safety Plan Application (SSP App).
3. Designate and identify a Project Safety Representative in the Site Safety Plan. The Contractor will immediately notify the Office of Construction Safety, in a form and manner acceptable to the Office of Construction Safety, of any permanent change to the designated Project Safety Representative. In the event the primary designated Project Safety Representative is temporary unable to perform his or her duties, an alternate Project Safety Representative will be provided. Resumes, outlining the qualification and experience for the Project Safety Representative (s) will be included in the Site Safety Plan and available upon request. DDC reserves the right to request the Contractor to replace a Project Safety Representative for any reason at any time during the course of the project.
4. Designate and identify a Competent Person(s) in the Site Safety Plan. Contractor/subcontractor may be required to provide more than one competent person due to construction operations and based on a number of work tasks/areas. DDC reserves the right to request the Contractor to replace a Competent Person or provide additional Competent Person(s) for any reason at any time during the course of the project. The Competent Person will be present at the site during all work activities.
5. For certain projects, as defined in New York City Construction Codes – Title 28, designate and identify the Licensed Site Safety Manager or Registered Construction Superintendent. Resumes, outlining the qualification and experience for the Licensed Site Safety Manager or Registered Construction Superintendent will be included in the Site Safety Plan and available upon request. The Contractor will immediately notify the Office of Construction Safety, in a form and manner acceptable to the Office of Construction Safety, of any permanent change to the designated Site Safety Manager and/or Construction Superintendent. In the event the primary designated Site Safety Manager or Construction Superintendent is temporarily unable to perform his or her duties, an alternate Licensed Site Safety Manager and/or Registered Construction Superintendent will be provided. The Office of Construction Safety must be informed of such change. DDC reserves the right to request the Contractor to replace Site Safety Manager or Construction Superintendent for any reason at any time during the course of the project.
6. Develop a written Job Hazard Analysis (JHA) that identifies safety hazards and control methods for project specific work tasks. A preliminary JHA will be included in the Site Safety Plan submitted by the Contractor. A JHA is a living document that will be re-evaluated and revised to address new hazards and tasks that may develop during the course of the project and will be present at the worksite and produced upon request.
7. Develop project specific safety procedures to protect employees, general public, and property during all construction activities for the duration of the project.
8. Ensure that all employees are aware of the hazards associated with the project through documented formal and informal training and/or other communications. Conduct and document new employee and site-specific safety orientation for all Contractor and subcontractor personnel to review the hazards associated with the project as identified in the Site Safety Plan and the specific safety procedures and controls that will be used to protect workers, the general public and property. The Project Safety Representative will conduct this training prior to mobilization and if necessary during the course of the project. Documentation will be provided to the RE.

9. Prior to performing any work on DDC projects all Contractor's and subcontractor's employees will, at a minimum, have successfully completed, within the previous five calendar years, an OSHA 10-hour construction safety course.  
All training records (OSHA 10-hour, flagger, scaffold, fall protection, confined space, etc.) will be provided to the RE prior to mobilization, included in the Site Safety Plan, kept current during the course of the project, and available for review.
10. Conduct and document weekly safety meetings and daily job briefing sessions for the duration of the project. Attendance at weekly safety meetings and daily job briefing sessions is mandatory. A written record of weekly safety meetings will be available upon request and job briefing sessions will be available at the worksite.
11. As part of the Site Safety Plan, prepare site specific procedures, such as maintenance and protection of traffic plan, steel erection plan, confined space program, fall protection plan, demolition plan, site specific emergency evacuation plan, etc. (if not otherwise provided in the contract documents) and comply with all of its provisions.
12. Have immediately available for review at the project site where actual construction activities are being performed all applicable documentation, including but not limited to: JHAs for work tasks being performed, all required training records, MPT plan (where applicable), Noise and Dust Mitigation Plans, excavation protective system drawings (where applicable), Emergency Evacuation plan, fall protection program (where applicable), confined space program (where applicable), all required permits, daily job briefing records, all required documentation for crane operation (where applicable), daily inspection checklist, scaffold and sidewalk drawings (when applicable), safety data sheets for chemicals in use.
13. Comply with all federal, state and local safety and health rules, laws, and regulations.
14. Comply with all provisions of the Site Safety Plan.
15. Provide, replace, and adequately maintain at or around the project site, suitable and sufficient signage, lights, barricades and enclosures (fences, sidewalk sheds, netting, bracing, etc.). The project specific MPT plan will be developed, implemented, and reviewed during the course of the project.
16. The Project Safety Representative will conduct daily safety inspections, document the inspection results, implement corrective actions for the identified hazards. Maintain the inspection records and have them available upon request.
17. **Report unsafe or unhealthy conditions to the RE as soon as practical, but no more than 24 hours after discovery, and take prompt actions to remove or abate such conditions. Should an imminent dangerous condition be discovered, Contractor will stop all work in the area of danger until corrections are made.**
18. Report all accidents, incidents and near misses involving injuries to workers or the general public, as well as property damage, to the RE within one (1) hour.
19. Following an accident or incident, unless otherwise directed, the Contractor will not remove or alter any equipment, structure, material, or evidence related to the accident or incident. Exception: Immediate emergency procedures taken to secure structures, temporary construction, operations, or equipment that pose a continued imminent danger or facilitate assistance for persons who are trapped or who have sustained bodily injury. Take additional measures as necessary to secure the accident or incident site and to protect against any further injury or property damage.
20. The Contractor will perform an investigation into the root cause of the accident, incident, or near miss. Within 24 hours of an accident, incident, or near miss, the Contractor will prepare and submit to the RE a written investigation report detailing findings, corrective actions, and hazard mitigation implementation to prevent recurrence.
21. Notify the RE within two (2) hours of the start of an inspection by any outside regulatory agency personnel, including OSHA, NYC DOB, or others.
22. Maintain all records pertaining to all required safety compliance documents, accidents and incidents reports. DDC reserves the right to request copy of any records pertaining to the safety of the project and required by DDC and other federal, state, and city agencies, including but not limited to permits, training records, safety inspection records, drawings, equipment records, etc.
23. Cooperate with DDC Office of Construction Safety/ RE and address DDC recommendations on safety, which will in no way relieve the Contractor of its responsibilities for safety on the project. The Contractor has sole responsibility for safety.

## V. SAFETY QUESTIONNAIRE

DDC requires that all Contractors provide information regarding their current and past safety performance and programs. This will be accomplished by the use of the DDC Safety Questionnaire. As a part of the bid submittal package, the contractor will submit a completed DDC Safety Questionnaire listing company workers' compensation experience modification rating and OSHA Incident Rates for the three (3) years prior to the date of the bid opening. DDC may request a Contractor to update its Questionnaire at any time or to provide more detailed information. The Contractor will provide the requested information within 15 days.

The following criteria will be used by DDC in reviewing the Contractor's responsibility, which will be based on the information provided on the questionnaire:

- Criteria 1: OSHA Injury and Illness Rates (I&IR) are no greater than the average for the industry (based on the most current Bureau of Labor Statistics data for the Contractors SIC code); and
- Criteria 2: Insurance workers compensation Experience Modification Rate (EMR) equal to or less than 1.0; and
- Criteria 3: Any willful violations issued by OSHA or NYC DOB within the last three (3) years; and
- Criteria 4: A fatality (worker or member of public) and injuries, requiring OSHA notification, experienced on or near Contractor's worksite within the last three (3) years; and
- Criteria 5: Past safety performance on DDC projects (accidents; status of site safety plan submittals; etc.)
- Criteria 6: OSHA violation history for the last three (3) years;
- Criteria 7: Contractor will provide OSHA Injury and Illness Records (currently OSHA 300 and 300A Logs) for the last three (3) years.

If the Contractor fails to meet the basic criteria listed above, the Office of Construction Safety may request, through the ACCO, more details concerning the Contractor's safety experience. DDC may request the Contractor to provide copies of, among other things, accident investigation reports, OSHA records, OSHA and NYC DOB citations, EPA citations and written corrective action plan.

## VI. SITE SAFETY PLAN

Within thirty (30) days from the Award Date or as otherwise directed, the Contractor will submit the Site Safety Plan. The Site Safety Plan will identify project work scope, safety hazards associated with the project tasks, and include specific safety procedures and training appropriate and necessary to complete the work. The Site Safety Plan is subject to review and acceptance by the Office of Construction Safety prior to the commencement of work at the site. Due to the project work scope and project duration, the Office of Construction Safety may grant a conditional acceptance for a Site Safety Plan without all sections being complete. In a case of a "Conditional Acceptance" of a Site Safety Plan, the Contractor will provide the remaining sections previously incomplete and/or not submitted for review and acceptance by the Office of Construction Safety prior to the commencement of the construction activities. The Office of Construction Safety reserves the right to withdraw the initial "Conditional Acceptance" if the Contractor fails to provide the remaining sections of a Site Safety Plan. Failure by the Contractor to submit an acceptable Site Safety Plan will be grounds for default.

Site Safety Plan requirements: The Site Safety Plan will be a written document and will apply to all project specific Contractor and subcontractor operations, and will have at a minimum, the following elements with each described in a separate section (It may be necessary to modify the basic format for certain unique or high-risk projects, such as tunnels or high-rise construction). All Site Safety Plan sections will be numbered in the order listed below. For sections, which are not applicable for the type of the work being performed by the Contractor on DDC project, the Contractor will in writing indicate "Not applicable based on the project work scope." The Site Safety Plan will include Contractor's name, DDC project ID, project location (s), and development and revision dates. The Site Safety Plan will include the sections, attachments, and appendixes provided in the Site Safety Plan. All pages of the Site Safety Plan will be numbered. If requested by the Office of Construction Safety, the Site Safety Plan must be developed and submitted for approval using a web-based system, the Site Safety Plan Application (SSP App).

1. Project Work Scope – Detailed information regarding work tasks that will be performed by Contractor and subcontractors under the project.
2. Responsibility and Organization – Contractor’s organization chart with responsible personnel for the project, including titles, names, contact information, roles, and responsibilities. All Contractor’s personnel required by the DDC Safety Requirements will be identified.
3. Safety Training and Education – OSHA 10 Hours training, requirements for daily safety briefings and weekly safety meetings, any work task specific training, responsible staff for implementation of training program for the project.
4. Job Hazard Analysis (JHA) – Project specific Job Hazard Analysis including work tasks, identified hazards, hazard control methods (administrative, engineering, PPE) to protect workers, property and general public, Contractor’s name, project id, location, name and signature of a certifying person, hazard assessment date.
5. Protection of Public – Project specific procedures covering safety of the general public during all project construction activities.
6. Hazard Corrective Actions - Procedures for hazard identification, including responsible person(s), frequency of safety inspections, implementation of corrective actions, safety inspection checklist.
7. Accident/Exposure Investigation – Project specific procedures for accident/incident/near miss investigation and implementation of corrective actions. Accident/incident/near miss notification procedure of DDC project staff (timer frame and responsible personnel).
8. Recording and Reporting Injuries – Procedures to meet 29 CFR 1904 requirements.
9. First Aid and Medical Attention – Responsible staff, location and inspection of First Aid kit, directions to local hospitals; emergency telephone numbers.
10. Project Specific Fire Protection and Prevention Program – Project specific procedures, including responsible staff, fire alarm system/methods, hot work procedures, etc.
11. Housekeeping Procedure.
12. Project Specific Illumination Procedure.
13. Project Specific Sanitation Procedure.
14. Personal Protective Equipment (PPE), including Respiratory Protection Program and Hearing Conservation Program, if required.
15. Hazard Communication Program – Contractor’s Hazard Communication Program, responsible staff; training; SDS records, project specific list of chemicals; location of the program and SDS records.
16. Means of Egress – Information regarding free and unobstructed egress from all parts of the building or structure; exit marking; maintenance of means of egress, etc.
17. Employee Emergency Action Plan – Project specific: responsible staff, emergency alarm system/devices, evacuation procedure, procedure to account for employees after evacuation, etc.
18. Evacuation Plan – Project specific evacuation plan (drawing/scheme) with exists and evacuation routes.
19. Ionizing/Nonionizing Radiation – Competent person, license and qualification requirements, type of radiation, employee’s exposure and protection, safety procedures, etc.
20. Material Handling, Storage, Use and Disposal – Project specific information regarding material storage, disposal, and handling: procedures, plan/drawings, etc.
21. Signs, Signals, and Barricades – Use of danger/warning signs, safety instruction signs, sidewalk closure and pedestrian fencing and barricades (if not included in the MPT plan), etc.
22. Tools – Hand and Power – Safety procedures for the type of tools to be used.
23. Scaffold – Project specific scaffold types, procedures, training requirements, scaffold drawings, designed, sealed, and signed by NYS Licensed Professional Engineer, or as otherwise directed; competent person, criteria for project specific scaffold, falling object protection, procedures for aerial lifts/scissor lifts.
24. Welding and Cutting – Project specific procedure for welding and cutting, including all necessary safety requirements such as fire prevention, personal protective equipment, hot work permits (if not covered by Contractor’s Fire Prevention and Protection program, FDNY certificate requirements).
25. Electrical Safety – Project specific procedures, including lock out-tag out.
26. Fall Protection – Project specific information regarding selected fall protection systems, fall protection plan, responsible staff.
27. Cranes, Derrick, Hoists, Elevators, Conveyors – project specific equipment information including type, rated load capacity, manufacture specification requirements, competent person, exposure to falling load, inspection, recordkeeping, clearance requirements, communication procedure, ground lines, permits.

28. Excavation Safety – Competent person; excavation procedures; project specific protective system, including drawings, designed, sealed, and signed by NYS Licensed Professional Engineer, or as otherwise directed.
29. Protection of Underground Facilities and Utilities Procedure, including responsible staff and responsibilities.
30. Concrete and Masonry Construction Procedures
31. Maintenance and Protection of Traffic Plan – Project specific MPT plan, designed, sealed, and signed by NYS Licensed Professional Engineer, or as otherwise directed; flagmen training, public safety, etc.
32. Steel Erection – Site specific erection plan, requirements for applicable written notifications, competent person, fall protection plan, training requirements, etc.
33. Demolition – Engineering survey, including written evidence, disconnection of all effected utilities, identification of all hazardous chemicals, materials, gases, etc., floor openings, chutes, inspection and maintenance of all stairs/passageways, removal of materials/debris/structural elements, lock out/tag out, competent person.
34. Blasting and the Use of Explosives – Project specific safety procedures, warning signs, training/qualification, transportation, storage and use of explosives, inspection.
35. Stairways and Ladders – Types of stairs and ladders, safety procedures, training requirements.
36. Alcohol and Drug Abuse Policy
37. Rodents and Vermin Controls
38. Toxic and Hazardous Substances – Safety procedures for substances that Contractor’s and subcontractor’s employees can be exposed on project.
39. Noise Mitigation Plan – Completed project specific Noise Mitigation Plan, and noise mitigation procedures.
40. Confined Space Program – Project specific Confined Space Program, responsible staff, training records, equipment information, rescue procedure, list of project specific confined spaces, forms.
41. Construction Vehicles/Heavy Equipment – Type of construction vehicles/heavy equipment to be used on site, procedures
42. Dust Mitigation Plan – Completed project specific Dust Mitigation Plan, and dust mitigation procedures.
43. Working Over and Near Water. Diving Operations – safety procedures including personal protective equipment, fall protection, rescue services, etc.

The most critical component of the Site Safety Plan is the Job Hazard Analysis (JHA) section. The JHA form is a written document prepared by the Contractor. The Contractor will conduct a site and task assessment to identify the tasks and any potential safety or environmental hazards related to performance of the work, eliminate or implement controls for the potential hazards, and identify proper personal protective equipment for the task. The JHA will be communicated to all Contractor/subcontractor personnel on site. The JHA will include safety hazard identification and controls to protect employees, general public, and property.

The initial JHA will be included in the Contractor’s Site Safety Plan and the current JHA form will be available at the construction site for reference. A JHA is a living document that will be re-evaluated and revised to address new hazards and tasks that may develop and will be present at the worksite and produced upon request.

#### **VII. KICK-OFF MEETINGS/PRE-CONSTRUCTION AND SAFETY REVIEW**

Prior to the start of construction activities on all DDC projects, RE will invite the Office of Construction Safety to the construction kick-off meeting. The Office of Construction Safety representative(s) will participate in this meeting with the Contractor and RE for the purpose of:

- A. Reviewing DDC Contract Safety Requirements
- B. Reviewing site-specific safety issues based on a project work scope, location, and any other factors which may impact safety of workers and general public.
- C. Reviewing the Site Safety Plan and JHA requirements.
- D. Reviewing Accident/Incident reporting and investigation procedures.
- E. Reviewing designated safety contacts, roles, and responsibilities.
- F. Discussing planned inspections and audits of the site by the Office of Construction Safety personnel.

#### **VIII. EVALUATION DURING WORK IN PROGRESS**

The Contractor’s adherence to these Safety Requirements will be monitored throughout the project. This will be accomplished by the following:

- A. Use of a safety checklist by a representative of the Office of Construction Safety (or other designated DDC representative) and the RE during regular inspections and comprehensive audits of the job site. Field Exit Conferences will be held with the RE and Contractor Project Safety Representatives.
- B. The RE will continually monitor the safety and environmental performance of the Contractor's employees and work methods. Deficiencies will be brought to the attention of the Contractor's Project Safety Representative on site for immediate correction. The RE will maintain a written record of these deficiencies and have these records available upon request. Any critical deficiencies will be immediately reported to the Office of Construction Safety via telephone (718)391-1911.
- C. If the Contractor's safety performance during the project is not up to DDC standards (safety performance measure, accident/incident rate, etc.) the Director – Office of Construction Safety, or his/her designee will meet with the Contractor's Project Safety Representative and other representatives, the RE, and the DDC Environmental Specialist (if environmental issues are involved). The purpose of this meeting is to 1) determine the level of non-compliance; 2) explain and clarify the safety/environmental provisions; 3) agree on a future course of action to correct the deficiencies.
- D. If the deficiencies continue, the Commissioner may, without limitation, declare the Contractor in default.
- E. The Contractor will within 1 hour inform the RE of all accidents/incidents/near misses including all fatalities, any injuries to employees or members of the general public, and property damage (e.g., structural damage, equipment rollovers, utility damage, loads dropped from crane). The RE will notify the Office of Construction Safety as per DDC's Construction Safety Emergency and Accident Notification and Response Procedure and will maintain a record of all Contractor accidents/incidents for the project.
- F. The Contractor and the RE will notify the Office of Construction Safety within two (2) hours of the start of any NYS-DOL/ NYC-COSH/ OSHA/ EPA inspections.

#### **IX. SAFETY PERFORMANCE EVALUATION**

The Contractor's safety record, including accident/incident history and DDC safety inspection results, will be considered as part of the Contractor's performance evaluation at the conclusion of the project. Poor safety performance during the course of the project will be a reason to rate a Contractor unsatisfactory which may be reflected in the City's PASSPort system and will be considered for future procurement actions as set forth in the City's Procurement Policy Board Rules.

# **NOTICE TO BIDDERS**

Please be advised that a Rider to the March 2017 New York City Standard Construction Contract regarding Non-Compensable Delays and Grounds for Extension has been attached and incorporated in this Invitation for Bid. Other than provisions specifically delineated in the Rider, all other terms of the March 2017 New York City Standard Construction Contract continue to apply in full force and effect.

**RIDER TO NEW YORK CITY STANDARD CONSTRUCTION CONTRACT (MARCH 2017) REGARDING NON-COMPENSABLE DELAYS AND GROUNDS FOR EXTENSION**

[Instructions to Agencies: Please attach this Rider to the March 2017 version of the New York City Standard Construction Contract]

The following provisions supersede the corresponding provisions in the March 2017 version of the New York City Standard Construction Contract:

1. Section **11.5.1** provides as follows:

**11.5.1** The acts or omissions of public or government bodies (other than **City** agencies) or of any third parties who are disclosed in the **Contract Documents**, or those third parties who are ordinarily encountered or who are generally recognized as related to the **Work**, including but not limited to, **Other Contractors**, utilities or private enterprises;

2. Section **11.5.6** provides as follows:

**11.5.6** Climatic conditions, storms, floods, droughts, tidal waves, fires, hurricanes, earthquakes, landslides or other catastrophes or acts of God; acts of war or of the public enemy or terrorist acts; disruption, outage or power failure caused by a utility's inability or failure to provide service, pandemics, epidemics, outbreaks of infectious disease or any other public health emergency; other states of emergency declared by the City, State or Federal government, quarantine restrictions, and freight embargoes; including the **City's** reasonable responses to any of the above; and

3. Section **13.3** provides as follows:

**13.3** Grounds for Extension: If such application is made, the **Contractor** shall be entitled to an extension of time for delay in completion of the **Work** caused solely:

**13.3.1** By any of the acts or omissions of the **City**, its officials, agents or employees set forth in Articles **11.4.1.1** through **11.4.1.9**; or

**13.3.2** By or attributable to any of the items set forth in Articles **11.5.1** through **11.5.7**.

**13.3.3** The **Contractor** shall, however, be entitled to an extension of time for such causes only for the number of **Days** of delay which the **ACCO** or the Board may determine to be due solely to such causes, and then only if the **Contractor** shall have strictly complied with all of the requirements of Articles 9 and 10

**WITNESSETH:**

The parties, in consideration of the mutual agreements contained herein, agree as follows:

**CHAPTER I: THE CONTRACT AND DEFINITIONS**

**ARTICLE 1. THE CONTRACT**

1.1 Except for titles, subtitles, headings, running headlines, tables of contents and indices (all of which are printed herein merely for convenience), the following, except for such portions thereof as may be specifically excluded, shall be deemed to be part of this **Contract**:

1.1.1 All provisions required by law to be inserted in this **Contract**, whether actually inserted or not;

1.1.2 The Contract Drawings and Specifications;

1.1.3 The General Conditions and Special Conditions, if any;

1.1.4 The **Contract**;

1.1.5 The Information for Bidders; Request for Proposals; Notice of Solicitation and Proposal For Bids; Bid or Proposal, and, if used, the Bid Booklet;

1.1.6 All Addenda issued prior to the receipt of the bids; the Notice of Award; Performance and Payment Bonds, if required; and the Notice to Proceed or the Order to Work.

1.2 Should any conflict occur in or between the Drawings and Specifications, the **Contractor** shall be deemed to have estimated the most expensive way of doing the **Work**, unless the **Contractor** shall have asked for and obtained a decision in writing from the **Commissioner** of the **Agency** that is entering into this **Contract**, before the submission of its bid, as to what shall govern.

**ARTICLE 2. DEFINITIONS**

2.1 The following words and expressions, or pronouns used in their stead, shall, wherever they appear in this Contract, be construed as follows, unless a different meaning is clear from the context:

2.1.1 “**Addendum**” or “**Addenda**” shall mean the additional Contract provisions and/or technical clarifications issued in writing by the Commissioner prior to the receipt of bids.

2.1.2 “**Agency**” shall mean a city, county, borough or other office, position, department, division, bureau, board or commission, or a corporation, institution or agency of government, the expenses of which are paid in whole or in part from the City treasury.

2.1.3 “**Agency Chief Contracting Officer**” (**ACCO**) shall mean a person delegated authority by the Commissioner to organize and supervise the procurement activity of subordinate Agency staff in conjunction with the CCPO, or his/her duly authorized representative.

2.1.4 **“Allowance”** shall mean a sum of money which the Agency may include in the total amount of the Contract for such specific contingencies as the Agency believes may be necessary to complete the Work, *e.g.*, lead or asbestos remediation, and for which the Contractor will be paid on the basis of stipulated unit prices or a formula set forth in the Contract or negotiated between the parties provided, however, that if the Contractor is not directed to use the Allowance, the Contractor shall have no right to such money and it shall be deducted from the total amount of the Contract.

2.1.5 **“City”** shall mean the City of New York.

2.1.6 **“City Chief Procurement Officer” (CCPO)** shall mean a person delegated authority by the Mayor to coordinate and oversee the procurement activity of Mayoral agency staff, including the ACCO and any offices which have oversight responsibility for the procurement of construction, or his/her duly authorized representative.

2.1.7 **“Commissioner”** shall mean the head of the Agency that has entered into this Contract, or his/her duly authorized representative.

2.1.8 **“Comptroller”** shall mean the Comptroller of the City of New York.

2.1.9 **“Contract”** or **“Contract Documents”** shall mean each of the various parts of the contract referred to in Article 1 hereof, both as a whole and severally.

2.1.10 **“Contract Drawings”** shall mean only those drawings specifically entitled as such and listed in the Specifications or in any Addendum, or any drawings furnished by the Commissioner, pertaining or supplemental thereto.

2.1.11 **“Contract Work”** shall mean everything required to be furnished and done by the Contractor by any one or more of the parts of the Contract referred to in Article 1, except Extra Work as hereinafter defined.

2.1.12 **“Contractor”** shall mean the entity which executed this Contract, whether a corporation, firm, partnership, joint venture, individual, or any combination thereof, and its, their, his/her successors, personal representatives, executors, administrators, and assigns, and any person, firm, partnership, joint venture, individual, or corporation which shall at any time be substituted in the place of the Contractor under this Contract.

2.1.13 **“Days”** shall mean calendar days, except where otherwise specified.

2.1.14 **“Engineer”** or **“Architect”** or **“Project Manager”** shall mean the person so designated in writing by the Commissioner in the Notice to Proceed or the Order to Work to act as such in relation to this Contract, including a private Architect or Engineer or Project Manager, as the case may be. Subject to written approval by the Commissioner, the Engineer, Architect or Project Manager may designate an authorized representative.

2.1.15 **“Engineering Audit Officer” (EAO)** shall mean the person so designated by the Commissioner to perform responsible auditing functions hereunder.

2.1.16 **“Extra Work”** shall mean Work other than that required by the Contract at the time of award which is authorized by the Commissioner pursuant to Chapter VI of this Contract.

- 2.1.17 **“Federal-Aid Contract”** shall mean a contract in which the United States (federal) Government provides financial funding as so designated in the Information for Bidders.
- 2.1.18 **“Final Acceptance”** shall mean final written acceptance of all the Work by the Commissioner, a copy of which shall be sent to the Contractor.
- 2.1.19 **“Final Approved Punch List”** shall mean a list, approved pursuant to Article 14.2.2, specifying those items of Work to be completed by the Contractor after Substantial Completion and dates for the completion of each item of Work.
- 2.1.20 **“Law”** or **“Laws”** shall mean the Constitution of the State of New York, the New York City Charter, the New York City Administrative Code, a statute of the United States or of the State of New York, a local law of the City of New York, any ordinance, rule or regulation having the force of law, or common law.
- 2.1.21 **“Materialman”** shall mean any corporation, firm, partnership, joint venture, or individual, other than employees of the Contractor, who or which contracts with the Contractor or any Subcontractor, to fabricate or deliver, or who actually fabricates or delivers, plant, materials or equipment to be incorporated in the Work.
- 2.1.22 **“Means and Methods of Construction”** shall mean the labor, materials, temporary structures, tools, plant, and construction equipment, and the manner and time of their use, necessary to accomplish the result intended by this Contract.
- 2.1.23 **“Notice to Proceed”** or **“Order to Work”** shall mean the written notice issued by the Commissioner specifying the time for commencement of the Work and the Engineer, Architect or Project Manager.
- 2.1.24 **“Other Contractor(s)”** shall mean any contractor (other than the entity which executed this Contract or its Subcontractors) who or which has a contract with the City for work on or adjacent to the building or Site of the Work.
- 2.1.25 **“Payroll Taxes”** shall mean State Unemployment Insurance (SUI), Federal Unemployment Insurance (FUI), and payments pursuant to the Federal Insurance Contributions Act (FICA).
- 2.1.26 **“Project”** shall mean the public improvement to which this Contract relates.
- 2.1.27 **“Procurement Policy Board” (PPB)** shall mean the Agency of the City of New York whose function is to establish comprehensive and consistent procurement policies and rules which shall have broad application throughout the City.
- 2.1.28 **“Required Quantity”** in a unit price Contract shall mean the actual quantity of any item of Work or materials which is required to be performed or furnished in order to comply with the Contract.
- 2.1.29 **“Resident Engineer”** shall mean the representative of the Commissioner duly designated by the Commissioner to be his/her representative at the site of the Work.
- 2.1.30 **“Site”** shall mean the area upon or in which the Contractor’s operations are carried on, and such other areas adjacent thereto as may be designated as such by the Engineer.

2.1.31 “**Small Tools**” shall mean items that are ordinarily required for a worker’s job function, including but not limited to, equipment that ordinarily has no licensing, insurance or substantive storage costs associated with it; such as circular and chain saws, impact drills, threaders, benders, wrenches, socket tools, etc.

2.1.32 “**Specifications**” shall mean all of the directions, requirements, and standards of performance applying to the Work as hereinafter detailed and designated under the Specifications.

2.1.33 “**Subcontractor**” shall mean any person, firm or corporation, other than employees of the Contractor, who or which contracts with the Contractor or with its subcontractors to furnish, or actually furnishes labor, or labor and materials, or labor and equipment, or superintendence, supervision and/or management at the Site. Wherever the word Subcontractor appears, it shall also mean sub-Subcontractor.

2.1.34 “**Substantial Completion**” shall mean the written determination by the Engineer that the Work required under this Contract is substantially, but not entirely, complete and the approval of the **Final Approved Punch List**.

2.1.35 “**Work**” shall mean all services required to complete the Project in accordance with the Contract Documents, including without limitation, labor, material, superintendence, management, administration, equipment, and incidentals, and obtaining any and all permits, certifications and licenses as may be necessary and required to complete the Work, and shall include both Contract Work and Extra Work.

## CHAPTER II: THE WORK AND ITS PERFORMANCE

### ARTICLE 3. CHARACTER OF THE WORK

3.1 Unless otherwise expressly provided in the **Contract Drawings, Specifications, and Addenda**, the **Work** shall be performed in accordance with the best modern practice, utilizing, unless otherwise specified in writing, new and unused materials of standard first grade quality and workmanship and design of the highest quality, to the satisfaction of the **Commissioner**.

### ARTICLE 4. MEANS AND METHODS OF CONSTRUCTION

4.1 Unless otherwise expressly provided in the **Contract Drawings, Specifications, and Addenda**, the **Means and Methods of Construction** shall be such as the **Contractor** may choose; subject, however, to the **Engineer’s** right to reject the **Means and Methods of Construction** proposed by the **Contractor** which in the opinion of the **Engineer**:

4.1.1 Will constitute or create a hazard to the **Work**, or to persons or property; or

4.1.2 Will not produce finished **Work** in accordance with the terms of the **Contract**; or

4.1.3 Will be detrimental to the overall progress of the **Project**.

4.2 The **Engineer’s** approval of the **Contractor’s Means and Methods of Construction**, or his/her failure to exercise his/her right to reject such means or methods, shall not relieve the **Contractor**

of its obligation to complete the **Work** as provided in this **Contract**; nor shall the exercise of such right to reject create a cause of action for damages.

## ARTICLE 5. COMPLIANCE WITH LAWS

5.1 The **Contractor** shall comply with all **Laws** applicable to this **Contract** and to the **Work** to be done hereunder.

5.2 Procurement Policy Board Rules: This **Contract** is subject to the Rules of the **PPB** (“**PPB Rules**”) in effect at the time of the bid opening for this **Contract**. In the event of a conflict between the **PPB Rules** and a provision of this **Contract**, the **PPB Rules** shall take precedence.

5.3 Noise Control Code provisions.

5.3.1 In accordance with the provisions of Section 24-216(b) of the Administrative Code of the **City** (“**Administrative Code**”), Noise Abatement Contract Compliance, devices and activities which will be operated, conducted, constructed or manufactured pursuant to this **Contract** and which are subject to the provisions of the **City** Noise Control Code shall be operated, conducted, constructed, or manufactured without causing a violation of the **Administrative Code**. Such devices and activities shall incorporate advances in the art of noise control development for the kind and level of noise emitted or produced by such devices and activities, in accordance with regulations issued by the **Commissioner** of the **City** Department of Environmental Protection.

5.3.2 The **Contractor** agrees to comply with Section 24-219 of the Administrative Code and implementing rules codified at 15 Rules of the City of New York (“**RCNY**”) Section 28-100 *et seq.* In accordance with such provisions, the **Contractor**, if the **Contractor** is the responsible party under such regulations, shall prepare and post a Construction Noise Mitigation Plan at each **Site**, in which the **Contractor** shall certify that all construction tools and equipment have been maintained so that they operate at normal manufacturers operating specifications. If the **Contractor** cannot make this certification, it must have in place an Alternative Noise Mitigation Plan approved by the **City** Department of Environmental Protection. In addition, the **Contractor**’s certified Construction Noise Mitigation Plan is subject inspection by the **City** Department of Environmental Protection in accordance with Section 28-101 of Title 15 of **RCNY**. No **Contract Work** may take place at a **Site** unless there is a Construction Noise Mitigation Plan or approved Alternative Noise Mitigation Plan in place. In addition, the **Contractor** shall create and implement a noise mitigation training program. Failure to comply with these requirements may result in fines and other penalties pursuant to the applicable provisions of the **Administrative Code** and **RCNY**.

5.4 Ultra Low Sulfur Diesel Fuel: In accordance with the provisions of Section 24-163.3 of the **Administrative Code**, the **Contractor** specifically agrees as follows:

5.4.1 Definitions. For purposes of this Article 5.4, the following definitions apply:

5.4.1(a) “**Contractor**” means any person or entity that enters into a Public Works Contract with a **City Agency**, or any person or entity that enters into an agreement with such person or entity, to perform work or provide labor or services related to such Public Works Contract.

5.4.1(b) “Motor Vehicle” means any self-propelled vehicle designed for transporting persons or property on a street or highway.

5.4.1(c) “Nonroad Engine” means an internal combustion engine (including the fuel system) that is not used in a Motor Vehicle or a vehicle used solely for competition, or that is not subject to standards promulgated under Section 7411 or Section 7521 of Title 42 of the United States Code, except that this term shall apply to internal combustion engines used to power generators, compressors or similar equipment used in any construction program or project.

5.4.1(d) “Nonroad Vehicle” means a vehicle that is powered by a Nonroad Engine, fifty (50) horsepower and greater, and that is not a Motor Vehicle or a vehicle used solely for competition, which shall include, but not be limited to, excavators, backhoes, cranes, compressors, generators, bulldozers, and similar equipment, except that this term shall not apply to horticultural maintenance vehicles used for landscaping purposes that are powered by a Nonroad Engine of sixty-five (65) horsepower or less and that are not used in any construction program or project.

5.4.1(e) “Public Works Contract” means a contract with a **City Agency** for a construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge; a contract with a **City Agency** for the preparation for any construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge; or a contract with a **City Agency** for any final work involved in the completion of any construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge.

5.4.1(f) “Ultra Low Sulfur Diesel Fuel” means diesel fuel that has a sulfur content of no more than fifteen parts per million (15 ppm).

#### 5.4.2 Ultra Low Sulfur Diesel Fuel

5.4.2(a) All **Contractors** shall use Ultra Low Sulfur Diesel Fuel in diesel-powered Nonroad Vehicles in the performance of this **Contract**.

5.4.2(b) Notwithstanding the requirements of Article 5.4.2(a), **Contractors** may use diesel fuel that has a sulfur content of no more than thirty parts per million (30 ppm) to fulfill the requirements of this Article 5.4.2, where the Commissioner of the **City** Department of Environmental Protection (“DEP Commissioner”) has issued a determination that a sufficient quantity of Ultra Low Sulfur Diesel Fuel is not available to meet the needs of **Agencies** and **Contractors**. Any such determination shall expire after six (6) months unless renewed.

5.4.2(c) **Contractors** shall not be required to comply with this Article 5.4.2 where the **City Agency** letting this **Contract** makes a written finding, which is approved, in writing, by the DEP Commissioner, that a sufficient quantity of Ultra Low Sulfur Diesel Fuel, or diesel fuel that has a sulfur content of no more than thirty parts per million (30 ppm) is not available to meet the requirements of Section 24-163.3 of the Administrative Code, provided that such **Contractor** in its fulfillment of the

requirements of this **Contract**, to the extent practicable, shall use whatever quantity of Ultra Low Sulfur Diesel Fuel or diesel fuel that has a sulfur content of no more than thirty parts per million (30 ppm) is available. Any finding made pursuant to this Article 5.4.2(c) shall expire after sixty (60) **Days**, at which time the requirements of this Article 5.4.2 shall be in full force and effect unless the **City Agency** renews the finding in writing and such renewal is approved by the DEP Commissioner.

5.4.2(d) **Contractors** may check on determinations and approvals issued by the DEP Commissioner pursuant to Section 24-163.3 of the Administrative Code, if any, at [www.dep.nyc.gov](http://www.dep.nyc.gov) or by contacting the **City Agency** letting this **Contract**.

5.4.2(e) The requirements of this Article 5.4.2 do not apply where they are precluded by federal or State funding requirements or where the **Contract** is an emergency procurement.

#### 5.4.3 Best Available Technology

5.4.3(a) All **Contractors** shall utilize the best available technology for reducing the emission of pollutants for diesel-powered Nonroad Vehicles in the performance of this **Contract**. For determinations of best available technology for each type of diesel-powered Nonroad Vehicle, **Contractors** shall comply with the regulations of the **City** Department of Environmental Protection, as and when adopted, Chapter 14 of Title 15 of the Rules of the City of New York (RCNY). The **Contractor** shall fully document all steps in the best available technology selection process and shall furnish such documentation to the **City Agency** or the DEP Commissioner upon request. The **Contractor** shall retain all documentation generated in the best available technology selection process for as long as the selected best available technology is in use.

5.4.3(b) No **Contractor** shall be required to replace best available technology for reducing the emission of pollutants or other authorized technology utilized for a diesel-powered Nonroad Vehicle in accordance with the provisions of this Article 5.4.3 within three (3) years of having first utilized such technology for such vehicle.

5.4.3(c) This Article 5.4.3 shall not apply to any vehicle used to satisfy the requirements of a specific Public Works Contract for fewer than twenty (20) **Days**.

5.4.3(d) The **Contractor** shall not be required to comply with this Article 5.4.3 with respect to a diesel-powered Nonroad Vehicle under the following circumstances:

5.4.3(d)(i) Where the **City Agency** makes a written finding, which is approved, in writing, by the DEP Commissioner, that the best available technology for reducing the emission of pollutants as required by this Article 5.4.3 is unavailable for such vehicle, the **Contractor** shall use whatever technology for reducing the emission of pollutants, if any, is available and appropriate for such vehicle.

5.4.3(d)(ii) Where the DEP Commissioner has issued a written waiver based upon the **Contractor** having demonstrated to the DEP Commissioner that the use of the best available technology for reducing the emission of pollutants might endanger the operator of such vehicle or those working near such vehicle, due to engine malfunction, the **Contractor** shall use whatever technology for

reducing the emission of pollutants, if any, is available and appropriate for such vehicle, which would not endanger the operator of such vehicle or those working near such vehicle.

5.4.3(d)(iii) In determining which technology to use for the purposes of Articles 5.4.3(d)(i) and 5.4.3(d)(ii) above, the **Contractor** shall primarily consider the reduction in emissions of particulate matter and secondarily consider the reduction in emissions of nitrogen oxides associated with the use of such technology, which shall in no event result in an increase in the emissions of either such pollutant.

5.4.3(d)(iv) The **Contractor** shall submit requests for a finding or a waiver pursuant to this Article 5.4.3(d) in writing to the DEP Commissioner, with a copy to the **ACCO** of the **City Agency** letting this **Contract**. Any finding or waiver made or issued pursuant to Articles 5.4.3(d)(i) and 5.4.3(d)(ii) above shall expire after one hundred eighty (180) **Days**, at which time the requirements of Article 5.4.3(a) shall be in full force and effect unless the **City Agency** renews the finding, in writing, and the DEP Commissioner approves such finding, in writing, or the DEP Commissioner renews the waiver, in writing.

5.4.3(e) The requirements of this Article 5.4.3 do not apply where they are precluded by federal or State funding requirements or where the **Contract** is an emergency procurement.

5.4.4 Section 24-163 of the Administrative Code. The **Contractor** shall comply with Section 24-163 of the Administrative Code related to the idling of the engines of motor vehicles while parking.

#### 5.4.5 Compliance

5.4.5(a) The **Contractor's** compliance with Article 5.4 may be independently monitored. If it is determined that the **Contractor** has failed to comply with any provision of Article 5.4, any costs associated with any independent monitoring incurred by the **City** shall be reimbursed by the **Contractor**.

5.4.5(b) Any **Contractor** who violates any provision of Article 5.4, except as provided in Article 5.4.5(c) below, shall be liable for a civil penalty between the amounts of one thousand (\$1,000) and ten thousand (\$10,000) dollars, in addition to twice the amount of money saved by such **Contractor** for failure to comply with Article 5.4.

5.4.5(c) No **Contractor** shall make a false claim with respect to the provisions of Article 5.4 to a **City Agency**. Where a **Contractor** has been found to have done so, such **Contractor** shall be liable for a civil penalty of twenty thousand (\$20,000) dollars, in addition to twice the amount of money saved by such **Contractor** in association with having made such false claim.

#### 5.4.6 Reporting

5.4.6(a) For all Public Works Contracts covered by this Article 5.4, the **Contractor** shall report to the **City Agency** the following information:

5.4.6(a)(i) The total number of diesel-powered Nonroad Vehicles used to fulfill the requirements of this Public Works Contract;

5.4.6(a)(ii) The number of such Nonroad Vehicles that were powered by Ultra Low Sulfur Diesel Fuel;

5.4.6(a)(iii) The number of such Nonroad Vehicles that utilized the best available technology for reducing the emission of pollutants, including a breakdown by vehicle model and the type of technology;

5.4.6(a)(iv) The number of such Nonroad Vehicles that utilized such other authorized technology in accordance with Article 5.4.3, including a breakdown by vehicle model and the type of technology used for each such vehicle;

5.4.6(a)(v) The locations where such Nonroad Vehicles were used; and

5.4.6(a)(vi) Where a determination is in effect pursuant to Article 5.4.2(b) or 5.4.2(c), detailed information concerning the **Contractor's** efforts to obtain Ultra Low Sulfur Diesel Fuel or diesel fuel that has a sulfur content of no more than thirty parts per million (30 ppm).

5.4.6(b) The **Contractor** shall submit the information required by Article 5.4.6(a) at the completion of **Work** under the Public Works Contract and on a yearly basis no later than August 1 throughout the term of the Public Works Contract. The yearly report shall cover **Work** performed during the preceding fiscal year (July 1 - June 30).

5.5 Ultra Low Sulfur Diesel Fuel. In accordance with the Coordinated Construction Act for Lower Manhattan, as amended:

5.5.1 Definitions. For purposes of this Article 5.5, the following definitions apply:

5.5.1(a) "Lower Manhattan" means the area to the south of and within the following lines: a line beginning at a point where the United States pierhead line in the Hudson River as it exists now or may be extended would intersect with the southerly line of West Houston Street in the Borough of Manhattan extended, thence easterly along the southerly side of West Houston Street to the southerly side of Houston Street, thence easterly along the southerly side of Houston Street to the southerly side of East Houston Street, thence northeasterly along the southerly side of East Houston Street to the point where it would intersect with the United States pierhead line in the East River as it exists now or may be extended, including tax lots within or immediately adjacent thereto.

5.5.1(b) "Lower Manhattan Redevelopment Project" means any project in Lower Manhattan that is funded in whole or in part with federal or State funding, or any project intended to improve transportation between Lower Manhattan and the two air terminals in the **City** known as LaGuardia Airport and John F. Kennedy International Airport, or between Lower Manhattan and the air terminal in Newark known as Newark Liberty International Airport, and that is funded in whole or in part with federal funding.

5.5.1(c) “Nonroad Engine” means an internal combustion engine (including the fuel system) that is not used in a Motor Vehicle or a vehicle used solely for competition, or that is not subject to standards promulgated under Section 7411 or Section 7521 of Title 42 of the United States Code, except that this term shall apply to internal combustion engines used to power generators, compressors or similar equipment used in any construction program or project.

5.5.1(d) “Nonroad Vehicle” means a vehicle that is powered by a Nonroad Engine, fifty (50) horsepower (HP) and greater, and that is not a Motor Vehicle or a vehicle used solely for competition, which shall include, but not be limited to, excavators, backhoes, cranes, compressors, generators, bulldozers, and similar equipment, except that this terms shall not apply to horticultural maintenance vehicles used for landscaping purposes that are powered by a Nonroad Engine of sixty-five (65) HP or less and that are not used in any construction program or project.

5.5.1(e) “Ultra Low Sulfur Diesel Fuel” means diesel fuel that has a sulfur content of no more than fifteen parts per million (15 ppm).

5.5.2 Requirements. **Contractors** and **Subcontractors** are required to use only Ultra Low Sulfur Diesel Fuel to power the diesel-powered Nonroad Vehicles with engine HP rating of fifty (50) HP and above used on a Lower Manhattan Redevelopment Project and, where practicable, to reduce the emission of pollutants by retrofitting such Nonroad Vehicles with oxidation catalysts, particulate filters, or technology that achieves lowest particulate matter emissions.

5.6 Pesticides. In accordance with Section 17-1209 of the Administrative Code, to the extent that the **Contractor** or any **Subcontractor** applies pesticides to any property owned or leased by the **City**, the **Contractor**, and any **Subcontractor** shall comply with Chapter 12 of the Administrative Code.

5.7 Waste Treatment, Storage, and Disposal Facilities and Transporters. In connection with the **Work**, the **Contractor** and any **Subcontractor** shall use only those waste treatment, storage, and disposal facilities and waste transporters that possess the requisite license, permit or other governmental approval necessary to treat, store, dispose, or transport the waste, materials or hazardous substances.

5.8 Environmentally Preferable Purchasing. The **Contractor** shall ensure that products purchased or leased by the **Contractor** or any **Subcontractor** for the **Work** that are not specified by the **City** or are submitted as equivalents to a product specified by the **City** comply with the requirements of the New York City Environmentally Preferable Purchasing Program contained in Chapter 11 of Title 43 of the RCNY, pursuant to Chapter 3 of Title 6 of the Administrative Code.

## **ARTICLE 6. INSPECTION**

6.1 During the progress of the **Work** and up to the date of **Final Acceptance**, the **Contractor** shall at all times afford the representatives of the **City** every reasonable, safe, and proper facility for inspecting all **Work** done or being done at the **Site** and also for inspecting the manufacture or preparation of materials and equipment at the place of such manufacture or preparation.

6.2 The **Contractor’s** obligation hereunder shall include the uncovering or taking down of finished **Work** and its restoration thereafter; provided, however, that the order to uncover, take down and restore shall be in writing, and further provided that if **Work** thus exposed proves satisfactory, and if the **Contractor** has complied with Article 6.1, such uncovering or taking down and restoration shall be

considered an item of **Extra Work** to be paid for in accordance with the provisions of Article 26. If the **Work** thus exposed proves unsatisfactory, the **City** has no obligation to compensate the **Contractor** for the uncovering, taking down or restoration.

6.3 Inspection and approval by the **Commissioner**, the **Engineer**, **Project Manager**, or **Resident Engineer**, of finished **Work** or of **Work** being performed, or of materials and equipment at the place of manufacture or preparation, shall not relieve the **Contractor** of its obligation to perform the **Work** in strict accordance with the **Contract**. Finished or unfinished **Work** not found to be in strict accordance with the **Contract** shall be replaced as directed by the **Engineer**, even though such **Work** may have been previously approved and paid for. Such corrective **Work** is **Contract Work** and shall not be deemed **Extra Work**.

6.4 Rejected **Work** and materials shall be promptly taken down and removed from the **Site**, which must at all times be kept in a reasonably clean and neat condition.

## **ARTICLE 7. PROTECTION OF WORK AND OF PERSONS AND PROPERTY; NOTICES AND INDEMNIFICATION**

7.1 During the performance of the **Work** and up to the date of **Final Acceptance**, the **Contractor** shall be under an absolute obligation to protect the finished and unfinished **Work** against any damage, loss, injury, theft and/or vandalism and in the event of such damage, loss, injury, theft and/or vandalism, it shall promptly replace and/or repair such **Work** at the **Contractor's** sole cost and expense, as directed by the **Resident Engineer**. The obligation to deliver finished **Work** in strict accordance with the **Contract** prior to **Final Acceptance** shall be absolute and shall not be affected by the **Resident Engineer's** approval of, or failure to prohibit, the **Means and Methods of Construction** used by the **Contractor**.

7.2 During the performance of the **Work** and up to the date of **Final Acceptance**, the **Contractor** shall take all reasonable precautions to protect all persons and the property of the **City** and of others from damage, loss or injury resulting from the **Contractor's**, and/or its **Subcontractors'** operations under this **Contract**. The **Contractor's** obligation to protect shall include the duty to provide, place or replace, and adequately maintain at or about the **Site** suitable and sufficient protection such as lights, barricades, and enclosures.

7.3 The **Contractor** shall comply with the notification requirements set forth below in the event of any loss, damage or injury to **Work**, persons or property, or any accidents arising out of the operations of the **Contractor** and/or its **Subcontractors** under this **Contract**.

7.3.1 The **Contractor** shall make a full and complete report in writing to the **Resident Engineer** within three (3) **Days** after the occurrence.

7.3.2 The **Contractor** shall also send written notice of any such event to all insurance carriers that issued potentially responsive policies (including commercial general liability insurance carriers for events relating to the **Contractor's** own employees) no later than twenty (20) days after such event and again no later than twenty (20) days after the initiation of any claim and/or action resulting therefrom. Such notice shall contain the following information: the number of the insurance policy, the name of the Named Insured, the date and location of the incident, and the identity of the persons injured or property damaged. For any policy on which the **City** and/or the **Engineer**, **Architect**, or **Project Manager** are Additional Insureds, such notice shall expressly specify that "this notice is

being given on behalf of the City of New York as Additional Insured, such other Additional Insureds, as well as the Named Insured.”

7.3.2(a) Whenever such notice is sent under a policy on which the **City** is an Additional Insured, the **Contractor** shall provide copies of the notice to the **Comptroller**, the **Commissioner** and the **City** Corporation Counsel. The copy to the **Comptroller** shall be sent to the Insurance Unit, NYC Comptroller’s Office, 1 Centre Street – Room 1222, New York, New York, 10007. The copy to the **Commissioner** shall be sent to the address set forth in Schedule A of the General Conditions. The copy to the **City** Corporation Counsel shall be sent to Insurance Claims Specialist, Affirmative Litigation Division, New York City Law Department, 100 Church Street, New York, New York 10007.

7.3.2(b) If the **Contractor** fails to provide any of the foregoing notices to any appropriate insurance carrier(s) in a timely and complete manner, the **Contractor** shall indemnify the **City** for all losses, judgments, settlements, and expenses, including reasonable attorneys’ fees, arising from an insurer’s disclaimer of coverage citing late notice by or on behalf of the **City**.

7.4 To the fullest extent permitted by law, the **Contractor** shall defend, indemnify, and hold the **City**, its employees, and officials (the “Indemnitees”) harmless against any and all claims (including but not limited to claims asserted by any employee of the **Contractor** and/or its **Subcontractors**) and costs and expenses of whatever kind (including but not limited to payment or reimbursement of attorneys’ fees and disbursements) allegedly arising out of or in any way related to the operations of the **Contractor** and/or its **Subcontractors** in the performance of this **Contract** or from the **Contractor’s** and/or its **Subcontractors’** failure to comply with any of the provisions of this **Contract** or of the **Law**. Such costs and expenses shall include all those incurred in defending the underlying claim and those incurred in connection with the enforcement of this Article 7.4 by way of cross-claim, third-party claim, declaratory action or otherwise. The parties expressly agree that the indemnification obligation hereunder contemplates (1) full indemnity in the event of liability imposed against the Indemnitees without negligence and solely by reason of statute, operation of **Law** or otherwise; and (2) partial indemnity in the event of any actual negligence on the part of the Indemnitees either causing or contributing to the underlying claim (in which case, indemnification will be limited to any liability imposed over and above that percentage attributable to actual fault whether by statute, by operation of **Law**, or otherwise). Where partial indemnity is provided hereunder, all costs and expenses shall be indemnified on a pro rata basis.

7.4.1 Indemnification under Article 7.4 or any other provision of the **Contract** shall operate whether or not **Contractor** or its **Subcontractors** have placed and maintained the insurance specified under Article 22.

7.5 The provisions of this Article 7 shall not be deemed to create any new right of action in favor of third parties against the **Contractor** or the **City**.

### CHAPTER III: TIME PROVISIONS

#### ARTICLE 8. COMMENCEMENT AND PROSECUTION OF THE WORK

8.1 The **Contractor** shall commence the **Work** on the date specified in the **Notice to Proceed** or the **Order to Work**. The time for performance of the **Work** under the **Contract** shall be computed from

the date specified in the **Notice to Proceed** or the **Order to Work**. **TIME BEING OF THE ESSENCE** to the **City**, the **Contractor** shall thereafter prosecute the **Work** diligently, using such **Means and Methods of Construction** as are in accord with Article 4 herein and as will assure its completion not later than the date specified in this Contract, or on the date to which the time for completion may be extended.

#### **ARTICLE 9. PROGRESS SCHEDULES**

9.1 To enable the **Work** to be performed in an orderly and expeditious manner, the **Contractor**, within fifteen (15) **Days** after the **Notice to Proceed** or **Order to Work**, unless otherwise directed by the **Engineer**, shall submit to the **Engineer** a proposed progress schedule based on the Critical Path Method in the form of a bar graph or in such other form as specified by the **Engineer**, and monthly cash flow requirements, showing:

9.1.1 The anticipated time of commencement and completion of each of the various operations to be performed under this **Contract**; and

9.1.2 The sequence and interrelation of each of these operations with the others and with those of other related contracts; and

9.1.3 The estimated time required for fabrication or delivery, or both, of all materials and equipment required for the **Work**, including the anticipated time for obtaining required approvals pursuant to Article 10; and

9.1.4 The estimated amount in dollars the **Contractor** will claim on a monthly basis.

9.2 The proposed schedule shall be revised as directed by the **Engineer**, until finally approved by the **Engineer**, and after such approval, subject to the provisions of Article 11, shall be strictly adhered to by the **Contractor**.

9.3 If the **Contractor** shall fail to adhere to the approved progress schedule, or to the schedule as revised pursuant to Article 11, it shall promptly adopt such other or additional **Means and Methods of Construction**, at its sole cost and expense, as will make up for the time lost and will assure completion in accordance with the approved progress schedule. The approval by the **City** of a progress schedule which is shorter than the time allotted under the **Contract** shall not create any liability for the **City** if the approved progress schedule is not met.

9.4 The **Contractor** will not receive any payments until the proposed progress schedule is submitted.

#### **ARTICLE 10. REQUESTS FOR INFORMATION OR APPROVAL**

10.1 From time to time as the **Work** progresses and in the sequence indicated by the approved progress schedule, the **Contractor** shall submit to the **Engineer** a specific request in writing for each item of information or approval required by the **Contractor**. These requests shall state the latest date upon which the information or approval is actually required by the **Contractor**, and shall be submitted in a reasonable time in advance thereof to provide the **Engineer** a sufficient time to act upon such submissions, or any necessary re-submissions thereof.

10.2 The **Contractor** shall not have any right to an extension of time on account of delays due to the **Contractor's** failure to submit requests for the required information or the required approval in accordance with the above requirements.

**ARTICLE 11. NOTICE OF CONDITIONS CAUSING DELAY AND DOCUMENTATION OF DAMAGES CAUSED BY DELAY**

11.1 After the commencement of any condition which is causing or may cause a delay in completion of the **Work**, including conditions for which the **Contractor** may be entitled to an extension of time, the following notifications and submittals are required:

11.1.1 Within fifteen (15) **Days** after the **Contractor** becomes aware or reasonably should be aware of each such condition, the **Contractor** must notify the **Resident Engineer** or **Engineer**, as directed by the **Commissioner**, in writing of the existence, nature and effect of such condition upon the approved progress schedule and the **Work**, and must state why and in what respects, if any, the condition is causing or may cause a delay. Such notice shall include a description of the construction activities that are or could be affected by the condition and may include any recommendations the **Contractor** may have to address the delay condition and any activities the **Contractor** may take to avoid or minimize the delay.

11.1.2 If the **Contractor** shall claim to be sustaining damages for delay as provided for in this Article 11, within forty-five (45) **Days** from the time such damages are first incurred for each such condition, the **Contractor** shall submit to the **Commissioner** a verified written statement of the details and estimates of the amounts of such damages, including categories of expected damages and projected monthly costs, together with documentary evidence of such damages as the **Contractor** may have at the time of submission ("statement of delay damages"), as further detailed in Article 11.6. The **Contractor** may submit the above statement within such additional time as may be granted by the **Commissioner** in writing upon written request therefor.

11.1.3 Articles 11.1.1 and 11.1.2 do not relieve the **Contractor** of its obligation to comply with the provisions of Article 44.

11.2 Failure of the **Contractor** to strictly comply with the requirements of Article 11.1.1 may, in the discretion of the **Commissioner**, be deemed sufficient cause to deny any extension of time on account of delay arising out of such condition. Failure of the **Contractor** to strictly comply with the requirements of both Articles 11.1.1 and 11.1.2 shall be deemed a conclusive waiver by the **Contractor** of any and all claims for damages for delay arising from such condition and no right to recover on such claims shall exist.

11.3 When appropriate and directed by the **Engineer**, the progress schedule shall be revised by the **Contractor** until finally approved by the **Engineer**. The revised progress schedule must be strictly adhered to by the **Contractor**.

11.4 Compensable Delays

11.4.1 The **Contractor** agrees to make claim only for additional costs attributable to delay in the performance of this **Contract** necessarily extending the time for completion of the **Work** or resulting from acceleration directed by the **Commissioner** and required to maintain the progress schedule, occasioned solely by any act or omission to act of the **City** listed below. The **Contractor** also agrees that delay from any other cause shall be

compensated, if at all, solely by an extension of time to complete the performance of the **Work**.

11.4.1.1 The failure of the **City** to take reasonable measures to coordinate and progress the **Work** to the extent required by the **Contract**, except that the **City** shall not be responsible for the **Contractor's** obligation to coordinate and progress the **Work** of its **Subcontractors**.

11.4.1.2 Unreasonable delays attributable to the review of shop drawings, the issuance of change orders, or the cumulative impact of change orders that were not brought about by any act or omission of the **Contractor**.

11.4.1.3 The unavailability of the **Site** caused by acts or omissions of the **City**.

11.4.1.4 The issuance by the **Engineer** of a stop work order that was not brought about through any act or omission of the **Contractor**.

11.4.1.5 Differing site conditions or environmental hazards that were neither known nor reasonably ascertainable on a pre-bid inspection of the **Site** or review of the bid documents or other publicly available sources, and that are not ordinarily encountered in the **Project's** geographical area or neighborhood or in the type of **Work** to be performed.

11.4.1.6 Delays caused by the **City's** bad faith or its willful, malicious, or grossly negligent conduct;

11.4.1.7 Delays not contemplated by the parties;

11.4.1.8 Delays so unreasonable that they constitute an intentional abandonment of the **Contract** by the **City**; and

11.4.1.9 Delays resulting from the **City's** breach of a fundamental obligation of the **Contract**.

11.4.2 No claim may be made for any alleged delay in **Substantial Completion** of the **Work** if the **Work** will be or is substantially completed by the date of **Substantial Completion** provided for in Schedule A unless acceleration has been directed by the **Commissioner** to meet the date of **Substantial Completion** set forth in Schedule A, or unless there is a provision in the **Contract** providing for additional compensation for early completion.

11.4.3 The provisions of this Article 11 apply only to claims for additional costs attributable to delay and do not preclude determinations by the **Commissioner** allowing reimbursements for additional costs for **Extra Work** pursuant to Articles 25 and 26 of this **Contract**. To the extent that any cost attributable to delay is reimbursed as part of a change order, no additional claim for compensation under this Article 11 shall be allowed.

11.5 Non-Compensable Delays. The **Contractor** agrees to make no claim for, and is deemed to have included in its bid prices for the various items of the **Contract**, the extra/additional costs attributable to any delays caused by or attributable to the items set forth below. For such items, the **Contractor** shall be compensated, if at all, solely by an extension of time to complete the performance of the **Work**, in accordance with the provisions of Article 13. Such extensions of time will be granted, if at all, pursuant to the grounds set forth in Article 13.3.

11.5.1 The acts or omissions of any third parties, including but not limited to **Other Contractors**, public/ governmental bodies (other than **City Agencies**), utilities or private enterprises, who are disclosed in the **Contract Documents** or are ordinarily encountered or generally recognized as related to the **Work**;

11.5.2 Any situation which was within the contemplation of the parties at the time of entering into the **Contract**, including any delay indicated or disclosed in the **Contract Documents** or that would be generally recognized by a reasonably prudent contractor as related to the nature of the **Work**, and/or the existence of any facility or appurtenance owned, operated or maintained by any third party, as indicated or disclosed in the **Contract Documents** or ordinarily encountered or generally recognized as related to the nature of the **Work**;

11.5.3 Restraining orders, injunctions or judgments issued by a court which were caused by a Contractor's submission, action or inaction or by a Contractor's **Means and Methods of Construction**, or by third parties, unless such order, injunction or judgment was the result of an act or omission by the **City**;

11.5.4 Any labor boycott, strike, picketing, lockout or similar situation;

11.5.5 Any shortages of supplies or materials, or unavailability of equipment, required by the **Contract Work**;

11.5.6 Climatic conditions, storms, floods, droughts, tidal waves, fires, hurricanes, earthquakes, landslides or other catastrophes or acts of God, or acts of war or of the public enemy or terrorist acts, including the **City's** reasonable responses thereto; and

11.5.7 **Extra Work** which does not significantly affect the overall completion of the **Contract**, reasonable delays in the review or issuance of change orders or field orders and/or in shop drawing reviews or approvals.

#### 11.6 Required Content of Submission of Statement of Delay Damages

11.6.1 In the verified written statement of delay damages required by Article 11.1.2, the following information shall be provided by the **Contractor**:

11.6.1.1 For each delay, the start and end dates of the claimed periods of delay and, in addition, a description of the operations that were delayed, an explanation of how they were delayed, and the reasons for the delay, including identifying the applicable act or omission of the City listed in Article 11.4.

11.6.1.2 A detailed factual statement of the claim providing all necessary dates, locations and items of **Work** affected by the claim.

11.6.1.3 The estimated amount of additional compensation sought and a breakdown of that amount into categories as described in Article 11.7.

11.6.1.4 Any additional information requested by the **Commissioner**.

#### 11.7 Recoverable Costs

11.7.1 Delay damages may be recoverable for the following costs actually and necessarily incurred in the performance of the **Work**:

11.7.1.1 Direct labor, including payroll taxes (subject to statutory wage caps) and supplemental benefits, based on time and materials records;

11.7.1.2 Necessary materials (including transportation to the **Site**), based on time and material records;

- 11.7.1.3 Reasonable rental value of necessary plant and equipment other than small tools, plus fuel/energy costs according to the applicable formula set forth in Articles 26.2.4 and/or 26.2.8, based on time and material records;
- 11.7.1.4 Additional insurance and bond costs;
- 11.7.1.5 Extended **Site** overhead, field office rental, salaries of field office staff, on-site project managers and superintendents, field office staff vehicles, **Project**-specific storage, field office utilities and telephone, and field office consumables;
- 11.7.1.6 Labor escalation costs based on actual costs;
- 11.7.1.7 Materials and equipment escalation costs based on applicable industry indices unless documentation of actual increased cost is provided;
- 11.7.1.8 Additional material and equipment storage costs based on actual documented costs and additional costs necessitated by extended manufacturer warranty periods; and
- 11.7.1.9 Extended home office overhead calculated based on the following formula:
  - (1) Subtract from the original **Contract** amount the amount earned by original contractual **Substantial Completion** date (not including change orders);
  - (2) Remove 15% overhead and profit from the calculation in item (1) by dividing the results of item (1) by 1.15;
  - (3) Multiply the result of item (2) by 7.25% for the total home office overhead;
  - (4) Multiply the result of item (3) by 7.25% for the total profit; and
  - (5) The total extended home office overhead will be the total of items (3) and (4).

11.7.2 Recoverable Subcontractor Costs. When the **Work** is performed by a **Subcontractor**, the **Contractor** may be paid the actual and necessary costs of such subcontracted **Work** as outlined above in Articles 11.7.1.1 through 11.7.1.8, and an additional overhead of 5% of the costs outlined in Articles 11.7.1.1 through 11.7.1.3.

11.7.3 Non-Recoverable Costs. The parties agree that the **City** will have no liability for the following items and the **Contractor** agrees it shall make no claim for the following items:

- 11.7.3.1 Profit, or loss of anticipated or unanticipated profit, except as provided in Article 11.7.1.9;
- 11.7.3.2 Consequential damages, including, but not limited to, construction or bridge loans or interest paid on such loans, loss of bonding capacity, bidding opportunities, or interest in investment, or any resulting insolvency;
- 11.7.3.3 Indirect costs or expenses of any nature except those included in Article 11.7.1;
- 11.7.3.4 Direct or indirect costs attributable to performance of **Work** where the **Contractor**, because of situations or conditions within its control, has not progressed the **Work** in a satisfactory manner; and
- 11.7.3.5 Attorneys' fees and dispute and claims preparation expenses.

- 11.8 Any claims for delay under this Article 11 are not subject to the jurisdiction of the Contract Dispute Resolution Board pursuant to the dispute resolution process set forth in Article 27.
- 11.9 Any compensation provided to the **Contractor** in accordance with this Article 11 will be made pursuant to a claim filed with the **Comptroller**. Nothing in this Article 11 extends the time for the **Contractor** to file an action with respect to a claim within six months after **Substantial Completion** pursuant to Article 56.

## **ARTICLE 12. COORDINATION WITH OTHER CONTRACTORS**

12.1 During the progress of the **Work**, **Other Contractors** may be engaged in performing other work or may be awarded other contracts for additional work on this **Project**. In that event, the **Contractor** shall coordinate the **Work** to be done hereunder with the work of such **Other Contractors** and the **Contractor** shall fully cooperate with such **Other Contractors** and carefully fit its own **Work** to that provided under other contracts as may be directed by the **Engineer**. The **Contractor** shall not commit or permit any act which will interfere with the performance of work by any **Other Contractors**.

12.2 If the **Engineer** determines that the **Contractor** is failing to coordinate its **Work** with the work of **Other Contractors** as the **Engineer** has directed, then the **Commissioner** shall have the right to withhold any payments otherwise due hereunder until the **Contractor** completely complies with the **Engineer's** directions.

12.3 The **Contractor** shall notify the **Engineer** in writing if any **Other Contractor** on this **Project** is failing to coordinate its work with the **Work** of this **Contract**. If the **Engineer** finds such charges to be true, the **Engineer** shall promptly issue such directions to the **Other Contractor** with respect thereto as the situation may require. The **City** shall not, however, be liable for any damages suffered by any **Other Contractor's** failure to coordinate its work with the **Work** of this **Contract** or by reason of the **Other Contractor's** failure to promptly comply with the directions so issued by the **Engineer**, or by reason of any **Other Contractor's** default in performance, it being understood that the **City** does not guarantee the responsibility or continued efficiency of any contractor. The **Contractor** agrees to make no claim against the **City** for any damages relating to or arising out of any directions issued by the **Engineer** pursuant to this Article 12 (including but not limited to the failure of any **Other Contractor** to comply or promptly comply with such directions), or the failure of any **Other Contractor** to coordinate its work, or the default in performance of any **Other Contractor**.

12.4 The **Contractor** shall indemnify and hold the **City** harmless from any and all claims or judgments for damages and from costs and expenses to which the **City** may be subjected or which it may suffer or incur by reason of the **Contractor's** failure to comply with the **Engineer's** directions promptly; and the **Comptroller** shall have the right to exercise the powers reserved in Article 23 with respect to any claims which may be made for damages due to the **Contractor's** failure to comply with the **Engineer's** directions promptly. Insofar as the facts and **Law** relating to any claim would preclude the **City** from being completely indemnified by the **Contractor**, the **City** shall be partially indemnified by the **Contractor** to the fullest extent provided by **Law**.

12.5 Should the **Contractor** sustain any damage through any act or omission of any **Other Contractor** having a contract with the **City** for the performance of work upon the **Site** or of work which may be necessary to be performed for the proper prosecution of the **Work** to be performed hereunder, or through any act or omission of a subcontractor of such **Other Contractor**, the **Contractor** shall have no claim against the **City** for such damage, but shall have a right to recover such damage from the **Other**

**Contractor** under the provision similar to the following provisions which apply to this **Contract** and have been or will be inserted in the contracts with such **Other Contractors**:

12.5.1 Should any **Other Contractor** having or who shall hereafter have a contract with the **City** for the performance of work upon the **Site** sustain any damage through any act or omission of the **Contractor** hereunder or through any act or omission of any **Subcontractor** of the **Contractor**, the **Contractor** agrees to reimburse such **Other Contractor** for all such damages and to defend at its own expense any action based upon such claim and if any judgment or claim (even if the allegations of the action are without merit) against the **City** shall be allowed the **Contractor** shall pay or satisfy such judgment or claim and pay all costs and expenses in connection therewith and agrees to indemnify and hold the **City** harmless from all such claims. Insofar as the facts and **Law** relating to any claim would preclude the **City** from being completely indemnified by the **Contractor**, the **City** shall be partially indemnified by the **Contractor** to the fullest extent provided by **Law**.

12.6 The **City's** right to indemnification hereunder shall in no way be diminished, waived or discharged by its recourse to assessment of liquidated damages as provided in Article 15, or by the exercise of any other remedy provided for by **Contract** or by **Law**.

### **ARTICLE 13. EXTENSION OF TIME FOR PERFORMANCE**

13.1 If performance by the **Contractor** is delayed for a reason set forth in Article 13.3, the **Contractor** may be allowed a reasonable extension of time in conformance with this Article 13 and the **PPB** Rules.

13.2 Any extension of time may be granted only by the **ACCO** or by the Board for the Extension of Time (hereafter "Board") (as set forth below) upon written application by the **Contractor**.

13.3 Grounds for Extension: If such application is made, the **Contractor** shall be entitled to an extension of time for delay in completion of the **Work** caused solely:

13.3.1 By the acts or omissions of the **City**, its officials, agents or employees; or

13.3.2 By the act or omissions of **Other Contractors** on this **Project**; or

13.3.3 By supervening conditions entirely beyond the control of either party hereto (such as, but not limited to, acts of God or the public enemy, excessive inclement weather, war or other national emergency making performance temporarily impossible or illegal, or strikes or labor disputes not brought about by any act or omission of the **Contractor**).

13.3.4 The **Contractor** shall, however, be entitled to an extension of time for such causes only for the number of **Days** of delay which the **ACCO** or the Board may determine to be due solely to such causes, and then only if the **Contractor** shall have strictly complied with all of the requirements of Articles 9 and 10.

13.4 The **Contractor** shall not be entitled to receive a separate extension of time for each of several causes of delay operating concurrently, but, if at all, only for the actual period of delay in completion of the **Work** as determined by the **ACCO** or the Board, irrespective of the number of causes contributing to produce such delay. If one of several causes of delay operating concurrently results from any act, fault or omission of the **Contractor** or of its **Subcontractors** or **Materialmen**, and would of itself (irrespective

of the concurrent causes) have delayed the **Work**, no extension of time will be allowed for the period of delay resulting from such act, fault or omission.

13.5 The determination made by the **ACCO** or the Board on an application for an extension of time shall be binding and conclusive on the **Contractor**.

13.6 The **ACCO** or the Board acting entirely within their discretion may grant an application for an extension of time for causes of delay other than those herein referred.

13.7 Permitting the **Contractor** to continue with the **Work** after the time fixed for its completion has expired, or after the time to which such completion may have been extended has expired, or the making of any payment to the **Contractor** after such time, shall in no way operate as a waiver on the part of the **City** of any of its rights under this **Contract**.

13.8 Application for Extension of Time:

13.8.1 Before the **Contractor's** time extension request will be considered, the **Contractor** shall notify the **ACCO** of the condition which allegedly has caused or is causing the delay, and shall submit a written application to the **ACCO** identifying:

13.8.1(a) The **Contractor**; the registration number; and **Project** description;

13.8.1(b) Liquidated damage assessment rate, as specified in the **Contract**;

13.8.1(c) Original total bid price;

13.8.1(d) The original **Contract** start date and completion date;

13.8.1(e) Any previous time extensions granted (number and duration); and

13.8.1(f) The extension of time requested.

13.8.2 In addition, the application for extension of time shall set forth in detail:

13.8.2(a) The nature of each alleged cause of delay in completing the **Work**;

13.8.2(b) The date upon which each such cause of delay began and ended and the number of **Days** attributable to each such cause;

13.8.2(c) A statement that the **Contractor** waives all claims except for those delineated in the application, and the particulars of any claims which the **Contractor** does not agree to waive. For time extensions for **Substantial Completion** and final completion payments, the application shall include a detailed statement of the dollar amounts of each element of claim item reserved; and

13.8.2(d) A statement indicating the **Contractor's** understanding that the time extension is granted only for purposes of permitting continuation of **Contract** performance and payment for **Work** performed and that the **City** retains its right to conduct an investigation and assess liquidated damages as appropriate in the future.

13.9 Analysis and Approval of Time Extensions:

13.9.1 For time extensions for partial payments, a written determination shall be made by the **ACCO** who may, for good and sufficient cause, extend the time for the performance of the **Contract** as follows:

13.9.1(a) If the **Work** is to be completed within six (6) months, the time for performance may be extended for sixty (60) **Days**;

13.9.1(b) If the **Work** is to be completed within less than one (1) year but more than six (6) months, an extension of ninety (90) **Days** may be granted;

13.9.1(c) If the **Contract** period exceeds one (1) year, besides the extension granted in Article 13.9.1(b), an additional thirty (30) **Days** may be granted for each multiple of six (6) months involved beyond the one (1) year period; or

13.9.1(d) If exceptional circumstances exist, the **ACCO** may extend the time for performance beyond the extensions in Articles 13.9.1(a), 13.9.1(b), and 13.9.1(c). In that event, the **ACCO** shall file with the Mayor's Office of Contract Services a written explanation of the exceptional circumstances.

13.9.2 For extensions of time for **Substantial Completion** and final completion payments, the **Engineer**, in consultation with the **ACCO**, shall prepare a written analysis of the delay (including a preliminary determination of the causes of delay, the beginning and end dates for each such cause of delay, and whether the delays are excusable under the terms of this **Contract**). The report shall be subject to review by and approval of the Board, which shall have authority to question its analysis and determinations and request additional facts or documentation. The report as reviewed and made final by the Board shall be made a part of the **Agency** contract file. Neither the report itself nor anything contained therein shall operate as a waiver or release of any claim the **City** may have against the **Contractor** for either actual or liquidated damages.

13.9.3 Approval Mechanism for Time Extensions for **Substantial Completion** or Final Completion Payments: An extension shall be granted only with the approval of the Board which is comprised of the **ACCO** of the **Agency**, the **City** Corporation Counsel, and the **Comptroller**, or their authorized representatives.

13.9.4 Neither the granting of any application for an extension of time to the **Contractor** or any **Other Contractor** on this **Project** nor the papers, records or reports related to any application for or grant of an extension of time or determination related thereto shall be referred to or offered in evidence by the **Contractor** or its attorneys in any action or proceeding.

13.10 No Damage for Delay: The **Contractor** agrees to make no claim for damages for delay in the performance of this **Contract** occasioned by any act or omission to act of the **City** or any of its representatives, except as provided for in Article 11.

#### **ARTICLE 14. COMPLETION AND FINAL ACCEPTANCE OF THE WORK**

14.1 Date for **Substantial Completion**: The **Contractor** shall substantially complete the **Work** within the time fixed in Schedule A of the General Conditions, or within the time to which such **Substantial Completion** may be extended.

14.2 Determining the Date of **Substantial Completion**: The **Work** will be deemed to be substantially complete when the two conditions set forth below have been met.

14.2.1 Inspection: The **Engineer** or **Resident Engineer**, as applicable, has inspected the **Work** and has made a written determination that it is substantially complete.

14.2.2 Approval of **Final Approved Punch List** and Date for **Final Acceptance**: Following inspection of the **Work**, the **Engineer/Resident Engineer** shall furnish the **Contractor** with a final punch list, specifying all items of **Work** to be completed and proposing dates for the completion of each specified item of **Work**. The **Contractor** shall then submit in writing to the **Engineer/Resident Engineer** within ten (10) **Days** of the **Engineer/Resident Engineer** furnishing the final punch list either acceptance of the dates or proposed alternative dates for the completion of each specified item of **Work**. If the **Contractor** neither accepts the dates nor proposes alternative dates within ten (10) **Days**, the schedule proposed by the **Engineer/Resident Engineer** shall be deemed accepted. If the **Contractor** proposes alternative dates, then, within a reasonable time after receipt, the **Engineer/Resident Engineer**, in a written notification to the **Contractor**, shall approve the **Contractor's** completion dates or, if they are unable to agree, the **Engineer/Resident Engineer** shall establish dates for the completion of each item of **Work**. The latest completion date specified shall be the date for **Final Acceptance** of the **Work**.

14.3 Date of **Substantial Completion**. The date of approval of the **Final Approved Punch List**, shall be the date of **Substantial Completion**. The date of approval of the **Final Approved Punch List** shall be either (a) if the **Contractor** approves the final punch list and proposed dates for completion furnished by the **Engineer/Resident Engineer**, the date of the **Contractor's** approval; or (b) if the **Contractor** neither accepts the dates nor proposes alternative dates, ten (10) **Days** after the **Engineer/Resident Engineer** furnishes the **Contractor** with a final punch list and proposed dates for completion; or (c) if the **Contractor** proposes alternative dates, the date that the **Engineer/Resident Engineer** sends written notification to the **Contractor** either approving the **Contractor's** proposed alternative dates or establishing dates for the completion for each item of **Work**.

14.4 Determining the Date of **Final Acceptance**: The **Work** will be accepted as final and complete as of the date of the **Engineer's/Resident Engineer's** inspection if, upon such inspection, the **Engineer/Resident Engineer** finds that all items on the **Final Approved Punch List** are complete and no further **Work** remains to be done. The **Commissioner** will then issue a written determination of **Final Acceptance**.

14.5 Request for Inspection: Inspection of the **Work** by the **Engineer/Resident Engineer** for the purpose of **Substantial Completion** or **Final Acceptance** shall be made within fourteen (14) **Days** after receipt of the **Contractor's** written request therefor.

14.6 Request for Re-inspection: If upon inspection for the purpose of **Substantial Completion** or **Final Acceptance**, the **Engineer/Resident Engineer** determines that there are items of **Work** still to be performed, the **Contractor** shall promptly perform them and then request a re-inspection. If upon re-inspection, the **Engineer/Resident Engineer** determines that the **Work** is substantially complete or finally accepted, the date of such re-inspection shall be the date of **Substantial Completion** or **Final Acceptance**. Re-inspection by the **Engineer/Resident Engineer** shall be made within ten (10) **Days** after receipt of the **Contractor's** written request therefor.

14.7 Initiation of Inspection by the **Engineer/Resident Engineer**: If the **Contractor** does not request inspection or re-inspection of the **Work** for the purpose of **Substantial Completion** or **Final Acceptance**, the **Engineer/Resident Engineer** may initiate such inspection or re-inspection.

#### **ARTICLE 15. LIQUIDATED DAMAGES**

15.1 In the event the **Contractor** fails to substantially complete the **Work** within the time fixed for such **Substantial Completion** in Schedule A of the General Conditions, plus authorized time extensions, or if the **Contractor**, in the sole determination of the **Commissioner**, has abandoned the **Work**, the **Contractor** shall pay to the **City** the sum fixed in Schedule A of the General Conditions, for each and every **Day** that the time consumed in substantially completing the **Work** exceeds the time allowed therefor; which said sum, in view of the difficulty of accurately ascertaining the loss which the **City** will suffer by reason of delay in the **Substantial Completion** of the **Work** hereunder, is hereby fixed and agreed as the liquidated damages that the **City** will suffer by reason of such delay, and not as a penalty. This Article 15 shall also apply to the **Contractor** whether or not the **Contractor** is defaulted pursuant to Chapter X of this **Contract**. Neither the failure to assess liquidated damages nor the granting of any time extension shall operate as a waiver or release of any claim the **City** may have against the **Contractor** for either actual or liquidated damages.

15.2 Liquidated damages received hereunder are not intended to be nor shall they be treated as either a partial or full waiver or discharge of the **City's** right to indemnification, or the **Contractor's** obligation to indemnify the **City**, or to any other remedy provided for in this **Contract** or by **Law**.

15.3 The **Commissioner** may deduct and retain out of the monies which may become due hereunder, the amount of any such liquidated damages; and in case the amount which may become due hereunder shall be less than the amount of liquidated damages suffered by the **City**, the **Contractor** shall be liable to pay the difference.

#### **ARTICLE 16. OCCUPATION OR USE PRIOR TO COMPLETION**

16.1 Unless otherwise provided for in the **Specifications**, the **Commissioner** may take over, use, occupy or operate any part of the **Work** at any time prior to **Final Acceptance**, upon written notification to the **Contractor**. The **Engineer** or **Resident Engineer**, as applicable, shall inspect the part of the **Work** to be taken over, used, occupied, or operated, and will furnish the **Contractor** with a written statement of the **Work**, if any, which remains to be performed on such part. The **Contractor** shall not object to, nor interfere with, the **Commissioner's** decision to exercise the rights granted by Article 16. In the event the **Commissioner** takes over, uses, occupies, or operates any part of the **Work**:

16.1.1 the **Engineer/Resident Engineer** shall issue a written determination of **Substantial Completion** with respect to such part of the **Work**;

16.1.2 the **Contractor** shall be relieved of its absolute obligation to protect such part of the unfinished **Work** in accordance with Article 7;

16.1.3 the **Contractor's** guarantee on such part of the **Work** shall begin on the date of such use by the **City**; and;

16.1.4 the **Contractor** shall be entitled to a return of so much of the amount retained in accordance with Article 21 as it relates to such part of the **Work**, except so much thereof as may be retained under Articles 24 and 44.

## CHAPTER IV: SUBCONTRACTS AND ASSIGNMENTS

### ARTICLE 17. SUBCONTRACTS

17.1 The **Contractor** shall not make subcontracts totaling an amount more than the percentage of the total **Contract** price fixed in Schedule A of the General Conditions, without prior written permission from the **Commissioner**. All subcontracts made by the **Contractor** shall be in writing. No **Work** may be performed by a **Subcontractor** prior to the **Contractor** entering into a written subcontract with the **Subcontractor** and complying with the provisions of this Article 17.

17.2 Before making any subcontracts, the **Contractor** shall submit a written statement to the **Commissioner** giving the name and address of the proposed **Subcontractor**; the portion of the **Work** and materials which it is to perform and furnish; the cost of the subcontract; the VENDEX questionnaire if required; the proposed subcontract if requested by the **Commissioner**; and any other information tending to prove that the proposed **Subcontractor** has the necessary facilities, skill, integrity, past experience, and financial resources to perform the **Work** in accordance with the terms and conditions of this **Contract**.

17.3 In addition to the requirements in Article 17.2, **Contractor** is required to list the **Subcontractor** in the web based Subcontractor Reporting System through the City's Payee Information Portal (PIP), available at [www.nyc.gov/pip](http://www.nyc.gov/pip).<sup>1</sup> For each **Subcontractor** listed, **Contractor** is required to provide the following information: maximum contract value, description of **Subcontractor's** Work, start and end date of the subcontract and identification of the **Subcontractor's** industry. Thereafter, **Contractor** will be required to report in the system the payments made to each **Subcontractor** within 30 days of making the payment. If any of the required information changes throughout the Term of the **Contract**, **Contractor** will be required to revise the information in the system.

Failure of the **Contractor** to list a **Subcontractor** and/or to report **Subcontractor** payments in a timely fashion may result in the **Commissioner** declaring the **Contractor** in default of the **Contract** and will subject **Contractor** to liquidated damages in the amount of \$100 per day for each day that the **Contractor** fails to identify a **Subcontractor** along with the required information about the **Subcontractor** and/or fails to report payments to a **Subcontractor**, beyond the time frames set forth herein or in the notice from the **City**. Article 15 shall govern the issue of liquidated damages.

17.4 If an approved **Subcontractor** elects to subcontract any portion of its subcontract, the proposed sub-subcontract shall be submitted in the same manner as directed above.

17.5 The **Commissioner** will notify the **Contractor** in writing whether the proposed **Subcontractor** is approved. If the proposed **Subcontractor** is not approved, the **Contractor** may submit another proposed **Subcontractor** unless the **Contractor** decides to do the **Work**. No **Subcontractor** shall be permitted to enter or perform any work on the **Site** unless approved.

17.6 Before entering into any subcontract hereunder, the **Contractor** shall provide the proposed **Subcontractor** with a complete copy of this document and inform the proposed **Subcontractor** fully and completely of all provisions and requirements of this **Contract** relating either directly or indirectly to the **Work** to be performed and the materials to be furnished under such subcontract, and every such

<sup>1</sup> In order to use the new system, a PIP account will be required. Detailed instructions on creating a PIP account and using the new system are also available at [www.nyc.gov/pip](http://www.nyc.gov/pip). Additional assistance with PIP may be obtained by emailing the Financial Information Services Agency Help Desk at [pip@fisa.nyc.gov](mailto:pip@fisa.nyc.gov).

**Subcontractor** shall expressly stipulate that all labor performed and materials furnished by the **Subcontractor** shall strictly comply with the requirements of this **Contract**.

17.7 Documents given to a prospective **Subcontractor** for the purpose of soliciting the **Subcontractor's** bid shall include either a copy of the bid cover or a separate information sheet setting forth the **Project** name, the **Contract** number (if available), the **Agency** (as noted in Article 2.1.6), and the **Project's** location.

17.8 The **Commissioner's** approval of a **Subcontractor** shall not relieve the **Contractor** of any of its responsibilities, duties, and liabilities hereunder. The **Contractor** shall be solely responsible to the **City** for the acts or defaults of its **Subcontractor** and of such **Subcontractor's** officers, agents, and employees, each of whom shall, for this purpose, be deemed to be the agent or employee of the **Contractor** to the extent of its subcontract.

17.9 If the **Subcontractor** fails to maintain the necessary facilities, skill, integrity, past experience, and financial resources (other than due to the **Contractor's** failure to make payments where required) to perform the **Work** in accordance with the terms and conditions of this **Contract**, the **Contractor** shall promptly notify the **Commissioner** and replace such **Subcontractor** with a newly approved **Subcontractor** in accordance with this Article 17.

17.10 The **Contractor** shall be responsible for ensuring that all **Subcontractors** performing **Work** at the **Site** maintain all insurance required by **Law**.

17.11 The **Contractor** shall promptly, upon request, file with the **Engineer** a conformed copy of the subcontract and its cost. The subcontract shall provide the following:

17.11.1 Payment to **Subcontractors**: The agreement between the **Contractor** and its **Subcontractor** shall contain the same terms and conditions as to method of payment for **Work**, labor, and materials, and as to retained percentages, as are contained in this **Contract**.

17.11.2 Prevailing Rate of Wages: The agreement between the **Contractor** and its **Subcontractor** shall include the prevailing wage rates and supplemental benefits to be paid in accordance with Labor Law Section 220.

17.11.3 Section 6-123 of the Administrative Code: Pursuant to the requirements of Section 6-123 of the Administrative Code, every agreement between the **Contractor** and a **Subcontractor** in excess of fifty thousand (\$50,000) dollars shall include a provision that the **Subcontractor** shall not engage in any unlawful discriminatory practice as defined in Title VIII of the Administrative Code (Section 8-101 *et seq.*).

17.11.4 All requirements required pursuant to federal and/or state grant agreement(s), if applicable to the **Work**.

17.12 The **Commissioner** may deduct from the amounts certified under this **Contract** to be due to the **Contractor**, the sum or sums due and owing from the **Contractor** to the **Subcontractors** according to the terms of the said subcontracts, and in case of dispute between the **Contractor** and its **Subcontractor**, or **Subcontractors**, as to the amount due and owing, the **Commissioner** may deduct and withhold from the amounts certified under this **Contract** to be due to the **Contractor** such sum or sums as may be claimed by such **Subcontractor**, or **Subcontractors**, in a sworn affidavit, to be due and owing until such time as such claim or claims shall have been finally resolved.

17.13 On contracts where performance bonds and payment bonds are executed, the **Contractor** shall include on each requisition for payment the following data: **Subcontractor's** name, value of the subcontract, total amount previously paid to **Subcontractor** for **Work** previously requisitioned, and the amount, including retainage, to be paid to the **Subcontractor** for **Work** included in the requisition.

17.14 On **Contracts** where performance bonds and payment bonds are not executed, the **Contractor** shall include with each requisition for payment submitted hereunder, a signed statement from each and every **Subcontractor** and/or **Materialman** for whom payment is requested in such requisition. Such signed statement shall be on the letterhead of the **Subcontractor** and/or **Materialman** for whom payment is requested and shall (i) verify that such **Subcontractor** and/or **Materialman** has been paid in full for all **Work** performed and/or material supplied to date, exclusive of any amount retained and any amount included on the current requisition, and (ii) state the total amount of retainage to date, exclusive of any amount retained on the current requisition.

## ARTICLE 18. ASSIGNMENTS

18.1 The **Contractor** shall not assign, transfer, convey or otherwise dispose of this **Contract**, or the right to execute it, or the right, title or interest in or to it or any part thereof, or assign, by power of attorney or otherwise any of the monies due or to become due under this **Contract**, unless the previous written consent of the **Commissioner** shall first be obtained thereto, and the giving of any such consent to a particular assignment shall not dispense with the necessity of such consent to any further or other assignments.

18.2 Such assignment, transfer, conveyance or other disposition of this **Contract** shall not be valid until filed in the office of the **Commissioner** and the **Comptroller**, with the written consent of the **Commissioner** endorsed thereon or attached thereto.

18.3 Failure to obtain the previous written consent of the **Commissioner** to such an assignment, transfer, conveyance or other disposition, may result in the revocation and annulment of this **Contract**. The **City** shall thereupon be relieved and discharged from any further liability to the **Contractor**, its assignees, transferees or sublessees, who shall forfeit and lose all monies therefor earned under the **Contract**, except so much as may be required to pay the **Contractor's** employees.

18.4 The provisions of this clause shall not hinder, prevent, or affect an assignment by the **Contractor** for the benefit of its creditors made pursuant to the **Laws** of the State of New York.

18.5 This **Contract** may be assigned by the **City** to any corporation, agency or instrumentality having authority to accept such assignment.

## CHAPTER V: CONTRACTOR'S SECURITY AND GUARANTEE

### ARTICLE 19. SECURITY DEPOSIT

19.1 If performance and payment bonds are required, the **City** shall retain the bid security to ensure that the successful bidder executes the **Contract** and furnishes the required payment and performance security within ten (10) **Days** after notice of the award of the **Contract**. If the successful bidder fails to execute the **Contract** and furnish the required payment and performance security, the **City** shall retain such bid security as set forth in the Information for Bidders. If the successful bidder executes the

**Contract** and furnishes the required payment and performance security, the **City** shall return the bid security within a reasonable time after the furnishing of such bonds and execution of the **Contract** by the **City**.

19.2 If performance and payment bonds are not required, the bid security shall be retained by the **City** as security for the **Contractor**'s faithful performance of the **Contract**. If partial payments are provided, the bid security will be returned to the **Contractor** after the sum retained under Article 21 equals the amount of the bid security, subject to other provisions of this **Contract**. If partial payments are not provided, the bid security will be released when final payment is certified by the **City** for payment.

19.3 If the **Contractor** is declared in default under Article 48 prior to the return of the deposit, or if any claim is made such as referred to in Article 23, the amount of such deposit, or so much thereof as the **Comptroller** may deem necessary, may be retained and then applied by the **Comptroller**:

19.3.1 To compensate the **City** for any expense, loss or damage suffered or incurred by reason of or resulting from such default, including the cost of re-letting and liquidated damages; or

19.3.2 To indemnify the **City** against any and all claims.

## **ARTICLE 20. PAYMENT GUARANTEE**

20.1 On **Contracts** where one hundred (100%) percent performance bonds and payment bonds are executed, this Article 20 does not apply.

20.2 In the event the terms of this **Contract** do not require the **Contractor** to provide a payment bond or where the **Contract** does not require a payment bond for one hundred (100%) percent of the **Contract** price, the **City** shall, in accordance with the terms of this Article 20, guarantee payment of all lawful claims for:

20.2.1 Wages and compensation for labor performed and/or services rendered; and

20.2.2 Materials, equipment, and supplies provided, whether incorporated into the **Work** or not, when demands have been filed with the **City** as provided hereinafter by any person, firm, or corporation which furnished labor, material, equipment, supplies, or any combination thereof, in connection with the **Work** performed hereunder (hereinafter referred to as the "beneficiary") at the direction of the **City** or the **Contractor**.

20.3 The provisions of Article 20.2 are subject to the following limitations and conditions:

20.3.1 If the **Contractor** provides a payment bond for a value that is less than one hundred (100%) percent of the value of the **Contract Work**, the payment bond provided by the **Contractor** shall be primary (and non-contributing) to the payment guarantee provided under this Article 20.

20.3.2 The guarantee is made for the benefit of all beneficiaries as defined in Article 20.2 provided that those beneficiaries strictly adhere to the terms and conditions of Article 20.3.4 and 20.3.5.

20.3.3 Nothing in this Article 20 shall prevent a beneficiary providing labor, services or material for the **Work** from suing the **Contractor** for any amounts due and owing the beneficiary by the **Contractor**.

20.3.4 Every person who has furnished labor or material, to the **Contractor** or to a **Subcontractor** of the **Contractor**, in the prosecution of the **Work** and who has not been paid in full therefor before the expiration of a period of ninety (90) **Days** after the date on which the last of the labor was performed or material was furnished by him/her for which the claim is made, shall have the right to sue on this payment guarantee in his/her own name for the amount, or the balance thereof, unpaid at the time of commencement of the action; provided, however, that a person having a direct contractual relationship with a **Subcontractor** of the **Contractor** but no contractual relationship express or implied with the **Contractor** shall not have a right of action upon the guarantee unless he/she shall have given written notice to the **Contractor** within one hundred twenty (120) **Days** from the date on which the last of the labor was performed or the last of the material was furnished, for which his/her claim is made, stating with substantial accuracy the amount claimed and the name of the party to whom the material was furnished or for whom the labor was performed. The notice shall be served by delivering the same personally to the **Contractor** or by mailing the same by registered mail, postage prepaid, in an envelope addressed to the **Contractor** at any place where it maintains an office or conducts its business; provided, however, that where such notice is actually received by the **Contractor** by other means, such notice shall be deemed sufficient.

20.3.5 Except as provided in Labor Law Section 220-g, no action on this payment guarantee shall be commenced after the expiration of the one-year limitations period set forth in Section 137(4)(b) of the State Finance Law.

20.3.6 The **Contractor** shall promptly forward to the **City** any notice or demand received pursuant to Article 20.3.4. The **Contractor** shall inform the **City** of any defenses to the notice or demand and shall forward to the **City** any documents the **City** requests concerning the notice or demand.

20.3.7 All demands made against the **City** by a beneficiary of this payment guarantee shall be presented to the **Engineer** along with all written documentation concerning the demand which the **Engineer** deems reasonably appropriate or necessary, which may include, but shall not be limited to: the subcontract; any invoices presented to the **Contractor** for payment; the notarized statement of the beneficiary that the demand is due and payable, that a request for payment has been made of the **Contractor** and that the demand has not been paid by the **Contractor** within the time allowed for such payment by the subcontract; and copies of any correspondence between the beneficiary and the **Contractor** concerning such demand. The **City** shall notify the **Contractor** that a demand has been made. The **Contractor** shall inform the **City** of any defenses to the demand and shall forward to the **City** any documents the **City** requests concerning the demand.

20.3.8 The **City** shall make payment only if, after considering all defenses presented by the **Contractor**, it determines that the payment is due and owing to the beneficiary making the demand.

20.3.9 No beneficiary shall be entitled to interest from the **City**, or to any other costs, including, but not limited to, attorneys' fees, except to the extent required by State Finance Law Section 137.

20.4 Upon the receipt by the **City** of a demand pursuant to this Article 20, the **City** may withhold from any payment otherwise due and owing to the **Contractor** under this **Contract** an amount sufficient to satisfy the demand.

20.4.1 In the event the **City** determines that the demand is valid, the **City** shall notify the **Contractor** of such determination and the amount thereof and direct the **Contractor** to immediately pay such amount to the beneficiary. In the event the **Contractor**, within seven (7) **Days** of receipt of such notification from the **City**, fails to pay the beneficiary, such failure shall constitute an automatic and irrevocable assignment of payment by the **Contractor** to the beneficiary for the amount of the demand determined by the **City** to be valid. The **Contractor**, without further notification or other process, hereby gives its unconditional consent to such assignment of payment to the beneficiary and authorizes the **City**, on its behalf, to take all necessary actions to implement such assignment of payment, including without limitation the execution of any instrument or documentation necessary to effectuate such assignment.

20.4.2 In the event that the amount otherwise due and owing to the **Contractor** by the **City** is insufficient to satisfy such demand, the **City** may, at its option, require payment from the **Contractor** of an amount sufficient to cover such demand and exercise any other right to require or recover payment which the **City** may have under **Law** or **Contract**.

20.4.3 In the event the **City** determines that the demand is invalid, any amount withheld pending the **City's** review of such demand shall be paid to the **Contractor**; provided, however, no lien has been filed. In the event a claim or an action has been filed, the terms and conditions set forth in Article 23 shall apply. In the event a lien has been filed, the parties will be governed by the provisions of the Lien Law of the State of New York.

20.5 The provisions of this Article 20 shall not prevent the **City** and the **Contractor** from resolving disputes in accordance with the **PPB** Rules, where applicable.

20.6 In the event the **City** determines that the beneficiary is entitled to payment pursuant to this Article 20, such determination and any defenses and counterclaims raised by the **Contractor** shall be taken into account in evaluating the **Contractor's** performance.

20.7 Nothing in this Article 20 shall relieve the **Contractor** of the obligation to pay the claims of all persons with valid and lawful claims against the **Contractor** relating to the **Work**.

20.8 The **Contractor** shall not require any performance, payment or other bonds of any **Subcontractor** if this **Contract** does not require such bonds of the **Contractor**.

20.9 The payment guarantee made pursuant to this Article 20 shall be construed in a manner consistent with Section 137 of the State Finance Law and shall afford to persons furnishing labor or materials to the **Contractor** or its **Subcontractors** in the prosecution of the **Work** under this **Contract** all of the rights and remedies afforded to such persons by such section, including but not limited to, the right to commence an action against the **City** on the payment guarantee provided by this Article 20 within the one-year limitations period set forth in Section 137(4)(b).

## **ARTICLE 21. RETAINED PERCENTAGE**

21.1 If this **Contract** requires one hundred (100%) percent performance and payment security, then as further security for the faithful performance of this **Contract**, the **Commissioner** shall deduct, and

retain until the substantial completion of the **Work**, five (5%) percent of the value of **Work** certified for payment in each partial payment voucher.

21.2 If this **Contract** does not require one hundred (100%) percent performance and payment security and if the price for which this **Contract** was awarded does not exceed one million (\$1,000,000) dollars, then as further security for the faithful performance of this **Contract**, the **Commissioner** shall deduct, and retain until the substantial completion of the **Work**, five (5%) percent of the value of **Work** certified for payment in each partial payment voucher.

21.3 If this **Contract** does not require one hundred (100%) percent performance and payment security and if the price for which this **Contract** was awarded exceeds one million (\$1,000,000) dollars, then as further security for the faithful performance of this **Contract**, the **Commissioner** shall deduct, and retain until the substantial completion of the **Work**, up to ten (10%) percent of the value of **Work** certified for payment in each partial payment voucher. The percentage to be retained is set forth in Schedule A of the General Conditions.

## **ARTICLE 22. INSURANCE**

22.1 Types of Insurance: The **Contractor** shall procure and maintain the following types of insurance if, and as indicated, in Schedule A of the General Conditions (with the minimum limits and special conditions specified in Schedule A). Such insurance shall be maintained from the date the **Contractor** is required to provide Proof of Insurance pursuant to Article 22.3.1 through the date of completion of all required **Work** (including punch list work as certified in writing by the **Resident Engineer**), except for insurance required pursuant to Article 22.1.4, which may terminate upon **Substantial Completion** of the **Contract**. All insurance shall meet the requirements set forth in this Article 22. Wherever this Article requires that insurance coverage be “at least as broad” as a specified form (including all ISO forms), there is no obligation that the form itself be used, provided that the **Contractor** can demonstrate that the alternative form or endorsement contained in its policy provides coverage at least as broad as the specified form.

22.1.1 Commercial General Liability Insurance: The **Contractor** shall provide Commercial General Liability Insurance covering claims for property damage and/or bodily injury, including death, which may arise from any of the operations under this **Contract**. Coverage under this insurance shall be at least as broad as that provided by the latest edition of Insurance Services Office (“ISO”) Form CG 0001. Such insurance shall be “occurrence” based rather than “claims-made” and include, without limitation, the following types of coverage: premises operations; products and completed operations; contractual liability (including the tort liability of another assumed in a contract); broad form property damage; independent contractors; explosion, collapse and underground (XCU); construction means and methods; and incidental malpractice. Such insurance shall contain a “per project” aggregate limit, as specified in Schedule A, that applies separately to operations under this **Contract**.

22.1.1(a) Such Commercial General Liability Insurance shall name the **City** as an Additional Insured. Coverage for the City shall specifically include the **City’s** officials and employees, be at least as broad as the latest edition of ISO Form CG 20 10 and provide completed operations coverage at least as broad as the latest edition of ISO Form CG 20 37.

22.1.1(b) Such Commercial General Liability Insurance shall name all other entities designated as additional insureds in Schedule A but only for claims arising from the

**Contractor's** operations under this **Contract**, with coverage at least as broad as the latest edition of ISO Form CG 20 26.

22.1.1(c) If the **Work** requires a permit from the Department of Buildings pursuant to 1 RCNY Section 101-08, the **Contractor** shall provide Commercial General Liability Insurance with limits of at least those required by 1 RCNY section 101-08 or greater limits required by the Agency in accordance with Schedule A. If the **Work** does not require such a permit, the minimum limits shall be those provided for in Schedule A.

22.1.1(d) If any of the **Work** includes repair of a waterborne vessel owned by or to be delivered to the **City**, such Commercial General Liability shall include, or be endorsed to include, Ship Repairer's Legal Liability Coverage to protect against, without limitation, liability arising from navigation of such vessels prior to delivery to and acceptance by the **City**.

22.1.2 Workers' Compensation Insurance, Employers' Liability Insurance, and Disability Benefits Insurance: The **Contractor** shall provide, and shall cause its **Subcontractors** to provide, Workers Compensation Insurance, Employers' Liability Insurance, and Disability Benefits Insurance in accordance with the **Laws** of the State of New York on behalf of all employees providing services under this **Contract** (except for those employees, if any, for which the **Laws** require insurance only pursuant to Article 22.1.3).

22.1.3 United States Longshoremen's and Harbor Workers Act and/or Jones Act Insurance: If specified in Schedule A of the General Conditions or if required by **Law**, the **Contractor** shall provide insurance in accordance with the United States Longshoremen's and Harbor Workers Act and/or the Jones Act, on behalf of all qualifying employees providing services under this **Contract**.

22.1.4 Builders Risk Insurance: If specified in Schedule A of the General Conditions, the **Contractor** shall provide Builders Risk Insurance on a completed value form for the total value of the **Work** through **Substantial Completion** of the **Work** in its entirety. Such insurance shall be provided on an All Risk basis and include coverage, without limitation, for windstorm (including named windstorm), storm surge, flood and earth movement. Unless waived by the **Commissioner**, it shall include coverage for ordinance and law, demolition and increased costs of construction, debris removal, pollutant clean up and removal, and expediting costs. Such insurance shall cover, without limitation, (a) all buildings and/or structures involved in the **Work**, as well as temporary structures at the **Site**, and (b) any property that is intended to become a permanent part of such building or structure, whether such property is on the **Site**, in transit or in temporary storage. Policies shall name the **Contractor** as Named Insured and list the **City** as both an Additional Insured and a Loss Payee as its interest may appear.

22.1.4(a) Policies of such insurance shall specify that, in the event a loss occurs at an occupied facility, occupancy of such facility is permitted without the consent of the issuing insurance company.

22.1.4(b) Such insurance may be provided through an Installation Floater, at the **Contractor's** option, if it otherwise conforms with the requirements of this Article 22.1.4.

22.1.5 Commercial Automobile Liability Insurance: The **Contractor** shall provide Commercial Automobile Liability Insurance for liability arising out of ownership,

maintenance or use of any owned (if any), non-owned and hired vehicles to be used in connection with this **Contract**. Coverage shall be at least as broad as the latest edition of ISO Form CA0001. If vehicles are used for transporting hazardous materials, the Automobile Liability Insurance shall be endorsed to provide pollution liability broadened coverage for covered vehicles (endorsement CA 99 48) as well as proof of MCS 90.

22.1.6 Contractors Pollution Liability Insurance: If specified in Schedule A of the General Conditions, the **Contractor** shall maintain, or cause the **Subcontractor** doing such **Work** to maintain, Contractors Pollution Liability Insurance covering bodily injury and property damage. Such insurance shall provide coverage for actual, alleged or threatened emission, discharge, dispersal, seepage, release or escape of pollutants (including asbestos), including any loss, cost or expense incurred as a result of any cleanup of pollutants (including asbestos) or in the investigation, settlement or defense of any claim, action, or proceedings arising from the operations under this **Contract**. Such insurance shall be in the **Contractor's** name and list the **City** as an Additional Insured and any other entity specified in Schedule A. Coverage shall include, without limitation, (a) loss of use of damaged property or of property that has not been physically injured, (b) transportation, and (c) non-owned disposal sites.

22.1.6(a) Coverage for the **City** as Additional Insured shall specifically include the **City's** officials and employees and be at least as broad as provided to the **Contractor** for this **Project**.

22.1.6(b) If such insurance is written on a claims-made policy, such policy shall have a retroactive date on or before the effective date of this **Contract**, and continuous coverage shall be maintained, or an extended discovery period exercised, for a period of not less than three (3) years from the time the **Work** under this **Contract** is completed.

22.1.7 Marine Insurance:

22.1.7(a) Marine Protection and Indemnity Insurance: If specified in Schedule A of the General Conditions or if the **Contractor** engages in marine operations in the execution of any part of the **Work**, the **Contractor** shall maintain, or cause the **Subcontractor** doing such **Work** to maintain, Marine Protection and Indemnity Insurance with coverage at least as broad as Form SP-23. The insurance shall provide coverage for the **Contractor** or **Subcontractor** (whichever is doing this **Work**) and for the **City** (together with its officials and employees) and any other entity specified in Schedule A as an Additional Insured for bodily injury and property damage arising from marine operations under this **Contract**. Coverage shall include, without limitation, injury or death of crew members (if not fully provided through other insurance), removal of wreck, damage to piers, wharves and other fixed or floating objects and loss of or damage to any other vessel or craft, or to property on such other vessel or craft.

22.1.7(b) Hull and Machinery Insurance: If specified in Schedule A of the General Conditions or if the **Contractor** engages in marine operations in the execution of any part of the **Work**, the **Contractor** shall maintain, or cause the **Subcontractor** doing such **Work** to maintain, Hull and Machinery Insurance with coverage for the **Contractor** or **Subcontractor** (whichever is doing this **Work**) and for the **City** (together with its officials and employees) as Additional Insured at least as broad as the latest edition of American Institute Tug Form for all tugs used under this

**Contract** and Collision Liability at least as broad as the latest edition of American Institute Hull Clauses.

22.1.7(c) Marine Pollution Liability Insurance: If specified in Schedule A of the General Conditions or if the **Contractor** engages in marine operations in the execution of any part of the **Work**, the **Contractor** shall maintain, or cause the **Subcontractor** doing such Work to maintain, Marine Pollution Liability Insurance covering itself (or the Subcontractor doing such Work) as Named Insured and the **City** (together with its officials and employees) and any other entity specified in Schedule A as an Additional Insured. Coverage shall be at least as broad as that provided by the latest edition of Water Quality Insurance Syndicate Form and include, without limitation, liability arising from the discharge or substantial threat of a discharge of oil, or from the release or threatened release of a hazardous substance including injury to, or economic losses resulting from, the destruction of or damage to real property, personal property or natural resources.

22.1.8 The **Contractor** shall provide such other types of insurance, at such minimum limits and with such conditions, as are specified in Schedule A of the General Conditions.

## 22.2 General Requirements for Insurance Coverage and Policies:

22.2.1 All required insurance policies shall be maintained with companies that may lawfully issue the required policy and have an A.M. Best rating of at least A-/VII or a Standard and Poor's rating of at least A, unless prior written approval is obtained from the **City** Corporation Counsel.

22.2.2 The **Contractor** shall be solely responsible for the payment of all premiums for all required policies and all deductibles and self-insured retentions to which such policies are subject, whether or not the **City** is an insured under the policy.

22.2.3 In his/her sole discretion, the **Commissioner** may, subject to the approval of the **Comptroller** and the **City** Corporation Counsel, accept Letters of Credit and/or custodial accounts in lieu of required insurance.

22.2.4 The **City's** limits of coverage for all types of insurance required pursuant to Schedule A of the General Conditions shall be the greater of (i) the minimum limits set forth in Schedule A or (ii) the limits provided to the **Contractor** as Named Insured under all primary, excess, and umbrella policies of that type of coverage.

22.2.5 The **Contractor** may satisfy its insurance obligations under this Article 22 through primary policies or a combination of primary and excess/umbrella policies, so long as all policies provide the scope of coverage required herein.

22.2.6 Policies of insurance provided pursuant to this Article 22 shall be primary and non-contributing to any insurance or self-insurance maintained by the **City**.

## 22.3 Proof of Insurance:

22.3.1 For all types of insurance required by Article 22.1 and Schedule A, except for insurance required by Articles 22.1.4 and 22.1.7, the **Contractor** shall file proof of insurance in accordance with this Article 22.3 within ten (10) **Days** of award. For insurance

provided pursuant to Articles 22.1.4 and 22.1.7, proof shall be filed by a date specified by the **Commissioner** or ten (10) **Days** prior to the commencement of the portion of the **Work** covered by such policy, whichever is earlier.

22.3.2 For Workers' Compensation Insurance provided pursuant to Article 22.1.2, the **Contractor** shall submit one of the following forms: C-105.2 Certificate of Workers' Compensation Insurance; U-26.3 - State Insurance Fund Certificate of Workers' Compensation Insurance; Request for WC/DB Exemption (Form CE-200); equivalent or successor forms used by the New York State Workers' Compensation Board; or other proof of insurance in a form acceptable to the **Commissioner**. For Disability Benefits Insurance provided pursuant to Article 22.1.2, the Contractor shall submit DB-120.1 - Certificate Of Insurance Coverage Under The NYS Disability Benefits Law, Request for WC/DB Exemption (Form CE-200); equivalent or successor forms used by the New York State Workers' Compensation Board; or other proof of insurance in a form acceptable to the **Commissioner**. ACORD forms are not acceptable.

22.3.3 For policies provided pursuant to all of Article 22.1 other than Article 22.1.2, the **Contractor** shall submit one or more Certificates of Insurance on forms acceptable to the **Commissioner**. All such Certificates of Insurance shall certify (a) the issuance and effectiveness of such policies of insurance, each with the specified minimum limits (b) for insurance secured pursuant to Article 22.1.1 that the **City** and any other entity specified in Schedule A is an Additional Insured thereunder; (c) in the event insurance is required pursuant to Article 22.1.6 and/or Article 22.1.7, that the **City** is an Additional Insured thereunder; (d) the company code issued to the insurance company by the National Association of Insurance Commissioners (the NAIC number); and (e) the number assigned to the **Contract** by the **City**. All such Certificates of Insurance shall be accompanied by either a duly executed "Certification by Insurance Broker or Agent" in the form contained in Part III of Schedule A or copies of all policies referenced in such Certificate of Insurance as certified by an authorized representative of the issuing insurance carrier. If any policy is not available at the time of submission, certified binders may be submitted until such time as the policy is available, at which time a certified copy of the policy shall be submitted.

22.3.4 Documentation confirming renewals of insurance shall be submitted to the **Commissioner** prior to the expiration date of coverage of policies required under this **Contract**. Such proofs of insurance shall comply with the requirements of Articles 22.3.2 and 22.3.3.

22.3.5 The **Contractor** shall be obligated to provide the **City** with a copy of any policy of insurance provided pursuant to this Article 22 upon the demand for such policy by the **Commissioner** or the **City** Corporation Counsel.

#### 22.4 Operations of the **Contractor**:

22.4.1 The **Contractor** shall not commence the **Work** unless and until all required certificates have been submitted to and accepted by the **Commissioner**. Acceptance by the **Commissioner** of a certificate does not excuse the **Contractor** from securing insurance consistent with all provisions of this Article 22 or of any liability arising from its failure to do so.

22.4.2 The **Contractor** shall be responsible for providing continuous insurance coverage in the manner, form, and limits required by this **Contract** and shall be authorized to perform **Work** only during the effective period of all required coverage.

22.4.3 In the event that any of the required insurance policies lapse, are revoked, suspended or otherwise terminated, for whatever cause, the **Contractor** shall immediately stop all **Work**, and shall not recommence **Work** until authorized in writing to do so by the **Commissioner**. Upon quitting the **Site**, except as otherwise directed by the **Commissioner**, the **Contractor** shall leave all plant, materials, equipment, tools, and supplies on the **Site**. **Contract** time shall continue to run during such periods and no extensions of time will be granted. The **Commissioner** may also declare the **Contractor** in default for failure to maintain required insurance.

22.4.4 In the event the **Contractor** receives notice, from an insurance company or other person, that any insurance policy required under this Article 22 shall be cancelled or terminated (or has been cancelled or terminated) for any reason, the **Contractor** shall immediately forward a copy of such notice to both the **Commissioner** and the New York City Comptroller, attn: Office of Contract Administration, Municipal Building, One Centre Street, room 1005, New York, New York 10007. Notwithstanding the foregoing, the **Contractor** shall ensure that there is no interruption in any of the insurance coverage required under this Article 22.

22.4.5 Where notice of loss, damage, occurrence, accident, claim or suit is required under an insurance policy maintained in accordance with this Article 22, the **Contractor** shall notify in writing all insurance carriers that issued potentially responsive policies of any such event relating to any operations under this **Contract** (including notice to Commercial General Liability insurance carriers for events relating to the **Contractor**'s own employees) no later than 20 days after such event. For any policy where the **City** is an Additional Insured, such notice shall expressly specify that "this notice is being given on behalf of the City of New York as Insured as well as the Named Insured." Such notice shall also contain the following information: the number of the insurance policy, the name of the named insured, the date and location of the damage, occurrence, or accident, and the identity of the persons or things injured, damaged or lost. The **Contractor** shall simultaneously send a copy of such notice to the City of New York c/o Insurance Claims Specialist, Affirmative Litigation Division, New York City Law Department, 100 Church Street, New York, New York 10007.

22.4.6 In the event of any loss, accident, claim, action, or other event that does or can give rise to a claim under any insurance policy required under this Article 22, the **Contractor** shall at all times fully cooperate with the **City** with regard to such potential or actual claim.

22.5 **Subcontractor Insurance:** In the event the **Contractor** requires any **Subcontractor** to procure insurance with regard to any operations under this **Contract** and requires such **Subcontractor** to name the **Contractor** as an **Additional Insured** thereunder, the **Contractor** shall ensure that the **Subcontractor** name the **City**, including its officials and employees, as an Additional Insured with coverage at least as broad as the most recent edition of ISO Form CG 20 26.

22.6 Wherever reference is made in Article 7 or this Article 22 to documents to be sent to the **Commissioner** (e.g., notices, filings, or submissions), such documents shall be sent to the address set forth in Schedule A of the General Conditions. In the event no address is set forth in Schedule A, such documents are to be sent to the **Commissioner**'s address as provided elsewhere in this **Contract**.

22.7 Apart from damages or losses covered by insurance provided pursuant to Articles 22.1.2, 22.1.3, or 22.1.5, the **Contractor** waives all rights against the **City**, including its officials and employees, for any damages or losses that are covered under any insurance required under this Article 22 (whether or

not such insurance is actually procured or claims are paid thereunder) or any other insurance applicable to the operations of the **Contractor** and/or its employees, agents, or **Subcontractors**.

22.8 In the event the **Contractor** utilizes a self-insurance program to satisfy any of the requirements of this Article 22, the **Contractor** shall ensure that any such self-insurance program provides the **City** with all rights that would be provided by traditional insurance under this Article 22, including but not limited to the defense and indemnification obligations that insurers are required to undertake in liability policies.

22.9 Materiality/Non-Waiver: The **Contractor's** failure to secure policies in complete conformity with this Article 22, or to give an insurance company timely notice of any sort required in this **Contract** or to do anything else required by this Article 22 shall constitute a material breach of this **Contract**. Such breach shall not be waived or otherwise excused by any action or inaction by the **City** at any time.

22.10 Pursuant to General Municipal Law Section 108, this **Contract** shall be void and of no effect unless **Contractor** maintains Workers' Compensation Insurance for the term of this **Contract** to the extent required and in compliance with the New York State Workers' Compensation Law.

22.11 Other Remedies: Insurance coverage provided pursuant to this Article 22 or otherwise shall not relieve the **Contractor** of any liability under this **Contract**, nor shall it preclude the **City** from exercising any rights or taking such other actions available to it under any other provisions of this **Contract** or **Law**.

### **ARTICLE 23. MONEY RETAINED AGAINST CLAIMS**

23.1 If any claim shall be made by any person or entity (including **Other Contractors** with the **City** on this **Project**) against the **City** or against the **Contractor** and the **City** for any of the following:

- (a) An alleged loss, damage, injury, theft or vandalism of any of the kinds referred to in Articles 7 and 12, plus the reasonable costs of defending the **City**, which in the opinion of the **Comptroller** may not be paid by an insurance company (for any reason whatsoever); or
- (b) An infringement of copyrights, patents or use of patented articles, tools, etc., as referred to in Article 57; or
- (c) Damage claimed to have been caused directly or indirectly by the failure of the **Contractor** to perform the **Work** in strict accordance with this **Contract**,

the amount of such claim, or so much thereof as the **Comptroller** may deem necessary, may be withheld by the **Comptroller**, as security against such claim, from any money due hereunder. The **Comptroller**, in his/her discretion, may permit the **Contractor** to substitute other satisfactory security in lieu of the monies so withheld.

23.2 If an action on such claim is timely commenced and the liability of the **City**, or the **Contractor**, or both, shall have been established therein by a final judgment of a court of competent jurisdiction, or if such claim shall have been admitted by the **Contractor** to be valid, the **Comptroller** shall pay such judgment or admitted claim out of the monies retained by the **Comptroller** under the provisions of this Article 23, and return the balance, if any, without interest, to the **Contractor**.

## ARTICLE 24. MAINTENANCE AND GUARANTY

24.1 The **Contractor** shall promptly repair, replace, restore or rebuild, as the **Commissioner** may determine, any finished **Work** in which defects of materials or workmanship may appear or to which damage may occur because of such defects, during the one (1) year period subsequent to the date of **Substantial Completion** (or use and occupancy in accordance with Article 16), except where other periods of maintenance and guaranty are provided for in Schedule A.

24.2 As security for the faithful performance of its obligations hereunder, the **Contractor**, upon filing its requisition for payment on **Substantial Completion**, shall deposit with the **Commissioner** a sum equal to one (1%) percent of the price (or the amount fixed in Schedule A of the General Conditions) in cash or certified check upon a state or national bank and trust company or a check of such bank and trust company signed by a duly authorized officer thereof and drawn to the order of the **Comptroller**, or obligations of the **City**, which the **Comptroller** may approve as of equal value with the sum so required.

24.3 In lieu of the above, the **Contractor** may make such security payment to the **City** by authorizing the **Commissioner** in writing to deduct the amount from the **Substantial Completion** payment which shall be deemed the deposit required above.

24.4 If the **Contractor** has faithfully performed all of its obligations hereunder the **Commissioner** shall so certify to the **Comptroller** within five (5) **Days** after the expiration of one (1) year from the date of **Substantial Completion** and acceptance of the **Work** or within thirty (30) **Days** after the expiration of the guarantee period fixed in the **Specifications**. The security payment shall be repaid to the **Contractor** without interest within thirty (30) **Days** after certification by the **Commissioner** to the **Comptroller** that the **Contractor** has faithfully performed all of its obligations hereunder.

24.5 Notice by the **Commissioner** to the **Contractor** to repair, replace, rebuild or restore such defective or damaged **Work** shall be timely, pursuant to this article, if given not later than ten (10) **Days** subsequent to the expiration of the one (1) year period or other periods provided for herein.

24.6 If the **Contractor** shall fail to repair, replace, rebuild or restore such defective or damaged **Work** promptly after receiving such notice, the **Commissioner** shall have the right to have the **Work** done by others in the same manner as provided for in the completion of a defaulted **Contract**, under Article 51.

24.7 If the security payment so deposited is insufficient to cover the cost of such **Work**, the **Contractor** shall be liable to pay such deficiency on demand by the **Commissioner**.

24.8 The **Engineer's** certificate setting forth the fair and reasonable cost of repairing, replacing, rebuilding or restoring any damaged or defective **Work** when performed by one other than the **Contractor**, shall be binding and conclusive upon the **Contractor** as to the amount thereof.

24.9 The **Contractor** shall obtain all manufacturers' warranties and guaranties of all equipment and materials required by this **Contract** in the name of the **City** and shall deliver same to the **Commissioner**. All of the **City's** rights and title and interest in and to said manufacturers' warranties and guaranties may be assigned by the **City** to any subsequent purchasers of such equipment and materials or lessees of the premises into which the equipment and materials have been installed.

## CHAPTER VI: CHANGES, EXTRA WORK, AND DOCUMENTATION OF CLAIM

### ARTICLE 25. CHANGES

25.1 Changes may be made to this **Contract** only as duly authorized in writing by the **Commissioner** in accordance with the **Law** and this **Contract**. All such changes, modifications, and amendments will become a part of the **Contract**. **Work** so ordered shall be performed by the **Contractor**.

25.2 **Contract** changes will be made only for **Work** necessary to complete the **Work** included in the original scope of the **Contract** and/or for non-material changes to the scope of the **Contract**. Changes are not permitted for any material alteration in the scope of **Work** in the **Contract**.

25.3 The **Contractor** shall be entitled to a price adjustment for **Extra Work** performed pursuant to a written change order. Adjustments to price shall be computed in one or more of the following ways:

25.3.1 By applicable unit prices specified in the **Contract**; and/or

25.3.2 By agreement of a fixed price; and/or

25.3.3 By time and material records; and/or

25.3.4 In any other manner approved by the **CCPO**.

25.4 All payments for change orders are subject to pre-audit by the **Engineering Audit Officer** and may be post-audited by the **Comptroller** and/or the **Agency**.

### ARTICLE 26. METHODS OF PAYMENT FOR OVERRUNS AND EXTRA WORK

26.1 Overrun of Unit Price Item: An overrun is any quantity of a unit price item which the **Contractor** is directed to provide which is in excess of one hundred twenty-five (125%) percent of the estimated quantity for that item set forth in the bid schedule.

26.1.1 For any unit price item, the **Contractor** will be paid at the unit price bid for any quantity up to one hundred twenty-five (125%) percent of the estimated quantity for that item set forth in the bid schedule. If during the progress of the **Work**, the actual quantity of any unit price item required to complete the **Work** approaches the estimated quantity for that item, and for any reason it appears that the actual quantity of any unit price item necessary to complete the **Work** will exceed the estimated quantity for that item by twenty-five (25%) percent, the **Contractor** shall immediately notify the **Engineer** of such anticipated overrun. The **Contractor** shall not be compensated for any quantity of a unit price item provided which is in excess of one hundred twenty-five (125%) percent of the estimated quantity for that item set forth in the bid schedule without written authorization from the **Engineer**.

26.1.2 If the actual quantity of any unit price item necessary to complete the **Work** will exceed one hundred twenty five (125%) percent of the estimated quantity for that item set forth in the bid schedule, the **City** reserves the right and the **Contractor** agrees to negotiate a new unit price for such item. In no event shall such negotiated new unit price exceed the unit bid price. If the **City** and **Contractor** cannot agree on a new unit price, then the **City** shall order the **Contractor** and the **Contractor** agrees to provide additional quantities of

the item on the basis of time and material records for the actual and reasonable cost as determined under Article 26.2, but in no event at a unit price exceeding the unit price bid.

**26.2 Extra Work:** For **Extra Work** where payment is by agreement on a fixed price in accordance with Article 25.3.2, the price to be paid for such **Extra Work** shall be based on the fair and reasonable estimated cost of the items set forth below. For **Extra Work** where payment is based on time and material records in accordance with Article 25.3.3, the price to be paid for such **Extra Work** shall be the actual and reasonable cost of the items set forth below, calculated in accordance with the formula specified therein, if any.

26.2.1 Necessary materials (including transportation to the **Site**); plus

26.2.2 Necessary direct labor, including payroll taxes (subject to statutory wage caps) and supplemental benefits; plus

26.2.3 Sales and personal property taxes, if any, required to be paid on materials not incorporated into such **Extra Work**; plus

26.2.4 Reasonable rental value of **Contractor**-owned (or **Subcontractor**-owned, as applicable), necessary plant and equipment other than **Small Tools**, plus fuel/energy costs. Except for fuel costs for pick-up trucks which shall be reimbursed based on a consumption of five (5) gallons per shift, fuel costs shall be reimbursed based on actual costs or, in the absence of auditable documentation, the following fuel consumption formula per operating hour:  $(.035) \times (\text{HP rating}) \times (\text{Fuel cost/gallon})$ . Reasonable rental value is defined as the lower of either seventy-five percent of the monthly prorated rental rates established in "The AED Green Book, Rental Rates and Specifications for Construction Equipment" published by Equipment Watch (the "Green Book"), or seventy-five percent of the monthly prorated rental rates established in the "Rental Rate Blue Book for Construction Equipment" published by Equipment Watch (the "Blue Book") (the applicable Blue Book rate being for rental only without the addition of any operational costs listed in the Blue Book). The reasonable rental value is deemed to be inclusive of all operating costs except for fuel/energy consumption and equipment operator's wages/costs. For multiple shift utilization, reimbursement shall be calculated as follows: first shift shall be seventy-five (75%) percent of such rental rates; second shift shall be sixty (60%) percent of the first shift rate; and third shift shall be forty (40%) percent of the first shift rate. Equipment on standby shall be reimbursed at one-third (1/3) the prorated monthly rental rate. **Contractor**-owned (or **Subcontractor**-owned, as applicable) equipment includes equipment from rental companies affiliated with or controlled by the **Contractor** (or **Subcontractor**, as applicable), as determined by the **Commissioner**. In establishing cost reimbursement for non-operating **Contractor**-owned (or **Subcontractor**-owned, as applicable) equipment (scaffolding, sheeting systems, road plates, etc.), the **City** may restrict reimbursement to a purchase-salvage/life cycle basis if less than the computed rental costs; plus

26.2.5 Necessary installation and dismantling of such plant and equipment, including transportation to and from the **Site**, if any, provided that, in the case of non-**Contractor**-owned (or non-**Subcontractor**-owned, as applicable) equipment rented from a third party, the cost of installation and dismantling are not allowable if such costs are included in the rental rate; plus

26.2.6 Necessary fees charged by governmental entities; plus

26.2.7 Necessary construction-related service fees charged by non-governmental entities, such as landfill tipping fees; plus

26.2.8 Reasonable rental costs of non-**Contractor**-owned (or non-**Subcontractor**-owned, as applicable) necessary plant and equipment other than **Small Tools**, plus fuel/energy costs. Except for fuel costs for pick-up trucks which shall be reimbursed based on a consumption of five (5) gallons per shift, fuel costs shall be reimbursed based on actual costs or, in the absence of auditable documentation, the following fuel consumption formula per hour of operation:  $(.035) \times (\text{HP rating}) \times (\text{Fuel cost/gallon})$ . In lieu of renting, the **City** reserves the right to direct the purchase of non-operating equipment (scaffolding, sheeting systems, road plates, etc.), with payment on a purchase-salvage/life cycle basis, if less than the projected rental costs; plus

26.2.9 Workers' Compensation Insurance, and any insurance coverage expressly required by the **City** for the performance of the **Extra Work** which is different than the types of insurance required by Article 22 and Schedule A of the General Conditions. The cost of Workers' Compensation Insurance is subject to applicable payroll limitation caps and shall be based upon the carrier's Manual Rate for such insurance derived from the applicable class Loss Cost ("LC") and carrier's Lost Cost Multiplier ("LCM") approved by the New York State Department of Financial Services, and with the exception of experience rating, rate modifiers as promulgated by the New York Compensation Insurance Rating Board ("NYCIRB"); plus

26.2.10 Additional costs incurred as a result of the **Extra Work** for performance and payment bonds; plus

26.2.11 Twelve percent (12%) percent of the total of items in Articles 26.2.1 through 26.2.5 as compensation for overhead, except that no percentage for overhead will be allowed on **Payroll Taxes** or on the premium portion of overtime pay or on sales and personal property taxes. Overhead shall include without limitation, all costs and expenses in connection with administration, management superintendence, small tools, and insurance required by Schedule A of the General Conditions other than Workers' Compensation Insurance; plus

26.2.12 Ten (10%) percent of the total of items in Articles 26.2.1 through 26.2.5, plus the items in Article 26.2.11, as compensation for profit, except that no percentage for profit will be allowed on **Payroll Taxes** or on the premium portion of overtime pay or on sales and personal property taxes; plus

26.2.13 Five (5%) percent of the total of items in Articles 26.2.6 through 26.2.10 as compensation for overhead and profit.

26.3 Where the **Extra Work** is performed in whole or in part by other than the **Contractor's** own forces pursuant to Article 26.2, the **Contractor** shall be paid, subject to pre-audit by the **Engineering Audit Officer**, the cost of such **Work** computed in accordance with Article 26.2 above, plus an additional allowance of five (5%) percent to cover the **Contractor's** overhead and profit.

26.4 Where a change is ordered, involving both **Extra Work** and omitted or reduced **Contract Work**, the **Contract** price shall be adjusted, subject to pre-audit by the **EAO**, in an amount based on the difference between the cost of such **Extra Work** and of the omitted or reduced **Work**.

26.5 Where the **Contractor** and the **Commissioner** can agree upon a fixed price for **Extra Work** in accordance with Article 25.3.2 or another method of payment for **Extra Work** in accordance with

Article 25.3.4, or for **Extra Work** ordered in connection with omitted **Work**, such method, subject to pre-audit by the **EAO**, may, at the option of the **Commissioner**, be substituted for the cost plus a percentage method provided in Article 26.2; provided, however, that if the **Extra Work** is performed by a **Subcontractor**, the **Contractor** shall not be entitled to receive more than an additional allowance of five (5%) percent for overhead and profit over the cost of such **Subcontractor's Work** as computed in accordance with Article 26.2.

## ARTICLE 27. RESOLUTION OF DISPUTES

27.1 All disputes between the **City** and the **Contractor** of the kind delineated in this Article 27.1 that arise under, or by virtue of, this **Contract** shall be finally resolved in accordance with the provisions of this Article 27 and the **PPB Rules**. This procedure for resolving all disputes of the kind delineated herein shall be the exclusive means of resolving any such disputes.

27.1.1 This Article 27 shall not apply to disputes concerning matters dealt with in other sections of the **PPB Rules**, or to disputes involving patents, copyrights, trademarks, or trade secrets (as interpreted by the courts of New York State) relating to proprietary rights in computer software.

27.1.2 This Article 27 shall apply only to disputes about the scope of **Work** delineated by the **Contract**, the interpretation of **Contract** documents, the amount to be paid for **Extra Work** or disputed work performed in connection with the **Contract**, the conformity of the **Contractor's Work** to the **Contract**, and the acceptability and quality of the **Contractor's Work**; such disputes arise when the **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner** makes a determination with which the **Contractor** disagrees.

27.2 All determinations required by this Article 27 shall be made in writing clearly stated, with a reasoned explanation for the determination based on the information and evidence presented to the party making the determination. Failure to make such determination within the time required by this Article 27 shall be deemed a non-determination without prejudice that will allow application to the next level.

27.3 During such time as any dispute is being presented, heard, and considered pursuant to this Article 27, the **Contract** terms shall remain in force and the **Contractor** shall continue to perform **Work** as directed by the **ACCO** or the **Engineer**. Failure of the **Contractor** to continue **Work** as directed shall constitute a waiver by the **Contractor** of its claim.

### 27.4 Presentation of Disputes to **Commissioner**.

Notice of Dispute and Agency Response. The **Contractor** shall present its dispute in writing ("Notice of Dispute") to the **Commissioner** within thirty (30) Days of receiving written notice of the determination or action that is the subject of the dispute. This notice requirement shall not be read to replace any other notice requirements contained in the **Contract**. The Notice of Dispute shall include all the facts, evidence, documents, or other basis upon which the **Contractor** relies in support of its position, as well as a detailed computation demonstrating how any amount of money claimed by the **Contractor** in the dispute was arrived at. Within thirty (30) Days after receipt of the detailed written submission comprising the complete Notice of Dispute, the **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner** shall submit to the **Commissioner** all materials he or she deems pertinent to the dispute. Following initial submissions to the **Commissioner**, either party may demand of the other the production of any document or other material the demanding party believes may be relevant to the dispute. The requested party shall produce all relevant materials that are not otherwise

protected by a legal privilege recognized by the courts of New York State. Any question of relevancy shall be determined by the **Commissioner** whose decision shall be final. Willful failure of the **Contractor** to produce any requested material whose relevancy the **Contractor** has not disputed, or whose relevancy has been affirmatively determined, shall constitute a waiver by the **Contractor** of its claim.

27.4.1 **Commissioner Inquiry.** The **Commissioner** shall examine the material and may, in his or her discretion, convene an informal conference with the **Contractor**, the **ACCO**, and the **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner** to resolve the issue by mutual consent prior to reaching a determination. The **Commissioner** may seek such technical or other expertise as he or she shall deem appropriate, including the use of neutral mediators, and require any such additional material from either or both parties as he or she deems fit. The **Commissioner's** ability to render, and the effect of, a decision hereunder shall not be impaired by any negotiations in connection with the dispute presented, whether or not the **Commissioner** participated therein. The **Commissioner** may or, at the request of any party to the dispute, shall compel the participation of any **Other Contractor** with a contract related to the **Work** of this **Contract**, and that **Contractor** shall be bound by the decision of the **Commissioner**. Any **Other Contractor** thus brought into the dispute resolution proceeding shall have the same rights and obligations under this Article 27 as the **Contractor** initiating the dispute.

27.4.2 **Commissioner Determination.** Within thirty (30) **Days** after the receipt of all materials and information, or such longer time as may be agreed to by the parties, the **Commissioner** shall make his or her determination and shall deliver or send a copy of such determination to the **Contractor**, the **ACCO**, and **Engineer, Resident Engineer, Engineering Audit Officer**, or other designee of the **Commissioner**, as applicable, together with a statement concerning how the decision may be appealed.

27.4.3 **Finality of Commissioner's Decision.** The **Commissioner's** decision shall be final and binding on all parties, unless presented to the Contract Dispute Resolution Board pursuant to this Article 27. The **City** may not take a petition to the Contract Dispute Resolution Board. However, should the **Contractor** take such a petition, the **City** may seek, and the Contract Dispute Resolution Board may render, a determination less favorable to the **Contractor** and more favorable to the **City** than the decision of the **Commissioner**.

27.5 **Presentation of Dispute to the Comptroller.** Before any dispute may be brought by the **Contractor** to the Contract Dispute Resolution Board, the **Contractor** must first present its claim to the **Comptroller** for his or her review, investigation, and possible adjustment.

27.5.1 **Time, Form, and Content of Notice.** Within thirty (30) **Days** of its receipt of a decision by the **Commissioner**, the **Contractor** shall submit to the **Comptroller** and to the **Commissioner** a Notice of Claim regarding its dispute with the **Agency**. The Notice of Claim shall consist of (i) a brief written statement of the substance of the dispute, the amount of money, if any, claimed and the reason(s) the **Contractor** contends the dispute was wrongly decided by the **Commissioner**; (ii) a copy of the written decision of the **Commissioner**; and (iii) a copy of all materials submitted by the **Contractor** to the **Agency**, including the Notice of Dispute. The **Contractor** may not present to the **Comptroller** any material not presented to the **Commissioner**, except at the request of the **Comptroller**.

27.5.2 Response. Within thirty (30) **Days** of receipt of the Notice of Claim, the **Agency** shall make available to the **Comptroller** a copy of all material submitted by the **Agency** to the **Commissioner** in connection with the dispute. The **Agency** may not present to the **Comptroller** any material not presented to the **Commissioner** except at the request of the **Comptroller**.

27.5.3 **Comptroller** Investigation. The **Comptroller** may investigate the claim in dispute and, in the course of such investigation, may exercise all powers provided in Sections 7-201 and 7-203 of the Administrative Code. In addition, the **Comptroller** may demand of either party, and such party shall provide, whatever additional material the **Comptroller** deems pertinent to the claim, including original business records of the **Contractor**. Willful failure of the **Contractor** to produce within fifteen (15) **Days** any material requested by the **Comptroller** shall constitute a waiver by the **Contractor** of its claim. The **Comptroller** may also schedule an informal conference to be attended by the **Contractor**, **Agency** representatives, and any other personnel desired by the **Comptroller**.

27.5.4 Opportunity of **Comptroller** to Compromise or Adjust Claim. The **Comptroller** shall have forty-five (45) **Days** from his or her receipt of all materials referred to in Article 27.5.3 to investigate the disputed claim. The period for investigation and compromise may be further extended by agreement between the **Contractor** and the **Comptroller**, to a maximum of ninety (90) **Days** from the **Comptroller's** receipt of all materials. The **Contractor** may not present its petition to the Contract Dispute Resolution Board until the period for investigation and compromise delineated in this Article 27.5.4 has expired. In compromising or adjusting any claim hereunder, the **Comptroller** may not revise or disregard the terms of the **Contract** between the parties.

27.6 Contract Dispute Resolution Board. There shall be a Contract Dispute Resolution Board composed of:

27.6.1 The chief administrative law judge of the Office of Administrative Trials and Hearings (OATH) or his/her designated OATH administrative law judge, who shall act as chairperson, and may adopt operational procedures and issue such orders consistent with this Article 27 as may be necessary in the execution of the Contract Dispute Resolution Board's functions, including, but not limited to, granting extensions of time to present or respond to submissions;

27.6.2 The **CCPO** or his/her designee; any designee shall have the requisite background to consider and resolve the merits of the dispute and shall not have participated personally and substantially in the particular matter that is the subject of the dispute or report to anyone who so participated; and

27.6.3 A person with appropriate expertise who is not an employee of the **City**. This person shall be selected by the presiding administrative law judge from a prequalified panel of individuals, established and administered by OATH with appropriate background to act as decision-makers in a dispute. Such individual may not have a contract or dispute with the **City** or be an officer or employee of any company or organization that does, or regularly represents persons, companies, or organizations having disputes with the **City**.

27.7 Petition to the Contract Dispute Resolution Board. In the event the claim has not been settled or adjusted by the **Comptroller** within the period provided in this Article 27, the **Contractor**,

within thirty (30) **Days** thereafter, may petition the Contract Dispute Resolution Board to review the **Commissioner's** determination.

27.7.1 **Form and Content of Petition by Contractor.** The **Contractor** shall present its dispute to the Contract Dispute Resolution Board in the form of a petition, which shall include (i) a brief written statement of the substance of the dispute, the amount of money, if any, claimed, and the reason(s) the **Contractor** contends the dispute was wrongly decided by the **Commissioner**; (ii) a copy of the written Decision of the **Commissioner**, (iii) copies of all materials submitted by the **Contractor** to the Agency; (iv) a copy of the written decision of the **Comptroller**, if any, and (v) copies of all correspondence with, or written material submitted by the **Contractor**, to the **Comptroller**. The **Contractor** shall concurrently submit four (4) complete sets of the Petition: one set to the **City Corporation Counsel** (Attn: Commercial and Real Estate Litigation Division) and three (3) sets to the Contract Dispute Resolution Board at OATH's offices with proof of service on the **City Corporation Counsel**. In addition, the **Contractor** shall submit a copy of the written statement of the substance of the dispute, cited in (i) above, to both the **Commissioner** and the **Comptroller**.

27.7.2 **Agency Response.** Within thirty (30) **Days** of its receipt of the Petition by the **City Corporation Counsel**, the **Agency** shall respond to the brief written statement of the **Contractor** and make available to the Contract Dispute Resolution Board all material it submitted to the **Commissioner** and **Comptroller**. Three (3) complete copies of the **Agency** response shall be provided to the Contract Dispute Resolution Board and one to the **Contractor**. Extensions of time for submittal of the **Agency** response shall be given as necessary upon a showing of good cause or, upon consent of the parties, for an initial period of up to thirty (30) **Days**.

27.7.3 **Further Proceedings.** The Contract Dispute Resolution Board shall permit the **Contractor** to present its case by submission of memoranda, briefs, and oral argument. The Contract Dispute Resolution Board shall also permit the **Agency** to present its case in response to the **Contractor** by submission of memoranda, briefs, and oral argument. If requested by the **City Corporation Counsel**, the **Comptroller** shall provide reasonable assistance in the preparation of the **Agency's** case. Neither the **Contractor** nor the **Agency** may support its case with any documentation or other material that was not considered by the **Comptroller**, unless requested by the Contract Dispute Resolution Board. The Contract Dispute Resolution Board, in its discretion, may seek such technical or other expert advice as it shall deem appropriate and may seek, on its own or upon application of a party, any such additional material from any party as it deems fit. The Contract Dispute Resolution Board, in its discretion, may combine more than one dispute between the parties for concurrent resolution.

27.7.4 **Contract Dispute Resolution Board Determination.** Within forty-five (45) **Days** of the conclusion of all written submissions and oral arguments, the Contract Dispute Resolution Board shall render a written decision resolving the dispute. In an unusually complex case, the Contract Dispute Resolution Board may render its decision in a longer period, not to exceed ninety (90) **Days**, and shall so advise the parties at the commencement of this period. The Contract Dispute Resolution Board's decision must be consistent with the terms of the **Contract**. Decisions of the Contract Dispute Resolution Board shall only resolve matters before the Contract Dispute Resolution Board and shall not have precedential effect with respect to matters not before the Contract Dispute Resolution Board.

27.7.5 Notification of Contract Dispute Resolution Board Decision. The Contract Dispute Resolution Board shall send a copy of its decision to the **Contractor**, the **ACCO**, the Engineer, the **Comptroller**, the **City** Corporation Counsel, the **CCPO**, and the **PPB**. A decision in favor of the **Contractor** shall be subject to the prompt payment provisions of the **PPB** Rules. The Required Payment Date shall be thirty (30) Days after the date the parties are formally notified of the Contract Dispute Resolution Board's decision.

27.7.6 Finality of Contract Dispute Resolution Board Decision. The Contract Dispute Resolution Board's decision shall be final and binding on all parties. Any party may seek review of the Contract Dispute Resolution Board's decision solely in the form of a challenge, filed within four (4) months of the date of the Contract Dispute Resolution Board's decision, in a court of competent jurisdiction of the State of New York, County of New York pursuant to Article 78 of the Civil Practice Law and Rules. Such review by the court shall be limited to the question of whether or not the Contract Dispute Resolution Board's decision was made in violation of lawful procedure, was affected by an error of **Law**, or was arbitrary and capricious or an abuse of discretion. No evidence or information shall be introduced or relied upon in such proceeding that was not presented to the Contract Dispute Resolution Board in accordance with this Article 27.

27.8 Any termination, cancellation, or alleged breach of the **Contract** prior to or during the pendency of any proceedings pursuant to this Article 27 shall not affect or impair the ability of the **Commissioner** or Contract Dispute Resolution Board to make a binding and final decision pursuant to this Article 27.

## **ARTICLE 28. RECORD KEEPING FOR EXTRA OR DISPUTED WORK OR WORK ON A TIME & MATERIALS BASIS**

28.1 While the **Contractor** or any of its **Subcontractors** is performing **Work** on a time and material basis or **Extra Work** on a time and material basis ordered by the **Commissioner** under Article 25, or where the **Contractor** believes that it or any of its **Subcontractors** is performing **Extra Work** but a final determination by **Agency** has not been made, or the **Contractor** or any of its **Subcontractors** is performing disputed **Work** (whether on or off the **Site**), or complying with a determination or order under protest in accordance with Articles 11, 27, and 30, in each such case the **Contractor** shall furnish the **Resident Engineer** daily with three (3) copies of written statements signed by the **Contractor's** representative at the **Site** showing:

28.1.1 The name, trade, and number of each worker employed on such **Work** or engaged in complying with such determination or order, the number of hours employed, and the character of the **Work** each is doing; and

28.1.2 The nature and quantity of any materials, plant and equipment furnished or used in connection with the performance of such **Work** or compliance with such determination or order, and from whom purchased or rented.

28.2 A copy of such statement will be countersigned by the **Resident Engineer**, noting thereon any items not agreed to or questioned, and will be returned to the **Contractor** within two (2) **Days** after submission.

28.3 The **Contractor** and its **Subcontractors**, when required by the **Commissioner**, or the **Comptroller**, shall also produce for inspection, at the office of the **Contractor** or **Subcontractor**, any and all of its books, bid documents, financial statements, vouchers, records, daily job diaries and reports,

and cancelled checks, and any other documents relating to showing the nature and quantity of the labor, materials, plant and equipment actually used in the performance of such **Work**, or in complying with such determination or order, and the amounts expended therefor, and shall permit the **Commissioner** and the **Comptroller** to make such extracts therefrom, or copies thereof, as they or either of them may desire.

28.4 In connection with the examination provided for herein, the **Commissioner**, upon demand therefor, will produce for inspection by the **Contractor** such records as the **Agency** may have with respect to such **Extra Work** or disputed **Work** performed under protest pursuant to order of the **Commissioner**, except those records and reports which may have been prepared for the purpose of determining the accuracy and validity of the **Contractor's** claim.

28.5 Failure to comply strictly with these requirements shall constitute a waiver of any claim for extra compensation or damages on account of the performance of such **Work** or compliance with such determination or order.

### **ARTICLE 29. OMITTED WORK**

29.1 If any **Contract Work** in a lump sum **Contract**, or if any part of a lump sum item in a unit price, lump sum, or percentage-bid **Contract** is omitted by the **Commissioner** pursuant to Article 33, the **Contract** price, subject to audit by the EAO, shall be reduced by a pro rata portion of the lump sum bid amount based upon the percent of **Work** omitted subject to Article 29.4. For the purpose of determining the pro rata portion of the lump sum bid amount, the bid breakdown submitted in accordance with Article 41 shall be considered, but shall not be the determining factor.

29.2 If the whole of a lump sum item or units of any other item is so omitted by the **Commissioner** in a unit price, lump sum, or percentage-bid **Contract**, then no payment will be made therefor except as provided in Article 29.4.

29.3 For units that have been ordered but are only partially completed, the unit price shall be reduced by a pro rata portion of the unit price bid based upon the percentage of **Work** omitted subject to Article 29.4.

29.4 In the event the **Contractor**, with respect to any omitted **Work**, has purchased any non-cancelable material and/or equipment that is not capable of use except in the performance of this **Contract** and has been specifically fabricated for the sole purpose of this **Contract**, but not yet incorporated into the **Work**, the **Contractor** shall be paid for such material and/or equipment in accordance with Article 64.2.1(b); provided, however, such payment is contingent upon the **Contractor's** delivery of such material and/or equipment in acceptable condition to a location designated by the **City**.

29.5 The **Contractor** agrees to make no claim for damages or for loss of overhead and profit with regard to any omitted **Work**.

### **ARTICLE 30. NOTICE AND DOCUMENTATION OF COSTS AND DAMAGES; PRODUCTION OF FINANCIAL RECORDS**

30.1 If the **Contractor** shall claim to be sustaining damages by reason of any act or omission of the **City** or its agents, it shall submit to the **Commissioner** within forty-five (45) **Days** from the time such damages are first incurred, and every thirty (30) **Days** thereafter to the extent additional damages are being incurred for the same condition, verified statements of the details and the amounts of such

damages, together with documentary evidence of such damages. The **Contractor** may submit any of the above statements within such additional time as may be granted by the **Commissioner** in writing upon written request therefor. Failure of the **Commissioner** to respond in writing to a written request for additional time within thirty (30) **Days** shall be deemed a denial of the request. On failure of the **Contractor** to strictly comply with the foregoing provisions, such claims shall be deemed waived and no right to recover on such claims shall exist. Damages that the **Contractor** may claim in any action or dispute resolution procedure arising under or by reason of this **Contract** shall not be different from or in excess of the statements and documentation made pursuant to this Article 30. This Article 30.1 does not apply to claims submitted to the **Commissioner** pursuant to Article 11 or to claims disputing a determination under Article 27.

30.2 In addition to the foregoing statements, the **Contractor** shall, upon notice from the **Commissioner**, produce for examination at the **Contractor's** office, by the **Engineer, Architect or Project Manager**, all of its books of account, bills, invoices, payrolls, subcontracts, time books, daily reports, bank deposit books, bank statements, check books, and cancelled checks, showing all of its acts and transactions in connection with or relating to or arising by reason of this **Contract**, and submit itself and persons in its employment, for examination under oath by any person designated by the **Commissioner** or **Comptroller** to investigate claims made or disputes against the **City** under this **Contract**. At such examination, a duly authorized representative of the **Contractor** may be present.

30.3 In addition to the statements required under Article 28 and this Article 30, the **Contractor** and/or its **Subcontractor** shall, within thirty (30) **Days** upon notice from the **Commissioner** or **Comptroller**, produce for examination at the **Contractor's** and/or **Subcontractor's** office, by a representative of either the **Commissioner** or **Comptroller**, all of its books of account, bid documents, financial statements, accountant workpapers, bills, invoices, payrolls, subcontracts, time books, daily reports, bank deposit books, bank statements, check books, and cancelled checks, showing all of its acts and transactions in connection with or relating to or arising by reason of this **Contract**. Further, the **Contractor** and/or its **Subcontractor** shall submit any person in its employment, for examination under oath by any person designated by the **Commissioner** or **Comptroller** to investigate claims made or disputes against the **City** under this **Contract**. At such examination, a duly authorized representative of the **Contractor** may be present.

30.4 Unless the information and examination required under Article 30.3 is provided by the **Contractor** and/or its **Subcontractor** upon thirty (30) **Days'** notice from the **Commissioner** or **Comptroller**, or upon the **Commissioner's** or **Comptroller's** written authorization to extend the time to comply, the **City** shall be released from all claims arising under, relating to or by reason of this **Contract**, except for sums certified by the **Commissioner** to be due under the provisions of this **Contract**. It is further stipulated and agreed that no person has the power to waive any of the foregoing provisions and that in any action or dispute resolution procedure against the **City** to recover any sum in excess of the sums certified by the **Commissioner** to be due under or by reason of this **Contract**, the **Contractor** must allege in its complaint and prove, at trial or during such dispute resolution procedure, compliance with the provisions of this Article 30.

30.5 In addition, after the commencement of any action or dispute resolution procedure by the **Contractor** arising under or by reason of this **Contract**, the **City** shall have the right to require the **Contractor** to produce for examination under oath, up until the trial of the action or hearing before the Contract Dispute Resolution Board, the books and documents described in Article 30.3 and submit itself and all persons in its employ for examination under oath. If this Article 30 is not complied with as required, then the **Contractor** hereby consents to the dismissal of the action or dispute resolution procedure.

**CHAPTER VII: POWERS OF THE RESIDENT ENGINEER, THE ENGINEER OR ARCHITECT AND THE COMMISSIONER**

**ARTICLE 31. THE RESIDENT ENGINEER**

31.1 The **Resident Engineer** shall have the power to inspect, supervise, and control the performance of the **Work**, subject to review by the **Commissioner**. The **Resident Engineer** shall not, however, have the power to issue an **Extra Work** order, except as specifically designated in writing by the **Commissioner**.

**ARTICLE 32. THE ENGINEER OR ARCHITECT OR PROJECT MANAGER**

32.1 The **Engineer** or **Architect** or **Project Manager**, in addition to those matters elsewhere herein delegated to the **Engineer** and expressly made subject to his/her determination, direction or approval, shall have the power, subject to review by the **Commissioner**:

32.1.1 To determine the amount, quality, and location of the **Work** to be paid for hereunder; and

32.1.2 To determine all questions in relation to the **Work**, to interpret the **Contract Drawings, Specifications, and Addenda**, and to resolve all patent inconsistencies or ambiguities therein; and

32.1.3 To determine how the **Work** of this **Contract** shall be coordinated with **Work** of **Other Contractors** engaged simultaneously on this **Project**, including the power to suspend any part of the **Work**, but not the whole thereof; and

32.1.4 To make minor changes in the **Work** as he/she deems necessary, provided such changes do not result in a net change in the cost to the **City** or to the **Contractor** of the **Work** to be done under the **Contract**; and

32.1.5 To amplify the **Contract Drawings**, add explanatory information and furnish additional **Specifications** and drawings, consistent with this **Contract**.

32.2 The foregoing enumeration shall not imply any limitation upon the power of the **Engineer** or **Architect** or **Project Manager**, for it is the intent of this **Contract** that all of the **Work** shall generally be subject to his/her determination, direction, and approval, except where the determination, direction or approval of someone other than the **Engineer** or **Architect** or **Project Manager** is expressly called for herein.

32.3 The **Engineer** or **Architect** or **Project Manager** shall not, however, have the power to issue an **Extra Work** order, except as specifically designated in writing by the **Commissioner**.

**ARTICLE 33. THE COMMISSIONER**

33.1 The **Commissioner**, in addition to those matters elsewhere herein expressly made subject to his/her determination, direction or approval, shall have the power:

33.1.1 To review and make determinations on any and all questions in relation to this **Contract** and its performance; and

33.1.2 To modify or change this **Contract** so as to require the performance of **Extra Work** (subject, however, to the limitations specified in Article 25) or the omission of **Contract Work**; and

33.1.3 To suspend the whole or any part of the **Work** whenever in his/her judgment such suspension is required:

33.1.3(a) In the interest of the **City** generally; or

33.1.3(b) To coordinate the **Work** of the various contractors engaged on this **Project** pursuant to the provisions of Article 12; or

33.1.3(c) To expedite the completion of the entire **Project** even though the completion of this particular **Contract** may thereby be delayed.

#### **ARTICLE 34. NO ESTOPPEL**

34.1 Neither the **City** nor any **Agency**, official, agent or employee thereof, shall be bound, precluded or estopped by any determination, decision, approval, order, letter, payment or certificate made or given under or in connection with this **Contract** by the **City**, the **Commissioner**, the **Engineer**, the **Resident Engineer**, or any other official, agent or employee of the **City**, either before or after the final completion and acceptance of the **Work** and payment therefor:

34.1.1 From showing the true and correct classification, amount, quality or character of the **Work** actually done; or that any such determination, decision, order, letter, payment or certificate was untrue, incorrect or improperly made in any particular, or that the **Work**, or any part thereof, does not in fact conform to the requirements of this **Contract**; and

34.1.2 From demanding and recovering from the **Contractor** any overpayment made to it, or such damages as the **City** may sustain by reason of the **Contractor's** failure to perform each and every part of its **Contract**.

### **CHAPTER VIII: LABOR PROVISIONS**

#### **ARTICLE 35. EMPLOYEES**

35.1 The **Contractor** and its **Subcontractors** shall not employ on the **Work**:

35.1.1 Anyone who is not competent, faithful and skilled in the **Work** for which he/she shall be employed; and whenever the **Commissioner** shall inform the **Contractor**, in writing, that any employee is, in his/her opinion, incompetent, unfaithful or disobedient, that employee shall be discharged from the **Work** forthwith, and shall not again be employed upon it; or

35.1.2 Any labor, materials or means whose employment, or utilization during the course of this **Contract**, may tend to or in any way cause or result in strikes, work stoppages, delays, suspension of **Work** or similar troubles by workers employed by the **Contractor** or its **Subcontractors**, or by any of the trades working in or about the buildings and premises where **Work** is being performed under this **Contract**, or by **Other Contractors** or their **Subcontractors** pursuant to other contracts, or on any other building or premises owned or operated by the **City**, its **Agencies**, departments, boards or authorities. Any violation by the **Contractor** of this requirement may, upon certification of the **Commissioner**, be considered as proper and sufficient cause for declaring the **Contractor** to be in default, and for the **City** to take action against it as set forth in Chapter X of this **Contract**, or such other article of this **Contract** as the Commissioner may deem proper; or

35.1.3 In accordance with Section 220.3-e of the Labor Law of the State of New York (hereinafter "Labor Law"), the **Contractor** and its **Subcontractors** shall not employ on the **Work** any apprentice, unless he/she is a registered individual, under a bona fide program registered with the New York State Department of Labor. The allowable ratio of apprentices to journey-level workers in any craft classification shall not be greater than the ratio permitted to the **Contractor** as to its work force on any job under the registered program. Any employee listed on a payroll at an apprentice wage rate, who is not registered as above, shall be paid the wage rate determined by the **Comptroller** of the **City** for the classification of **Work** actually performed. The **Contractor** or **Subcontractor** will be required to furnish written evidence of the registration of its program and apprentices as well as all the appropriate ratios and wage rates, for the area of the construction prior to using any apprentices on the **Contract Work**.

35.2 If the total cost of the **Work** under this **Contract** is at least two hundred fifty thousand (\$250,000) dollars, all laborers, workers, and mechanics employed in the performance of the **Contract** on the public work site, either by the **Contractor**, **Subcontractor** or other person doing or contracting to do the whole or a part of the **Work** contemplated by the **Contract**, shall be certified prior to performing any **Work** as having successfully completed a course in construction safety and health approved by the United States Department of Labor's Occupational Safety and Health Administration that is at least ten (10) hours in duration.

35.3 In accordance with Local Law Nos. 30-2012 and 33-2012, codified at sections 6-132 and 12-113 of the Administrative Code, respectively,

35.3.1 The **Contractor** shall not take an adverse personnel action with respect to an officer or employee in retaliation for such officer or employee making a report of information concerning conduct which such officer or employee knows or reasonably believes to involve corruption, criminal activity, conflict of interest, gross mismanagement or abuse of authority by any officer or employee relating to this **Contract** to (a) the Commissioner of the Department of Investigation, (b) a member of the New York City Council, the Public Advocate, or the **Comptroller**, or (c) the **CCPO**, **ACCO**, **Agency** head, or **Commissioner**.

35.3.2 If any of the **Contractor**'s officers or employees believes that he or she has been the subject of an adverse personnel action in violation of Article 35.3.1, he or she shall be entitled to bring a cause of action against the **Contractor** to recover all relief necessary to make him or her whole. Such relief may include but is not limited to: (a) an injunction to restrain continued retaliation, (b) reinstatement to the position such employee would have had but for the retaliation or to an equivalent position, (c) reinstatement of full fringe benefits and seniority rights, (d) payment of two times back

pay, plus interest, and (e) compensation for any special damages sustained as a result of the retaliation, including litigation costs and reasonable attorney's fees.

35.3.3 The **Contractor** shall post a notice provided by the **City** in a prominent and accessible place on any site where work pursuant to the **Contract** is performed that contains information about:

35.3.3(a) how its employees can report to the New York City Department of Investigation allegations of fraud, false claims, criminality or corruption arising out of or in connection with the **Contract**; and

35.3.3(b) the rights and remedies afforded to its employees under Administrative Code sections 7-805 (the New York City False Claims Act) and 12-113 (the Whistleblower Protection Expansion Act) for lawful acts taken in connection with the reporting of allegations of fraud, false claims, criminality or corruption in connection with the **Contract**.

35.3.4 For the purposes of this Article 35.3, "adverse personnel action" includes dismissal, demotion, suspension, disciplinary action, negative performance evaluation, any action resulting in loss of staff, office space, equipment or other benefit, failure to appoint, failure to promote, or any transfer or assignment or failure to transfer or assign against the wishes of the affected officer or employee.

35.3.5 This Article 35.3 is applicable to all of the **Contractor's Subcontractors** having subcontracts with a value in excess of \$100,000; accordingly, the **Contractor** shall include this rider in all subcontracts with a value a value in excess of \$100,000.

35.4 Article 35.3 is not applicable to this **Contract** if it is valued at \$100,000 or less. Articles 35.3.1, 35.3.2, 35.3.4, and 35.3.5 are not applicable to this **Contract** if it was solicited pursuant to a finding of an emergency.

## 35.5 Paid Sick Leave Law.

### 35.5.1 Introduction and General Provisions.

35.5.1(a) The Earned Sick Time Act, also known as the Paid Sick Leave Law ("PSLL"), requires covered employees who annually perform more than 80 hours of work in New York City to be provided with paid sick time.<sup>2</sup> Contractors of the **City** or of other governmental entities may be required to provide sick time pursuant to the PSLL.

35.5.1(b) The PSLL became effective on April 1, 2014, and is codified at Title 20, Chapter 8, of the New York City Administrative Code. It is administered by the City's Department of Consumer Affairs ("DCA"); DCA's rules promulgated under the PSLL are codified at Chapter 7 of Title 6 of the Rules of the City of New York ("Rules").

<sup>2</sup> Pursuant to the PSLL, if fewer than five employees work for the same employer, as determined pursuant to New York City Administrative Code § 20-912(g), such employer has the option of providing such employees uncompensated sick time.

35.5.1(c) The **Contractor** agrees to comply in all respects with the PSLL and the Rules, and as amended, if applicable, in the performance of this **Contract**. The **Contractor** further acknowledges that such compliance is a material term of this **Contract** and that failure to comply with the PSLL in performance of this **Contract** may result in its termination.

35.5.1(d) The **Contractor** must notify the **Agency Chief Contracting Officer** of the **Agency** with whom it is contracting in writing within ten (10) days of receipt of a complaint (whether oral or written) regarding the PSLL involving the performance of this **Contract**. Additionally, the **Contractor** must cooperate with DCA's education efforts and must comply with DCA's subpoenas and other document demands as set forth in the PSLL and Rules.

35.5.1(e) The PSLL is summarized below for the convenience of the **Contractor**. The **Contractor** is advised to review the PSLL and Rules in their entirety. On the website [www.nyc.gov/PaidSickLeave](http://www.nyc.gov/PaidSickLeave) there are links to the PSLL and the associated Rules as well as additional resources for employers, such as Frequently Asked Questions, timekeeping tools and model forms, and an event calendar of upcoming presentations and webinars at which the **Contractor** can get more information about how to comply with the PSLL. The **Contractor** acknowledges that it is responsible for compliance with the PSLL notwithstanding any inconsistent language contained herein.

#### 35.5.2 Pursuant to the PSLL and the Rules: Applicability, Accrual, and Use.

35.5.2(a) An employee who works within the City of New York for more than eighty hours in any consecutive 12-month period designated by the employer as its "calendar year" pursuant to the PSLL ("Year") must be provided sick time. Employers must provide a minimum of one hour of sick time for every 30 hours worked by an employee and compensation for such sick time must be provided at the greater of the employee's regular hourly rate or the minimum wage. Employers are not required to provide more than 40 hours of sick time to an employee in any Year.

35.5.2(b) An employee has the right to determine how much sick time he or she will use, provided that employers may set a reasonable minimum increment for the use of sick time not to exceed four hours per **Day**. In addition, an employee may carry over up to 40 hours of unused sick time to the following Year, provided that no employer is required to allow the use of more than forty hours of sick time in a Year or carry over unused paid sick time if the employee is paid for such unused sick time and the employer provides the employee with at least the legally required amount of paid sick time for such employee for the immediately subsequent Year on the first **Day** of such Year.

35.5.2(c) An employee entitled to sick time pursuant to the PSLL may use sick time for any of the following:

- i. such employee's mental illness, physical illness, injury, or health condition or the care of such illness, injury, or condition or such employee's need for medical diagnosis or preventive medical care;
- ii. such employee's care of a family member (an employee's child, spouse, domestic partner, parent, sibling, grandchild or grandparent, or the child or parent of an employee's spouse or domestic partner) who has a mental

- illness, physical illness, injury or health condition or who has a need for medical diagnosis or preventive medical care;
- iii. closure of such employee's place of business by order of a public official due to a public health emergency; or
- iv. such employee's need to care for a child whose school or childcare provider has been closed due to a public health emergency.

35.5.2(d) An employer must not require an employee, as a condition of taking sick time, to search for a replacement. However, an employer may require an employee to provide: reasonable notice of the need to use sick time; reasonable documentation that the use of sick time was needed for a reason above if for an absence of more than three consecutive work days; and/or written confirmation that an employee used sick time pursuant to the PSL. However, an employer may not require documentation specifying the nature of a medical condition or otherwise require disclosure of the details of a medical condition as a condition of providing sick time and health information obtained solely due to an employee's use of sick time pursuant to the PSL must be treated by the employer as confidential.

35.5.2(e) If an employer chooses to impose any permissible discretionary requirement as a condition of using sick time, it must provide to all employees a written policy containing those requirements, using a delivery method that reasonably ensures that employees receive the policy. If such employer has not provided its written policy, it may not deny sick time to an employee because of non-compliance with such a policy.

35.5.2(f) Sick time to which an employee is entitled must be paid no later than the payday for the next regular payroll period beginning after the sick time was used.

35.5.3 Exemptions and Exceptions. Notwithstanding the above, the PSL does not apply to any of the following:

35.5.3(a) an independent contractor who does not meet the definition of employee under section 190(2) of the New York State Labor Law;

35.5.3(b) an employee covered by a valid collective bargaining agreement in effect on April 1, 2014, until the termination of such agreement;

35.5.3(c) an employee in the construction or grocery industry covered by a valid collective bargaining agreement if the provisions of the PSL are expressly waived in such collective bargaining agreement;

35.5.3(d) an employee covered by another valid collective bargaining agreement if such provisions are expressly waived in such agreement and such agreement provides a benefit comparable to that provided by the PSL for such employee;

35.5.3(e) an audiologist, occupational therapist, physical therapist, or speech language pathologist who is licensed by the New York State Department of Education and who calls in for work assignments at will, determines his or her own schedule, has the ability to reject or accept any assignment referred to him or her, and is paid an average hourly wage that is at least four times the federal minimum wage;

35.5.3(f) an employee in a work study program under Section 2753 of Chapter 42 of the United States Code;

35.5.3(g) an employee whose work is compensated by a qualified scholarship program as that term is defined in the Internal Revenue Code, Section 117 of Chapter 20 of the United States Code; or

35.5.3(h) a participant in a Work Experience Program (WEP) under section 336-c of the New York State Social Services Law.

35.5.4 Retaliation Prohibited. An employer may not threaten or engage in retaliation against an employee for exercising or attempting in good faith to exercise any right provided by the PSLL. In addition, an employer may not interfere with any investigation, proceeding, or hearing pursuant to the PSLL.

35.5.5 Notice of Rights.

35.5.5(a) An employer must provide its employees with written notice of their rights pursuant to the PSLL. Such notice must be in English and the primary language spoken by an employee, provided that DCA has made available a translation into such language. Downloadable notices are available on DCA's website at <http://www.nyc.gov/html/dca/html/law/PaidSickLeave.shtml>.

35.5.5(b) Any person or entity that willfully violates these notice requirements is subject to a civil penalty in an amount not to exceed fifty dollars for each employee who was not given appropriate notice.

35.5.6 Records. An employer must retain records documenting its compliance with the PSLL for a period of at least three years, and must allow DCA to access such records in furtherance of an investigation related to an alleged violation of the PSLL.

35.5.7 Enforcement and Penalties.

35.5.7(a) Upon receiving a complaint alleging a violation of the PSLL, DCA has the right to investigate such complaint and attempt to resolve it through mediation. Within **30 Days** of written notification of a complaint by DCA, or sooner in certain circumstances, the employer must provide DCA with a written response and such other information as DCA may request. If DCA believes that a violation of the PSLL has occurred, it has the right to issue a notice of violation to the employer.

35.5.7(b) DCA has the power to grant an employee or former employee all appropriate relief as set forth in New York City Administrative Code § 20-924(d). Such relief may include, among other remedies, treble damages for the wages that should have been paid, damages for unlawful retaliation, and damages and reinstatement for unlawful discharge. In addition, DCA may impose on an employer found to have violated the PSLL civil penalties not to exceed \$500 for a first violation, \$750 for a second violation within two years of the first violation, and \$1,000 for each succeeding violation within two years of the previous violation.

35.5.8 More Generous Policies and Other Legal Requirements. Nothing in the PSLL is intended to discourage, prohibit, diminish, or impair the adoption or retention of a more generous sick time policy, or the obligation of an employer to comply with any contract,

collective bargaining agreement, employment benefit plan or other agreement providing more generous sick time. The PSLL provides minimum requirements pertaining to sick time and does not preempt, limit or otherwise affect the applicability of any other law, regulation, rule, requirement, policy or standard that provides for greater accrual or use by employees of sick leave or time, whether paid or unpaid, or that extends other protections to employees. The PSLL may not be construed as creating or imposing any requirement in conflict with any federal or state law, rule or regulation.

35.6 HireNYC: Hiring and Reporting Requirements. This Article 35.6 applies to construction contracts of \$1,000,000 or more. The **Contractor** shall comply with the requirements of Articles 35.6.1-35.6.5 for all non-trades jobs (e.g., for an administrative position arising out of **Work** ant located in New York City). The **Contractor** shall reasonably cooperate with SBS and the **City** on specific outreach events, including “Hire-on-the-Spot” events, for the hiring of trades workers in connection with the **Work**. If provided elsewhere in this **Contract**, this **Contract** is subject to a project labor agreement.

35.6.1 Enrollment. The **Contractor** shall enroll with the HireNYC system, found at [www.nyc.gov/sbs](http://www.nyc.gov/sbs), within thirty (30) days after the registration of this **Contract** pursuant to Section 328 of the New York City Charter. The **Contractor** shall provide information about the business, designate a primary contact and say whether it intends to hire for any entry to mid-level job opportunities arising from this **Contract** and located in New York City, and, if so, the approximate start date of the first hire.

35.6.2 Job Posting Requirements.

35.6.2(a) Once enrolled in HireNYC, the **Contractor** agrees to update the HireNYC portal with all entry to mid-level job opportunities arising from this **Contract** and located in New York City, if any, which shall be defined as jobs requiring no more than an associate degree, as provided by the New York State Department of Labor (see Column F of <https://labor.ny.gov/stats/2012-2022-NYS-Employment-Prospects.xls>). The information to be updated includes the types of entry and mid-level positions made available from the work arising from the **Contract** and located in New York City, the number of positions, the anticipated schedule of initiating the hiring process for these positions, and the contact information for the **Contractor’s** representative charged with overseeing hiring. The **Contractor** must update the HireNYC portal with any hiring needs arising from the contract and located in New York City, and the requirements of the jobs to be filled, no less than three weeks prior to the intended first day of employment for each new position, except with the permission of SBS, not to be unreasonably withheld, and must also update the HireNYC portal as set forth below.

35.6.2(b) After enrollment through HireNYC and submission of relevant information, SBS will work with the **Contractor** to develop a recruitment plan which will outline the candidate screening process, and will provide clear instructions as to when, where, and how interviews will take place. HireNYC will screen applicants based on employer requirements and refer applicants whom it believes are qualified to the **Contractor** for interviews. The **Contractor** must interview referred applicants whom it believes are qualified.

35.6.2(c) After completing an interview of a candidate referred by HireNYC, the **Contractor** must provide feedback via the portal within twenty (20) business days to indicate which candidates were interviewed and hired, if any. In addition, the **Contractor** shall provide the start date of new hires, and additional information

reasonably related to such hires, within twenty (20) business days after the start date. In the event the **Contractor** does not have any job openings covered by this Rider in any given year, the **Contractor** shall be required to provide an annual update to HireNYC to that effect. For this purpose, the reporting year shall run from the date of the registration of the **Contract** pursuant to Charter section 328 and each anniversary date.

35.6.2(d) These requirements do not limit the **Contractor's** ability to assess the qualifications of prospective workers, and to make final hiring and retention decisions. No provision of this Article 35.6 shall be interpreted so as to require the **Contractor** to employ any particular worker.

35.6.2(e) In addition, the provisions of this Article 35.6 shall not apply to positions that the **Contractor** intends to fill with employees employed pursuant to the job retention provision of Section 22-505 of the Administrative Code of the City of New York. The **Contractor** shall not be required to report such openings with HireNYC. However, the **Contractor** shall enroll with the HireNYC system pursuant to Article 35.6.1, above, and, if such positions subsequently become open, then the remaining provisions of this Article 35.6 will apply.

35.6.3 Breach and Liquidated Damages. If the **Contractor** fails to comply with the terms of the **Contract** and this Article 35.6 (1) by not enrolling its business with HireNYC; (2) by not informing HireNYC, as required, of open positions; or (3) by failing to interview a qualified candidate, the **Agency** may assess liquidated damages in the amount of two-thousand five hundred dollars (\$2,500) per breach. For all other events of noncompliance with the terms of this Article 35.6, the **Agency** may assess liquidated damages in the amount of five hundred dollars (\$500) per breach. Furthermore, in the event the **Contractor** breaches the requirements of this Article 35.6 during the term of the **Contract**, the **City** may hold the **Contractor** in default of this **Contract**.

35.6.4 Audit Compliance. In addition to the auditing requirements set forth in other parts of the **Contract**, the **Contractor** shall permit SBS and the **City** to inspect any and all records concerning or relating to job openings or the hiring of individuals for work arising from the **Contract** and located in New York City. The **Contractor** shall permit an inspection within seven (7) business days of the request.

35.6.5 Other Reporting Requirements. The **Contractor** shall report to the **City**, on a monthly basis, all information reasonably requested by the **City** that is necessary for the **City** to comply with any reporting requirements imposed by **Law**, including any requirement that the **City** maintain a publicly accessible database. In addition, the **Contractor** agrees to comply with all reporting requirements imposed by **Law**, or as otherwise requested by the **City**.

35.6.6 Federal Hiring Requirements. If this **Contract** is federally funded (as indicated elsewhere in this **Contract**), the **Contractor** shall comply with all federal hiring requirements as may be set forth in this **Contract**, including, as applicable: (a) Section 3 of the HUD Act of 1968, which requires, to the greatest extent feasible, economic opportunities for 30 percent of new hires be given to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing and Executive Order 11246, which prohibits discrimination in employment due to race, color, religion, sex or national origin, and requires the implementation of goals for minority and female participation for work involving any construction trade.

## ARTICLE 36. NO DISCRIMINATION

36.1 The **Contractor** specifically agrees, as required by Labor Law Section 220-e, as amended, that:

36.1.1 In the hiring of employees for the performance of **Work** under this **Contract** or any subcontract hereunder, neither the **Contractor**, **Subcontractor**, nor any person acting on behalf of such **Contractor** or **Subcontractor**, shall by reason of race, creed, color or national origin discriminate against any citizen of the State of New York who is qualified and available to perform the **Work** to which the employment relates;

36.1.2 Neither the **Contractor**, **Subcontractor**, nor any person on its behalf shall, in any manner, discriminate against or intimidate any employee hired for the performance of **Work** under this **Contract** on account of race, creed, color or national origin;

36.1.3 There may be deducted from the amount payable to the **Contractor** by the **City** under this **Contract** a penalty of fifty (\$50.00) dollars for each person for each **Day** during which such person was discriminated against or intimidated in violation of the provisions of this **Contract**; and

36.1.4 This **Contract** may be cancelled or terminated by the **City** and all moneys due or to become due hereunder may be forfeited, for a second or any subsequent violation of the terms or conditions of this Article 36.

36.1.5 This Article 36 covers all construction, alteration and repair of any public building or public work occurring in the State of New York and the manufacture, sale, and distribution of materials, equipment, and supplies to the extent that such operations are performed within the State of New York pursuant to this **Contract**.

36.2 The **Contractor** specifically agrees, as required by Section 6-108 of the Administrative Code, as amended, that:

36.2.1 It shall be unlawful for any person engaged in the construction, alteration or repair of buildings or engaged in the construction or repair of streets or highways pursuant to a **Contract** with the **City** or engaged in the manufacture, sale or distribution of materials, equipment or supplies pursuant to a **Contract** with the **City** to refuse to employ or to refuse to continue in any employment any person on account of the race, color or creed of such person.

36.2.2 It shall be unlawful for any person or any servant, agent or employee of any person, described in Article 36.1.2, to ask, indicate or transmit, orally or in writing, directly or indirectly, the race, color or creed or religious affiliation of any person employed or seeking employment from such person, firm or corporation.

36.2.3 Breach of the foregoing provisions shall be deemed a violation of a material provision of this **Contract**.

36.2.4 Any person, or the employee, manager or owner of or officer of such firm or corporation who shall violate any of the provisions of this Article 36.2 shall, upon

conviction thereof, be punished by a fine of not more than one hundred (\$100.00) dollars or by imprisonment for not more than thirty (30) **Days**, or both.

36.3 This **Contract** is subject to the requirements of Executive Order No. 50 (1980) (“E.O. 50”), as revised, and the rules and regulations promulgated thereunder. No contract will be awarded unless and until these requirements have been complied with in their entirety. By signing this **Contract**, the **Contractor** agrees that it:

36.3.1 Will not engage in any unlawful discrimination against any employee or applicant for employment because of race, creed, color, national origin, sex, age, disability, marital status or sexual orientation with respect to all employment decisions including, but not limited to, recruitment, hiring, upgrading, demotion, downgrading, transfer, training, rates of pay or other forms of compensation, layoff, termination, and all other terms and conditions of employment; and

36.3.2 Will not engage in any unlawful discrimination in the selection of **Subcontractors** on the basis of the owner’s race, color, creed, national origin, sex, age, disability, marital status or sexual orientation; and

36.3.3 Will state in all solicitations or advertisements for employees placed by or on behalf of the **Contractor** that all qualified applicants will receive consideration for employment without unlawful discrimination based on race, creed, color, national origin, sex, age, citizens status, disability, marital status, sexual orientation, or that it is an equal employment opportunity employer; and

36.3.4 Will send to each labor organization or representative of workers with which it has a collective bargaining agreement or other contract or memorandum of understanding, written notification of its equal employment opportunity commitments under E.O. 50 and the rules and regulations promulgated thereunder; and

36.3.5 Will furnish, before the award of the **Contract**, all information and reports, including an employment report, that are required by E.O. 50, the rules and regulations promulgated thereunder, and orders of the **City** Department of Business Services, Division of Labor Services (**DLS**) and will permit access to its books, records, and accounts by the **DLS** for the purposes of investigation to ascertain compliance with such rules, regulations, and orders.

36.4 The **Contractor** understands that in the event of its noncompliance with the nondiscrimination clauses of this **Contract** or with any of such rules, regulations, or orders, such noncompliance shall constitute a material breach of this **Contract** and noncompliance with E.O. 50 and the rules and regulations promulgated thereunder. After a hearing held pursuant to the rules of the **DLS**, the Director of the **DLS** may direct the **Commissioner** to impose any or all of the following sanctions:

36.4.1 Disapproval of the **Contractor**; and/or

36.4.2 Suspension or termination of the **Contract**; and/or

36.4.3 Declaring the **Contractor** in default; and/or

36.4.4 In lieu of any of the foregoing sanctions, the Director of the **DLS** may impose an employment program.

In addition to any actions taken under this **Contract**, failure to comply with E.O. 50 and the rules and regulations promulgated thereunder, in one or more instances, may result in a **City Agency** declaring the **Contractor** to be non-responsible in future procurements. The **Contractor** further agrees that it will refrain from entering into any **Contract** or **Contract** modification subject to E.O. 50 and the rules and regulations promulgated thereunder with a **Subcontractor** who is not in compliance with the requirements of E.O. 50 and the rules and regulations promulgated thereunder.

36.5 The **Contractor** specifically agrees, as required by Section 6-123 of the Administrative Code, that:

36.5.1 The **Contractor** will not engage in any unlawful discriminatory practice in violation of Title 8 of the Administrative Code; and

36.5.2 Any failure to comply with this Article 36.5 may subject the **Contractor** to the remedies set forth in Section 6-123 of the Administrative Code, including, where appropriate, sanctions such as withholding of payment, imposition of an employment program, finding the **Contractor** to be in default, cancellation of the **Contract**, or any other sanction or remedy provided by **Law** or **Contract**.

### **ARTICLE 37. LABOR LAW REQUIREMENTS**

37.1 The **Contractor** shall strictly comply with all applicable provisions of the Labor Law, as amended. Such compliance is a material term of this **Contract**.

37.2 The **Contractor** specifically agrees, as required by Labor Law Sections 220 and 220-d, as amended, that:

37.2.1 Hours of **Work**: No laborer, worker, or mechanic in the employ of the **Contractor**, **Subcontractor** or other person doing or contracting to do the whole or a part of the **Work** contemplated by this **Contract** shall be permitted or required to work more than eight (8) hours in any one (1) **Day**, or more than five (5) **Days** in any one (1) week, except as provided in the Labor Law and in cases of extraordinary emergency including fire, flood, or danger to life or property, or in the case of national emergency when so proclaimed by the President of the United States of America.

37.2.2 In situations in which there are not sufficient laborers, workers, and mechanics who may be employed to carry on expeditiously the **Work** contemplated by this **Contract** as a result of such restrictions upon the number of hours and **Days** of labor, and the immediate commencement or prosecution or completion without undue delay of the **Work** is necessary for the preservation of the **Site** and/or for the protection of the life and limb of the persons using the same, such laborers, workers, and mechanics shall be permitted or required to work more than eight (8) hours in any one (1) **Day**; or five (5) **Days** in any one (1) week; provided, however, that upon application of any **Contractor**, the **Commissioner** shall have first certified to the Commissioner of Labor of the State of New York (hereinafter "Commissioner of Labor") that such public **Work** is of an important nature and that a delay in carrying it to completion would result in serious disadvantage to the public; and provided, further, that such Commissioner of Labor shall have determined that such an emergency does in fact exist as provided in Labor Law Section 220.2.

37.2.3 Failure of the **Commissioner** to make such a certification to the Commissioner of Labor shall not entitle the **Contractor** to damages for delay or for any cause whatsoever.

37.2.4 Prevailing Rate of Wages: The wages to be paid for a legal day's **Work** to laborers, workers, or mechanics employed upon the **Work** contemplated by this **Contract** or upon any materials to be used thereon shall not be less than the "prevailing rate of wage" as defined in Labor Law Section 220, and as fixed by the **Comptroller** in the attached Schedule of Wage Rates and in updated schedules thereof. The prevailing wage rates and supplemental benefits to be paid are those in effect at the time the **Work** is being performed.

37.2.5 Requests for interpretation or correction in the Information for Bidders includes all requests for clarification of the classification of trades to be employed in the performance of the **Work** under this **Contract**. In the event that a trade not listed in the **Contract** is in fact employed during the performance of this **Contract**, the **Contractor** shall be required to obtain from the **Agency** the prevailing wage rates and supplementary benefits for the trades used and to complete the performance of this **Contract** at the price at which the **Contract** was awarded.

37.2.6 Minimum Wages: Except for employees whose wage is required to be fixed pursuant to Labor Law Section 220, all persons employed by the **Contractor** and any **Subcontractor** in the manufacture or furnishing of the supplies, materials, or equipment, or the furnishing of work, labor, or services, used in the performance of this **Contract**, shall be paid, without subsequent deduction or rebate unless expressly authorized by **Law**, not less than the sum mandated by **Law**.

37.3 Working Conditions: No part of the **Work**, labor or services shall be performed or rendered by the **Contractor** in any plants, factories, buildings or surroundings or under working conditions which are unsanitary or hazardous or dangerous to the health and safety of employees engaged in the performance of this **Contract**. Compliance with the safety, sanitary, and factory inspection **Laws** of the state in which the **Work** is to be performed shall be prima facie evidence of compliance with this Article 37.3.

37.4 Prevailing Wage Enforcement: The **Contractor** agrees to pay for all costs incurred by the **City** in enforcing prevailing wage requirements, including the cost of any investigation conducted by or on behalf of the **Agency** or the **Comptroller**, where the **City** discovers a failure to comply with any of the requirements of this Article 37 by the **Contractor** or its **Subcontractor(s)**. The **Contractor** also agrees that, should it fail or refuse to pay for any such investigation, the **Agency** is hereby authorized to deduct from a **Contractor's** account an amount equal to the cost of such investigation.

37.4.1 The Labor Law Section 220 and Section 220-d, as amended, provide that this **Contract** shall be forfeited and no sum paid for any **Work** done hereunder on a second conviction for willfully paying less than:

37.4.1(a) The stipulated prevailing wage scale as provided in Labor Law section 220, as amended, or

37.4.1(b) The stipulated minimum hourly wage scale as provided in Labor Law section 220-d, as amended.

37.4.2 For any breach or violation of either working conditions (Article 37.3) or minimum wages (Article 37.2.6) provisions, the party responsible therefor shall be liable to the **City** for liquidated damages, which may be withheld from any amounts due on any contracts with the **City** of such party responsible, or may be recovered in actions brought by the **City**

Corporation Counsel in the name of the **City**, in addition to damages for any other breach of this **Contract**, for a sum equal to the amount of any underpayment of wages due to any employee engaged in the performance of this **Contract**. In addition, the **Commissioner** shall have the right to cancel contracts and enter into other contracts for the completion of the original contract, with or without public letting, and the original **Contractor** shall be liable for any additional cost. All sums withheld or recovered as deductions, rebates, refunds, or underpayment of wages hereunder, shall be held in a special deposit account and shall be paid without interest, on order of the **Comptroller**, directly to the employees who have been paid less than minimum rates of pay as set forth herein and on whose account such sums were withheld or recovered, provided that no claims by employees for such payments shall be entertained unless made within two (2) years from the date of actual notice to the **Contractor** of the withholding or recovery of such sums by the **City**.

37.4.3 A determination by the **Comptroller** that a **Contractor** and/or its **Subcontractor** willfully violated Labor Law Section 220 will be forwarded to the **City's** five District Attorneys for review.

37.4.4 The **Contractor's** or **Subcontractor's** noncompliance with this Article 37.4 and Labor Law Section 220 may result in an unsatisfactory performance evaluation and the **Comptroller** may also find and determine that the **Contractor** or **Subcontractor** willfully violated the New York Labor **Law**.

37.4.4(a) An unsatisfactory performance evaluation for noncompliance with this Article 37.4 may result in a determination that the **Contractor** is a non-responsible bidder on subsequent procurements with the **City** and thus a rejection of a future award of a contract with the **City**, as well as any other sanctions provided for by **Law**.

37.4.4(b) Labor Law Section 220-b, as amended, provides that when two (2) final determinations have been rendered against a **Contractor** or **Subcontractor** within any consecutive six (6) year period determining that such **Contractor** or **Subcontractor** has willfully failed to pay the prevailing rate of wages or to provide supplements in accordance with the Labor Law and this Article 37.4, whether such failures were concurrent or consecutive and whether or not such final determinations concerning separate public works projects are rendered simultaneously, such **Contractor** or **Subcontractor** shall be ineligible to submit a bid on or be awarded any public works contract with the **City** for a period of five (5) years from the second final determination. If the final determination involves the falsification of payroll records or the kickback of wages or supplements, the **Contractor** or **Subcontractor** shall be ineligible to submit a bid on or be awarded any public works contract with the **City** for a period of five (5) years from the first final determination.

37.4.4(c) Labor Law Section 220, as amended, provides that the **Contractor** or **Subcontractor** found to have violated this Article 37.4 may be directed to make payment of wages or supplements including interest found to be due, and the **Contractor** or **Subcontractor** may be directed to make payment of a further sum as a civil penalty in an amount not exceeding twenty-five (25%) percent of the total amount found to be due.

37.5 The **Contractor** and its **Subcontractors** shall within ten (10) **Days** after mailing of a Notice of Award or written order, post in prominent and conspicuous places in each and every plant, factory, building, and structure where employees of the **Contractor** and its **Subcontractors** engaged in the

performance of this **Contract** are employed, notices furnished by the **City**, in relation to prevailing wages and supplements, minimum wages, and other stipulations contained in Sections 220 and 220-h of the Labor Law, and the **Contractor** and its **Subcontractors** shall continue to keep such notices posted in such prominent and conspicuous places until **Final Acceptance** of the supplies, materials, equipment, or **Work**, labor, or services required to be furnished or rendered under this **Contract**.

37.6 The **Contractor** shall strictly comply with all of the provisions of Articles 37.6.1 through 37.6.5, and provide for all workers, laborers or mechanics in its employ, the following:

37.6.1 Notices Posted At **Site**: Post, in a location designated by the **City**, schedules of prevailing wages and supplements for this **Project**, a copy of all re-determinations of such schedules for the **Project**, the Workers' Compensation **Law** Section 51 notice, all other notices required by **Law** to be posted at the **Site**, the **City** notice that this **Project** is a public works project on which each worker is entitled to receive the prevailing wages and supplements for the occupation at which he or she is working, and all other notices which the **City** directs the **Contractor** to post. The **Contractor** shall provide a surface for such notices which is satisfactory to the **City**. The **Contractor** shall maintain and keep current such notices in a legible manner and shall replace any notice or schedule which is damaged, defaced, illegible or removed for any reason. The **Contractor** shall post such notices before commencing any **Work** on the **Site** and shall maintain such notices until all **Work** on the **Site** is complete; and

37.6.2 Daily **Site** Sign-in Sheets: Maintain daily **Site** sign-in sheets, and require that **Subcontractors** maintain daily **Site** sign-in sheets for its employees, which include blank spaces for an employee's name to be both printed and signed, job title, date started and Social Security number, the time the employee began work and the time the employee left work, until **Final Acceptance** of the supplies, materials, equipment, or **Work**, labor, or services to be furnished or rendered under this **Contract** unless exception is granted by the **Comptroller** upon application by the **Agency**. In the alternative, subject to the approval of the **CCPO**, the **Contractor** and **Subcontractor** may maintain an electronic or biometric sign-in system, which provides the information required by this Article 37.6.2; and

37.6.3 Individual Employee Information Notices: Distribute a notice to each worker, laborer or mechanic employed under this **Contract**, in a form provided by the **Agency**, that this **Project** is a public works project on which each worker, laborer or mechanic is entitled to receive the prevailing rate of wages and supplements for the occupation at which he or she is working. If the total cost of the **Work** under this **Contract** is at least two hundred fifty thousand (\$250,000) dollars, such notice shall also include a statement that each worker, laborer or mechanic must be certified prior to performing any **Work** as having successfully completed a course in construction safety and health approved by the United States Department of Labor's Occupational Safety and Health Administration that is at least ten (10) hours in duration. Such notice shall be distributed to each worker before he or she starts performing any **Work** of this **Contract** and with the first paycheck after July first of each year. "Worker, laborer or mechanic" includes employees of the **Contractor** and all **Subcontractors** and all employees of suppliers entering the **Site**. At the time of distribution, the **Contractor** shall have each worker, laborer or mechanic sign a statement, in a form provided by the **Agency**, certifying that the worker has received the notice required by this Article 37.6.3, which signed statement shall be maintained with the payroll records required by this **Contract**; and

37.6.3(a) The **Contractor** and each **Subcontractor** shall notify each worker, laborer or mechanic employed under this **Contract** in writing of the prevailing rate of

wages for their particular job classification. Such notification shall be given to every worker, laborer, and mechanic on their first pay stub and with every pay stub thereafter; and

37.6.4 **Site Laminated Identification Badges:** The **Contractor** shall provide laminated identification badges which include a photograph of the worker's, laborer's or mechanic's face and indicate the worker's, laborer's or mechanic's name, trade, employer's name, and employment starting date (month/day/year). Further, the **Contractor** shall require as a condition of employment on the **Site**, that each and every worker, laborer or mechanic wear the laminated identification badge at all times and that it may be seen by any representative of the **City**. The **Commissioner** may grant a written waiver from the requirement that the laminated identification badge include a photograph if the **Contractor** demonstrates that the identity of an individual wearing a laminated identification badge can be easily verified by another method; and

37.6.5 **Language Other Than English Used On Site:** Provide the **ACCO** notice when three (3) or more employees (worker and/or laborer and/or mechanic) on the **Site**, at any time, speak a language other than English. The **ACCO** will then provide the **Contractor** the notices described in Article 37.6.1 in that language or languages as may be required. The **Contractor** is responsible for all distributions under this Article 37; and

37.6.6 **Provision of Records:** The **Contractor** and **Subcontractor(s)** shall produce within five (5) **Days** on the **Site** of the **Work** and upon a written order of the **Engineer**, the **Commissioner**, the **ACCO**, the **Agency EAO**, or the **Comptroller**, such records as are required to be kept by this Article 37.6; and

37.6.7 The **Contractor** and **Subcontractor(s)** shall pay employees by check or direct deposit. If this **Contract** is for an amount greater than one million (\$1,000,000) dollars, checks issued by the **Contractor** to covered employees shall be generated by a payroll service or automated payroll system (an in-house system may be used if approved by the **Agency**). For any subcontract for an amount greater than seven hundred fifty thousand (\$750,000) dollars, checks issued by a **Subcontractor** to covered employees shall be generated by a payroll service or automated payroll system (an in-house system may be used if approved by the **Agency**); and

37.6.8 The failure of the **Contractor** or **Subcontractor(s)** to comply with the provisions of Articles 37.6.1 through 37.6.7 may result in the **Commissioner** declaring the **Contractor** in default and/or the withholding of payments otherwise due under the **Contract**.

37.7 The **Contractor** and its **Subcontractors** shall keep such employment and payroll records as are required by Section 220 of the Labor Law. The failure of the **Contractor** or **Subcontractor(s)** to comply with the provisions of this Article 37.7 may result in the **Commissioner** declaring the **Contractor** in default and/or the withholding of payments otherwise due under the **Contract**.

37.8 At the time the **Contractor** makes application for each partial payment and for final payment, the **Contractor** shall submit to the **Commissioner** a written payroll certification, in the form provided by this **Contract**, of compliance with the prevailing wage, minimum wage, and other provisions and stipulations required by Labor Law Section 220 and of compliance with the training requirements of Labor Law Section 220-h set forth in Article 35.2. This certification of compliance shall be a condition precedent to payment and no payment shall be made to the **Contractor** unless and until each such certification shall have been submitted to and received by the **Commissioner**.

37.9 This **Contract** is executed by the **Contractor** with the express warranty and representation that the **Contractor** is not disqualified under the provisions of Section 220 of the Labor Law from the award of the **Contract**.

37.10 Any breach or violation of any of the foregoing shall be deemed a breach or violation of a material provision of this **Contract**, and grounds for cancellation thereof by the **City**.

### **ARTICLE 38. PAYROLL REPORTS**

38.1 The **Contractor** and its **Subcontractor(s)** shall maintain on the **Site** during the performance of the **Work** the original payrolls or transcripts thereof which the **Contractor** and its **Subcontractor(s)** are required to maintain and shall submit such original payrolls or transcripts, subscribed and affirmed by it as true, within thirty (30) **Days** after issuance of its first payroll, and every thirty (30) **Days** thereafter, pursuant to Labor Law Section 220(3-a)(a)(iii). The **Contractor** and **Subcontractor(s)** shall submit such original payrolls or transcripts along with each and every payment requisition. If payment requisitions are not submitted at least once a month, the **Contractor** and its **Subcontractor(s)** shall submit original payrolls and transcripts both along with its payment requisitions and independently of its payment requisitions.

38.2 The **Contractor** shall maintain payrolls or transcripts thereof for six (6) years from the date of completion of the **Work** on this **Contract**. If such payrolls and transcripts are maintained outside of New York City after the completion of the **Work** and their production is required pursuant to this Article 38, the **Contractor** shall produce such records in New York City upon request by the **City**.

38.3 The **Contractor** and **Subcontractor(s)** shall comply with any written order, direction, or request made by the **Engineer**, the **Commissioner**, the **ACCO**, the **Agency EAO**, the **Agency Labor Law Investigator(s)**, or the **Comptroller**, to provide to the requesting party any of the following information and/or records within five (5) **Days** of such written order, direction, or request:

38.3.1 Such original payrolls or transcripts thereof subscribed and affirmed by it as true and the statements signed by each worker pursuant to this Chapter VIII; and/or

38.3.2 Attendance sheets for each **Day** on which any employee of the **Contractor** and/or any of the **Subcontractor(s)** performed **Work** on the **Site**, which attendance sheet shall be in a form acceptable to the **Agency** and shall provide information acceptable to the **Agency** to identify each such employee; and/or

38.3.3 Any other information to satisfy the **Engineer**, the **Commissioner**, the **ACCO**, the **Agency EAO**, the **Agency Labor Law Investigator(s)** or the **Comptroller**, that this Chapter VIII and the Labor Law, as to the hours of employment and prevailing rates of wages and/or supplemental benefits, are being observed.

38.4 The failure of the **Contractor** or **Subcontractor(s)** to comply with the provisions of Articles 38.1 and/or 38.2 may result in the **Commissioner** declaring the **Contractor** in default and/or the withholding of payments otherwise due under the **Contract**.

### **ARTICLE 39. DUST HAZARDS**

39.1 Should a harmful dust hazard be created in performing the **Work** of this **Contract**, for the elimination of which appliances or methods have been approved by the Board of Standards and Appeals

of the City of New York, such appliances and methods shall be installed, maintained, and effectively operated during the continuance of such harmful dust hazard. Failure to comply with this provision after notice shall make this **Contract** voidable at the sole discretion of the **City**.

## **CHAPTER IX: PARTIAL AND FINAL PAYMENTS**

### **ARTICLE 40. CONTRACT PRICE**

40.1 The **City** shall pay, and the **Contractor** agrees to accept, in full consideration for the **Contractor's** performance of the **Work** subject to the terms and conditions hereof, the lump sum price or unit prices for which this **Contract** was awarded, plus the amount required to be paid for any **Extra Work** ordered by the **Commissioner** under Article 25, less credit for any **Work** omitted pursuant to Article 29.

### **ARTICLE 41. BID BREAKDOWN ON LUMP SUM**

41.1 Within fifteen (15) **Days** after the commencement date specified in the **Notice to Proceed** or **Order to Work**, unless otherwise directed by the **Resident Engineer**, the **Contractor** shall submit to the **Resident Engineer** a breakdown of its bid price, or of lump sums bid for items of the **Contract**, showing the various operations to be performed under the **Contract**, as directed in the progress schedule required under Article 9, and the value of each of such operations, the total of such items to equal the lump sum price bid. Said breakdown must be approved in writing by the **Resident Engineer**.

41.2 No partial payment will be approved until the **Contractor** submits a bid breakdown that is acceptable to the **Resident Engineer**.

41.3 The **Contractor** shall also submit such other information relating to the bid breakdown as directed by the **Resident Engineer**. Thereafter, the breakdown may be used only for checking the **Contractor's** applications for partial payments hereunder, but shall not be binding upon the **City**, the **Commissioner**, or the **Engineer** for any purpose whatsoever.

### **ARTICLE 42. PARTIAL PAYMENTS**

42.1 From time to time as the **Work** progresses satisfactorily, but not more often than once each calendar month (except where the **Commissioner** approves in writing the submission of invoices on a more frequent basis and for invoices relating to **Work** performed pursuant to a change order), the **Contractor** may submit to the **Engineer** a requisition for a partial payment in the prescribed form, which shall contain an estimate of the quantity and the fair value of the **Work** done during the payment period.

42.2 Partial payments may be made for materials, fixtures, and equipment in advance of their actual incorporation in the **Work**, as the **Commissioner** may approve, and upon the terms and conditions set forth in the General Conditions.

42.3 The **Contractor** shall also submit to the **Commissioner** in connection with every application for partial payment a verified statement in the form prescribed by the **Comptroller** setting forth the information required under Labor Law Section 220-a.

42.4 Within thirty (30) **Days** after receipt of a satisfactory payment application, and within sixty (60) **Days** after receipt of a satisfactory payment application in relation to **Work** performed pursuant to a change order, the **Engineer** will prepare and certify, and the **Commissioner** will approve, a voucher for a partial payment in the amount of such approved estimate, less any and all deductions authorized to be made by the **Commissioner** under the terms of this **Contract** or by **Law**.

#### **ARTICLE 43. PROMPT PAYMENT**

43.1 The Prompt Payment provisions of the **PPB** Rules in effect at the time of the bid will be applicable to payments made under this **Contract**. The provisions require the payment to the **Contractor** of interest on payments made after the required payment date, except as set forth in the **PPB** Rules.

43.2 The **Contractor** shall submit a proper invoice to receive payment, except where the **Contract** provides that the **Contractor** will be paid at predetermined intervals without having to submit an invoice for each scheduled payment.

43.3 Determination of interest due will be made in accordance with the **PPB** Rules.

43.4 If the **Contractor** is paid interest, the proportionate share(s) of that interest shall be forwarded by the **Contractor** to its **Subcontractor(s)**.

43.5 The **Contractor** shall pay each **Subcontractor** or **Materialman** not later than seven (7) **Days** after receipt of payment out of amounts paid to the **Contractor** by the **City** for **Work** performed by the **Subcontractor** or **Materialman** under this **Contract**.

43.5.1 If **Contractor** fails to make any payment to any **Subcontractor** or **Materialman** within seven (7) **Days** after receipt of payment by the **City** pursuant to this Article 43.5, then the **Contractor** shall pay interest on amounts due to such **Subcontractor** or **Materialman** at the rate of interest in effect on the date such payment is made by the **Contractor** computed in accordance with Section 756-b (1)(b) of the New York General Business Law. Accrual of interest shall commence on the **Day** immediately following the expiration of the seventh **Day** following receipt of payment by the **Contractor** from the **City** and shall end on the date on which payment is made.

43.6 The **Contractor** shall include in each of its subcontracts a provision requiring each **Subcontractor** to make payment to each of its **Subcontractors** or **Materialmen** for **Work** performed under this **Contract** in the same manner and within the same time period set forth above.

#### **ARTICLE 44. SUBSTANTIAL COMPLETION PAYMENT**

44.1 The **Contractor** shall submit with the **Substantial Completion** requisition:

44.1.1 A final verified statement of any pending Article 27 disputes in accordance with the **PPB** Rules and this **Contract** and any and all alleged claims against the **City**, in any way connected with or arising out of this **Contract** (including those as to which details may have been furnished pursuant to Articles 11, 27, 28, and 30) setting forth with respect to each such claim the total amount thereof, the various items of labor and materials included therein, and the alleged value of each item; and if the alleged claim be one for delay, the alleged cause of each such delay, the period or periods of time, giving the dates when the

**Contractor** claims the performance of the **Work** or a particular part thereof was delayed, and an itemized statement and breakdown of the amount claimed for each such delay.

44.1.1(a) With respect to each such claim, the **Commissioner**, the **Comptroller** and, in the event of litigation, the **City Corporation Counsel** shall have the same right to inspect, and to make extracts or copies of, the **Contractor's** books, vouchers, records, etc., as is referred to in Articles 11, 27, 28, and 30. Nothing contained in this Article 44.1.1(a) is intended to or shall relieve the **Contractor** from the obligation of complying strictly with Articles 11, 27, 28, and 30. The **Contractor** is warned that unless such claims are completely set forth as herein required, the **Contractor** upon acceptance of the **Substantial Completion** payment pursuant to this Article 44, will have waived any such claims.

44.1.2 A **Final Approved Punch List**.

44.1.3 Where required, a request for an extension of time to achieve **Substantial Completion** or final extension of time.

44.2 The **Commissioner** shall issue a voucher calling for payment of any part or all of the balance due for **Work** performed under the **Contract**, including monies retained under Article 21, less any and all deductions authorized to be made by the **Commissioner**, under this **Contract** or by **Law**, and less twice the amount the **Commissioner** considers necessary to ensure the completion of the balance of the **Work** by the **Contractor**. Such a payment shall be considered a partial and not a final payment. No **Substantial Completion** payment shall be made under this Article 44 where the **Contractor** failed to complete the **Work** within the time fixed for such completion in the Schedule A of the General Conditions, or within the time to which completion may have been extended, until an extension or extensions of time for the completion of **Work** have been acted upon pursuant to Article 13.

44.3 No further partial payments shall be made to the **Contractor** after **Substantial Completion**, except the **Substantial Completion** payment and payment pursuant to any **Contractor's** requisition that were properly filed with the **Commissioner** prior to the date of **Substantial Completion**; however, the **Commissioner** may grant a waiver for further partial payments after the date of **Substantial Completion** to permit payments for change order **Work** and/or release of retainage and deposits pursuant to Articles 21 and 24. Such waiver shall be in writing.

44.4 The **Contractor** acknowledges that nothing contained in this Article 44 is intended to or shall in any way diminish the force and effect of Article 13.

## **ARTICLE 45. FINAL PAYMENT**

45.1 After completion and **Final Acceptance** of the **Work**, the **Contractor** shall submit all required certificates and documents, together with a requisition for the balance claimed to be due under the **Contract**, less the amount authorized to be retained for maintenance under Article 24. Such submission shall be within 90 days of the date of the **Commissioner's** written determination of **Final Acceptance**, or within such additional time as may be granted by the **Commissioner** in writing. If the **Contractor** fails to submit all required certificates and documents within the time allowed, no payment of the balance claimed shall be made to the **Contractor** and the **Contractor** shall be deemed to have forfeited its right to payment of any balance claimed. A verified statement similar to that required in connection with applications for partial payments shall also be submitted to the **Commissioner**.

45.2 Amended Verified Statement of Claims: The **Contractor** shall also submit with the final requisition any amendments to the final verified statement of any pending dispute resolution procedures in accordance with the **PPB** Rules and this **Contract** and any and all alleged claims against the **City**, in any way connected with or arising out of this **Contract** (including those as to which details may have been furnished pursuant to Articles 11, 27, 28, and 30) that have occurred subsequent to **Substantial Completion**, setting forth with respect to each such claim the total amount thereof, the various items of labor and materials included therein, and the alleged value of each such item; and if the alleged claim be one for delay, the alleged cause of each such delay, the period or periods of time, giving the dates when the **Contractor** claims the performance of the **Work** or a particular part thereof was delayed, and an itemized statement and breakdown of the amount claimed for each such delay. With reference to each such claim, the **Commissioner**, the **Comptroller** and, in the event of litigation, the **City** Corporation Counsel shall have the same right to inspect, and to make extracts or copies of, the **Contractor's** books, vouchers, records, etc., as is referred to in Articles 11, 27, 28, and 30. Nothing contained in this Article 45.2, is intended to or shall relieve the **Contractor** from the obligation of complying strictly with Articles 11, 27, 28, and 30. The **Contractor** is warned that unless such claims are completely set forth as herein required, the **Contractor**, upon acceptance of the Final Payment pursuant to Article 46, will have waived any such claims.

45.3 Preparation of Final Voucher: Upon determining the balance due hereunder other than on account of claims, the **Engineer** will prepare and certify, for the Commissioner's approval, a voucher for final payment in that amount less any and all deductions authorized to be made by the **Commissioner** under this **Contract** or by **Law**. In the case of a lump sum **Contract**, the **Commissioner** shall certify the voucher for final payment within thirty (30) **Days** from the date of completion and acceptance of the **Work**, provided all requests for extensions of time have been acted upon.

45.3.1 All prior certificates and vouchers upon which partial payments were made, being merely estimates made to enable the **Contractor** to prosecute the **Work** more advantageously, shall be subject to correction in the final voucher, and the certification of the **Engineer** thereon and the approval of the **Commissioner** thereof, shall be conditions precedent to the right of the **Contractor** to receive any money hereunder. Such final voucher shall be binding and conclusive upon the **Contractor**.

45.3.2 Payment pursuant to such final voucher, less any deductions authorized to be made by the **Commissioner** under this **Contract** or by **Law**, shall constitute the final payment, and shall be made by the **Comptroller** within thirty (30) **Days** after the filing of such voucher in his/her office.

45.4 The **Contractor** acknowledges that nothing contained in this Article 45 is intended to or shall in any way diminish the force and effect of Article 13.

#### **ARTICLE 46. ACCEPTANCE OF FINAL PAYMENT**

46.1 The acceptance by the **Contractor**, or by anyone claiming by or through it, of the final payment, whether such payment be made pursuant to any judgment of any court, or otherwise, shall constitute and operate as a release of the **City** from any and all claims of and liability to the **Contractor** for anything heretofore done or furnished for the **Contractor** relating to or arising out of this **Contract** and the **Work** done hereunder, and for any prior act, neglect or default on the part of the **City** or any of its officials, agents or employees, excepting only a claim against the **City** for the amounts deducted or retained in accordance with the terms and provisions of this **Contract** or by **Law**, and excepting any claims, not otherwise waived, or any pending dispute resolution procedures which are contained in the

verified statement filed with the **Contractor's** substantial and final requisitions pursuant to Articles 44 and 45.

46.2 The **Contractor** is warned that the execution by it of a release, in connection with the acceptance of the final payment, containing language purporting to reserve claims other than those herein specifically excepted from the operation of this Article 46, or those for amounts deducted by the **Commissioner** from the final requisition or from the final payment as certified by the **Engineer** and approved by the **Commissioner**, shall not be effective to reserve such claims, anything stated to the **Contractor** orally or in writing by any official, agent or employee of the **City** to the contrary notwithstanding.

46.3 Should the **Contractor** refuse to accept the final payment as tendered by the **Comptroller**, it shall constitute a waiver of any right to interest thereon.

46.4 The **Contractor**, however, shall not be barred by this Article 46 from commencing an action for breach of **Contract** to the extent permitted by **Law** and by the terms of the **Contract** for any claims that are contained in the verified statement filed with the **Contractor's** substantial and final requisitions pursuant to Articles 44 and 45 or that arose after submission of the final payment requisition, provided that a detailed and verified statement of claim is served upon the contracting **Agency** and **Comptroller** not later than forty (40) **Days** after the making of such final payment by electronic funds transfer (EFT) or the mailing of such final payment. The statement shall specify the items upon which the claim will be based and any such claim shall be limited to such items.

#### **ARTICLE 47. APPROVAL BY PUBLIC DESIGN COMMISSION**

47.1 All works of art, including paintings, mural decorations, stained glass, statues, bas-reliefs, and other sculptures, monuments, fountains, arches, and other structures of a permanent character intended for ornament or commemoration, and every design of the same to be used in the performance of this **Contract**, and the design of all bridges, approaches, buildings, gates, fences, lamps, or structures to be erected, pursuant to the terms of this **Contract**, shall be submitted to the Art Commission, d/b/a the Public Design Commission of the City of New York, and shall be approved by the Public Design Commission prior to the erection or placing in position of the same. The final payment shall not become due or payable under this **Contract** unless and until the Public Design Commission shall certify that the design for the **Work** herein contracted for has been approved by the said Public Design Commission, and that the same has been executed in substantial accordance with the design so approved, pursuant to the provisions of Chapter 37, Section 854 of the **City** Charter, as amended.

### **CHAPTER X: CONTRACTOR'S DEFAULT**

#### **ARTICLE 48. COMMISSIONER'S RIGHT TO DECLARE CONTRACTOR IN DEFAULT**

48.1 In addition to those instances specifically referred to in other Articles herein, the **Commissioner** shall have the right to declare the **Contractor** in default of this **Contract** if:

48.1.1 The **Contractor** fails to commence **Work** when notified to do so by the **Commissioner**; or if

48.1.2 The **Contractor** shall abandon the **Work**; or if

48.1.3 The **Contractor** shall refuse to proceed with the **Work** when and as directed by the **Commissioner**; or if

48.1.4 The **Contractor** shall, without just cause, reduce its working force to a number which, if maintained, would be insufficient, in the opinion of the **Commissioner**, to complete the **Work** in accordance with the progress schedule; or if

48.1.5 The **Contractor** shall fail or refuse to increase sufficiently such working force when ordered to do so by the **Commissioner**; or if

48.1.6 The **Contractor** shall sublet, assign, transfer, convert or otherwise dispose of this **Contract** other than as herein specified; or sell or assign a majority interest in the **Contractor**; or if

48.1.7 The **Contractor** fails to secure and maintain all required insurance; or if

48.1.8 A receiver or receivers are appointed to take charge of the **Contractor's** property or affairs; or if

48.1.9 The **Commissioner** shall be of the opinion that the **Contractor** is or has been unnecessarily or unreasonably or willfully delaying the performance and completion of the **Work**, or the award of necessary subcontracts, or the placing of necessary material and equipment orders; or if

48.1.10 The **Commissioner** shall be of the opinion that the **Contractor** is or has been willfully or in bad faith violating any of the provisions of this **Contract**; or if

48.1.11 The **Commissioner** shall be of the opinion that the **Work** cannot be completed within the time herein provided therefor or within the time to which such completion may have been extended; provided, however, that the impossibility of timely completion is, in the **Commissioner's** opinion, attributable to conditions within the **Contractor's** control; or if

48.1.12 The **Work** is not completed within the time herein provided therefor or within the time to which the **Contractor** may be entitled to have such completion extended; or if

48.1.13 Any statement or representation of the **Contractor** in the **Contract** or in any document submitted by the **Contractor** with respect to the **Work**, the **Project**, or the **Contract** (or for purposes of securing the **Contract**) was untrue or incorrect when made; or if

48.1.14 The **Contractor** or any of its officers, directors, partners, five (5%) percent shareholders, principals, or other persons substantially involved in its activities, commits any of the acts or omissions specified as the grounds for debarment in the **PPB Rules**.

48.2 Before the **Commissioner** shall exercise his/her right to declare the **Contractor** in default, the **Commissioner** shall give the **Contractor** an opportunity to be heard, upon not less than two (2) **Days'** notice.

## **ARTICLE 49. EXERCISE OF THE RIGHT TO DECLARE DEFAULT**

49.1 The right to declare the **Contractor** in default for any of the grounds specified or referred to in Article 48 shall be exercised by sending the **Contractor** a notice, signed by the **Commissioner**, setting forth the ground or grounds upon which such default is declared (hereinafter referred to as a “Notice of Default”).

49.2 The **Commissioner’s** determination that the **Contractor** is in default shall be conclusive, final, and binding on the parties and such a finding shall preclude the **Contractor** from commencing a plenary action for any damages relating to the **Contract**. If the **Contractor** protests the determination of the **Commissioner**, the **Contractor** may commence an action in a court of competent jurisdiction of the State of New York under Article 78 of the New York Civil Practice Law and Rules.

## **ARTICLE 50. QUITTING THE SITE**

50.1 Upon receipt of such notice the **Contractor** shall immediately discontinue all further operations under this **Contract** and shall immediately quit the **Site**, leaving untouched all plant, materials, equipment, tools, and supplies then on the **Site**.

## **ARTICLE 51. COMPLETION OF THE WORK**

51.1 The **Commissioner**, after declaring the **Contractor** in default, may then have the **Work** completed by such means and in such manner, by contract with or without public letting, or otherwise, as he/she may deem advisable, utilizing for such purpose such of the **Contractor’s** plant, materials, equipment, tools, and supplies remaining on the **Site**, and also such **Subcontractors**, as he/she may deem advisable.

51.2 After such completion, the **Commissioner** shall make a certificate stating the expense incurred in such completion, which shall include the cost of re-letting and also the total amount of liquidated damages (at the rate provided for in the **Contract**) from the date when the **Work** should have been completed by the **Contractor** in accordance with the terms hereof to the date of actual completion of the **Work**. Such certificate shall be binding and conclusive upon the **Contractor**, its sureties, and any person claiming under the **Contractor**, as to the amount thereof.

51.3 The expense of such completion, including any and all related and incidental costs, as so certified by the **Commissioner**, and any liquidated damages assessed against the **Contractor**, shall be charged against and deducted out of monies which are earned by the **Contractor** prior to the date of default. Should the expense of such completion, as certified by the **Commissioner**, exceed the total sum which would have been payable under the **Contract** if it had been completed by the **Contractor**, any excess shall be paid by the **Contractor**.

## **ARTICLE 52. PARTIAL DEFAULT**

52.1 In case the **Commissioner** shall declare the **Contractor** in default as to a part of the **Work** only, the **Contractor** shall discontinue such part, shall continue performing the remainder of the **Work** in strict conformity with the terms of this **Contract**, and shall in no way hinder or interfere with any **Other Contractor(s)** or persons whom the **Commissioner** may engage to complete the **Work** as to which the **Contractor** was declared in default.

52.2 The provisions of this Chapter relating to declaring the **Contractor** in default as to the entire **Work** shall be equally applicable to a declaration of partial default, except that the **Commissioner** shall be entitled to utilize for completion of the part of the **Work** as to which the **Contractor** was declared in default only such plant, materials, equipment, tools, and supplies as had been previously used by the **Contractor** on such part.

### **ARTICLE 53. PERFORMANCE OF UNCOMPLETED WORK**

53.1 In completing the whole or any part of the **Work** under the provisions of this Chapter X, the **Commissioner** shall have the power to depart from or change or vary the terms and provisions of this **Contract**, provided, however, that such departure, change or variation is made for the purpose of reducing the time or expense of such completion. Such departure, change or variation, even to the extent of accepting a lesser or different performance, shall not affect the conclusiveness of the **Commissioner's** certificate of the cost of completion referred to in Article 51, nor shall it constitute a defense to an action to recover the amount by which such certificate exceeds the amount which would have been payable to the **Contractor** hereunder but for its default.

### **ARTICLE 54. OTHER REMEDIES**

54.1 In addition to the right to declare the **Contractor** in default pursuant to this Chapter X, the **Commissioner** shall have the absolute right, in his/her sole discretion and without a hearing, to complete or cause to be completed in the same manner as described in Articles 51 and 53, any or all unsatisfactory or uncompleted punch list **Work** that remains after the completion date specified in the **Final Approved Punch List**. A written notice of the exercise of this right shall be sent to the **Contractor** who shall immediately quit the **Site** in accordance with the provisions of Article 50.

54.2 The expense of completion permitted under Article 54.1, including any and all related and incidental costs, as so certified by the **Commissioner**, shall be charged against and deducted out of monies which have been earned by the **Contractor** prior to the date of the exercise of the right set forth in Article 54.1; the balance of such monies, if any, subject to the other provisions of this **Contract**, to be paid to the **Contractor** without interest after such completion. Should the expense of such completion, as certified by the **Commissioner**, exceed the total sum which would have been payable under the **Contract** if it had been completed by the **Contractor**, any excess shall be paid by the **Contractor**.

54.3 The previous provisions of this Chapter X shall be in addition to any and all other remedies available under **Law** or in equity.

54.4 The exercise by the **City** of any remedy set forth herein shall not be deemed a waiver by the **City** of any other legal or equitable remedy contained in this **Contract** or provided under **Law**.

## **CHAPTER XI: MISCELLANEOUS PROVISIONS**

### **ARTICLE 55. CONTRACTOR'S WARRANTIES**

55.1 In consideration of, and to induce, the award of this **Contract** to the **Contractor**, the **Contractor** represents and warrants:

55.1.1 That it is financially solvent, sufficiently experienced and competent to perform the **Work**; and

55.1.2 That the facts stated in its bid and the information given by it pursuant to the Information for Bidders is true and correct in all respects; and

55.1.3 That it has read and complied with all requirements set forth in the **Contract**.

#### **ARTICLE 56. CLAIMS AND ACTIONS THEREON**

56.1 Any claim, that is not subject to dispute resolution under the **PPB** Rules or this **Contract**, against the **City** for damages for breach of **Contract** shall not be made or asserted in any action, unless the **Contractor** shall have strictly complied with all requirements relating to the giving of notice and of information with respect to such claims, as herein before provided.

56.2 Nor shall any action be instituted or maintained on any such claims unless such action is commenced within six (6) months after **Substantial Completion**; except that:

56.2.1 Any claims arising out of events occurring after **Substantial Completion** and before **Final Acceptance** of the **Work** shall be asserted within six (6) months of **Final Acceptance** of the **Work**;

56.2.2 If the **Commissioner** exercises his/her right to complete or cause to complete any or all unsatisfactory or uncompleted punch list **Work** that remains after the completion date specified in the **Final Approved Punch List** pursuant to Article 54, any such action shall be commenced within six (6) months from the date the **Commissioner** notifies the **Contractor** in writing that he/she has exercised such right. Any claims for monies deducted, retained or withheld under the provisions of this **Contract** shall be asserted within six (6) months after the date when such monies otherwise become due and payable hereunder; and

56.2.3 If the **Commissioner** exercises his/her right to terminate the **Contract** pursuant to Article 64, any such action shall be commenced within six (6) months of the date the **Commissioner** exercises said right.

#### **ARTICLE 57. INFRINGEMENT**

57.1 The **Contractor** shall be solely responsible for and shall defend, indemnify, and hold the **City** harmless from any and all claims (even if the allegations of the lawsuit are without merit) and judgments for damages and from costs and expenses to which the **City** may be subject to or which it may suffer or incur allegedly arising out of or in connection with any infringement by the **Contractor** of any copyright, trade secrets, trademark or patent rights or any other property or personal right of any third party by the **Contractor** and/or its **Subcontractors** in the performance or completion of the **Work**. Insofar as the facts or **Law** relating to any claim would preclude the **City** from being completely indemnified by the **Contractor**, the **City** shall be partially indemnified by the **Contractor** to the fullest extent permitted by **Law**.

## **ARTICLE 58. NO CLAIM AGAINST OFFICIALS, AGENTS OR EMPLOYEES**

58.1 No claim whatsoever shall be made by the **Contractor** against any official, agent or employee of the **City** for, or on account of, anything done or omitted to be done in connection with this **Contract**.

## **ARTICLE 59. SERVICE OF NOTICES**

59.1 The **Contractor** hereby designates the business address, fax number, and email address specified in its bid, as the place where all notices, directions or other communications to the **Contractor** may be delivered, or to which they may be mailed. Any notice, direction, or communication from either party to the other shall be in writing and shall be deemed to have been given when (i) delivered personally; (ii) sent by certified mail, return receipt requested; (iii) delivered by overnight or same day courier service in a properly addressed envelope with confirmation; or (iv) sent by fax or email and, unless receipt of the fax or e-mail is acknowledged by the recipient by fax or e-mail, deposited in a post office box regularly maintained by the United States Postal Service in a properly addressed, postage pre-paid envelope.

59.2 **Contractor's** notice address, email address, or fax number may be changed at any time by an instrument in writing, executed and acknowledged by the **Contractor**, and delivered to the **Commissioner**.

59.3 Nothing herein contained shall, however, be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the **Contractor** personally, or, if the **Contractor** is a corporation, upon any officer thereof.

## **ARTICLE 60. UNLAWFUL PROVISIONS DEEMED STRICKEN FROM CONTRACT**

60.1 If this **Contract** contains any unlawful provision not an essential part of the **Contract** and which shall not appear to have been a controlling or material inducement to the making thereof, the same shall be deemed of no effect and shall, upon notice by either party, be deemed stricken from the **Contract** without affecting the binding force of the remainder.

## **ARTICLE 61. ALL LEGAL PROVISIONS DEEMED INCLUDED**

61.1 It is the intent and understanding of the parties to this **Contract** that each and every provision of **Law** required to be inserted in this **Contract** shall be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein, and if, through mistake or otherwise, any such provision is not inserted, or is not inserted in correct form, then this **Contract** shall forthwith upon the application of either party be amended by such insertion so as to comply strictly with the **Law** and without prejudice to the rights of either party hereunder.

## **ARTICLE 62. TAX EXEMPTION**

62.1 The **City** is exempt from payment of Federal, State, and local taxes, including sales and compensating use taxes of the State of New York and its cities and counties on all tangible personal property sold to the **City** pursuant to the provisions of this **Contract**. These taxes are not to be included in bids. However, this exemption does not apply to tools, machinery, equipment or other property leased by or to the **Contractor**, **Subcontractor** or **Materialman** or to tangible personal property which, even

though it is consumed, is not incorporated into the completed **Work** (consumable supplies) and tangible personal property that the **Contractor** is required to remove from the **Site** during or upon completion of the **Work**. The **Contractor** and its **Subcontractors** and **Materialmen** shall be responsible for and pay any and all applicable taxes, including sales and compensating use taxes, on such leased tools, machinery, equipment or other property and upon all such consumable supplies and tangible personal property that the **Contractor** is required to remove from the **Site** during or upon completion of the **Work**.

62.2 The **Contractor** agrees to sell and the **City** agrees to purchase all tangible personal property, other than consumable supplies and other tangible personal property that the **Contractor** is required to remove from the **Site** during or upon completion of the **Work**, that is required, necessary or proper for or incidental to the construction of the **Project** covered by this **Contract**. The sum paid under this **Contract** for such tangible personal property shall be in full payment and consideration for the sale of such tangible personal property.

62.2.1 The **Contractor** agrees to construct the **Project** and to perform all **Work**, labor and services rendered, necessary, proper or incidental thereto for the sum shown in the bid for the performance of such **Work**, labor, and services, and the sum so paid pursuant to this **Contract** for such **Work**, labor, and services, shall be in full consideration for the performance by the **Contractor** of all its duties and obligations under this **Contract** in connection with said **Work**, labor, and services.

62.3 20 NYCRR Section 541.3(d) provides that a **Contractor's** purchases of tangible personal property that is either incorporated into real property owned by a governmental entity or purchased for and sold to a governmental entity are exempt from sales and use tax. The **City** shall not pay sales tax for any such tangible personal property that it purchases from the **Contractor** pursuant to the **Contract**. With respect to such tangible personal property, the **Contractor**, at the request of the **City**, shall furnish to the **City** such bills of sale and other instruments as may be required by the **City**, properly executed, acknowledged and delivered assuring to the **City** title to such tangible personal property, free of liens and/or encumbrances, and the **Contractor** shall mark or otherwise identify all such tangible personal property as the property of the **City**.

62.4 Title to all tangible personal property to be sold by the **Contractor** to the **City** pursuant to the provisions of the **Contract** shall immediately vest in and become the sole property of the **City** upon delivery of such tangible personal property to the **Site**. Notwithstanding such transfer of title, the **Contractor** shall have the full and continuing responsibility to install such tangible personal property in accordance with the provisions of this **Contract**, protect it, maintain it in a proper condition and forthwith repair, replace and make good any damage thereto, theft or disappearance thereof, and furnish additional tangible personal property in place of any that may be lost, stolen or rendered unusable, without cost to the **City**, until such time as the **Work** covered by the **Contract** is fully accepted by the **City**. Such transfer of title shall in no way affect any of the **Contractor's** obligations hereunder. In the event that, after title has passed to the **City**, any of the tangible personal property is rejected as being defective or otherwise unsatisfactory, title to all such tangible personal property shall be deemed to have been transferred back to the **Contractor**.

62.5 The purchase by **Subcontractors** or **Materialmen** of tangible personal property to be sold hereunder shall be a purchase or procurement for resale to the **Contractor** (either directly or through other **Subcontractors**) and therefore not subject to the aforesaid sales and compensating use taxes, provided that the subcontracts and purchase agreements provide for the resale of such tangible personal property and that such subcontracts and purchase agreements are in a form similar to this **Contract** with respect to the separation of the sale of consumable supplies and tangible personal property that the

**Contractor** is required to remove from the **Site** during or upon completion of the **Work** from the **Work** and labor, services, and any other matters to be provided, and provided further that the subcontracts and purchase agreements provide separate prices for tangible personal property and all other services and matters. Such separation shall actually be followed in practice, including the separation of payments for tangible personal property from the payments for other **Work** and labor and other things to be provided.

62.6 The **Contractor** and its **Subcontractors** and **Materialmen** shall furnish a **Contractor** Exempt Purchase Certificate to all persons, firms or corporations from which they purchase tangible personal property for the performance of the **Work** covered by this **Contract**.

62.7 In the event any of the provisions of this Article 62 shall be deemed to be in conflict with any other provisions of this **Contract** or create any ambiguity, then the provisions of this Article 62 shall control.

### **ARTICLE 63. INVESTIGATION(S) CLAUSE**

63.1 The parties to this **Contract** agree to cooperate fully and faithfully with any investigation, audit or inquiry conducted by a United States, a State of New York (State) or a **City** governmental agency or authority that is empowered directly or by designation to compel the attendance of witnesses and to examine witnesses under oath, or conducted by the Inspector General of a governmental agency that is a party in interest to the transaction, submitted bid, submitted proposal, contract, lease, permit or license that is the subject of the investigation, audit or inquiry.

63.2 If any person who has been advised that his/her statement, and any information from such statement, will not be used against him/her in any subsequent criminal proceeding refuses to testify before a grand jury or other governmental agency or authority empowered directly or by designation to compel the attendance of witnesses and to examine witnesses under oath concerning the award of or performance under any transaction, agreement, lease, permit, contract, or license entered into with the **City**, the State, or any political subdivision or public authority thereof, or the Port Authority of New York and New Jersey, or any local development corporation within the **City**, or any public benefit corporation organized under the **Laws** of the State of New York, or;

63.3 If any person refuses to testify for a reason other than the assertion of his/her privilege against self incrimination in an investigation, audit or inquiry conducted by a **City** or State governmental agency or authority empowered directly or by designation to compel the attendance of witnesses and to take testimony under oath, or by the Inspector General of the governmental agency that is a party in interest in, and is seeking testimony concerning the award of, or performance under any transaction, agreement, lease, permit, contract, or license entered into with the **City**, the State, or any political subdivision thereof or any local development corporation within the **City**, then;

63.4 The **Commissioner** whose **Agency** is a party in interest to the transaction, submitted bid, submitted proposal, contract, lease, permit, or license shall convene a hearing, upon not less than five (5) **Days**' written notice to the parties involved to determine if any penalties should attach for the failure of a person to testify.

63.5 If any non-governmental party to the hearing requests an adjournment, the **Commissioner** who convened the hearing may, upon granting the adjournment, suspend any contract, lease, permit, or license, pending the final determination pursuant to Article 63.7 without the **City** incurring any penalty or damages for delay or otherwise.

63.6 The penalties which may attach after a final determination by the **Commissioner** may include but shall not exceed:

63.6.1 The disqualification for a period not to exceed five (5) years from the date of an adverse determination for any person, or any entity of which such person was a member at the time the testimony was sought, from submitting bids for, or transacting business with, or entering into or obtaining any contract, lease, permit or license with or from the **City**; and/or

63.6.2 The cancellation or termination of any and all such existing **City** contracts, leases, permits or licenses that the refusal to testify concerns and that have not been assigned as permitted under this **Contract**, nor the proceeds of which pledged, to an unaffiliated and unrelated institutional lender for fair value prior to the issuance of the notice scheduling the hearing, without the **City** incurring any penalty or damages on account of such cancellation or termination; monies lawfully due for goods delivered, work done, rentals, or fees accrued prior to the cancellation or termination shall be paid by the **City**.

63.7 The **Commissioner** shall consider and address in reaching his/her determination and in assessing an appropriate penalty the factors in Articles 63.7.1 and 63.7.2. The **Commissioner** may also consider, if relevant and appropriate, the criteria established in Articles 63.7.3 and 63.7.4, in addition to any other information which may be relevant and appropriate:

63.7.1 The party's good faith endeavors or lack thereof to cooperate fully and faithfully with any governmental investigation or audit, including but not limited to the discipline, discharge, or disassociation of any person failing to testify, the production of accurate and complete books and records, and the forthcoming testimony of all other members, agents, assignees or fiduciaries whose testimony is sought.

63.7.2 The relationship of the person who refused to testify to any entity that is a party to the hearing, including but not limited to, whether the person whose testimony is sought has an ownership interest in the entity and/or the degree of authority and responsibility the person has within the entity.

63.7.3 The nexus of the testimony sought to the subject entity and its contracts, leases, permits or licenses with the **City**.

63.7.4 The effect a penalty may have on an unaffiliated and unrelated party or entity that has a significant interest in an entity subject to penalties under Article 63.6, provided that the party or entity has given actual notice to the **Commissioner** upon the acquisition of the interest, or at the hearing called for in Article 63.4, gives notice and proves that such interest was previously acquired. Under either circumstance the party or entity shall present evidence at the hearing demonstrating the potential adverse impact a penalty will have on such person or entity.

63.8 Definitions:

63.8.1 The term "license" or "permit" as used in this Article 63 shall be defined as a license, permit, franchise or concession not granted as a matter of right.

63.8.2 The term "person" as used in this Article 63 shall be defined as any natural person doing business alone or associated with another person or entity as a partner, director, officer, principal or employee.

63.8.3 The term “entity” as used in this Article 63 shall be defined as any firm, partnership, corporation, association, joint venture, or person that receives monies, benefits, licenses, leases, or permits from or through the **City** or otherwise transacts business with the **City**.

63.8.4 The term “member” as used in this Article 63 shall be defined as any person associated with another person or entity as a partner, director, officer, principal or employee.

63.9 In addition to and notwithstanding any other provision of this **Contract**, the **Commissioner** may in his/her sole discretion terminate this **Contract** upon not less than three (3) **Days**’ written notice in the event the **Contractor** fails to promptly report in writing to the **Commissioner** of the Department of Investigations (“DOI”) of the **City** any solicitation of money, goods, requests for future employment or other benefit or thing of value, by or on behalf of any employee of the **City** or other person, firm, corporation or entity for any purpose which may be related to the procurement or obtaining of this **Contract** by the **Contractor**, or affecting the performance of this **Contract**.

#### **ARTICLE 64. TERMINATION BY THE CITY**

64.1 In addition to termination pursuant to any other article of this **Contract**, the **Commissioner** may, at any time, terminate this **Contract** by written notice to the **Contractor**. In the event of termination, the **Contractor** shall, upon receipt of such notice, unless otherwise directed by the **Commissioner**:

64.1.1 Stop **Work** on the date specified in the notice;

64.1.2 Take such action as may be necessary for the protection and preservation of the **City**’s materials and property;

64.1.3 Cancel all cancelable orders for material and equipment;

64.1.4 Assign to the **City** and deliver to the **Site** or another location designated by the **Commissioner**, any non-cancelable orders for material and equipment that is not capable of use except in the performance of this **Contract** and has been specifically fabricated for the sole purpose of this **Contract** and not incorporated in the **Work**;

64.1.5 Take no action which will increase the amounts payable by the **City** under this **Contract**.

64.2 In the event of termination by the **City** pursuant to this Article 64, payment to the **Contractor** shall be in accordance with Articles 64.2.1, 64.2.2 or 64.2.3, to the extent that each respective article applies.

64.2.1 Lump Sum Contracts or Items: On all lump sum **Contracts**, or on lump sum items in a **Contract**, the **City** will pay the **Contractor** the sum of the amounts described in Articles 64.2.1(a) and 64.2.1(b), less all payments previously made pursuant to this **Contract**. On lump sum **Contracts** only, the **City** will also pay the **Contractor** an additional sum as provided in Article 64.2.1(c).

64.2.1(a) For **Work** completed prior to the notice of termination, the **Contractor** shall be paid a pro rata portion of the lump sum bid amount, plus approved change orders, based upon the percent completion of the **Work**, as determined by the

**Commissioner.** For the purpose of determining the pro rata portion of the lump sum bid amount to which the **Contractor** is entitled, the bid breakdown submitted in accordance with Article 41 shall be considered, but shall not be dispositive. The **Commissioner's** determination hereunder shall be final, binding, and conclusive.

64.2.1(b) For non-cancelable material and equipment that is not capable of use except in the performance of this **Contract** and has been specifically fabricated for the sole purpose of this **Contract**, but not yet incorporated in the **Work**, the **Contractor** shall be paid the lesser of the following, less salvage value:

64.2.1(b)(i) The Direct Cost, as defined in Article 64.2.4; or

64.2.1(b)(ii) The fair and reasonable value, if less than Direct Cost, of such material and equipment, plus necessary and reasonable delivery costs.

64.2.1(b)(iii) In addition, the **Contractor** shall be paid five (5%) percent of the amount described in Article 64.2.1(b)(i) or Article 64.2.1(b)(ii), whichever applies.

64.2.1(c) Except as otherwise provided in Article 64.2.1(d), on all lump sum **Contracts**, the **Contractor** shall be paid the percentage indicated below applied to the difference between the total lump sum bid amount and the total of all payments made prior to the notice of termination plus all payments allowed pursuant to Articles 64.2.1(a) and 64.2.1(b):

64.2.1(c)(i) Five (5%) percent of the first five million (\$5,000,000) dollars; and

64.2.1(c)(ii) Three (3%) percent of any amount between five million (\$5,000,000) dollars and fifteen million (\$15,000,000) dollars; plus

64.2.1(c)(iii) One (1%) percent of any amount over fifteen million (\$15,000,000) dollars.

64.2.1(d) In the event the **City** terminates a lump sum **Contract** pursuant to this Article 64 within ninety (90) **Days** after registration of the **Contract** with the **Comptroller**, the **Contractor** shall be paid one (1%) percent of the difference between the lump sum bid amount and the total of all payments made pursuant to this Article 64.2.

64.2.2 Unit Price Contracts or Items: On all unit price **Contracts**, or on unit price items in a **Contract**, the **City** will pay the **Contractor** the sum of the amounts described in Articles 64.2.2(a) and 64.2.2(b), less all payments previously made pursuant to this **Contract**:

64.2.2(a) For all completed units, the unit price stated in the **Contract**, and

64.2.2(b) For units that have been ordered but are only partially completed, the **Contractor** will be paid:

64.2.2(b)(i) A pro rata portion of the unit price stated in the **Contract** based upon the percent completion of the unit and

64.2.2(b)(ii) For non-cancelable material and equipment, payment will be made pursuant to Article 64.2.1(b).

64.2.3 Time and Materials Contracts or Items Based on Time and Material Records: On all **Contracts** or items in a **Contract** where payment for the **Work** is based on time and material records, the **Contractor** shall be paid in accordance with Article 26, less all payments previously made pursuant to this **Contract**.

64.2.4 Direct Costs: Direct Costs as used in this Article 64.2 shall mean:

64.2.4(a) The actual purchase price of material and equipment, plus necessary and reasonable delivery costs,

64.2.4(b) The actual cost of labor involved in construction and installation at the **Site**, and

64.2.4(c) The actual cost of necessary bonds and insurance purchased pursuant to requirements of this **Contract** less any amounts that have been or should be refunded by the **Contractor's** sureties or insurance carriers.

64.2.4(d) Direct Costs shall not include overhead.

64.3 In no event shall any payments under this Article 64 exceed the **Contract** price for such items.

64.4 All payments pursuant to Article 64 shall be in the nature of liquidated damages and shall be accepted by the **Contractor** in full satisfaction of all claims against the **City**.

64.5 The **City** may deduct or set off against any sums due and payable pursuant to this Article 64, any deductions authorized by this **Contract** or by **Law** (including but not limited to liquidated damages) and any claims it may have against the **Contractor**. The **City's** exercise of the right to terminate the **Contract** pursuant to this Article 64 shall not impair or otherwise effect the **City's** right to assert any claims it may have against the **Contractor** in a plenary action.

64.6 Where the **Work** covered by the **Contract** has been substantially completed, as determined in writing by the **Commissioner**, termination of the **Work** shall be handled as an omission of **Work** pursuant to Articles 29 and 33, in which case a change order will be issued to reflect an appropriate reduction in the **Contract** sum, or if the amount is determined after final payment, such amount shall be paid by the **Contractor**.

## **ARTICLE 65. CHOICE OF LAW, CONSENT TO JURISDICTION AND VENUE**

65.1 This **Contract** shall be deemed to be executed in the **City** regardless of the domicile of the **Contractor**, and shall be governed by and construed in accordance with the **Laws** of the State of New York and the **Laws** of the United States, where applicable.

65.2 The parties agree that any and all claims asserted against the **City** arising under this **Contract** or related thereto shall be heard and determined in the courts of the State of New York ("New York State Courts") located in the **City** and County of New York. To effect this **Contract** and intent, the **Contractor** agrees:

65.2.1 If the **City** initiates any action against the **Contractor** in Federal court or in a New York State Court, service of process may be made on the **Contractor** either in person, wherever such **Contractor** may be found, or by registered mail addressed to the **Contractor** at its address as set forth in this **Contract**, or to such other address as the **Contractor** may provide to the **City** in writing; and

65.2.2 With respect to any action between the **City** and the **Contractor** in a New York State Court, the **Contractor** hereby expressly waives and relinquishes any rights it might otherwise have:

65.2.2(a) To move to dismiss on grounds of forum non conveniens;

65.2.2(b) To remove to Federal Court; and

65.2.2(c) To move for a change of venue to a New York State Court outside New York County.

65.2.3 With respect to any action brought by the **City** against the **Contractor** in a Federal Court located in the **City**, the **Contractor** expressly waives and relinquishes any right it might otherwise have to move to transfer the action to a Federal Court outside the **City**.

65.2.4 If the **Contractor** commences any action against the **City** in a court located other than in the **City** and County of New York, upon request of the **City**, the **Contractor** shall either consent to a transfer of the action to a New York State Court of competent jurisdiction located in the **City** and County of New York or, if the Court where the action is initially brought will not or cannot transfer the action, the **Contractor** shall consent to dismiss such action without prejudice and may thereafter reinstate the action in a New York State Court of competent jurisdiction in New York County.

65.3 If any provision(s) of this Article 65 is held unenforceable for any reason, each and all other provision(s) shall nevertheless remain in full force and effect.

## **ARTICLE 66. PARTICIPATION IN AN INTERNATIONAL BOYCOTT**

66.1 The **Contractor** agrees that neither the **Contractor** nor any substantially owned affiliated company is participating or shall participate in an international boycott in violation of the provisions of the Federal Export Administration Act of 1979, as amended, or the regulations of the United States Department of Commerce (Commerce Department) promulgated thereunder.

66.2 Upon the final determination by the Commerce Department or any other agency of the United States as to, or conviction of the **Contractor** or a substantially-owned affiliated company thereof for participation in an international boycott in violation of the provisions of the Export Administration Act of 1979, as amended, or the regulations promulgated thereunder, the **Comptroller** may, at his/her option, render forfeit and void this **Contract**.

66.3 The **Contractor** shall comply in all respects, with the provisions of Section 6-114 of the Administrative Code and the rules and regulations issued by the **Comptroller** thereunder.

## **ARTICLE 67. LOCALLY BASED ENTERPRISE PROGRAM**

67.1 This **Contract** is subject to the requirements of Section 6-108.1 of the Administrative Code and regulations promulgated thereunder. No construction contract shall be awarded unless and until these requirements have been complied with in their entirety; however, compliance with this Article 67 is not required if the Agency sets Subcontractor Participation Goals for Minority- and Women-Owned Business Enterprises (M/WBEs).

67.2 Unless specifically waived by the **Commissioner** with the approval of the Division of Economic and Financial Opportunity of the **City** Department of Business Services, if any portion of the **Contract** is subcontracted, not less than ten (10%) percent of the total dollar amount of the **Contract** shall be awarded to locally based enterprises (LBEs); except that where less than ten (10%) percent of the total dollar amount of the **Contract** is subcontracted, such lesser percentage shall be so awarded.

67.3 The **Contractor** shall not require performance and payment bonds from LBE **Subcontractors**.

67.4 If the **Contractor** has indicated prior to award that no **Work** will be subcontracted, no **Work** shall be subcontracted without the prior approval of the **Commissioner**, which shall be granted only if the **Contractor** makes a good faith effort beginning at least six (6) weeks before the **Work** is to be performed to obtain LBE **Subcontractors** to perform the **Work**.

67.5 If the **Contractor** has not identified sufficient LBE **Subcontractors** prior to award, it shall sign a letter of compliance stating that it complies with Section 6-108.1 of the Administrative Code, recognizes that achieving the LBE requirement is a condition of its **Contract**, and shall submit documentation demonstrating its good faith efforts to obtain LBEs. After award, the **Contractor** shall begin to solicit LBE's to perform subcontracted **Work** at least six (6) weeks before the date such **Work** is to be performed and shall demonstrate that a good faith effort has been made to obtain LBEs on each subcontract until it meets the required percentage.

67.6 Failure of the **Contractor** to comply with the requirements of Section 6-108.1 of the Administrative Code and the regulations promulgated thereunder shall constitute a material breach of this **Contract**. Remedy for such breach may include the imposition of any or all of the following sanctions:

67.6.1 Reducing the **Contractor's** compensation by an amount equal to the dollar value of the percentage of the LBE subcontracting requirement not complied with;

67.6.2 Declaring the **Contractor** in default;

67.6.3 If the **Contractor** is an LBE, de-certifying and declaring the **Contractor** ineligible to participate in the LBE program for a period of up to three (3) years.

## **ARTICLE 68. ANTITRUST**

68.1 The **Contractor** hereby assigns, sells, and transfers to the **City** all right, title, and interest in and to any claims and causes of action arising under the antitrust **Laws** of New York State or of the United States relating to the particular goods or services purchased or procured by the **City** under this **Contract**.

## **ARTICLE 69. MacBRIDE PRINCIPLES PROVISIONS**

### 69.1 Notice To All Prospective **Contractors**:

69.1.1 Local Law No. 34 of 1991 became effective on September 10, 1991 and added Section 6-115.1 of the Administrative Code. The local **Law** provides for certain restrictions on **City Contracts** to express the opposition of the people of the **City** to employment discrimination practices in Northern Ireland to promote freedom of work-place opportunity.

69.1.2 Pursuant to Section 6-115.1, prospective **Contractors** for **Contracts** to provide goods or services involving an expenditure of an amount greater than ten thousand (\$10,000.) dollars, or for construction involving an amount greater than fifteen thousand (\$15,000.) dollars, are asked to sign a rider in which they covenant and represent, as a material condition of their **Contract**, that any business operations in Northern Ireland conducted by the **Contractor** and any individual or legal entity in which the **Contractor** holds a ten (10%) percent or greater ownership interest in the **Contractor** will be conducted in accordance with the MacBride Principles of nondiscrimination in employment.

69.1.3 Prospective **Contractors** are not required to agree to these conditions. However, in the case of **Contracts** let by competitive sealed bidding, whenever the lowest responsible bidder has not agreed to stipulate to the conditions set forth in this notice and another bidder who has agreed to stipulate to such conditions has submitted a bid within five (5%) percent of the lowest responsible bid for a **Contract** to supply goods, services or contraction of comparable quality, the **Agency** shall refer such bids to the Mayor, the Speaker or other officials, as appropriate, who may determine, in accordance with applicable **Law**, that it is in the best interest of the **City** that the **Contract** be awarded to other than the lowest responsible pursuant to Section 313(b)(2) of the **City** Charter.

69.1.4 In the case of **Contracts** let by other than competitive sealed bidding, if a prospective **Contractor** does not agree to these conditions, no **Agency**, elected official or the **City** Council shall award the **Contract** to that bidder unless the **Agency** seeking to use the goods, services or construction certifies in writing that the **Contract** is necessary for the **Agency** to perform its functions and there is no other responsible **Contractor** who will supply goods, services or construction of comparable quality at a comparable price.

69.2 In accordance with Section 6-115.1 of the Administrative Code, the **Contractor** stipulates that such **Contractor** and any individual or legal entity in which the **Contractor** holds a ten (10%) percent or greater ownership interest in the **Contractor** either:

69.2.1 Have no business operations in Northern Ireland, or

69.2.2 Shall take lawful steps in good faith to conduct any business operations they have in Northern Ireland in accordance with the MacBride Principles, and shall permit independent monitoring of their compliance with such principles.

69.3 For purposes of this Article, the following terms shall have the following meanings:

69.3.1 “MacBride Principles” shall mean those principles relating to nondiscrimination in employment and freedom of work-place opportunity which require employers doing business in Northern Ireland to:

69.3.1(a) increase the representation of individuals from under-represented religious groups in the workforce, including managerial, supervisory, administrative, clerical and technical jobs;

69.3.1(b) take steps to promote adequate security for the protection of employees from under-represented religious groups both at the work-place and while traveling to and from **Work**;

69.3.1(c) ban provocative religious or political emblems from the workplace;

69.3.1(d) publicly advertise all job openings and make special recruitment efforts to attract applicants from under-represented religious groups;

69.3.1(e) establish layoff, recall, and termination procedures which do not in practice favor a particular religious group;

69.3.1(f) abolish all job reservations, apprenticeship restrictions and different employment criteria which discriminate on the basis of religion;

69.3.1(g) develop training programs that will prepare substantial numbers of current employees from under-represented religious groups for skilled jobs, including the expansion of existing programs and the creation of new programs to train, upgrade, and improve the skills of workers from under-represented religious groups;

69.3.1(h) establish procedures to assess, identify, and actively recruit employees from under-represented religious groups with potential for further advancement; and

69.3.1(i) appoint a senior management staff member to oversee affirmative action efforts and develop a timetable to ensure their full implementation.

69.4 The **Contractor** agrees that the covenants and representations in Article 69.2 are material conditions to this **Contract**. In the event the **Agency** receives information that the **Contractor** who made the stipulation required by this Article 69 is in violation thereof, the **Agency** shall review such information and give the **Contractor** an opportunity to respond. If the **Agency** finds that a violation has occurred, the **Agency** shall have the right to declare the **Contractor** in default and/or terminate this **Contract** for cause and procure supplies, services or **Work** from another source in the manner the **Agency** deems proper. In the event of such termination, the **Contractor** shall pay to the **Agency**, or the **Agency** in its sole discretion may withhold from any amounts otherwise payable to the **Contractor**, the difference between the **Contract** price for the uncompleted portion of this **Contract** and the cost to the **Agency** of completing performance of this **Contract** either itself or by engaging another **Contractor** or **Contractors**. In the case of a requirement **Contract**, the **Contractor** shall be liable for such difference in price for the entire amount of supplies required by the **Agency** for the uncompleted term of **Contractor's Contract**. In the case of a construction **Contract**, the **Agency** shall also have the right to hold the **Contractor** in partial or total default in accordance with the default provisions of this **Contract**, and/or may seek debarment or suspension of the **Contractor**. The rights and remedies of the **Agency** hereunder shall be in addition to, and not in lieu of, any rights and remedies the **Agency** has pursuant to this **Contract** or by operation of **Law**.

## **ARTICLE 70. ELECTRONIC FILING/NYC DEVELOPMENT HUB**

70.1 The **Contractor** shall electronically file all alteration type-2 and alteration type-3 applications via the New York City Development Hub Web site, except applications for the following types of minor alterations: enlargements, curb cuts, legalizations, fire alarms, builders pavement plans, and jobs filed on Landmark Preservation Commission calendared properties. All such filings must be professionally certified. Information about electronic filing via the New York City Development Hub is available on the City Department of Buildings Web site at [www.nyc.gov/buildings](http://www.nyc.gov/buildings).

## **ARTICLE 71. PROHIBITION OF TROPICAL HARDWOODS**

71.1 Tropical hardwoods, as defined in Section 165 of the New York State Finance Law (Finance Law), shall not be utilized in the performance of this **Contract** except as expressly permitted by Section 165 of the Finance Law.

## **ARTICLE 72. CONFLICTS OF INTEREST**

72.1 Section 2604 of the City Charter and other related provisions of the City Charter, the Administrative Code, and the Penal Law are applicable under the terms of this **Contract** in relation to conflicts of interest and shall be extended to **Subcontractors** authorized to perform **Work**, labor and services pursuant to this **Contract** and further, it shall be the duty and responsibility of the **Contractor** to so inform its respective **Subcontractors**. Notice is hereby given that, under certain circumstances, penalties may be invoked against the donor as well as the recipient of any form of valuable gift.

## **ARTICLE 73. MERGER CLAUSE**

73.1 The written **Contract** herein, contains all the terms and conditions agreed upon by the parties hereto, and no other agreement, oral or otherwise, regarding the subject matter of this **Contract** shall be deemed to exist or to bind any of the parties hereto, or to vary any of the terms contained herein.

## **ARTICLE 74. STATEMENT OF WORK**

74.1 The **Contractor** shall furnish all labor and materials and perform all **Work** in strict accordance with the **Specifications** and **Addenda** thereto, numbered as shown in Schedule A.

## **ARTICLE 75. COMPENSATION TO BE PAID TO CONTRACTOR**

75.1 The **City** will pay and the **Contractor** will accept in full consideration for the performance of the **Contract**, subject to additions and deductions as provided herein, the total sum shown in Schedule A, this said sum being the amount at which the **Contract** was awarded to the **Contractor** at a public letting thereof, based upon the **Contractor's** bid for the **Contract**.

## **ARTICLE 76. ELECTRONIC FUNDS TRANSFER**

76.1 In accordance with Section 6-107.1 of the Administrative Code, the **Contractor** agrees to accept payments under this **Contract** from the **City** by electronic funds transfer (EFT). An EFT is any

transfer of funds, other than a transaction originated by check, draft or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument or computer or magnetic tape so as to order, instruct or authorize a financial institution to debit or credit an account. Prior to the first payment made under this **Contract**, the **Contractor** shall designate one financial institution or other authorized payment agent and shall complete the attached “EFT Vendor Payment Enrollment Form” in order to provide the Commissioner of the **City** Department of Finance with information necessary for the **Contractor** to receive electronic funds transfer payments through a designated financial institution or authorized payment agent. The crediting of the amount of a payment to the appropriate account on the books of a financial institution or other authorized payment agent designated by the **Contractor** shall constitute full satisfaction by the **City** for the amount of the payment under this **Contract**. The account information supplied by the **Contractor** to facilitate the electronic funds transfer shall remain confidential to the fullest extent provided by **Law**.

76.2 The **Commissioner** may waive the application of the requirements of this Article 76 to payments on contracts entered into pursuant to Section 315 of the **City** Charter. In addition, the Commissioner of the Department of Finance and the Comptroller may jointly issue standards pursuant to which the **Agency** may waive the requirements of this Article 76 for payments in the following circumstances: (i) for individuals or classes of individuals for whom compliance imposes a hardship; (ii) for classifications or types of checks; or (iii) in other circumstances as may be necessary in the interest of the **City**.

#### **ARTICLE 77. RECORDS RETENTION**

77.1 The **Contractor** agrees to retain all books, records, and other documents relevant to this **Contract** for six years after the final payment or termination of this **Contract**, whichever is later. **City**, state, and federal auditors and any other persons duly authorized by the **City** shall have full access to and the right to examine any such books, records, and other documents during the retention period.

#### **ARTICLE 78. EXAMINATION AND VIEWING OF SITE, CONSIDERATION OF OTHER SOURCES OF INFORMATION AND CHANGED SITE CONDITIONS**

78.1 Pre-Bidding (Investigation) Viewing of Site – Bidders must carefully view and examine the **Site** of the proposed **Work**, as well as its adjacent area, and seek other usual sources of information, for they will be conclusively presumed to have full knowledge of any and all conditions and hazards on, about or above the **Site** relating to or affecting in any way the performance of the **Work** to be done under the **Contract** that were or should have been known by a reasonably prudent bidder. To arrange a date for visiting the **Site**, bidders are to contact the **Agency** contact person specified in the bid documents.

78.2 Should the **Contractor** encounter during the progress of the **Work** site conditions or environmental hazards at the **Site** materially differing from any shown on the **Contract Drawings** or indicated in the **Specifications** or such conditions or environmental hazards as could not reasonably have been anticipated by the **Contractor**, which conditions or hazards will materially affect the cost of the **Work** to be done under the **Contract**, the attention of the **Commissioner** must be called immediately to such conditions or hazards before they are disturbed. The **Commissioner** shall thereupon promptly investigate the conditions or hazards. If the **Commissioner** finds that they do so materially differ, and that they could not have been reasonably anticipated by the **Contractor**, the **Contract** may be modified with the **Commissioner**'s written approval.

**ARTICLE 79. PARTICIPATION BY MINORITY-OWNED AND WOMEN-OWNED  
BUSINESS ENTERPRISES IN CITY PROCUREMENT**

**NOTICE TO ALL PROSPECTIVE CONTRACTORS**

**ARTICLE I. M/WBE PROGRAM**

Local Law No. 129 of 2005 added and Local Law 1 of 2013 amended Section 6-129 of the Administrative Code of the City of New York (hereinafter “Section 6-129”). Section 6-129 establishes the program for participation in City procurement (“M/WBE Program”) by minority- owned business enterprises (“MBEs”) and women-owned business enterprises (“WBEs”), certified in accordance with Section 1304 of the New York City Charter. As stated in Section 6-129, the intent of the program is to address the impact of discrimination on the City’s procurement process, and to promote the public interest in avoiding fraud and favoritism in the procurement process, increasing competition for City business, and lowering contract costs. The contract provisions contained herein are pursuant to Section 6-129, and the rules of the Department of Small Business Services (“DSBS”) promulgated thereunder.

**If this Contract is subject to the M/WBE Program established by Section 6-129, the specific requirements of MBE and/or WBE participation for this Contract are set forth in Schedule B of the Contract (entitled the “M/WBE Utilization Plan”), and are detailed below. The Contractor must comply with all applicable MBE and WBE requirements for this Contract.**

All provisions of Section 6-129 are hereby incorporated in the Contract by reference and all terms used herein that are not defined herein shall have the meanings given such terms in Section 6-129. Article I, Part A, below, sets forth provisions related to the participation goals for construction, standard and professional services contracts. Article I, Part B, below, sets forth miscellaneous provisions related to the M/WBE Program.

**PART A**

**PARTICIPATION GOALS FOR CONSTRUCTION, STANDARD  
AND PROFESSIONAL SERVICES CONTRACTS OR TASK ORDERS**

1. The **MBE and/or WBE Participation Goals** established for this Contract or Task Orders issued pursuant to this Contract, (“**Participation Goals**”), as applicable, are set forth on Schedule B, Part I to this Contract (see Page 1, line 1 Total Participation Goals) or will be set forth on Schedule B, Part I to Task Orders issued pursuant to this Contract, as applicable.

The **Participation Goals** represent a percentage of the total dollar value of the Contract or Task Order, as applicable, that may be achieved by awarding subcontracts to firms certified with New York City Department of Small Business Services as MBEs and/or WBEs, and/or by crediting the participation of prime contractors and/or qualified joint ventures as provided in Section 3 below, unless the goals have been waived or modified by Agency in accordance with Section 6-129 and Part A, Sections 10 and 11 below, respectively.

2. If **Participation Goals** have been established for this Contract or Task Orders issued pursuant to this Contract, Contractor agrees or shall agree as a material term of the Contract that Contractor shall be subject to the **Participation Goals**, unless the goals are waived or modified by Agency in accordance with Section 6-129 and Part A, Sections 10 and 11 below, respectively.

3. If **Participation Goals** have been established for this Contract or Task Order issued pursuant to this Contract, a Contractor that is an MBE and/or WBE shall be permitted to count its own participation toward fulfillment of the relevant **Participation Goal**, provided that in accordance with Section 6-129 the value of Contractor's participation shall be determined by subtracting from the total value of the Contract or Task Order, as applicable, any amounts that the Contractor pays to direct subcontractors (as defined in Section 6-129(c)(13)), and provided further that a Contractor that is certified as both an MBE and a WBE may count its own participation either toward the goal for MBEs or the goal for WBEs, but not both.

A Contractor that is a qualified joint venture (as defined in Section 6-129(c)(30)) shall be permitted to count a percentage of its own participation toward fulfillment of the relevant **Participation Goal**. In accordance with Section 6-129, the value of Contractor's participation shall be determined by subtracting from the total value of the Contract or Task Order, as applicable, any amounts that Contractor pays to direct subcontractors, and then multiplying the remainder by the percentage to be applied to total profit to determine the amount to which an MBE or WBE is entitled pursuant to the joint venture agreement, provided that where a participant in a joint venture is certified as both an MBE and a WBE, such amount shall be counted either toward the goal for MBEs or the goal for WBEs, but not both.

4. A. If **Participation Goals** have been established for this Contract, a prospective contractor shall be required to submit with its bid or proposal, as applicable, a completed Schedule B, M/WBE Utilization Plan, Part II (see Pages 2-4) indicating: (a) whether the contractor is an MBE or WBE, or qualified joint venture; (b) the percentage of work it intends to award to direct subcontractors; and (c) in cases where the contractor intends to award direct subcontracts, a description of the type and dollar value of work designated for participation by MBEs and/or WBEs, and the time frames in which such work is scheduled to begin and end. In the event that this M/WBE Utilization Plan indicates that the bidder or proposer, as applicable, does not intend to meet the **Participation Goals**, the bid or proposal, as applicable, shall be deemed non-responsive, unless Agency has granted the bidder or proposer, as applicable, a pre- award waiver of the Participation Goals in accordance with Section 6-129 and Part A, Section 10 below.

B. (i) If this Contract is for a master services agreement or other requirements type contract that will result in the issuance of Task Orders that will be individually registered ("Master Services Agreement") and is subject to M/WBE **Participation Goals**, a prospective contractor shall be required to submit with its bid or proposal, as applicable, a completed Schedule B, M/WBE Participation Requirements for Master Services Agreements That Will Require Individually Registered Task Orders, Part II (page 2) indicating the prospective contractor's certification and required affirmations to make all reasonable good faith efforts to meet participation goals established on each individual Task Order issued pursuant to this Contract, or if a partial waiver is obtained or such goals are modified by the Agency, to meet the modified **Participation Goals** by soliciting and obtaining the participation of certified MBE and/or WBE firms. In the event that the Schedule B indicates that the bidder or proposer, as applicable, does not intend to meet the **Participation Goals** that may be established on Task Orders issued pursuant to this Contract, the bid or proposal, as applicable, shall be deemed nonresponsive.

(ii) **Participation Goals** on a Master Services Agreement will be established for individual Task Orders issued after the Master Services Agreement is awarded. If **Participation Goals** have been established on a Task Order, a contractor shall be required to submit a Schedule B – M/WBE Utilization Plan For Independently Registered Task Orders That Are Issued Pursuant to Master Services Agreements, Part II (see Pages 2-4) indicating: (a) whether the contractor is an MBE or WBE, or qualified joint venture; (b) the percentage of work it intends to award to direct subcontractors; and (c) in cases where the contractor intends to award direct subcontracts, a description of the type and dollar value of work designated for participation by MBEs and/or WBEs, and the time frames in which such work is scheduled to begin and end. The contractor must engage in good faith efforts to meet the **Participation Goals** as established for the Task Order unless Agency has granted the contractor a pre-award waiver of the Participation Goals in accordance with Section 6-129 and Part A, Section 10 below.

**C. THE BIDDER/PROPOSER MUST COMPLETE THE SCHEDULE B INCLUDED HEREIN (SCHEDULE B, PART II). A SCHEDULE B SUBMITTED BY THE BIDDER/PROPOSER WHICH DOES NOT INCLUDE THE VENDOR CERTIFICATION AND REQUIRED AFFIRMATIONS (SEE SECTION V OF PART II) WILL BE DEEMED TO BE NON-RESPONSIVE, UNLESS A FULL WAIVER OF THE PARTICIPATION GOALS IS GRANTED (SCHEDULE B, PART III). IN THE EVENT THAT THE CITY DETERMINES THAT THE BIDDER/PROPOSER HAS SUBMITTED A SCHEDULE B WHERE THE VENDOR CERTIFICATION AND REQUIRED AFFIRMATIONS ARE COMPLETED BUT OTHER ASPECTS OF THE SCHEDULE B ARE NOT COMPLETE, OR CONTAIN A COPY OR COMPUTATION ERROR THAT IS AT ODDS WITH THE VENDOR CERTIFICATION AND AFFIRMATIONS, THE BIDDER/PROPOSER WILL BE NOTIFIED BY THE AGENCY AND WILL BE GIVEN FOUR (4) CALENDAR DAYS FROM RECEIPT OF NOTIFICATION TO CURE THE SPECIFIED DEFICIENCIES AND RETURN A COMPLETED SCHEDULE B TO THE AGENCY. FAILURE TO DO SO WILL RESULT IN A DETERMINATION THAT THE BID/PROPOSAL IS NON-RESPONSIVE. RECEIPT OF NOTIFICATION IS DEFINED AS THE DATE NOTICE IS E-MAILED OR FAXED (IF THE BIDDER/PROPOSER HAS PROVIDED AN E-MAIL ADDRESS OR FAX NUMBER), OR NO LATER THAN FIVE (5) CALENDAR DAYS FROM THE DATE OF MAILING OR UPON DELIVERY, IF DELIVERED.**

5. Where an M/WBE Utilization Plan has been submitted, the Contractor shall, within 30 days of issuance by Agency of a notice to proceed, submit a list of proposed persons or entities to which it intends to award subcontracts within the subsequent 12 months. In the case of multiyear contracts, such list shall also be submitted every year thereafter. The Agency may also require the Contractor to report periodically about the contracts awarded by its direct subcontractors to indirect subcontractors (as defined in Section 6-129(c)(22)). **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5) (i.e., a contract valued at or below \$3M for projects in New York City) or if the Contract is subject to a project labor agreement in accordance with Labor Law §222, and the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades (plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring), the Contractor must identify all those to which it intends to award construction subcontracts for any portion of the Wicks trade work at the time of bid submission, regardless of what point in the life of the contract such subcontracts will occur. In identifying intended subcontractors in the bid submission, bidders may satisfy any Participation Goals established for this Contract by proposing one or more subcontractors that are MBEs and/or WBEs for any portion of the Wicks trade work. In the event that the Contractor's selection of a subcontractor is disapproved, the Contractor shall have a reasonable time to propose alternate subcontractors.**

6. MBE and WBE firms must be certified by DSBS in order for the Contractor to credit such firms' participation toward the attainment of the **Participation Goals**. Such certification must occur prior to the

firms' commencement of work. A list of MBE and WBE firms may be obtained from the DSBS website at [www.nyc.gov/buycertified](http://www.nyc.gov/buycertified), by emailing DSBS at [buyer@sbs.nyc.gov](mailto:buyer@sbs.nyc.gov), by calling (212) 513-6356, or by visiting or writing DSBS at 110 William St., New York, New York, 10038, 7th floor. Eligible firms that have not yet been certified may contact DSBS in order to seek certification by visiting [www.nyc.gov/getcertified](http://www.nyc.gov/getcertified), emailing [MWBE@sbs.nyc.gov](mailto:MWBE@sbs.nyc.gov), or calling the DSBS certification helpline at (212) 513-6311. A firm that is certified as both an MBE and a WBE may be counted either toward the goal for MBEs or the goal for WBEs, but not both. No credit shall be given for participation by a graduate MBE or graduate WBE, as defined in Section 6-129(c)(20).

7. Where an **M/WBE** Utilization Plan has been submitted, the Contractor shall, with each voucher for payment, and/or periodically as Agency may require, submit statements, certified under penalty of perjury, which shall include, but not be limited to,: the total amount the Contractor paid to its direct subcontractors, and, where applicable pursuant to Section 6-129(j), the total amount direct subcontractors paid to indirect subcontractors; the names, addresses and contact numbers of each MBE or WBE hired as a subcontractor by the Contractor, and, where applicable, hired by any of the Contractor's direct subcontractors; and the dates and amounts paid to each MBE or WBE. The Contractor shall also submit, along with its voucher for final payment: the total amount it paid to subcontractors, and, where applicable pursuant to Section 6-129(j), the total amount its direct subcontractors paid directly to their indirect subcontractors; and a final list, certified under penalty of perjury, which shall include the name, address and contact information of each subcontractor that is an MBE or WBE, the work performed by, and the dates and amounts paid to each.

8. If payments made to, or work performed by, MBEs or WBEs are less than the amount specified in the Contractor's **M/WBE** Utilization Plan, Agency shall take appropriate action, in accordance with Section 6-129 and Article II below, unless the Contractor has obtained a modification of its **M/WBE** Utilization Plan in accordance with Section 6-129 and Part A, Section 11 below.

9. Where an **M/WBE** Utilization Plan has been submitted, and the Contractor requests a change order the value of which exceeds the greater of 10 percent of the Contract or Task Order, as applicable, or \$500,000, Agency shall review the scope of work for the Contract or Task Order, as applicable, and the scale and types of work involved in the change order, and determine whether the **Participation Goals** should be modified.

10. Pre-award waiver of the **Participation Goals**. (a) A bidder or proposer, or contractor with respect to a Task Order, may seek a pre-award full or partial waiver of the **Participation Goals** in accordance with Section 6-129, which requests that Agency change one or more **Participation Goals** on the grounds that the **Participation Goals** are unreasonable in light of the availability of certified firms to perform the services required, or by demonstrating that it has legitimate business reasons for proposing a lower level of subcontracting in its M/WBE Utilization Plan.

(b) To apply for a full or partial waiver of the **Participation Goals**, a bidder, proposer, or contractor, as applicable, must complete Part III (Page 5) of Schedule B and submit such request no later than seven (7) calendar days prior to the date and time the bids, proposals, or Task Orders are due, in writing to the Agency by email at [poped@ddc.nyc.gov](mailto:poped@ddc.nyc.gov) or via facsimile at (718) 391-1886. Bidders, proposers, or contractors, as applicable, who have submitted requests will receive an Agency response by no later than two (2) calendar days prior to the due date for bids, proposals, or Task Orders; provided, however, that if that date would fall on a weekend or holiday, an Agency response will be provided by close-of-business on the business day before such weekend or holiday date.

(c) If the Agency determines that the **Participation Goals** are unreasonable in light of the availability of certified firms to perform the services required, it shall revise the solicitation and extend the deadline for bids and proposals, or revise the Task Order, as applicable.

(d) Agency may grant a full or partial waiver of the **Participation Goals** to a bidder, proposer or contractor, as applicable, who demonstrates—before submission of the bid, proposal or Task Order, as applicable—that it has legitimate business reasons for proposing the level of subcontracting in its **M/WBE Utilization Plan**. In making its determination, Agency shall consider factors that shall include, but not be limited to, whether the bidder, proposer or contractor, as applicable, has the capacity and the bona fide intention to perform the Contract without any subcontracting, or to perform the Contract without awarding the amount of subcontracts represented by the **Participation Goals**. In making such determination, Agency may consider whether the **M/WBE Utilization Plan** is consistent with past subcontracting practices of the bidder, proposer or contractor, as applicable, whether the bidder, proposer or contractor, as applicable, has made efforts to form a joint venture with a certified firm, and whether the bidder, proposer, or contractor, as applicable, has made good faith efforts to identify other portions of the Contract that it intends to subcontract.

11. Modification of **M/WBE Utilization Plan**. (a) A Contractor may request a modification of its **M/WBE Utilization Plan** after award of this Contract. **PLEASE NOTE: If this Contract is a public works project subject to GML §101(5) (i.e., a contract valued at or below \$3M for projects in New York City) or if the Contract is subject to a project labor agreement in accordance with Labor Law §222, and the bidder is required to identify at the time of bid submission its intended subcontractors for the Wicks trades (plumbing and gas fitting; steam heating, hot water heating, ventilating and air conditioning (HVAC); and electric wiring), the Contractor may request a Modification of its M/WBE Utilization Plan as part of its bid submission.** The Agency may grant a request for Modification of a Contractor's **M/WBE Utilization Plan** if it determines that the Contractor has established, with appropriate documentary and other evidence, that it made reasonable, good faith efforts to meet the **Participation Goals**. In making such determination, Agency shall consider evidence of the following efforts, as applicable, along with any other relevant factors:

- (i) The Contractor advertised opportunities to participate in the Contract, where appropriate, in general circulation media, trade and professional association publications and small business media, and publications of minority and women's business organizations;
- (ii) The Contractor provided notice of specific opportunities to participate in the Contract, in a timely manner, to minority and women's business organizations;
- (iii) The Contractor sent written notices, by certified mail or facsimile, in a timely manner, to advise MBEs or WBEs that their interest in the Contract was solicited;
- (iv) The Contractor made efforts to identify portions of the work that could be substituted for portions originally designated for participation by MBEs and/or WBEs in the **M/WBE Utilization Plan**, and for which the Contractor claims an inability to retain MBEs or WBEs;
- (v) The Contractor held meetings with MBEs and/or WBEs prior to the date their bids or proposals were due, for the purpose of explaining in detail the scope and requirements of the work for which their bids or proposals were solicited;
- (vi) The Contractor made efforts to negotiate with MBEs and/or WBEs as relevant to perform specific subcontracts, or act as suppliers or service providers;
- (vii) Timely written requests for assistance made by the Contractor to Agency's **M/WBE liaison officer** and to **DSBS**;
- (viii) Description of how recommendations made by **DSBS** and Agency were acted upon and an explanation of why action upon such recommendations did not lead to the desired level of participation of MBEs and/or WBEs.

Agency's **M/WBE officer** shall provide written notice to the Contractor of the determination.

(b) The Agency may modify the **Participation Goals** when the scope of the work has been changed by the Agency in a manner that affects the scale and types of work that the Contractor indicated in its **M/WBE Utilization Plan** would be awarded to subcontractors.

12. If this Contract is for an indefinite quantity of construction, standard or professional services or is a requirements type contract and the Contractor has submitted an **M/WBE** Utilization Plan and has committed to subcontract work to MBEs and/or WBEs in order to meet the **Participation Goals**, the Contractor will not be deemed in violation of the M/WBE Program requirements for this Contract with regard to any work which was intended to be subcontracted to an MBE and/or WBE to the extent that the Agency has determined that such work is not needed.

13. If **Participation Goals** have been established for this Contract or a Task Order issued pursuant to this Contract, at least once annually during the term of the Contract or Task Order, as applicable, Agency shall review the Contractor's progress toward attainment of its M/WBE Utilization Plan, including but not limited to, by reviewing the percentage of work the Contractor has actually awarded to MBE and/or WBE subcontractors and the payments the Contractor made to such subcontractors.

14. If **Participation Goals** have been established for this Contract or a Task Order issued pursuant to this Contract, Agency shall evaluate and assess the Contractor's performance in meeting those goals, and such evaluation and assessment shall become part of the Contractor's overall contract performance evaluation.

### **PART B: MISCELLANEOUS**

1. The Contractor shall take notice that, if this solicitation requires the establishment of an **M/WBE** Utilization Plan, the resulting contract may be audited by DSBS to determine compliance with Section 6-129. See §6-129(e)(10). Furthermore, such resulting contract may also be examined by the City's Comptroller to assess compliance with the **M/WBE** Utilization Plan.

2. Pursuant to DSBS rules, construction contracts that include a requirement for an **M/WBE** Utilization Plan shall not be subject to the law governing Locally Based Enterprises set forth in Section 6-108.1 of the Administrative Code of the City of New York.

3. DSBS is available to assist contractors and potential contractors in determining the availability of MBEs and/or WBEs to participate as subcontractors, and in identifying opportunities that are appropriate for participation by MBEs and/or WBEs in contracts.

4. Prospective contractors are encouraged to enter into qualified joint venture agreements with MBEs and/or WBEs as defined by Section 6-129(c)(30).

5. By submitting a bid or proposal the Contractor hereby acknowledges its understanding of the M/WBE Program requirements set forth herein and the pertinent provisions of Section 6-129, and any rules promulgated thereunder, and if awarded this Contract, the Contractor hereby agrees to comply with the M/WBE Program requirements of this Contract and pertinent provisions of Section 6-129, and any rules promulgated thereunder, all of which shall be deemed to be material terms of this Contract. The Contractor hereby agrees to make all reasonable, good faith efforts to solicit and obtain the participation of MBEs and/or WBEs to meet the required **Participation Goals**.

### **ARTICLE II. ENFORCEMENT**

1. If Agency determines that a bidder or proposer, as applicable, has, in relation to this procurement, violated Section 6-129 or the DSBS rules promulgated pursuant to Section 6-129, Agency may disqualify such bidder or proposer, as applicable, from competing for this Contract and the Agency may revoke such bidder's or proposer's prequalification status, if applicable.

2. Whenever Agency believes that the Contractor or a subcontractor is not in compliance with Section 6-129 or the DSBS rules promulgated pursuant to Section 6-129, or any provision of this Contract that implements Section 6-129, including, but not limited to any **M/WBE** Utilization Plan, Agency shall send a written notice to the Contractor describing the alleged noncompliance and offering the Contractor an opportunity to be heard. Agency shall then conduct an investigation to determine whether such Contractor or subcontractor is in compliance.

3. In the event that the Contractor has been found to have violated Section 6-129, the DSBS rules promulgated pursuant to Section 6-129, or any provision of this Contract that implements Section 6-129, including, but not limited to, any **M/WBE** Utilization Plan, Agency may determine that one of the following actions should be taken:

- (a) entering into an agreement with the Contractor allowing the Contractor to cure the violation;
- (b) revoking the Contractor's pre-qualification to bid or make proposals for future contracts;
- (c) making a finding that the Contractor is in default of the Contract;
- (d) terminating the Contract;
- (e) declaring the Contractor to be in breach of Contract;
- (f) withholding payment or reimbursement;
- (g) determining not to renew the Contract;
- (h) assessing actual and consequential damages;
- (i) assessing liquidated damages or reducing fees, provided that liquidated damages may be based on amounts representing costs of delays in carrying out the purposes of the M/WBE Program, or in meeting the purposes of the Contract, the costs of meeting utilization goals through additional procurements, the administrative costs of investigation and enforcement, or other factors set forth in the Contract;
- (j) exercising rights under the Contract to procure goods, services or construction from another contractor and charge the cost of such contract to the Contractor that has been found to be in noncompliance; or
- (k) taking any other appropriate remedy.

4. If an **M/WBE** Utilization Plan has been submitted, and pursuant to this Article II, Section 3, the Contractor has been found to have failed to fulfill its **Participation Goals** contained in its **M/WBE** Utilization Plan or the **Participation Goals** as modified by Agency pursuant to Article I, Part A, Section 11, Agency may assess liquidated damages in the amount of ten percent (10%) of the difference between the dollar amount of work required to be awarded to MBE and/or WBE firms to meet the **Participation Goals** and the dollar amount the Contractor actually awarded and paid, and/or credited, to MBE and/or WBE firms. In view of the difficulty of accurately ascertaining the loss which the City will suffer by reason of Contractor's failure to meet the **Participation Goals**, the foregoing amount is hereby fixed and agreed as the liquidated damages that the City will suffer by reason of such failure, and not as a penalty. Agency may deduct and retain out of any monies which may become due under this Contract the amount of any such liquidated damages; and in case the amount which may become due under this Contract shall be less than the amount of liquidated damages suffered by the City, the Contractor shall be liable to pay the difference.

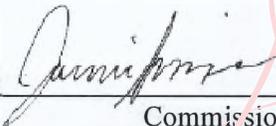

5. Whenever Agency has reason to believe that an MBE and/or WBE is not qualified for certification, or is participating in a contract in a manner that does not serve a commercially useful function (as defined in Section 6-129(c)(8)), or has violated any provision of Section 6-129, Agency shall notify the Commissioner of DSBS who shall determine whether the certification of such business enterprise should be revoked.

6. Statements made in any instrument submitted to Agency pursuant to Section 6-129 shall be submitted under penalty of perjury and any false or misleading statement or omission shall be grounds for the application of any applicable criminal and/or civil penalties for perjury. The making of a false or fraudulent statement by an MBE and/or WBE in any instrument submitted pursuant to Section 6-129 shall, in addition, be grounds for revocation of its certification.

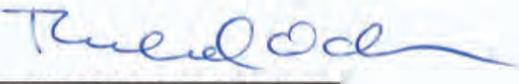

7. The Contractor's record in implementing its **M/WBE** Utilization Plan shall be a factor in the evaluation of its performance. Whenever Agency determines that a Contractor's compliance with an **M/WBE** Utilization Plan has been unsatisfactory, Agency shall, after consultation with the City Chief Procurement Officer, file an advice of caution form for inclusion in VENDEX as caution data.

IN WITNESS WHEREOF, the Commissioner, on behalf of the City of New York, and the Contractor, have executed this agreement in quadruplicate, two parts of which are to remain with the Commissioner, another to be filed with the Comptroller of the City, and the fourth to be delivered to the Contractor.

a copy of which Contract is annexed to and hereby made a part of this bond as though herein set forth in full;

**NOW, THEREFORE**, the conditions of this obligation are such that if the Principal, his or its representatives or assigns, shall well and faithfully perform the said Contract and all modifications, amendments, additions and alterations thereto that may hereafter be made, according to its terms and its true intent and meaning, including repair and or replacement of defective work and guarantees of maintenance for the periods stated in the Contract, and shall fully indemnify and save harmless the City from all cost and damage which it may suffer by reason of the Principal’s default of the Contract, and shall fully reimburse and repay the City for all outlay and expense which the City may incur in making

**Performance Bond #1 (Pages 100 to 103): Use if the total contract price is \$5 Million Or Less. Performance Bond #1 has been approved by the U.S. Small Business Administration (“SBA”) for participation in its Bond Guarantee Program.**

PERFORMANCE BOND #1 (Page 2)

good any such default and shall protect the said City of New York against, and pay any and all amounts, damages, cost and judgments which may or shall be recovered against said City or its officers or agents or which the said City of New York may be called upon to pay any person or corporation by reason of any damages arising or growing out of the Principal's default of the Contract, then this obligation shall be null and void, otherwise to remain in full force and effect.

The Surety (Sureties), for value received, hereby stipulates and agrees, upon written notice from the City that the City has determined that the Principal is in default of the Contract, to (1) pay the City the cost to complete the contract as determined by the City in excess of the balance of the Contract held by the City, plus any damages or costs to which the City is entitled, up to the full amount of the above penal sum, (2) fully perform and complete the Work to be performed under the Contract, pursuant to the terms, conditions, and covenants thereof, or (3) tender a completion Contractor that is acceptable to the City. The Surety (Sureties) further agrees, at its option, either to notify the City that it elects to pay the city the cost of completion plus any applicable damages and costs under option (1) above, or to commence and diligently perform the Work specified in the Contract, including physical site work, within twenty-five (25) business days after written notice thereof from the City and, if the Surety elects to fully perform and complete the Work, then to complete all Work within the time set forth in the Contract or such other time as agreed to between the City and Surety in accordance with the Contract. If the Surety elects to tender payment pursuant to (1) above, then the Surety shall tender such amount within fifteen (15) business days notification from the City of the cost of completion. The Surety and the City reserve all rights and defenses each may have against the other; provided, however, that the Surety expressly agrees that its reservation of rights shall not provide a basis for non-performance of its obligation to pay the City the cost of completion, to commence and complete all Work as provided herein, or to tender a completion contractor.

The Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties) and its bond shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or to the said Contract or the Work to be performed thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or any moneys due or to become due thereunder; and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, and waivers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to subcontractors shall have the same effect as to said Surety (Sureties) as though done or omitted to be done by or in relation to said Principal. Notwithstanding the above, if the City makes payments to the Principal before the time required by the contract that in the aggregate exceed \$100,000 or 10% of the Contract price, whichever is less, and that have not become earned prior to the Principal being found to be in default, then all payments made to the Principal before the time required by the Contract shall be added to the remaining contract value available to be paid for the completion of the Contract as if such sums had not been paid to the Principal, but shall not provide a basis for non-performance of its obligation to pay the City the cost of completion, to commence and to complete all Work as provided herein, or to tender a completion contractor.

**KNOW ALL PERSONS BY THESE PRESENTS:,**

That we, IPC Resiliency Partners

1010 Northern Blvd., Suite 200, Great Neck, NY 11021

hereinafter referred to as the "Principal,"  
and, Liberty Mutual Insurance Company, of 175 Berkeley St., Boston, MA 02116

Continental Casualty Company, of 151 N. Franklin Street, Chicago, IL 60606 and

Federal Insurance Company, of 202B Hall's Mill Road, P.O. Box 1650, Whitehouse Station, NJ 08889-1600

hereinafter referred to as the "Surety" ("Sureties") are held and firmly bound to THE CITY OF NEW YORK, hereinafter referred to as the "City" or to its successors and assigns in the penal sum of \_\_\_\_\_

Six Hundred Thirty Six Million One Hundred Ten Thousand Five Hundred Fifty and 00/100

(\$ 636,110,550.00 ) Dollars, lawful money of the United States for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

**WHEREAS,** the Principal is about to enter, or has entered, into a Contract in writing with the City for

FMS ID: SANDRESM1, E-PIN: 85021B0024001, DDC PIN: 8502021RC0001C, Installation of East Side Coastal Resiliency

from Montgomery Street to East 15th Street - Borough of Manhattan

a copy of which Contract is annexed to and hereby made a part of this bond as though herein set forth in full;

**NOW, THEREFORE,** the conditions of this obligation are such that if the Principal, his or its representatives or assigns, shall well and faithfully perform the said Contract and all modifications, amendments, additions and alterations thereto that may hereafter be made, according to its terms and its true intent and meaning, including repair and or replacement of defective work and guarantees of maintenance for the periods stated in the Contract, and shall fully indemnify and save harmless the City from all cost and damage which it may suffer by reason of the Principal's default of the Contract, and shall fully reimburse and repay the City for all outlay and expense which the City may incur in making

**Performance Bond #2 (Pages 104 to 107): Use if the total contract price is more than \$5 Million.**

PERFORMANCE BOND #2 (Page 2)

good any such default and shall protect the said City of New York against, and pay any and all amounts, damages, cost and judgments which may or shall be recovered against said City or its officers or agents or which the said City of New York may be called upon to pay any person or corporation by reason of any damages arising or growing out of the Principal's default of the Contract, then this obligation shall be null and void, otherwise to remain in full force and effect.

The Surety (Sureties), for value received, hereby stipulates and agrees, upon written notice from the City that the City has determined that the Principal is in default of the Contract, to either (1) pay the full amount of the above penal sum in complete discharge and exoneration of this bond and of all the liabilities of the Surety relating to this bond, or (2) fully perform and complete the Work to be performed under the Contract, pursuant to the terms, conditions, and covenants thereof. The Surety (Sureties) further agrees, at its option, either to tender the penal sum or to commence and diligently perform the Work specified in the Contract, including physical site work, within twenty-five (25) business days after written notice thereof from the City and to complete all Work within the time set forth in the Contract or such other time as agreed to between the City and Surety in accordance with the Contract. The Surety and the City reserve all rights and defenses each may have against the other; provided, however, that the Surety expressly agrees that its reservation of rights shall not provide a basis for non-performance of its obligation to commence and to complete all Work as provided herein.

The Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties) and its bond shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or to the said Contract or the Work to be performed thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or by any assignment, subletting or other transfer thereof or of any Work to be performed or any moneys due or to become due thereunder; and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, waivers, assignments, subcontracts and transfers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to assignees, subcontractors, and other transferees shall have the same effect as to said Surety (Sureties) as though done or omitted to be done by or in relation to said Principal.

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV - OFFICERS: Section 12. Power of Attorney.

Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII - Execution of Contracts: Section 5. Surety Bonds and Undertakings.

Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation - The President of the Company, acting pursuant to the Bylaws of the Company, authorizes David M. Carey, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization - By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 3rd day of June, 2021.

By: Renee C. Llewellyn
Renee C. Llewellyn, Assistant Secretary

Form F6853-4/2012

## Authorizing By-Laws and Resolutions

ADOPTED BY THE BOARD OF DIRECTORS OF CONTINENTAL CASUALTY COMPANY:

This Power of Attorney is made and executed pursuant to and by authority of the following resolution duly adopted by the Board of Directors of the Company at a meeting held on May 12, 1995:

"RESOLVED: That any Senior or Group Vice President may authorize an officer to sign specific documents, agreements and instruments on behalf of the Company provided that the name of such authorized officer and a description of the documents, agreements or instruments that such officer may sign will be provided in writing by the Senior or Group Vice President to the Secretary of the Company prior to such execution becoming effective."

This Power of Attorney is signed by Paul T. Bruffat, Vice President, who has been authorized pursuant to the above resolution to execute power of attorneys on behalf of Continental Casualty Company.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company by unanimous written consent dated the 25<sup>th</sup> day of April, 2012:

"Whereas, the bylaws of the Company or specific resolution of the Board of Directors has authorized various officers (the "Authorized Officers") to execute various policies, bonds, undertakings and other obligatory instruments of like nature; and

Whereas, from time to time, the signature of the Authorized Officers, in addition to being provided in original, hard copy format, may be provided via facsimile or otherwise in an electronic format (collectively, "Electronic Signatures"); Now therefore be it resolved: that the Electronic Signature of any Authorized Officer shall be valid and binding on the Company. "

ADOPTED BY THE BOARD OF DIRECTORS OF NATIONAL FIRE INSURANCE COMPANY OF HARTFORD:

This Power of Attorney is made and executed pursuant to and by authority of the following resolution duly adopted by the Board of Directors of the Company by unanimous written consent dated May 10, 1995:

"RESOLVED: That any Senior or Group Vice President may authorize an officer to sign specific documents, agreements and instruments on behalf of the Company provided that the name of such authorized officer and a description of the documents, agreements or instruments that such officer may sign will be provided in writing by the Senior or Group Vice President to the Secretary of the Company prior to such execution becoming effective."

This Power of Attorney is signed by Paul T. Bruffat, Vice President, who has been authorized pursuant to the above resolution to execute power of attorneys on behalf of National Fire Insurance Company of Hartford.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company by unanimous written consent dated the 25<sup>th</sup> day of April, 2012:

"Whereas, the bylaws of the Company or specific resolution of the Board of Directors has authorized various officers (the "Authorized Officers") to execute various policies, bonds, undertakings and other obligatory instruments of like nature; and

Whereas, from time to time, the signature of the Authorized Officers, in addition to being provided in original, hard copy format, may be provided via facsimile or otherwise in an electronic format (collectively, "Electronic Signatures"); Now therefore be it resolved: that the Electronic Signature of any Authorized Officer shall be valid and binding on the Company. "

ADOPTED BY THE BOARD OF DIRECTORS OF AMERICAN CASUALTY COMPANY OF READING, PENNSYLVANIA:

This Power of Attorney is made and executed pursuant to and by authority of the following resolution duly adopted by the Board of Directors of the Company by unanimous written consent dated May 10, 1995:

"RESOLVED: That any Senior or Group Vice President may authorize an officer to sign specific documents, agreements and instruments on behalf of the Company provided that the name of such authorized officer and a description of the documents, agreements or instruments that such officer may sign will be provided in writing by the Senior or Group Vice President to the Secretary of the Company prior to such execution becoming effective."

This Power of Attorney is signed by Paul T. Bruffat, Vice President, who has been authorized pursuant to the above resolution to execute power of attorneys on behalf of American Casualty Company of Reading, Pennsylvania.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company by unanimous written consent dated the 25<sup>th</sup> day of April, 2012:

"Whereas, the bylaws of the Company or specific resolution of the Board of Directors has authorized various officers (the "Authorized Officers") to execute various policies, bonds, undertakings and other obligatory instruments of like nature; and

Whereas, from time to time, the signature of the Authorized Officers, in addition to being provided in original, hard copy format, may be provided via facsimile or otherwise in an electronic format (collectively, "Electronic Signatures"); Now therefore be it resolved: that the Electronic Signature of any Authorized Officer shall be valid and binding on the Company. CERTIFICATION

Resolutions adopted by the Boards of Directors of FEDERAL INSURANCE COMPANY, VIGILANT INSURANCE COMPANY, and PACIFIC INDEMNITY COMPANY on August 30, 2016; WESTCHESTER FIRE INSURANCE COMPANY on December 11, 2006; and ACE AMERICAN INSURANCE COMPANY on March 20, 2009:

"RESOLVED, that the following authorizations relate to the execution, for and on behalf of the Company, of bonds, undertakings, recognizances, contracts and other written commitments of the Company entered into in the ordinary course of business (each a "Written Commitment"):

- (1) Each of the Chairman, the President and the Vice Presidents of the Company is hereby authorized to execute any Written Commitment for and on behalf of the Company, under the seal of the Company or otherwise.
(2) Each duly appointed attorney-in-fact of the Company is hereby authorized to execute any Written Commitment for and on behalf of the Company, under the seal of the Company or otherwise, to the extent that such action is authorized by the grant of powers provided for in such person's written appointment as such attorney-in-fact.
(3) Each of the Chairman, the President and the Vice Presidents of the Company is hereby authorized, for and on behalf of the Company, to appoint in writing any person the attorney-in-fact of the Company with full power and authority to execute, for and on behalf of the Company, under the seal of the Company or otherwise, such Written Commitments of the Company as may be specified in such written appointment, which specification may be by general type or class of Written Commitments or by specification of one or more particular Written Commitments.
(4) Each of the Chairman, the President and the Vice Presidents of the Company is hereby authorized, for and on behalf of the Company, to delegate in writing to any other officer of the Company the authority to execute, for and on behalf of the Company, under the Company's seal or otherwise, such Written Commitments of the Company as are specified in such written delegation, which specification may be by general type or class of Written Commitments or by specification of one or more particular Written Commitments.
(5) The signature of any officer or other person executing any Written Commitment or appointment or delegation pursuant to this Resolution, and the seal of the Company, may be affixed by facsimile on such Written Commitment or written appointment or delegation.

FURTHER RESOLVED, that the foregoing Resolution shall not be deemed to be an exclusive statement of the powers and authority of officers, employees and other persons to act for and on behalf of the Company, and such Resolution shall not limit or otherwise affect the exercise of any such power or authority otherwise validly granted or vested."

I, Dawn M. Chloros, Assistant Secretary of FEDERAL INSURANCE COMPANY, VIGILANT INSURANCE COMPANY, PACIFIC INDEMNITY COMPANY, WESTCHESTER FIRE INSURANCE COMPANY and ACE AMERICAN INSURANCE COMPANY (the "Companies") do hereby certify that

- (i) the foregoing Resolutions adopted by the Board of Directors of the Companies are true, correct and in full force and effect,
(ii) the foregoing Power of Attorney is true, correct and in full force and effect.

Given under my hand and seals of said Companies at Whitehouse Station, NJ, this June 3, 2021

PAYMENT BOND (Page 1)

PAYMENT BOND

KNOW ALL PERSONS BY THESE PRESENTS, That we, \_\_\_\_\_

IPC Resiliency Partners

1010 Northern Blvd., Suite 200, Great Neck, NY 11021

hereinafter referred to as the "Principal", and \_\_\_\_\_

Liberty Mutual Insurance Company, of 175 Berkeley St., Boston, MA 02116

Continental Casualty Company, of 151 N. Franklin Street, Chicago, IL 60606 and

Federal Insurance Company, 202B Hall's Mill Road, P.O. Box 1650, Whitehouse Station, NJ 08889-1600

hereinafter referred to as the "Surety" ("Sureties") are held and firmly bound to THE CITY OF NEW YORK, hereinafter referred to as the "City" or to its successors and assigns, in the penal sum of

One Billion Two Hundred Seventy Two Million Two Hundred Twenty One Thousand One Hundred

and 00/100

(\$1,272,221,100.00) Dollars, lawful money of the United States, for the payment of which said sum of money well and truly to be made, we, and each of us, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal is about to enter, or has entered, into a Contract in writing with the City for

FMS ID: SANDRESM1, E-PIN: 85021B0024001, DDC PIN: 8502021RC0001C, Installation of East Side Coastal Resiliency

from Montgomery Street to East 15th Street - Borough of Manhattan

a copy of which Contract is annexed to and hereby made a part of this bond as though herein set forth in full;

NOW, THEREFORE, the conditions of this obligation are such that if the Principal, his or its representatives or assigns and other Subcontractors to whom Work under this Contract is sublet and his or their successors and assigns shall promptly pay or cause to be paid all lawful claims for

(a) Wages and compensation for labor performed and services rendered by all persons engaged in the prosecution of the Work under said Contract, and any amendment or extension thereof or addition thereto, whether such persons be agents servants or employees of the Principal or any such Subcontractor, including all persons so engaged who perform the work of laborers or mechanics at or in the vicinity of the site

**Payment Bond (Pages 108 to 111): Use for any contract for which a Payment Bond is required.**

PAYMENT BOND (Page 2)

of the Project regardless of any contractual relationship between the Principal or such Subcontractors, or his or their successors or assigns, on the one hand and such laborers or mechanics on the other, but not including office employees not regularly stationed at the site of the project; and

(b) Materials and supplies (whether incorporated in the permanent structure or not), as well as teams, fuels, oils, implements or machinery furnished, used or consumed by said Principal or any subcontractor at or in the vicinity of the site of the Project in the prosecution of the Work under said Contract and any amendment or extension thereof or addition thereto; then this obligation shall be void, otherwise to remain in full force and effect.

This bond is subject to the following additional conditions, limitations and agreements:

(a) The Principal and Surety (Sureties) agree that this bond shall be for the benefit of any materialmen or laborer having a just claim, as well as the City itself.

(b) All persons who have performed labor, rendered services or furnished materials and supplies, as aforesaid, shall have a direct right of action against the Principal and his, its or their successors and assigns, and the Surety (Sureties) herein, or against either or both or any of them and their successors and assigns. Such persons may sue in their own name, and may prosecute the suit to judgment and execution without the necessity of joining with any other persons as party plaintiff.

(c) The Principal and Surety (Sureties) agree that neither of them will hold the City liable for any judgment for costs of otherwise, obtained by either or both of them against a laborer or materialman in a suit brought by either a laborer or materialman under this bond for moneys allegedly due for performing work or furnishing material.

(d) The Surety (Sureties) or its successors and assigns shall not be liable for any compensation recoverable by an employee or laborer under the Workmen's Compensation Law.

(e) In no event shall the Surety (Sureties), or its successors or assigns, be liable for a greater sum than the penalty of this bond or be subject to any suit, action or proceeding hereon that is instituted by any person, firm, or corporation hereunder later than two years after the complete performance of said Contract and final settlement thereof.

The Principal, for himself and his successors and assigns, and the Surety (Sureties), for itself and its successors and assigns, do hereby expressly waive any objection that might be interposed as to the right of the City to require a bond containing the foregoing provisions, and they do hereby further expressly waive any defense which they or either of them might interpose to an action brought hereon by any person, firm or corporation, including subcontractors, materialmen and third persons, for work, labor, services, supplies or material performed rendered, or furnished as aforesaid upon the ground that there is no law authorizing the City to require the foregoing provisions to be placed in this bond.

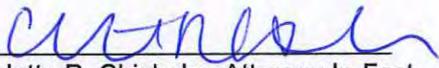

And the Surety (Sureties), for value received, for itself and its successors and assigns, hereby stipulates and agrees that the obligation of said Surety (Sureties), and its bonds shall be in no way impaired or affected by any extension of time, modification, omission, addition, or change in or of the said Contract or the work to be performed thereunder, or by any payment thereunder before the time required therein, or by any waiver of any provisions thereof, or by any assignment, subletting or other transfer thereof or of any part thereof, or of any Work to be performed, or any moneys due to become due thereunder and said Surety (Sureties) does hereby waive notice of any and all of such extensions, modifications, omissions, additions, changes, payments, waivers, assignments, subcontracts and transfers, and hereby expressly stipulates and agrees that any and all things done and omitted to be done by and in relation to assignees, Subcontractors, and other transferees shall have the same effect as to said Surety (Sureties) as though done or omitted to be done or in relation to said Principal.

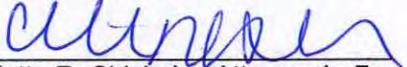

**Payment Bond (Pages 108 to 111): Use for any contract for which a Payment Bond is required.**

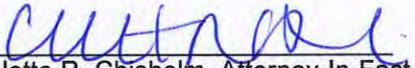

PAYMENT BOND (Page 3)

IN WITNESS WHEREOF, the Principal and the Surety (Sureties) have hereunto set their hands and seals, and such of them as are corporations have caused their corporate seals to be hereunto affixed and these presents to be signed by their proper officers, this 3rd day of June, 2021.

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV - OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII - Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation - The President of the Company, acting pursuant to the Bylaws of the Company, authorizes David M. Carey, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization - By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 3rd day of June, 2021.

By: [Signature of Renee C. Llewellyn]

Renee C. Llewellyn, Assistant Secretary

**POWER OF ATTORNEY APPOINTING INDIVIDUAL ATTORNEY-IN-FACT**

**Know All Men By These Presents**, That Continental Casualty Company, an Illinois insurance company, National Fire Insurance Company of Hartford, an Illinois insurance company, and American Casualty Company of Reading, Pennsylvania, a Pennsylvania insurance company (herein called "the CNA Companies"), are duly organized and existing insurance companies having their principal offices in the City of Chicago, and State of Illinois, and that they do by virtue of the signatures and seals herein affixed hereby make, constitute and appoint

**Camille Maitland, Gerard S Macholz, Susan Lupski, Robert T Pearson, Rita Losquadro, Thomas Bean, Desiree Cardlin, Vincent A Walsh, George O Brewster, Colette R Chisholm, Dana Granice, Michelle Wannamaker, Katherine Acosta, Individually**

of Uniondale, NY, their true and lawful Attorney(s)-in-Fact with full power and authority hereby conferred to sign, seal and execute for and on their behalf bonds, undertakings and other obligatory instruments of similar nature

**- In Unlimited Amounts -**

and to bind them thereby as fully and to the same extent as if such instruments were signed by a duly authorized officer of their insurance companies and all the acts of said Attorney, pursuant to the authority hereby given is hereby ratified and confirmed.

This Power of Attorney is made and executed pursuant to and by authority of the By-Law and Resolutions, printed on the reverse hereof, duly adopted, as indicated, by the Boards of Directors of the insurance companies.

**In Witness Whereof**, the CNA Companies have caused these presents to be signed by their Vice President and their corporate seals to be hereto affixed on this 23rd day of March, 2020.

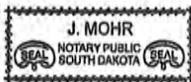

Continental Casualty Company  
National Fire Insurance Company of Hartford  
American Casualty Company of Reading, Pennsylvania

Paul T. Bruflat Vice President

State of South Dakota, County of Minnehaha, ss:

On this 23rd day of March, 2020, before me personally came Paul T. Bruflat to me known, who, being by me duly sworn, did depose and say: that he resides in the City of Sioux Falls, State of South Dakota; that he is a Vice President of Continental Casualty Company, an Illinois insurance company, National Fire Insurance Company of Hartford, an Illinois insurance company, and American Casualty Company of Reading, Pennsylvania, a Pennsylvania insurance company described in and which executed the above instrument; that he knows the seals of said insurance companies; that the seals affixed to the said instrument are such corporate seals; that they were so affixed pursuant to authority given by the Boards of Directors of said insurance companies and that he signed his name thereto pursuant to like authority, and acknowledges same to be the act and deed of said insurance companies.

My Commission Expires June 23, 2021

J. Mohr Notary Public

**CERTIFICATE**

I, D. Johnson, Assistant Secretary of Continental Casualty Company, an Illinois insurance company, National Fire Insurance Company of Hartford, an Illinois insurance company, and American Casualty Company of Reading, Pennsylvania, a Pennsylvania insurance company do hereby certify that the Power of Attorney herein above set forth is still in force, and further certify that the By-Law and Resolution of the Board of Directors of the insurance companies printed on the reverse hereof is still in force. In testimony whereof I have hereunto subscribed my name and affixed the seal of the said insurance companies this 3rd day of June, 2021.

Continental Casualty Company  
National Fire Insurance Company of Hartford  
American Casualty Company of Reading, Pennsylvania

D. Johnson Assistant Secretary

Form F6853-4/2012

## Authorizing By-Laws and Resolutions

ADOPTED BY THE BOARD OF DIRECTORS OF CONTINENTAL CASUALTY COMPANY:

This Power of Attorney is made and executed pursuant to and by authority of the following resolution duly adopted by the Board of Directors of the Company at a meeting held on May 12, 1995:

"RESOLVED: That any Senior or Group Vice President may authorize an officer to sign specific documents, agreements and instruments on behalf of the Company provided that the name of such authorized officer and a description of the documents, agreements or instruments that such officer may sign will be provided in writing by the Senior or Group Vice President to the Secretary of the Company prior to such execution becoming effective."

This Power of Attorney is signed by Paul T. Bruffat, Vice President, who has been authorized pursuant to the above resolution to execute power of attorneys on behalf of Continental Casualty Company.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company by unanimous written consent dated the 25<sup>th</sup> day of April, 2012:

"Whereas, the bylaws of the Company or specific resolution of the Board of Directors has authorized various officers (the "Authorized Officers") to execute various policies, bonds, undertakings and other obligatory instruments of like nature; and

Whereas, from time to time, the signature of the Authorized Officers, in addition to being provided in original, hard copy format, may be provided via facsimile or otherwise in an electronic format (collectively, "Electronic Signatures"); Now therefore be it resolved: that the Electronic Signature of any Authorized Officer shall be valid and binding on the Company. "

ADOPTED BY THE BOARD OF DIRECTORS OF NATIONAL FIRE INSURANCE COMPANY OF HARTFORD:

This Power of Attorney is made and executed pursuant to and by authority of the following resolution duly adopted by the Board of Directors of the Company by unanimous written consent dated May 10, 1995:

"RESOLVED: That any Senior or Group Vice President may authorize an officer to sign specific documents, agreements and instruments on behalf of the Company provided that the name of such authorized officer and a description of the documents, agreements or instruments that such officer may sign will be provided in writing by the Senior or Group Vice President to the Secretary of the Company prior to such execution becoming effective."

This Power of Attorney is signed by Paul T. Bruffat, Vice President, who has been authorized pursuant to the above resolution to execute power of attorneys on behalf of National Fire Insurance Company of Hartford.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company by unanimous written consent dated the 25<sup>th</sup> day of April, 2012:

"Whereas, the bylaws of the Company or specific resolution of the Board of Directors has authorized various officers (the "Authorized Officers") to execute various policies, bonds, undertakings and other obligatory instruments of like nature; and

Whereas, from time to time, the signature of the Authorized Officers, in addition to being provided in original, hard copy format, may be provided via facsimile or otherwise in an electronic format (collectively, "Electronic Signatures"); Now therefore be it resolved: that the Electronic Signature of any Authorized Officer shall be valid and binding on the Company. "

ADOPTED BY THE BOARD OF DIRECTORS OF AMERICAN CASUALTY COMPANY OF READING, PENNSYLVANIA:

This Power of Attorney is made and executed pursuant to and by authority of the following resolution duly adopted by the Board of Directors of the Company by unanimous written consent dated May 10, 1995:

"RESOLVED: That any Senior or Group Vice President may authorize an officer to sign specific documents, agreements and instruments on behalf of the Company provided that the name of such authorized officer and a description of the documents, agreements or instruments that such officer may sign will be provided in writing by the Senior or Group Vice President to the Secretary of the Company prior to such execution becoming effective."

This Power of Attorney is signed by Paul T. Bruffat, Vice President, who has been authorized pursuant to the above resolution to execute power of attorneys on behalf of American Casualty Company of Reading, Pennsylvania.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company by unanimous written consent dated the 25<sup>th</sup> day of April, 2012:

"Whereas, the bylaws of the Company or specific resolution of the Board of Directors has authorized various officers (the "Authorized Officers") to execute various policies, bonds, undertakings and other obligatory instruments of like nature; and

Whereas, from time to time, the signature of the Authorized Officers, in addition to being provided in original, hard copy format, may be provided via facsimile or otherwise in an electronic format (collectively, "Electronic Signatures"); Now therefore be it resolved: that the Electronic Signature of any Authorized Officer shall be valid and binding on the Company. CERTIFICATION

Resolutions adopted by the Boards of Directors of FEDERAL INSURANCE COMPANY, VIGILANT INSURANCE COMPANY, and PACIFIC INDEMNITY COMPANY on August 30, 2016; WESTCHESTER FIRE INSURANCE COMPANY on December 11, 2006; and ACE AMERICAN INSURANCE COMPANY on March 20, 2009:

"RESOLVED, that the following authorizations relate to the execution, for and on behalf of the Company, of bonds, undertakings, recognizances, contracts and other written commitments of the Company entered into in the ordinary course of business (each a "Written Commitment"):

- (1) Each of the Chairman, the President and the Vice Presidents of the Company is hereby authorized to execute any Written Commitment for and on behalf of the Company, under the seal of the Company or otherwise.
(2) Each duly appointed attorney-in-fact of the Company is hereby authorized to execute any Written Commitment for and on behalf of the Company, under the seal of the Company or otherwise, to the extent that such action is authorized by the grant of powers provided for in such person's written appointment as such attorney-in-fact.
(3) Each of the Chairman, the President and the Vice Presidents of the Company is hereby authorized, for and on behalf of the Company, to appoint in writing any person the attorney-in-fact of the Company with full power and authority to execute, for and on behalf of the Company, under the seal of the Company or otherwise, such Written Commitments of the Company as may be specified in such written appointment, which specification may be by general type or class of Written Commitments or by specification of one or more particular Written Commitments.
(4) Each of the Chairman, the President and the Vice Presidents of the Company is hereby authorized, for and on behalf of the Company, to delegate in writing to any other officer of the Company the authority to execute, for and on behalf of the Company, under the Company's seal or otherwise, such Written Commitments of the Company as are specified in such written delegation, which specification may be by general type or class of Written Commitments or by specification of one or more particular Written Commitments.
(5) The signature of any officer or other person executing any Written Commitment or appointment or delegation pursuant to this Resolution, and the seal of the Company, may be affixed by facsimile on such Written Commitment or written appointment or delegation.

FURTHER RESOLVED, that the foregoing Resolution shall not be deemed to be an exclusive statement of the powers and authority of officers, employees and other persons to act for and on behalf of the Company, and such Resolution shall not limit or otherwise affect the exercise of any such power or authority otherwise validly granted or vested."

I, Dawn M. Chloros, Assistant Secretary of FEDERAL INSURANCE COMPANY, VIGILANT INSURANCE COMPANY, PACIFIC INDEMNITY COMPANY, WESTCHESTER FIRE INSURANCE COMPANY and ACE AMERICAN INSURANCE COMPANY (the "Companies") do hereby certify that

- (i) the foregoing Resolutions adopted by the Board of Directors of the Companies are true, correct and in full force and effect,
(ii) the foregoing Power of Attorney is true, correct and in full force and effect.

Given under my hand and seals of said Companies at Whitehouse Station, NJ, this June 3, 2021

Re: SANDRESM1  
Excess Liability Tower – Lloyd's of London Policies

To Whom It May Concern:

This letter is to confirm that Lloyd's of London (AA1122000) is A, XV Rated on A.M. Best. There are not individual ratings for each of the Lloyd's of London Syndicates, as they all share the same A, XV Rating. The Syndicates are searchable on A.M. Best, but all are assigned a rating of NR (Not Rated).

- Lloyd's Syndicate 3334 (Hamilton Managing Agency Limited) AA1120113
- Lloyd's Syndicate 4444 (Canopus Managing Agents Limited) AA1126004
- Lloyd's Syndicate 2488 (Chubb Underwriting Agencies Limited) AA1128488

The Lloyd's of London Syndicates do not have NAIC Codes. They use Alien Insurer Identification Numbers (AIIN) in place of NAIC. The Syndicates are Excess & Surplus (E&S) carriers at the top of the \$200mm Excess Tower. The General Liability and all Excess Liability policies have Limits that reinstate twice throughout the Project term.

Should you have any questions, please feel free to contact me.

Sincerely,

*Paul Maloney*

Paul Maloney

## Additional Instructions for Form DB-120.1

By signing this form, the insurance carrier identified in Box 3 on this form is certifying that it is insuring the business referenced in box "1a" for disability and/or paid family leave benefits under the New York State Disability and Paid Family Leave Benefits Law. The Insurance Carrier or its licensed agent will send this Certificate of Insurance to the entity listed as the certificate holder in Box 2.

The insurance carrier must notify the above certificate holder and the Workers' Compensation Board within 10 days IF a policy is cancelled due to nonpayment of premiums or within 30 days IF there are reasons other than nonpayment of premiums that cancel the policy or eliminate the insured from coverage indicated on this Certificate. (These notices may be sent by regular mail.) Otherwise, this Certificate is valid for one year after this form is approved by the insurance carrier or its licensed agent, or until the policy expiration date listed in Box 3c, whichever is earlier

This certificate is issued as a matter of information only and confers no rights upon the certificate holder. This certificate does not amend, extend or alter the coverage afforded by the policy listed, nor does it confer any rights or responsibilities beyond those contained in the referenced policy.

This certificate may be used as evidence of a Disability and/or Paid Family Leave Benefits contract of insurance only while the underlying policy is in effect.

**Please Note: Upon the cancellation of the disability and/or paid family leave benefits policy indicated on this form, if the business continues to be named on a permit, license or contract issued by a certificate holder, the business must provide that certificate holder with a new Certificate of NYS Disability and/or Paid Family Leave Benefits Coverage or other authorized proof that the business is complying with the mandatory coverage requirements of the New York State Disability and Paid Family Leave Benefits Law.**

### DISABILITY AND PAID FAMILY LEAVE BENEFITS LAW

#### §220. Subd. 8

(a) The head of a state or municipal department, board, commission or office authorized or required by law to issue any permit for or in connection with any work involving the employment of employees in employment as defined in this article, and notwithstanding any general or special statute requiring or authorizing the issue of such permits, shall not issue such permit unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits and after January first, two thousand and twenty-one, the payment of family leave benefits for all employees has been secured as provided by this article. Nothing herein, however, shall be construed as creating any liability on the part of such state or municipal department, board, commission or office to pay any disability benefits to any such employee if so employed.

(b) The head of a state or municipal department, board, commission or office authorized or required by law to enter into any contract for or in connection with any work involving the employment of employees in employment as defined in this article and notwithstanding any general or special statute requiring or authorizing any such contract, shall not enter into any such contract unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits and after January first, two thousand eighteen, the payment of family leave benefits for all employees has been secured as provided by this article.

CERTIFICATE OF NYS WORKERS' COMPENSATION INSURANCE COVERAGE

1a. Legal Name & Address of Insured (use street address only)
IPC Resiliency Partners
1010 Northern Blvd., Suite 200
Great Neck, NY 11021
Work Location of Insured (Only required if coverage is specifically limited to certain locations in New York State, i.e., a Wrap-Up Policy)
1b. Business Telephone Number of Insured
718-554-2800
1c. NYS Unemployment Insurance Employer Registration Number of Insured
1d. Federal Employer Identification Number of Insured or Social Security Number
86-1934841
2. Name and Address of Entity Requesting Proof of Coverage (Entity Being Listed as the Certificate Holder)
City of New York Department of Design and Construction
30 30 Thomas Avenue
Long Island City, NY 11101
3a. Name of Insurance Carrier
Zurich American Insurance Company
3b. Policy Number of Entity Listed in Box "1a"
WC 4329659-00
3c. Policy effective period
06/03/2021 to 06/03/2022
3d. The Proprietor, Partners or Executive Officers are
[X] included. (Only check box if all partners/officers included)
[ ] all excluded or certain partners/officers excluded.

This certifies that the insurance carrier indicated above in box "3" insures the business referenced above in box "1a" for workers' compensation under the New York State Workers' Compensation Law. (To use this form, New York (NY) must be listed under Item 3A on the INFORMATION PAGE of the workers' compensation insurance policy). The Insurance Carrier or its licensed agent will send this Certificate of Insurance to the entity listed above as the certificate holder in box "2".

The insurance carrier must notify the above certificate holder and the Workers' Compensation Board within 10 days IF a policy is canceled due to nonpayment of premiums or within 30 days IF there are reasons other than nonpayment of premiums that cancel the policy or eliminate the insured from the coverage indicated on this Certificate. (These notices may be sent by regular mail.) Otherwise, this Certificate is valid for one year after this form is approved by the insurance carrier or its licensed agent, or until the policy expiration date listed in box "3c", whichever is earlier.

This certificate is issued as a matter of information only and confers no rights upon the certificate holder. This certificate does not amend, extend or alter the coverage afforded by the policy listed, nor does it confer any rights or responsibilities beyond those contained in the referenced policy.

This certificate may be used as evidence of a Workers' Compensation contract of insurance only while the underlying policy is in effect.

Please Note: Upon cancellation of the workers' compensation policy indicated on this form, if the business continues to be named on a permit, license or contract issued by a certificate holder, the business must provide that certificate holder with a new Certificate of Workers' Compensation Coverage or other authorized proof that the business is complying with the mandatory coverage requirements of the New York State Workers' Compensation Law.

Under penalty of perjury, I certify that I am an authorized representative or licensed agent of the insurance carrier referenced above and that the named insured has the coverage as depicted on this form.

Approved by: Paul Maloney
(Print name of authorized representative or licensed agent of insurance carrier)
Approved by: Paul Maloney 06/04/2021
(Signature) (Date)
Title: Assistant Account Manager

Telephone Number of authorized representative or licensed agent of insurance carrier: 516-414-8613

Please Note: Only insurance carriers and their licensed agents are authorized to issue Form C-105.2. Insurance brokers are NOT authorized to issue it.

## **Workers' Compensation Law**

### **Section 57. Restriction on issue of permits and the entering into contracts unless compensation is secured.**

1. The head of a state or municipal department, board, commission or office authorized or required by law to issue any permit for or in connection with any work involving the employment of employees in a hazardous employment defined by this chapter, and notwithstanding any general or special statute requiring or authorizing the issue of such permits, shall not issue such permit unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that compensation for all employees has been secured as provided by this chapter. Nothing herein, however, shall be construed as creating any liability on the part of such state or municipal department, board, commission or office to pay any compensation to any such employee if so employed.
2. The head of a state or municipal department, board, commission or office authorized or required by law to enter into any contract for or in connection with any work involving the employment of employees in a hazardous employment defined by this chapter, notwithstanding any general or special statute requiring or authorizing any such contract, shall not enter into any such contract unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that compensation for all employees has been secured as provided by this chapter.

(NO TEXT ON THIS PAGE)

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
CONSTRUCTION WORKER PREVAILING WAGE SCHEDULE

**LABOR LAW ARTICLE 8 - NYC PUBLIC WORKS**

Workers, Laborers and Mechanics employed on a public work project must receive not less than the prevailing rate of wage and benefits for the classification of work performed by each upon such public work. Pursuant to Labor Law Article 8 the Comptroller of the City of New York has promulgated this schedule solely for Workers, Laborers and Mechanics engaged by private contractors on New York City public work projects. Prevailing rates are required to be annexed to and form part of the public work contract pursuant to § 220 (3).

This schedule is a compilation of separate determinations of the prevailing rate of wage and supplements made by the Comptroller for each trade classification listed herein pursuant to New York State Labor Law section § 220 (5). The source of the wage and supplement rates, whether a collective bargaining agreement, survey data or other, is listed at the end of each classification.

Agency Chief Contracting Officers should contact the Bureau of Labor Law's Classification Unit with any questions concerning trade classifications, prevailing rates or prevailing practices with respect to procurement on New York City public work contracts. Contractors are advised to review the Comptroller's Prevailing Wage Schedule before bidding on public work contracts. Contractors with questions concerning trade classifications, prevailing rates or prevailing practices with respect to public work contracts in the procurement stage must contact the contracting agency responsible for the procurement.

Any error as to compensation under the prevailing wage law or other information as to trade classification, made by the contracting agency in the contract documents or in any other communication, will not preclude a finding against the contractor of prevailing wage violation.

Any questions concerning trade classifications, prevailing rates or prevailing practices on New York City public work contracts that have already been awarded may be directed to the Bureau of Labor Law's Classification Unit by calling (212) 669-4443. All callers must have the agency name and contract registration number available when calling with questions on public work contracts. Please direct all other compliance issues to: Bureau of Labor Law, Attn: Wasyl Kinach, P.E., Office of the Comptroller, 1 Centre Street, Room 651, New York, N.Y. 10007; Fax (212) 669-4002.

The appropriate schedule of prevailing wages and benefits must be posted at all public work sites pursuant to Labor Law § 220 (3-a) (a).

This schedule is applicable to work performed during the effective period, unless otherwise noted. Changes to this schedule are published on our web site [comptroller.nyc.gov/wages](http://comptroller.nyc.gov/wages). Contractors must pay the wages and supplements in effect when the worker, laborer, mechanic performs the work. Preliminary schedules for future one-year periods appear in the City Record on or about June 1 each succeeding year. Final schedules appear on or about July 1 in the City Record and on our web site [comptroller.nyc.gov/wages](http://comptroller.nyc.gov/wages).

The Comptroller's Office has attempted to include all overtime, shift and night differential, Holiday, Saturday, Sunday or other premium time work. However, this schedule does not set forth every prevailing practice with respect to such rates with which employers must comply. All such practices are nevertheless part of the employer's prevailing wage obligation and contained in the collective bargaining agreements of the prevailing wage unions. These collective bargaining agreements are available for inspection by appointment. Requests for appointments may be made by calling (212) 669-4443, Monday through Friday between the hours of 9 a.m. and 5 p.m.

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
CONSTRUCTION WORKER PREVAILING WAGE SCHEDULE

Prevailing rates and ratios for apprentices are published in the Construction Apprentice Prevailing Wage Schedule. Pursuant to Labor Law § 220 (3-e), only apprentices who are individually registered in a bona fide program to which the employer contractor is a participant, registered with the New York State Department of Labor, may be paid at the apprentice rates. Apprentices who are not so registered must be paid as journey persons.

New York City public work projects awarded pursuant to a Project Labor Agreement (“PLA”) in accordance with Labor Law section 222 may have different labor standards for shift, premium and overtime work. Please refer to the PLA’s pre-negotiated labor agreements for wage and benefit rates applicable to work performed outside of the regular workday. More information is available at the Mayor’s Office of Contract Services (MOCS) web page at:

<https://www1.nyc.gov/site/mocs/legal-forms/project-labor-agreements.page>

All the provisions of Labor Law Article 8 remain applicable to PLA work including, but not limited to, the enforcement of prevailing wage requirements by the Comptroller in accordance with the trade classifications in this schedule; however, we will enforce shift, premium, overtime and other non-standard rates as they appear in a project’s pre-negotiated labor agreement.

In order to meet their obligation to provide prevailing supplemental benefits to each covered employee, employers must either:

- 1) Provide bona fide fringe benefits which cost the employer no less than the prevailing supplemental benefits rate; or
- 2) Supplement the employee’s hourly wage by an amount no less than the prevailing supplemental benefits rate; or
- 3) Provide a combination of bona fide fringe benefits and wage supplements which cost the employer no less than the prevailing supplemental benefits rate in total.

Although prevailing wage laws do not require employers to provide bona fide fringe benefits (as opposed to wage supplements) to their employees, other laws may. For example, the Employee Retirement Income Security Act, 29 U.S.C. § 1001 et seq., the Patient Protection and Affordable Care Act, 42 U.S.C. § 18001 et seq., and the New York City Paid Sick Leave Law, N.Y.C. Admin. Code § 20-911 et seq., require certain employers to provide certain benefits to their employees. Labor agreements to which employers are a party may also require certain benefits. The Comptroller’s Office does not enforce these laws or agreements.

**Employers must provide prevailing supplemental benefits at the straight time rate for each hour worked unless otherwise noted in the classification.**

**Paid Holidays, Vacation and Sick Leave when listed must be paid or provided in addition to the prevailing hourly supplemental benefit rate.**

For more information, please refer to the Comptroller’s Prevailing Wage Law Regulations in Title 44 of the Rules of the City of New York, Chapter 2, available at [comptroller.nyc.gov/wages](http://comptroller.nyc.gov/wages).

## ENGINEER

### Engineer - Heavy Construction Operating Engineer I

Cherry pickers 20 tons and over and Loaders (rubber tired and/or tractor type with a manufacturer's minimum rated capacity of six cubic yards and over).

Effective Period: 7/1/2019 - 6/30/2020

Wage Rate per Hour: \$70.71

Supplemental Benefit Rate per Hour: \$39.74

Supplemental Note: \$72.08 on overtime

Shift Wage Rate: \$113.14

### Engineer - Heavy Construction Operating Engineer II

Backhoes, Basin Machines, Groover, Mechanical Sweepers, Bobcat, Boom Truck, Barrier Transport (Barrier Mover) & machines of similar nature. Operation of Churn Drills and machines of a similar nature, Stetco Silent Hoist and machines of similar nature, Vac-Alls, Meyers Machines, John Beam and machines of a similar nature, Ross Carriers and Travel Lifts and machines of a similar nature, Bulldozers, Scrapers and Turn-a-Pulls: Tugger Hoists (Used exclusively for handling excavated material); Tractors with attachments, Hyster and Roustabout Cranes, Cherry pickers. Austin Western, Grove and machines of a similar nature, Scoopmobiles, Monorails, Conveyors, Trenchers: Loaders-Rubber Tired and Tractor: Barber Greene and Eimco Loaders and Eimco Backhoes; Mighty Midget and similar breakers and Tampers, Curb and Gutter Pavers and Motor Patrol, Motor Graders and all machines of a similar nature. Locomotives 10 Tons or under. Mini-Max, Break-Tech and machines of a similar nature; Milling machines, robotic and demolition machines and machines of a similar nature, shot blaster, skid steer machines and machines of a similar nature including bobcat, pile rig rubber-tired excavator (37,000 lbs. and under), 2 man auger.

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
CONSTRUCTION WORKER PREVAILING WAGE SCHEDULE

Effective Period: 7/1/2019 - 6/30/2020

Wage Rate per Hour: **\$68.58**

Supplemental Benefit Rate per Hour: **\$39.74**

Supplemental Note: \$72.08 on overtime

Shift Wage Rate: **\$109.73**

**Engineer - Heavy Construction Operating Engineer III**

Minor Equipment such as Tractors, Post Hole Diggers, Ditch Witch (Walk Behind), Road Finishing Machines, Rollers five tons and under, Tugger Hoists, Dual Purpose Trucks, Fork Lifts, and Dempsey Dumpers, Fireperson.

Effective Period: 7/1/2019 - 6/30/2020

Wage Rate per Hour: **\$65.00**

Supplemental Benefit Rate per Hour: **\$39.74**

Supplemental Note: \$72.08 on overtime

Shift Wage Rate: **\$104.00**

**Engineer - Heavy Construction Maintenance Engineer I**

Installing, Repairing, Maintaining, Dismantling and Manning of all equipment including Steel Cutting, Bending and Heat Sealing Machines, Mechanical Heaters, Grout Pumps, Bentonite Pumps & Plants, Screening Machines, Fusion Coupling Machines, Tunnel Boring Machines Moles and Machines of a similar nature, Power Packs, Mechanical Hydraulic Jacks; all drill rigs including but not limited to Churn, Rotary Caisson, Raised Bore & Drills of a similar nature; Personnel, Inspection & Safety Boats or any boats used to perform functions of same, Mine Hoists, Whirlies, all Climbing Cranes, all Tower Cranes, including but not limited to Truck Mounted and Crawler Type and machines of similar nature; Maintaining Hydraulic Drills and machines of a similar nature; Well Point System-Installation and dismantling; Burning, Welding, all Pumps regardless of size and/or motor power, except River Cofferdam Pumps and Wells Point Pumps; Motorized Buggies (three or more); equipment used in the cleaning and televising of sewers, but not limited to jet-rodder/vacuum truck, vacall/vactor, closed circuit television inspection equipment; high powered water pumps, jet pumps; screed machines and concrete finishing machines of a similar nature; vermeers.

Effective Period: 7/1/2019 - 6/30/2020

Wage Rate per Hour: **\$68.25**

Supplemental Benefit Rate per Hour: **\$39.74**

Supplemental Note: \$72.08 on overtime

Shift Wage Rate: **\$109.20**

**Engineer - Heavy Construction Maintenance Engineer II**

On Base Mounted Tower Cranes

Effective Period: 7/1/2019 - 6/30/2020

Wage Rate per Hour: **\$90.00**

Supplemental Benefit Rate per Hour: **\$39.74**

Supplemental Note: \$72.08 on overtime

Shift Wage Rate: **\$144.00**

**Engineer - Heavy Construction Maintenance Engineer III**

OFFICE OF THE COMPTROLLER, CITY OF NEW YORK  
CONSTRUCTION WORKER PREVAILING WAGE SCHEDULE

On Generators, Light Towers

## METALLIC LATHER

### Metallic Lather

Effective Period: 7/1/2019 - 6/30/2020

Wage Rate per Hour: **\$46.23**

Supplemental Benefit Rate per Hour: **\$46.67**

Supplemental Note: Overtime Supplemental Benefit rate - \$57.92

### Overtime Description

Overtime would be time and one half the regular rate after a seven (7) or eight (8) hours workday, which would be set at the start of the job.

### Overtime

Time and one half the regular rate for Saturday.

Double time the regular rate for Sunday.

### Overtime Holidays

Double time the regular rate for work on the following holiday(s).

New Year's Day

Washington's Birthday

Memorial Day

Independence Day

Labor Day

Columbus Day

Thanksgiving Day

Christmas Day

### Paid Holidays

1/2 day on Christmas Eve if work is performed in the A.M.

1/2 day on New Year's Eve if work is performed in the A.M.

### Shift Rates

There will be no shift differential paid on the first shift if more than one shift is employed. The shift differential will remain \$12/hour on the second and third shift for the first eight (8) hours if worked. There will be no pyramiding on overtime worked on second and third shifts. The time and one half (1.5x) rate will be against the base wage rate, not the shift differential

## **Shift Rates**

When two shifts are employed, the work period for each shift shall be a continuous eight (8) hours. When three shifts are employed, each shift will work seven and one half (7 ½) hours but will be paid for eight (8) hours since only one half (1/2) hour is allowed for meal time.

When two or more shifts are employed, single time will be paid for each shift.

Night Work - On night work, the first eight (8) hours of work will be paid for at the single time rate, except that production paving work shall be paid at 10% over the single time rate for the screed person, rakers and shovelers directly involved only. This differential is to be paid when there is only one shift and the shift works at night. All other workers will be exempt. Hours worked over eight (8) hours during said shift shall be paid for at the time and one-half rate.

**WELDER**

**TO BE PAID AT THE RATE OF THE JOURNEYPERSON IN THE TRADE  
PERFORMING THE WORK.**

**OFFICE OF THE COMPTROLLER**

**CITY OF NEW YORK**

**CONSTRUCTION APPRENTICE  
PREVAILING WAGE SCHEDULE**

Pursuant to Labor Law § 220 (3-e), only apprentices who are individually registered in a bona fide program to which the employer contractor is a participant and registered with the New York State Department of Labor, may be paid at the apprentice rates in this schedule. Apprentices who are not so registered must be paid as journey persons in accordance with the trade classification of the work they actually performed.

Apprentice ratios are established to ensure the proper safety, training and supervision of apprentices. A ratio establishes the number of journey workers required for each apprentice in a program and on a job site. Ratios are interpreted as follows: in the case of a 1:1, 1:4 ratio, there must be one journey worker for the first apprentice, and four additional journey workers for each subsequent apprentice.

MEMORANDUM

November 6, 2000

To Agency Chief Contracting Officers

From: Leonard A. Mancusi *[Signature]*

Re: Security at Construction Sites

Prior to the enactment of Administrative Code §6-109, security guards on construction sites were not subject to prevailing wages. Security guards under the New York State labor law are covered under §230 which provides that prevailing wages are to be paid for security guards in existing buildings. §6-109 of the Administrative Code which was enacted in 1996 closed this loophole by including all security guards working pursuant to a city contract as a prevailing wage trade.

Although some construction contract boilerplate language has been amended to include §6-109, sub-contractors performing security services have advised us that they were not aware of this provision and, since traditionally, security guards were not a covered trade on construction sites, and they were not advised by a prime contractor that they would have to pay prevailing wages, they have not been doing so.

To avoid the possibility of issuing stop payments against prime contractors for the failure of their security service sub-contractors to pay

*prevailing wages, we suggest that you write to all your existing security guard sub-contractors and their primes and in the future, upon approval of a security guard sub-contractor, advise the contractors of their obligation to pay prevailing wages under §6-109 of the Administrative Code.*

*As always, your cooperation is appreciated.*

<p style="text-align: center;"><b><u>CONTRACT ARTICLE 75.</u></b> <b><u>COMPENSATION TO BE PAID TO CONTRACTOR</u></b></p> <p>The <b>City</b> shall pay and the <b>Contractor</b> shall accept in full consideration for the performance of the <b>Contract</b>, subject to additions and deductions as provided herein, the total sum <b>shown in the column to the right</b>, being the amount at which the <b>Contract</b> was awarded to the <b>Contractor</b> at a public letting thereof, based upon the <b>Contractor's</b> bid for the <b>Contract</b>.</p>	<p>Amount for which the <b>Contract</b> was Awarded: _____ _____ Dollars (\$ _____)</p>

<p align="center"><b><u>CONTRACT ARTICLE 79.</u></b>  <b><u>PARTICIPATION BY MINORITY-OWNED AND</u></b>  <b><u>WOMEN-OWNED BUSINESS ENTERPRISES IN CITY</u></b>  <b><u>PROCUREMENT</u></b></p>	<p>See M/WBE Utilization Plan in the Bid Booklet</p>
<p align="center"><b><u>STANDARD HIGHWAY SPECIFICATIONS</u></b>  <b><u>SECTION 6.40</u></b>  <b><u>LIQUIDATED DAMAGES FOR ENGINEER'S FIELD</u></b>  <b><u>OFFICE</u></b></p> <p>If the Contractor fails to satisfactorily provide the field office and all equipment specified in <b>Section 6.40 - Engineer's Field Office</b>, and/or if a cited deficiency exceed seventy two (72) hours after notice from the Engineer in writing, or is permitted to recur, liquidated damages will be assessed in the amount specified herein for each subsequent calendar day or part thereof that a cited deficiency resulting in nonpayment, as described in <b>Section 6.40.5</b>, is not corrected.</p>	<p>\$ <u>500.00</u> for each calendar day of deficiency</p>
<p align="center"><b><u>STANDARD HIGHWAY SPECIFICATIONS</u></b>  <b><u>SECTION 6.70</u></b>  <b><u>LIQUIDATED DAMAGES FOR MAINTENANCE AND</u></b>  <b><u>PROTECTION OF TRAFFIC</u></b></p>	<p>\$ <u>250.00</u> for each instance of failure to comply with the Maintenance and Protection of Traffic requirements within three (3) hours after written notice from the Engineer.</p> <p>\$ <u>500.00</u> for each and every hour of failing to open the entire width of roadway to traffic the morning following a night/weekend work operation.</p>
<p align="center"><b><u>STANDARD HIGHWAY SPECIFICATIONS</u></b>  <b><u>SECTION 7.13</u></b>  <b><u>LIQUIDATED DAMAGES FOR</u></b>  <b><u>MAINTENANCE OF SITE</u></b></p> <p>If the Contractor fails to comply, within three (3) consecutive hours after written notice from the Engineer, with the requirements of <b>Section 7.13 - Maintenance of Site</b>, the Contractor shall pay to the City of New York, until such notice has been complied with or rescinded, the sum specified above per calendar day, for each instance of such failure, as liquidated damages and not as a penalty, for such default.</p>	<p>\$ <u>6,000.00</u> for each calendar day, for each occurrence</p>

**Date for Substantial Completion (Reference: Article 14)**

The Contractor shall substantially complete the Work within the Final Contract Duration determined in accordance with the terms and conditions set forth herein.

The Base Contract Duration for this project is 1,826 consecutive calendar days ("ccds").

The Final Contract Duration shall be the Base Contract Duration when a check mark is indicated before the word "NO", below, and shall be the Base Contract Duration adjusted by the table set forth below when a check mark is indicated before the word "YES", below.

           YES                        √   NO

When the Final Contract Duration is indicated above to be adjusted by the table below, the table may increase the Base Contract Duration depending on the date of scheduled substantial completion to avoid a scheduled substantial completion of the Work during the winter months. The date of scheduled substantial completion shall be determined by adding the Base Contract Duration to the date specified to commence work in the written Notice to Proceed. The Final Contract Duration shall then be determined as follows:

- (a) Find the row that corresponds to the month of substantial completion based on the Base Contract Duration added to the date specified to commence work in the written Notice to Proceed.
- (b) Find the number of days to be added to the Base Contract Duration in the table below. Add that number of days to the Base Contract Duration to obtain the Final Contract Duration in consecutive calendar days.

<b>Month of Substantial Completion based on the Base Contract Duration</b>	<b>Number of Days of adjustment</b>
<b>January</b>	150
<b>February</b>	120
<b>March</b>	90
<b>April</b>	60
<b>May</b>	30
<b>June</b>	0
<b>July</b>	0
<b>August</b>	0
<b>September</b>	0
<b>October</b>	0
<b>November –December 15</b>	0
<b>December 16 – December 31</b>	180

**(GENERAL CONDITIONS RELATING TO ARTICLE 22 – INSURANCE)**

**PART II. TYPES OF INSURANCE, MINIMUM LIMITS AND SPECIAL CONDITIONS**

**Note:** All certificate(s) of insurance submitted pursuant to Contract Article 22.3. 3 must be accompanied by a Certification by Broker consistent with Part III below and include the following information:

- For each insurance policy, the name and NAIC number of issuing company, number of policy, and effective dates;
- Policy limits consistent with the requirements listed below;
- Additional insureds or loss payees consistent with the requirements listed below; and
- The number assigned to the Contract by the City (in the “Description of Operations” field).

Insurance indicated by a blackened box (■) or by X in a □ to left will be required under this contract

The Contractor's Professional Engineer shall maintain and submit evidence of Professional Liability Insurance in the minimum amount of \$1,000,000 per claim. The policy or policies shall include an endorsement to cover the liability assumed by the Contractor under this Contract arising out of the negligent performance of professional services or caused by an error, omission or negligent act of the Contractor's Professional Engineer or anyone employed by the Contractor's Professional Engineer.</p> <p>B. Claims-made policies will be accepted for Professional Liability Insurance. All such policies shall have an extended reporting period option or automatic coverage of not less than two (2) years. If available as an option, the Contractor's Professional Engineer shall purchase extended reporting period coverage effective on cancellation or termination of such insurance unless a new policy is secured with a retroactive date, including at least the last policy year.</p>	
<p>[OTHER] <span style="float: right;">Art. 22.1.8</span></p> <p>■ Engineer's Field Office</p> <p><b>Section 6.40, Standard Highway Specifications</b></p>	<p>Fire insurance, extended coverage and vandalism, malicious mischief and burglary, and theft insurance coverage in the amount of <u>\$40,000</u></p>
<p>[OTHER] <span style="float: right;">Art. 22.1.8</span></p> <p>■ The Following Additional Insurance Must Be Provided:</p> <p><b>Umbrella/Excess Liability Insurance</b> - The Contractor shall provide Umbrella/Excess Liability Insurance in the minimum amount of \$200,000,000 per Occurrence and \$200,000,000 in Aggregate. The policy terms and condition should be at least as broad as the underlying policies. The underlying policies should comply with the insurance provision as outlined by the contract. Defense cost should be in addition to the limit of liability. The City of New York, including its officials and employees, should be included as additional insured as respects to the noted project. The Umbrella/Excess Liability Insurance must be purchased specifically and exclusively for the Work and extend to all aspects of the Work, with coverage limits devoted solely to the Work.</p>	

**SCHEDULE A**  
**(GENERAL CONDITIONS TO CONSTRUCTION CONTRACT)**  
**(GENERAL CONDITIONS RELATING TO ARTICLE 22 – INSURANCE)**

**PART III. CERTIFICATES OF INSURANCE**

All certificates of insurance (except certificates of insurance solely evidencing Workers' Compensation Insurance, Employer's Liability Insurance, and/or Disability Benefits Insurance) must be accompanied by one of the following:

- (1) the Certification by Insurance Broker or Agent on the following page setting forth the required information and signatures;

-- OR --

- (2) copies of all policies as certified by an authorized representative of the issuing insurance carrier that are referenced in such certificate of insurance. If any policy is not available at the time of submission, certified binders may be submitted until such time as the policy is available, at which time a certified copy of the policy shall be submitted.

**SCHEDULE A**

**(GENERAL CONDITIONS TO CONSTRUCTION CONTRACT)**

**PART IV. ADDRESS OF COMMISSIONER**

Wherever reference is made in Article 7 or Article 22 to documents to be sent to the **Commissioner** (e.g., notices, filings, or submissions), such documents shall be sent to the address set forth below or, in the absence of such address, to the **Commissioner's** address as provided elsewhere in this **Contract**.

## **REVISIONS TO STANDARD SPECIFICATIONS**

---

### **NOTICE**

The Specification Bulletin(s) (“SB(s)”) referenced in this Section (R-Pages) may consist of revisions to the following Standard Specifications:

- New York City Department of Transportation (“NYC DOT”) Standard Highway Specifications, dated 8/1/2015;
- New York City Department of Environmental Protection (“NYC DEP”) Standard Sewer and Water Main Specifications, dated 7/1/2014; and
- NYC DEP Specifications for Trunk Main Work, dated 7/2014.

The SB(s) modify and supersede portions of the applicable Standard Specifications. The provisions contained in this Contract’s I-Pages, S-Pages and SW-Pages may further modify the applicable Standard Specifications.

The following SB(s) are included as part of this contract:

- SB 16-001 – REVISIONS TO THE NYC DOT STANDARD HIGHWAY SPECIFICATIONS.
- SB 16-002 – REVISIONS TO THE NYC DEP STANDARD SEWER AND WATER MAIN SPECIFICATIONS.
- SB 17-001 – UV CURED-IN-PLACE-PIPE (CIPP) LINING METHOD
- *SB 17-002 – SUPERSEDED BY SB 18-001*
- SB 17-003 – ENGINEERS FIELD OFFICE
- SB 17-004 – FIRE DEPARTMENT FACILITIES
- SB 17-005 – DIGITAL PHOTOGRAPHS
- SB 17-006 – RECORDS OF SUBSURFACE STRUCTURES
- SB 17-007 – MOBILIZATION
- SB 17-008 – QUALIFICATION CARDS
- SB 17-009 – SALVAGEABLE MATERIALS
- SB 17-010 – MILLED ASPHALTIC CONCRETE AGGREGATE
- SB 17-011 – DETECTABLE WARNING UNIT COLOR

- SB 17-012 – TEMPORARY HOUSE CONNECTION MATERIAL
- SB 18-001 – RODENT AND WATERBUG PEST CONTROL
- SB 18-002 – COLOR SURFACE TREATMENT FOR PAVEMENTS
- SB 18-003 – WATER AND SEWER GENERAL PROVISIONS
- SB 18-004 – CUTTING DUCTILE IRON PIPE
- SB 18-005 – STOCKPILES
- SB 19-001 – RESTORATION OF PAVEMENT SURFACE
- SB 19-002 – SCHEDULE OF OPERATIONS

The SB(s) are available online at:

<http://www1.nyc.gov/site/ddc/resources/specification-bulletins.page> or for pickup between 8:00 AM and 4:00 PM at 30-30 Thomson Avenue, 3<sup>rd</sup> Floor, Division of Infrastructure, Long Island City, NY 11101. Contacts:

- Mr. Richard Jones, (718) 391-1417
- Mr. Salman Macktoom, (718) 391-2041

**PROJECT  
DESCRIPTION**

**PROJECT DESCRIPTION AND  
NYSDOT SPECIFICATION  
REFERENCES**

---

**SANDRESM1**

The following pages provide the project description and the parameters for using New York State Department of Transportation (NYSDOT) specifications as part of the Contract Work.

**(NO TEXT ON THIS PAGE)**

**SANDRESM1 Project Description:**

The project area is located on the East Side of the Borough of Manhattan, New York County, NY. The project area extends from Montgomery Street on the south to the north end of John V. Lindsay East River Park (East River Park) at about East 15th Street. The project area is approximately 61 acres and consists primarily of the Franklin Delano Roosevelt East River Drive (the FDR Drive) right-of-way, a portion of Pier 42 and Corlears Hook Park as well as East River Park. The majority of the project area is within East River Park and includes three existing pedestrian bridges across the FDR Drive to East River Park (Corlears Hook, Delancey Street, and East 10th Street Bridges) and the Houston Street overpass.

The purpose of the project is to install a flood protection system comprised of a combination of floodwalls and closure structures. Specifically, the project includes the construction of above ground floodwall, a transition retaining wall, and installation of 2 swing and roller type steel flood gates and supporting infrastructure improvements that together would reduce risk of damage from coastal storms in the project area.

A key element of the project is elevating and reconstructing East River Park to make it more resilient to coastal storms, including redesigned and enhanced connections to the waterfront and East River Park, with the reconstruction of the Corlears Hook Bridge, the replacement of the Delancey and East 10th Street bridges. These bridge improvements will create more inviting and accessible crossings over the FDR Drive to the reconstructed East River Park and the East River waterfront, including the waterfront shared-use path. The reconstructed bridges at Delancey and East 10th Street also provide more community-oriented access that supports and encourages public access to the waterfront with gentler grades that are consistent with the principle of universal access. Within the park, the bridge landings provide an elevated gateway with expanded views of the reconstructed park and the river.

The park's underground water and sewer infrastructure will be reconstructed, along with existing park structures and recreational features, including the amphitheater, track facility, and tennis house, as part of the raised park. Two existing embayments along the East River Park esplanade are being relocated further north on the bulkhead to allow for siting of active recreation fields within the park and to facilitate a direct and ADA accessible connection to the water.

**Concrete**

The architectural concrete construction used for the exposed pedestrian bridge abutments, floodwall and retaining wall require review, selection and acceptance of samples and mockups by the Engineer at an early stage. The use of a formliner is required continually for the floodwall and retaining walls and on the bridge abutments at Corlears Hook, Delancey and East 10<sup>th</sup> Street pedestrian bridges. In order to ensure consistent color throughout the project, the concrete mix should be comprised from uniform aggregate sources and types not varied without approval of the Engineer. A no cost substitute for an alternative concrete mix is acceptable only if it provides consistent color throughout the project.

Any references to "average concrete" refer to Class B-32 per Section ESCR-3.05 in the FLOODWALL-Pages.

**Overlapping Scopes of Work**

Due to the size, complexity, and varied types of work in this Contract, certain elements of work may be covered under multiple pay items and/or multiple specification sections. The

bidder must clearly read the specifications and fully understand what scope is included in each pay item. Just because an item exists does not imply that the item will be used in all portions of the Contract Work.

Example: Bid Item 50.11CS036050, "3'-6"W X 5'-0"H SINGLE BARREL FLAT TOP REINFORCED CONCRETE COMBINED SEWER", includes excavation and shoring in the bid unit price per NYCDEP Standard Sewer and Water Specifications Section 50.11.6. The Contractor will not be paid under Bid Item PK-667 "TEMPORARY SHEETING" for installation of shoring when installing pipe under Bid Item 50.11CS036050.

Example: The PARKS-Pages includes Bid Item PK-ESCR-646, "Miscellaneous Iron And Steel" and the FLOODWALL-Pages includes Bid Item ESCR-564, "Structural Steel." These items will not be used interchangeably but will be used for the scope of work listed at the beginning of the PARKS-Pages and the FLOODWALL-Pages.

### **NYSDOT Specifications**

All requirements as defined in the City of New York Standard Construction Contract ("Standard Construction Contract") are to be followed. NYSDOT specific construction management and contractual requirements that are referenced in NYSDOT specifications are not to be inadvertently incorporated or take precedent over Contract requirements, including the Standard Construction Contract, Special Specifications or Provisions, the New York City Department of Transportation Standard Highway Specifications, or the New York City Department of Environmental Protection Standard Sewer and Water Specifications.

References are made herein to certain NYSDOT specifications. All references to the "Department", "Materials Bureau", "Regional Engineer", "Regional Landscape Architect", "Landscape Architect", "DCES", or other reference to NYSDOT offices or personnel are deemed to mean the "ENGINEER" as that term is defined in the Standard Construction Contract. However, where references are made to materials or contractors or subcontractors being required to appear on NYSDOT approved lists, these references and requirements remain unchanged.

Reference to NYSDOT specifications will not be deemed to imply NYSDOT or New York State involvement in any testing and approval of materials or in the supervision of construction. In the event of a conflict, the Standard Construction Contract, the contract drawings and New York City specifications will prevail over any NYSDOT specifications, unless the ENGINEER directs otherwise.

## SECTION HW-900 – ALLOWANCE FOR MAXIMUM INCENTIVE FOR EARLY COMPLETION/LIQUIDATED DAMAGES

### HW-900.1 GENERAL.

Since Project SANDRESM1 is critical to coastal resiliency of Manhattan and TIME IS OF THE ESSENCE, the City is making available to the Contractor certain incentive payments. The incentive payment amount will be tied to an Accelerated Substantial Completion Date for this Capital Project. To earn an incentive payment amount, the Contractor must meet the Accelerated Substantial Completion Date for this Capital Project. Please be advised that in the event the Scheduled Substantial Completion Date for this Capital Project is extended by the Commissioner in accordance with **Article 13 “Extension Of Time For Performance”** of the Standard Construction Contract, the Accelerated Substantial Completion Date may be extended accordingly.

Any dispute, negotiation and/or any other cause resulting in a delay, whether caused by the City, the Utilities, or any other party, which results in the Contractor's failure to meet the Accelerated Substantial Completion Date as set forth in **Subsection HW-900.2**, will result in no payment of the entire incentive and the Contractor agrees that it shall not bring a claim against the City for the incentive payment. (See below for more details.)

The Contractor is a sophisticated business entity involved in the construction industry with access to legal representation and understands that by entering into this Contract with the City that the Contractor hereby waives any and all claims it may have against the City or any of its officials, employees or agencies for the Contractor failing to meet the Accelerated Substantial Completion Date and, thus not receiving any incentive payment available for this Capital Project. This includes any portion of the incentive payment, which the Contractor forfeits by failing to meet the Accelerated Substantial Completion Date. As a sophisticated business entity involved in the construction industry, the Contractor understands that it is possible that it may not receive any incentive under this Contract and that it cannot bring any claim or lawsuit in any jurisdiction against the City if it does not meet the Accelerated Substantial Completion Date for any reason and does not earn the incentive payment.

Furthermore, the Contractor will not have a claim against the City for a compensable delay under **Article 11** of the Standard Construction Contract, or any other claim against the City, if the City does not pay any incentive for this Capital Project because the Contractor did not meet the Accelerated Substantial Completion Date, and the Contractor's failure to meet such Accelerated Substantial Completion Date is due to a delay by the City or any City agency, any Utilities or any other cause whatsoever.

The early completion incentive is separate and distinct from **Article 11** of the Standard Construction Contract and the Contractor agrees and understands that the incentive payment cannot be claimed under **Article 11** of the Standard Construction Contract.

Moreover, the Contractor hereby waives any and all rights (and hereby understands what it is waiving as described herein) the Contractor may have or thinks it has in law (contract law or torts law) or in this Contract to bring any kind of claim against the City, if the City, based on this Contract, does not pay the incentive amount for this Capital Project for any reason.

### HW-900.2 INCENTIVE/LIQUIDATED DAMAGES.

Timely completion of all work, excluding punchlist work, is essential to this project. In order to ensure such timely completion the City is providing incentive payment or, in the event that the

Contractor fails to meet the Scheduled Substantial Completion Date, liquidated damage assessment for this contract, as set forth below.

The Contractor shall be assessed liquidated damages, per **Article 15** of the Standard Construction Contract and as shown in Schedule "A", in the event the Contractor fails to substantially complete all work excluding punchlist work, within the time fixed for such completion in Schedule "A".

(1) General Provisions:

(a) Two (2) types of incentive payment amounts are available to the Contractor under this **Section HW-900**. The amounts are set forth below in **Paragraph (5)** of this **Subsection HW-900.2**.

(b) An incentive payment will be authorized to the Contractor only if all work of the contract including, but not limited to, all change order work for the contract, receives a determination of Substantial Completion, as defined in **Paragraph (7)** of this **Subsection HW-900.2**, below, by the Accelerated Substantial Completion Date, as defined in **Paragraph (3)** of this **Subsection HW-900.2**, below.

(c) No incentive will be authorized for the early completion of the contract in the event that substantial completion of the work of the contract occurs after the Accelerated Substantial Completion Date, regardless of delays, including delays attributable to the City. Examples of delays that may cause the Contractor to miss the Accelerated Substantial Completion Date and not earn the available incentive payment amounts include, without limitation, delays resulting from subsurface conditions at the site materially differing from any shown on the Contract Drawings or indicated in the Specifications, delays resulting from such subsurface conditions as could not reasonably have been anticipated by the Contractor and were not anticipated by the City, and delays due to private utilities, which conditions will materially affect the cost of the work to be done under the contract. Notwithstanding the above, the Commissioner may grant an extension of time in accordance with **Article 13** of the Standard Construction Contract for any or all of such delays.

(d) Liquidated damages will be assessed by the City against the Contractor if substantial completion of the work of the contract does not occur by the Scheduled Substantial Completion Date, plus authorized time extensions pursuant to **Article 13** of the Standard Construction Contract.

(e) The determination of incentive payment or liquidated damage assessment will be made solely by the Commissioner, and the Commissioner's decision with respect thereto shall be accepted as final, binding, and conclusive.

(2) Scheduled Substantial Completion Date: Both the scheduled commencement date and the Scheduled Substantial Completion Date, excluding punch list work, are to be set forth in the written Notice to Proceed to be issued by the Commissioner in accordance with **Article 8** of the Standard Construction Contract. The number of consecutive calendar days for determining the Scheduled Substantial Completion Date is set forth in Schedule "A".

(3) Accelerated Substantial Completion Date: The Accelerated Substantial Completion date is set at fifteen (15) calendar days before the Scheduled Substantial Completion Date, as defined in **Paragraph (2)** of this **Subsection HW-900.2**, above. The number of consecutive calendar days for determining the Accelerated Substantial Completion Date is 1811 from the scheduled commencement date set forth in the Notice to Proceed.

(4) Incentive and Liquidated Damages Payments:(a) Incentive Payments:

(i) Potential Incentive Payment No. 1: If the Work of the contract including, but not limited to, all change order work, receives a determination of Substantial Completion, as defined in **Paragraph (7)** of this **Subsection HW-900.2**, below, prior to the Accelerated Substantial Completion Date, as defined in **Paragraph (3)** of this **Subsection HW-900.2**, above, plus authorized time extensions under **Article 13** of the Standard Construction Contract, then the City, will authorize Incentive Payment No. 1 to the Contractor in accordance with **Paragraph (5)** of this **Subsection HW-900.2**, below, less any and all deductions authorized by this contract or by law.

(b) Liquidated Damages: Should substantial completion of the work of the contract, as defined in **Paragraph (7)** of this **Subsection HW-900.2**, below, occur after the Scheduled Substantial Completion Date set for the contract, as defined in **Paragraph (2)** of this **Subsection HW-900.2**, above, plus authorized time extensions pursuant to **Article 13** of the Standard Construction Contract, or, if the Contractor, in the sole determination of the Commissioner, should abandon the work, the City will assess liquidated damages against the Contractor in an amount determined as follows: the liquidated damage amount for the contract as stated in **Paragraph (5)** of this **Subsection HW-900.2**, below, multiplied by the number of calendar days in which substantial completion of the work occurs after the Scheduled Substantial Completion Date set for the contract, plus authorized extensions; which said sum, in view of the difficulty of accurately ascertaining the loss which the City will suffer by reason of delay in the completion of the work hereunder, is hereby fixed and agreed as the liquidated damages that the City will suffer by reason of such delay, and not as a penalty.

This article shall also apply to the Contractor if it is defaulted pursuant to **Chapter X** of this Standard Construction Contract. Neither the failure to assess liquidated damages nor the granting of any time extension shall operate as a waiver or release of any claim the City may have against the Contractor for either actual or liquidated damages.

(c) Calculation: For the purposes of calculating the number of calendar days for incentive payment, such calculation shall include the day on which the Substantial Completion of the contract occurs.

For the purposes of calculating the number of calendar days for liquidated damage assessment, such calculation shall not include the day of Scheduled Substantial Completion of the contract.

(5) Incentive/Liquidated Damage Amounts:(a) Incentive Amounts:

(i) Potential Incentive Payment No. 1: For early substantial completion of the contract before the Accelerated Substantial Completion Date as defined in **Paragraph (3)** of this **Subsection HW-900.2**, the additional incentive payment is equal to \$30,000.00 per day for a maximum of one hundred and fifty (150) days before the Accelerated Substantial Completion Date (\$4,500,000.00 maximum additional incentive).

(b) Liquidated Damage Amount: \$30,000.00 per day for the contract, for a maximum of one hundred and fifty (150) days after the Substantial Completion Date (\$4,500,000.00 maximum liquidated damage).

(6) Maximum Incentive/Liquidated Damage Amounts:

(a) Maximum Incentive Payment: The maximum incentive amounts payable to the Contractor shall equal the incentive amounts indicated in **Paragraph (5)** of this **Subsection HW-900.2**, above, as follows:

$$\$30,000.00/\text{day} \times 150 \text{ days} = \$4,500,000.00$$

(b) Liquidated Damage: The maximum liquidated damage amounts assessed to the Contractor shall equal the liquidated damage amounts indicated in **Paragraph (5)** of this **Subsection HW-900.2**, above, as follows:

$$\$30,000.00/\text{day} \times 150 \text{ days} = \$4,500,000.00$$

(7) Substantial Completion: Construction within the contract shall be substantially complete when, in the sole determination of the Commissioner, all work, exclusive landscaping and punch list work, has been completed, tested, made operational, and accepted by the Engineer.

**HW-900.3 BASIS OF PAYMENT.**

Payment for any incentives earned by the Contractor under this Capital Projects shall be made in accordance with the applicable **Subsection HW-900.2.(4)(a)** above.

The total estimated cost of this item is the “fixed sum” amount shown for this item in the Bid Schedule. No guarantee is given that the actual lump sum cost for this item will in fact be the “fixed sum” amount. The “fixed sum” amount is included in the total bid solely to ensure that sufficient monies will be available to pay any incentives earned by the Contractor.

The “fixed sum” is for bidding purposes only and shall not be varied in the bid. The Contractor will be paid for the actual amount of any incentives earned, less any and all deductions authorized by this contract or by law, regardless of the fixed sum.

*Payment will be made under:*

<u>Item No.</u>	<u>Item Description</u>	<u>Pay Unit</u>
HW-900	ALLOWANCE FOR MAXIMUM INCENTIVE FOR EARLY COMPLETION	F.S.

## SECTION HW-900H – ALLOWANCE FOR CITY WORK ACCELERATION

Under this Section, the Contractor will be paid for City work deemed necessary by DDC's Commissioner to accelerate the City work items in the project during critical periods but the use of this item will expire on the original contract substantial completion date. Such accelerated City work includes:

- A. 100% of the premium portions of overtime pay for working during non-scheduled work hours which must be defined as those hours of work outside the permissible hours stated in the original contract OCMC Traffic Stipulations; or,
- B. The premium portion of overtime pay for overtime actually worked beyond the 40-hour work week but within the permissible hours of work stated in the original contract OCMC Traffic Stipulations; or,
- C. All other incidental expenditures caused by modifications of project site regulations or administrative requirements ordered by the Commissioner that result in additional costs to perform contract work as specified.

Such accelerated City work must be paid for under this item in accordance with the requirements of **Articles 25 and 26** of the Standard Construction Contract.

Payment made under this Fixed Sum item must cover the cost of all labor, materials, plant, equipment, insurance, and incidentals necessary to accelerate the City work as ordered by DDC's Commissioner.

No guarantee is given that this allowance item will in fact be required in this contract. The estimated "fixed sum" amount shown in the Bid Schedule is included in the total bid solely to insure a method of payment for any accelerated work performed by the Contractor, as directed by DDC's Commissioner.

*Payment will be made under:*

<b>Item No.</b>	<b>Item</b>	<b>Pay Unit</b>
HW-900H	ALLOWANCE FOR CITY WORK ACCELERATION	F.S.

## SECTION 6.39 B – MOBILIZATION

**6.39.1. DESCRIPTION.** Under this section, the Contractor must set up all necessary general plant and facilities, including shops, storage areas, office and such sanitary and other facilities as are required by City, State or Federal law or regulation. Unless otherwise provided, the cost of required bonds and/or any other similar significant initial expenses required for the initiation of the contract work must also be included in this section. The determination of the adequacy of Contractor's facilities, except as noted above, will be made by the Engineer.

**6.39.2. MATERIALS.** Unless otherwise specified, materials required under this section are not part of the completed contract and may be as selected by the Contractor.

**6.39.3. CONSTRUCTION METHODS.** Such work as is done in providing the facilities and services under this section must be done in a safe and workmanlike manner and must conform with any pertinent City, State or Federal law, regulation or code. The Contractor must provide facilities and services under this section that are planned and executed to ensure the maintenance of safety and good housekeeping at the construction site.

**6.39.4. PRICE TO COVER.**

Payment will be made by lump sum. The amount bid will include the furnishing and maintaining of any plant, services or other facilities noted under "Description" to the extent and at the time the Contractor deems them necessary for the Contractor's operations, consistent with the requirements of this section and the contract. The amount bid for this lump sum item will be payable to the Contractor when the following items are submitted and approved by the Engineer:

1. The provision of a Field Office per Section 6.40 CR;
2. The Site Safety Plan per the Safety Requirements section of the Information for Bidders;
3. The Preliminary CPM Schedule and Baseline CPM Schedule per the "CRITICAL PATH METHOD (CPM) SCHEDULE" article in the S-Pages;
4. The Progress Schedule per Standard Construction Contract Article 9;
5. Preconstruction Photographs per Section 6.43 D of the NYCDOT Standard Highway Specifications are submitted to the Engineer; and
6. Construction Report per Item ESCR-76.11CR.

However, should the Contract be terminated, or its term expires prior to completion of at least fifty percent (50%) of the original price bid for the Contract, then the Contractor will be paid a proportionate amount of this item (hereinafter referred to as the "Adjusted Mobilization Payment") based on the following formula:

$$\text{Adjusted Mobilization Payment} = \text{As Bid Mobilization Cost} \times \frac{\text{Total Actual Payments to the Contractor approved by the Engineer}}{\text{Original Total Bid Price} + \text{Approved and Registered Change Orders}}$$

Where the Contractor has already received the original total payment for this item and the Contract has been terminated or expired prior to completion of at least fifty percent (50%) of the work covered under the original price bid for the Contract, then any monies owed by the City due to the above specified reduction in payment will be withheld from the monies the City owes to the Contractor and/or the City reserves a claim to such funds from the Contractor.

The amount bid for Mobilization must not exceed eight percent (8%) of the total contract price, excluding the price bid for Mobilization, and in no case will payment under this item exceed the original price bid for this item.

*Payment will be made under:*

Item No.	Item	Pay Unit
6.39 B	MOBILIZATION	L.S.

## SECTION 6.40 CR – ENGINEER’S FIELD OFFICE

### 1.0 DESCRIPTION

The Contractor shall provide, furnish and maintain a fully equipped field office for the exclusive use of and occupancy by the Department’s engineering personnel and/or Supervising Consultant (herein after called “City personnel”), and by the engineering personnel of private utilities when specified. The field office shall be at a location approved by the Engineer and shall be a commercial building, store front, or with the approval of both Office of Construction Mitigation and Coordination (OCMC) and the Community Board it may be a mobile trailer(s). If a trailer is used it shall be subject to approval by the Engineer, and all necessary permits shall be obtained by the Contractor. The Contractor may have facilities in an adjoining area separated by a lockable door, provided such facilities are in a location approved by the Engineer. It is preferred that the field office be within ½ mile of the job site, at a location approved by the Engineer. Field offices located more than ½ mile from the job site shall require approval by the Engineer.

The field office structure and occupancy thereof shall conform to the requirements of all laws, rules, regulations and orders applicable to it.

The field office and all equipment, except as otherwise specified, may be new materials or may be used materials in good condition and satisfactory to the Engineer.

### 2.0 MATERIALS

#### 2.0.1 General Construction

The Engineer’s Field Office shall be in an approved and weatherproof building. It shall have a minimum ceiling height of seven (7’) feet and be partitioned to provide the number of rooms required for the type of office specified. Floor space shall be subdivided into work areas based on a floor plan provided by the City to the Contractor upon notification of space availability.

#### 2.0.2 General Facilities

The field office shall contain or have the following facilities incorporated:

1. Lighting – Electric light, non-glare type luminaries to provide a minimum illumination level of 100 ft.- candles at desk height level.
2. Heating and Cooling – Adequate equipment to maintain an ambient air temperature of 70° F. ±5°.
3. Electrical Energy Outlets– In accordance with all applicable codes and placed as necessary.
4. Toilet – A separate enclosed room, properly ventilated per code and complying with applicable sanitary codes shall contain a lavatory with running hot and cold water, flush-type toilet, mirror, electric hand dryer, and paper towel dispenser.
5. Potable Water – Potable water supplied from an existing system or five (5) gallon capacity water cooler of a type to be approved by the Engineer shall be provided for use by City personnel. Replacement bottles of water shall be provided by the Contractor, when required.
6. Signs – Store front locations shall have a window graphic sign in black and white lettering with the following inscription. Other locations shall have a wood or metal sign affixed on the outside wall of the building with the following inscription painted in black block lettering on a white background. Paints shall be approved exterior enamels.

<b>CITY OF NEW YORK</b>	2-1/2"
<b>DEPARTMENT OF DESIGN AND CONSTRUCTION</b>	3-1/2"
<b>INFRASTRUCTURE</b>	2-1/2"
<b>RESIDENT ENGINEER'S FIELD OFFICE</b>	2-1/2"

7. Electric Refrigerator – five (5) cubic feet minimum capacity for use by City personnel.
8. Microwave, Toaster Oven and Coffee Maker – Basic reheating kitchen equipment or approved appliances for use by City personnel.
9. Windows and Doors – All windows and doors shall be weatherproof and each equipped with adequate locking devices. Each window shall be equipped with vertical blinds. Exterior doors shall be provided with two (2) separate "high security" dead bolt type cylinder locks, keyed alike, and three (3) keys shall be furnished for each lock. All windows and doors shall be alarmed with an audible alarm system with signals sent to a 24-hour security response service.
10. Partitions – Partitions for work space enclosures shall be either permanent walls or of the modular type similar to Herman Miller's standard fabric covered line.
11. Kitchen Sink – Mechanism to provide non-drinking, hot and cold, running water.

### 2.0.3 Office Equipment

1. Pencil Sharpener – One standard pencil sharpener for use by City personnel.
2. Telephone Answering Machine – The telephone answering machine to be provided shall be an electronic digital voice machine with emergency call forwarding capability. It shall be operable twenty-four (24) hours per day and, when unattended, shall transmit to the caller the following message:

*"You have reached the Field Office of the New York City Dept. of Design and Construction. No one is here now. We check our incoming messages frequently. We will get back to you as soon as possible. Please leave your name, message and phone number where you may be reached. In case of emergency, call the New York City Hotline at 311. Again, the emergency number is 311."*

All electronic voicemail messages shall be automatically forwarded as email attachments, to allow for the voicemails to be played remotely.

#### 2.0.3.1 Computer Equipment

Computers furnished by the Contractor for use by City Personnel, for the duration of the contract, shall be in accordance with Table 1 - ADDITIONAL SPECIFIC REQUIREMENTS, contained herein, and shall meet the following minimum requirements:

##### Personal Computer(s) – Workstation Configuration

1. Make and Model: Dell; HP; Gateway; Acer; or, an approved equivalent. (Note: an approved equivalent requires written approval of the Assistant Commissioner of ITS.)
2. Processor: i5 (4MB Cache, 3.0GHz) or faster computer - Dual Processor.
3. System Ram: Minimum of 16GB (Gigabytes) Dual Channel DDR3 SDRAM at 1333MHz – 2 DIMMSs
4. Hard Disk Drive(s): 500 GB (Gigabytes) Serial ATA (7200RPM) w/DataBurst Cache, or larger.
5. CD-RW: Internal CD-RW, 48x Speed or faster.
6. 16X DVD+/-RW: DVD Burner (with double layer write capability) 16x Speed or faster
7. I/O Ports: Must have at least one (1) Serial Port, one (1) Parallel Port and three (3) USB Ports.
8. Video Display Card: HD Graphics (VGA, HDMI) with a minimum of 64 MB of RAM.

9. Monitor: 22" W, 23.0 Inch VIS, Widescreen, VGA/DVI LCD Monitor.
10. Available Exp. Slots: System as configured above shall have at least two (2) full size PCI Slots available.
11. Network Interface: Integrated 10/100/1000 Ethernet card.
12. Other Peripherals: Optical scroll Mouse, 101 Key Keyboard, Mouse Pad and all necessary cables.
13. Software Requirements: Microsoft Windows 10 Professional SP1, 32 bit or 64 bit; Microsoft Office Professional 365; Microsoft Project 365; Basic Adobe Acrobat Package; Anti-Virus software package with 4 year updates subscription; and, either Auto Cad LT or Microsoft Visio Standard Edition, as directed by the Engineer.

All field offices requiring computers shall be provided with the following:

1. One (1) broad-band internet service account. Wideband Internet connectivity at a minimum throughput of 15 Mbps download and 50 Mbps upload is required. Telephone service should be bundled together with Internet connectivity. Because of throughput requirements Verizon FIOS is the preferred connectivity provider where available.  
This account will be active for the life of the project. The e-mail name for the account shall be the DDC Field Office/project Id (preferably Gmail or Outlook - e.g., SANDRESM1@gmail.com).
2. All necessary Cabling.
3. Storage Boxes for and Blank CDs/DVDs.
4. UPS/Surge Suppressor combo.
5. 30 USB Thumb (or flash) Drives – 16 GB each

All computers required for use in the Engineer's Field Office shall be delivered, installed, and setup in the Field Office by the Contractor.

All Computer Hardware shall come with a three (3) year warranty for on- site repair or replacement. Additionally, and notwithstanding any terms of the warranty to the contrary, the Contractor is responsible for rectifying all computer problems or equipment failures within one (1) business day.

An adequate supply of blank CDs/DVDs, and paper and toner cartridges for the printer shall be provided by the Contractor and shall be replenished by the Contractor as required by the Engineer.

It is the Contractor's responsibility to ensure that electrical service and phone connections are also available at all times; that is, the Field Office Computer(s) is to be powered and turned on twenty-four (24) hours each day.

Broadband connectivity is preferred at each field office location. Please take into consideration that an extra phone line dedicated to the modem must be ordered as part of the contract unless Internet broadband connectivity, via Cable or DSL, is available at the planned field office location. Any questions regarding this policy should be directed to the Assistant Commissioner of Information Technology Services at 718-391-1761.

### **2.0.3.2 Data Access**

Electronic access to the EquipmentWatch Retail Rental Rates database (formerly known as The AED Green Book published by Equipment Watch), shall be provided.

### **2.0.4 Field Testing Equipment**

1. 2 – Air Entrainment Meters – Pressure Type, with carrying case for use by City personnel. Each meter shall be capable of producing an accurate test result in approximately five (5) minutes and shall comply with ASTM Designation C 231.
2. 2 – Slump Test Sets – Slump cone and test sets conforming to the requirements of ASTM Designation C 143, complete with rod and scoop for use by City personnel.
3. Thermometers: For use by City personnel.
  - 1 – Minimum-maximum thermometer.
  - 3 – Asphalt thermometers of stainless steel construction with an accuracy of 0.5% of the full scale, able to measure temperatures from 50 to 500 degrees F. in 5 degree increments.
  - 3 – Surface Thermometers able to measure temperatures of flat surfaces similar to Sargent-Welsh Model S81441-D, or an approved equivalent.
4. Nonsparking Pinch Bar – For use in opening manholes.
5. Gas Meters – For use in detecting the presence of explosive gases and vapors for use by City personnel.
6. Straight Edge – One 10 foot long straight edge for use by City personnel in detecting pavement surface tolerance.
7. 48" Smart Level – For use in determining pedestrian ramp and sidewalk slopes.
8. Chlorine Test Kits – For testing residual chlorine levels following water main flushing.
9. Green Florescent Power Trace Dye – For testing sewer connections.
10. 10 – One Million Candlepower Rechargeable Flashlights.
11. Distance Measuring Wheel – For measuring long distances.

### **3.0 SPECIFIC REQUIREMENTS FOR ENGINEER'S FIELD OFFICE**

In addition to the general requirements, the Field Office shall have a minimum floor area of 12,000 SF, calculated based on usable area only, excluding any loss factors. Loss factors are defined as those areas such as lobby, sidewalk, window ledge, elevator shafts, and stairways. The Contractor shall provide and maintain furnishings for each type of Field Office in the quantity specified in Table 1. The furnishings shall be new or used equipment satisfactory to the Engineer.

The office shall have a minimum of two outside doors and four windows.

The Field Office shall be partitioned to provide thirty-five (35) rooms, one of which shall be at least 150 s.f. in area (for use by private utilities).

**TABLE 1  
ADDITIONAL SPECIFIC REQUIREMENTS**

SPECIFIC REQUIREMENTS	TYPE CR
Minimum useable floor space (Square Feet) †	12,000
Office desks, at least 4'-8" x 2'-8", with drawers, locks, and keys.	50*
Swivel chairs, with arms, for the above.	50*
Office folding chairs, metal, with padded seats and backs.	20**
Steel supply cabinets (approximate size 72" high by 36" wide by 18" deep), with four adjustable shelves, tumbler lock and 3 keys.	3
Fire resistant cabinet, 4-drawer, legal size with lock and three (3) keys, meeting the requirements for "Filing devices, Insulated (36 E 9)" Class D Label, of the Underwriters' Laboratories, Inc. Specifications.	6***
Individual lockers (17" wide x 18" deep x 72" high) with flat key locks and two (2) keys each.	10
Calculating machines, tape type with digital display registering at least ten (10) digits.	50*
Standalone networked color laser printer carriage, standard 16	1
Waste paper baskets (metal, approximately 12" square by 16" high).	15
Fire extinguishers, non-toxic, dry chemical type meeting Underwriters Laboratories, Inc., approval for Class A, Class B and Class C fires with a minimum rating of 2A:10B:10C.	3****
First Aid Kit kept properly stocked with appropriate first aid supplies at all times.	2
Drafting tables (3'-0" x 5'-0") with storage drawers and stool.	5****
Photocopying Machine – Stand-alone, heavy duty, electric, dry-process color photocopying type with color scan and send capability via e-mail, a minimum production rate of 70 pages per minute and an adequate supply of copy paper, toner, etc. The machine shall be capable of duplex copying paper sizes of 8-1/2 x 11 inches, 8-1/2 x 14 inches and 11 x 17 inches, and have separate trays for each paper size. It shall have a document feeder, collator, stapler, and the capability to reduce/enlarge copies between each paper size. The supply of each size copy paper, toner, etc. shall be replenished and the machines shall be maintained for the duration of the contract by the Contractor as required by the Engineer. Make and model can be Minolta, Canon, IBM, Epson, or an approved equivalent, and shall be networked to the office computers for printing capability.	3
Standalone networked color laser printer. (Not required if photocopying machine prints in color)	1
Vertical filing plan racks for six sets of 22"x36" plans each rack.	7****
Telephone lines for calls with no territorial limitation including international calling, where one shall be dedicated for the Fax Machine, one for each computer fax/modem and the others for telephone instruments.	20‡
Telephone instruments.	50
Telephone answering machine.	1
Fax Machine – With an adequate supply of copy paper, toner, etc. The supply of copy paper, toner, etc. shall be replenished and the machines shall be maintained for the duration of the contract by the Contractor as required by the Engineer.	1
Personal Computer – Workstation Configuration	50

Bottled water with refrigerator unit-hot/cold water. (For private utilities room.)	1
Heavy duty commercial grade diamond cut shredder with automatic start. The shredder shall be able to receive 8-1/2 inch wide paper and shred a minimum of 15 sheets simultaneously along with CDs and staples.	1
Projector – 1080p LCD with a min. of 2200 ANSI Lumens, 1920 x 1080, 16:9, 40,000:1 contrast ratio, HDMI, VGA, USB, and a 10' diagonal, 16:9 Projection Screen.	1
Conference Room, 320 square foot (20'x16' minimum, equipped with (2) 3'x6.5' tables and (30) chairs.	1
Drawing Plotter – networked (wireless) plotter. Capable to print, copy, and scan sheet sizes between 8.5"x11" and 36"x48". Ink types to be Dye-based (C, M, Y, pK, G); Pigment-based (mK). The machine shall have print speed of 180 D/hr, 19.3 sec/D, 3D/min <sup>2</sup> with wake-up time less than 10 sec; scan speed up to 3in/sec color, 200 dpi, up to 10 in/sec grayscale, 200 dpi; Copy up to 6 in/sec color, 200 dpi, up to 10 in/sec grayscale, 200 dpi. Print resolution to be up to 2400 X 1200 optimized dpi and scan (sheetfed) resolution up to 600 dpi. The machine shall have memory capacity of 128 GB or higher file processing and hard drive capacity of 500 GB or higher. The machine shall be capable of direct print from USB flash drive, print from network shared folder and email printing. Scan format to be JPEG, TIFF and multipage TIFF, PDF and multipage PDF; shall be capable of scan directly to USB, shared network folder, printer HDD and email.	1

- ‡ Provide one (1) telephone line and two (2) telephone instruments for the exclusive use by private utilities personnel. The line shall interconnect the two telephone instruments by push button control.
- \* Provide four (4) each of Office Desks, Swivel Chairs and Waste Paper Baskets in private utilities room.
- \*\* Provide eight (8) Folding Chairs in private utilities room.
- \*\*\* Provide two (2) Fire Resistant 4-Drawer Legal Size Cabinets in private utilities room.
- \*\*\*\* Provide one (1) each of Fire Extinguisher, Drafting Table and Vertical File Rack in private utilities room.

### 3.0.1 Construction Methods

The building shall be fully equipped and made available for use and occupancy by the Department's personnel and/or Supervision Consultant not less than thirty (30) days prior to the start of any contract work.

The building interior (including access foyers, stairwells, etc.) shall be maintained in good, clean, and sanitary working condition by the Contractor for the duration of the contract. The Contractor shall provide and pay all costs for electrical service, telephone service for calls within New York City limits, hot and cold water, heat and fuel, and daily janitor service. Staples, such as paper towels, hand soap, toilet paper, and similar supplies, shall always be available.

Where necessary, the site for a mobile trailer(s) shall be graded and shoulder stone placed and maintained as directed by the Engineer to provide a parking area for City personnel and, if necessary, an approach road shall be provided. Plumbing work shall include all water supply, drainage and piping required for the operation of a complete installation. Temporary water service shall be provided from an existing main and extended into the trailer and all fixtures requiring water supply shall be properly connected up. All necessary soil, waste, vent and drainage piping shall be provided and connected to the existing sewer or as otherwise directed.

The office, incorporated facilities, equipment, and personal property of the Department's employees shall be protected by the Contractor against loss or damage from fire, theft, or other causes, at all hours of the day and night. The Contractor shall provide fire insurance, extended coverage and vandalism, malicious

mischievous and burglary, and theft insurance coverage in the amount of forty thousand dollars (\$40,000.00) for office equipment of the City of New York in the Engineer's field office and for property of City personnel that is used in the contract work and stored in the office. All insurance coverage shall be written by a company approved by the Commissioner and payable in case of loss to the City of New York. The office shall be maintained by the Contractor in first class condition until final acceptance of the work.

At the direction of the Engineer, any equipment on the above lists may be deleted. The Engineer may direct that other equipment of equivalent value be supplied by the Contractor or an appropriate credit be taken for the value of equipment not provided.

When directed by the Engineer, the Contractor shall disconnect all services and remove and dispose of all temporary installations from the site, including fencing, surfacing and utilities, the area shall then be cleaned, loamed and seeded if required and left in a neat and acceptable condition. On and after the date of the Engineer's Final Acceptance, the temporary structure and all installed equipment shall become the property of the Contractor, and shall be disposed of, by the Contractor, away from the site of the work. Engineer's Final Acceptance shall be when the Contractor has completed all punch list work and Official Completion Date has been set.

#### **4.0 NON-CONFORMANCE**

No payment will be made under Engineer's Field Office for each calendar day during which there are deficiencies in compliance with the requirements of any subsection of this specification. The first calendar day shall commence twenty-four (24) hours after notice to the Contractor of such a deficiency. This non-payment shall be deducted from the Contractor's next estimate as a charge to the Contractor on the item. The amount of such calendar day non-payment will be determined by dividing the unit price bid per month by 30.

In addition, the Contractor may be subject to liquidated damages in accordance with Schedule A.

#### **5.0 MEASUREMENT**

The quantity to be measured for payment under this item shall be the number of months that the Field Office is available for occupancy by the Field Engineers during the period of the contract. Payment will begin the first month that the office is fully equipped and accepted, serviced as specified, and made available for occupancy. The Field Office is to be continuously made available and Monthly payments will continue for the duration of the contract through a period not to exceed 6 months past the substantial completion date. When directed in writing by the Commissioner, the Field Office will be provided and paid for a period of time beyond 6 months past the substantial completion date. Payment for each month's occupancy after the date of substantial completion acceptance will be made as part of the final estimate. Monthly payments may be terminated on a specified date prior to acceptance of the contract by written notification by the Engineer that such office will no longer be required on the contract.

#### **6.0 PRICE TO COVER**

The unit price bid per month for the item Engineer's Field Office shall include the cost of furnishing all labor, materials, equipment, ground rental, fire and theft insurance, and utility charges necessary to complete the work of providing or constructing the field office; making all necessary electrical, water, sewer, and other connections required to make the above facilities operative; payment of all rental costs; furnishing and paying for heating fuel, as required; all electrical energy; private telephone services; staples, as specified; and all necessary incidentals to complete the work - all in accordance with the specifications and the directions of the Engineer.

*Payment will be made under:*

Item No.	Item	Pay Unit
6.40 CR	ENGINEER'S FIELD OFFICE (COASTAL RESILIENCY)	MONTH

**SECTION 6.52 FED – UNIFORMED FLAGPERSON**

**6.52FED.1. INTENT.** This section describes the employment of uniformed flagpersons to direct and detour traffic.

**6.52FED.2. DESCRIPTION.** The Contractor must furnish an adequate number of flagpersons to control vehicular and pedestrian traffic when it is necessary to maintain alternating one-way traffic in one lane of a two-way roadway, and at all other locations where construction operations, construction vehicles and equipment, detours, and temporary traffic patterns related to the construction operations require positive temporary traffic control for safe, efficient traffic operations.

**6.52FED.3. METHODS.** All flagpersons must be English speaking and adequately trained and certified in flagging operations by a recognized training program such as that provided by the American Traffic Safety Services Association, the National Safety Council, unions or construction industry associations, or by an individual who holds a current certification as a flagger training instructor from such a program.

All flagpersons, their apparel, hand-signaling devices, active two-way radios, and procedures to be used by them must be in compliance with the requirements of Chapter 6E. FLAGGER CONTROL, in the Federal "U.S. Department of Transportation, Federal Highway Administration, "Manual on Uniform Traffic Control Devices for Streets and Highways" current edition.

Prior to the start of flagging operations, the Contractor must provide to the Engineer a list of certified flagpersons to be used in the contract, identifying the source of flagger training for each individual. When requested by the Engineer, flagpersons must demonstrate their competency in flagging procedures. Flagpersons not competent in flagging procedures to the satisfaction of the Engineer must be retrained or replaced at once.

The Contractor will be given a minimum of 12 hours advance notice by the Engineer as to when to furnish a flagperson.

**6.52FED.4. METHOD OF MEASUREMENT.** The fixed price lump sum shown in the bid proposal for this item will be considered the price bid, although actual payment will be based on the authorized work performed by the Uniformed Flagpersons. The fixed sum is not to be altered in any manner by the bidder.

It is agreed that the quantity to be measured for payment will be the number of person-hours of uniformed flagperson service actually performed, as authorized by the Engineer.

Laborers who are not certified uniformed flagpersons will not be measured for payment as flagperson under this item.

**6.52FED.5. BASIS OF PAYMENT.** The Contract price for this item will be a lump sum price for the work performed under this item and will be equal to the total sum of the amount of allowed wages paid for all authorized Uniformed Flagpersons performing vehicular and pedestrian traffic management.

The amount to be paid per person-hour will be calculated as follows:

For the Entity directly employing the flagperson:	
<b>Wages &amp; Benefits:</b>	The hourly rates for wages & benefits (“supplemental”) will be the rates listed in the prevailing wage schedule for Laborers ( <i>Notes 1, 2</i> ).
<b>Worker’s Compensation Insurance:</b>	Worker’s Compensation Insurance will be paid for at cost, subject to the provisions of Article 26.2.9 of the Standard Construction Contract.
<b>Taxes:</b>	Applicable payroll taxes will be paid for at the appropriate cost.
<b>Overhead &amp; Profit:</b>	12% overhead markup and 10% profit markup will be applied to the wage & benefit amounts. 5% combined overhead & profit markup will be applied to the Worker’s Compensation Insurance amount. 0% overhead or profit markup on the premium portion of overtime wages. 0% overhead or profit markup on payroll taxes.

For the Contractor only, if the Entity directly employing the flagperson is a subcontractor:	
<b>Overhead &amp; Profit:</b>	5% overhead and profit on subcontractor amounts as calculated above.

Note 1: If the contract has multiple prevailing wage schedules (e.g., NYC Comptroller Section 220 prevailing wage schedule or Federal Davis Bacon prevailing wage schedule) with different Laborer wage & benefit rates, the higher wage & benefit rates will be used. The Laborer rates appropriate for the type of work being performed will be used.

Note 2: The prevailing wages & benefits in effect at the time of work will be used.

Overhead will include without limitation, all costs and expenses in connection with administration, management superintendence, and all material costs for their apparel, hand-signaling devices, active two-way radios, and any other equipment required, and insurance required by Schedule A of the General Conditions other than Workers’ Compensation Insurance.

The Contactor must submit to the Engineer satisfactory evidence of payment on certified payroll forms published by the Comptroller of the City of New York. No retainage will be withheld by the Department on such payments made under this section.

The total estimated cost of this item is the “fixed sum” amount shown for this item in the Bid Schedule. No guarantee is given that the actual total cost for this item will in fact be the “fixed sum” amount. The “fixed sum” amount is included in the total bid solely to ensure that sufficient monies will be available to pay the Contractor for these services.

The “fixed sum” is for bidding purposes only and must not be varied in the bid. The Contractor will be paid for the actual amount regardless of the fixed sum, which may be more or less than the fixed sum amount.

The Contractor must maintain separate books of accounts and must not charge any portion of the wages and benefits for Uniformed Flagpersons to another part of the work. Payment and partial payments under this item will be treated separately from the rest of the contract items.

The Comptroller's certified payroll report forms must be completed on a weekly basis and submitted to the Engineer every thirty days or whenever a payment requisition is submitted in less than thirty days. The Contractor must submit signed original daily sign-in sheets and any required daily reports, as required under this contract or directed by the Engineer.

*Payment will be made under:*

Item No.	Item	Pay Unit
6.52 FED	UNIFORMED FLAGPERSON	FIXED SUM

## SECTION ESCR 15 – OPERATION AND MAINTENANCE DATA

### 1.1 MEASUREMENT AND PAYMENT

No separate measurement or payment will be made for submittal requirements as specified herein. Payment for the work covered under this section shall be distributed throughout the existing bid items. Payment for materials incorporated in the work will not be made if required approval has not been obtained.

### 1.2 SUBMISSION OF OPERATION AND MAINTENANCE DATA

Submit Operation and Maintenance (O&M) Data specifically applicable to this contract and a complete and concise depiction of the provided equipment, product, or system, stressing and enhancing the importance of system interactions, troubleshooting, and long-term preventative maintenance and operation. The Contractor shall prepare O&M instructions including component data from subcontractors and deliver to the Engineer prior to the training of maintenance personnel. The Contractor shall compile and prepare aggregate O&M data including clarifying and updating the original sequences of operation to as-built conditions. Organize and present information in sufficient detail to clearly explain O&M requirements at the system, equipment, component, and subassembly level. Include an index preceding each submittal.

#### 1.2.1 Package Quality

Documents must be fully legible. Poor quality copies and material with hole punches obliterating the text or drawings will not be accepted.

#### 1.2.2 Package Content

Data package content shall be as shown in the Section 1.4 titled "Schedule of Operation and Maintenance Data Packages." Comply with the data package requirements specified in Section 1.4, including the content of the packages and addressing each product, component, and system designated for data package submission.

#### 1.2.3 Changes to Submittals

Manufacturer-originated changes or revisions to submitted data shall be furnished by the Contractor if a component of an item is so affected subsequent to acceptance of the O&M Data. Changes, additions, or revisions required by the Engineer for final acceptance of submitted data, shall be submitted by the Contractor within 30 calendar days of the notification of this change requirement.

#### 1.2.4 Review and Approval

The Engineer shall review the gate Systems and equipment submittals for completeness and applicability. The Engineer shall verify that the systems and equipment provided meet the requirements of the Contract documents and design intent, particularly as they relate to functionality, energy performance, water performance, maintainability, sustainability, system cost, and local environmental impacts.

#### 1.2.5 O&M Database

The Contractor shall develop a database that contains the information required to start a preventative maintenance program for all components in accordance with manufacturer instructions.

### 1.3 TYPES OF INFORMATION REQUIRED IN O&M DATA PACKAGES

#### 1.3.1 Operating Instructions

Include specific instructions, procedures, and illustrations for the following phases of operation for the installed model and features of each system:

##### 1.4.1.1 Safety Precautions

List personnel hazards and equipment or product safety precautions for all operating conditions.

##### 1.4.1.2 Operator Prestart

Include procedures required to install, set up, and prepare each system for use.

##### 1.4.1.3 Startup, Shutdown, and Post-Shutdown Procedures

Provide narrative description for Startup, Shutdown and Post-shutdown operating procedures including the control sequence for each procedure.

##### 1.4.1.4 Normal Operations

Provide narrative description of normal operating procedures. Include Control Diagrams where applicable with data to explain operation and control of systems and specific equipment.

##### 1.4.1.5 Alternative Operations

Provide narrative description of alternative operating procedures. Include Control Diagrams where applicable with data to explain alternative operation and control of systems and specific equipment.

##### 1.4.1.6 Labeling

Labeling of key parts, lubrication points, and direction of rotation for all equipment shall be provided by the Contractor.

##### 1.4.1.7 Operator Service Requirements

Include instructions for services to be performed by the operator such as lubrication, adjustment, and inspection.

##### 1.4.1.8 Environmental Conditions

Include a list of Environmental Conditions (temperature, humidity, and other relevant data) that are best suited for the operation of each product, component, or system. Describe conditions under which the item or equipment should not be allowed to operate.

#### 1.3.2 Preventative Maintenance

Include the following information for preventive and scheduled maintenance to minimize corrective maintenance and repair for the installed model and features of each system. Include potential environmental impacts of recommended maintenance procedures and materials.

##### 1.3.2.1 Lubrication Data

Include preventative maintenance lubrication data, in addition to instructions for lubrication provided under Subsection 1.4.1.7 titled "Operator Service Requirements":

- a. A table showing recommended lubricants for specific temperature ranges and applications.
- b. Charts with a schematic diagram of the equipment showing lubrication points, recommended types and grades of lubricants, and capacities.

- c. A Lubrication Schedule showing service interval frequency.

#### 1.3.2.2 Preventative Maintenance Plan and Schedule

Include manufacturer's schedule for routine preventive maintenance, inspections, tests and adjustments required to ensure proper and economical operation and to minimize corrective maintenance. For periodic calibrations, provide manufacturer's specified frequency and procedures for each separate operation. Include detailed instructions for servicing and changing casters and caster assemblies on roller gates, servicing and changing moveable parts for adjustable seals, adjusting rubber seals, gate lifting for transporting to shops for major maintenance.

#### 1.3.2.3 Cleaning Recommendations

Provide cleaning recommendations for each product, component, or system.

### 1.3.3 Corrective Maintenance (Repair)

Include manufacturer's recommended procedures and instructions for correcting problems and making repairs for the installed model and features of each system. Include potential environmental impacts of recommended maintenance procedures and materials.

#### 1.3.3.1 Troubleshooting Guides and Diagnostic Techniques

Include step-by-step procedures to promptly isolate the cause of typical malfunctions. Describe clearly why the checkout is performed and what conditions are to be sought. Identify tests or inspections and test equipment required to determine whether parts and equipment may be reused or require replacement.

#### 1.3.3.2 Wiring Diagrams and Control Diagrams

Wiring diagrams and control diagrams where applicable shall be point-to-point drawings of wiring and control circuits including factory-field interfaces. Provide a complete and accurate depiction of the actual job specific wiring and control work. On diagrams, number electrical and electronic wiring and pneumatic control tubing and the terminals for each type, identically to actual installation configuration and numbering.

#### 1.3.3.3 Maintenance and Repair Procedures

Include instructions and a list of tools required to repair or restore the product or equipment to proper condition or operating standards.

#### 1.3.3.4 Removal and Replacement Instructions

Include step-by-step procedures and a list of required tools and supplies for removal, replacement, disassembly, and assembly of components, assemblies, subassemblies, accessories, and attachments. Provide tolerances, dimensions, settings, and adjustments required. Instructions shall include a combination of text and illustrations.

#### 1.3.3.5 Spare Parts and Supply Lists

Include lists of spare parts and supplies required for maintenance and repair to ensure continued service or operation without unreasonable delays. Identify spare parts and supplies that have a long lead-time to obtain.

#### 1.3.4 Appendices

Provide information required below and information not specified in the preceding paragraphs but pertinent to the maintenance or operation of the product or equipment. Include the following:

##### 1.3.4.1 Product Submittal Data

Provide a copy of all catalog cuts, illustrations, schedules, diagrams, performance charts, instructions, and brochures illustrating size, physical appearance, and other characteristics of materials, systems, or equipment for some portion of the work.

##### 1.3.4.2 Manufacturer's Instructions

Provide a copy of all preprinted material describing installation of a product, system, or material, including special notices and information concerning impedances, hazards, and safety precautions.

##### 1.3.4.3 O&M Submittal Data

Provide a copy of all:

- Data provided by the manufacturer, or the system provider, including manufacturer's help and product line documentation, necessary to maintain and install equipment, for operating and maintenance use by facility personnel
- Data required by operating and maintenance personnel for the safe and efficient operation, maintenance and repair of the item
- Data incorporated in an operations and maintenance manual or control system.

##### 1.3.4.4 Parts Identification

Provide identification and coverage for all parts of each component, assembly, subassembly, and accessory of the end items subject to replacement. Include special hardware requirements, such as requirement to use high-strength bolts and nuts. Identify parts by make, model, serial number, and source of supply to allow reordering without further identification. Provide clear and legible illustrations, drawings, and exploded views to enable easy identification of the items. When illustrations omit the part numbers and description, both the illustrations and separate listing shall show the index, reference, or key number that will cross-reference the illustrated part to the listed part. Parts shown in the listings shall be grouped by components, assemblies, and subassemblies in accordance with the manufacturer's standard practice. Parts data may cover more than one model or series of equipment, components, assemblies, subassemblies, attachments, or accessories, such as typically shown in a master parts catalog.

##### 1.3.4.5 Warranty Information

List and explain the various warranties and clearly identify the servicing and technical precautions prescribed by the manufacturers or contract documents in order to keep warranties in force. Include warranty information for primary components.

##### 1.3.4.6 Personnel Orientation Requirements

Provide narrated instructional video footage of opening, closing, and latching of gates and reverse order to open and secure gates in the opened position using all instructed methods.

#### 1.3.4.7 Testing Equipment and Special Tool Information

Include information on test equipment required to perform specified tests and on special tools needed for the operation, maintenance, and repair of components.

#### 1.3.4.8 Testing and Performance Data

Include completed prefunctional checklists, functional performance test forms, and monitoring reports. Include recommended schedule for retesting and blank test forms. Checklist items include but are not limited to:

- Tide gates, swing gates and roller gates operate and move freely
- Latching handles on roadway gates operate and move freely
- Gates are secure when stored in locked position
- Coatings are intact with no rust
- Rubber gate seals are secured and protected with no tears
- Visible steel members and beams are correctly aligned
- Drain holes are clear of debris or other obstructions
- Tension rods are tight and lubricated
- Roller gate tracks and rails are aligned

#### 1.3.4.9 Contractor Information

Provide a list that includes the name, address, and telephone number of the General Contractor and each Subcontractor who installed the product or equipment, or system. For each item, also provide the name address and telephone number of the manufacturer's representative and service organization that can provide replacements most convenient to the project site. Provide the name, address, and telephone number of the product, equipment, and system manufacturers.

### 1.4 SCHEDULE OF OPERATION AND MAINTENANCE DATA PACKAGES

Furnish the O&M data packages specified here for specific project components. The required information for each O&M data package is as follows:

#### Swing gates

- a. Safety precautions
- b. Operator prestart
- c. Normal operations
- d. Alternative operations
- e. Operator service requirements
- f. Lubrication data
- g. Preventative maintenance plan and schedule
- h. Removal and replacement instructions
- i. Spare parts and supply list
- j. Product submittal data
- k. Manufacturer's instructions
- l. O&M submittal data
- m. Parts identification
- n. Testing equipment and special tool information
- o. Warranty information
- p. Personnel training requirements
- q. Testing and performance data
- r. Contractor information

## Roller gates

- a. Safety precautions
- b. Operator prestart
- c. Normal operations
- d. Alternative operations
- e. Operator service requirements
- f. Lubrication data
- g. Preventative maintenance plan and schedule
- h. Cleaning recommendations
- i. Removal and replacement instructions
- j. Spare parts and supply list
- k. Product submittal data
- l. Manufacturer's instructions
- m. O&M submittal data
- n. Parts identification
- o. Testing equipment and special tool information
- p. Warranty information
- q. Personnel training requirements
- r. Testing and performance data
- s. Contractor information

## Tide gates

- a. Safety precautions
- b. Operator service requirements
- c. Environmental conditions
- d. Lubrication data
- e. Preventative maintenance plan and schedule
- f. Cleaning recommendations
- g. Maintenance and repair procedures
- h. Removal and replacement instructions
- i. Spare parts and supply list
- j. Product submittal data
- k. Manufacturer's instructions
- l. O&M submittal data
- m. Parts identification
- n. Testing equipment and special tool information
- o. Warranty information
- p. Testing and performance data
- q. Contractor information

## Floodproof Manhole Covers

- a. Safety precautions
- b. Normal operations
- c. Operator service requirements
- d. Lubrication data
- e. Preventative maintenance plan and schedule
- f. Cleaning recommendations
- g. Maintenance and repair procedures
- h. Removal and replacement instructions

- i. Spare parts and supply list
- j. Product submittal data
- k. Manufacturer's instructions
- l. O&M submittal data
- m. Parts identification
- n. Testing equipment and special tool information
- o. Warranty information
- p. Testing and performance data
- q. Contractor information

#### 1.5 MEASUREMENT AND PAYMENT

No separate payment will be made for compliance with the requirements of this Section.

**SECTION HW-908 – ALLOWANCE FOR EXTRA WORK DUE TO ARCHEOLOGICAL DISCOVERIES**

In accordance with the Special Provisions article titled “ARCHAEOLOGICAL DISCOVERIES”, should extra work be ordered by the Engineer as a result of any archaeological discoveries being found under this project, it must be paid for under this item as extra work in accordance with the requirements of Article 26 in the Standard Construction Contract dated January 2018.

Payment made under this Fixed Sum item must cover the cost of all labor, materials, plant, equipment, insurance, and incidentals necessary to complete any extra work ordered by the Engineer due to archaeological discoveries found at the site.

No guarantee is given that this allowance item will in fact be required in this contract. The estimated “fixed sum” amount shown in the Bid Schedule is included in the total bid solely to insure a method of payment for any extra work performed by the Contractor, as directed by the Engineer in consultation with the City’s Archaeologist due to archaeological discoveries found at the site.

*Payment will be made under:*

Item No.	Item	Pay Unit	
HW-908	ALLOWANCE FOR EXTRA WORK DUE TO ARCHAEOLOGICAL DISCOVERIES		F.S.

## SECTION ESCR 9.30 – STORMWATER POLLUTION PREVENTION

### 9.30.1. INTENT.

The intent of this section is to address erosion and sediment control as well as control of pollutants generated during construction activities that disturb an area of one acre or more. It also includes activities involving soil disturbances of less than one acre where the Department has determined that a SPDES permit is required for Stormwater discharges that may contribute to a violation of a water quality standard. The objective is to implement a Stormwater Pollution Prevention Plan (SWPPP) that will minimize the pollutants entering the storm sewer systems in compliance with the New York's State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Runoff from Construction Activity, GP-0-20-001, issued pursuant to Article 17, Titles 7, 8 and Article 70 of the Environmental Conservation Law (ECL) and in compliance with the City's Separate Municipal Separate Storm Sewer System Construction Permitting (MS4CP) Program. The MS4CP Program was established to meet the requirements of the SPDES Permit, NY-0287890, issued on August 1, 2015 for MS4s owned or operated by the City of New York.

The Department is currently pursuing a 5-acre waiver with New York State Department of Environmental Conservation (NYSDEC), the provisions and requirements of which will be made available to the Contractor.

A copy of the SWPPP (February 2020) for the ESCR Contract is attached to the specifications and includes copies of the General Permit and the Notice of Intent (NOI) for New York. Copies of the MS4 SPDES Permit and other Information on the City's MS4CP Program are available at the following website:

<https://www1.nyc.gov/site/dep/water/municipal-separate-storm-sewer-system.page>

The sediment and erosion controls shown in the SWPPP and Sediment and Erosion Control drawings were developed for the ESCR project; any changes to scheduling or sequencing would need to be coordinated and in compliance with the SPDES General Permit for Stormwater Runoff from Construction Activity and the New York City MS4 Construction Permit.

### 9.30.2. MATERIALS AND METHODS.

The Contractor and their subcontractor(s) must sign onto the SWPPP as the operator and be responsible for implementing and maintaining the SWPPP prepared for this Contract. The Contractor shall retain the services of an independent Licensed/Certified Professional with practical experience in the principles and practices of erosion and sediment control and Stormwater management, to perform the role of the "Qualified Inspector." The "Qualified Inspector" must be a Professional Engineer or a Landscape Architect licensed to practice in New York State, or a Soil and Water Conservation Society Certified Professional in Erosion and Sediment Control (CPESC) who is independent from the Contractor.

The Contractor shall implement Stormwater Management Practices (SMPs) that are to be used to reduce the pollutants in stormwater discharges, their sequence of implementation and associated design details of the SMPs to be installed for their designated contract as shown in the SWPPP. All practices included in the SWPPP shall be in conformance with the most current version of the New York State Standard and Specifications for Erosion and Sediment Control.

The Contractor shall provide site specific updates to Erosion and Sediment Control (E&SC) Plans contained in the SWPPP to accommodate their means and methods of construction and submit these for approval. The updated E&SC Plans shall include a minimum of the following in accordance with SMPs described in the SWPPP:

1. A site map/construction drawing(s) showing the total site area, all improvements, areas of disturbance, areas that will not be disturbed, existing vegetation, the specific locations, sizes and length of each erosion and sediment control practice, on-site and adjacent off-site surface waters, wetlands and drainage patterns that could be affected by the construction activity, existing and final slopes, equipment storage areas and locations of the stormwater discharge;
2. A Construction phasing plan and sequence of operations describing the intended order of

construction activities, including clearing and grubbing, excavation and grading, utility and infrastructure installation and any other activity at the site that results in soil disturbance. The construction phasing plan must include a timeline in accordance with the overall project schedule;

3. A description of the minimum erosion and sediment control practices to be installed or implemented for each construction activity that will result in soil disturbance. Include a schedule that identifies the timing of initial placement or implementation of each erosion and sediment control practice and the minimum time frames that each practice should remain in place or be implemented;
4. A temporary or permanent soil stabilization plan that meets the requirements of the most current version of the New York Standards and Specifications for Erosion and Sediment Control, for each stage of the project, including initial land clearing and grubbing to project completion and achievement of final stabilization;
5. The dimensions, material specifications, installation details, and operation and maintenance requirements for all sediment control practices;
6. An inspection schedule for the Contractor and Sub-Contractor(s) identified in the SWPPP, to ensure continuous and effective operation of the erosion and sediment control practices; and,
7. a description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a pollutant source in the stormwater discharges.

The Contractor must obtain and maintain a copy of the prepared SWPPP materials for this Contracts, including the SWPPP, SWPPP MS4 Acceptance Form from NYC Department of Environmental Protection (DEP), and NYSDEC NOI. The Contractor is responsible for the preparation, submittal, and procurement of the Permit Initiation Form associated with the NYCDEP SCP. Work must not begin until the permit identification number is issued by the NYSDEC, SCP is issued for the project by NYCDEP, and an initial inspection is conducted by the Qualified Inspector certifying that the appropriate control measures specified in the SWPPP have been adequately implemented to the satisfaction of the Engineer in consultation with the DDC Engineering Support Unit. There are multiple Contracts with overlapping Work (SANDRESEP, SANDRESM1, SANDRESM2, and SANDRESPC) and the Contractor is responsible for any coordination of overlapping work required to fully implement the SWPPP at no additional cost to the City.

### **9.30.3. DEVIATIONS AND AMENDMENTS.**

Any Contractor-initiated amendments to the SWPPP that deviates from the NYSDEC technical standard and/or the NYCDEP Stormwater Design Manual must have a section justifying any non-conformance. The justification must include, but not be limited to, the following:

1. Statement of each deviation from City and State requirements;
2. Statement of the reasons for each deviation and reasons for supporting adopted alternatives;
3. Provide information which demonstrates that the deviation or alternative design is equivalent to the Technical Standards and the Stormwater Design Manual;
4. Analysis of the water quality impacts; and,
5. Determination of no-net-increase changes, if applicable.

The Contractor must maintain the SWPPP current and have the Qualified Inspector amend the SWPPP whenever:

1. There is a significant change in construction or operation which may have a significant effect on the potential for the discharge of pollutants to the waters of the New York State and which has not otherwise been addressed in the SWPPP; or,

2. The SWPPP proves to be ineffective in:
  - a) Eliminating or significantly minimizing pollutants generated from sources identified in the SWPPP as required by this general permit, or
  - b) Achieving the general objectives of controlling pollutants in stormwater discharges from permitted construction activities.

Additionally, the SWPPP must be amended to identify any new Contractor or Sub-contractor that will implement any measures of the SWPPP. Any Contractor-initiated amendments to the SWPPP shall be made at no additional cost to the City.

#### **9.30.4. CERTIFICATION.**

The SWPPP must clearly identify the Contractor and Sub-contractors that will implement each measure identified in the SWPPP. The Contractor and all Subcontractors identified in the SWPPP and who perform professional services at the site must implement the provisions of the plan and provide certification of the SWPPP in accordance with the provisions of the general permit GP-0-15-002 and the SCP. The Contractor must also certify in the SWPPP that all appropriate stormwater and erosion control measures will be in place before commencement of construction of any segment of the project that requires such measures. Such certifications must become part of the SWPPP for the construction activity covered under this general permit. The Certification must include the name and title of the person providing signature of this permit; the name address and telephone number of the contracting firm; the address or other identifying description of the site; and, the date the certification is made.

#### **9.30.5. SITE ASSESSMENT, INSPECTION AND MAINTENANCE.**

The Contractor must have the Qualified Inspector conduct an assessment of the site prior to commencement of construction and certify in an inspection report that the appropriate erosion and sediment controls described in the SWPPP have been adequately installed or implemented to ensure overall preparedness of the site before the commencement of construction. Following the commencement of construction, site inspections must be conducted by the Qualified Inspector at least every seven (7) calendar days and within twenty-four (24) hours of the end of each rainfall event of 0.5 inches or greater. For construction sites where soil disturbance is greater than five (5) acres at one time, the Qualified Inspector must conduct at least two (2) site inspections every seven (7) calendar days and within twenty-four (24) hours of the end of each rainfall event of 0.5 inches or greater and any additional inspections as required by NYSDEC or NYCDEP. The two inspections must be separated by a minimum of two (2) full calendar days. Subsequent to each inspection, the Qualified Inspector must prepare an inspection report and submit the original to the Engineer and one copy to the Infrastructure-Engineering Support Unit. At a minimum, the inspection report must include, but not limited to, the following information:

1. Date and Time of inspection;
2. Name and Title of person performing the inspection;
3. A description of the weather and soil conditions (e.g. dry, wet, saturated) at the time of the inspection;
4. A description of the condition runoff at all points of discharged from the construction site. This must include identification of any discharges of sediment from the construction site;
5. A description of the condition of all-natural surface waterbodies located within or immediately adjacent to the properties boundaries of the construction site which receive runoff from disturbed areas. This must include identification of any discharges of sediment to the surface waterbody;
6. Record of any evidence of soil erosion on the site, potential for pollutants entering the drainage systems, problems at discharge points (such as turbidity in receiving water) and signs of soil and mud transport from the site to the public road at the limits of the project;
7. Identification of all erosion and sediment control practices that need repair or maintenance;
8. Identification of all erosion and sediment practices that were not installed properly or are not functioning as designed and need to be reinstalled or replaced;

9. Description and sketch of areas that are disturbed at the time of the inspection and areas that have been stabilized (temporary and/or final) since the last inspection;
10. Corrective actions that must be taken to install, repair, replace or maintain erosion and sediment control practices; and to correct deficiencies identified with the construction of post-construction stormwater management practices;
11. Digital photographs, with date stamp, that clearly show the condition of all practices that have been identified as needing corrective actions. The Qualified Inspector must attach paper color copies of the digital photographs to the inspection report. The Qualified Inspector must also take digital photographs with date stamp, that clearly show the conditions of the practice(s) after the corrective actions has been completed;
12. Within one business day of the completion of an inspection, the Qualified Inspector must notify the Contractor and the Engineer of any corrective actions that need to be taken. The Contractor must begin implementing the corrective actions within one business day of this notification; and,
13. All the inspection reports must be signed by the Qualified Inspector.

The Contractor must retain a signed copy of the General Permit GP-0-15-002, NOI, SWPPP, signed MS4 SWPPP Acceptance form, NOI Acknowledgment Letter, the SCP, and all original inspection reports required by this general permit at the construction site in a prominent place for public viewing from the date of initiation of construction activities to the date of final stabilization and the Notice of Termination (NOT) has been submitted to the NYSDEC and NYCDEP. These documents must be made available to the permitting authority upon request.

In addition, the Contractor and Subcontractors must identify at least one person who is an employee of the company that will be responsible for a day to day implementation of the SWPPP. The name and telephone number of this person should be listed in the SWPPP. This person must be known as the Trained Contractor and must have received a DEC-endorsed four (4) hours of Erosion and Sediment Control training. After receiving the initial training, the Trained Contractor must attend a four (4) hours training every three (3) years. The Contractor must ensure that at least one Trained Contractor is on site on a daily basis when soil disturbance activities are being performed.

Performing implementation of a SWPPP on a permitted construction project without a Trained Contractor on site daily is a violation of Part III.A.6 of the SPDES General Permit. Stormwater controls must be maintained in good operating condition until all disturbed soils are permanently stabilized. Control devices in need of repair should be repaired promptly after identification.

Once construction is completed, the Contractor must submit the NYSDEC Notice of Termination (NOT) to DEP for the MS4 acceptance signature. If required, the Contractor shall prepare a Stormwater Maintenance Permit application consisting of the NOT, as-built plan(s), operation and maintenance manual that designates the entity responsible for long term maintenance of SMPs, and any required fees as specified in the NYCDEP MS4 Stormwater Rule. NYCDEP may inspect the SMP(s) at any time and any deficiencies must be resolved by the Contractor at no additional cost to the City. Prior to filing of the Notice of Termination (NOT), or at the end of the permit term, the Contractor must have the Qualified Inspector perform a final site inspection. The Qualified Inspector must certify that the site has undergone final stabilization using either vegetative or structural stabilization methods and that all temporary erosion and sediment controls (such as silt fencing) not needed for long term erosion control have been removed. Subsequently, the Contractor must submit a complete NOT to the Engineering Support Unit to terminate the permit coverage.

Additionally, the Qualified Inspector must identify all permanent Stormwater management structures that have been constructed, and provide the owner(s) of such structures with a manual describing the operation and maintenance practices that will be necessary in order for the structures to function as designed after the site has been stabilized.

The Qualified Inspector must also certify that the permanent structures have been constructed as described in the SWPPP.

**9.30.6. STABILIZATION.**

The Contractor must initiate stabilization measures by the end of the next business day in areas of the site where construction activities have temporarily or permanently ceased, and completed within fourteen (14) days from the date the current soil disturbance activity ceased. For construction sites that directly discharge to one of the 303(d) segments listed in the Appendix E of the General SPDES permit, the application of soil stabilization measures must be initiated by the end of the next business day and completed within seven (7) days from the date the current soil disturbance ceased.

**9.30.7. CONTRACTOR'S LIABILITY.**

The Contractor must be liable for any discharge that either causes or contributes to a violation of water quality standards as contained in Parts 700 through 705 of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York. Should any stormwater runoff from the site violate the water quality standards, the Contractor will be directed to take immediate steps, at the Contractor's own expense, to rectify the situation and prevent any further sediment from entering the storm sewer system.

In the event that pollutants are discharged to the stormwater system due to the Contractor's negligence, the Engineer will direct the Contractor to cease any or all construction activities contributing to the release of these pollutants. The Contractor must be held responsible, at the Contractor's own cost, for any and all necessary actions to remedy the damage.

Furthermore, failure of the Contractor and Sub-contractor(s) to strictly adhere to any permit requirements must constitute a permit violation that could result in substantial criminal, civil, and administrative penalties.

It is the Contractor's responsibility to pay all the SPDES permit fees which must consist of the yearly regulatory fee, the initial authorization fee per acre of land disturbed and per acre of future impervious area. The Contractor must be liable for all penalties incurred due to the Contractor's failure to pay these fees on time.

**9.30.8. MEASUREMENT AND PAYMENT.**

Payment will be made at the lump sum price bid for the item Stormwater Pollution Prevention, which must include, but not be limited to, the cost of furnishing all the labor, materials, fees, permits and testing required to provide and construct all erosion and sediment control devices in accordance with the approved SWPPP; providing a Qualified Inspector to design, report, inspect and monitor the work; comply with NYSDEC permitting requirements and all necessary incidentals to complete the work all in accordance with the specifications and the directions of the Engineer.

Ten percent (10%) of the lump sum price bid will be paid when both NYSDEC and NYCDEP have issued a permit identification number and SCP for the project, respectively.

Seventy percent (70%) will be paid in proportion to the percentage of construction completion.

Twenty percent (20%) will be paid when the operation is demobilized and removed from the site, the Notice of Termination (NOT) is filed with NYSDEC and all SPDES permit fees have been paid.

*Payment will be made under:*

Item No.	Item	Pay Unit
ESCR-9.30	STORMWATER POLLUTION PREVENTION	L.S.

## SECTION ESCR-5 – CONSTRUCTION AND DEMOLITION WASTE MANAGEMENT

### 1.01 DESCRIPTION

These general conditions specify sustainability compliance and documentation requirements. Specific sustainable design and construction strategies incorporated into the Project include, but are not limited to:

- A. Waste Management and Recycling
- B. Use of Materials with Recycled Content
- C. Use of locally-manufactured materials
- D. Use of low-emitting materials
- E. Use of certified wood products
- F. Lead Reduction

### 1.02 RELATED DOCUMENTS

- A. S-Pages Article “Greenhouse Gas Emissions”
- B. S-Pages Article “Revisions: Specifications and Contract Drawings”
- C. FLOODWALL-Pages Section ESCR-6.27
- D. HAZ-Pages Section ESCR 8.01
- E. GENERAL-Pages Section ESCR 9.30

### 1.03 SUBMITTALS

Submittal No.	Paragraph No.	Submittal	Submittal Type
1	3.01.A	Compliance Documentation in accordance with NYS Governor’s Executive Order 111	For Information
2	3.01.B	Sustainable Materials Submittal Form	For Information
3	3.01.C.9	Waste Management and Recycling Plan	For Approval
4	3.01.C.10	Monthly Recycling Reports	For Information
5	3.02.A	Environmental Performance Records	For Approval

### 1.04 CITED STANDARDS

- A. New York State Governor’s Executive Order 111 “Green and Clean” State Buildings and Vehicle Guidelines
- B. United States Green Building Council (USGBC) green building assessment: Leadership in Energy and Environmental Design, LEED-NC, Version 2.2
- C. Environmental Protection Agency Comprehensive Procurement Guidelines
- D. Forest Stewardship Council (FSC) for Certified Wood
  - a. “FSC Principles and Criteria of Forest Stewardship”
- E. Green Seal Environment Standard for Paints
  - a. GS-11 Top Coat Paints
  - b. GC-03 Anti-corrosive and Anti-rust paints
- F. South Coast Air Quality Management District (SCAQMD) Rules and Regulations
  - a. Regulation XI, Rule 1113 – Architectural Coatings
  - b. Regulation XI, Rule 1168 – Adhesive, Sealant, and Sealant Primer Applications
- G. Bay Area Air Quality Management District (BAAQMD) Rules and Regulations
  - a. Regulation 8, Rule 51 – Adhesive and Sealant Products
- H. US Environmental Protection Agency/US Department of Energy (EPA/DOE) Energy Star Program
- I. Federal Trade Commission (FTC) Guides for the Use of Environmental Marketing Claims
  - a. 16 CFR 260.7(e) – Recycled Content
- J. Environmental management systems consistent with ISO (International Organization for Standardization) 1401

- K. Product-specific type III Environmental Product Declaration (EPD) conforming to ISO 14025, 14044.
- L. ISO 14021 Environmental labels and declarations – Self declared environmental claims (Type II environmental labelling)

## **PART 2 PRODUCTS - Not used**

## **PART 3 EXECUTION**

### **3.01 RESPONSIBILITIES**

The Contractor must implement relevant criteria in accordance with NYS Governor's Executive Order 111 "Green and Clean" State Buildings and Vehicles Guidelines and submit supporting documentation to demonstrate compliance. At least 15% of all project materials, supplies, and equipment must meet the cited standards in 1.04. Contractor must provide calculation of the percentage of the total project materials by cost, weight, or volume. Contractor must provide all material/supplier tracking forms and/or spreadsheets. At least 5% of all project materials must include recycled content as described in ISO 14021. Contractor must provide percentage of reused or recycled materials by weight, volume, or cost. Additionally, the Contractor must provide inventory of specifications of materials containing recycled content. Inventory must include the name of the product, the name of the manufacturer, the weight, volume, or cost of the material, and the percentage of recycled content (either post-industrial or post-consumer recycled content).

Sustainability Submittal Packages: The Contractor must designate a member of its team to be responsible for tracking and submitting all sustainability documentation. A Sustainable Materials Form must be submitted monthly. Electronic copies must be submitted at the end of the Project including all cumulative data. The Form must include the following information:

- A. Breakdown by weight for the materials included in the Contractor's or subcontractor's scope of Work.
- B. Percentages by weight of post-consumer and/or post-industrial recycled content in the supplied products
- C. Identification of materials manufactured or harvested within a 500-mile radius of the Project site.
- D. Identification of Forest Stewardship Council (FSC)-certified wood products
- E. Volatile Organic Compound (VOC) content of all interior field-applied adhesives, sealants, paints and coatings.

### **3.02 WASTE MANAGEMENT AND RECYCLING**

A. The Contractor must minimize the impact to the environment due to waste production from construction activities.

B. The Contractor must divert at least fifty percent (50%) of all demolition and general construction waste from landfills by one or a combination, of the following activities:

- salvage,
- reuse,
- source-separated recycling, or
- co-mingled recycling.

Land clearing debris (including spoils) is exempt from the landfill diversion requirement.

C. Where practicable, the Contractor must stockpile and reuse non-contaminated, non-hazardous on-site excavated materials. Beneficial re-use of spoil is to be given priority.

D. The Contractor must designate a specific area to facilitate separation of materials for potential salvage, recycling and waste. Recycling and waste bin areas must be kept neat and clean and clearly marked in order to avoid contamination of materials.

E. The Contractor must oversee and document results of the Waste Management and Recycling Plan. The Contractor must provide on-site instruction covering separation, handling and recycling, salvage, reuse and return methods to be employed by all parties at the appropriate stages of the project.

F. The Contractor must develop, submit for approval, and implement a Waste Management and Recycling Plan within thirty (30) days after Notice of Award. The Waste Management and Recycling Plan must contain the following information:

- a. Estimate the total proposed jobsite waste to be generated, including types and quantities
- b. Proposed alternatives to Landfilling: A list of each materials proposed to be salvaged, reused, or recycled during the course of the Project, the proposed destination for each material and the projected amount (by weight or cubic yards).
- c. Materials handling procedures. A description of the means by which any waste material that must be salvaged or reused must be protected from contamination, and a description of the means to be employed in recycling the above materials consistent with the requirements for acceptance by recycling facilities to be utilized.
- d. Identify licensed haulers, transfer stations, processors of recyclables, and transportation procedures.

G. The Contractor must maintain records of all recycled materials and submit monthly Recycling Reports. The Reports must include:

- a. Project title, name of company completing report, the dates of the period covered by the report, and Contract Number.
- b. Include legible copies of the on-site logs, weight tickets, and receipts. Receipts must be from recycling and/or disposal site operators who can legally accept the materials for the purpose of reuse, recycling, or disposal.
- c. If mixed C&D waste is sorted off-site, provide documentation from the processor stating that the average percentage of mixed C&D waste they recycle. The documentation must be the latest annual recycling report to the NYS Department of Environmental Conservation pursuant to 6 NYCRR Part 360 regulations, or a letter from the processor containing the equivalent information if the report is not available.
- d. In the event that the Contractor cannot fulfill the diversion rate specified, the Contractor must notify the Engineer as soon as possible. The Contractor must provide documentation showing a good faith effort was made to achieve the diversion rate.
- e. Report on the disposal of all jobsite waste including:
  1. Recycled materials. For each material provide the following:
    - a. Amount (in tonnage or cubic yards)
    - b. Dates removed from the project site
    - c. Receiving party
  2. Reused or salvaged materials. For each material, provide the following:
    - a. Amount estimated (in tonnage or cubic yards)
    - b. Description of actual use
  3. Landfilled Material. For each material provide the following:
    - a. Amount (in tonnage or cubic yards) of material landfilled from the Project
    - b. Dates removed from the jobsite
    - c. Identity of the transfer station or landfill
    - d. The percentage of each material recycled, reused, salvaged and/or landfilled must be indicated, both for the progress period and cumulatively for the Project. The total percentage of waste diverted from landfilling, both for the progress period and cumulative total, must be clearly indicated.

H. The Contractor must include a waste reduction provision in material purchase agreements requesting that materials and equipment be delivered in packaging made of recyclable materials, that they reduce the amount of packaging, that packaging be taken back for reuse or recycling, and to take back all unused product. The Contractor must ensure that subcontractors require the same provisions in their purchase agreements.

I. The Contractor is encouraged to seek information from all sources in order to minimize disposal costs. There are numerous opportunities to sell or donate salvaged materials and accrue tax benefits (which could accrue to the Contractor). There exist outlets that will pick up, and in some cases buy, recyclable materials. Information sources are as follows:

- a. New York Waste Match: <https://www.opengreenmap.org/greenmap/less-more-nyc/nyc-waste-match-36062>

## **PART 4 MEASUREMENT AND PAYMENT**

### **4.01 MEASUREMENT AND PAYMENT**

No separate payment will be made for complying with the requirements of this section.

## SECTION ESCR-6 - CONSERVATION OF WATER AND ENERGY

### 1.01 DESCRIPTION

These conservation conditions specify sustainability compliance and documentation requirements. Specific construction conservation strategies incorporated into the Project include, but are not limited to:

- A. Construction Energy Consumption
- B. Construction Water Consumption

### 1.02 RELATED DOCUMENTS – Not Used

### 1.03 SUBMITTALS

Submittal No.	Paragraph No.	Submittal	Submittal Type
1	3.01.A	Summary of planning review and identification of strategies to reduce energy consumption	For Information
2	3.01.C	Documentation that strategies have been implemented	For Information
3	3.02.A	Summary of planning review and identification of strategy(ies) to reduce water consumption	For information
4	3.02.C	Calculations of potable water saved	For Information

### 1.04 CITED STANDARDS – Not Used

### PART 2 PRODUCTS - Not used

### PART 3 EXECUTION

#### 3.0 RESPONSIBILITIES

The Contractor must implement strategies to reduce construction energy and water consumption.

#### 3.01 CONSTRUCTION ENERGY CONSUMPTION

A. The Contractor must participate in at least one (1) planning review to identify and analyze the potential for reducing energy consumption during construction.

B. The Contractor must implement at least two (2) of the following strategies to reduce construction energy consumption:

- a. Tier IV construction equipment or Tier III with Best Available Technology (BAT) for at least 75% of non-road equipment fleet greater than 50 horsepower;
- b. Alternative fuels in heavy equipment such as biodiesel for at least 5% of total fuel consumption;
- c. Electrified equipment for at least 20% of equipment (vs. gas or diesel engines);
- d. Employee commuting programs with incentives (shuttles to transit, ride-share programs, biking facilities, etc.);
- e. Reduce purchased energy for workstations (construction trailer/office energy) by 30% for two of the following: (1) lighting; (2) HVAC; (3) plug loads;
- f. Purchase green power (RECs) for 30% of workstation energy consumption;

- g. Offset electrical consumption by generating 5% renewable energy on site (e.g., solar panels on trailer complex, solar-powered temporary light plant, solar-powered cameras and variable message sign boards); and
- h. Reduce overall fuel consumption by 10% through improved planning and logistics. Specific strategies may include:
  - i. Reduce number of deliveries;
  - ii. Reduce idle times;
  - iii. On-site reuse of soils or other materials to decrease truck traffic to and from site (ties into Reduced Excavated Material taken off site);
  - iv. Reduce on-site trucking – proper logistics planning such as staging material in close proximity to installation location;
  - v. Schedule acceleration without additional resource consumption;
  - vi. Waterborne/rail transportation of materials versus trucking (third-party distribution or logistics);
  - vii. On-site plants (concrete plant/asphalt plant) in lieu of trucking material to the site; and
  - viii. Prefabrication of design elements.

C. The Contractor must provide all relevant evidence supporting strategies implemented on a monthly basis.

### **3.02 CONSTRUCTION WATER CONSUMPTION**

A. The Contractor must participate in at least one (1) planning review to identify and analyze the potential for reducing water consumption during construction.

B. The Contractor must implement at least one (1) of the following strategies to reduce construction energy consumption:

- a. High-efficient fixtures in construction trailers or offices (demonstrate a 40% reduction in usage)
- b. Monitoring and management (demonstrate team's ability to detect leaks and respond to inefficiencies in the system)
- c. Reduce embodied water of materials by reducing waste material (calculate a 10% reduction in material quantities entering the site as new material)
- d. Reduced embodied water through material selection (permanent and temporary materials) (Demonstrate how product selection has contributed to reduced potable water consumption by more than 25%)
- e. Stormwater harvesting (show 40% savings by using harvested stormwater)
- f. Greywater or wastewater effluent reuse (show 40% reuse)
- g. Dewatering reuse (show 40% reuse/recycling)

C. The Contractor must provide calculations of potable water saved per gallon for each strategy as compared to not implementing the strategy over the construction duration.

D. The Contractor must provide all relevant evidence supporting strategies implemented.

## **PART 4 MEASUREMENT AND PAYMENT**

### **4.01 MEASUREMENT AND PAYMENT**

No separate payment will be made for complying with the requirements of this section.

## SECTION ESCR-7.13 WF1 – MARITIME LOAD-OUT FACILITY

### 1.0 DESCRIPTION

This work shall consist of providing, furnishing and maintaining an offsite maritime facility capable of accepting, inspecting, storing, and loading materials, equipment and other items onto barges or vessels for transportation to/from the Project Site.

This work shall consist of providing a waterfront pier, property, or facility within 25 miles of the Project Site capable of accepting all materials, equipment and items related to the project for inspection, transfer, and transportation to/from the project site via barge and/or vessel.

### 2.0 CONSTRUCTION DETAILS

The facility must comply with the following minimum requirements:

- Capable of marine transfer operations for vessels, barges and other floating equipment to be utilized on the project.
- Capable of materials and equipment transfer .
- Capable of berthing multiple vessels, barges, and other floating equipment, such that the facility's ability to loadout for the project is not affected, including the capacity of the pier, bulkhead, or waterfront structure to support all loads anticipated by the project and/or equipment needed.
- Have storage space available to allow pre-staging of the project and bulk delivery of materials for timely mobilization to the project site.
- Be designed to meet the Storm Water Pollution Prevention Plan (SWPPP), and prevent any material from entering the waterway during transfer.
- Have office space available for the Engineer with sanitary facilities, power, space for 2 desks, and high-speed internet.
- Be accessible by the Construction Manager and all staff for controlled inspections of materials and equipment prior to mobilization to the project Site
- Have no less than 3 parking spots available for the Engineer.

The Facility must be fully equipped and made available for use by the Contractor as necessary to support the Contractor's schedule.

### 3.0 METHOD OF MEASUREMENT

The Facility will be measured for payment as the number of months satisfactorily provided, measured to the nearest 0.25 months.

### 4.0 BASIS OF PAYMENT

The unit price bid per month for the Maritime Load-out Facility shall include the cost of all labor, materials and equipment necessary to complete the work including but not limited to property rental, berthing and mooring costs, equipment, facility construction, permits, field offices, utility charges and incidental expenses. Payment will be made for each month of availability where the facility actually supports the Project site.

No payment will be made under Maritime Load-out Facility for each calendar day during which there are deficiencies in compliance with these requirements. The first calendar day shall commence 24 hours after notice to the Contractor of such a deficiency. This nonpayment shall be deducted from the next contract payment. The amount of such calendar day nonpayment will be determined by dividing the unit price bid per month by 30.

Monthly payments may be terminated prior to Substantial Completion by written notification from the Engineer that the Facility will no longer be required.

Payment will be made under:

<b>Item No.</b>	<b>Item</b>	<b>Pay Unit</b>
ESCR-7.13 WF1	Maritime Load-out Facility	Month

## SECTION ESCR-7.13WF2 – ON-SITE WATERFRONT OPERATIONS FACILITY

### 1.0 DESCRIPTION

This work shall consist of providing, furnishing and maintaining a Waterfront Operations Facility capable of accepting (receiving), inspecting, storing, and loading vessels, barges, materials, equipment and other items to and from barges, vessels, and the project site. Due to limited land-access and roadways capable of supporting the project, the Contractor is expected to utilize maritime transportation to the project site to the maximum extent possible. The Contractor must plan the Work and utilize the Waterfront Operations Facility so that divisible materials such as fill are not delivered to site via tractor-trailer multi-unit vehicles, and so that no oversize truck deliveries are required.

#### 1.01 Waterfront Operations Facility

This work shall consist of providing operational waterfront facilities to support the project, such as, barges, spud barges, jackup barges, construction trestles, temporary piers, temporary wharves, articulating ramps and gangways, roll on-roll off (RORO) facilities, lift on – lift off (LOLO) facilities, moorings, floating moorings, fendering, and vessels at the Project Site. The to:

- Stage all waterfront and floating equipment.
- Accept all materials, equipment and items related to the project for inspection, transfer, and transportation to the project site via barge and/or vessels.
- Accommodate all facets of marine and waterfront construction including but not limited to floating equipment, dive crews, barges, falsework, and vessels.

#### 1.02 Inspection Boat

This work shall consist of providing and maintaining a motorized boat for exclusive use by the Construction Manager and the Inspection Staff for the express purposes of transportation and inspections at the Project Site.

#### 1.03 Tug Boat

This work shall consist of providing and maintaining a manned tug or push boat at the project site capable of moving floating equipment as-needed, where-needed, and provide maritime security on a 24-hour basis.

### 2.0 CONSTRUCTION DETAILS

#### 2.01 Waterfront Operations Facility

The facility must be planned, designed, laid out, constructed, operated, and removed by the Contractor in order to accommodate all anticipated marine construction and transfer activities. The Waterfront Operations Facility must:

- Deep draft as necessary for marine transfer operations for vessels, barges and other floating equipment to be utilized on the project.
- Include all necessary piers, wharves, fender systems, ramps, gangways, vessel berthing, monopiles, dolphins, moorings, loading facilities, barge anchorages, crane lift plans, barge stability certification (USCG), and other miscellaneous structures.
- Capable of all necessary materials and equipment transfer.
- Support all marine construction on the site including but not limited to infrastructure construction, waste removals, marine fueling, safety boats, soils transfer, moorings, berthing, maintenance and inspections.
- Capable of berthing multiple vessels, barges, and other floating equipment, such that the facility's ability to loadout for the project is not affected, including the capacity of the pier, bulkhead, or waterfront structure to support all loads anticipated by the project and/or equipment needed.
- Be designed to meet the Storm Water Pollution Prevention Plan (SWPPP), and prevent any material from entering the waterway during transfer.

- Be accessible by the Engineer.

### **2.02 Marine Surveying**

The Contractor shall perform all marine surveying tasks necessary to undertake and complete the work in this Section including, but not limited to:

- bathymetric and topographic surveys.
- Utility surveys, submerged or otherwise.
- mapping of appurtenances, features, navigation structures, moorings, buoys, bridge piers, pier fenders, and utilities as needed.
- locating boundaries, easements, tunnels, anchorages and any other items that may affect the work on the water.
- Waterway surveys including navigational channels.

### **2.04 Permits and Approvals**

The contractor shall be responsible for obtaining all permits with regards to the work in this section including but not limited to the US Army Corps of Construction Managers (USACE), NYS Department of Environmental Conservation (NYSDEC), NYS Office of General Services (OGS), NYC Department of Small Business Services (DSBS), the United States Coast Guard (USCG), and all ancillary, prerequisite, or otherwise necessary approvals:

- The Contractor shall prepare all environmental analyses and procure all environmental permits and approvals as needed for all Contractor-located areas, including staging, borrow and disposal sites, and any other areas used by the Contractor, for its convenience, in the execution of the Project.
- The Contractor shall be responsible for preparing all permit application materials, performing all environmental analyses and obtaining all environmental permits and approvals necessary for the Project and not already obtained by the Department, including those that are precipitated by the Contractor's design or actions that deviate from the requirements of any acquired permit(s) (if any) and any preliminary environmental documents. For any such approvals required to be obtained or environmental analyses to be performed by the Contractor that must formally be issued in the Department's name, the Department will cooperate with the Contractor as reasonably requested by the Contractor, including execution and delivery of appropriate applications and other documentation as prepared by the Contractor.
- Prior to submitting to third parties, the Contractor shall submit any permit/approval applications for review by the Construction Manager. The Contractor shall also submit the final environmental review compliance documents to the Construction Manager for review. The Contractor shall allot five (5) business days for the Department to review and comment on the completeness and adequacy of the application materials. It shall then be the Contractor's discretion to address any Department comments or elect to move forward with the application materials as submitted to the Department.
- The Contractor shall be solely responsible for compliance with and violations of any Environmental Requirements.
- The Contractor is responsible for any fines, non-compliance, violations, or damages incurred by reason of failure of the Contractor to comply with the requirements of this Section, Environmental Analyses, Permits, and Approvals. Any penalties, fines or damages imposed upon the Department shall be deducted from monies owed the Contractor.
- The Contractor shall be responsible for payment of all permit application and permit issuance fees for the Environmental Approvals necessary for the Project not already obtained by the Department.

### **2.05 Inspection Boat**

The Contractor shall provide and maintain a suitable motor boat, with an operator or operators therefor, for the exclusive use by the Engineer in connection with the Work.

- The boat shall be enclosed and shall have the size, motor power and seaworthiness suitable for its intended use on rough open waters during strong weather events.
- The boat and boat operator shall be ready for use by the Engineer at all times that Work is in progress.
- Each individual boat operator shall be contactable by the Engineer whenever on shift.
- The boat shall have the ability to carry the weight of the boat operator and eight passengers within its

rated capacity.

- The boat shall be a minimum of 24 feet in length and with a beam of 8 feet. The motor shall have a minimum rating of 150 horsepower.
- A marine radio, life preservers, anchor, anchor and mooring lines, oars and oar locks, lights and other equipment as necessary to comply with marine regulations shall be provided and maintained in operating order by the Contractor.
- The Contractor shall be responsible for arrangements for berthing the boat when not in use.
- The Contractor shall provide and maintain suitable landing docks and steps to permit safe and easy access to the boat. Upon completion of the Work under this Contract, the boat and accessories shall remain the property of the Contractor.

The Contractor shall furnish the boat within 5 work days after written notification by the Construction Manager, and the boat shall, thereafter, be available at all times to the Construction Manager and other personnel authorized by the Construction Manager.

### **2.06 Tug Boat**

The Contractor shall provide and maintain a suitable tug or push boat, with an operator or operators therefor, on site, 24 hours a day, capable of moving and responding to any situation on site with regards to waterfront construction or floating equipment. During normal on-shift operations, the Tug Boat may be assigned to construction; off-hours the Tug Boat is to remain on site and be dedicated to emergency response, security, and operation requiring off-hours Tug Boat operations. At no time shall this Tug Boat be assigned off-site without a replacement vessel on site capable of performing the requirements of this section.

- The vessel operator shall be contactable by the Engineer whenever on shift.
- The vessel shall have the ability to move any vessel or floating equipment on site.
- The vessel shall have the ability to respond to fires on the construction site.
- A marine radio, life preservers, anchor, anchor and mooring lines, oars and oar locks, lights and other equipment as necessary to comply with marine and towing regulations shall be provided and maintained in operating order by the Contractor.
- The Contractor shall be responsible for arrangements for berthing the boat on site, and providing facilities for the personnel at all times.
- The Contractor shall provide and maintain suitable landing docks and steps to permit safe and easy access to the boat. Upon completion of the Work under this Contract, the boat and accessories shall remain the property of the Contractor.

The Contractor shall furnish the boat upon mobilization to the Project Site with any floating equipment or vessels, and the vessel shall, thereafter, be stationed and manned on site at all times through completion of the project or as otherwise directed by the Engineer. The vessel stationed on site shall be selected for its capability to maintain 24-hour operations, respond to any emergency within 30 minutes, and be capable of moving, securing, towing, and/or pushing any vessel on site, providing fire-fighting capabilities (fire pump and nozzle), and emergency evacuation of any waterfront facility or vessel.

## **3.0 METHOD OF MEASUREMENT**

### **3.01 Waterfront Operations Facility**

The Facility will be measured for payment as the number of months satisfactorily provided, measured to the nearest 0.25 months.

### **3.02 Inspection Boat**

The Inspection Boat will be measured for payment on a monthly basis, measured to the nearest 0.25 months.

### **3.03 Tug Boat**

The Tug Boat will be measured for payment on a monthly basis, measured to the nearest 0.25 months.

## 4.0 BASIS OF PAYMENT

### 4.01 Waterfront Operations Facility

The unit price bid per month for the Waterfront / Maritime Load-out facility shall include the cost of all Construction Management permits, USCG Approvals, labor, materials and equipment necessary to complete the work including but not limited to facilities construction, berthing and mooring infrastructure, vessel supply, equipment, field offices, utility charges and incidental expenses. Payment will be made for each month of availability where the facility actually supports the Project site.

No payment will be made under Waterfront Operations Facility for each calendar day during which there are deficiencies in compliance with these requirements. The first calendar day shall commence 24 hours after notice to the Contractor of such a deficiency. This nonpayment shall be deducted from the next contract payment. The amount of such calendar day nonpayment will be determined by dividing the unit price bid per month by 30.

Monthly payments may be terminated prior to contract Substantial Completion by written notification by the Engineer that such the Waterfront Operations Facility is no longer required on the contract.

### 4.02 Inspection Boat

The unit price bid per month shall include the cost of furnishing all labor, fuel, maintenance, repairs, registration permits, the operator, and other necessary incidentals for operation of the boat. A deduction of 1/30 of a month will be made for each 24- hour period, or portion thereof, during which the boat is unavailable to the Engineer, regardless of the reason for the boat's unavailability. Payment will begin the first month the boat is furnished and made available for use. Monthly payments may be terminated on a specified date prior to Substantial Completion by written notification by the Engineer that the Inspection Boat will no longer be required.

### 4.03 Tug Boat

The unit price bid per month shall include the cost of furnishing all labor, fuel, maintenance, repairs, registration permits, the crew, and other necessary incidentals for operation of the Tug Boat. A deduction of 1/30 of a month will be made for each 24- hour period, or portion thereof, during which the Tug Boat is unavailable, regardless of the reason for the boat's unavailability. Monthly payments may be terminated on a specified date prior to Substantial Completion by written notification by the Construction Manager that the Tug Boat will no longer be required. Payment will only be made for one Tug Boat at a given time.

Payment will be made under:

<b>Item No.</b>	<b>Item</b>	<b>Pay Unit</b>
ESCR-7.13 WF2	Inspection Boat	Month
ESCR-7.13 WF3	Tug Boat	Month
ESCR-7.13 WF4	Waterfront Operations Facility	Month

## SECTION ESCR-10 – AIR QUALITY MONITORING

### 1.1 DESCRIPTION

- A. This section specifies the procedures and requirements for Construction Air Quality Monitoring (AQM) and Reporting.
- B. Prior to construction commencement, the Contractor must develop and implement a construction AQM plan that will measure air pollutant emissions at selected locations during construction activities. The air quality monitoring plan must be submitted to the Engineer for approval.
- C. The AQM plan must specify the monitoring locations, the alert thresholds, the procedures for monitoring, the distribution list for regular air emissions data reports, the course of action for reporting and responding to exceedances of air quality alert thresholds, and maintenance protocols.

### 1.2 GENERAL REQUIREMENTS

- A. It is expected that AQM during construction will be conducted in a minimum of six (6) locations or as determined by the Engineer. It is also expected that the AQM stations will be relocated as necessary during construction to reflect the sequence of construction, as approved and directed by the Engineer. The Contractor will also develop a distribution and action plan for the monitoring data.
- B. AQM stations must be maintained to continuously record particulate matter concentrations and meteorological data on a real-time basis. Monitoring must be performed prior to the start of construction to obtain pre-construction background data.
- C. Particulate matter (PM<sub>2.5</sub>, and PM<sub>10</sub>) must be collected continuously, 24-hours a day and 7 days a week, for the duration of the construction period. Meteorological data, which will include barometric pressure, humidity, precipitation, temperature, wind speed, and wind direction, must be collected from stations that include meteorological monitoring equipment.
- D. The AQM stations must be configured to obtain the data averaged over 1-minute intervals, and the data will be used to record running 15-minute averages for particulate matter (PM<sub>2.5</sub> and PM<sub>10</sub>) monitoring. These 15-minute averages must be compared with the background concentrations to monitor conformance with the applicable allowable limits which would be established as part of the AQM plan and determine any changes in air emissions levels due to construction activities.
- E. Annual calibration and maintenance in conformance with the manufacturer's specifications must be conducted for the AQM and meteorological instrumentation.

### 1.3 AIR QUALITY REQUIREMENTS

- A. Construction activity must not increase limits beyond the National Ambient Air Quality Standards.
- B. Measures must be taken to reduce pollutant emissions during construction in accordance with all applicable laws, regulations, and building codes, including Local Law 77 of 2003 which requires the use of ULSD and best available technology (BAT):
- C. Clean Fuel. Ultra Low Sulfur Diesel (ULSD) fuel must be used exclusively for all diesel engines throughout the construction site, including marine equipment.

- D. Dust Control Measures. To minimize dust emissions from construction activities, a dust control plan including a robust watering program is required. This plan must include that all trucks hauling loose material must be equipped with tight-fitting tailgates and their loads securely covered prior to leaving the project area; water sprays must be used for all excavation and transfer of soils to ensure that materials will be dampened as necessary to avoid the suspension of dust into the air. Loose materials (e.g., on-site material storage piles) will be watered or covered. All construction-related dust reduction measures required by DEP’s Construction Dust Rules will be implemented.
- E. Idling Restriction. In accordance with Title 24, Chapter 1, Subchapter 7, Section 24-163 of the NYC Administrative Code, the local law restricting unnecessary idling on roadways, truck idle time must be restricted to three minutes except for those vehicles that are not using their engines to operate a loading, unloading, or processing device (e.g., concrete mixing trucks) or otherwise required for the proper operation of the engine.
- F. Best Available Tailpipe Reduction Technologies. Nonroad diesel engines with a power rating of 50 hp or greater, and controlled truck fleets (i.e., truck fleets under long-term contract with the proposed project), including, but not limited to concrete mixing and pumping trucks, must utilize BAT for reducing diesel particulate matter emissions. Diesel particulate filters (DPFs) have been identified as being the tailpipe technology currently proven to have the highest emissions reduction capability and must be used on all nonroad diesel engines rated at 50 hp or greater, either installed by the original equipment manufacturer or retrofitted. Retrofitted DPFs must be verified by the EPA or the California Air Resources Board. Other technologies proven to achieve an equivalent emissions reduction may also be used.
- G. Utilization of Newer Equipment. All nonroad construction equipment with a power rating of 50 hp or greater must meet at least the Tier 3 emissions standard.
- H. Diesel Equipment Reduction. the Contractor’s means and methods must minimize the use of diesel engines and utilize electric engines to the highest extent practicable. Equipment that should use electric engines in lieu of diesel engines includes, but may not be limited to, welders, compressors, and rebar benders.

**1.4 SUBMISSION REQUIREMENTS**

- A. AQM plan for Engineer’s approval.
- B. Monthly reports of AQM results, including detailed air quality data at each monitoring location throughout each workday during the monitoring period.

**1.5 MEASUREMENT**

Air quality monitoring will be measured for payment as the number of months satisfactorily performed, measured to the nearest month.

No payment will be made for periods where the air quality monitoring is not performed to the requirements of this section, the AQM plan, or as directed by the Engineer.

**1.6 PRICE TO COVER**

The unit price bid per month must include the cost of furnishing all labor, materials, equipment, insurance, and other necessary incidentals required to complete the work in accordance with the specifications and the directions of the Engineer.

Item No.	Item	Pay Unit
ESCR-10	AIR QUALITY MONITORING	MONTH <input type="checkbox"/>

## SECTION ESCR-11 – NOISE MONITORING

### 1.1 DESCRIPTION

- A. This section specifies the procedures and requirements for Construction Noise Monitoring and Reporting.
- B. Prior to the construction commencement, the Contractor must develop and implement a construction noise monitoring plan that will continuously measure both equivalent ( $L_{eq}$ ) and maximum ( $L_{max}$ ) noise levels at selected locations during construction activities. The noise monitoring plan will provide measured noise levels during construction to determine whether construction-generated noise levels do/do not exceed the applicable limits on construction noise in the NYC Noise Control Code.
- C. The noise monitoring plan must specify the proposed monitoring locations, the alert thresholds, the procedures for monitoring, a distribution list for regular noise data reports, the course of action for reporting and responding to exceedances of noise alert thresholds, and maintenance protocols. □

### 1.2 GENERAL REQUIREMENTS

- A. It is expected that noise monitoring during construction will be conducted at a minimum of four (4) locations, or as required to document the noise requirements below, or as determined by the Engineer. It is also expected that the noise monitoring stations will be relocated as necessary to reflect the sequence of construction and more intensive noise emissions in accordance with the protocol and as directed by the Engineer. The Contractor will also develop a distribution and action plan for the monitoring data.
- B. At each noise monitoring location, noise monitoring must be conducted using a Type I or Type II sound level meter that allows for wireless remote data transfer and is capable of measurements using the Fast or Slow time-weighting as described in the NYC Noise Control Code. In the event of construction-induced noise exceeding the alert threshold, a short audio recording must automatically be made, and an email alert must be sent to designated recipients. In the event that the permissible thresholds are repeatedly exceeded, the Contractor must re-evaluate and adjust the Contractor's construction methods before proceeding.
- C. Noise monitoring must be performed as follows at each location:
  - 1. Prior to the start of all construction activities to obtain baseline levels; and
  - 2. During construction to continuously monitor conformance with allowable limits and determine any changes in noise levels due to construction activities.

### 1.3 NOISE REQUIREMENTS

- A. Pile installation activities associated with the floodwall and closures structures that are within 50 feet of any residences, must produce no more than an 80 dBA  $L_{max}$  noise level (i.e., sound pressure level) at a distance of 50 feet.

Pile installation activities, where feasible and practicable, must be limited to between the hours of 7 AM and 6 PM. This excludes any activities that need to occur adjacent to the FDR Drive where work needs to be conducted during night time as per DOT's OCMC requirements.
- B. For construction activity that will occur during night-time (i.e., 6 PM to 7 AM) and weekend hours within 50 feet of any residence, the  $Leq(1)$  noise level resulting from construction

must not exceed 80 dBA as measured at the exterior façade of any residential dwelling unit.

- C. Quieter equipment models for cranes, generators, compressors, and lifts that result in up to a reduction in noise levels may be necessary to achieve the noise requirements above.
- D. Using barging for deliveries of construction materials (including concrete) and importing of fill to the project sites, rather than trucks on roadways to from the construction work areas may be necessary to achieve the noise requirements above.
- E. Construction equipment that would operate on barges or within the river would be required to comply with all of the same regulations and commitments as on-land equipment that are subject to the New York City Noise Control Code.

#### **1.4 SUBMISSION REQUIREMENTS**

- A. Noise monitoring plan for Engineer's approval.
- B. Monthly reports of noise monitoring results, including detailed noise level data at each monitoring location throughout each workday during the monitoring period.

#### **1.5 MEASUREMENT**

Noise monitoring will be measured for payment as the number of months satisfactorily performed, measured to the nearest month.

No payment will be made for periods where the noise monitoring is not performed to the requirements of this section, the noise monitoring plan, or as directed by the Engineer.

#### **1.6 PRICE TO COVER**

The unit price bid per month must will include the cost of furnishing all labor, materials, equipment, insurance, and other necessary incidentals required to complete the work in accordance with the specifications and the directions of the Engineer.

Item No.	Item	Pay Unit
ESCR-11	NOISE MONITORING	MONTH

**SECTION ESCR-HW-901 – TEMPORARY PHASING MEASURES****ESCR-HW-901.1. DESCRIPTION.**

This section describes the Contractor's responsibilities and obligations for temporary measures required in any and all work locations necessary due to the phased construction generally described by Contract Drawings PH001 – PH021 for the duration of the contract. This is in addition to any and all responsibilities and obligations in and around the site included as any other part of the Contract drawings and specifications.

The contractor is advised that the overall contract documents are intended to indicate the existing conditions of the work site, as well as to provide direction and details of construction for the final reconstruction. The contractor is hereby advised however that the work site and sequence of construction must be broken down into phases to allow the public to utilize a significant portion of the park, and its amenities, while construction in the closed sections is ongoing.

Contract Drawings PH001 – PH021 include a suggested phasing plan established to indicate one sequence of work that assures that the public has ready access to certain specific park amenities, as well as a targeted minimum percentage of open park space. The contractor shall, before any park related work begins, submit for approval his Site Specific Phasing plan for meeting these requirements. The contractor may, at his option, submit for approval an alternate or revised Site Specific Phasing plan differing from Contract Drawings PH001 – PH021 that meets the targeted goals. Note that this alternate or revised phasing plan may, or may not, be approved by the Engineer.

The Contractor's Site Specific Phasing Plan shall include specific details as to how park utilities shall be maintained both before, during and after construction takes place in each phase and at each location. Specifically, this utility phasing plan shall explicitly address how the contractor intends to maintain site irrigation, electric, plumbing, etc., in a manner that the open sections of the park, both before, during and after construction in each area, will function normally and safely and be maintained and operational in manner acceptable to the Engineer, Parks Department and the public.

The work under this Section shall include any and all work required to meet the phasing requirements indicated in the contract drawings and described in this section, and/or the Site Specific Phasing Plan submitted and proposed by the contractor and accepted by the Engineer.

The work under this Section includes but not is limited to the following:

1. Temporary measures, including the furnishing, installation, maintenance and removal of a temporary pedestrian bridge over the FDR Drive as necessary to maintain public access to open areas of the park and the Corlears Hook Ferry.
2. Any and all temporary fencing and secured access gates required due to specific phasing requirements
3. Temporary measures, including the delivery and installation of temporary walls and/or bracing, required due to the grade differences between Phases 1 and Phase 2.
4. Any and all temporary drainage structures in the existing or newly installed partial sewer systems required due to the phased construction. This includes but is not limited to temporary manholes, temporary bulkheads, fluming and pumping, etc.
5. Any and all temporary access required to both allow pedestrians to have access to open parks during Phases 1 and 2, and to provide and maintain any and all required contractor access to the work site.

6. Any and all temporary measures required to ensure that existing and newly installed park utilities, including but not limited to irrigation, electric, plumbing, outside utilities, sanitation and any and all additional utilities necessary to maintain a safe and operational park, are kept operational in a manner acceptable to the engineer, Parks Department and the general public.

The Contractor is placed on notice that safe and clean access to parks and the Corlears Hook Ferry, both before, during and after any and all work under this contract, must be available to the public throughout all phases of the work and during all operations performed by the Contractor. Further, the Contractor is placed on notice that the monitoring by the City of the temporary measures required by this section is considered for the purposes of the contract to be a project objective necessary to eliminate and/or mitigate public disruption and inconvenience, and to ensure public health and safety. The Contractor shall therefore, at all times, conduct his operations in a manner which promotes clean and well-maintained Parks, and ensures the convenience, safety and health of general users consisting of, but not limited to, the motorist, the pedestrian and the abutting property owners/tenants, as well as those of the Contractor's employees.

The provisions of this section are supplementary to and do not abrogate the General Conditions (Section 1.06) or the General Notes on the Contract Drawings relating to the protection and cleanup of the site, and the delivery and storage of materials at the site. Furthermore, any conditions pertaining to the maintenance, protection, and cleanup of the construction site during the life of the contract which are addressed in the General Conditions and in the General Notes on the Contract Drawings, whether or not addressed under this Section, shall be deemed as having been addressed under this Section.

#### **ESCR-HW-901.2 METHODS.**

##### **(A) GENERAL**

Work under this Item shall start from the date of written notice to commence work or from the actual start of construction work, whichever is earlier.

The Contractor shall be responsible for the maintenance of the contract streets or portions of streets pursuant to Article 7 of the Standard Construction Contract.

The Contractor shall provide the necessary personnel, materials and equipment for all necessary temporary measures and equipment required by his phasing plan. The Contractor shall be fully responsible for maintaining all temporary measures in an acceptable condition and protecting the completed work until relieved of such responsibility by acceptance of the contract or the completed items of work.

##### **(B) Corlears Hook Temporary Pedestrian Bridge**

The Contractor shall provide the necessary personnel and equipment to provide a Corlears Hook Temporary Pedestrian Bridge for public access across the FDR drive to open areas of the site as well as the Corlears Hook Ferry through all phases of the work necessary for the removal and replacement of the existing Corlears Hook Bridge. Before the existing Corlears Hook Bridge is taken out of service and work for the replacement bridge is completed and the new bridge deemed open for public use, the contractor shall provide, maintain and remove a temporary pedestrian bridge to provide public access to open portions of the site as well as the Corlears Hook Ferry

across the FDR drive. Note that the utilization of the Montgomery street entrance into the site is specifically excluded as an acceptable means of providing the necessary ferry access.

This work consists of the design (as applicable), furnishing, rental, installation, maintenance and removal of a 10 foot wide prefabricated modular temporary pedestrian bridge, complete, including all columns, lighting, stairs, etc., as needed, with a service life of at least 60 months. Note that the work shall include regrading and temporary paving as necessary to provide ADA access to both sides of the bridge. The location of the bridge is as generally shown on the suggested phasing drawings with the specific location and installation details to be submitted by the contractor to the Engineer for approval. The work shall also include restoration of the area and maintenance and protection of pedestrian traffic in the temporary sidewalk area. This work is also includes the construction, maintenance, operation (including providing energy) and removal of the temporary lighting system. The design pedestrian live load for the temporary bridge must not be less than 90 PSF. The temporary bridge must be ADA compliant, including handrails.

The contractor is responsible to obtain any and all NYCDOT permits required to install and remove the temporary pedestrian bridge.

The Contractor shall submit to the Engineer for review and approval in advance of any work all necessary details regarding the temporary pedestrian bridge, including manufacturer, design, fabrication, installation and removal and restoration, for review and approval before site work begins. The manufacturer shall provide examples of similar projects where temporary pedestrian bridges of the similar size, span and type required by this contract were successfully utilized.

#### (C) Temporary Measures Required by Phasing

The Contractor shall provide the necessary material, personnel and equipment required in any and all work locations necessary due to the phased construction indicated in the Contract documents and in conformance with the Contractor's Site Specific Phasing Plan. Those work items of work required include but are not limited to the following:

##### (i) Temporary Phasing Fencing

In order that the Contractor shall maintain all areas at the work site in such a condition and conduct operations in such a manner that the public can navigate near and thru (as required) the work site significant temporary fencing shall be required. This fencing shall be placed along the shared use path, between open and under construction areas required by the specific phasing requirements and accepted, to provide a safe and designated walking path from the Corlears Hook ferry to the Corlears hooks temporary pedestrian bridge across the FDR drive, and any and all other areas that fencing is deemed by the Engineer to be required by the contractors' specific work and phasing plan. The Contractor shall submit to the Engineer for review and approval in advance of any work his specific fencing and gate plan for review and approval before site work begins. The fencing shall be moved, relocated, expanded and/ or reduced as deemed necessary. The fencing required under this section shall provide a physical barrier to safely separate the public and the contractor's operations, such as shielded fending, concrete barrier and/or plywood enclosures. The specific details of the fencing shall be included as part of the fencing plan noted above.

This temporary fencing shall also include the installation, removal and staffing of all access gates into and out of the site. These gates shall be secured at all times and staffed around the clock in such a manner that other contractors, parks department personnel and all emergency responders shall have immediate access when required.

##### (ii) Temporary Phasing Drainage Structures

The Contractor shall be responsible for the continued operations of all existing drainage structures during the work under this contract until such time that their replacement, if any, is complete and new drainage flow and routes are established. The Contractor's phasing plan may result in the need to install, maintain and removed temporary drainage structures to meet this requirements. These temporary structures include but are not limited to temporary bulkheads, fluming, temporary manholes, etc.

(iii) Temporary Support and/or Walls Due to Phase Grade Differentials.

The Contractor's Site Specific phasing plan may result in significant grade differentials between those areas closed and under construction and those areas open to the public. Temporary walls and or other measures separating these areas and accounting for the required grade changes shall be constructed and maintained by the contractor. These measures shall serve to accommodate the grade changes, safeguard the public from entering the work site, minimize noise and dust infiltration into the open park areas.

The contractor shall submit for approval his specific means and measures for accommodating the grade changes and safeguarding and protecting the site for review and approval. The plan shall include the specific materials to be utilized, as well as all necessary installation and removal procedures during each phase. Dependent upon the type, location and size of the temporary structures the contractor may request and the Engineer will consider if the wall can be left in place in whole or in part. Any revisions or alteration to the temporary wall required to obtain approval for it to be left in place shall be made by the contractor at no increase in cost to the city.

(iv) Temporary Measures (paths, lighting, ramps, etc.,) to Provide Public Site Access.

As indicated in the contract drawings, certain areas and functions within the Park shall remain open and available to the public at various stages of the work. The Contractor's site specific phasing plan shall indicate and the contractor shall implement those measures necessary to assure that the public has adequate, safe and code compliant access to all open park areas during all phases of the work. This shall include temporary lighting as required by the contractor's specific demolition and removal sequence.

This public access measures must also specifically ensure that the public has reasonable access to sanitary facilities, either existing, reconstructed or temporary, during all phases of the work. Any temporary sanitary facilities provided by the Contractor to meet this requirement shall be cleaned, maintained and serviced as needed and as directed by the Engineer and shall be at a minimum equal to the existing services in that area.

(v) Temporary Measures to Maintain Existing Park Utilities

The contractor's site specific phasing plan must include specific details as to how park utilities shall be maintained both before and after construction takes place in each phase and at each location. This utility phasing plan shall specifically address how the contractor intends to maintain site irrigation, electric, plumbing, etc., in a manner that the open sections of the park, both before and after construction starts in each area, will function normally and safely and be maintained and operational in manner acceptable to the public.

(vi) Temporary Measures to Maintain General Site access

The contractor's site specific phasing plan shall include all measures necessary to assure that the contractor, as well as contractor's working on adjacent work areas, and any and all emergency vehicles, shall have safe access to the site both before and after the work required under this contract. These measures shall specifically include temporary paving, and subsequent maintenance, of the shared use construction path. This shall also include the installation, removal

and staffing of all access gates into and out of the site as well as any and all Contractor proposed temporary entrance and exit ramps into the site other than those indicated on the contract drawings. Note that all access gates shall be secured and manned 24 hours a day, 7 days a week in a manner to insure that other contractors and any and all emergency or city maintenance vehicles have ready and unencumbered access to the site at all times.

(vii) Additional measures

The contractor shall perform any and all necessary work required to maintain the work site and all open park areas and amenities in a safe and secure manner, and in conformance with all applicable rules and regulations, regardless of those items explicitly included above and as directed by the Engineer.

**ESCR-HW-901.3. NONCONFORMANCE.**

No payment will be made under Items ESCR-HW-901 or ESCR-8.07 for each calendar day during which there are deficiencies in compliance with the foregoing specification requirements, as determined by the Engineer and made evident by the Engineer's failure to sign documents each day approving payment to be made under this item.

If the Contractor fails to maintain any and all of the items of work required by Items ESCR-HW-901 or ESCR-8.07 or any portion thereof, adequately and safely for a period of three (3) or more consecutive hours, the Engineer may correct the adverse conditions by any means deemed appropriate, including, but not limited to, "outside services," and shall deduct the cost of the corrective work from any monies due the Contractor. The cost of this work shall be in addition to the nonpayment for site maintenance listed above.

However, where continued nonconformance with the requirements of this specification is noted by the Engineer, and prompt Contractor compliance is deemed not to be obtainable, all contract work may be stopped by direct order of the Engineer, regardless of whether corrections are made by the Engineer as stated in the paragraph above. Any delays caused by such stoppage(s) will be the sole responsibility of the contractor.

Furthermore, in addition to the remedies specified above, in the event the Contractor shall fail to comply, within three (3) consecutive hours after written notice from the Engineer, with the requirements of the contract and the specifications in the matter of providing facilities and services for the maintenance, protection and cleanup of the construction site, the Contractor shall pay to the City of New York, until such notice has been complied with or rescinded, the sum shown per calendar day in Schedule A, for each instance of such failure, as liquidated damages and not as a penalty, for such default.

Any money due the City of New York under this provision shall be deducted from the amounts due or to become due to the Contractor for work performed under the contract.

**ESCR-HW-901.4. MEASUREMENT.**

(A) Temporary Pedestrian Bridge (Lump Sum)

The unit price bid for procuring, delivering, installing, removing and maintaining the Temporary Pedestrian Bridge must include the cost of furnishing all labor, materials, plant, equipment, insurance and incidentals required to provide safe and ready access to the site as described above, and in accordance with the directions of the Engineer. Payment for the temporary pedestrian bridge shall be made in accordance with a lump sum breakdown provided by the Contractor and deemed acceptable to the Engineer.

(B) Temporary Measures Required by Phasing (Lump Sum)

The unit price bid for Installing, maintaining and removing(as necessary) any and all temporary measures required by phasing shall include the cost of furnishing all labor, materials, plant, equipment, insurance and incidentals required to perform the services noted above and as directed by the Engineer. Payment will be made in proportion to the percentage of actual contract completion based upon the original contract value. Measurement for this item shall not begin until actual construction work is started at the site.

**ESCR-HW-901.5. PRICE TO COVER.**

(A) Temporary Pedestrian Bridge (Lump Sum)

The unit price bid for installing and removing the Temporary Pedestrian Bridge shall include the cost of furnishing all labor, materials, plant, equipment, insurance and incidentals required to provide safe and ready access to the site as described above, and in accordance with the directions of the Engineer.

(B) Temporary Measures Required by Phasing (Lump Sum)

The unit price bid for Temporary Measures Required by Phasing shall include the cost of furnishing all labor, materials, plant, equipment, insurance and incidentals required to perform the services noted above, to provide safe and ready access to and maintenance of the site as described above, and in accordance with the directions of the Engineer.

Where no separate item is provided for this work, the cost thereof shall be deemed to be included under all scheduled items.

## (A) GENERAL SPECIAL PROVISIONS

A1. LINES AND GRADES. The Contractor shall furnish lines and grades in accordance with Section 1.06.27 of the NYCDOT Standard Highway Specifications, except that survey controls established for this project may no longer exist and the Contractor shall be required to re-establish the survey control information using official Borough Survey Control Monuments and Bench Marks, where they exist. The Contractor shall check with Topographic Section of the Borough President's Office as to the reliability and accuracy of the data to be used for lines and grades.

A2. SPECIFIC TRAFFIC STIPULATIONS. Under this contract, the Contractor shall perform the work in strict accordance with the requirements of Section 6.70 in the Standard Highway Specifications, specific traffic stipulations as called for on the plans, OCMC Traffic Stipulations attached to the end of these Special Provisions, and the directions of the Engineer. In case of a conflict, the Engineer's decision shall be final.

In addition, the cost of compliance with requirements of the OCMC Traffic Stipulations, unless otherwise provided for, shall be deemed included in the prices bid for all scheduled items.

In addition to the requirements provided in the OCMC Traffic Stipulations, Traffic Enforcement Agents (TEA) are required as follows:

1. Full closures of the FDR Drive northbound or southbound: TEA at 38 locations per closure, with one TEA per location. Locations to be confirmed with the Engineer prior to the Contractor's submission of MPT plans for approval by the Engineer.
2. All other closures, including partial closures of the FDR Drive: No TEA are anticipated to be required.

A3. HOLIDAY CONSTRUCTION EMBARGO. A special Holiday Construction Embargo shall be in effect on the Friday of the week preceding Thanksgiving Day week from 6:00 AM to 11:59 PM and again from the Monday of Thanksgiving Day week from 6:00 AM through January 2, at 11:59 PM. Roadway and sidewalk construction activities will be restricted during the embargo period on the streets listed below\*.

Any permits issued prior to the date of this notice, for work during this embargo period on the streets listed below which do not already have the permit stipulation "410" are hereby suspended for the period noted above. All permittees must comply with this embargo unless a special waiver is granted by OCMC. Waiver requests must be

filed at least thirteen days before Thanksgiving Day, in the Permit Office by filing a "Request for Roadway/Sidewalk Permits During

"Embargo Periods" and submitting supporting documentation. Waiver requests should only be submitted for critical reasons for a specific project. If a waiver is granted, the applicant will be notified so they can apply for the approved permits. Waivers **are not** required for ongoing Building Construction Activity Permits which already include the "410" permit stipulation. Waiver request forms may be obtained at any Permit Office or on the Department of Transportation's website at: <http://www.nyc.gov/html/dot/downloads/pdf/holidayembapp.pdf>

Prior to this embargo period all necessary measures must be taken so that all roadways and sidewalks are in proper condition to allow for the expeditious and safe movement of vehicular, bicycle and pedestrian traffic. Tool carts, cable reels, containers, and material stored on roadways must be removed during the embargo period.

The opening of utility access covers is prohibited on any of the streets noted below between the hours of 6:00 AM and midnight unless the utility or Contractor files for an Emergency Authorization Number as required by section 2-07 of the Department of Transportation's Highway Rules. The planned opening of utility access covers may occur during the hours of 12:01 AM and 5:59 AM where no authorization number is required.

Temporary restoration of the streets and sidewalks and removal thereof, if required for the Holiday Embargo period, will be paid for under the appropriate scheduled items.

No extension of time due to the shutdown period will be granted to the Contractor for completion of the work.

---

**\* Please note that this embargo only applies to NYCDOT construction permits.**

**\* List of street and maps of the affected locations are available by borough on the Department of Transportation's website at:**

**<http://www.nyc.gov/html/dot/html/motorist/trafalrt.shtml>**

A4. CONTRACT ITEMS THAT INCLUDE BACKFILL AS A PART OF THEIR WORK. The following shall pertain to all contract items that have backfill as a part of their work: Backfilling shall comply with Subsection 4.11.3 of the Standard Specifications and no additional payment will be made for any Highway or Street Lighting work item requiring Contractor to furnish additional fill material to meet these requirements when backfilling.

A5. ACCELERATED PROJECT SCHEDULE AND COMBINATION OF STAGES. Contractor shall plan and/or stage the Contractor's work schedule using all hours/days available. Contractor is advised that all applicable unit prices shall include, for the purpose of this contract, all overtime costs, premium time costs, shift differentials required to complete construction within the specified "Time(s) of Completion" stipulated in this contract.

Contractor shall be permitted to accelerate this project, to combine stages and/or work sequences. Any such changes shall be shown in the construction schedule, to be furnished in accordance with the General Provisions of the Standard Specifications and the "CRITICAL PATH METHOD (CPM) SCHEDULE" Article and shall be submitted for approval of the Engineer.

A6. DISPOSAL OF EXCESS EXCAVATED MATERIAL. All excess excavated material, with the exception of contaminated material, shall become the property of the Contractor and shall be properly disposed of away from the site, at the Contractor's expense. Contaminated material shall be disposed of separately in accordance with contract requirements.

A7. NO EXTENSION OF TIME FOR WINTER SHUT-DOWN. Where the Contractor's approved work schedule for installing sidewalk, curb, roadway base and/or pavement falls within the winter period of December 1st through April 1st, the Contractor will NOT be granted an extension of time for completion of this contract due to the winter shut-down period, unless otherwise provided in Schedule A.

A8. PRIVATE UTILITY HARDWARE ADJUSTMENTS. will be performed by the owning utility company or its agent, at its expense. The Contractor shall notify the utility company 72 hours prior to start of work at each location where its hardware requires adjustment.

A9. SURVEY MONUMENTS. When working in the vicinity of survey monument the Contractor shall hand excavate per Item 8.02 A and 8.02 B at City Survey Monuments, for a distance of five (5) feet around each monument, as directed by the Engineer.

A10. RESTORATION OF ADJACENT AREAS. The Contractor shall be required to remove all form work. In planting strip areas, the Contractor shall be required to restore areas damaged as a result of the Contractor's operations, to the satisfaction of the Engineer, with sod. The Contractor shall also, as directed by the Engineer, make safe adjacent areas to the Contractor's work, such as: restoring missing or damaged pavement markings that were removed or damaged as a result of the Contractor's operations (as per requirements of Section 6.44 in the Standard Specifications); resetting granite blocks in tree pits; and, applying asphaltic concrete mixture (Item 4.02 CB) where badly broken sidewalk or curb may create a dangerous condition just outside the Contractor's area of operation, where and when directed by the Engineer.

All restoration work shall be done to the satisfaction of the Engineer.

A11. USE OF CITY WATER. The Contractor is notified that for use of City water under this project the Contractor shall be required to obtain a water use permit from the Department of Environmental Protection at the Contractor's own cost.

A12. ITEM NO. "6.52 FED". The contractor is notified that wherever the Item No. "6.52 CG" and words "Crossing Guard" are used in the Contract Documents and Drawings it shall mean the Item No. "6.52 FED" and the words "Uniformed Flagperson", respectively.

A13. FUEL COST. The Contractor is notified that the fuel cost per gallon used in the formula under Sub-Article 26.2.8 of the Standard Construction Contract for **Extra Work** will be derived from the fuel price index for the United States East Coast published weekly by the United States Energy Information Administration ("USEIA"), and available on its website at <http://www.eia.gov/petroleum/gasdiesel/>. The USEIA-published cost per gallon for the applicable fuel on the East Coast for the week in which the first day of each calendar quarter during the contract term occurs (i.e., January 1<sup>st</sup>, April 1<sup>st</sup>, July 1<sup>st</sup> and September 1<sup>st</sup>) will be used in the reimbursement formula for all **Extra Work** invoiced that was performed during that calendar quarter. Should the USEIA stop publishing this fuel price index, the fuel cost per gallon will be determined by reference to a substitute index to be agreed upon by the Contractor and the City. Fuel reimbursed under the method described in this article is not eligible for the Fuel Price Adjustment payment under Item 698.05.

A14. DPR CONSTRUCTION PERMITS. NYC Department of Parks and Recreation (DPR) Construction Permits are required for all work on parkland or on sidewalks adjacent to parks or other areas maintained by DPR.

A15. START OF CONTRACT WORK. The Contractor is notified that a Notice To Proceed (NTP) date will be issued for work to commence within 21 to 30 Days of Contract Registration.

A16. N.Y.C. TRANSIT INSURANCE. The Contractor (Permittee) shall indemnify and save harmless the City of New York and the New York City Transit (Permitter) in accordance with the following "Insurance Requirements" and proof that the necessary insurance is in effect will be required before work can commence:

#### NYCT "OUTSIDE CONTRACT" INSURANCE REQUIREMENTS

1. The Permittee at its sole cost and expense shall carry or cause to be carried and shall maintain at all times during the period of performance under this Agreement policies of insurance as herein below set forth below:

(A) Workers' Compensation Insurance (including Employer's Liability Insurance) with limits as specified in Schedule A, which limit may be met by a combination of primary and excess insurance meeting the statutory limits of New York State. The policy shall be endorsed to include Longshoreman's and Harbor Workers' Compensation Act/Maritime Coverage Endorsement and/or Jones Act Endorsement when applicable.

(B) Commercial General Liability Insurance (I.S.O. 2001 Form or equivalent) approved by Permitter in the Permittee's name with limits of liability as specified in Schedule A for each occurrence on a combined single limit basis for injuries to persons (including death) and damages to property. The limits may be provided in the form of a primary policy or combination of primary and umbrella/excess policy. When the minimum contract amounts can only be met when applying the umbrella/excess policy; the Umbrella/Excess Policy must follow form of the underlying policy and be extended to "drop down" to become primary in the event primary limits are reduced or aggregate limits are exhausted. Such insurance shall be primary and non-contributory to any other valid and collectable insurance and must be exhausted before implicating any Permitter/MTA policy available.

Such policy should be written on an occurrence form; and shall include:

- Contractual coverage for liability assumed by the Permittee under this agreement;
- Personal and Advertising Injury Coverage;
- Products-Completed. Operations;
- Independent Contractors Coverage;
- "XCU" coverage (Explosion, Collapse, and Underground Hazards) where necessary;
- Contractual Liability Exclusion, applicable to construction or demolition operations to be performed within 50 feet of railroad tracks, must be voided, where necessary; and,
- Additional Insured Endorsement (I.S.O. Form CG 20 26 07/04 version or equivalent) approved the Permitter naming:

New York City Transit Authority (NYCTA), the Manhattan and Bronx Surface Transit Operating Authority (MaBSTOA), the Staten Island Rapid Transit Operating Authority (SIRTOA), MTA Capital Construction Co., the Metropolitan Transportation Authority (MTA) including its subsidiaries and affiliates, and the City of New York (as Owner).

(C) Business Automobile Liability Insurance Policy - (I.S.O. Form CA 00 01 10 01 or equivalent) approved by the Permitter is required if Permittee's vehicle enters Permitter property. The insurance must be in the name of the Permittee or its contractor entering the Permitter property with limits of liability in the amount specified in Schedule A for claims for bodily injuries (including death) to persons and for damage to property arising out of the ownership, maintenance or use of any owned, hired or non-owned motor vehicle.

(D) Railroad Protective Liability Insurance policy shall be required as specified in Schedule A.

(E) Environmental/Pollution Exposures In the event environmental or pollution exposures exist, the Permittee shall require the environmental contractor or sub-contractor to provide the applicable insurance covering such exposure. The limits and type of insurance provided shall be satisfactory to the Permitter and will be confirmed to the parties prior to the start of the work.

2. General Requirements Applicable to Insurance Policies

(a) All of the insurance required by this Article shall be with Companies licensed or authorized to do business in the State of New York with an A.M. Best Company rating of not less than A-/VII or better and reasonably approved by the *Permitter/MTA and shall deliver evidence of such policies.*

(b) Except for Workers Compensation, all references to forms and coverages referred to above shall be the most recent used by the Insurance Services Office, Inc. (ISO") or equivalent forms approved by the Insurance Department of the State of New York, provided, however, that excess coverages may be written on forms reasonably acceptable to Permitter containing provisions other than those contained in ISO forms but otherwise conforming in substance to the requirements of this Article.

(c) The Permittee or its Contractor performing the work shall furnish evidence of all policies before any work is started to the permitter using the following link

<https://us.marketplace.asite.com/marketplace/main/detail/28/1/1/5512158/forms>

These policies must: (i) be written in accordance with the requirements of the paragraphs above, as applicable; (ii) be endorsed in form acceptable to include a provision that the policy will not be canceled, materially changed, or not renewed, unless otherwise indicated herein, at least thirty (30) days prior written notice to the Permitter c/o MTA Risk and Insurance Management (MTA RIM) Department – Standards, Enforcement & Claims Unit, 2 Broadway – 21st floor, New York, NY 10004; and (iii) state or be endorsed to provide that the coverage afforded under the contractor's policies shall apply on a primary and not on an excess or contributing basis with any policies which may be available to the Permitter/MTA, and also that the contractor's policies, primary and excess, must be exhausted before implicating any Permitter/MTA policy available. (iv) In addition, contractor's policies shall state or be endorsed to provide that, if a subcontractor's policy contains any provision that may adversely affect whether contractor's policies are primary and must be exhausted before implicating any Permitter/MTA policy available, contractor's and subcontractor's policies shall nevertheless be primary and must be exhausted before implicating any Permitter/MTA policy available. Except for Professional Liability, policies written on claims made basis are not acceptable. At least two (2) weeks prior to the expiration of the policies, contractor shall endeavor to provide evidence of renewal or replacement policies of insurance, with terms and limits no less favorable than the expiring policies. Except as otherwise indicated in the detailed coverage paragraphs below, self-insured retentions and policy deductibles shall not exceed \$100,000, unless such increased deductible or retention is approved by Permitter/MTA. The Permittee shall be responsible for all claim expense and loss payments within the deductible or self-insured retention. The insurance monetary limits required herein may be met through the combined use of the insured's primary and umbrella/excess policies.

(d) Certificates of Insurance may be supplied as evidence of policies of the above policies, except for Policy (D) Railroad Protective Liability Insurance Policy. However, if requested by the Permittee, the Permittee shall deliver to the Authority, within forty-five (45) days of the request, a copy of such policies, certified by the insurance carrier as being true and complete. The Railroad Protective Liability Insurance Policy must be provided in the form of the Original Policy. A detailed Insurance Binder may be provided, ACORD or Manuscript Form, pending issuance of the Original Policy. The Original Policy must be submitted to MTA RIM within 30 days of the Binder Approval.

(e) If a Certificate of Insurance is submitted, it must: (1) be provided on the Permittee Certificate of Insurance Form or MTA Certificate of Insurance Form for Joint Agency Agreements; (2) be signed by an authorized representative of the insurance carrier or producer and notarized; (3) disclose any deductible, self-insured retention, sub-limit, aggregate limit or any exclusions to the policy that materially change the coverage; (4) indicate the Additional Insureds and Named Insureds as required herein, along with a physical copy of the Additional Insured Endorsement (I.S.O. Form CG 20 26 07/04 version or equivalent), as applicable and the endorsement(s) must include policy number(s); (5) reference the Contract by number on the face of the certificate; and (6) expressly reference the inclusion of all required endorsements.

(f) The minimum amounts of insurance required in the detail description of policies (A), (B), (C), and (D) above shall not be construed to limit the extent of the Permittee's liability under this Agreement.

(g) If, at any time during the period of this Agreement, insurance as required is not in effect, or proof thereof is not provided to the Permittee, the Permittee shall have the options to:

- (i) direct the Permittee to suspend work or operation with no additional cost or extension of time due on account thereof; or
- (ii) treat such failure as an Event of Default.

A17. TREE BARRIERS. The Contractor shall furnish, install, maintain and subsequently remove temporary Protective Tree Barriers. Protective Tree Barriers shall be Type B, unless otherwise directed by the Engineer, and shall be constructed and installed as shown on the Protective Tree Barrier sketch in Department Of Transportation, Standard Highway Details Of Construction, Drawing No. H-1046A, as directed by the Engineer, and in accordance with Department of Parks and Recreation requirements.

Price of the tree barriers must be deemed included in the in the unit prices bid for all scheduled items.

A18. UTILITIES. All utility locations and invert elevations are not guaranteed, nor is there any guarantee that all existing utilities, whether functional or abandoned within the project area are shown.

A19. HOUSE CONNECTIONS. All existing house connections shall be maintained and supported during construction. The Contractor shall replace any existing house connection damaged as a result of the Contractor's construction operations as ordered by the Engineer at no cost to the City.

A20. VICTAULIC STYLE 77 COUPLING. The Contractor is notified that Victaulic Style 77 Coupling is no longer acceptable for use in any steel water main work. All reference to Victaulic Style 77 Coupling within the Standard Sewer And Water Main Specifications of the Department of Environmental Protection (dated July 1, 2014), the Water Main Standard Drawings of the Department of Environmental

Protection (latest revisions), the Specifications For Trunk Main Work (dated July 2014), and the contract drawings, shall be replaced with Bolted Split-Sleeve Restrained Coupling.

A21. STREET LIGHT AND TRAFFIC SIGNAL. The Contractor is responsible for any damage to the existing street lighting and traffic signal equipment, including underground conduits and the safety of both pedestrian and vehicular traffic for the duration of the contract.

Should any conduits, cables or foundations need repair due to the Contractor's negligent operations during construction, all work shall be performed according to NYCDOT Bureau of Traffic's Standard Drawings and Specifications and City of New York DOT System Engineering Specifications (dated November 2013) at the sole expense of the Contractor.

It is the Contractor's responsibility to secure an approved electrical contractor to perform all traffic signal work (if any). For list of approved electrical contractors, contact Mr. Michael R. LeFosse of New York City Department of Transportation at (212) 839-3799.

A22. SAW CUT. The Contractor is advised that where the existing roadway pavement is designated to be replaced from curb to curb, then no full depth saw cutting of pavement for sewer and water main trenches will be required, except at the limits of full width pavement restoration. No separate or additional payment will be made for any saw cutting.

A23. PRE-CONSTRUCTION STAGE. The Contractor is advised that the Base Contract Duration (consecutive calendar days "ccds") must also include pre-construction stage from the Notice To Proceed date. During this stage the contractor is required to submit the necessary shop drawings, obtain all permits and submit the health and safety plan for review and approval. The Engineer's field office will also need to be established during this pre-construction stage period. Failure to comply with the pre-construction stage requirements may result in assessing liquidated damages to the contractor for everyday beyond the pre-construction stage duration. The liquidated damage will be of equivalent value as identified in the Schedule A for work beyond the construction completion date.

A24. EXISTING SEWERS, WATER AND APPURTENANCE. The Contractor is notified that at some locations there may exist sewers, manholes, water mains, etc., which are to remain undisturbed and are in close proximity to the line of the proposed work. The Contractor shall exercise extreme care, minimize the trench width of the proposed sewers and take all necessary precautions in placing sheeting and during excavation of the trenches to prevent any damage to the existing structures, pavement, curbs, and sidewalks that are to remain while working adjacent to them. The Contractor maybe restricted to use wood sheeting at certain critical locations as directed by the Engineer. Should any damage occur to any portion of the existing structures that are to remain due to the Contractor's operations, the Contractor shall make all repairs to the existing structures to the satisfaction of and as directed by the Engineer. The cost of such repair shall be borne by the Contractor, at no cost to the City. Additional cost to use wood sheeting specifically to ensure integrity of existing sewer structures will be deemed included in all bid items for work.

A25. RECONNECTING EXISTING SEWERS TO NEW MANHOLES. If there are locations on the contract plans, where the Contractor is required to reconnect all existing sewers to the proposed manholes in this contract. The said manholes shall be fabricated to provide openings for the existing sewers at the specified invert elevations as shown on the contract drawings. The cost of reconnecting existing sewer pipes to new manholes, including concrete collar with steel reinforcements and/or grouting around the existing sewer pipes at the openings and all work necessary to complete the pipe reconnection, to the satisfaction of the Resident Engineer shall be deemed included in the prices bid for all items of work. No additional payment shall be made.

A26. THE CONTRACTOR IS ADVISED that during pre-construction stage from the Notice To Proceed date; the contractor is required to submit the necessary shop drawings, obtain permits and submit the health and safety plan for review and approval. The Engineer's field office will also need to be established during this pre-construction stage period. Failure to comply with the pre-construction stage requirements may result in assessing liquidated damages to the contractor for everyday beyond the pre-construction stage duration. The liquidated damage will be of equivalent value as identified in the Schedule A for work beyond the construction completion date.

A27. THE CONTRACTOR IS ADVISED that any City owned light poles, traffic signals, street name signs, traffic signs and encumbrances including, but not limited to, underground conduit displaced as the result of the installation of the new sewers, water mains, catch basins, catch basin connections and appurtenances shall be replaced in kind and as directed by the Engineer. The cost of such work shall be deemed included in the prices bid for all items of work under this contract.

A28. NO ADDITIONAL PAYMENT. The Contractor is advised that any fences, guardrails, boulders, asphalt walkway of the park, fixtures, other encumbrances removed within project limits during construction shall be replaced in kind to the satisfaction of the Engineer. The cost of such work shall be deemed included in the prices bid for all contract items of work and no additional or separate payment shall be made.

A29. SHEETING AND EXCAVATION AT TRANSIT FACILITIES. In case of transit facilities like MTA, LIRR, METRO NORTH etc., the Contractor shall exercise extreme caution and take all necessary precautions in placing sheeting and excavation to prevent any damage to the existing underground or overhead structures and its appurtenances during construction work throughout the project area. The Contractor must take full responsibility to protect the said structures and its appurtenances and any damage caused by the Contractor's operations shall be made good by the Contractor to the satisfaction of the Engineer at no additional cost to the City.

The Contractor shall submit shop drawings to the Transit facilities showing all the details and methods of construction, such as, sheeting and bracing, including the Contractor's procedure and sequence of construction, supporting and/or protection of the existing structures and its appurtenances, with necessary design calculations for approval prior to starting of the construction. The design shall be made by a New York State Licensed Professional Engineer skilled in this type of construction and as further evidenced by the imprint of Professional Engineer's seal and signature on all drawings. The cost of this work shall be deemed included in the price bid for all items of work under this contract.

A30. ARCHAEOLOGICAL DISCOVERIES. The Contractor is notified that the Resident Engineer will retain the services of an Archaeologist (the "City's Archaeologist") for this project.

The City's Archaeologist shall be notified in advance and shall be present on site during sub-surface excavations as the City's Archaeologist deems necessary. The City's Archaeologist shall be authorized to halt construction at any time in order to record and/or recover any archaeological resources encountered during excavations, and to stabilize in place any human remains encountered. For the purpose of evaluating and recording archaeological resources, the City's Archaeologist shall be allowed to enter trenches provided all standard safety requirements are met. It is understood that some construction down time may be necessary.

In the event that human remains and/or other significant archaeological deposits are encountered during construction or archaeological investigations, Landmarks Preservation Commission (LPC) shall be notified as directed by the City's Archaeologist and the State Historic Preservation Office (SHPO) requires that the following protocol is implemented:

- At all times human remains must be treated with the utmost dignity and respect. Should human remains be encountered work in the general area of the discovery will stop immediately and the location will be immediately secured and protected from damage and disturbance.
- Human remains or associated artifacts will be left in place and not disturbed. No skeletal remains or materials associated with the remains will be collected or removed until appropriate consultation has taken place and a plan of action has been developed.
- The County coroner and local law enforcement as well as the SHPO and the involved agency will be notified immediately. The coroner and local law enforcement will make the official ruling on the nature of the remains, being either forensic or archeological. If the remains are archeological in nature, a bioarchaeologist will confirm the identification as human.
- If human remains are determined to be Native American, the remains will be left in place and protected from further disturbance until a plan for their protection or removal can be generated. The involved agency will consult SHPO and appropriate Native American groups to determine a plan of action that is consistent with the Native American Graves Protection and Repatriation Act (NAGPRA) guidance.
- If human remains are determined not to be Native American, the remains will be left in place and protected from further disturbance until a plan for their avoidance or removal can be generated. Consultation with the SHPO and other appropriate parties will be required to determine a plan of action.

Should extra work be ordered by the Resident Engineer as a result of any archaeological discoveries, it shall be paid for as extra work in accordance with the requirements of Article 26 in the Standard Construction Contract.

A31. PRICES TO INCLUDE. No direct payment will be made for costs incurred in complying with the foregoing Special Provisions, unless otherwise provided. Said costs will be deemed to have been included in the prices bid for all the scheduled contract items.

## B1. CRITICAL PATH METHOD (CPM) SCHEDULE

The requirements of this article supersede the requirements of NYCDOT Standard Highway Specifications **Section 1.06.25**.

### 1.1 DESCRIPTION

- A. This section specifies the procedures and requirements, which the Contractor must follow for documenting the progress of the Work. Among the requirements specified are schedule development and maintenance as well as associated submittal requirements.
- B. The Contractor must submit a Progress Schedule in compliance with Article 9 of the Standard Construction Contract. The Contractor's Progress schedule must be a Critical Path Method Progress Schedule prepared using Primavera P6 software (P6), which demonstrates complete fulfillment of all work shown in the contract documents. The Contractor must, on at least a monthly basis, revise and update the Progress Schedule, and use it in planning, coordinating, and performing all work. Schedule activities must accurately depict the entire scope of work to be performed to complete the project including, but not limited to, all work to be performed by the Contractor, subcontractors, fabricators, suppliers, consultants, the Department, and others, contributing to the project.

### 1.2 RELATED DOCUMENTS

- Payment Procedures (Articles 41, 42, 43, 44, 45 and 46 of the Standard Construction Contract).
- Request for Information or Approval (Article 10 of the Standard Construction Contract).
- Submittal Procedures (Article B2 of the Special Provisions [S-Pages]).
- Definitions (Article 2 of the Standard Construction Contract).
- Progress Schedules –(Article 9 of the Standard Construction Contract).

### 1.3 ACTION SUBMITTALS

- A. Project Scheduler's Resume: The name, resume and work experience of the Contractor's Project Scheduler must be submitted to the Engineer and approved before Work on the Schedule Document begins. The resume of the proposed Project Scheduler must include the duties, responsibilities, and accomplishments which establish the candidate's scheduling and construction experience. Should the Contractor utilize a Scheduling Consultant, the Consultant's name and work experience must be submitted to the Engineer and approved before the Consultant begins work on the Schedule Document. If either, the proposed Consultant or the Contractor's Project Scheduler are not approved, the Contractor must propose an alternate Consultant or another Project Scheduler that meets the experience requirements within five (5) working days. The Engineer has the right to reject the Project Scheduler and/or the Consultant based upon lack of experience as required herein. Rejection by the Engineer of the proposed Project Scheduler and/or the Consultant will not be allowed as a basis for an extension of time to submit any of the required Schedule Document(s).
- B. CPM Schedule: The CPM Schedule must be prepared using Primavera Project Management Software P6 V15 or newer. Using Critical Path Method ("CPM") techniques, the schedule must accurately represent the Contractor's plan for the timely completion of the Work and must be submitted in the following formats:
  - Preliminary CPM Schedule: No later than 15 Days (CCD) after receipt of the Notice to Proceed, the Contractor must make a presentation to the Engineer concurrently with the submittal for acceptance of the Preliminary CPM Schedule defining the Contractor's

planned activities during the first 90 Days. The Preliminary CPM Schedule must contain in detail the Contractor's proposed schedule of Work to be commenced within the first 90 Days after the Notice to Proceed. This Preliminary CPM Schedule must include, in a summary format, the balance of Work leading to the Project's Substantial Completion. The Preliminary CPM Schedule package may be conditionally accepted by the Engineer pending acceptance of the Baseline CPM Schedule. The conditionally accepted Preliminary CPM Schedule must be updated monthly until the Detailed CPM Schedule is accepted. The Contractor may make no changes to the conditionally accepted Preliminary CPM Schedule without the approval of the Engineer.

- Baseline CPM Schedule: No later than 45 Days after receipt of the Notice to Proceed, the Contractor must make a presentation to the Engineer concurrently with the submittal for acceptance of the complete CPM Schedule Documents which must incorporate the entire scope of the Work. This schedule, once approved by the Engineer, will be the Baseline CPM Schedule and will be considered the schedule of record unless a Baseline CPM Schedule revision is accepted by the Engineer. The most up to date Baseline CPM Schedule or Baseline CPM Schedule revision accepted by the Engineer must be considered the Current Baseline Schedule or the schedule of record.
- Changes to the Baseline Schedule: No changes are permitted to the Baseline CPM Schedule including but not limited to Activity ID, logic, durations, budgeted quantities of both materials and man-hours unless submitted, reviewed and accepted by the Engineer prior to their insertion into the CPM Schedule.
- 4□ CPM Logic Diagrams: CPM Logic Diagrams must be submitted on sheets 11 x 17 inch paper and as Adobe Acrobat PDF or as otherwise directed by the Engineer. The activity box must include at a minimum the activity number, description, responsibility code, early dates, total float, original and remaining durations. Logic Diagrams must be submitted until both the Preliminary and Baseline CPM Schedules are accepted. Upon acceptance of the Preliminary and Baseline CPM Schedules one set of the CPM Logic Diagrams must be submitted. The CPM Logic Diagrams must be resubmitted for approval when a revision to the schedule logic is made.
- Monthly CPM Updated Schedule: No later than the third (3rd) working day of the month, the Contractor must submit an update of the CPM Schedule. This Schedule update must be derived from the Baseline CPM Schedule and includes progress of the Work as of the data date and as agreed to each month in the monthly schedule review/update meeting. Except for recording the work progress, no changes are permitted to the updated CPM Schedule including, but not limited to, Activity ID, logic, durations, budgeted quantities of both material and man-hours unless submitted, reviewed and accepted by the Engineer prior to their insertion into the updated CPM Schedule. The Contractor agrees that this Schedule update accurately represents the progress of the Work to date and balance of the Work to be completed.
- 6□ Hard and Electronic Copies: The submittal of the Preliminary, Baseline, and Monthly CPM Schedule Updates, in detail and in summary format, must include three (3) collated paper copies on 11 x 17 and must also be submitted in Adobe Acrobat PDF and in native Primavera Project Management P6 software files (Version 15.0 or newer).

#### 1.4 PROJECT SCHEDULER

- A. The Contractor must employ or retain a project Scheduler with a minimum of five (5) years of

experience in the use of Oracle's Primavera Project Management Primavera Project Management (P6 or later) for the purpose of developing, monitoring, maintaining and updating the Contractor's detailed Project's Schedule utilizing the latest version of Primavera Project Management P6 software (Version 15.0 or higher). The Project Scheduler must also possess at least five (5) years of relevant experience in construction, planning, scheduling, expediting and tracking the progress of the work for projects of a similar nature, size, and complexity. The Project Scheduler must be responsible for adhering to all requirements of this schedule specification, attending all job progress review/update meetings, and other meetings as requested by the Engineer. The Project Scheduler must be dedicated fully to this Contract and is expected to function as part of the Contractor's project team and actively contribute to the planning, mitigation and coordinated maintenance and upkeep of the Project Schedule deliverables of this Contract.

### 3.1 GENERAL REQUIREMENTS

- A. To enable the Work to be performed in an orderly and expeditious manner, the Work must be monitored closely by the Contractor using a CPM Schedule. The scheduling of all the Work, i.e. design, submittals, approvals, procurement, construction, testing, etc. is the responsibility of the Contractor.
- B. Progress Payment: The monthly CPM Schedule update submission, showing updated activities and status in accordance with the requirements of this Section must be a condition precedent to the start of the monthly progress payment cycle. **The Engineer will not process the monthly progress payment until the CPM Schedule update submission has been received.**
- C. Time is of the essence in the performance of all Work under this Contract including but not limited to providing the required Schedule information. The CPM Schedule must at all times accurately reflect the Contractor's CPM schedule of record for the Work and must be updated as required herein, in a timely manner. The CPM Schedule must be the primary tool utilized by the Contractor to accurately document the progress of the Work and to communicate its plan for the timely completion of the Work.
- D. Float Suppression: Pursuant to float sharing requirements of this Article, the use of float suppression techniques such as preferential sequencing or logic, special lead/lag logic restraints, and extended activity times or durations is prohibited. Approval of any schedule by the Engineer does not preclude the Engineer's later correction of float suppression techniques or of any other deficiency.
- E. If the Contractor elects to propose an Early Completion Schedule, such schedule must be subject to the acceptance of the Engineer and in compliance with any interim milestones specified in the Contract Documents. Early Completion Schedules are subject to Articles 8 and 9 of the Standard Construction Contract.
- F. The Contractor must include an activity (milestone) in its schedule that represents Substantial Completion; such activity (milestone) will only be acceptable if it meets all the requirements of the Standard Construction Contract set forth in Article 14.
- G. Scheduling Kickoff Meeting: Upon Notice to Proceed, the Contractor and the Engineer will hold a Scheduling Kickoff Meeting to review these requirements and any related Contract Documents. This meeting must be attended by the Contractor's Project Manager, Contractor's Project Scheduler, representatives from key subcontractors, and the Engineer's staff, including the Engineer's project scheduler. Specific items to be covered will include Contract

schedule requirements, project phasing, intermediate milestones, workday calendars, activity coding, schedule updating, schedule revisions, progress payment process, and any other items related to the project schedule document development.

### 3.2 DETAILED SCHEDULE REQUIREMENTS

A. Schedule Detail: The CPM Schedule must contain sufficient design, procurement, and construction activities to represent the Work, subject to the acceptance by the Engineer, with a means to monitor and follow progress of all phases of Work; comply with limits imposed by the scope of Work, with contractually specified seasonal restrictions, interim milestones and completion dates; and with constraints, restraints, or sequences included in the Contract. The schedule detail must be subject to acceptance by the Engineer. Factors to be considered include, but are not limited to:

1. Organization by major areas of Work Breakdown Structure (WBS).
2. Submittals, submittal reviews and approvals, manufacture, tests, delivery, installation activities for long lead items, training syllabus, critical materials and equipment, system testing as well as seasonal restrictions must be represented in the CPM Schedule. Description of the activity must include sufficient detail to identify the unique scope of that activity. Whenever possible, like items must be combined in a single submittal. If multiple items are included in a single submittal, that submittal must be identified in the Schedule by an activity in accordance with the following conditions:
  - The "Review and Approval" activity for that submittal must be a condition precedent to every activity representing fabrication and delivery of any of the materials submitted.
  - If and when the submittal receives authorization for the activity to partially proceed and that partial authorization is sufficient to enable the commencement of some, but not all, successor activities, then the original submittal activity must be broken down into multiple activities, as necessary to accurately reflect the logic of Contractor's current plan.
3. Deliveries of furnished equipment and/or materials in accordance with dates or schedule windows of times set forth in the Contract. Activities representing the delivery of materials or equipment for more than one installation activity will be permitted in accordance with the following conditions:
  - The delivery activity must precede each activity representing the installation of that material in each area.
  - When partial deliveries are received and are adequate so as to enable commencement of some, but not all, successor activities, then the original delivery activity must be broken down into multiple activities, so as to accurately reflect the logic of the Contractor's current plan.
4. The required review and approval time for any submittals must be incorporated.
5. Milestones or access restraints for completion of certain portions of the Work or access and availability to Work areas as referenced elsewhere in the Contract Documents.
6. Identification of interfaces and dependencies with preceding, concurrent, and follow-on Contractors and utilities, typically shown as milestone type of activities.
7. Planning for phased or total handover to the Engineer.
8. Identification of any resource restrictions including manpower (by trade), material, and equipment, as well as any activity requiring unusual shift work, such as multiple shifts, weekend work, specified overtime, or work at times other than regular days or hours.
9. Resource Loading: Resource allocation for each activity in the CPM Schedule identifying the man-hours by trade and costs by bid item. Cost items may be combined by category

as approved by the Engineer. Activities containing unit price items must equal the amount of the quantity specified in the Contract. The Engineer reserves the right to accept or reject any value and allocation of the man-hours and/or costs.

10. Activity Code Structures: Activities must be coded for the following categories:
    - RESP - Responsibility – Identify Contractor Utility, Subcontractor, etc. responsible for the Work.
    - PHAS – Phase – Breakdown of activities in Milestone, Construction Phases and Close out activities.
    - AREA - Area – May be used as subdivision to include permits, engineering, design, procurement, submittals, submittal review and approval, fabrication, delivery, change order, training, testing & commissioning, payment item major areas of Work.
    - LOCN – Location - Breakdown by street, interwsection or block, construction reaches or landmark locations.
    - TRAD – Trade – Breakdown by work type. Examples: ramp, plaza, sidewalk, pedestrian bridge, roadway construction.
  11. Calendars: Develop activity calendars commensurate with the Contractor’s workweek plan. Calendars must include all non-working Days, such as: seasonal weather conditions, weekends, holidays, or other periods when the Contractor plans not to work. Calendar(s) must be reviewed and accepted by the Engineer as part of the Baseline Contract Schedule submittal and will be monitored using the most updated Contract Schedule.
    - The planning unit for the Contract must be Days (CCD).
    - Calendars must contain all applicable union holidays, as listed in any applicable labor agreements.
    - Every activity must be assigned a working day calendar that considers when the activity is planned to occur and when it is contractually permitted to occur.
  12. Activities representing work or participation by the Engineer staff must be assigned to a 5-day workweek calendar, unless otherwise specified by the Engineer or Engineer’s Representative. Contractor’s Schedule must not anticipate or require weekend or holiday work periods for the Engineer unless specifically approved by the Engineer.
- B. Materials and Equipment Procurement: Include the following activity sequence for critical and long lead materials and equipment procurement:
1. Submittal Preparation.
  2. Review and Approval.
  3. Fabricate and Deliver.
- C. Logic and Durations: Logic and activity durations must be established by the Contractor consistent with the Contract requirements and must reflect coordination between trades, definitive resource planning and on-site work conditions. Logic must show how the start of a given activity is dependent on the completion of preceding activities, and its completion restricts the start of following activities. Except for non-construction activities such as procurement of material, delivery of equipment or fabrication, activities must not have a duration greater than twenty (20) working days unless specifically approved by the Engineer. Duration for non-construction activities such as procurement of material or delivery of equipment may not exceed twenty (20) working days without prior approval.
- D. Restraints and Milestones: The start date of the CPM Schedule must be the Contract NTP date. The completion date of the CPM Schedule must be the Contract Substantial Completion date as specified in this Chapter. All intermediate restraints and milestones required in the Contract

must be shown in proper logical sequence and properly constrained.

- E. Schedule Dates: Whenever the term “schedule” or “scheduled date” is used, it must mean the “early start” and “early finish” dates in the CPM Schedule. The “late” dates are for purposes of calculating float and do not represent the schedule dates.
- F. Activity Descriptions: Activities must be described such that the Work is readily identifiable for assessment of start and completion, as well as intermediate status. Descriptions must utilize identifiers for physical locations such as reaches, bridge locations and elevations where possible to define the Work. The activity description must identify the scope of the activity. There must not be any two activities with the same activity description.
- G. Working Days: While contract times are expressed in Days (CCD), the CPM Schedule must be calculated in working days.
- H. Weather or Seasonal Allowances: Seasonal weather conditions must be considered in the planning and scheduling of all Work such that all Work will be completed within the allotted Contract time. Any weather or seasonal allowance must be stated in the Baseline narrative.
- I. Submittal and Review Periods: The review period shown in the Schedule for submittals must conform to the Contract requirements set forth in Article 10 of the Standard Construction Contract and the related submittal section of the Technical Specifications.
- J. Constraints: The Schedule must include all Work constraints indicated in the Contract Documents. Other activity Constraints must not be used unless approved by the Engineer.
- K. Float: Float is defined as the calculated amount of time that the estimated start or finish of an Activity can be delayed without impacting the start or finish of other downstream activities logically connected in a progressive relationship. Float, in any schedule, must not be for the exclusive use or benefit of either the City or the Contractor, but must be available for use by both the City and the Contractor.
- L. The CPM Schedule must contain sufficient activities and allotted time for all inspections, testing, commissioning and the Engineer’s acceptance, as well as system testing, orientation, and demonstrations. The schedule must also include a System Testing and Acceptance fragment or subnet within the project CPM Schedule as needed. This schedule will identify all equipment and systems that require testing, orientation and acceptance by the Engineer. The durations and sequences of the systems testing, orientation and acceptance must be as specified in the various sections of the Contract Specifications. Each system will contain, but will not be limited to, all of the following activities and constraints:
  - 1. Interface between the construction activities and their respective system.
  - 2. Contractor’s pre-testing Work.
  - 3. Submittal and approval of the Contractor’s pre-testing data and checklist, as appropriate.
  - 4. Sufficient notification time to the Engineer prior to system testing.
  - 5. Submittal and approval of the preliminary and final as-built drawings.
  - 6. Submittal and approval of the preliminary and final O&M Manuals.
  - 7. Submittal and approval of testing procedures.
  - 8. All other systems that are required to be tested and accepted prior to the specific system being tested.
  - 9. System testing by the Engineer.
  - 10. Other outside agencies, utilities, etc., that are required to test, witness and accept the system.

11. Submittal and approval of the orientation syllabus, orientation manual, and orientation video.
  12. Performance of orientation.
- M. Prior to Substantial Completion, the Contractor must submit a Punchlist Completion Schedule that shows the schedule of the punch-list items. All Work shown on this schedule must be performed as specified within Article 14.2.2 "Approval of Final Approved Punch List". The Engineer, in a written notification to the Contractor, must approve the Contractor anticipated completion dates. If the Engineer and the Contractor are unable to agree on the anticipated completion dates, the Engineer must establish dates for the completion of each item of work.
- N. In the event that Contractor requires multiple submissions in order prepare a submittal that is acceptable to the Engineer and that can be approved, then the Contractor must adjust its CPM schedule to include adequate time for such multiple submittals at each stage of the approval process. Any additional time resulting from the Contractor's multiple submissions before an item can be approved by the Engineer must be mitigated by the Contractor.

### **3.3 BASELINE CPM SCHEDULE NARRATIVE**

- A. As a component of the Baseline CPM Schedule, submit a narrative to describe the procedures, general approach and the means and methods it will use to complete the Work under the conditions described and in accordance with Article 9 of the Standard Construction Contract.
- B. Submit the narrative described herein along with the Baseline CPM Schedule. Any review, acceptance or approval of a Baseline narrative or Schedule submission cannot revise or amend any Contract provision and does not represent the Engineer's agreement to any conclusion, interpretation, indication, method or description contained therein.
- C. A narrative report that must be signed by the Contractor's project manager and must describe and demonstrate that the Contractor's proposed means and methods meet the specified Contract requirements. The narrative must include but not limited to:
1. Description of the scope of Work and goals.
  2. A discussion of the CPM Schedule development.
  3. A listing of all intermediate contractual milestones with their respective float and schedule analysis.
  4. Identification of the critical path(s).
  5. Identification of the long lead items and their impact on the critical path(s).
  6. Identification and description of the calendar(s) used in developing the Baseline CPM Schedule.
  7. Identification of planned manpower and projections of Contractor's workforce and subcontractor's workforces; the manpower projections must also be submitted in a histogram and cumulative graph format.
  8. Identification of planned equipment requirements.
  9. Description of planned mobilization, including provisions for the Engineer's office and facilities.

### **3.4 SCHEDULE REVIEWS**

- A. Reviews of Contractor's Schedule submissions will be in accordance with Article 9 of the Standard Construction Contract and this Article, unless noted otherwise.
- B. Preliminary CPM Schedule Review: Within 15 Days following receipt of the Preliminary CPM Schedule, the Engineer will review the Preliminary CPM Schedule and return it to the Contractor either with comments or conditionally accepted. During this time, the Contractor must participate

in the review and evaluation of the Preliminary CPM Schedule with the Engineer. Within 5 working days after comments are received, the Contractor must address the Engineer's comments and resubmit a corrected Preliminary CPM Package. The Contractor must repeat this process as many times as required at no additional cost to the City until the Engineer conditionally accepts the Preliminary CPM Schedule.

- C. **Baseline CPM Schedule Review:** Within 20 working days from receipt of the Baseline CPM Schedule, the Engineer will review the Detailed CPM and return it to the Contractor either with comments or accepted. During this time, the Contractor must participate in the review and evaluation of the Detailed CPM Schedule by the Engineer. Within 5 working days after comments are received, the Contractor must address the Engineer's comments and resubmit for acceptance a corrected Detailed CPM package. The Contractor must repeat this process as many times as required until the Engineer accepts the Detailed CPM Schedule at no additional cost to the City.
- D. **Update Reviews:** The Engineer will review and respond to the update scheduling submittals within 5 working days after submittal, unless a different review period is expressly identified elsewhere in the Specifications or other Contract Documents. After review, if changes or additional information are required, the Contractor must submit a revised CPM Schedule update within 3 working days after receiving the comments. Review, revision, and resubmission must continue until the Engineer's acceptance is achieved at no cost to the City as defined in Article 2 of the Standard Construction Contract.
- E. **Reviews and Re-submittals:** The Contractor must repeat this process as many times as required at no additional cost to the City until the Engineer accepts the Preliminary Schedule, Baseline CPM Schedule, and the monthly CPM Schedule updates. Acceptance of the Preliminary Schedule is a prerequisite for the acceptance of the Baseline Schedule.

### 3.5 UPDATING THE PROJECT SCHEDULE

- A. **Updating:** The Contract Schedule must be updated monthly, with Data Date as of the last day of the current month. The Engineer reserves the right to change the monthly cut-off dates in the future for its sole convenience. The Monthly Schedule Review/Update Meeting must be the prerequisite and the start of the monthly update cycle.
  - 1. The CPM Schedule must be updated monthly, whether or not the Engineer has accepted the prior updated Schedule, to reflect actual progress. The update must include the historical record of actual start and finish dates for activities completed. For in-progress activities, the update must include percent complete based on a unit of measure and remaining duration based on the amount of work-days required to complete the activity. Enter for each applicable activity actual installed quantities.
  - 2. Default (automatic) updating of the schedule is prohibited. Actual Start and Finish dates must not be automatically updated by default mechanisms that may be included in the CPM scheduling software systems. This Contract's primary source of actual starts and finishes and percentages complete are the quantity verification sheets (QVS), which must include the Start and Finish Dates, signed by both parties and included in each of the Contractor's payment requests.
  - 3. The updated Current Project Schedule must be used for subsequent planning, scheduling, managing and updating the execution of Work to be accomplished. If an update evidences delay to the Baseline Schedule, one of the goals of the planning process must be mitigation of that delay, in accordance with and subject to the provisions of Articles 9 and 10 of the Standard Construction Contract.
- B. Two (2) working days prior to the monthly schedule review/update meeting, the Contractor will

provide to the Engineer two (2) sets of the two weeks-look-ahead schedule or "Activity List" which will identify, at a minimum, the following information for all activities that have started, are in progress, or have been completed during the reporting period.

1. Assessment of each in-progress activity's remaining duration in P6.
  2. The actual start and finish dates whenever appropriate in P6.
  3. Actual quantities installed and the physical percent complete for all design and construction activities in P6.
- C. Monthly Schedule Review/Update Meetings: A monthly schedule review/update meeting must be held within the last five (5) working days of the reporting month. This meeting must be attended by the Engineer, the Engineer's scheduler, the Contractor's project manager and the Contractor's Project Scheduler, and key subcontractors' representatives. The purpose of this meeting must be to obtain joint agreement on Work progress shown on the Activity List as well as to discuss schedule-related problem areas, proposed logic changes, revisions to previously established productivity rates and other schedule issues. At this meeting, all progress during the calendar month must be addressed and reviewed for incorporation into the CPM Schedule by the Contractor. These meetings must precede the formal submittal of the monthly updated CPM Schedule.
- D. Subsequent to the monthly schedule review/update meeting, and pursuant to any agreements made regarding progress and the agreed-upon changes, the Contractor must update the CPM Schedule and provide all required reports showing current progress of the Work as well as a plan and schedule of the completion of the remaining Work. The CPM Schedule must be updated as of the last day of each calendar month and must be submitted no later than the fifth (5th) working days of the month following the report period, until Substantial Completion of the Project. The update must comply with the criteria and format set forth in this Specification. This progress information must be included in the computerized CPM Schedules.
- E. The monthly update procedure must include a review of the submittal and delivery activities to ensure that the scope and logic of the activities are consistent with Contractor's current plan.
- F. On every progress update, the Contractor must report the physical percent complete as of the status date, for all activities in progress. The physical percent complete for each activity must be established in the following manner: For activities that are quantifiable, the physical progress equals the quantity installed or erected divided by the total quantity allocated to the particular activity (including overruns and underruns). For those activities that cannot be quantified, physical percent complete must be estimated and backup calculations provided.

### 3.6 MONTHLY PROGRESS REPORTS

- A. The Contractor must prepare definitions and designs for reports and/or layouts in Primavera Project Management, P6 V15 or newer in accordance with the requirements detailed herein. The Monthly Progress Report Package submitted to the Engineer must consist of three (3) collated copies of the following:
1. Activity Tabular Reports.
  2. Resource Tabular Reports.
  3. Resource/Cost Graphic Reports.
  4. Bar Charts.
  5. Narrative Progress Report clearly identifying progress status and restrictions encountered during the reporting period.
- B. Activity Tabular Reports must be provided in the following sort orders:

1. Total float, then early start.
2. Grouped by responsibility, then by early start.
3. Grouped by major Work areas, then by early start.

The minimum activity information required in each of the above reports must include the following:

- Activity ID.
- Activity description.
- Location code identification.
- 4  Work responsibility code identification.
- Original activity duration (OD) and remaining duration (RD) in working days.
- 6  Early and late start and finish dates.
- Total float.
- Percent complete.
- Calendar ID.

C. Updated Bar Chart: Include updated bar charts for:

- Remaining activities.
- Critical path(s) activities.
- Six-week look ahead.
- 4  Summary bar charts.

The minimum activity information required in each of the above bar charts must include the following:

- Activity Bar Content: The activity display must include the activities' description, activity ID, OD, RD, Calendar ID, percent complete, total float, early start and finish dates and Responsibility for each activity bar.
- Grouping: The activities must be grouped as approved by the Engineer.
- Critical Path Display: The critical path must be identified on the plot in such a manner that it will be clearly distinguishable from other activities.
- 4  Progress Display: Completion of activities must be indicated on the plot.
- The summarized CPM Schedule must reflect the current schedule status of the project and be compared to the Baseline Schedule. The format and level of detail will be in accordance with the Contract's major areas of Work to be agreed upon with the Engineer.

D. Narrative Progress Report: The Narrative Progress Report submitted as part of the monthly update analysis must include, but not be limited to:

1. Description of the CPM Schedule status.
2. Discussion of current and anticipated delays including reason for the delay, the recovery scenario(s) and their estimated impact, including off-site activities such as submittal preparation, fabrication, and deliveries.
3. If the Work is behind schedule, include discussion of schedule slippage and/or progress along the critical path in terms of Days ahead or behind the allowable dates and discussion of progress along other paths with negative float to mitigate delays. This must also include a proposed recovery plan and action to be taken.
4. Logic changes and an explanation of the revisions. Revisions to activities not worked on during the period, including changes in duration; revisions to activity relationships; and

revisions to constraints on activities; are all to be considered logic revisions. Similarly, this must include description and explanation of reason(s) for any changes to calendars being used in Schedule as well as any changes to calendar assignments of activities.

5. Updated schedule modifications reports: A comparison report showing all changes made to the schedule since the last update as approved by the Engineer. This report must include the reasons for these changes.
6. Identification and justification of all activities performed out of sequence.
7. A summary of planned equipment utilization for the Project, identifying each type of operated equipment to be used on the Contract, the planned quantity of each type of operated equipment utilized each month, and all changes to the criteria for mobilizing and demobilizing each piece of equipment to and from the site.
8. A summary of planned labor utilization for the Contract, identifying the average and maximum number of workers on site each month. Identify actual and potential labor resource limitations. A summary of the actual labor utilization used over the past month.
9. List of identified additional out of scope items and their potential schedule impact, if any.
10. Identification of outstanding RFI's including discussion of their cost and/or schedule impact.

### 3.7 SCHEDULE DELAY CLAIM:

- A. In addition to the requirements outline in with Article 11 "Notice of Conditions Causing delay and Documentation of damages Caused Delay" of the Standard Construction Contract and in instances where the Contractor is submitting a schedule delay claim, the claim request must include a schedule subnet, tabular reports and an explanation that clearly demonstrates the impact of the claim on the project's schedule. The schedule to be utilized as the basis for the claim must be the "Current Updated Schedule" which reflects the present status of the Project. The Contractor must provide to the Engineer, as a minimum, the following information:
  1. Schedule subnets (logic diagrams) and tabular reports (prior to and after the Extra Work insertion) that clearly demonstrate the schedule impact on the entire Current Updated Schedule.
  2. Schedule impact on engineering/design related activities and/or on activity man-hours.
  3. Schedule impact on material and/or equipment procurement, fabrication and delivery schedules.
  4. Schedule impact on material storage, temporary services (water, air, power, etc.), supervision, construction equipment, productivity, and manpower.
  5. Narrative that clearly identifies, describes, and substantiates the schedule impact on both the affected and subsequent (unchanged Work) activities.
  6. Corrective action that can be taken in order to avoid/minimize the schedule impact.
  7. Computerized storage media containing all required schedules, cost, resource, and Narrative information.
  8. Any other tabular/graphical reports required by the Engineer.

### 3.8 REVISION TO THE PROJECT SCHEDULE

- A. In the event that the Engineer determines that there will be or has been a delay which might affect the critical path, the Engineer will instruct the Contractor to analyze the circumstances as to whether the critical path is or will be affected thereby and submit a proposed recovery plan to the Engineer.
- B. In the event that it is necessary to revise the CPM's Schedule and/or phasing plan, a revised CPM Schedule and/or phasing plan must be submitted for acceptance at no additional cost to the City. Reasons for revision may include, but are not limited to, incorporation of approved

Extra Work (change orders), modification of activity man-hours, if the Engineer determines that Work is not progressing to meet the accepted CPM Schedule, when a delay is affecting the critical path(s), if the phasing plan has been changed, or if the Work is not performed as shown in the accepted CPM Schedule.

- C. In all situations in which the CPM cost or CPM Schedule is revised, the Contractor must submit a narrative explaining the reasons for the changes. In addition, the Contractor must submit a listing of all proposed changes in network logic including, but not limited to changes in activity duration and logic, changes in activity man-hours and quantities, changes in activity sequence and any changes in completion dates. Revisions to the schedule document must only be made after authorization by the Engineer.
- D. Upon the Engineer's direction, the proposed resource and/or schedule changes are to be added into the CPM Schedule and must be submitted to the Engineer for review and acceptance within five (5) working days.
- E. After Extra Work (change orders) has been approved, the approved logic and its associated information such as activity man-hours, quantities, etc., must be incorporated into the Project Schedule. The sum of the cost and quantity of all the individual activities contained in the Extra Work must be equal to the total cost and quantity of the approved Extra Work. All activities associated with Extra Work must be coded with their specific Extra Work Number.

### **3.9 PROCEDURES FOR CPM UPDATES AND SCHEDULE CHANGES**

- A. All Monthly Progress CPM updates must be submitted using the last accepted CPM Schedule. No revisions must be made to the schedule unless they have been expressly authorized in writing by the Engineer as provided herein. Revisions that are not permitted without authorization include but are not limited to revisions in: activity duration, logic, activity man-hours, quantities, activity identification, and historical data from prior updates. Only actual dates and progress agreed upon at the progress meeting and/or progress walk through must be used in the update.
- B. Any update that does not comply with these requirements will be rejected by the Engineer; and, in accordance with Paragraphs 3.1.B and 3.5.A.2, above, payment will not be processed until an update consistent with these requirements is received. The Contractor must not delay submission of an update pending authorization of review.
- C. If the Contractor intends to propose revisions to the CPM Schedule, the Contractor must submit, separate from any monthly update, a list of the proposed revisions, a fragnet showing the proposed revisions in a form which clearly identifies where the fragnet is to be inserted in the schedule, and a narrative explaining the reason for these revisions. No revision to the CPM Schedule, including any update, must be made until the proposed revision is reviewed by the Engineer and written authorization from the Engineer is provided for that revision. The authorization of any revision to a previously accepted schedule is within the sole discretion of the Engineer.

The authorized revision must not be incorporated into the CPM Schedule Document until the CPM Schedule update following the date of authorization of that revision. Once incorporated, that revision must become part of the accepted schedule.

## B2. SUBMITTAL PROCEDURES

The requirements of this article supplement the submittal requirements in the NYCDOT Standard Highway Specifications and the NYCDEP Standard Sewer and Water Specifications. If a conflict exists, the requirements of this article govern.

### 1.0 GENERAL

This article includes administrative and procedural requirements for submitting Shop Drawings, Catalogue Cuts, Material Samples, As-built or Record Drawings, and other submittals required by the Contract Documents.

Review of submittals does not relieve the Contractor of responsibility for any Contractor's errors or omissions in such submittals, nor from responsibility for complying with the requirements of the Contract.

### 2.0 DEFINITIONS

Program Management Information System (PMIS) – NYCDDC's System of Record for the Coastal Resiliency Program.

Design Consultant - the entity responsible for providing design services for the Project, including without limitation, preparing the construction documents (drawings and specifications) and providing services in connection with such documents during construction. The entity serving as the "Design Consultant" may be a corporation, firm, partnership, joint venture, individual or combination thereof. Such entity may be either an employee(s) of the City or an entity engaged by the City to provide such services.

Submittals - written and graphic information that requires responsive actions and includes without limitation all shop drawings, product data, letters of certification, tests and other information required for quality control and as required by the Contract Documents.

Shop Drawings – includes drawings, diagrams, illustrations, schedules, performance charts, brochures, and other data, except for coordination drawings, specifically prepared for the project by the Contractor or any subcontractor, manufacturer, supplier or distributor, which illustrates how specific portions of the work must be fabricated and/or installed.

Product Data and Quality Assurance Submittals - includes manufacturer's standard catalogs, pamphlets and other printed materials including without limitation the following:

1. Catalogue and Product specifications
2. Installation instructions
3. Color charts
4. Catalog cuts
5. Rough-in diagrams and templates
6. Wiring diagrams
7. Performance curves
8. Operational range diagrams
9. Mill reports
10. Design data and calculations
11. Certification of compliance or conformance
12. Manufacturer's instructions and field reports

### 3.0 SUBMITTAL PROCEDURES

#### 3.01 Document Control

The Contractor must submit for approval by the Department's engineering personnel and/or Supervising Consultant (herein after called "the Engineer") a Document Management Plan within 30 days of Notice

of Award. The Document Management Plan must define the Contractor's Electronic Document Management System (EDMS) including security protocols. The Document Management Plan must include the following:

1. Requirements for records storage and retention.
2. Procedures for the electronic data backup of all Project-related documents, on a minimum weekly basis, in a secure off-Site area in order to allow for recovery of unexpectedly lost data.
3. Procedures for data transmission, storage and sharing protocols.
4. Procedures for the maintenance, retention, retrieval, and disposal of records.
5. An auditable and tracking system of all Project correspondence and documents
6. Methods by which all documents issued and received by the Contractor will be uniquely coded and retrievable in a user-friendly format.
7. File control, and search and retrieval methods for all documents.
8. Methods to facilitate sharing of data, including procedures for accessing all documents.
9. Methods for controlling document updates.
10. Methods for identification of the originator/recipient for all documents.
11. Document approval tracking.
12. Methods for enabling a searchable database.
13. Methods to establish links among various documents.
14. Protocols for hard-copy and electronic filing.
15. Procedures for recording and tracking review comments and participation by the Engineer and the Contractors' internal review processes as well as any reviews by third-parties or stakeholders.

### 3.02 Project Management Information System

The Contractor must use the Project Management Information System (PMIS), provided by NYC DDC, throughout the Term of the Agreement for document management and transmittal, including workflows, file storage, communication, and correspondence. This must be in addition to the Contractor's obligation to provide the EDMS as referenced in Sub-Article 3.0.1. All submittals must be uploaded to the PMIS and adhere to the hard copy submittal requirements set forth in the General Conditions. Submittals will be deemed incomplete until the soft copy is uploaded to the Project Management Information System and the hard copies have been received by the NYC DDC. The PMIS will be accessible only through security rights and administration at the discretion of NYC DDC. NYC DDC reserves the right to make periodic changes and enhancements to this requirement with which the contractor must immediately comply.

The PMIS will not relieve the Contractor of its responsibility to independently provide redundancy and security of all Project records. Immediately upon provision by the NYC DDC of access to the PMIS and when instructed to do so by the NYC DDC, the Contractor must utilize the PMIS as the primary interface for all official communications, transmissions and records in connection with the Project between the Contractor and NYC DDC.

Additional PMIS requirements/guidelines for the Contractor:

1. The PMIS must be used to track and manage the Project and as an official record of all Project communication.
1. Designate a PMIS coordinator (an internal point of contact) and provide their name, phone, and e-mail to NYC DDC no later than seven days after NTP
2. Provide high-speed internet connectivity to access the PMIS.
3. Upload, submit, track, and review submittals and all Project related information via the PMIS. Where physical samples are required, review and track the submittal via the system, transmit the sample itself to the reviewer via traditional means and submit a scanned color copy or picture via the PMIS.
4. Enter all PMIS metadata as directed by NYC DDC
5. Use the file naming convention provided in Sub-Article 4.0 for all files uploaded to the PMIS

Refer to other General Requirements and technical specification sections for the specific submittal requirements stated in that section.

### 3.0.3 Submittal Coordination

The Contractor must coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, and related activities that require sequential activities.

### 3.0.4 Submittal Schedule

The Contractor must submit for approval by the Engineer, a Submittal Schedule within fifteen (15) days of Notice of Award. The Submittal Schedule must include and describe all project submittals. The Submittal Schedule must indicate the applicable specification section requirement, identify dates for submittal sequence, preparation and submission based on the approved project schedule and must be organized in a logical manner. The Submittals Schedule must take into consideration reasonable review times and any lead times required by fabricators or manufacturers.

In the interest of a progressive and orderly flow of work from the Contractor to the Engineer that avoids submission of an excessive number of submittals in the same period, the Submittal Schedule must not include more than two (2) submittal reviews per calendar week, unless the Engineer agrees in writing to a larger number on a case-by-case basis.

The Contractor must incorporate the following work flow and timeframes for submittal review in the Submittal Schedule:

1. Submittals received after 3PM will be deemed submitted the following working day.
2. Submittals received after 12PM on Friday will be deemed submitted on the following Monday.
3. Submittals will be deemed administratively incomplete until both the soft copy is uploaded to the PMIS and the hard copies have been received by NYC DDC

Review priorities and extension of review times must be coordinated with the times established in the approved Submittal Schedule.

### 3.0.5 Submittal Identification

The Contractor must place a permanent label or title block on each submittal for identification. Each submittal must include:

1. Name of firm or entity that prepared each submittal on the first page of the label or title block.
2. The following minimum information on label for processing and recording action taken:
  - a. Project name, NYC DDC Project Number and Contract Number
  - b. Revision date
  - c. Name and address of Design Consultant
  - d. Name and address of Contractor
  - e. Name and address of subcontractor
  - f. Name and address of supplier or manufacturer
3. Submittal number or other unique identifier, including revision identifier:
  - a. Number and title of relevant Specification Section
  - b. Drawing number and detail references, as appropriate
  - c. Location(s) where product is to be installed, as appropriate
  - d. Other necessary identification
4. A revision grid which lists all revisions of the submittal
  - a. Date Submitted
  - b. High-level description of change
  - c. Revision number in XX format starting at 00

### 3.0.6 Transmittal

The Contractor must package each submittal individually and appropriately for transmittal and handling. The Contractor must transmit each submittal using a transmittal form. Transmittals received from sources other than the Contractor will be returned without review. Re-submission of the same drawings or product data must bear the original number of the prior submission, the original titles and next sequential revision number.

#### 3.0.6.1 Transmittal Form

The Contractor must indicate the following information on the Transmittal Form:

1. Project name, NYC DDC Project number and Contract Number.
2. Date
3. Destination (To:).
4. Source (From:).
5. Unique identifier
6. Names of Contractor, subcontractor, manufacturer, and supplier.
7. Category and type of submittal.
8. Submittal purpose and description.
9. Specification Section number, unique identifier and revision number
10. Drawing number and detail references, as appropriate.
11. Transmittal number numbered consecutively.
12. Submittal and transmittal distribution record.
13. Remarks.
14. Signature of transmitter.

#### 4.0 SUBMITTAL FORMAT

##### 4.0.1 Shop Drawings, Product Data, and Quality Assurance Submittals

The Shop Drawings, unless otherwise directed, must be on sheets of the same size as the Contract Drawings, drawn accurately and of sufficient scale to be legible, with a one half (1/2) inch marginal space on each side and a two (2) inch marginal space for binding on the left side.

Shop Drawings and Product Data and Quality Assurance Submittals must be submitted to the PMIS as raster files in Adobe Acrobat ".pdf" format with a minimum resolution of 200 dpi. Each submittal must be readable and printable on the Department's systems with the following scanning parameters: 400 dpi resolution, autodeskewing and despeckling. Each submittal must contain a list of the submittals and the electronic format of their files. Native file versions of submittals may be requested at the discretion of NYC DDC

Responsibility of the Contractor: The approval of Shop Drawings will be general and must not relieve the Contractor of responsibility for the accuracy of such Shop Drawings, nor for the proper fitting and construction of the work, nor of the furnishing of materials or work required by the Contract and not indicated on the Shop Drawings. Approval of Shop Drawings must not be construed as approving departures from the Contract Drawings, Supplementary Drawings or Specifications.

Electronic copies of submittals uploaded to the PMIS must utilize the following standard file naming convention

Year	Four (4) digit year, i.e.: 2019
Month	Two (2) digit month, i.e.: June = 06
Day	Two (2) digit day, i.e. 28

DDC	NYC DDC
Project	Applicable project ESCR, BMCR, BPCR, RHCR
Sandy Ref.	SR = Superstorm Sandy Resilience
Specification	Applicable Specification section, i.e.: 03300
Submittal No.:	Sequential number within the specification section, i.e.: 0001
Rev	The 2-digit revision or version number i.e.: 03
Descr	Document title (short description, think Google key words, include sender/recipient acronyms if appropriate)

i.e.: 2019-06-28\_DDC\_ESCR\_SR\_03300-0001-03\_Product\_data\_name

#### **File naming guidelines:**

#### **Dates (Final Documents)**

Dates should always be presented 'back to front', that is with the year first (always given as a four-digit number), followed by the month (always given as a two-digit number), and the day (always given as a two-digit number) such as "20190801" or "2019-08-01" for August 1<sup>st</sup>, 2019. Dates in file names are used to identify issued records and to differentiate between multiple "final" issuances of the same document.

#### **Keep File Names Short but Meaningful**

Some words add length to a file name but do not contribute towards the meaning, for example words like "the", "a", "to" and "and". Use industry-standard nomenclature or an abbreviation of same wherever possible.

#### **No Spaces in File Names**

Use an underscore "\_" or a dash "-", and words for ease in sorting. Use of caps to distinguish words for ease of reading is encouraged (e.g. DocumentManagementPlan or Document\_Management\_Plan). Spaces between words increase the software system naming characters and should be avoided.

#### **Numbers in File Names**

When file names include numbers, it is important to include the zero for numbers 0-9 to maintain the numeric order. This helps to retrieve the latest record number. i.e. 01, 02 ... 99, unless it is a year or another number with more than two digits.

#### **Special Characters**

The use of special characters can cause problems with uploading, viewing and downloading documents over the internet. Special characters, such as: (~ " # % & \* : < > ? / \ { | } @ \$ ^ , ?) should not be used in filenames. Even if one's operating system allows filenames with those characters there can be issues when trying to transport files to another system.

### **Correspondence Files**

It is recommended that the file names of correspondence include the name of the correspondent, an indication of the subject, and the date of the correspondence, e.g.: 2019-11-07\_DDC\_ESCR\_SRM1\_HNTB-DDC\_Sample\_Report\_R02

#### 4.0.2 Requests for Information (RFIs)

RFIs and other queries of the Design Consultant must be submitted to the PMIS using the forms specifically prepared for this purpose by the Design Consultant.

#### 4.0.3 As-Builts

CADD record drawing (as-built) files submitted by the Contractor must be vectorized, computer-generated drawing files in the latest version of native MicroStation ".dgn" format. Each submittal must include the resource files such as Cell Libraries, Font Libraries, DGNLIB and reference files used to generate the

CADD drawing files. Record drawings must also be submitted in PDF or other raster format. Each submittal must be provided on CD-ROM or DVD+R and transmitted on the Project Management Information System. Each submittal must have a complete drawing list (drawing number and CADD file name for each drawing).

### 5.0 SUBMISSION OF SHOP DRAWINGS

**Initial Submission:** The Contractor must upload the submittal to the PMIS and provide hard copies as indicated in General Conditions for the Design Consultant's review and acceptance. The Engineer will transmit Shop Drawings to appropriate Design Consultants for review and acceptance, including Commissioning Authority/Agent as applicable. A satisfactory Shop Drawing will be stamped "No Exceptions Taken", be dated and returned to the Contractor.

Should the Shop Drawing(s) be marked "Make Corrections Noted" by the Design Consultant, the Engineer will return the Shop Drawings to the Contractor to make the necessary corrections and changes as indicated thereon.

Should the Shop Drawing(s) be "Rejected" or noted "Revise and Resubmit" by the Design Consultant, the Design Consultant will return the Shop Drawings to the Contractor with the necessary corrections and changes to be made as indicated thereon.

The Contractor must make such corrections and again submit the shop drawing to the Design Consultant. The Contractor must revise and resubmit the Shop Drawing as required by the until the Shop Drawings are stamped "No Exceptions Taken" or "Make Corrections Noted".

**Commencement of Work:** No work or fabrication called for by the Shop Drawings must be performed until acceptance of the said drawings by the Design Consultant. In addition to the foregoing Shop Drawing transmissions, a copy of any Shop Drawing prepared by any of the Contractor's subcontractors which Shop Drawing indicated work related to, adjacent to, impinging upon, or affecting work to be done by other subcontractors must be transmitted to the subcontractors so affected.

**Variations:** If the Shop Drawings show variations from the Contract requirements because of standard shop practice or other reasons, the Contractor must make specific mention of such variations in its letter

of submittal. Acceptance of the Shop Drawings will constitute acceptance of the subject matter thereof only.

#### 6.0 SUBMISSION OF PRODUCT DATA

Except as otherwise prescribed herein, the submission, review and acceptance of Product Data and Catalogue cuts must conform to the procedures specified above.

Submissions of Product Data must include the following information, as applicable:

1. Manufacturer's written recommendations.
2. Manufacturer's product specifications.
3. Manufacturer's installation instructions.
4. Standard color charts.
5. Manufacturer's catalog cuts.
6. Wiring diagrams showing factory-installed wiring.
7. Printed performance curves.
8. Operational range diagrams.
9. Mill reports.
10. Standard product operation and maintenance manuals.
11. Compliance with specified referenced standards.
12. Testing by recognized testing agency.
13. Application of testing agency labels and seals.
14. Notification of coordination requirements.

The Contractor must submit Product Data before or concurrent with Samples of Materials.

#### 7.0 SUBMISSION OF SAMPLES OF MATERIALS

Samples must be submitted in triplicate, of sufficient size to show the quality, type, range of color, finish and texture of the material.

Each of the samples must be labeled as follows:

1. Name of the Project, NYC DDC Project Number and Contract Number.
2. Name and quality of the material.
3. Date.

#### 8.0 SUBMISSION OF PHOTOS

All electronic photographs must be uniquely identified, include the project abbreviation, identify the location depicted in the photo, date photo was taken and submitted in Joint Photographic Experts Group (JPEG) (.jpg) file format, sized at a minimum resolution of 1024 by 768 pixels. Save grayscale or color photo images that are scanned in JPEG (.jpg) file format with medium to low quality compression at a resolution of 200 dpi.

### B3. SPECIAL CONDITIONS FOR MARITIME, WATERFRONT, AND FLOATING PLANTS

#### 1.0 FLOATING PLANTS – GENERAL

##### 1.0.1 Definition

Floating plant/vessel: used to transport personnel, work boats, floating cranes and derricks, barges, patrol boats, etc.

##### 1.0.2 References

1. United States Army Corps of Engineers EM-385
2. OSHA 29 CFR

#### 2.0 REQUIREMENTS

##### 2.0.1 Floating Plant Inspection and Certification

All floating plants (i.e. regulated by the United States Coast Guard (USCG)) shall have required USCG documentation that is current before being placed in service. A copy shall be posted in a public area on board the vessel. A copy of any USCG Form 835 issued to the vessel in the preceding year shall be available to the Engineer and a copy shall be on board the vessel.

All dredges and quarter boats not subject to USCG inspection and certification or not having a current ABS classification shall be inspected in the working mode annually by a marine surveyor accredited by the National Association of Marine Surveyors (NAMS) or the Society of Accredited Marine Surveyors (SAMS) and having at least 5 years of experience in commercial marine plant and equipment.

All other plants shall be inspected before being placed in use and at least annually by the Agency required, including but not limited to the USCG for a Certificate of Inspection (COI), a marine surveyor (in the case of barges and/or vessels, certified crane inspector), professional engineer or the competent person as designated by the Contractor in writing.

The inspection shall be documented, a copy of the most recent inspection report shall be posted in a public area on board the vessel, and a copy shall be furnished to the Engineer upon request. A copy shall also be provided to the Engineer.

The inspection shall be appropriate for the intended use of the plant and shall, as a minimum, evaluate structural condition, compliance with safety requirements and compliance with NFPA 302.

Periodic inspections as defined in writing by the Contractor and tests shall assure that a safe operating condition is maintained.

Floating plants found in an unsafe condition shall be taken out of service and its use prohibited until unsafe conditions have been corrected.

##### 2.0.2 Personnel Qualifications

Vessel Captains shall be in possession of a current, valid USCG license, which shall be posted in a public area on board the vessel, including any required and correctly endorsed documents as required by the USCG.

Crane Operators shall be licensed or certified in accordance with the requirements outlined by the NYC Department of Buildings, Cranes and Derricks

Operators of the floating plant shall be licensed and/or documented by the USCG when the plant is subject to one or more of the following criteria:

1. The vessel is inspected and certified by USCG in accordance with EP 1130-2-500, Appendix L;
2. The vessel is normally engaged in or near a channel or fairway in operations that restrict or affect navigation of other vessels and is required by law to be equipped with radio-telephones of the 156-162 band frequency; or
3. Floating plant is engaged in the transfer of oil or hazardous material in bulk.
4. A USCG Radar Observers endorsement on licenses is required for Operators of Uninspected Towing Vessels and Masters and Pilots on radar-equipped vessels 26 ft (7.9 m) or more in length. Endorsements must be issued from a USCG-approved training facility.

### 2.0.3 Record Keeping

All records for drills, inspections, maintenance and other legal requirements shall be maintained on site by the Contractor with copies provided on a weekly basis to the Engineer.

All records shall be reviewed and signed by the competent person, as designated in the Contractor's health and safety plan, and by the Contractor's Health and Safety Manager.

All legal inspections required by the USCG and other Agencies shall be conspicuously displayed on the floating equipment.

### 2.0.4 Severe Weather Precautions

Since floating plant, boats or other marine activities may be endangered by severe weather (including sudden and locally severe weather, storms, high winds, hurricanes, and floods), plans shall be made for removing or securing plant and evacuation of personnel in emergencies. > See Section 01.E. This plan shall be part of the Contractor's Health and safety plan and shall include at least the following:

1. A description of the types of severe weather hazards the plant may potentially be exposed to and the steps that will be taken to guard against the hazards;
2. The time frame for implementing the plan (using as a reference the number of hours remaining for the storm to reach the work site if it continues at the predicted speed and direction), including the estimated time to move the plant to safe harbor after movement is started;
3. The name and location of the safe location(s);
  - a. The name of the vessel(s), type, capacity, speed, and availability that will be used to move any non-self-propelled plant;
  - b. River/tide gage readings at which floating plant must be moved away from dams, river structures, etc., to safe areas;
  - c. Method for securing equipment if not moved.
  - d. Extended movement of floating plant and tows shall be preceded by an evaluation of weather reports and conditions by a responsible person to ascertain that safe movement of the plant and tow can be accomplished.
  - e. Work or task orders shall be preceded by an evaluation of weather reports and conditions by the Contractor's Director of Safety on site to ascertain that safe working conditions exist and safe refuge of personnel is assured.
  - f. USCG approved personal flotation devices (PFDs) - Types I, II, III, or V - shall be worn by all personnel on decks exposed to severe weather, regardless of other safety devices used. USCG-approved Type V automatic inflatable PFDs rated for commercial use may be worn by workers on USACE sites per Section 05.J.02.
  - g. A sufficient number of vessels of adequate size and horsepower, each designed, outfitted, and equipped for towing service, shall be available at all times to move both

self- and non-self-propelled plant against tides, current, and winds during severe weather conditions.

- h. Contractors working in an exposed marine location shall monitor the National Oceanic and Atmospheric Administration (NOAA) marine weather broadcasts and use other commercial weather forecasting services as may be available.
- i. The floating plant shall be capable of withstanding whatever sea conditions may be experienced in the work area during the time period the work is being performed (i.e., seaworthiness, or good "sea keeping" qualities).

#### 2.0.5 Emergency Planning

1. On any inspected vessel, all emergency planning is to be provided in accordance with USCG requirements.
2. Plans shall be prepared for response to marine emergencies such as fire, sinking, flooding, severe weather, man overboard, hazardous material incidents, etc.
3. A station bill, setting forth the special duties and the duty station of each crewmember for various emergencies, shall be prepared and posted in conspicuous locations throughout the vessel.
4. Each crewmember shall be given a written description of, and shall become familiar with, their emergency duties and shall become familiar with the vessel's emergency signals.
5. "Abandon ship/boat" and "person overboard" procedures shall include instructions for mustering personnel.
6. On all floating plant that have a regular crew or on which people are quartered, the following drills shall be held at least monthly during each shift (unless the vessel is required, under USCG regulations, to be drilled more frequently): abandon ship/boat drills, fire drills, and person overboard or rescue drills.
  - a. The first set of drills shall be conducted within 24 hours of the vessel's occupancy or commencement of work.
  - b. Where crews are employed or quartered at night, every fourth set of drills shall be at night; the first set of night drills shall be conducted within the first 2 weeks of the vessel's occupancy.
  - c. Drills shall include, where appropriate, how to handle a pump shell or pipe rupture or failure within the hull (proper shutdown procedures, system containment, etc.) and how to handle leaks or failures of the hull or portions of it (what compartments to secure, how to handle power losses, pulling spuds to move to shallow water, etc.).
  - d. Person overboard or rescue drills shall be held at least monthly at boat yards, locks, dams, and other locations where marine rescue equipment is required.
  - e. Emergency lighting and power systems shall be operated and inspected at least monthly to ensure proper operation.
  - f. Storage batteries for emergency lighting and power systems shall be tested at least once every 2 months.

#### 2.0.6 Equipment Requirements

1. All equipment shall be maintained in accordance with manufacturers recommendations and requirements, as well as the requirements of any Agency providing certifications and inspections (such as the USCG COI or Crane Inspections) for equipment, the floating plant and/or vessels.
2. Fenders shall be provided to prevent damage and sparking and to provide safe areas for workers exposed to pinching situations caused by floating equipment.
3. Axes or other emergency cutting equipment shall be sharp and provided in accessible positions on all towing vessels for use such as freeing lines. On other floating plant (i.e., work barges, and floating cranes) emergency cutting equipment shall be provided in accessible positions.

4. Signal devices shall be provided on all vessels to give signals required by the navigation rules applicable to the waters on which the vessel is operated.
5. All controls requiring operation in cases of emergency (i.e., boiler stops, safety valves, power switches, fuel valves, alarms, and fire extinguishing systems) shall be located so that they are protected against accidental operation but are readily accessible in an emergency.
6. Electric lights used on or around gasoline and oil barges or other marine locations where a fire or explosion hazard exists shall be explosion-proof or approved as intrinsically safe.
7. General alarm systems shall be installed and maintained on all floating plant where it is possible for either a passenger or crewman to be out of sight or hearing from any other person.
8. Where general alarm systems are used they shall be operated from the primary electrical system with standby batteries on trickle charge that will automatically furnish the required energy during an electrical-system failure.
9. A sufficient number of signaling devices shall be placed on each deck so that they can be distinctly heard/seen above the normal background noise at any point on the deck.
10. All signaling devices shall be so interconnected that actuation can occur from at least one strategic point on each deck.
11. For floating plant with internal combustion engines, marine quality listed CO monitors shall be installed and maintained in all enclosed occupied spaces (crew quarters, pilot houses, etc.).
12. All doors shall be capable of being opened from either side and provided with positive means to secure them in both the open and closed position.
13. Escape hatches and emergency exits shall be marked on both sides with letters, at least 1 in (2.5 cm) high, stating "EMERGENCY EXIT - KEEP CLEAR."
14. Each prime mover (engine, turbine, motor) driving a deck winch shall be capable of being stopped by controls remote from the prime mover locations.
15. Shore power receptacles shall have a grounding conductor to prevent potential difference between the shore and the vessel.
16. All 120-, 208-, and 240-volt shall be grounded and fitted with Ground Fault Circuit Interrupter (GFCI) protection.
17. Cord connected equipment used in any of the above areas shall be connected to an outlet with GFCI protection.
18. Ground-fault protected receptacles shall be conspicuously marked "GFCI PROTECTED".
19. Where appropriate, vessels should have watertight compartments readily identified and properly maintained in a watertight condition (i.e., sealable doors in place and fully functional). Penetrations shall be maintained in a watertight condition.
20. All reciprocating, rotating and moving parts of winch gears and other equipment shall be properly guarded.

#### 2.0.7 Fuel Systems and Fuel Transfers

1. The provisions of the Oil Pollution Act of 1990, as amended, shall apply to floating plant operations as applicable
2. Gauge glasses or try cocks shall not be installed on fuel tanks or lines unless they meet the requirements of 46 CFR 58.50-10.
3. A shutoff valve shall be installed at the fuel tank connection: arrangement shall be made for operating this valve from outside the compartment in which the tank is located and from outside the engine compartment and outside the house bulkheads at or above the weather deck of the vessel.
4. A shutoff valve shall be installed at the engine end of the fuel line unless the length of the supply pipe is 6 ft (1.8 m) or less.
5. All carburetors on gasoline engines shall be equipped with a backfire trap or flame arrestor.
6. All carburetors, except down-draft type, shall be provided with a drip pan, with flame screen, that is continuously emptied by suction from the intake manifold or by a waste tank.

7. Fuel and lubricant containers and tanks shall be diked, curbed or controlled by other means complying with USCG requirements to contain the tank contents in case of leakage in accordance with 46 CFR 98.30-15, and 33 CFR 155.320.
8. Fuel oil transfers for floating plant shall be in accordance with the provisions of USCG regulations, 33 CFR 155, and/or 33 CFR 156. For uninspected vessels, USCG regulations in 33 CFR 156.120 and 33 CFR 155.320 for fuel coupling devices and fuel oil discharge containment apply.
9. All decks, overheads, and bulkheads, serving as fuel oil tank boundaries shall indicate the tank boundary with contrasting paint and be labeled "FUEL OIL TANK - NO HOT WORK".

#### 2.0.8 Safe Practices

1. The Contractor shall incorporate all safe practices into their Health and Safety plan to include training and inspection by the designated competent persons.
2. Obstructing cables/lines that cross waterways between floating plant or between plant and mooring shall be clearly marked.
3. Provisions shall be made to prevent accumulation of fuel and grease on floors and decks and in bilges.
4. Swimming and/or diving shall be prohibited for all personnel, except certified divers in the performance of their duties, unless necessary to prevent injury or loss of life.
5. Wading is permitted only when there are no severe underwater hazards such as sudden drop-offs, heavy surf above 3 ft (1 m), dangerous aquatic life, etc. Personnel wading shall wear an approved PFD and shall be monitored by personnel who are nearby and equipped to conduct a rescue if needed. Wading shall be discontinued when the person's feet cannot easily touch bottom, regardless of depth.
6. A person in the water shall be considered as a person overboard and appropriate action shall be taken.
7. When barriers or blanks are installed in piping systems as a lock-out procedure, positive means (such as protruding handles) shall be used to easily recognize their presence. Barriers shall be marked (including name of installer, name of inspector, and date of installation) and accounted for prior to installation and subsequent to removal.
8. Deck loading will be limited to safe capacity. Loads will be secured and holdbacks or rings will be provided to secure loose equipment during rough weather.
9. Safeguards such as barriers, curbs, or other structures shall be provided to prevent front-end loaders, bulldozers, trucks, backhoes, track hoes, and similar operating equipment on floating equipment from falling into the water. Whenever this equipment is operating on deck, deck surfaces of floating plant shall remain above water and the entire bottom area of a floating plant shall remain submerged.
10. Projection and tripping hazards shall be removed, identified with warning signs, or distinctly marked with safety yellow.
11. Deck cargo carried on fuel barges shall be placed on dunnage.
12. When two or more pieces of floating plant are being used as one unit, they shall be securely fastened together to prevent openings between them or the openings shall be covered or guarded.
13. When three or more floating plant are configured for stationary work, a competent person shall identify any openings between decks of stationary vessels or vessels and other structures that create fully enclosed water areas (duck ponds) into which personnel can fall. If such openings are detected, means shall be taken to protect personnel from the hazard.
14. When physical barriers are not practical, ladders and life rings shall be installed in each enclosed water area to allow personnel to self-rescue. Ladders may be a rigid type or Jacob's ladder, and must be securely anchored to the vessel or structure. Life rings shall have a sufficient length of rope to allow them to float on the water surface and the rope shall be

securely anchored to the vessel. The number and placement of ladders and life rings shall be sufficient so that the maximum swimming distance to them is no more than 25 ft (7.9 m).

Ladders and life rings may be retracted during reconfiguration or movement of plant.

15. Anchor points shall be clearly identified and shall be inspected prior to applying a load or putting cables under tension. Anchor points not structurally sound shall be cut out, removed, and/or welded over to preclude usage. Visual checks and "all clear" warnings shall be made prior to tensioning cables.
16. Provisions shall be made to protect persons being transported by water from the elements
17. Plant fleeting areas will be designated in which all idle plant shall be moored. Such areas shall have warning buoys, signs, and lights in prominent locations.
18. The Contractor or, for Government-conducted operations, the Engineer, shall provide information to the local USCG Office identifying the marine activity and hazards.
19. Open or pelican hooks may be used for lifting anchor buoys.
20. Mechanical means such as securing pins shall be used to hold spuds safely in place before transiting from one site to another
21. When there is a potential for marine activities to interfere with or damage utilities or other structures, including those underwater, a survey shall be conducted to identify the utilities or structures in the work area, analyze the potential for interference or damage, and recommend steps to be taken to prevent the interference or damage.

#### 2.0.9 Ventilation

1. In all circumstances and configurations, all ventilation requirements on floating plants and vessels must meet all applicable codes and requirements.
2. Motor vessels or boats powered by internal combustion engines having electric spark ignition systems or having auxiliary engines of this type in cabins, compartments, or confined spaces shall be equipped with an exhaust fan(s) for ventilating engine space and bilges.
3. At least two ventilators fitted with fans capable of ventilating each machinery space and fuel tank compartment, including bilges, shall be provided to remove any flammable or explosive gases, except those vessels constructed with the greater portions of the bilges open or exposed to the natural atmosphere at all times. Note: this requirement does not apply to diesel engines.
4. Other compartment spaces within a vessel, not covered in this Section, may be naturally vented.
5. For launches and motorboats having diesel power plants not equipped with fans, ventilating shall be by natural draft through permanently open inlet and outlet ducts extending into the bilges. Inlet and exhaust ducts shall be equipped with cowls or exhaust heads.
6. For launches, motorboats (survey boats), and skiffs having deck-mounted internal combustion engines (such as generators, jigger pumps) and not equipped with fans, exhaust piping shall be located away from personnel spaces to minimize CO infiltration in the work space
7. Vent and ventilator requirements.
  - a. Fans shall be rated for Class I hazardous locations and located as remotely from potential explosive areas as practical. > See Section 11.H.
  - b. The vent intake shall extend to within 1 ft (0.3 m) of the bottom of the compartment
  - c. Means shall be provided for stopping fans in ventilation systems serving machinery components and for closing doorways, ventilators, chases, and annular spaces around tunnels and other openings from outside these spaces in case of fire.
  - d. Engines shall not be started until the engine space and bilges have been ventilated to remove fuel vapor.

#### 2.0.10 Navigation

The most current, pertinent information published by the USCG regarding aids to navigation shall be maintained aboard self-propelled vessels 26 ft (7.9 m) or more in length.

## 2.0.11 Access

### 2.0.11.1 General

1. Means of access shall be properly secured, guarded, and maintained free of slipping and tripping hazards.
2. Non-slip surfaces shall be provided on working decks, stair treads, ship ladders, platforms, catwalks, and walkways, particularly on the weather side of doorways opening on deck.
3. Double rung or flat tread type Jacob's ladders shall be used only when no safer form of access is practical. When in use, they shall hang without slack and be properly secured.
4. Vertical ladders shall comply with ASTM F1166-95a.
5. Ladders shall not be climbed by more than one person at a time between the same set of rails.

### 2.0.11.2 Access To/From Vessels

Safe means for boarding or leaving a floating plant shall be provided and guarded to prevent persons from falling or slipping thereon. Walking on rip-rap should be avoided where practical.

A stairway, ladder, ramp, gangway, personnel hoist or other safe means of access shall be provided at personnel points of access with breaks of 19 in (48.2 cm) or more in elevation.

Ramps for access of equipment and vehicles to or between vessels shall be of adequate strength, be provided with sideboards, and be well maintained.

Gangways and ramps shall be:

1. Secured at one end by at least one point on each side with lines or chains to prevent overturning;
2. Supported at the other end in such a manner to carry them and their normal load during use in the event they slide off their supports;
3. Placed at an angle no greater than that recommended by the manufacturer; and
4. Provided with a standard guardrail (toe boards are optional depending on their usefulness and the hazard involved).

### 2.0.11.3 Access on Vessels.

Vertical access shall be provided between various decks by means of stairs, ramps, or vertical ladders installed in accordance with ASTM F1166.

Employees shall not be permitted to pass fore and aft, over, or around deck loads unless there is a safe passage.

If cargo or materials are stored on deck of barges, scows, floats, etc., the outboard edge shall not be used as a passageway unless at least 2 ft (0.6 m) of clearance is maintained.

Vessel loads shall be limited so that access and passageways in use will remain above the waterline. Decks and passageways shall not be used for access if submerged or subject to constant breaking waves, except in an emergency.

### 2.0.11.4 Emergency Access

Vessels, except those easily boarded from the water, shall be equipped with:

1. At least one portable or permanent ladder of sufficient length to allow a person to self-rescue by boarding the ladder from the water, and
2. Other methods or means designed to assist in the rescue of an incapacitated person overboard.
3. Two means of escape shall be provided for normal work, assembly, sleeping, and messing areas on floating plants.

4. Means of access shall be maintained as safe and functional.

#### 2.0.12 Marine Fall Protection Systems

On decks or work surfaces 6 ft (1.8 m) or more above the main deck or 6 ft or more above adjacent vessel decks, docks, or other hard surfaces, Railing Type A or Type B, as described in Section 19.E., or bulwarks, coamings, or other structures meeting the height and strength requirements of these railing systems shall be provided except as excluded in Sections 19.C.03 and 19.C.04.

Deck edge toe boards not less than 3.5 in (8.8 cm) high for Type A and 2 in (5 cm) high for Type B railings shall be provided when the railings are used for fall protection. Toe boards shall meet the strength requirements in Section 21.F.01.f. Scuppers and/ or drainage holes may be installed as needed as long as the top edge of the toeboard is intact and the strength requirements are retained.

Personal fall protection systems meeting the requirements of Section 21.I may be used when railing systems are not installed.

Railing systems and personal fall protection systems are not considered feasible on the main deck of vessels that perform duty cycle material loading and unloading operations from barges, scows or other vessels alongside.

#### 2.0.13 Main Deck Perimeter Protection

Main deck perimeter protection systems are intended to provide protection against falling overboard. Main deck perimeter protection is required on all manned vessels, except where excluded in Section 19.D.05. Unmanned vessels do not require perimeter protection, however, fall protection shall be provided where the vessel configuration and operation exposes personnel to falls onto a hard surface from vertical distances greater than 6 ft (1.8 m). The design parameters for the different types of main deck railing systems listed in this Section are in Section 19.E unless otherwise noted.

Manned vessels are vessels that operate with crews, or quartered personnel, or that have work areas that are occupied by assigned personnel during normal work activities.

Unmanned vessels are typically those that carry cargo such as materials, supplies, equipment, or liquids, and do not have personnel on board except during loading and unloading and during short term operations such as tie-down, inspections, etc.

Manned vessels over 26 ft (7.9 m) in length operating in unprotected or partially protected waters (as defined in 46 CFR) shall have Type B Railings provided around the deck edge, except where excluded in Section 19.D.05.

Manned vessels over 26 ft (7.9 m) in length operating in rivers or protected waters shall have Type B or Type C Railings provided around the deck edge, except where excluded in Section 19.D.05.

Type D Grab rails shall be provided on all manned vessels in the following instances:

1. On deckhouses or other similar permanent structures more than 48 in (1.2 m) from deck edge rail systems
2. On deck houses or similar permanent structures that are within 8 ft (2.5 m) of the deck edge in areas where the deck edge rail has been omitted or may be temporarily removed in accordance with Section 19.D.05.

The following are main deck areas where perimeter protection may be omitted or temporarily removed:

1. Deck perimeter rails may be omitted from deck work areas specifically intended for line handling, working over the side of the vessel, load handling operations and designated boarding areas. Railings in these areas may obstruct work or access and present additional hazards such as pinch points against railings. Such deck edge areas may include those for line handling,

fleeting scows, mooring vessels, towing, pile driving activities, and handling or placing of construction materials and equipment pipelines, and anchors.

2. Deck Perimeter rails may be omitted from main deck areas where the overall walkway width is less than 2 ft (0.6 m) between deck structures/permanent equipment and the deck edge.
3. Removable perimeter rail sections may be installed in areas where activities such as working over the side of the vessel or loading operations are not normally performed. These rails shall be maintained in place when vessel operations do not include activity in these areas or during periods of tie-up or inactivity.

When deck-edge perimeter protection is not present, standard operating procedures in the Health and Safety Plan in accordance with USCG and OSHA requirements or other documents shall be developed to address the hazards involved. These documents shall be reviewed by all crew during initial orientation and at regular intervals afterward. The following operational procedures shall be followed:

1. PFD's must be worn by personnel in areas where deck perimeter protection is not present. Such areas may be used by crew to transit or access areas of the boat, but when doing so, all other requirements of this Section must be met. Areas where railings are removed shall be blocked off from access by a suitable barrier, or shall be clearly marked as PFD- required areas by signage, deck markings, or other means;
2. Continuous sight and verbal/radio contact shall be maintained between personnel in the non-protected deck perimeter areas and the vessel operator or a designated crew member who is in sight and verbal/radio contact with the operator, and who will monitor the workers in the area;
3. A safety skiff or equivalent rescue vessel shall be readily available throughout the duration of these activities in accordance with Section 05.K.

Boats with length 26 ft (7.9 m) or less shall be provided with integrated combinations of two or more of the below listed items to provide continuous perimeter protection around the vessel: Cockpits; Coamings; Handholds; Toe Rails; Life Rails; Deck Rails; Stern Rails and Bow Rails. The installations shall be in accordance with either ABYC Standards or ISO Standard 15085, as demonstrated by a manufacturer's certificate, label or other documentation.

#### Marine Railing Types.

Allowable types of railings on vessels (A, B, C, & D) are identified below. Specific requirements for the vessel types and areas where each may be used are delineated in Sections 19.G and 19.H. > See Appendix F.

**Railing Type A: Two-Tier Rigid Fall Protection Rail.** This railing is comprised of rigid vertical stanchions and two rigid horizontal tiers in accordance with Section 21.F.01. Minimum top rail height is 42 in +/- 3 in (106.6 cm +/- 7.6 cm) and the lower horizontal tier is at half height.

**Railing Type B: Three-Tier Marine Rigid or Tensioned Railing.** This railing is comprised of rigid vertical stanchions and three rigid or tensioned horizontal tiers. The following parameters apply:

1. Clear spacing between tiers shall be no greater than 9 in (22.8 cm), 15 in (38 cm) and 15-in respectively. The 9-in space is closest to the deck surface. Minimum height from deck to the top tier may not be less than 39 in (99 cm).
2. The 9-in, 15-in and 15-in tier spacing above may not be exceeded.
3. The bottom tier may be omitted in way of deck fittings or in order to facilitate line handling. The space resulting from the removed lower tier may not extend more than 2 ft (0.6 m) beyond either side of the deck fitting.
4. Vertical stanchions may be pipe or structural sections. Horizontal tiers may be constructed from rigid (pipe or structural sections) or non-rigid (wire rope or chain) components, or from

combinations of these components. Non-rigid tiers must be tensioned with turnbuckles or similar components.

5. Railings may be either fixed or removable in sections. All vertical stanchions must be adequate to withstand a 200 lbs (60.9 kg) load applied horizontally at the top of the stanchion. Stanchion spacing may not exceed 8 ft (2.4 m).
6. Pipe or structural section rail components shall be sized appropriately to meet NYCDOB Code.
7. Chain or wire rope together with all connecting fittings shall have minimum breaking strength of 4,000 lbs (1814.3 kg).

Chain or wire rope horizontal tiers shall be tensioned so that:

1. There is no slack;
2. Sag does not exceed 1/4 in (.62 cm) at any point between stanchions, and
3. The lowest point from deck to the top of the upper rail may not be less than 39 in (1 m) at any point between the stanchions. Tensioned railing tiers shall not deflect more than 1 in (2.5 cm) under a load of 200 lbs (60.9 kg).

Solid bulwarks or coamings providing equal perimeter protection to a height of 39 in (1 m) may also be provided. Bulwarks may be constructed of structural plate and shapes. Bulwarks must meet all strength/deflection/open spacing requirements presented above for railings.

Railing Type C: Non-Tensioned Railings and Flexible or Swing-Away Railings shall consist of rigid vertical stanchions with horizontal non-tensioned chain, wire rope or rigid tiers that clip to the verticals.

Non-Tensioned Railings shall consist of horizontal tiers constructed from chain, wire rope, pipe or structural sections or combinations of these components. Vertical stanchions shall be pipe or structural sections. Vertical support spacing shall not exceed 8 ft (2.4 m).

Flexible or Swing-Away Rails shall consist of chain or wire rope tensioned vertical support lines with non-tensioned chain, wire rope or clip-on rigid horizontal tiers. Vertical support line spacing shall not exceed 6 ft (1.8 m).

Pipe or structural section rail components shall be sized appropriately to meet the performance criteria of NY Chain or wire rope together with all connecting fittings shall have minimum breaking strength of 4,000 lbs (1800 kg).

For Non-Tensioned Railings and Flexible or Swing-Away Railings, sag of horizontal tiers shall not exceed 3 in (10 cm) between vertical supports.

Non-Tensioned Railings and Flexible or Swing-Away Railings shall be configured with four or more horizontal tiers. The number of horizontal tiers shall be sufficient to meet the following requirements:

1. Effective clear spacing between the deck and bottom tier shall be no greater than 9 in (22.8 cm).
2. Effective clear spacing between all tiers above the bottom tier shall be no greater than 15 in (38.1 cm).
3. Effective minimum height from deck to the top tier may not be less than 39 in (1 m).
4. The effective tier spacing identified above includes the effect of the increased spacing associated with sag in the tiers, applied either up or down. Clear spacing measurements shall be made with the railing tiers spread to form the largest opening.
5. Railing height is reduced by the amount of sag in the tiers. Railing minimum height shall be measured at the lowest point in the rail.
6. The bottom tier may be omitted in way of deck fittings or in order to facilitate line handling. The space caused by the removed lower tier may not extend more than 2 ft (0.6 beyond either side of the deck fitting).

7. The top tier may not deflect to a height less than 39 in (1 m) above the deck under a force of 200 lbs (60.9 kg), applied vertically. In addition, the top tier may not deflect more than 12 in (30.4 cm) horizontally under a force of 200 lbs applied horizontally.

Tensioning springs in the vertical support lines, if provided, must be of the compression with drawbar type.

#### 2.0.14 Launches, Motorboats and Skiffs

##### Crew requirements

In the following circumstances a qualified employee shall be assigned to assist with deck duties:

1. When extended trips including overnight trips are made from the work site;
2. When conditions of navigation make it hazardous for an operator to leave the wheel while underway;
3. When operations being performed, other than tying-in, require the handling of lines;
4. When operating at night or during inclement weather;
5. When towing; or
6. While a vessel is transporting crew or passengers.

A qualified employee is any individual who has established, to the satisfaction of the operator of the vessel that he/she is physically and mentally capable of adequately performing the deck duties to which he/she may be assigned.

##### Personnel and cargo requirements

1. The maximum number of personnel and weight that can safely be transported shall be posted on all launches, motorboats, and skiffs. The number of personnel (including crew) shall not exceed the number of PFDs aboard.
2. Each boat shall have sufficient room, freeboard, and stability to safely carry the cargo and number of persons allowed with consideration given to the weather and water conditions in which it will be operated.
3. Launches, motorboats and skiffs less than 20 ft (6 m) in length shall meet 33 CFR 183 requiring level floatation after flooding or swamping.
4. All open cabin launches or motorboats shall be equipped with "kill (dead man) switches".

##### Float Plans

Float plans shall be prepared by the operator of a launch or motorboat when engaged in surveying, patrolling, or inspection activities that are remote and are expected to take longer than 4 hours or when the operator is traveling alone. The plan shall be filed with the boat operator's supervisor and shall contain the following, as a minimum:

1. Vessel information (make/model or local identifier);
2. Personnel on-board;
3. Activity to be performed;
4. Expected time of departure, route, and time of return;
5. Means of communication (adequate means of communication shall be provided).

All motorboat operators shall complete and document the following training:

1. A boating safety course meeting the criteria of the USCG Auxiliary, National Association of Safe Boating Law Administrators (NASBLA), or equivalent;
2. Motorboat handling training, based on the type of boats they will operate, provided by qualified instructors (in-house or other). Operators must pass a written and operational test;
3. Current USCG licensed personnel are exempt from the boating safety training, but they shall complete the written exam and operational test;

### 2.0.15 Scows and Barges

Scows dumping in open ocean waters should be equipped with remote opening devices to preclude the transfer of personnel between the vessels.

A safe means for transferring personnel between the towing vessels and scow shall be provided in accordance with Section 19.B.02.

The Contractor shall identify general and site-specific adverse weather and sea conditions (e.g., currents) under which the towing of scows or cargo barges is prohibited.

All barges and scows that are used as deck cargo barges shall comply with 46 CFR 174.010 through 174.020 for intact stability of deck cargo barges.

Personal fall protection devices or other fall protection as listed hereinC shall be used on all scows and open barges to prevent personnel transiting between the stern and bow of the vessel from falling into the hopper or falling off the side of the vessel to structures (e.g. dock, vessels) located 6 ft (1.8 m) or more below.

### 2.0.15 Personal Flotation Devices

Inherently buoyant Type III, Type V work vests, or better USCG-approved personal flotation devices (PFDs) shall be provided and properly worn in closed fashion (zipped, tied, latched, etc.) by all persons in the following circumstances:

1. On floating pipelines, pontoons, rafts, or stages;
2. On structures or equipment extending over or next to water except where guardrails, personal fall protection system, or safety nets are provided for employees;
3. Working at night, where there are drowning hazards i.e. working over or within 5 ft of the water, regardless of other safeguards provided;
4. In skiffs, small boats, or launches, unless in an enclosed cabin or cockpit; or
5. Whenever there is a drowning hazard.

Automatic-Inflatable PFDs Type V or better, USCG-approved for Commercial Use, may be worn by workers in lieu of inherently buoyant PFDs (see conditions 05.J.01.a-eabove), provided the following criteria is met:

1. PFDs are worn only by workers over 16 years of age and those who weigh 90 lb(40.8 kg) or more;
2. An AHA shall be developed for the intended activity and shall be used to select the most appropriate PFD for the activity;
3. PFDs used in heavy construction or maintenance activities or where hot work (welding, brazing, cutting, soldering, etc.) is to be performed must be designed, tested and certified by the manufacturers for this type of work;
4. PFDs shall provide a 30-pound minimum buoyancy, post-deployment, and shall have status indicator window;
5. Personnel shall be trained in the use, maintenance, restrictions, care, storage, inspection and post-deployment procedures per manufacturer's instructions
6. The USCG-approval for auto-inflatable PFD's is contingent upon the PFD being worn, not stowed. All auto-inflatable PFDs must be worn at all times a drowning hazard exists
7. In-water testing is required for all first time users so that wearers become familiar with the feel and performance of the PFD.
8. All wearable PFDs shall be of an international orange (or orange/red) or ANSI 107yellow-green color.

9. Each inherently buoyant PFD shall have at least 31 in<sup>2</sup> (200 cm<sup>2</sup>) of retroreflective material attached to its front side and at least 31 in<sup>2</sup> (200 cm<sup>2</sup>) on its back side, per USCG b. Each auto-inflatable PFD shall have at least 31 in<sup>2</sup> (200 cm<sup>2</sup>)
10. Each PFD shall be equipped with a USCG-approved automatically activated light. Lights are not required for PFDs on projects performed exclusively during daylight hours.
11. Before and after each use, the PFD shall be inspected for defects that would alter its strength or buoyancy.

Throwable devices (Type IV PFD).

1. On USCG-inspected vessels, ring buoys are required to have automatic floating electric water lights (46 CFR 160).
2. On all other floating plant and shore installations, lights on life rings are required only in locations where adequate general lighting (e.g., floodlights, light stanchions) is not provided. For these plant and installations, at least one life ring, and every third one thereafter, shall have an automatic floating electric water light attached.
  - a. All PFDs shall be equipped with retroreflective tape in accordance with USCG requirements.
  - b. Life rings (rope attachment not required) and ring buoys (rope attachment required) shall be USCG-approved; shall have at least 90 ft (27.4 m) of 3/8 in (0.9 cm) of attached solid braid polypropylene, or equivalent. Throw bags may be used in addition to life rings or ring buoys. These throwable devices and lifelines shall be inspected at a minimum, every 6 months and shall be stored in such a manner as to allow immediate deployment and will be protected from degradation from weather and sunlight. Life rings or ring buoys shall be readily available and shall be provided at the following places:
    3. (1) At least one not less than 20 in (51 cm) on each safety skiff up to 26 ft (7.9 m) in length (46 CFR 117.70);
    4. (2) At least one (1) 24 in (61 cm) in diameter on all motor boats longer than 26 ft (7.9m) in length up to 65 ft (19.8 m) in length and for motor boats 65 ft (19.8 m) in length or longer, a minimum 3 life buoys of not less than 24 in (61 cm) and one additional for each increase in length of 100 ft (30.4 m) or fraction thereof; and
    5. (3) At least one (1) at intervals of not more than 200 ft (60.9 m) on pipelines, walkways, wharves, piers, bulkheads, lock walls, scaffolds, platforms, and similar structures extending over or immediately next to water, unless the fall distance to the water is more than 45 ft (13.7 m), in which case a life ring shall be used. (The length of line for life rings at these locations shall be evaluated, but the length may not be less than 90 ft (27.4 m).

#### 2.0.16 Lifesaving and Safety Skiffs

During construction activities, at least one skiff shall be immediately available at locations where employees work over or immediately next to water. Note: This requirement is applicable to any Operations and Maintenance activities that cause an employee to work outside the designed, permanently installed safety controls (i.e., guardrails).

Personnel trained in launching and operating the skiff shall be readily available during working hours. Lifesaving personnel shall perform a lifesaving drill, including the launching and recovery of the skiff, before the initiation of work at the site and monthly thereafter. All records of drills shall be maintained on site and a copy provided to the Engineer.

Skiffs shall be kept afloat or ready for instant launching.

Required equipment must be onboard and meet or exceed USCG requirements. Skiffs shall be equipped as follows:

1. Four (4) oars (two (2) if the skiff is motor powered);

2. Oarlocks attached to gunwales or the oars;
3. One (1) ball-pointed boat hook;
4. One (1) ring buoy with 90 ft (21.3 m) of 3/8 in (0.9 cm) solid braid polypropylene, or equivalent, line attached; and
5. PFDs in number equaling the skiff rating for the maximum number of personnel allowed on board.
6. Fire Extinguisher.
7. In locations where waters are rough or swift, or where manually operated boats are not practical, a power boat suitable for the waters shall be provided and equipped for lifesaving.

Skiffs and power boats shall have buoyant material capable of floating the boat, its equipment, and the crew.

On vessels (such as skiffs) without permanently mounted navigation lights, portable battery-operated navigation lights will be available and used for night operations.

### 3.0 VESSEL GENERAL PERMIT FOR DISCHARGES INCIDENTAL TO THE NORMAL OPERATION OF VESSELS (VGP) AUTHORIZATION TO DISCHARGE UNDER THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPEDES)

#### 3.01 Reference

[https://www3.epa.gov/npdes/pubs/vessel\\_vgp\\_permit.pdf](https://www3.epa.gov/npdes/pubs/vessel_vgp_permit.pdf)

#### 3.02 VGP Authorization

Contractor is required to obtain the VGP Authorization under the NPEDES program with the EPA for all vessels on the project as follows:

1. To obtain authorization under this permit, you must meet the Part 1.2 eligibility requirements. If your vessel meets the requirements under Part 1.5.1.1, you must submit a Notice of Intent (NOI) to receive permit coverage.
2. Prior to NOI submission, owner/operators of these vessels are authorized to discharge under this permit. This automatic authorization extends until owner/operators of vessels that meet the requirements under Part 1.5.1.1 submit NOIs, but shall not extend beyond 9 months after permit issuance.
3. Owner/operators of vessels that meet the requirements under Part 1.5.1.2 are automatically authorized to discharge under this permit and are not required to submit NOIs.

#### 3.03 General Scope of the VGP

This permit is applicable to discharges incidental to the normal operation of a vessel identified in Part 1.2.2 into waters subject to this permit. These waters are "waters of the United States" as defined in 40 CFR 122.2 (extending to the outer reach of the 3 mile territorial sea as defined in section 502(8) of the CWA.) This includes all navigable waters of the Great Lakes subject to the jurisdiction of the United States. Recreational vessels as defined in section 502(25) of the Clean Water Act are not subject to this permit. Such vessels are not subject to NPDES permitting under Section 402 of the Clean Water Act, and are instead subject to regulation under Section 312(o) of the Clean Water Act. In addition, with the exception of ballast water discharges, non-recreational vessels less than 79 feet (24.08 meters) in length, and all commercial fishing vessels, regardless of length, are not subject to this permit. See P.L. 110-299. Commercial fishing vessels and other non-recreational vessels less than 79 feet are eligible for permit coverage under this permit for their ballast water discharges. If auxiliary vessels or craft, such as lifeboats, rescue boats, or barges onboard large vessels require permit coverage (i.e. they are greater than 79 feet in length), they are eligible for coverage under this permit and are covered by

submission of the Notice of Intent for the larger vessels. Nothing in this permit shall be interpreted to apply to a vessel of the Armed Forces as defined in § 312(a)(14) of the Clean Water Act.

Vessel Discharges Eligible for Coverage Unless otherwise made ineligible under Part 1.2.3, the following discharge types are eligible for coverage under this permit:

1. Deck Runoff and Above Water Line Hull Cleaning
2. Bilgewater/Oily Water Separator Effluent
3. Ballast Water
4. Anti-fouling Leachate from Anti-Fouling Hull Coatings/Hull Coating Leachate,
5. Aqueous Film Forming Foam (AFFF)
6. Cathodic Protection
7. Chain Locker Effluent
8. Controllable Pitch Propeller and Thruster Hydraulic Fluid and other Oil Sea Interfaces including Lubrication discharges from Paddle Wheel Propulsion, Stern Tubes, Thruster Bearings, Stabilizers, Rudder Bearings, Azimuth Thrusters, and Propulsion Pod Lubrication
9. Graywater
10. Motor Gasoline and Compensating Discharge
11. Non-Oily Machinery Wastewater
12. Refrigeration and Air Condensate Discharge
13. Seawater Cooling Overboard Discharge (Including Non-Contact Engine Cooling Water; Hydraulic System Cooling Water, Refrigeration Cooling Water)
14. Boat Engine Wet Exhaust
15. Underwater Ship Husbandry

#### 4.0 REFERENCE A

Reference A: OSHA Standards (29 CFR) for Waterfront Construction and Working Near Water

##### 4.01 1926.605 Marine Operations and Equipment

Operations fitting the definition of "material handling" shall be performed in conformance with applicable requirements of Part 1918, "Safety and Health Regulations for Longshoring" of this chapter. The term "longshoring operations" means the loading, unloading, moving, or handling of construction materials, equipment and supplies, etc. into, in, on, or out of any vessel from a fixed structure or shore-to-vessel, vessel-to-shore or fixed structure or vessel-to-vessel.

##### 4.02 1926.605(b) Access to Barges

Ramps for access of vehicles to or between barges shall be of adequate strength, provided with side boards, well maintained, and properly secured.

Unless employees can step safely to or from the wharf, float, barge, or river towboat, either a ramp, meeting the requirements of paragraph (b)(1) of this section, or a safe walkway, shall be provided.

Jacob's ladders shall be of the double rung or flat tread type. They shall be well maintained and properly secured.

A Jacob's ladder shall either hang without slack from its lashings or be pulled up entirely.

When the upper end of the means of access rests on or is flush with the top of the bulwark, substantial steps properly secured and equipped with at least one substantial hand rail approximately 33 inches in height, shall be provided between the top of the bulwark and the deck.

Obstructions shall not be laid on or across the gangway.

The means of access shall be adequately illuminated for its full length.

Unless the structure makes it impossible, the means of access shall be so located that the load will not pass over employees.

#### 4.0.3 1926.605(c) Working Surfaces of Barges

Employees shall not be permitted to walk along the sides of covered lighters or barges with coamings more than 5 feet high, unless there is a 3-foot clear walkway, or a grab rail, or a taut handline is provided.

Decks and other working surfaces shall be maintained in a safe condition.

Employees shall not be permitted to pass fore and aft, over, or around deck loads, unless there is a safe passage.

Employees shall not be permitted to walk over deck loads from rail to coaming unless there is a safe passage. If it is necessary to stand at the outboard or inboard edge of the deck load where less than 24 inches of bulwark, rail, coaming, or other protection exists, all employees shall be provided with a suitable means of protection against falling from the deckload.

#### 4.0.4 1926.605(d) First-Aid and Lifesaving Equipment

Provisions for rendering first aid and medical assistance shall be in accordance with Subpart D of this part.

The employer shall ensure that there is in the vicinity of each barge in use at least one U.S. Coast Guard-approved 30-inch lifering with not less than 90 feet of line attached, and at least one portable or permanent ladder which will reach the top of the apron to the surface of the water. If the above equipment is not available at the pier, the employer shall furnish it during the time that he is working the barge.

Employees walking or working on the unguarded decks of barges shall be protected with U.S. Coast Guard-approved work vests or buoyant vests.

#### 4.0.5 1926.605(e) Commercial Diving Operations

Commercial diving operations shall be subject to Subpart T of Part 1910, 1910.401-1910.441, of this chapter.

#### 4.0.6 1926.106 Working Over or Near Water

Employees working over or near water, where the danger of drowning exists, shall be provided with U.S. Coast Guard-approved life jacket or buoyant work vests.

Prior to and after each use, the buoyant work vests or life preservers shall be inspected for defects which would alter their strength or buoyancy. Defective units shall not be used.

Ring buoys with at least 90 feet of line shall be provided and readily available for emergency rescue operations. Distance between ring buoys shall not exceed 200 feet.

For all work which will be performed over or near water as defined in 29 CFR 1926.106(d) the Contractor shall have a skiff in the water at all times as required by regulation. The skiff must meet US Coast Guard requirements and be manned by a person holding a Masters license for the craft and be trained in water rescue.

## B4. U.S. COAST GUARD REQUIREMENTS

### 1.0 GENERAL

#### 1.0.1 Scope

Requirements set forth herein are in addition to and shall be considered as complementary to the balance of the Contract requirements.

For all operations to be performed in, on, or over the Lower New York Bay, East River, Harlem River, Broad Channel, Rockaway Inlet, or other adjacent waterways, as applicable to the Contract, the Contractor shall comply with all applicable government requirements and regulations pertaining to the Work. The securing of permits necessary for the performance of this Work shall be routed through the Engineer.

#### Notification and Request for Approval Requirements

At no time during the Work will the following activities be permitted without prior notification and specific approval of the USCG Sector New York Waterways Management Division for location and duration:

- Closing the waterways.
- Removing or restricting existing navigation lights and/or markings.
- Reducing or altering vertical or horizontal clearances.

All requests shall be routed through the Engineer a minimum of 30 days before the action will be required. If, in the case of waterway closures, the scheduled Work cannot be completed within the approved closure period, notify the U.S. Coast Guard (USCG) immediately upon learning of the delay. With the approval of the USCG, the work shall continue on a 24-hour basis until the waterway is restored to normal operation. The USCG and the Engineer shall be immediately notified when normal operation is restored.

#### 1.0.1.1 Port of New York / New Jersey Security Provisions

##### Security Zone / Exclusionary Area

- A twenty-five (25) yard (23 m) Security Zone / Exclusionary Area, has been established by the U.S. Coast Guard around all bridge piers in the New York / New Jersey area.

##### Advance Written Approval Requirements

- No construction workers, work barges or vessels of any type may enter these Security Zones without advance written approval from the U.S. Coast Guard Captain of the Port, NY District, through the Waterways Management Division, and the Vessel Traffic Service Activities New York (VTS).
- All requests made by the Contractor through the Engineer to enter into these Security Zones must be made in writing, not less than 30 days prior to the commencement of any work, to USCG Sector New York Waterways Management Division, in accordance with the forms attached to this specification, with a copy to the Engineer. Contractor shall comply with all Security Zone requirements of the U.S. Coast Guard, even if different than those set forth here, at no additional cost to the Department.

##### Initial Submittal and Information Requirements

- Submit a complete list of all construction personnel or persons that will enter into the Security Zones, including name, Social Security Number, Date of Birth, Contractor's Business Name, Business Address, Point of Contact / Responsible Person in- Charge of Work Activities

(Construction Superintendent) and Telephone Numbers (Main Office, Field Office Numbers and Cell Phones).

- Submit Project and Work Description and include descriptions of work activities and work site in the Security Zone, together with work location(s), dates, times and Project Duration, Barge/Vessel/Boat Name(s) / Type(s) & Size(s).
- Submit a Bridge Branch Construction Approval Letter.
- Submit above items to the U.S. Coast Guard Waterways Oversight Branch (USCG/WOB), and call (718) 354-4193 or 4355 to make the required arrangements, not less than 30 days in advance of any work, with a copy to the Engineer.

#### Changes Subsequent to Approval by the USCG/WOB

- If any changes are made to the information provided and approved including, but not limited to, additional personnel hired or any other changes in the existing personnel roster, a revised written submission is required.
- Submit all information for approval, including all revisions to the required information, as identified above, to the U.S. Coast Guard Waterways Oversight Branch not less than ninety-six (96) hours / four (4) days in advance of the expected change, with a copy to the Engineer.

#### Daily Notification Requirements

- After the initial written approval for entry into the Security Zone has been received from the U.S. Coast Guard, (USCG) the Contractor is to first notify the U.S. Coast Guard / Vessel Traffic Service at (718) 354-4088 on a daily basis, while working within the Zone; and upon contacting the USCG, immediately report to the Engineer the context and outcome of all communications with the USCG.
- Daily notification shall include, but not limited to, the following times when entering or leaving the Security Zone during any part of a day:
  1. Prior to entering the Work Site at the start of each workday.
  2. Prior to leaving the Work Site at any time during the workday.
  3. Prior to returning to the Work Site at any time during the workday.

Upon securing the work site at the end of the workday.

- The Contractor shall notify the Engineer 24 hours in advance of any change in the location of the Contractor's operations within a Security Zone.

## 2.0 REFERENCES

Part 26, Title 33, Code of Federal Regulations (33 CFR26) Vessel Bridge-to-Bridge, Radio Telegraphic Regulations.

Navigation Rules International – Inland, U.S. Government Printing Office Stock # 050-012-00376-9.

## 3.0 EXECUTION

### 3.0.1 Protection of Marine Traffic and Waterways

Conduct the Work in conformity with the orders of the Commander (OBR), First U.S. Coast Guard District. Battery Park Building, New York, NY 10004-5073 and/or the District Construction Manager, U.S. Army Corps of Construction Managers in charge of the locality so as not to obstruct or endanger navigation.

### 3.0.2 Plan Reviews

Four copies of the Contractor's plans, schedule and sequences of operations, and method of preventing any material from being discharged or falling from the construction area, approved by the Engineer, shall be transmitted to the U.S. Coast Guard by the Engineer. The Engineer will submit plans, schedules, methods and sequences of operations to the First U.S. Coast Guard District, Bridge Branch Commander (OBR) First U.S. Coast Guard District, Battery Park Building, New York, N.Y. 10004-5073, (212) 514-4338, for U.S. Coast Guard approval 30 days prior to any proposed work over the waterway. In addition, a sketch of the work area shall be submitted showing:

- The waterway.
- The bridge.
- The location of any restriction that will be placed in the waterway such as barges, anchors and anchor lines.
- The location, height above mean high water and a detailed description of any scaffolding or netting to be used.

The schedule should also include the daily hours of operation and indicate whether waterborne equipment will remain in the waterway at night. Daytime and twenty-four (24) hour emergency telephone numbers with personnel responsible for this work shall be forwarded to the USCG via the Engineer before commencement of Waterway-related construction. This information shall be updated immediately if any changes occur.

### 3.0.3 Modification to USCG Approved Plan

One copy of the plan and schedule of operation, and letter of approval by the U.S. Coast Guard, shall be retained by the Engineer. No deviation from the approved plan and schedule of operation may be made unless the modification has previously been submitted to and approved by the U.S. Coast Guard and the Engineer.

### 3.0.4 Hot Work

Positive means shall be taken to prevent sparks, molten metal and/or any hot work, debris, discharge of waste materials or construction material from entering the waterway or onto passing vessels. This includes sandblasting material, paint, wastewater, and any concrete or steelwork by-products. A safety section in the overall plan must be included that will achieve this purpose by utilizing fire resistive devices made of plywood and canvas suitably connected.

Where welding or burning is to take place, suitable flame-proof material shall be the uppermost protective containment material to arrest the fall of sparks or molten materials. All welding, burning, and slag removal shall cease upon approach of a vessel and not start again until the vessel has passed.

The Contractor's Supervisor shall be equipped with a complete communication system before commencement of any hot work, in accordance with information provided throughout this Section.

Hot work shall not commence unless communication has been established with the U.S. Coast Guard. An observer or observers shall be stationed so as to have unimpeded views of both upstream and downstream accesses to the waterway area thereby assuring that all workers can be alerted of a vessel's approach by appropriate means, such as an air horn.

### 3.0.5 Work Platforms

For work requiring outboard floats and/or for work on or under marine structures in the navigable waterway, deck, a fireproof canvas dodger shall be installed to prevent the fall of objects and debris into the water.

During night work, all around white lights or red lights to indicate safe passage around structures in the navigable waterway shall be mounted to indicate to mariners the locations of the work. All

structures lighting and day marks shall be submitted through the Engineer to the USCG for approval prior to commencement of work.

During daylight, warning signs for a 3-mile (4.8 km) range shall mark the locations of the work platforms. The signs shall face upstream and downstream so as to draw mariner's attention to the fact that critical work, affecting moving traffic, is occurring. A canvas dodger or netting shall be attached to the scaffold guardrail to prevent objects that bounce on the deck from ricocheting off the deck and into the waterway.

If permanent bridge or fender navigational lighting cannot be maintained operable or will be blocked, identical, temporary battery or electrically-operated lights shall be installed at the same locations. These temporary lights shall be visible for a distance of 2,000 yards (1.829 kilometers) on 90% of the nights of the year. Generally, a lamp of 100 candles will meet these requirements. The temporary lights shall be in place until the repairs have been completed or permanent navigational lighting has been reinstalled and determined to be operating satisfactorily. Locate and detail temporary lighting. If temporary lights are not installed in the same locations as the permanent lights, specific information regarding proposed locations compared to the permanent positions shall be provided to the Engineer for submission to and approval by the USCG.

### 3.0.6 Obstructions in Navigable Channel

During the progress of Work, should any materials, machinery, or equipment be lost, dumped, thrown overboard, or sunk, so as to obstruct, interfere with, or create a hazard to navigation, immediate notice shall be given to the U.S. Coast Guard and the object removed immediately. Until removal can be effected, the obstruction shall be properly marked in order to protect navigation.

Notice to the U.S. Coast Guard shall include a description and location of any such object and the action taken, or being taken, to protect navigation, and of action to remove the obstruction. Notice shall be given to the Captain of the Port— New York and New Jersey, at (718) 354-4119/4120 and U.S. Coast Guard Bridge Administration at (212) 668-7021/7165.

If, in the opinion of the Engineer, all obstructions in the channel resulting from the operations (through negligence, accident or otherwise) have not been removed, an inspection of the waterway bottom must be performed and remaining obstructions shall be removed, at no extra cost to the NYDDC.

After the completion of the work on or under the deck, the Contractor shall certify in writing to the Engineer that all equipment is accounted for and that all unused construction materials have been legally disposed.

### 3.0.7 Spills

Spillage of oil and/or hazardous substances is specifically prohibited by Section 311 of the Clean Water Pollution Control Act of 1971, as amended.

During the work, preventative measures to be taken include:

- Proper maintenance of construction equipment.
- Arrangement of fuel/hazardous substances handling areas so as to ensure that any spills are contained before reaching navigable waterways or their adjoining shoreline. In addition, the Engineer must be notified immediately.
- Instructions to personnel to legally dispose of oil and/or hazardous substances and not into drains, navigable waterways, or onto adjoining shorelines.

The USCG Captain of the Port and the Engineer shall be notified immediately at Commander, U.S. Coast Guard Activities New York, 212 U.S. Coast Guard Drive, Staten Island, NY 10305, (800-424-8802) or (718) 354-4119/4120 in the event of any spill.

A supply of an absorbent material shall be maintained at the work area(s) so that it may be rapidly deployed to soak up any possible spillage, pending U.S. Coast Guard arrival on the scene. The use of chemical dispersing agents and emulsifiers is not permitted without prior, specific USCG approval.

### 3.0.8 Floating Work Platforms

Floating work platforms equipment shall not interfere with operations in any federally maintained navigable channel. Floating equipment shall have a radiotelephone capable of operation from its main control in accordance with Part 26 Title 33, Code of Federal Regulations and shall be monitored during all periods the floating equipment is in operation.

Placement of construction equipment in the navigable channel shall be done so as not to reduce minimum horizontal clearance. Floating work equipment (barges, etc) must be moved out of the navigable channel during darkness, or after work hours. Work equipment remaining in the channel (if approved by USCG) during periods of darkness or reduced visibility must be lighted in accordance with Navigation Rules International – Inland.

Work barges remaining in the channel (if approved by the USCG) shall meet the following requirements:

- Must be lighted in accordance with Navigation Rules International-Inland.
- Shall be manned 24 hours a day 7 days per week.
- Shall have sanitary facilities and USCG approved safety equipment.
- Shall have a USCG approved motorized emergency tender boat with safety equipment.

The USCG must be notified, via the Engineer, at least three weeks in advance of the placement of equipment in the channel.

### 3.0.9 Dumping

Should any person throw construction materials into the waterway, they will be subject to prosecution under Federal and State laws.

### 3.0.10 Fleet Week

During "Fleet Week", no reduction in vertical or horizontal clearances will be authorized; this includes work platforms, travelers, barges, tarps, etc.

### 3.0.11 Communication System

The Contractor's Supervisor and all other applicable personnel involved shall be provided and equipped with a two-way communication system consisting of VHF-FM marine radio(s) capable of monitoring channels 13 and 16 during hours of operation, for the duration of the Work.

The Supervisor shall contact U.S. Coast Guard ActNy-VTS via marine radio, establish and maintain radio communications at all times, which shall include obtaining approval before commencement of any hot work, or any other work which may be considered hazardous to (or interfere with) marine traffic.

In the event of a radio failure, the Contractor shall provide a cellular phone(s) as a backup communication system, which shall be kept readily on hand, at all times, for use by the Contractor's Supervisor and all other applicable personnel involved. The cellular phone(s) shall be capable of contacting the U.S. Coast Guard ActNy- VTS at (718) 354-4088.

The Contractor shall deliver to the Engineer a complete remote base station type VHF-FM marine radio system capable of monitoring, receiving, transmitting and amplifying all communications between and with the Contractor and/or the U.S. Coast Guard, as well as, other marine transmissions in the area, unless hand held units and related systems are deemed to be sufficient by the Engineer.

Test all communication systems at least 30 days prior to the need. Weekly test and regularly maintain all communication system equipment.

Provide sufficient spare equipment and parts to prevent any disruption in communications.

Provide additional communication system equipment as necessary to amplify the signal, as well as assist in maintaining clear and audible communications at all times.

Commander  
 United States Coast Guard  
 Sector New York

212 Coast Guard Drive  
 Staten Island, NY 10305  
 Staff Symbol: (wmm)  
 Phone: (718) 354-4195  
 Fax: (718) 354-4190

**Coast Guard Sector New York Request for Marine Activity Approval**

**Instructions:** Type or print clearly and email to [Jeff.M.Yunker@uscg.mil](mailto:Jeff.M.Yunker@uscg.mil) or fax to (718) 354-4190. **USCG notification, review and approval will generally take a MINIMUM of 5 business days. Authorization to proceed will not be given until five (5) days after Coast Guard approval is granted. This timeline also applies to any revisions to an approved project. Applicants must plan accordingly. Authorization is granted under the Ports and Waterways Safety Act (33 USC 1225(a)(2)(C). Violations of required safety measures may subject you to civil penalty proceedings in accordance with 33 CFR 1.07.**

**Approval is required for all Activities:** 1. Within any charted or Federal Channel, 2. Outside of the Pierhead Line on the East and Hudson Rivers, Upper New York Bay, and The Narrows, 3. Within the highlighted waters of the western Long Island Sound approach to NY Harbor (see attachment). Requests for Notice to Mariners outside of these work areas must be faxed to 617.223.8073 or emailed to [LNM@uscg.mil](mailto:LNM@uscg.mil) by Tuesday for Thursday publication.

Pre-approval not required for: Diving Operations (outside of channel) or Side-scan, towed sonar, or other surveys, conducted as per the Inland Navigation Rules, within the VTS AOR. Just check in with VTS 15 minutes before beginning and upon completion each day at 718.354.4088. Surveys outside the VTS AOR do not need Coast Guard approval.

**BRIDGE PROJECTS, INSPECTIONS, SURVEYS, ETC MUST BE APPROVED BY THE CG BRIDGE PROGRAM, CONTACT 212.668.7021 FOR GUIDANCE.**

**UNMANNED VESSELS WILL NOT BE AUTHORIZED OVERNIGHT IN FEDERAL CHANNELS.**

**Failure to properly notify the Coast Guard WILL result in project delay.**

B5. GREENHOUSE GAS EMISSIONS

The Contractor is encouraged to take steps to reduce the greenhouse gas emissions resulting from this Contract. To this end, the Contractor is strongly encouraged to take the following steps:

1. Use B20 biodiesel (ASTM D7467) in all non-road and marine equipment.
2. Maximize the use of recycled steel and aluminum in the permanent materials.

The Contractor is required to monitor the Contractor's performance on these steps and provide reports with supporting documentation showing the actual performance achieved.

B6. EMPLOYMENT OPPORTUNITIES

1. The Contractor's attention is drawn to the following contract requirements for providing employment opportunities:
  - a. HireNYC. Requirements are in the Standard Construction Contract found in Volume 2.
  - b. Section 3. Requirements are in the HUD-Pages found in Volume 3.
2. Additionally, the following requirements apply:
  - a. Apprentices: The Contractor must request the maximum allowable ratio of apprentices.
  - b. Sandy Recovery Hiring Plan: The Contractor is required to develop and implement a Sandy Recovery Hiring Plan for low-income and very low-income persons, Sandy-impacted residents, minorities, and women in accordance with the provisions set forth below.
  - c. The following requirements are part of this Contract and will be passed on to all applicable Subcontractors:
    - i. Contractor and Subcontractors are encouraged to employ 20 percent Sandy-impacted residents.
    - ii. Contractor and all Subcontractors agree to register all non-trade job opportunities arising from the Work under this Contract with Sandy Recovery Workforce1, managed by the NYC Department of Small Business Services and comply with the provisions set forth below.
    - iii. This section does not limit Contractor's or its Subcontractors' ability to assess the qualifications of prospective workers, and to make final hiring and retention decisions. No provision of this section shall be interpreted so as to require a Contractor or Subcontractor to employ a worker not qualified for the position in question, or to employ any particular worker.
3. Strategies and Methods
  - a. The Sandy Recovery Hiring Plan shall demonstrate the Contractor's capability and plan for ensuring compliance with the hiring requirements.
  - b. In an effort to provide pathways for hiring of persons impacted by Sandy, the Contractor is encouraged to work with local community-based organizations, pre-apprenticeship and apprenticeship programs, and voluntary groups engaged in rebuilding efforts.
  - c. The Contractor will work with Workforce1 and the City on specific outreach events including Resource Fairs and Hire on the Spot events, connecting Sandy-impacted residents with job opportunities.
  - d. The Sandy Recovery Hiring Plan should show plans to work with organizations to create a pathway and opportunities on these projects and a plan to show compliance with the hiring requirements.
4. Management and Compliance
  - a. The Contractor must develop a Sandy Recovery Hiring Plan for approval by the Engineer.
  - b. The Contractor must provide at least one part-time staff dedicated to tracking hiring daily at the job site and ensuring implementation of the requirements of the Plan. The Contractor must comply with monthly reporting requirements set forth by the City, which include, but are not limited to, data that the City is required to report under Local Law 140 of the City of New York and Section 3 of the Housing and Urban Development Act of 1968, as well as data collection related to Executive Order 11246.

5. Specific Requirements
    - a. Job Posting Requirements: The Contractor and all subcontractors agree to inform Sandy Recovery Workforce1, managed by NYC Department of Small Business Services, of all job opportunities arising from this Contract. The Contractor must inform Sandy Recovery Workforce1 of any hiring need, and the requirements of the jobs to be filled, no less than three weeks prior to the intended first day of employment for each new position, unless otherwise approved by the City. Sandy Recovery Workforce1 will work with Contractor to develop a recruitment plan which will outline clear instructions as to when, where, and how interviews will take place. Sandy Recovery Workforce1 will screen applicants based on employer requirements and refer applicants whom it believes are qualified to the Contractor for interviews. The Contractor must interview referred applicants whom it believes are qualified, and must provide feedback on all interviewed candidates within two business days and report new hires to Sandy Recovery Workforce1 once confirmed.
    - b. Sandy-impacted residents will be given first priority to register for opportunities with the rebuilding effort on-line and at Workforce1.
  6. Workforce Recordkeeping Requirements: The Contractor must comply with monthly reporting requirements set forth by the City, which include, but are not limited to, data that the City is required to report under Local Law 140 of the City of New York and Section 3 of the Housing and Urban Development Act of 1968, as well as data collection related to Executive Order 11246. The Contractor must provide the Engineer with a Monthly Report of such data by the fifteenth of every month for the prior month using the paper and/ or electronic reporting format provided by the Engineer and must complete all applicable fields. If reporting particular information is impossible for the Contractor, the Contractor may apply for an exemption. Any application for an exemption must be made before the expiration of thirty (30) days after the commencement date of this Agreement and shall be in the form specified by the Engineer. Exemption may be granted upon a showing that the operation of this Section will constitute a hardship, within the sole discretion of the Commissioner. The content of this Monthly Report may change at any time as the City's reporting needs change.
- Furthermore, the Contractor must complete weekly Certified Payroll reports using the WH-347 form, available from the U.S. Department of Labor, Wage and Hour Division, which may be submitted each month concurrent with the aforementioned Monthly Report.

B7. WORK RESTRICTIONS

The Contractor's attention is drawn to the following work restrictions:

1. NYC Ferry: Public access to the Corlear's Hook NYC Ferry Terminal must be maintained at all times.

The Contractor is notified of the following official activities that will affect roadway work within the project limits:

1. DOT Weekend Walks – LUNGS Spring Awakening
2. Macy's 4<sup>th</sup> of July Annual Fireworks Celebration
3. New York Road Runners (NYRR) - NYC Half Marathon

The Contractor will be required to accommodate these activities at no additional cost, per the requirements of Standard Highway Specifications Section 6.70.11.(I).

## B8. VALUE ENGINEERING CHANGE PROPOSAL (VECP)

A. Purpose and scope. The purpose of a Value Engineering Change Proposal (VECP) is to encourage the use of the Contractor's ingenuity and experience in arriving at alternative construction designs, methods, and procedures that result in a lower direct cost to accomplish a contract requirement. It is the intent of this provision to share with the Contractor any substantial direct cost savings which may be generated as a result of a VECP offered by the Contractor and approved by the Engineer. A VECP is a Contractor-initiated change request. If approved, the changes and payments will be authorized through the change order process. Before a VECP can be implemented, it must pass through three approval processes: conceptual approval, formal approval, and change order approval. To expedite the review process, the Contractor has the option of jointly submitting the conceptual VECP and the formal VECP for simultaneous review. If the VECP receives formal approval, as part of the change order process the Contractor may request that the Engineer consider granting advanced authorization of extra work.

The VECP should produce direct cost savings to the City and the public without, in the sole judgment of the Engineer, impairing essential functions and characteristics of the facility including but not limited to service life, economy of operation, ease of maintenance, desired appearance, and safety. The Contractor, when developing a VECP, shall address the designer's objectives, environmental permit requirements and regulations, commitments made to the public to mitigate the impact of construction, and other such concerns.

The "direct cost savings" is the difference of the "construction savings" generated by implementing the VECP minus reasonable "design costs" associated with the VECP. The "construction savings" is the difference between what it would cost to complete all the contract work without implementing the VECP and the cost to complete all the contract work if the VECP is implemented. This includes any changes to quantities or unit prices across the entire contract if affected by the VECP. If the estimated cost to complete all the contract work without implementing the VECP differs from the contract bid amount for the work, supporting documentation to explain the variance shall be provided. Reimbursable "design costs" are specific to engineering changes (examples: design changes, plan sheet revisions, and quantity estimating). Expenditures toward proposal preparation (examples: scheduling, documentation, cost analysis, material research, etc.) are not reimbursable.

Indirect cost savings (time, user delay, railroad force account costs, inspection costs, etc.), although considered when reviewing the merits of the VECP, are not reimbursed. A VECP may alter the progress schedule and milestone dates, which in turn could affect time-related contract provisions.

Proposals that reduce the time to complete the contract, and only result in indirect cost savings, may be accepted based on the mutual benefit derived. These proposals will be evaluated in accordance with sub-provision F. Time Savings, below.

B. Submittal of Conceptual VECP. A conceptual proposal is required for all VECP. It should outline the general technical concepts associated with the VECP and the estimated direct cost savings which may result. Upon review by the Engineer, one of the following actions will be taken:

- Conceptual approval and a request for the Contractor to submit a formal VECP.
- Request for additional information.
- Rejection of the VECP.

The Contractor shall submit an original and three copies of the conceptual VECP to the Engineer along with any additional information requested by the Engineer. The conceptual VECP should contain sufficient information for concept review and evaluation, including the following as a minimum:

1. Conceptual VECP Summary. A summary of the VECP identified as "Conceptual VECP" which includes:

- a. Short title (description) of the VECP (10 or less words).
  - b. Contract information (Contract ID number, contract description, contractor).
  - c. Original total contract bid price.
  - d. Estimated contract cost. This may be different from the original total contract bid price due to addition or alteration of work (i.e., the estimated cost to complete the work if the VECP is not implemented). The Engineer must concur with the estimated contract cost.
  - e. Estimated contract cost if the VECP is implemented (excludes VECP design cost and any VECP construction savings reimbursement).
  - f. Estimated VECP construction savings (Item d. minus Item e.).
  - g. Estimated VECP design cost (Not all VECP will have design cost).
  - h. Estimated direct cost savings due to the VECP (Item f. minus Item g.).
  - i. Fifty percent of the estimated direct cost savings (This should equal the overall savings to the City).
  - j. Estimated total adjusted contract cost if VECP is implemented (includes VECP savings and design cost reimbursements).
  - k. The type of VECP (either "Cost Savings" or "Time Savings Only").
  - l. Date by which the authorization of extra work (change order) must be granted.
  - m. Identification of any new or existing contract pay items requiring agreed prices.
  - n. Identification of any materials with long lead times (to order, fabricate, deliver, etc.) that may require purchase authorization from the Engineer prior to formal approval/disapproval of the VECP, or may delay the implementation of the VECP. Identify any date by which authorization to order these materials must be received without affecting the progress schedule.
  - o. A basic description of the VECP and associated benefits and impacts (progress schedule, environmental, maintenance & protection of traffic, quality, etc.).
2. Conceptual Plans. Conceptual plan drawings.
  3. Design Criteria. If the VECP proposes design changes, supporting technical design criteria shall be provided.
  4. Schedules.
    - a. The most recently approved baseline progress schedule.
    - b. The most recently approved construction progress schedule update.
    - c. A draft, proposed, revised progress schedule illustrating the impacts of the VECP. The schedule shall identify: (1) the time required to develop a formal VECP; (2) the time required to order, fabricate, and deliver materials with long lead times; (3) the time required to obtain any environmental permits or other required approvals; (4) any anticipated progress schedule changes (contract completion date, milestone dates, task durations, etc.); (5) the latest date by which authorization of the VECP extra work must be granted without affecting the schedule.

The draft progress schedule should provide a sufficient level of detail upon which the reasonableness of the VECP can be determined.

Should the Engineer find that insufficient time is available for review and processing, it may reject the VECP solely on such basis. If the Engineer fails to respond to the VECP by the date specified, the Contractor will consider the VECP rejected and will have no basis for a dispute against the City as a result thereof. The Engineer may accept a VECP that requires a contract time extension if sufficient cost savings are anticipated.

5. Estimate of costs. The conceptual VECP estimate of costs should include sufficient information to determine the reasonableness of the VECP. If the proposal requires the ordering of materials, the Contractor needs to provide documentation from the suppliers to justify the cost of the materials.
6. Previous Use or Testing. A description of any previous use or testing of the VECP on another City contract or elsewhere, the conditions and results therewith. The Contractor shall submit the technical aspects of the VECP in sufficient detail so the Engineer can determine the suitability of the VECP from an engineering perspective. If the technology is new, test information shall be provided to the Engineer's satisfaction. If a similar VECP was previously submitted on another City contract, indicate the date, contract number, and the action taken by the City.

C. Submittal of Formal VECP. Upon notification by the Engineer that the conceptual VECP is approved and a formal VECP is necessary, the Contractor will submit to the Engineer an original and three copies of the following materials and information for each formal VECP along with any additional information requested by the Engineer:

1. Formal VECP Summary. A summary of the VECP, identified as "Formal VECP", which follows the conceptual VECP summary format and information requirements (Information and estimates may have changed since the conceptual VECP).
2. Complete Plans and Specifications. Complete plans and specifications, which meet City standards, showing the proposed changes relative to the original contract features and requirements. The City requires a Professional Engineer's stamp and signature on any significant engineering changes.
3. Field Change Sheets. Field change sheets and/or shop drawings. If the VECP results in a field change, and those items affected require the submission of shop drawings, the shop drawings will not be accepted unless accompanied by corresponding field change sheets.
  1. Documents shall be developed in compliance with City requirements. The City requires a Professional Engineer's stamp and signature on any significant engineering changes.
4. Schedules. The same information requirements as for the conceptual VECP apply, except that a formal, proposed, revised progress schedule is required.
5. Cost Analysis. A complete cost analysis indicating quantity changes, unit price changes, and new contract pay items. As a minimum it shall include:
  - a. An itemized comparison of estimated costs to complete all the contract work with implementing the VECP and without implementing the VECP.
  - b. Proposed unit prices for any new contract pay items introduced by the VECP and appropriate documentation for review under the Agreed Price process.
  - c. Proposed unit prices for any existing contract pay items for which agreed prices are sought due to a significant change in character of work (quantity or complexity). Appropriate documentation for review under the Agreed Price process is required.
  - d. The cost of any items with long lead times (e.g., materials ordered) required after conceptual approval and before final approval shall be identified.

7. Differences. Full descriptions of the difference between the existing contract requirements and the proposed changes, and the comparative advantages and disadvantages of each, including considerations of service life, economy of operation, ease of maintenance, traffic flow, safety, desired appearance, progress schedule, and any increase/reduction of environmental impacts.
8. Technical Presentation. The Contractor may be required to conduct a technical presentation as part of the review process.
9. Cost Documentation. All formal VECP costs submitted shall be supported by documentation as required by Article 26 of the Standard Construction Contract.

The Engineer will not formally approve any VECP until all required VECP documentation has been submitted and is acceptable to the Engineer.

A formal VECP may be submitted concurrently with the conceptual VECP, however, the Contractor assumes any costs associated with the formal VECP at its own risk. Reimbursable costs will be considered only if the conceptual VECP is approved. Clearly identify whether a VECP is being submitted for conceptual approval, formal approval, or both.

Once a formal VECP has been approved, the VECP will then be submitted as a change order and processed accordingly. The Contractor is responsible for submitting all appropriate information to the Engineer in a timely manner.

D. Conditions. The Contractor shall not base any bid prices on the anticipated approval of a VECP and should recognize that any VECP may be rejected. The following terms and conditions apply to VECP:

1. A VECP will only be considered after the contract is awarded.
2. A VECP applies only to the contract for which it was submitted. One VECP shall not be submitted for multiple contracts. Approval or disapproval of a VECP on one contract does not guarantee approval or disapproval on another contract.
3. The VECP becomes the property of the City and will contain no restrictions imposed by the Contractor on its use or disclosure. The City will have the right to use, duplicate, and disclose in whole or in part any data necessary for the utilization of the VECP. The City retains the right to utilize any accepted or rejected VECP or part thereof on any other project without any obligation to the Contractor.
4. Approval of the conceptual VECP in no way obligates the Engineer to approve the formal VECP. The Contractor will have no claim against the City as a result of the rejection of any such conceptual or formal VECP except as otherwise provided in Sub-Provision E.4, below.
5. When the Engineer is in the process of making design and specification revisions and a Contractor submits a VECP with similar revisions, the Engineer will reject the VECP and proceed without any obligation to the Contractor.
6. A VECP will be considered only if reasonable, cost-effective options are not provided in the contract documents.
7. The Engineer will be the sole judge as to whether a VECP qualifies for consideration and evaluation. It may reject any VECP that requires excessive time or costs for design review, evaluation, and/or investigations. The Engineer will be the sole judge in determining if the proposed VECP will result in a sufficient amount of direct or indirect cost savings to offset the City's effort to review the VECP.

8. A VECP shall be consistent with DDC's design policies and basic design criteria, provide the same service life or more, facilitate economy of operations, ease of maintenance, and achieve the desired appearance and safety.
  9. A VECP will not be allowed that changes the type and/or thickness of the pavement structure and material, or solely substitutes one material for another. Examples of materials that may fall into this inappropriate substitution situation are drainage pipes, coatings, pavement markings, etc. The simple elimination of work does not necessarily constitute a VECP, however, a VECP which introduces a simple material substitution, or elimination of work, may be considered if it is accompanied by a design change or change in the construction method. A simple material substitution which introduces a new material to the DDC may be also considered.
  10. The VECP will not be experimental in nature, but will have been proven to the Engineer's satisfaction under similar or acceptable conditions on another City contract or at another location acceptable to the Engineer.
  11. If the Engineer requires any additional information to evaluate the VECP, this information shall be provided in a timely manner. Unless otherwise mutually agreed upon, failure to do so will result in the rejection of the VECP. An incomplete or a poor quality VECP which hinders the Engineer's review may also result in the rejection of the VECP.
  12. The Contractor shall encourage submissions of VECP from an approved subcontractor, provided that reimbursement is made by the City to the Contractor and that the terms of payment to the Subcontractor are satisfactorily negotiated and accepted before the VECP is submitted to the Engineer. Subcontractors may not submit a VECP except through the Contractor.
  13. A VECP approved by the Engineer is considered to be a revision to the contract documents and progress schedule. Consequently, if unsatisfactory results are being achieved or adjustments are necessary during implementation of a VECP, the rejection of work, removal of work, addition of work, or revision of work shall be evaluated in accordance with the Contract requirements.
  14. All contract pay items and quantities referenced in the VECP construction savings analysis shall be Engineer-approved contract provisions. Any extra work, inclusion of an omission of work, or other field changes shall be authorized prior to use in VECP savings calculations.
  15. No work related to a VECP will be performed under allowance items. Agreed prices must be reached for any contract pay items related to the VECP before the VECP is approved. If the Contractor is deemed to have taken reasonable diligence in determining the work involved but if during the construction of VECP work a significant change in the character of work occurs, the Engineer may consider new agreed prices.
  16. The Contractor will receive written notification from the Engineer when the VECP is approved. Material orders placed prior to VECP approval shall be submitted at the Contractor's risk.
  17. Once a VECP has been approved, the VECP will then be submitted as a change order and processed accordingly. The Contractor is responsible for submitting all appropriate information to the Engineer in a timely manner.
- E. Payment. If the VECP is accepted by the Engineer, the changes and payments will be authorized through a change order. Reimbursement to the Contractor will be made as follows:
1. A VECP introduces two individual payments, one for VECP construction savings, and one for VECP design cost. The contract pay item changes along with the VECP construction savings and design cost reimbursements to the Contractor should be submitted in one change order.

2. The City will pay to the Contractor 50% of the VECP construction savings. The VECP construction savings is the difference between the actual contract costs with the VECP implemented and a detailed estimate of what it would have cost to complete the contract work without implementing the VECP, based on final construction. If final construction savings differs from the amount estimated in the formal VECP, an adjustment may be made and included in another change order. The VECP construction savings reimbursement to the Contractor will not be paid until the VECP work has been completed (progress payments on the completed VECP work are allowed). The Engineer may withhold all or a portion of the payment for the Contractor's share of the VECP construction savings until the final contract accounting. In the event that at final contract accountings the implementation of VECP actually results in no construction savings, then the Contractor will receive no VECP construction savings payment.

The Engineer is the sole judge in deciding the construction savings due to the implementation of the VECP. The Engineer will withhold VECP construction savings reimbursement until the Contractor supplies all required VECP documents.

3. If a design cost is submitted for a VECP, the City will pay to the Contractor a 50% share of the Contractor's reasonable cost for design incurred after conceptual VECP approval. If the design cost submitted for the Engineer's approval is deemed unreasonable, only 50% of the design cost deemed to be reasonable will be reimbursed. Not every VECP will have a design cost associated with it. The Engineer is the sole judge in determining the reasonableness of the design cost. Reimbursable design costs are for engineering changes. Preparation and submission of the proposal (e.g., savings analysis, progress scheduling, etc.) are not considered design costs and are not reimbursable. Reimbursable VECP design may be performed by a consultant or directly by the Contractor. The Contractor shall not be charged for, nor can the Contractor claim, any VECP design performed by the City.

The design cost shall be submitted as a lump sum item with supporting documentation. The supporting documentation shall include itemized direct salary costs (rates & hours), overhead (only for consultant design), and direct non-salary costs. Payment for direct salary costs and overhead will be limited to the current City reimbursement policies for Consultant Engineering agreements.

For consultant design, reasonable overhead on the direct technical salaries will be reimbursed. For Contractor design, overhead is not reimbursable for direct salary costs.

Overhead shall not be charged for direct non-salary costs whether incurred by the Contractor or by a consultant. Payment for direct non-salary costs will be made at actual cost paid. Although for certain direct non-salary costs (lodging, meals, mileage) the rates must meet the requirements of Comptroller's Directive 6.

The subtotal of direct salary costs, overhead, and direct non-salary costs shall be considered a "professional service fee" and reimbursed in accordance with §109-05B.3. Service Charges. A maximum 5% for the Contractor's contract supervision and overhead is allowed, in addition to any overhead submitted for consultant direct salary costs. All design costs are subject to audit.

Additional supporting documentation (receipts, time sheets, etc.) shall be supplied in a timely manner if requested by the Engineer.

In the case of a formal VECP being jointly submitted with the conceptual VECP, the City will pay to the Contractor a 50% share of the Contractor's reasonable cost for design specific to the development of the formal VECP (nothing toward the conceptual VECP) if the conceptual VECP is approved.

4. In the event of the Engineer's conceptual approval of a direct cost savings VECP, and the Contractor is directed to proceed with the VECP implementation steps and final approval is not reached, regardless of whether due to the actions of the City or the Contractor, 50% of the total reasonable design costs will still be reimbursed to the Contractor. If "advance" written approval was given to proceed with the work, procure materials, and begin fabrication; and rejection occurs, the work and fabrication costs will be reimbursed in accordance with the Standard Construction Contract. Only those materials not incorporated and unique to the contract (i.e., not restockable) will be evaluated for payment.
5. There will be no reimbursement for any costs incurred for the conceptual VECP or prior preparations.
6. If more than one VECP is approved for a contract, construction savings and design costs shall be tracked separately for each VECP.
7. When multiple submittals of information for a VECP are required to satisfy the information needs of the conceptual or formal VECP procedure, and contract timing will be negatively impacted before review and subsequent approval can be given by the Engineer, then the VECP may be rejected. In such cases, there will be no claim by the Contractor for design costs or loss of anticipated savings and/or profits.
8. VECP payments only involve direct savings or costs. Indirect savings or costs (time, user delay, contract delay, etc.) are not included in VECP payment calculations. The calculations of VECP payments are independent from the payments or penalties for contract time related issues.

If a VECP revises the progress schedule, the contract milestones upon which time related provisions are based may be affected. Time savings resulting from a VECP may be realized in a time related contract provision. Conversely, if a VECP negatively affects a progress schedule, time related contract provisions may be negatively affected.

F. Time Savings. The Engineer will consider proposals that result in time savings and at the same time may increase the cost of the contract. The Engineer will be the sole judge as to whether the benefits of completing the contract or a phase before the scheduled completion date or milestone offsets any increase in cost. These submittals, while not constituting a Value Engineering Change Proposal, will be reviewed using the VECP approval process. In addition to information required in Sub-Provision B, "Submittal of Conceptual VECP" above and Sub-Provision C, "Submittal of Formal VECP" above, the Contractor shall provide the Engineer the anticipated amount of time to be saved and sufficient information to enable the Engineer to calculate and evaluate the cost benefit of the savings in user delay. Time savings generated by the VECP may be claimed under an existing time related contract provision. If the time savings VECP increases the cost of the contract, the additional cost shall not be subtracted from any time related contract provision payments.

G. Significant Changes. Once a VECP is approved, any future significant change is no longer based on the original contract bid conditions (quantity, nature or kind of a material involved), but rather on the conditions as adjusted by the VECP (adjusted quantities, anticipated site conditions and materials, etc.).

All significant changes shall be agreed upon prior to formal VECP approval. If after formal VECP approval, an unforeseen change in the VECP work causes a significant change in the character of work, quantities and prices may be adjusted and the VECP savings shall be adjusted accordingly.

B9. Reference Documents

The following reference documents are attached to the Contract:

- (1) East Side Coastal Resiliency: Mitigation Work Plan for MGP-Related NAPL Contamination, prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (2) East Side Coastal Resiliency: Remedial Action Plan (and associated CHASP), prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (3) East Side Coastal Resiliency: Supplemental Subsurface Investigation Report - Borough of Manhattan, New York, prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (4) East Side Coastal Resiliency: Environmental Subsurface Investigation Report for Parallel Conveyance & Isolation Gates - Borough of Manhattan, New York, AKRF-KSE JV.
- (5) East Side Coastal Resiliency: Mitigation Work Plan for MGP-Related NAPL Contamination, prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (6) East Side Coastal Resiliency: Supplemental Subsurface Investigation Report - Borough of Manhattan, New York, prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (7) East Side Coastal Resiliency Project Area One: Subsurface Exploration Report - Borough of Manhattan, New York, prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (8) East Side Coastal Resiliency Project Area Two: Subsurface Exploration Report - Borough of Manhattan, New York, prepared by AKRF under the Hazen and Sawyer / AKRF JV.
- (9) Remedial Investigation Report, Operable Unit 2 (OU2) – Former East 21<sup>st</sup> Street Works – Site # V00536, New York, New York, AECOM.
- (10) Remedial Investigation Report, Stuyvesant Town Former Manufactured Gas Plant Sites, VCA Index D2—0003-02-08, AECOM.
- (11) Remedial Investigation Report for Operable Unit 2 – East 11th Street Works Site – NYSDEC Site No. V00534, New York, New York, ARCADIS.
- (12) Storm Water Pollution Prevention Plan (SWPPP).
- (13) Documents listed as Appendix A on Contract Drawing G018.
- (14) As-Builts: “PLANS FOR IMPROVING PORTIONS OF THE FRANKLIN D ROOSEVELT AND PORTIONS OF THE HARLEM RIVER DRIVE”
- (15) ASBESTOS AND LEAD PAINT SURVEY REPORT FOR EAST SIDE COASTAL RESILIENCY

The referenced documents are available from the NYCDDC BDO website.

B10. Envision

The DDC is committed to the principles of sustainable development and will submit this project for evaluation as per the Institute for Sustainable Infrastructure's ENVISION Sustainable Infrastructure Framework. As such, the Contractor is required to provide support and assistance to DDC in the required documentation for applicable contractor related activities for the ENVISION verification process. DDC will be responsible for the Envision submittal process, including any fees or required Sustainability professionals.

The ENVISION: Sustainable Infrastructure Framework Guidance Manual is available at: <https://sustainableinfrastructure.org>.

B11. Payment for Maintenance and Protection of Traffic

This contract has Maintenance and Protection of Traffic (MPT) payments on a Lump Sum basis, paid under Item 6.70. MPT includes all elements necessary to establish a work zone, provide traffic control and manage the flow and safety of traveling public to provide accessibility and safety for construction personnel and equipment, and to ensure safety and convenience of abutting residents and surrounding properties. Item 6.70 includes providing MPT to all users regardless of mode of transportation (including without limitation pedestrians, cyclists, and motorists), and throughout the entire project area (including without limitation park areas, highways, sidewalks, and streets). All MPT work must conform to the standards indicated on the contract plans, specifications and as directed by the Engineer.

The Contractor is reminded of the requirements of Section 6.70.13 of the Standard Highway Specifications, and that all required MPT components are included in the Lump Sum price unless they are paid separately. This explicitly includes flaggers, crossing guards, and uniformed flagpersons in the Lump Sum price, all of which are subject to the Davis-Bacon Wage rates found in the HUD-Pages.

B12. Special Inspection and Department of Buildings.

Portions of work under this contract are subject to the provisions of the New York City Construction Codes, as noted on the Contract Drawings.

Work subject to the provisions of the New York City Construction Codes shall meet the requirements of the New York City Construction Codes and the following:

1. Inspection of selected materials, equipment, installation, fabrication, erection or placement of components and connections made during the progress of the Work to ensure compliance with the Contract Documents and provisions of the New York City Construction Codes, shall be made by a Special Inspector. The City of New York will retain the services of the Special Inspector and bear the costs for the performance of Special Inspections in compliance with NYC Construction Codes requirements or as additionally may be called for in the project specifications. The Special Inspector shall be an entity compliant with the requirements of the New York City Construction Codes.
2. The contractor shall be responsible for, and bear all costs associated with the filing and securing of approvals, if any, as required in the specifications. □□

This work may include but is not limited to:

- a. Engaging the services of a New York City licensed Concrete Testing Lab for the review and approval of concrete design mix, testing, signatures and professional seals, etc., compliant with NYC Department of Buildings requirements, for each concrete design mix.
- b. Engaging a professional engineer or registered architect to act as the applicant, and prepare or supervise the preparation of all construction documents and specifications submitted under the required applications.

Where a Form TR3 is required, concrete mix design approval by the QA & Construction Safety Bureau per Section 3.05.4 of the NYCDOT Standard Highway Specifications is not required.

3. The Contractor shall notify the relevant Special Inspector in writing at least 72 hours before the commencement of any work requiring Special Inspection. The contractor shall be responsible for, and bear related costs to assure that all construction or work shall remain accessible and exposed for inspection purposes until the required inspection is completed.
4. Inspections and tests performed under "Special Inspection" shall not relieve the Contractor of the responsibility to comply with the Contract Documents, and that there is no warranty given to the Contractor by the City of New York in connection with such inspection and tests or certifications made under "Special Inspections".
5. The contractor must coordinate with the Engineer to provide access and schedule the work for inspection by the Special Inspector.

B13. Coordination with Other Contractors

The East Side Costal Resiliency Project is being executed by multiple simultaneous construction contracts, including this contract. Accordingly, the Contractor is required to coordinate with the Other Contractors as specified in Article 12 of the Standard Construction Contract.

B14. Revisions: Specifications and Contract Drawings

The Specifications and the Contract Drawings for the Project are revised in accordance with the provisions set forth below.

- (1) Owner: Wherever the term "Owner" is used in the Specifications and/or the Contract Drawings, such term shall mean the City of New York.
- (2) Other Entities: In the event any entity other than the City of New York is referred to or named as the "Owner" in the Specifications and/or the Contract Drawings, the name of such other entity is deemed deleted and replaced with the "City of New York".
- (3) Architect: Wherever the words "Department's Authorized Representative", "Construction Manager", "Landscape Architect", "Project Manager", "Architect", "Architect / Engineer", "Architect and/or Engineer", or similar are used in the Specifications and/or the Contract Drawings, such words are deemed deleted and replaced with the word "Engineer".
- (4) Products / Manufacturers: Wherever the Specifications and/or the Contract Drawings require the contractor to provide a particular product (i.e., material and/or equipment) from a designated manufacturer and/or vendor, the term "or approved equal" is deemed inserted, even if only one product and/or manufacturer is specified, except as otherwise provided below.
- (5) Special Experience Requirements: Special Experience Requirements for the Project, if any, are set forth in the Bid Booklet. Special Experience Requirements may apply to contractors, subcontractors, installers, manufacturers and/or suppliers. If the Specifications and/or the Contract Drawings contain any Special Experience Requirement that is not set forth in the Bid Booklet, such Special Experience Requirement is deemed deleted, except as otherwise provided below.
  - (a) Any Special Experience Requirement that provides that the entity performing the work or supplying the material must have more than three (3) years of experience, is revised to provide that the entity performing the work or supplying the material must have three (3) years of experience, except as described in paragraph (b) below.
  - (b) Any Special Experience Requirement that pertains to the abatement of hazardous materials shall not be subject to the deletion and/or revision set forth above. Such Special Experience Requirement shall remain in full force and effect.
  - (c) Any Special Experience Requirement that provides that the entity performing the work must be licensed, authorized, certified, approved by or acceptable to the manufacturer, is deemed deleted and replaced with the requirement that such entity must be properly trained for the specified work.
  - (d) Any Special Experience Requirement that provides that the individual workers performing the work must be licensed, authorized, certified, approved by or acceptable to the manufacturer, is deemed deleted and replaced with the requirement that such individual workers must be properly trained for the specified work.
- (6) Contractor Retained Engineer: If the Specifications and/or the Contract Drawings require the Contractor to retain an Engineer to provide engineering services for the Project, the following sentence is deemed inserted: "Such Engineer must be a Professional Engineer, licensed in the State of New York."
- (7) Sustainability Provisions: If the Specifications and/or the Contract Drawings require the Contractor to purchase FSC certified wood, rapidly renewable materials, materials within 500 miles, metal materials, products, anchors, framing and accessories with recycled content, such provisions are deemed deleted and replaced with the requirement that if the contractor has

purchased FSC certified wood, rapidly renewable materials, materials within 500 miles, metal materials, products, anchors, framing and accessories with recycled content, the contractor shall submit such forms or documentation as may be required by the City in order for the USGBC to certify that the Project qualifies for the related LEED credit(s).

- (8) Exculpatory Provisions: In the event the Specifications and/or the Contract Drawings contain any provision whereby the consultant and/or any of its officers, employees or agents, including subconsultants, is absolved of responsibility for any act or omission, such provision is deemed deleted.
- (9) Insurance: Provisions regarding insurance coverage the Contractor is required to provide are set forth in Article 22 of the City of New York Standard Construction Contract and Schedule A, which is included in the Addendum to the General Conditions. In the event the Specifications and/or the Contract Drawings contain any provision regarding insurance requirements, such provision is deemed deleted.
- (10) Indemnification: Provisions regarding indemnification are set forth in Articles 7, 12, 22 and 57 of the City of New York Standard Construction Contract. In the event the Specifications and/or the Contract Drawings contain any provision regarding indemnification, such provision is deemed deleted.
- (11) Dispute Resolution: Provisions regarding dispute resolution are set forth in Article 27 of the City of New York Standard Construction Contract. In the event the Specifications and/or the Contract Drawings contain any provision regarding dispute resolution, such provision is deemed deleted.
- (12) Standard Construction Contract: In the event of any conflict or inconsistency between (1) the Specifications and/or the Contract Drawings and (2) the City of New York Standard Construction Contract, the City of New York Standard Construction Contract shall prevail.
- (13) Prices to Cover: All contract unit prices will include the costs of all labor, material, equipment, insurance, supervision, and insurance, whether or not specifically mentioned in the specifications.
- (14) Work to be Managed solely by the NYC Department of Design and Construction (NYCDDC): In the event a provision stipulates that approval or direction will be provided by a City Agency other than the NYCDDC, that provision will be interpreted that the approval or direction will be provided by the Engineer, in consultation with the referenced Agency. This stipulation does not apply to approvals or direction that are required by Rules, Codes or other regulations; e.g. the NYC Department of Buildings will continue to enforce the NYC Building Codes and approve building permit applications.
- (15) Guarantee Periods: If a Guarantee period is specified that exceeds the guarantee period listed in Schedule A, the guarantee period in Schedule A governs.
- (16) Compliance with laws and regulations: all references to compliance with laws and regulations are deemed to include compliance with all local, state, and federal regulations.
- (17) References:
  - (a) References to the General Conditions in the specifications will refer to the NYCDOT Standard Highway Specifications, Division 1 (Section 1.06), the NYCDEP Standard Sewer and Water Specifications Division 1 (Sections 10.01 through 12.07), and the Standard Construction Contract, as supplemented by the specifications in this Volume 3.
  - (b) References to the Materials and Methods of Construction will refer to the appropriate requirements of the NYCDOT Standard Highway Specifications, Division 2 (Sections 2.01 through 20.40) and the NYCDEP Standard Sewer and Water Specifications Division 2 (Sections 20.01 through 26.02) as supplemented by the specifications in this Volume 3.

B15. U.S. Army Corps of Engineers Requirements

The City has applied for a U.S. Army Corps of Engineers (USACE) Permit. The following USACE special conditions must be followed:

- (A) This authorization is conditional on the applicant's receipt of the required Section 401 Water Quality Certification or waiver from the New York State Department of Environmental Quality (NYSDEC). No work may be accomplished until the required approval from NYSDEC has been obtained. Once obtained, the permittee, and their agents, shall be responsible for complying with any special conditions and/or stipulations incorporated into the appropriate Section 401 Water Quality Certification, and all amendments thereto.
- (B) This authorization is conditional on the applicant's receipt of the required coastal zone management concurrence or waiver from the New York State Department of State (NYSDOS). No work may be accomplished until the required approval from NYSDOS has been obtained. Once obtained, the permittee, and their agents, shall be responsible for complying with any special conditions and/or stipulations incorporated into the appropriate Section 307(c) of the Coastal Management Act of 1972 Authorization from the NYSDOS, and all amendments thereto.
- (C) The permittee, and their agents, shall avoid installing cofferdams within winter flounder early life stage Essential Fish Habitat between January 15 and May 31 of any year to minimize impacts to winter flounder eggs and larvae.
- (D) The permittee, and their agents, shall ensure when pile driving activities occur during a time of year when ESA-listed species may be present, a vibratory hammer shall be used to the extent practicable. If an impact hammer is used, 20-minute "soft starts" shall be performed, and a wooden block shall be used to buffer the noise and vibrations during hammering.
- (E) The permittee, and their agents, shall ensure cofferdams, turbidity curtains, or other methods to control turbidity are utilized when operationally feasible and ESA-listed species may be present.
- (F) The permittee, and their agents, shall ensure the Section 106 Programmatic Agreement dated December 5, 2019, is adhered to.
- (G) The permittee shall provide this office with a copy of all documents and correspondence required to carry out the Section 106 Programmatic Agreement dated December 5, 2019, also including the Phase 1B Archeological Report, once completed.
- (H) The permittee, and their agents, shall ensure any vessels used in conjunction with this project comply with the Port of New York anchorage ground regulations codified at 33 CFR 110.155, including paragraph (1)(11) regarding vessels that impede or obstruct vessel movements.
- (I) The Permittee, and their agents shall, a minimum of 14-days prior to starting operations, submit the following information to the First Coast Guard District for publication in the Local Notice to Mariners by email at LNM@uscg.mil, or faxed to (617) 223-8291):

Date of submission; Name, phone number, and email address of project point of contact; Company Name; Type of Work; Waterway and location where work will be done; Latitude & Longitude of work area (Degrees, Minutes, Thousandths of seconds); Work Start & Stop dates and Hours of Operation; Equipment on scene; Passing Arrangements / Time to move vessels to not impede

navigation; VHF Radio Channel monitored; Disposal Site (if used); NOAA Chart Number for the area.

- (J) The Permittee, and their agents, shall check in with Coast Guard Sector New York Vessel Traffic Service (VTSNY) on VHF CH 12 or at (718) 354-4195 each day, fifteen minutes before starting, and upon completion, of diving operations.
- (K) The permittee, and their agents, shall email Jeffrey.M.Yunker@uscg.mil each request to moor two or more barges abreast or moor any single barge perpendicular to the federal channel at any time during the project for review with VTSNY. Construction barges may be required to move with advance notice depending on the location and combined beam of the moored vessels.
- (L) The permittee, and their agents, shall email Jeffrey.M.Yunker@uscg.mil the as-built coordinates for the center of each of the ten relocated sewer outfalls.
- (M) The permittee, and their agents, shall notify the National Oceanic and Atmospheric Administration of the project completion and specifications so they may initiate the appropriate chart and Coast Pilot corrections. This notification must be submitted online at <https://nauticalcharts.noaa.gov/charts/docs/charts-updates/Permit-Public-Notice.pdf> and include a copy of the USACE permit.
- (N) The permittee, and their agents, shall ensure any current, or future, outdoor lighting is located or shielded so that it is not confused with any aids to navigation and does not interfere with navigation on the adjacent waterway. If installed, the lights must be white and non-flashing.
- (O) The permittee shall ensure all soil and sediment management during in-water construction adheres to a Mitigation Work Plan (MWP) approved by the New York State Department of Environmental Conservation (NYSDEC), and/or shall complete any sediment testing requirements, as required by the NYSDEC, prior to the start of any in-water work within the project area. A copy of any changes to the MWP, and any reports resulting from additional soil testing, shall be provided to the U.S. Army Corps of Engineers, Regulatory Branch.
- (P) The permittee, and their agents, shall conduct all in-water work within the confines of a turbidity curtain and oil booms to contain soil and suspended sediments. Additionally, the permittee shall use other Best Management Practices to ensure turbidity is minimized in the water.
- (Q) The permittee understands and agrees that, if future operations by the United States require the removal, relocation, or other alteration, of the structure or work herein authorized, or if, in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the permittee will be required, upon due notice from the Corps of Engineers, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration.
- (R) The permittee shall utilize best management practices to minimize turbidity during all in-water work activities as well as prevent construction materials, including debris, from entering any waterway to become drift or pollution hazards.

B16. Omitted Work

Article 29.5 of the Standard Construction Contract is amended as follows:

29.5 The **Contractor** agrees to make no claim for damages or for loss of overhead and profit with regard to any omitted **Work**, except as follows:

For **Qualifying Omitted Work**, defined below, the **Contractor** may make a claim for documented, project specific overhead expenses actually incurred on **Qualifying Omitted Work**. Such overhead does not include delay damages of any kind, home office overhead, general overhead, or profit, or any other expense other than those described in paragraph 29.4, above. The **Engineer** will review the **Contractor's** submissions and determine the amounts payable to the **Contractor**, if any. Disputes arising hereunder are exclusively within the jurisdiction of Article 27.

For the purposes of this Article 29.5 **qualifying Omitted Work** is defined as follows:

- An omission exceeding 2% of the total contract bid price. The omission may be a single bid item or a collection of multiple bid items of related **Work** (related directly to the **Qualifying Omitted Work**) as determined by the **Commissioner**;
- Underruns of unit price items not related to **Work** expressly omitted by the **Commissioner** in accordance with Article 29 will not be considered **Qualifying Omitted Work**.

B17. Consequential Loss

- (a) ☐ Subject to sub-section (b), below, and the rights provided to the City under Article 7 (*Protection of Work and Persons and Property; Notices and Indemnification*), neither party will have the right to claim damages, including punitive and incidental damages, against the other party for breach of this Contract, in tort or on any other basis whatsoever, to the extent that any losses claimed by either Party are for loss of profits, loss of use, loss of production, loss of business, loss of business opportunity or any claim for consequential loss or for indirect loss of any nature but excluding any of the same that relate to payments or damages expressly provided for under this Contract.
- (b) ☐ The limitation in sub-section (a), above, will not apply to or limit the City's right to recover from the Contractor:
- (i) ☐ any losses to the extent that they are covered by the proceeds of insurance (or self-insurance) actually maintained by the Contractor or required to be maintained by the Contractor under Article 22 (*Insurance*);
  - (ii) ☐ losses arising out of fraud, criminal conduct, intentional misconduct, recklessness, bad faith or gross negligence on the part of the Contractor or any Subcontractor;
  - (iii) ☐ liquidated damages payable by the Contractor under this Contract;
  - (iv) ☐ amounts payable by the Contractor under any indemnity in this Contract in respect of third party claims; and
  - (v) ☐ losses arising out of any release or threatened release of hazardous materials (i) which was brought onto the Site by the Contractor or any Subcontractor, or (ii) which was negligently removed or handled by the Contractor or Subcontractors, regardless of the source origin or method of deposit of such hazardous materials.

B18. Information from Previous Advertisement.

This contract was previously advertised, but bids were not opened. The previous advertisement contained 18 addenda, and these Contract Documents include the addenda revisions in their final form, except as noted below.

- (a) Changes in this Advertisement: As a guide to the bidders, the following changes were made to the Contract Documents from the previously advertised documents:

## Volume 1:

1. Contract date on cover page
2. New Notice to Bidders 4
3. Updated PIN and ePIN numbers
4. Updated Attachment 1
5. Special Experience Requirements for the Bidder
6. Schedule B: M/WBE Goal revised
7. Bid Schedule: Remove items:
  - a. ESCR-7.13 PK1
  - b. ESCR-7.13 PK2
  - c. ESCR-7.13 PK3
  - d. ESCR-7.13 SI

## Volume 2:

1. Contract date on cover page

## Volume 3:

1. Contract date on cover page
2. Table of Contents: Update JB-Pages numbers
3. GENERAL-Pages: Remove Section ESCR-7.13 PK
4. S-Pages, Article B-7, Work Restrictions: Remove line 1 ("No area of East River Park can be closed before September 7, 2020")
5. S-Pages, Article B-15, U.S. Army Corps of Engineers Requirements: New attached permit
6. S-Pages, Article B-18, Information from Previous Advertisement: New Article
7. JB-Pages: Addition of ConEd document "CONST-029 Revision Number 4" starting on page JB-12.

Please note that the above list is just a guide, and the actual text of the Contract Documents governs.

- (b) Previously answered Pre-Bid Questions (PBQ): Additionally, the PBQ that were received and answered are attached to these S-Pages. PBQs that were solely related to the previous procurement (such as postponement requests) have been redacted to avoid confusion. Please note that many discrepancies identified by PBQ were corrected in subsequent addenda and these revisions are already reflected in the Contract Documents.

For clarity, the PBQ attached are part of the Contract Documents, and are not PBQ as part of this procurement.

Attached are 150 pages of PBQs and the supplemental attachments that were originally provided with the PBQs when they were issued.

**OCMC TRAFFIC STIPULATIONS**

**February 13, 2020**

**OCMC FILE NO:** MEC-19-181  
**CONTRACT NO:**  
**PROJECT:** EAST SIDE COASTAL RESILIENCY PROJECT (PROJECT AREA TWO (1))  
**LOCATION(S):** VARIOUS LOCATIONS

PERMISSION IS HEREBY GRANTED TO THE DEPARTMENT OF DESIGN AND CONSTRUCTION ITS DULY AUTHORIZED AGENT, TO ENTER UPON AND RESTRICT THE FLOW OF TRAFFIC AT THE ABOVE LOCATION(S) FOR THE PURPOSE OF CARRYING OUT THE ABOVE NOTED PROJECT, SUBJECT TO THE STIPULATIONS, AS NOTED BELOW:

**I. SPECIAL STIPULATIONS**

- A. **EMBARGOES** – A CONSTRUCTION EMBARGO WILL APPLY TO THOSE LOCATIONS BELOW WHICH FALL WITHIN THE **HOLIDAY EMBARGO** OR ANY OTHER SPECIAL EVENT EMBARGOES SUCH AS PUBLISHED BY THE BUREAU OF PERMIT MANAGEMENT AND CONSTRUCTION CONTROL.
- 1. **BIKE LANES** FOR ANY WORK IN OR AFFECTING A BIKE LANE , THE PERMITTEE MUST COMPLY WITH THE "**NEW GUIDELINES FOR THE MAINTENANCE & PROTECTION OF TRAFFIC PLAN FOR CYCLING**", AND ALSO POST A SIGN AT THE WORK ZONE STATING "**CONSTRUCTION IN BIKE LANE PROCEED WITH CAUTION**". WHICH ARE AVAILABLE AT:  
[HTTPS://WWW1.NYC.GOV/HTML/DOT/DOWNLOADS/PDF/BIKE-MPT-GUIDELINES.PDF](https://www1.nyc.gov/html/dot/downloads/pdf/bike-mpt-guidelines.pdf)
- B. **BIKE SHARE STATIONS:** THE PERMITTEE SHALL NOT REMOVE, RELOCATE, DAMAGE OR DISRUPT THE OPERATION OF EXISTING BIKE SHARE STATIONS WITHOUT FIRST CONTACTING NYC BIKE SHARE AT 855-245-3311 FOR THEIR REQUIREMENTS PRIOR TO COMMENCING WORK.
- C. **CITYBENCH:** THE PERMITTEE SHALL NOT REMOVE, RELOCATE, DAMAGE OR DISRUPT AN EXISTING CITYBENCH WITHOUT FIRST CONTACTING NYC DOT AT 212-839-6569, OR VIA EMAIL AT [CITYBENCH@DOT.NYC.GOV](mailto:CITYBENCH@DOT.NYC.GOV) PRIOR TO COMMENCING WORK.
- D. **PROTECTION OF NYC DEP GREEN INFRASTRUCTURE:** THE PERMITTEE SHALL TAKE PRECAUTION OF NYC DEP GREEN INFRASTRUCTURE IN THE RIGHT-OF-WAY. THE PERMITTEE MUST PROTECT NYC DEP GREEN INFRASTRUCTURE DOWNSTREAM OF THE WORK OR WITHIN FIVE (5) FEET OF THE WORK AREA. THE PERMITTEE MUST EMAIL NYC DEP AT [SUSTAINABILITY@DEP.NYC.GOV](mailto:SUSTAINABILITY@DEP.NYC.GOV) FOR PROTECTION REQUIREMENTS PRIOR TO COMMENCING WORK. THE PERMITTEE IS RESPONSIBLE FOR RESTORATION OF DAMAGED NYC DEP INFRASTRUCTURE AS DIRECTED BY NYC DEP.
- E. **BUS STOPS** – THE PERMITTEE SHALL PROVIDE WRITTEN NOTICE TO NYC DOT OCMC AND NEW YORK CITY TRANSIT (NYCT) A MINIMUM OF FIVE (5) WEEKS IN ADVANCE FOR LANE/STREET CLOSURES THAT AFFECT BUS ROUTES/BUS STOPS.
- F. **STREET LIGHTS / TRAFFIC SIGNALS:** THE PERMITTEE SHALL NOT REMOVE OR RELOCATE EXISTING STREET LIGHTS OR TRAFFIC SIGNALS WITHOUT FIRST OBTAINING APPROVAL FROM NYCDOT STREET LIGHTING / TRAFFIC SIGNALS UNIT.
- G. **TRAFFIC CAMERAS, DETECTION/COMMUNICATION EQUIPMENT:** IF AT ANY TIME DURING THE APPROVED WORK, THE PERMITTEE ENCOUNTERS TRAFFIC SURVEILLANCE CAMERAS, DETECTION EQUIPMENT OR ANY TYPE OF COMMUNICATION EQUIPMENT (WIRELESS OR HARD-WIRED) ON ANY NYC DOT FACILITY, THAT IS NOT INCLUDED ON THE DESIGN/BUILD DRAWINGS, THE PERMITTEE SHALL IMMEDIATELY NOTIFY NYC DOT TRAFFIC MANAGEMENT BY PHONE AT 718-433-3390 OR 718-433-3340 AND VIA EMAIL AT [TMC@DOT.NYC.GOV](mailto:TMC@DOT.NYC.GOV) AND AWAIT DIRECTION PRIOR TO CONTINUING WORK.
- H. **METERS** – THE PERMITTEE SHALL NOT REMOVE OR RELOCATE PARKING METERS WITHOUT FIRST OBTAINING APPROVAL FROM NYCDOT PARKING METER DIVISION AT 718-894-8651.
- I. **TEST PITS** – THE BELOW TRAFFIC STIPULATIONS DO NOT APPLY TO TEST PIT WORK RELATED TO THIS CONTRACT. WORK HOURS AND OTHER REQUIREMENTS FOR TEST PIT OPERATIONS MAY DIFFER FROM THE STIPULATIONS IDENTIFIED BELOW. THE PERMITTEE SHALL BE REQUIRED TO OBTAIN SEPARATE PERMITS RELATED TO TEST PITS.
- J. **TEMPORARY PARKING REGULATIONS/PAVEMENT MARKINGS** – THE PERMITTEE IS REQUIRED TO INSTALL, MAINTAIN AND REMOVE ALL NECESSARY TEMPORARY PARKING AND REGULATORY SIGNS AND PAVEMENT MARKINGS, AND RESTORE THEIR ORIGINAL CONDITION PER NYC DOT STANDARDS, PRIOR TO EXPIRATION OF THEIR PERMITS. THE PERMITTEE OR AGENCY PERFORMING PUBLIC OUTREACH SHALL POST AND MAINTAIN ADVISORY SIGNS A MINIMUM OF 48 HOURS PRIOR TO CHANGING EXISTING PARKING REGULATION SIGNS TO APPROVED TEMPORARY CONSTRUCTION PARKING REGULATION SIGNS. THE ADVISORY SIGNS SHOULD BE POSTED ON ALL POLES AND DRIVE RAILS ON THE SEGMENT AFFECTED, INDICATING THE DATE OF THE CHANGE, THE NEW REGULATIONS AND A TELEPHONE NUMBER TO OBTAIN MORE INFORMATION.
- K. **ACCESS TO ABUTTING PROPERTIES** – THE PERMITTEE SHALL COORDINATE ALL ACTIVITIES WITH ABUTTING PROPERTY OWNERS TO ENSURE ACCESS IS PROVIDED TO/FROM ENTRANCES/DRIVEWAYS AT ALL TIMES.
- L. **AUTHORIZED PARKING** – PRIOR TO PERFORMING WORK WHICH IMPACTS AUTHORIZED PARKING, THE PERMITTEE SHALL SUBMIT IN WRITING, AND COPY OCMC-STREETS, A REQUEST TO OCCUPY SPACE CURRENTLY USED BY AUTHORIZED VEHICLES. APPROVAL MUST BE RECEIVED FROM AUTHORIZED PARKING PRIOR TO OCCUPYING THESE AREAS.

- M. **NOTIFICATION** – THE PERMITEE MUST AT LEAST TWO (2) WORKING DAYS BEFORE THE START OF CONSTRUCTION NOTIFY THE NYC FIRE DEPARTMENT, NYC POLICE DEPARTMENT, NYCEMS, LOCAL COMMUNITY BOARD, BOROUGH PRESIDENT'S OFFICE-CHIEF ENGINEER, NYCDOT OCMC OFFICE, AND ALL ABUTTING PROPERTY OWNERS.
- N. **CONSTRUCTION INFORMATIONAL SIGNS** – THIS PROJECT REQUIRES A CONSTRUCTION PROJECT INFORMATIONAL SIGN (CPIS) IN ACCORDANCE WITH NYCDOT HIGHWAY RULE SECTION 2-02 (4) AND (5). CRITERIA AND A PROTOTYPE FOR THIS SIGN MAY BE FOUND ON THE NYCDOT WEBSITE AT:  
[HTTP://WWW.NYC.GOV/HTML/DOI/DOWNLOADS/PDF/DOI\\_CPIS\\_DIRECTIONS.PDF](http://www.nyc.gov/html/dot/downloads/pdf/dot_cpis_directions.pdf)
- O. **ENHANCED MITIGATIONS**
- **VARIABLE MESSAGE SIGNS (VMS)** SHALL BE PROVIDED FOR THIS PROJECT. **A TOTAL OF 8 VMS SHALL BE PLACED FOR THIS CONTRACT.** THE LOCATIONS AND MESSAGES SHALL BE RECOMMENDED BY NYCDOT AND THEIR CONTRACTOR A MINIMUM OF TWO (2) WEEKS PRIOR TO WORK COMMENCING, FOR OCMC REVIEW AND APPROVAL.
  - **"NO STANDING ANYTIME-TEMPORARY CONSTRUCTION" SIGNS** AND TEMPORARY PAVEMENT MARKINGS SHALL BE INSTALLED AND MAINTAINED AS WARRANTED BY THE MAINTENANCE AND PROTECTION OF TRAFFIC (MPT) REQUIRED TO FACILITATE TRAFFIC MOVEMENTS THROUGH THE WORK ZONE. ALL TEMPORARY SIGNS AND PAVEMENT MARKINGS SHALL BE REMOVED UPON COMPLETION OF THE PROJECT.
  - **COMMUNITY OUTREACH** SHALL BE PROVIDED FOR THE DURATION OF THE PROJECT.

## II. MAINTENANCE AND PROTECTION OF TRAFFIC

### A. WHEN WORKING ON MONTGOMERY STREET BETWEEN WATER STREET AND SOUTH STREET

1. Work hours shall be as follows: 9am-2pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain two (2) lanes for traffic, one (1) lane in each direction.**
3. **Must maintain minimum five (5) clear sidewalk at all time.**
4. **Must coordinate with Public School on the block before mobilizing.**

### B. WHEN WORKING ON MONTGOMERY STREET BETWEEN SOUTH STREET AND NORTH BOUND ENTRANCE RAMP

1. Work hours shall be as follows: 9am-2pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain two (2) lanes for traffic, one (1) lane in each direction..**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with Public School on the block before mobilizing.**

### C. WHEN WORKING ON SOUTH STREET BETWEEN MONTGOMERY STREET AND GOUVERNEUR SLIP

1. Work hours shall be as follows: 9AM-2M Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for traffic at all time.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with Public School on the block before mobilizing.**

### D. WHEN WORKING IN THE INTERSECTION ON SOUTH STREET AND MONTGOMERY STREET

1. Work hours shall be as follows: 9am-2pm Monday thru Friday and Saturday 8am-4pm.
2. **Maintain two (2) lanes for traffic, one (1) lane in each direction on both roadway.**
3. **Full width of roadway shall be opened to traffic when site is unattended.**

### E. WHEN WORKING ON FDR DRIVE SERVICE ROAD BETWEEN EAST 10<sup>TH</sup> STREET AND EAST 6<sup>TH</sup> STREET

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for traffic at all time**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA before mobilizing**

### F. WHEN WORKING ON EAST 10<sup>TH</sup> STREET BETWEEN AVENUE D AND ROUNDABOUT

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for 2-way thru traffic with flaggers at each end of the work zone.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA and NYCTA Buses before mobilizing.**

---

**G. WHEN WORKING ON EAST 10<sup>TH</sup> STREET BETWEEN ROUNDABOUT AND FDR DRIVE SERVICE ROAD**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for 2-way thru traffic with flaggers at each end of the work zone.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA and NYCTA Buses before mobilizing.**

---

**H. WHEN WORKING ON EAST 10<sup>TH</sup> STREET PEDESTRIAN BRIDGE WEST APPROACH**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Full sidewalk closure Full sidewalk closure (during working directing pedestrians to opposite sidewalk and after working hours full width of sidewalk shall be opened.**
3. **Full roadway closure only during bridge removal and when installing new pedestrian bridge.**
4. **Contractor is required to send written notice to Police, Fire, Community Board, affected NYC Transit or private bus companies and property owners on the segment of the street in which the permit applies a minimum of seven (7) days prior to full roadway closure. A copy of this notification must be presented to NYCDOT-OCMC office with necessary permit application.**

---

**I. WHEN WORKING ON WATER STREET BETWEEN GOUVERNEUR SLIP AND JACKSON STREET**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for traffic at all time.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA before mobilizing.**

---

**J. WHEN WORKING ON GOUVERNEUR SLIP EAST BETWEEN WATER STREET AND SOUTH STREET**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Full roadway closure for installation of water main relocation and sewer relocation**
3. **Full sidewalk closure (during working directing pedestrians to opposite sidewalk and after working hours full width of sidewalk shall be opened.**
4. **Contractor is required to send written notice to Police, Fire, Community Board, affected NYC Transit or private bus companies and property owners on the segment of the street in which the permit applies a minimum of seven (7) days prior to full roadway closure. A copy of this notification must be presented to NYCDOT-OCMC office with necessary permit application**
5. **Full width of the roadway and sidewalk shall be opened when site is unattended**

---

**K. WHEN WORKING ON JACKSON STREET BETWEEN WATER STREET AND SOUTH STREET**

1. Work hours shall be as follows: 9am-3pm Monday thru Friday and Saturday 8am-4pm
2. **Full roadway closure for water connection and diversion chamber construction**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Contractor is required to send written notice to Police, Fire, Community Board, affected NYC Transit or private bus companies and property owners on the segment of the street in which the permit applies a minimum of seven (7) days prior to full roadway closure. A copy of this notification must be presented to NYCDOT-OCMC office with necessary permit application**
5. **Must coordinate with Sacred Heart Convent before mobilizing.**

---

**L. WHEN WORKING ON DELANCEY STREET SOUTH BETWEEN LEWIS STREET AND BARUCH DRIVE**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for traffic at all time.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA before mobilizing.**

---

**M. WHEN WORKING ON DELANCEY STREET NORTH BETWEEN MARGIN STREET AND FDR DRIVE SERVICE ROAD**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for traffic at all time.**
3. **Full sidewalk closure for demolition of Delancey Street Pedestrian Bridge**
4. **Must coordinate with East River Housing Corporation before mobilizing.**

---

**N. WHEN WORKING ON DELANCEY STREET BETWEEN BARUCH DRIVE AND FDR DRIVE SERVICE ROAD**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane and one left turning lane at all time.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with East River Housing Corporation before mobilizing**

**O. WHEN WORKING ON DELANCEY STREET BETWEEN LEWIS STREET AND FDR DRIVE SERVICE ROAD**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane and one left turning lane at the intersection of Margin Street**
3. **Maintain one (1) eleven (11) lane at all time at all other locations.**
4. **Maintain minimum five (5) foot clear sidewalk at all time.**
5. **Must coordinate with East River Housing Corporation before mobilizing**

**P. WHEN WORKING ON AVENUE D/COLUMBIA STREET BETWEEN EAST HOUSTON STREET AND RIVINGTON STREET**

1. Work hours shall be as follows: 8am-6pm Saturday and Sunday 9am-6pm only.
2. **Maintain two (2) lanes for traffic, one (1) lane in each direction.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA and NYCTA Buses before mobilizing.**
5. **Full width of roadway and sidewalk shall be opened to traffic and pedestrians when site is unattended.**
6. **School location.**

**Q. WHEN WORKING ON EAST HOUSTON STREET BETWEEN AVENUE D/COLUMBIA STREET AND BARUCH DRIVE**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain two (2) lanes for traffic, no impact on the other side of East Houston Street at any time.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA and NYCTA Buses before mobilizing.**
5. **Full width of roadway and sidewalk shall be opened to traffic and pedestrians when site is unattended.**
6. **School location.**

**R. WHEN WORKING ON EAST 10<sup>TH</sup> STREET BETWEEN AVENUE D AND ROUNDABOUT**

1. Work hours shall be as follows: 9am-5pm Monday thru Friday and Saturday 8am-4pm
2. **Maintain one (1) eleven (11) lane for 2-way thru traffic with flaggers at each end of the work zone.**
3. **Maintain minimum five (5) foot clear sidewalk at all time.**
4. **Must coordinate with NYCHA and NYCTA Buses before mobilizing.**

**II. GENERAL NOTES**

- A. **THIS IS NOT A PERMIT.** THIS STIPULATION SHEET MUST BE SUBMITTED WITH ALL REQUESTS FOR PERMITS PERTAINING TO THE ABOVE CONTRACT AND PRESENT AT THE WORK SITE ALONG WITH ALL ACTIVE CONSTRUCTION PERMITS WHEN THE APPROVED WORK IS BEING PERFORMED.
- B. THE PERMITTEE MUST COMPLY WITH ALL CONSTRUCTION EMBARGOS ISSUED BY THE NYCDOT INCLUDING THE HOLIDAY EMBARGO.
- C. THE PERMITTEE SHALL COMPLY WITH ALL REQUIREMENTS OF THE NYCDOT SPECIAL EVENTS UNIT AS IDENTIFIED BELOW:

**1. STREET FAIRS / FESTIVALS**

- ALL EXCAVATIONS MUST BE PLATED WITH SKID RESISTANT PLATES.
- PLATES MUST BE RECESSED AND FLUSH WITH PAVEMENT.
- ALL PAVEMENT DEFECTS MUST BE CORRECTED WITHIN OR ADJACENT TO THE WORK ZONE.
- THE CONTRACTOR IS RESPONSIBLE FOR ANY DEFECTS WITHIN THE IMMEDIATE VICINITY IF NYCDOT STREET & ARTERIAL MAINTENANCE CANNOT MAKE REPAIRS DUE TO PROJECT INTERFERENCE (AS DETERMINED BY NYCDOT).
- ALL EQUIPMENT, TRAILERS AND MATERIAL STORAGE MUST BE REMOVED.

**2. RUNNING / WALKING / BIKING EVENTS**

- ALL EXCAVATIONS MUST BE BACKFILLED AND PAVED OR PLATES MUST BE RECESSED AND PAVED OVER FLUSH WITH PAVEMENT.
- ALL PAVEMENT DEFECTS MUST BE CORRECTED WITHIN OR ADJACENT TO THE WORK ZONE.
- THE CONTRACTOR IS RESPONSIBLE FOR ANY DEFECTS WITHIN THE IMMEDIATE VICINITY IF NYCDOT STREET & ARTERIAL MAINTENANCE CANNOT MAKE REPAIRS DUE TO PROJECT INTERFERENCE (AS DETERMINED BY NYCDOT).
- ALL EQUIPMENT, TRAILERS AND MATERIAL STORAGE MUST BE REMOVED.

**3. PARADES**

- ALL EXCAVATIONS MUST BE BACKFILLED AND PAVED OR PLATES MUST BE RECESSED AND PAVED OVER FLUSH WITH PAVEMENT.
- FORMATION AND DISPERSAL AREA PLATES MUST BE RECESSED AND FLUSH WITH PAVEMENT (PLATES MUST BE SKID RESISTANT).
- ALL PAVEMENT DEFECTS MUST BE CORRECTED WITHIN OR ADJACENT TO THE WORK ZONE.
- THE CONTRACTOR IS RESPONSIBLE FOR ANY DEFECTS WITHIN THE IMMEDIATE VICINITY IF NYCDOT STREET & ARTERIAL MAINTENANCE CANNOT MAKE REPAIRS DUE TO PROJECT INTERFERENCE (AS DETERMINED BY NYCDOT).
- ALL EQUIPMENT, TRAILERS AND MATERIAL STORAGE MUST BE REMOVED.

**4. MAYORAL EVENTS**

- ALL EXCAVATIONS MUST BE BACKFILLED AND PAVED OR PLATES MUST BE RECESSED AND PAVED OVER FLUSH WITH PAVEMENT.
- ALL PAVEMENT DEFECTS MUST BE CORRECTED WITHIN OR ADJACENT TO THE WORK ZONE.
- THE CONTRACTOR IS RESPONSIBLE FOR ANY DEFECTS WITHIN THE IMMEDIATE VICINITY IF NYCDOT STREET & ARTERIAL MAINTENANCE CANNOT MAKE REPAIRS DUE TO PROJECT INTERFERENCE (AS DETERMINED BY NYCDOT).
- ALL EQUIPMENT, TRAILERS AND MATERIAL STORAGE MUST BE REMOVED.

- D. ALL RELOCATION WORK BY THE UTILITIES SUCH AS; CON EDISON, TELEPHONE, GAS AND CABLE COMPANIES SHALL PRECEDE THE CONTRACTORS' START OF WORK ON ALL AFFECTED ROADWAYS IN THE IMPACTED CONTRACT AREA.
- E. THE CONTRACTOR IS ADVISED THAT OTHER CONTRACTORS MAY BE WORKING IN THE GENERAL AREA DURING THE TERM OF THIS STIPULATION. IN WHICH EVENT, THE CONTRACTOR MAY REQUIRE MODIFICATIONS BY THE OCMC-STREETS.
- F. THE PERMITTEE IS NOT AUTHORIZED TO ENTER, OCCUPY OR USE ANY PUBLICLY-OWNED OR PRIVATELY OWNED, NON-PAVED, LANDSCAPE OR NON-LANDSCAPED LOCATION WITHOUT SPECIFIC WRITTEN PERMISSION. WHEN THE LOCATION IS WITHIN THE RIGHT-OF-WAY OF A LIMITED-ACCESS ARTERIAL HIGHWAY, **WRITTEN** APPROVAL FROM THE NYCDOT OCMC-HIGHWAYS IS REQUIRED. WHEN THE LOCATION IS WITHIN THE RIGHT-OF-WAY OF A PUBLIC STREET OR PUBLIC PARK, **WRITTEN** APPROVAL FROM THE NEW YORK CITY DEPARTMENT OF TRANSPORTATION OR NEW YORK CITY DEPARTMENT OF PARKS AND RECREATION IS REQUIRED. WHEN THE LOCATION IS WITHIN THE RIGHT-OF-WAY OF ANY OTHER JURISDICTION SUCH AS PRIVATE PROPERTY, STATE, FEDERAL ETC., IT IS THE PERMITTEE'S RESPONSIBILITY TO DETERMINE THE PROPERTY OWNER AND OBTAIN THE WRITTEN APPROVAL.
- G. THE PERMITTEE SHALL ADHERE TO THE NYCDOT BUREAU OF BRIDGES' SPECIAL PROVISIONS FOR LANDSCAPE PROTECTION, MAINTENANCE AND RESTORATION, ITEMS 1.18.15 THROUGH 1.18.19, WHENEVER AND WHEREVER ANY OF THE PERMITTEE'S ACTIVITIES OCCUR WITHIN A LIMITED ACCESS ARTERIAL HIGHWAY RIGHT - OF - WAY.
- H. NO DEVIATION OR DEPARTURE FROM THESE STIPULATIONS WILL BE PERMITTED WITHOUT THE PRIOR WRITTEN APPROVAL FROM THE OCMC-STREETS. REQUEST FOR SUCH MODIFICATIONS SHALL BE SUBMITTED TO THE OFFICE OF THE OCMC-STREETS, NEW YORK CITY DEPARTMENT OF TRANSPORTATION, A MINIMUM OF TWENTY (20) DAYS IN ADVANCE FOR CONSIDERATION.
- I. FOR ANY CONSTRUCTION ACTIVITY RESULTING IN THE FULL CLOSURE OF A ROADWAY FOR MORE THAN 180 CONSECUTIVE CALENDAR DAYS, THE CONTRACTOR MUST PRODUCE AND SUBMIT A COMMUNITY REASSESSMENT, IMPACT AND AMELIORATION (CRIA) STATEMENT TO NYCDOT PLANNING AND OBTAIN THEIR APPROVAL BEFORE APPLYING FOR PERMITS, IN COMPLIANCE WITH THE PROVISIONS OF **LOCAL LAW 24 STREET CLOSURE LAW.**
- J. FOR THIS PROJECT THE CONTRACTOR SHALL FURNISH, INSTALL AND MAINTAIN ALL NECESSARY ADVANCE WARNING AND DETOUR SIGNS, TEMPORARY CONTROL DEVICES, BARRICADES, LIGHTS AND FLASHING ARROW BOARDS IN ACCORDANCE WITH THE "MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES," THE TYPICAL SCHEMES INCLUDED IN THIS SPECIFICATION; AND AS ORDERED BY THE ENGINEER-IN-CHARGE AND THE OCMC-STREETS.
- K. THE CONTRACTOR SHALL BE RESPONSIBLE FOR IDENTIFYING HIS CONSTRUCTION SIGNAGE. THE IDENTIFICATION SHALL INCLUDE THE CONTRACTOR'S NAME, SPONSORING AGENCY NAME AND THE CONTRACT NUMBER. THE IDENTIFICATION SHALL BE PLACED ON THE BACK OF THE SIGN. THE LETTERING SHALL BE THREE (3) INCHES HIGH.
- L. THE OCMC-STREETS RESERVES THE RIGHT TO VOID OR MODIFY THESE STIPULATIONS SHOULD CONSTRUCTION FAIL TO COMMENCE WITHIN TWO (2) YEARS OF THE SIGNED DATE OF THESE STIPULATIONS.

**NICOLAS DAGHER, P.E.**

HCP- Draft
April 21, 2020

Attn: Mihir Shah (718) 391-3154

Re: East Side Coastal Resiliency, SANDRESM1
From Montgomery Street to East 15th Street

WORK PERMIT

Stipulations are hereby given to the New York City Department of Design and Construction and its duly authorized representatives, to enter upon and restrict the flow of traffic according to the times and schedules as stipulated herein on the Franklin D. Roosevelt Drive (FDR Drive) in the vicinity of From Montgomery Street East 15 Street for the purpose of installation of East Side Coastal Resiliency, together with all work incidental thereto, subject to the following stipulations:

- 1. This permission shall be in effect as of xxxxxxxx
2. The Permittee may close lane(s) on the FDR Drive, northbound and/or southbound according with the following schedule:

- a) One lane closure:

For the purpose of median reconstruction, sign Structure installations, bridge Pier Demolitions, manhole Flood proofing gate foundation, Concrete floor wall, approach slabs, drainage, barrier Replacement and reconstruction retaining wall replacement and reconstruction, and sewer reconstruction and related work

10:00PM to 5:30AM, Monday night to Friday morning
12:01AM to 6:30AM, Saturday morning
1:00AM to 11:00AM, Sunday morning

- b) Two lanes closure:

1:00AM to 5:00AM, Tuesday morning to Friday morning
1:00AM to 7:00AM, Saturday morning
1:00AM to 7:00AM, Sunday morning

- c) Partial Ramp closure:

Maintain a ten (10) foot minimum width of travel lane; one ramp closure at a time

From Montgomery Street to East 15th Street for the purpose of installation of street roller gate foundation, Floodwall under FDR Drive Viaduct; reconstruction of sidewalk, parking lot reconstruction under FDR Drive Viaduct, and sewer Reconstruction, as follows:

11:00PM to 5:00AM, Monday night to Friday morning

NYC Department of Transportation
Bureau of Permit Management and Construction Control
55 Water Street, 7th Floor, New York, NY 10041
T: 212- 839-9645 F: 212-839-8970
www.nyc.gov/dot

1:00AM to 7:00AM, Saturday morning  
1:00AM to 7:00AM, Sunday morning

d) Full Ramp closure- three (3) times limit for each ramp:

FDR Drive Northbound Exit 3 On-Ramp, FDR Drive Northbound Exit 5 Off-Ramp, and FDR Drive Northbound Exit 5 On-Ramp (one ramp closure at a time), as follows:

1:00AM to 5:00AM, Tuesday morning to Friday morning  
1:00AM to 7:00AM, Saturday morning  
1:00AM to 7:00AM, Sunday morning

e) Full roadway closure- three (3) times limit for each direction:

Between Exits 2 and 7 in both directions for the purpose of Demolition and Installation of three pedestrian bridges (Corlear's Hook Bridge, Delancey Street Bridge, and East 10th Street Bridge) over the FDR Drive, as follows:

1:00AM to 5:00AM, Tuesday morning to Friday morning  
2:00AM to 7:00AM, Saturday morning  
2:00AM to 7:00AM, Sunday morning

3. The Permittee must submit the traffic mitigation analysis, mitigation measures (signal timing changes, Traffic enforcement agents (TEA), etc.), and Maintenance and Protection of Traffic (MPT) plans for proposed full roadway closure in order to grant OCMC final approval and associated roadway construction permits.

4. The Permittee must arrange to provide Traffic enforcement agents (TEA) at the designated intersections as per the Maintenance and Protection of Traffic (MPT) plans.

5. Significant lane closures of Arterial Highways where at any time fifty percent or more of the roadway lanes are closed, notification shall be given to the public via the placement of Variable Message Signs (VMS) seven (7) days prior to the actual closure.

6. The lane closures shall conform to the New York State Dept. of Transportation, Design Guide and Standard for Maintenance, and Protection of Traffic, the Manual of Uniform Traffic Devices (MUTCD), and OCMC approved plans.

7. The Permittee is required to submit a weekly schedule of work. This schedule is to be sent to [sedward@dot.nyc.gov](mailto:sedward@dot.nyc.gov) on the Wednesday preceding the next weeks work. The schedule will include the following information:

The name of the roadway/bridge on which lanes will be closed  
The number of lanes to be closed  
The direction in which the lanes will be closed  
The hours and days of the lane closing

8. All lane closures must be coordinated with the Engineering in Charge (EIC) for the other adjacent projects.

9. The Permittee shall notify in writing, the New York City Department of Transportation Office of Construction Mitigation and Coordination (NYCDOT-OCMC), three (3) weeks' notice prior to any proposed full lane closure.
10. All lane closures must be coordinated with the Engineering in Charge (EIC) for the other adjacent projects & OCMC.
11. The Permittee MUST obtain a permit from the Overweight/ over dimension Unit of the NYCDOT Bureau of Bridges for Overweight/ over dimension vehicles on the Parkway/Drive.
12. This permit must be present on site when the approved work is being performed.
13. This permit is not valid unless it is signed by both the New York City Department of Transportation representative and the authorized representative of the Permittee.
14. In the event of a strike against the NYC Transit, no lane or ramp closures will be permitted from 5:00 AM to 12:00AM (midnight).
15. Section 24 - 224, Administrative Code Variance, is hereby granted for hours and days stipulated above.
16. During the time a lane closure is permitted, the Permittee may intermittently stop traffic on the adjacent lane(s) of the same roadway for periods not to exceed five (5) minutes in duration for the purpose of transporting or securing equipment that may extend beyond the closed lane(s). A minimum of one (1) hour, or until the traffic queue is relieved, whichever period is shorter, is required between two such closures.
17. No staging and/or storage sites are authorized or will be permitted unless approved in writing (where owned by New York City) by the New York City Department of Transportation's Division of Roadway Repair and Maintenance (RRM) and/or the New York City Department of Parks and Recreation (if park land is involved) or (where State owned) by New York State Department of Transportation with New York City concurrence where applicable. Except for State owned sites where City concurrence is not necessary changes in the site or limits can only be made by an amendment to this permit as applicable. A detailed drawing must be submitted and will become an attachment to the amendment. A DPR Permit shall constitute written approval from the Parks Dept.
18. The Permittee agrees to assume all responsibility for injury or damages to private and/or City property caused through the operations of the permit and to save and hold harmless the City of New York and the New York City Department of Transportation from all claims and suits which may arise therefrom.
19. The Permittee shall notify in writing, the New York City Department of Transportation, OCMC three (3) weeks' notice prior to any proposed lane change, shift or ramp closures prior to commencing work operations. Four (4) weeks' notice is required when it is anticipated that temporary traffic signals and/or signal timing adjustments will be needed.
20. The Permittee shall be responsible to provide notification to the local Community Board and Borough President's Office prior to the commencement of work. Additionally notification shall be made to the local Councilman's office. Proof of notification must be filed with the OCMC prior to the commencement of work.

21. The Permittee shall notify the New York City Dept. of Transportation's Situation Room at (718-433-3340), the NYPD Traffic Management Center at (718 706-6756), the Chief of Emergency Medical Services at (718-999-2770) and the local fire house prior to his/her proposed traffic lane reductions or street closings for any purpose. The Permittee shall also immediately notify the Situation Room upon reopening and in the event of an emergency condition.
22. In the event, a full highway closure for period greater than fifteen (15) minutes is permitted, the Permittee must notify all those parties listed in the prior three stipulations at least two weeks in advance. Additionally the Permittee must prepare a press release for the TV, Radio and Newspaper Media at least one week prior to the closure.
23. The Permittee shall adhere to all pertinent rules and regulations of the New York City Department of Transportation relative to the use and occupancy of street space, the provisions of his agreement and the performance of his work.
24. The Permittee shall adhere to the NYCDOT Bureau of Bridges' Special Provisions for Landscape Protection, Maintenance and Restoration, items 1.18.15 through 1.18.19, whenever and wherever any of the Permittee's activities occur within a limited access arterial highway right - of - way. Copies of these provisions may be obtained from the New York City Department of Transportation's Director of Arterial Maintenance at 212 – 487-6837.
25. This Permit is limited to activity performed in conformance with this agreement with the New York City Department of Transportation and does not permit any other activities, which could be a hazard or distraction to the roadway user.
26. No deviation or departure from these stipulations will be permitted without the prior written approval of the New York City Department of Transportation. Requests for such modifications shall be submitted to the OCMC a minimum of ten (10) days in advance for consideration.
27. To ensure a traffic flow at all times storage of materials and equipment shall not be permitted within the traveled way of the highway. Storage areas shall be separated from the traveled way by a clear space of 30 feet minimum width, unless such storage is placed behind concrete barrier or permanently installed bridge railing.
28. Any excavations shall be adequately fenced and/or decked over by the Permittee to preclude entry by errant vehicles, pedestrians or animals.
29. The Permittee shall insure that construction materials and/or excavated soil and rocks temporarily stored on slopes are secured by straw bales or other effective means to prevent their movement into the travel way and clear zone (recovery zone) area.
30. When work is performed in or adjacent to sidewalk areas, a safe pedestrian walkway having a minimum width of five (5) feet shall be provided at all times by the Permittee.
31. Concurrent with construction work of this contract, if other projects on this and/or adjacent highways are under construction then the Permittee is to become familiar with the scheduling of those projects and schedule his activities accordingly. To facilitate the flow of traffic, the permissible work hours may be modified as deemed necessary by the New York City Department of Transportation.

32. In order to provide an adequate transition for the safe flow of traffic, when the Permittee's (or another Permittee's) work sites are in two (2) different lanes in the same direction, those work sites shall be separated by a distance of at least two (2) miles.
33. Warning signs and traffic safety devices shall be provided, installed, maintained and removed by the Permittee in accordance with the New York State Department of Transportation's "Manual of Uniform Traffic Control Devices". The Permittee shall provide the appropriate channelization for traffic approaching and leaving his/her worksite. The Permittee shall provide flag persons, cones, barricades, etc. as required for public safety. The Permittee is responsible for the adequacy of the safety devices. The Permittee shall coordinate his/her lane closures with the lane closures of any other Permittee working within 2 miles of his/her work area.
34. Operation of a crane, derrick, shovel or other similar equipment for any and all work within the streets shall be carried out by the Permittee in accordance with the Rules, Regulations and Requirements of the New York City Department of Transportation and the New York City Department of Buildings and shall comply with all provisions of the New York City Noise Control Code. In addition, if this equipment is to be placed so that any part of the load will be superimposed on the sidewalk or roadway, the Permittee must file, with the New York City Department of Transportation, Office of Construction Mitigation and Coordination, a statement by a Professional Engineer, licensed by the State of New York, certifying the following:
  - I. That the sidewalk or roadway area and the supporting subgrade can safely bear the crane load. Should the condition of the sidewalk or roadway area require that the crane load be distributed over a larger area than afforded by the elements of the crane, the engineer shall furnish the full dimensioned details of the load distribution.
  - II. That the Engineer has taken all necessary measures to ascertain that there is no vault or subway tunnel underneath the sidewalk area or that if a vault or subway tunnel does exist its roof is sufficiently strong to support the load to be superimposed thereof.
  - III. That the sheeting or retaining walls supporting any excavations adjoining the sidewalk or roadway area required to carry a load have been examined by the Engineer and have been found to be sufficiently strong to support the area carrying the crane load. Should the crane be employed making any excavation adjacent to the crane, the Engineer shall specify the sheeting or retaining wall reinforcement required to support the crane.
35. A Holiday Embargo is in effect for the Holidays (as determined by the New York City Office of Payroll Administration) with the following provisions:
  - I. When a Holiday falls or is observed by the City of New York on a Monday or Friday no lane or ramp closures are permitted from noon on the previous business day to 6:01 AM on the following business day. For example if the holiday falls or is observed on Friday then no lane closure would be permitted from 12:01 PM on Thursday to 6:01 AM on Monday. If the Holiday falls or is observed on Monday then no lane closure is permitted from 12:01 PM on Friday to 6:01 AM on Tuesday. In addition when a Holiday falls or is observed midweek (Tuesday, Wednesday or Thursday) no Lane closures shall be permitted from noon on the previous business day to 6:01 AM on the following business day.
  - II. The Holiday Embargo as detailed above is in effect for the following Holidays: New Year's Day, Mother Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

***Note: for Thanksgiving Day the Embargo begins on Wednesday at 12 noon and extends to Monday 6 AM, at which time the original stipulations shall be in effect.***

- III. A “Holiday Construction Embargo” will be in effect on Gridlock Alert Days from mid - November (the exact dates will be published each year in the New York City Department of Transportation’s OCMC yearly Holiday Embargo release, there are approximately ten (10)) to January 2nd. During this period, no lane or ramp closings will be permitted from 6:00 AM to Midnight except by written permission from the OCMC. This stipulation supersedes all others in this permit.
- IV. A special embargo is in effect for the following holidays: Eve of Jewish New Year, Eve of Yom Kippur, Eve of Passover. No lane or ramp closures permitted from 1:00 PM to sundown.
36. A “Holiday Construction Embargo” will be in effect on Gridlock Alert Days from mid - November (the exact dates will be published each year in the New York City Department of Transportation’s OCMC yearly Holiday Embargo release, there are approximately ten (10) days to January 2nd. During this period, no lane or ramp closings will be permitted from 6:00 AM to Midnight except by written permission from the OCMC. This stipulation supersedes all others in this permit.
37. When events occur at FOR YANKEE STADIUM, no lane or ramp closures will be permitted as noted below:
- a. From two hours before the event begins until one hour after the event begins, no lane or ramp closures permitted on: FDR Drive - northbound
  - b. From one hour after the event begins until two hours after the event concludes, no lane or ramp closures permitted on: FDR Drive - southbound
38. Work cannot be performed during the New York City 5 Boroughs Bike Tour and the New York City Marathon, unless granted special permission by the New York City Department of Transportation, Office of Construction Mitigation and Coordination.
39. The Department of Parks and Recreation’s conditions, terms and special conditions as presented in their Permit, is an integral part of this Permit.
40. Boring holes shall be back-filled with sand and compacted. In sidewalks, the last six (6) inches of the holes shall be restored with concrete. In paved areas the last six (6) inches shall be restored with concrete and/or asphalt to match the existing. On structural decks, holes shall be restored in kind.
41. The Permittee shall comply with the Industrial Code of the State of New York Part (Rule No.53) relating to Construction, Excavation and Demolition Operations at or near underground facilities. Additionally, the Permittee shall similarly notify the owners of overhead cables or other electrical or street lighting equipment in the area covered by the Permit.
42. The Permittee is reminded that the appropriate Rules and Regulations that apply to the cleaning and painting of structural steel must be rigidly followed, as specified by NYSDOT Specifications.
43. When a contractor performs work at night, the work site shall be illuminated to the satisfaction of the Engineer-In-Charge (EIC). The EIC shall be the sole judge of when illumination is required.

44. The contractor shall be responsible for identifying his/her construction signage. The identification shall include the contracting agency, the contractors name and the contract number. This identification shall be placed on the back of all signs.
45. The Permittee shall, at its own expense, be under absolute obligation to determine the location of and provide protection from damage or loss for all subsurface facilities and overhead structures in the permit area. In the event of any damage or loss to such subsurface facilities and overhead structures, the Permittee shall promptly replace or repair such facilities and structures, as directed by the New York City Department of Transportation or other City agency having jurisdiction thereof or by the owner thereof.
46. The City makes no representation as to the character of the fill in the streets, and voids therein, or the condition of the sidewalks. The Permittee accepts full responsibility and liability for any disturbance or damage, which may be caused to adjoining pavements, sidewalks or structures by or in connection with the permit activity. All damaged sidewalk or roadway pavements shall be restored (to the nearest full flag for sidewalks) in conformance with the Standard Specifications of the New York (City/State) Department of Transportation.
47. The Permittee shall furnish and install tarpaulins enclosing the immediate site of his cleaning and painting operations to insure complete protection of the general public and property, both on and below the roadway against possible damage from scraping, paint drippings, windblown paint, dust, concrete, etc. This permit does not constitute approval of either painting or paint removal methodology. All signs and signals shall be protected daily with clean and transparent coverings.
48. The washing of concrete truck drums within the Arterial Highway or city street right - of - way is strictly prohibited unless the contractor utilizes the New York State approved method.
49. When water is being used at the work site for any purpose (i.e. concrete curing, saw cutting, etc.), the Permittee is required to insure, through any and all appropriate measures, that the water does not freeze on the roadway or sidewalks. The Permittee will be responsible to maintain a clear and safe travel path.
50. The Permittee's vehicles shall not exceed the posted weight and/or height restrictions for any street, highway, bridge or viaduct section that he/she must travel upon.
51. During the snow season, the contractor shall be required to post "LIFT PLOW" signs at all locations (in both directions if necessary) where they have installed steel plates.
52. Roads used for the hauling of materials shall be kept free from debris and maintained by the Permittee and left in a condition satisfactory to the engineer-in- charge (EIC).
53. On roadways/streets where rush-hour parking and/or standing regulations are posted, the Permittee shall modify his schedule to conform to those (rush hour) restrictions.
54. The Permittee shall not park his equipment or store material overnight where it is deemed to be a safety hazard to the traveling public.
55. The Permittee shall not obstruct fire hydrants, crosswalks, pedestrian ramps, fire alarm boxes, bus stops or any public utility while performing his/her work. The Permittee may not move or remove "Bus Stop" signs without prior written approval from both the New York City Department of Transportation and the New York City Transit.

Re: East Side Coastal Resiliency, ESCR  
Pedestrian Bridge Replacement Project  
FDR Drive between Exits 2 and 7  
Six (6) 10-hour closures

**WORK PERMIT**

Department of Design and Construction and its duly authorized representatives to enter upon and restrict the flow of traffic according to the times and schedules as stipulated herein on the Franklin D. Roosevelt Drive (FDR Drive) between Exits 2 and 7 for the purpose of replacement of three pedestrian bridges (Corlear’s Hook Bridge, Delancey Street Bridge, and East 10th Street Bridge) over the FDR Drive, together with all work incidental thereto, subject to the following stipulations:

1. This permission shall be in effect as of xxxxx
2. The Permittee may fully close the FDR Drive northbound and/or southbound between Exits 2 and 7, in according to the OCMC approved MPT plane, from 12:00 AM to 10:00 AM on Sunday morning; 3-6 times total over the course of 12-18 months. (In order to grant final approval, the Permittee must complete the traffic mitigation analysis to satisfy the NYCDOT-OCMC requirements).
3. The Permittee shall notify in writing, the New York City Department of Transportation Office of Construction Mitigation and Coordination (NYCDOT-OCMC), fourteen (14) working days prior to any proposed full lane closure.
4. The lane closures shall conform to the New York State Dept. of Transportation, Design Guide and Standard for Maintenance, and Protection of Traffic, the Manual of Uniform Traffic Devices (MUTCD), and OCMC approved plans.
5. The Permittee is required to submit a weekly schedule of work. This schedule is to be sent to OCMC on the Wednesday preceding the next weeks work. The schedule will include the following information:  
  
The name of the roadway/bridge on which lanes will be closed  
The number of lanes to be closed  
The direction in which the lanes will be closed  
The hours and days of the lane closing
6. To reserve a lane or roadway closures on primary, secondary and local streets; the Permittee must obtain a separate permit from OCMC – Street.
7. Significant lane closures of Arterial Highways where at any time fifty percent or more of the roadway lanes are closed, notification shall be given to the public via the placement of Variable Message Signs (VMS) seven (7) days prior to the actual closure.
8. In the event that any non-emergency construction work results in the closing of

- (i) more than (2/3) of the moving lanes per direction on any street for more than 15 minutes per hour between the hours of 1 AM and 5 AM or
- (ii) half (50%) or more of the moving lanes on any street or limited access roadway, for a duration of more than four minutes or two traffic light cycles of the nearest traffic signal, whichever is less, during all other hours,

the Permittee shall post at the site of the closing a public notification seven(7) calendar days prior to such closing in a manner directed by OCMC.

- 9. If a full highway closure is deemed necessary, the Permittee must submit a closure request and a temporary detour plan for approval from OCMC at least thirty (30) working days prior to any proposed closure (case by case basis). The Permittee must arrange to provide Traffic enforcement agents (TEA) at designated intersections as OCMC requirement.
- 10. The Permittee MUST arrange to provide Traffic Enforcement Agents in accordance with NYCDOT OCMC requirements.
- 11. All lane closures must be coordinated with the Engineering in Charge (EIC) for the other adjacent projects & OCMC.
- 12. The Permittee MUST obtain a permit from the Overweight/Overdimension Unit of the NYCDOT Bureau of Bridges for overweight/overdimension vehicles on the Parkway/Drive.
- 13. This permit must be present on site when the approved work is being performed.
- 14. This permit is not valid unless it is signed by both the New York City Department of Transportation representative and the authorized representative of the Permittee.
- 15. In the event of a strike against the NYC Transit, no lane or ramp closures will be permitted from 5:00 AM to 12:00AM (midnight).
- 16. Section 24 - 224, Administrative Code Variance, is hereby granted for hours and days stipulated above.
- 17. During the time a lane closure is permitted, the Permittee may intermittently stop traffic on the adjacent lane(s) of the same roadway for periods not to exceed five (5) minutes in duration for the purpose of transporting or securing equipment that may extend beyond the closed lane(s). A minimum of one (1) hour, or until the traffic queue is relieved, whichever period is shorter, is required between two such closures.
- 18. No staging and/or storage sites are authorized or will be permitted unless approved in writing (where owned by New York City) by the New York City Department of Transportation's Division of Roadway Repair and Maintenance (RRM) and/or the New York City Department of Parks and Recreation (if park land is involved) or (where State owned) by New York State Department of Transportation with New York City concurrence where applicable. Except for State owned sites where City concurrence is not necessary changes in the site or limits can only be made by an amendment to this permit as applicable. A detailed drawing must be submitted and will become an attachment to the amendment. A DPR Permit shall constitute written approval from the Parks Dept.
- 19. The Permittee agrees to assume all responsibility for injury or damages to private and/or City property caused through the operations of the permit and to save and hold harmless the City of New

**April 02, 2020**

York and the New York City Department of Transportation from all claims and suits which may arise therefrom.

20. The Permittee shall notify in writing, the New York City Department of Transportation, OCMC ten (10) working days prior to any proposed lane change, shift or ramp closures prior to commencing work operations. Four (4) weeks' notice is required when it is anticipated that temporary traffic signals and/or signal timing adjustments will be needed.

21. The Permittee shall be responsible to provide notification to the local Community Board and Borough President's Office prior to the commencement of work. Additionally notification shall be made to the local Councilman's office. Proof of notification must be filed with the OCMC prior to the commencement of work.

22. The Permittee shall notify the New York City Dept. of Transportation's Situation Room at (718-433-3340), the NYPD Traffic Management Center at (718 706-6756), the Chief of Emergency Medical Services at (718-999-2770) and the local fire house prior to his/her proposed traffic lane reductions or street closings for any purpose. The Permittee shall also immediately notify the Situation Room upon reopening and in the event of an emergency condition.

23. In the event, a full highway closure for period greater than fifteen (15) minutes is permitted, the Permittee must notify all those parties listed in the prior three stipulations at least two weeks in advance. Additionally the Permittee must prepare a press release for the TV, Radio and Newspaper Media at least one week prior to the closure.

24. The Permittee shall adhere to all pertinent rules and regulations of the New York City Department of Transportation relative to the use and occupancy of street space, the provisions of his agreement and the performance of his work.

25. The Permittee shall adhere to the NYCDOT Bureau of Bridges' Special Provisions for Landscape Protection, Maintenance and Restoration, items 1.18.15 through 1.18.19, whenever and wherever any of the Permittee's activities occur within a limited access arterial highway right - of - way. Copies of these provisions may be obtained from the New York City Department of Transportation's Director of Arterial Maintenance at 212 – 487-6837.

26. This Permit is limited to activity performed in conformance with this agreement with the New York City Department of Transportation and does not permit any other activities, which could be a hazard or distraction to the roadway user.

27. No deviation or departure from these stipulations will be permitted without the prior written approval of the New York City Department of Transportation. Requests for such modifications shall be submitted to the OCMC a minimum of ten (10) days in advance for consideration.

28. To ensure a traffic flow at all times storage of materials and equipment shall not be permitted within the traveled way of the highway. Storage areas shall be separated from the traveled way by a clear space of 30 feet minimum width, unless such storage is placed behind concrete barrier or permanently installed bridge railing.

29. Any excavations shall be adequately fenced and/or decked over by the Permittee to preclude entry by errant vehicles, pedestrians or animals.

30. The Permittee shall insure that construction materials and/or excavated soil and rocks temporarily stored on slopes are secured by straw bales or other effective means to prevent their movement into the travel way and clear zone (recovery zone) area.

April 02, 2020

31. When work is performed in or adjacent to sidewalk areas, a safe pedestrian walkway having a minimum width of five (5) feet shall be provided at all times by the Permittee.

32. Concurrent with construction work of this contract, if other projects on this and/or adjacent highways are under construction then the Permittee is to become familiar with the scheduling of those projects and schedule his activities accordingly. To facilitate the flow of traffic, the permissible work hours may be modified as deemed necessary by the New York City Department of Transportation.

33. In order to provide an adequate transition for the safe flow of traffic, when the Permittee's (or another Permittee's) work sites are in two (2) different lanes in the same direction, those work sites shall be separated by a distance of at least two (2) miles.

34. Warning signs and traffic safety devices shall be provided, installed, maintained and removed by the Permittee in accordance with the New York State Department of Transportation's "Manual of Uniform Traffic Control Devices". The Permittee shall provide the appropriate channelization for traffic approaching and leaving his/her worksite. The Permittee shall provide flagpersons, cones, barricades, etc. as required for public safety. The Permittee is responsible for the adequacy of the safety devices. The Permittee shall coordinate his/her lane closures with the lane closures of any other Permittee working within 2 miles of his/her work area.

35. Operation of a crane, derrick, shovel or other similar equipment for any and all work within the streets shall be carried out by the Permittee in accordance with the Rules, Regulations and Requirements of the New York City Department of Transportation and the New York City Department of Buildings and shall comply with all provisions of the New York City Noise Control Code. In addition, if this equipment is to be placed so that any part of the load will be superimposed on the sidewalk or roadway, the Permittee must file, with the New York City Department of Transportation, Office of Construction Mitigation and Coordination, a statement by a Professional Engineer, licensed by the State of New York, certifying the following:

I. That the sidewalk or roadway area and the supporting subgrade can safely bear the crane load. Should the condition of the sidewalk or roadway area require that the crane load be distributed over a larger area than afforded by the elements of the crane, the engineer shall furnish the full dimensioned details of the load distribution.

II. That the Engineer has taken all necessary measures to ascertain that there is no vault or subway tunnel underneath the sidewalk area or that if a vault or subway tunnel does exist its roof is sufficiently strong to support the load to be superimposed thereof.

III. That the sheeting or retaining walls supporting any excavations adjoining the sidewalk or roadway area required to carry a load have been examined by the Engineer and have been found to be sufficiently strong to support the area carrying the crane load. Should the crane be employed making any excavation adjacent to the crane, the Engineer shall specify the sheeting or retaining wall reinforcement required to support the crane.

36. A Holiday Embargo is in effect for the Holidays (as determined by the New York City Office of Payroll Administration) with the following provisions:

I. When a Holiday falls or is observed by the City of New York on a Monday or Friday no lane or ramp closures are permitted from noon on the previous business day to 6:01 AM on the following business day. For example if the holiday falls or is observed on Friday then no lane closure would be permitted from 12:01 PM on Thursday to 6:01 AM on Monday. If the Holiday falls or is observed on Monday then no lane closure is permitted from 12:01 PM on Friday to 6:01 AM on Tuesday. In addition when a Holiday falls or is observed midweek (Tuesday, Wednesday or Thursday) no Lane

April 02, 2020

closures shall be permitted from noon on the previous business day to 6:01 AM on the following business day.

II. The Holiday Embargo as detailed above is in effect for the following Holidays: New Year’s Day, Mother Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. **Note: for Thanksgiving Day the Embargo begins on Wednesday at 12 noon and extends to Monday 6 AM, at which time the original stipulations shall be in effect.**

III. A “Holiday Construction Embargo” will be in effect on Gridlock Alert Days from mid - November (the exact dates will be published each year in the New York City Department of Transportation’s OCMC yearly Holiday Embargo release, there are approximately ten (10)) to January 2nd. During this period, no lane or ramp closings will be permitted from 6:00 AM to Midnight except by written permission from the OCMC. This stipulation supersedes all others in this permit.

IV. A special embargo is in effect for the following holidays: Eve of Jewish New Year, Eve of Yom Kippur, Eve of Passover. No lane or ramp closures permitted from 1:00 PM to sundown.

37. A “Holiday Construction Embargo” will be in effect on Gridlock Alert Days from mid - November (the exact dates will be published each year in the New York City Department of Transportation’s OCMC yearly Holiday Embargo release, there are approximately ten (10) days to January 2nd. During this period, no lane or ramp closings will be permitted from 6:00 AM to Midnight except by written permission from the OCMC. This stipulation supersedes all others in this permit.

38. When events occur at FOR YANKEE STADIUM, no lane or ramp closures will be permitted as noted below:

a. From two hours before the event begins until one hour after the event begins, no lane or ramp closures permitted on: FDR Drive - northbound

b. From one hour after the event begins until two hours after the event concludes, no lane or ramp closures permitted on: FDR Drive - southbound

39. Work cannot be performed during the New York City 5 Boroughs Bike Tour and the New York City Marathon, unless granted special permission by the New York City Department of Transportation, Office of Construction Mitigation and Coordination.

40. The Department of Parks and Recreation’s conditions, terms and special conditions as presented in their Permit, is an integral part of this Permit.

41. Boring holes shall be back-filled with sand and compacted. In sidewalks, the last six (6) inches of the holes shall be restored with concrete. In paved areas the last six (6) inches shall be restored with concrete and/or asphalt to match the existing. On structural decks, holes shall be restored in kind.

42. The Permittee shall comply with the Industrial Code of the State of New York Part (Rule No.53) relating to Construction, Excavation and Demolition Operations at or near underground facilities. Additionally, the Permittee shall similarly notify the owners of overhead cables or other electrical or street lighting equipment in the area covered by the Permit.

43. The Permittee is reminded that the appropriate Rules and Regulations that apply to the cleaning and painting of structural steel must be rigidly followed, as specified by NYSDOT Specifications.

44. When a contractor performs work at night, the work site shall be illuminated to the satisfaction of the Engineer-In-Charge (EIC). The EIC shall be the sole judge of when illumination is required.

April 02, 2020

45. The contractor shall be responsible for identifying his/her construction signage. The identification shall include the contracting agency, the contractors name and the contract number. This identification shall be placed on the back of all signs.

46. The Permittee shall, at its own expense, be under absolute obligation to determine the location of and provide protection from damage or loss for all subsurface facilities and overhead structures in the permit area. In the event of any damage or loss to such subsurface facilities and overhead structures, the Permittee shall promptly replace or repair such facilities and structures, as directed by the New York City Department of Transportation or other City agency having jurisdiction thereof or by the owner thereof.

47. The City makes no representation as to the character of the fill in the streets, and voids therein, or the condition of the sidewalks. The Permittee accepts full responsibility and liability for any disturbance or damage, which may be caused to adjoining pavements, sidewalks or structures by or in connection with the permit activity. All damaged sidewalk or roadway pavements shall be restored (to the nearest full flag for sidewalks) in conformance with the Standard Specifications of the New York (City/State) Department of Transportation.

48. The Permittee shall furnish and install tarpaulins enclosing the immediate site of his cleaning and painting operations to insure complete protection of the general public and property, both on and below the roadway against possible damage from scraping, paint drippings, windblown paint, dust, concrete, etc. This permit does not constitute approval of either painting or paint removal methodology. All signs and signals shall be protected daily with clean and transparent coverings.

49. The washing of concrete truck drums within the Arterial Highway or city street right - of - way is strictly prohibited unless the contractor utilizes the New York State approved method.

50. When water is being used at the work site for any purpose (i.e. concrete curing, saw cutting, etc.), the Permittee is required to insure, through any and all appropriate measures, that the water does not freeze on the roadway or sidewalks. The Permittee will be responsible to maintain a clear and safe travel path.

51. The Permittee's vehicles shall not exceed the posted weight and/or height restrictions for any street, highway, bridge or viaduct section that he/she must travel upon.

52. During the snow season, the contractor shall be required to post "LIFT PLOW" signs at all locations (in both directions if necessary) where they have installed steel plates.

53. Roads used for the hauling of materials shall be kept free from debris and maintained by the Permittee and left in a condition satisfactory to the engineer-in- charge (EIC).

54. On roadways/streets where rush-hour parking and/or standing regulations are posted, the Permittee shall modify his schedule to conform to those (rush hour) restrictions.

55. The Permittee shall not park his equipment or store material overnight where it is deemed to be a safety hazard to the traveling public.

56. The Permittee shall not obstruct fire hydrants, crosswalks, pedestrian ramps, fire alarm boxes, bus stops or any public utility while performing his/her work. The Permittee may not move or remove "Bus Stop" signs without prior written approval from both the New York City Department of Transportation and the New York City Transit.

57. This is not a Parking Permit. The Permittee shall obey all traffic laws and regulations.

**NYCDDC; East Side Coastal Resiliency, 10 hrs closure**

**HCP- Draft**

**April 02, 2020**

58. This Permit may be amended to cover new or unforeseen conditions at the discretion of the New York City Department of Transportation, after consultation with the Permittee. The New York City Department of Transportation reserves the right to cancel this permit at any time for any valid reason.

59. This Permit, unless terminated at the discretion of the New York City Department of Transportation, will expire on xxxxx.

# DEPARTMENT OF THE ARMY PERMIT

Permittee: New York City Department of Design and Construction  
30-30 Thomson Avenue  
Long Island City, NY 11101  
(718) 391-3134

Permit Number: NAN-2019-00596

Date Issued: December 2, 2020

Issuing Office: U.S. Army Corps of Engineers, New York District

**NOTE:** The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below.

## Project Description:

Replace the East River Park Esplanade deck, relocate the two existing embayments, construct concrete piers for the flyover bridge, relocate ten sewer outfalls, replace deteriorating piles and fill a portion of the area underneath the existing Fireboat House platform, and dewater sewer outfall work areas using cofferdams. The project work is estimated to take approximately five years to complete. The work will result in a total of up to approximately 0.41-acre of permanent impacts to Waters of the United States (WOTUS), including open water, and a total of approximately 1.07-acres of temporary disturbances to WOTUS, including open water.

### Existing Bulkhead and East River Esplanade (see sheets 5-29)

Remove approximately 6,327-linear feet (1.2-miles) of the existing bulkhead, East River Park Esplanade concrete deck, varying from approximately 21-feet to 32-feet wide, and select formwork, located seaward of the plane of Mean High Water (MHW). Install a new sheet pile cut-off wall in-place or landward of the existing bulkhead alignment. Reconstruct the esplanade deck to structurally support fill. The existing East River bulkhead, running underneath the esplanade for the length of the project area, will be removed and replaced, in-place or landward of existing, with a new steel sheetpile "cut-off wall". New sections of the cut-off wall will be installed in the locations of the two existing embayments (see description below). Existing timber and/or steel support piles underneath the existing esplanade will remain.

### Embayments

Relocate two existing embayments, including the North Embayment and the South Embayment, within the project area. The two new embayments are comparable in size to the two existing embayments, which will be filled.

**PERMITTEE: New York City Department of Design and Construction****PERMIT NO.: NAN-2019-00596****Existing South Embayment (see sheets 8, 17, 18, 33, and 38A)**

Demolish the existing South Embayment, approximately 5,042 square feet (0.116-acre) in size within WOTUS, and the pedestrian bridge and piles, approximately 3,130 square feet (0.072-acre). Install a new cut-off wall, approximately 174-feet long, across the face of the existing South Embayment in alignment with the existing bulkhead on the north and south ends. Backfill the area (0.116-acre) behind the new wall with approximately 960-cubic yards of manufactured lightweight ceramic aggregate fill below the plane of Spring High Water (SHW). Redesign the existing pedestrian bridge as a continuation of the esplanade, supported by approximately eighteen (18) new two-foot diameter steel piles filled with a total of approximately 118 cubic yards of cast-in-place concrete below SHW, resulting in permanent impacts to approximately 0.001-acre of WOTUS.

**New South Embayment (see sheets 6, 14, 31 and 38)**

Demolish approximately 270-linear feet of the existing esplanade and formwork. Excavate the existing upland shoreline to create a new South Embayment, approximately 7,923 square feet (0.182-acres) in size. Install a total of approximately 20-linear feet of new cut-off wall seaward of the plane of SHW, including 10-feet on the north and south end, in order to tie the new shoreline to the existing sheet pile wall. Two triangular over-water platforms, each totaling approximately 225 square feet and supported by up to 10 concrete-filled steel piles, will be placed on the north and south ends of the new embayment to transition the esplanade to the inland walkway and provided access compliant with the requirements of the Americans with Disabilities Act (ADA). Existing piles will be cut off at or above the mud line. Approximately 21 existing piles cut off above the mud line will be fitted with jackets to provide habitat structure. Place up to 400 cubic yards of new riprap in an area approximately 25-feet wide and 180-feet long, on the shoreline below the SHW, to stabilize the new bank slope. Construct a breakwater below Mean Low Water (MLW), approximately 12-feet wide and 190-feet long, install approximately eighty-five square concrete blocks, each approximately four feet in size on each side (200 cubic yards total). Install up to a total of twenty-five pre-cast concrete tidal pools, each approximately four-feet wide by three and one-half feet long, at the plane of MHW to provide habitat structure in the intertidal zone.

**Existing North Embayment (see sheets 10, 21, 36 and 39A)**

Demolish the existing North Embayment, approximately 7,484 square feet (0.172-acre) in size within WOTUS, and associated over-water pedestrian walkway and piles, approximately 4,280 square feet (0.098-acre). Install a new cut-off wall, approximately 238-linear feet long, across the face of the existing North Embayment in alignment with the existing cut-off wall on the north and south ends. Backfill behind the new wall (0.172-acre) with approximately 1,286-cubic yards of manufactured lightweight ceramic aggregate fill below the plane of SHW. Redesign the existing pedestrian bridge as a continuation of the esplanade, supported by approximately thirty-five (35) new two-foot diameter steel piles filled with a total of approximately 228 cubic yards of cast-in-place concrete below SHW, resulting in permanent impacts to approximately 0.003-acre of WOTUS.

**New North Embayment (see sheets 20, 26, 35, and 39)**

Demolish approximately 265-linear feet of the existing esplanade and formwork. Excavate the

PERMITTEE: New York City Department of Design and Construction  
PERMIT NO.: NAN-2019-00596

existing upland shoreline to create a new North Embayment, approximately 4,854 square feet (0.111-acres) in size. Install a total of approximately 20-linear feet of new cut-off wall seaward of the plane of SHW, including 10-feet on the north and south end, in order to tie the new shoreline to the existing sheet pile wall. Two triangular over-water platforms, each totaling approximately 350 square feet-feet and supported by ten concrete-filled steel piles, will be placed on the north and south ends of the new embayment to transition the esplanade to the inland walkway and provided ADA access. Existing piles will be cut off at or above the mud line. Approximately 11 existing piles cut off above the mud line will be fitted with jackets to provide habitat structure. Place up to 200 cubic yards of new riprap in an area approximately 25-feet wide and 135-feet long, on the shoreline below the SHW, to stabilize the new bank slope. Construct a breakwater below the plane of MLW, approximately 12-feet wide and 170-feet long, from approximately seventy square concrete blocks, each approximately four feet in size on each side (165 cubic yards total). Install up to a total of ten pre-cast concrete tidal pools, each approximately four-feet wide by three and one-half feet long, at the plane of MHW to provide habitat structure in the intertidal zone.

**Flyover Bridge** (see sheets 4, and 52-55)

Construct two new bridge piers seaward of the SHW (piers 5 and 6), each consisting of two (2) five-foot diameter steel support shafts filled with approximately 12 cubic yards of cast-in-place concrete below SHW. Install two (2) five foot diameter steel support shafts filled with approximately 7 cubic yards of cast-in-place concrete below SHW and twenty (20) three-foot diameter steel support shafts each filled with approximately 4 cubic yards of cast-in-place concrete to support the north bridge approach. The new flyover bridge shafts will be installed through and connect to the existing concrete promenade deck and bulkhead using barge mounted drill rigs, and result in total impacts to approximately 260-square feet, with up to 1,008 cubic yards of fill placed below the plane of SHW. The new flyover bridge structure will be placed seaward of the plane of MHW; however, will not extend seaward of the existing promenade deck.

**Sewer Outfalls and Cofferdams** (see sheets 42-51)

Relocate and reconstruct ten (10) existing sewer outfalls at different locations along the length of the project area. The new outfalls will be installed through the face of the new cut-off wall and vary in size, with openings between five-feet and 12-feet wide. Temporary cofferdams will be installed during construction at each new outfall location, landward of the pierhead line, and result in temporary impacts to approximately 1,000 square feet of WOTUS. Existing outfalls will be removed and covered by the new cut-off wall.

**Fireboat House/Platform** (see sheets 6, 23, and 59-62)

Using divers, install approximately 120-linear feet of new stay-in-place formwork into a two-foot deep trench underneath the existing platform, extending approximately 20-feet seaward of the existing bulkhead, to form a closed, irregularly shaped rectangular cell. Backfill the newly enclosed area between the new formwork and the existing bulkhead, approximately 20-feet wide and 70-feet long (1,600 square feet), with approximately 235 cubic yards of lean concrete. Encase a total of 35 existing, degraded, 12-inch diameter timber piles underneath the existing

PERMITTEE: New York City Department of Design and Construction

PERMIT NO.: NAN-2019-00596

platform seaward of the fill area, with a composite jacket filled with epoxy grout in order to stabilize the existing platform.

**Temporary Dewatering**

Cofferdams will be installed to dewater the work areas during construction of each new outfall. Turbidity curtains will be installed in the East River prior to demolition of the existing East River bulkhead and esplanade in order to contain debris and turbidity.

All work shall be performed in accordance with the attached drawings entitled “East Side Coastal Resiliency Project”, prepared for the New York City Department of Design and Construction, dated November 15, 2019, and special conditions (A) through (Q) which are hereby made part of this permit, and the New York State Department of Environmental Conservation Permit No. 2-6206-01582/00002, dated October 20, 2020, incorporating the Section 401 Water Quality Certificate, which are hereby made a part of this permit.

Project Location:           IN: East River

AT: Montgomery Street to East 25th Street, Borough of Manhattan, City of New York, New York County, New York.

Permit Conditions:

General Conditions:

1. The time limit for completing the work authorized ends on October 19, 2030. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before the above date is reached.
2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.
3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.

**PERMITTEE: New York City Department of Design and Construction**

**PERMIT NO.: NAN-2019-00596**

5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.
6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

**Special Conditions:**

**(A) This authorization is conditional on the applicant's receipt of the required Section 401 Water Quality Certification or waiver from the New York State Department of Environmental Quality (NYSDEC). No work may be accomplished until the required approval from NYSDEC has been obtained. Once obtained, the permittee, and their agents, shall be responsible for complying with any special conditions and/or stipulations incorporated into the appropriate Section 401 Water Quality Certification, and all amendments thereto.**

**(B) The permittee, and their agents, shall avoid installing cofferdams within winter flounder early life stage Essential Fish Habitat between January 15 and May 31 of any year to minimize impacts to winter flounder eggs and larvae.**

**(C) The permittee, and their agents, shall ensure when pile driving activities occur during a time of year when ESA-listed species may be present, a vibratory hammer shall be used to the extent practicable. If an impact hammer is used, 20-minute "soft starts" shall be performed, and a wooden block shall be used to buffer the noise and vibrations during hammering.**

**(D) The permittee, and their agents, shall ensure cofferdams, turbidity curtains, or other methods to control turbidity are utilized when operationally feasible and ESA-listed species may be present.**

**(E) The permittee, and their agents, shall ensure the Section 106 Programmatic Agreement dated December 5, 2019, is adhered to.**

**(F) The permittee shall provide this office with a copy of all documents and correspondence required to carry out the Section 106 Programmatic Agreement dated December 5, 2019, also including the Phase 1B Archeological Report, once completed.**

**(G) The permittee, and their agents, shall ensure any vessels used in conjunction with this project comply with the Port of New York anchorage ground regulations codified at 33 CFR 110.155, including paragraph (1)(11) regarding vessels that impede or**

**PERMITTEE: New York City Department of Design and Construction**

**PERMIT NO.: NAN-2019-00596**

**obstruct vessel movements.**

**(H) The Permittee, and their agents, shall, a minimum of 14-days prior to starting operations, submit the following information to the First Coast Guard District for publication in the Local Notice to Mariners by email at LNM@uscg.mil, or faxed to (617) 223-8291):**

**Date of submission; Name, phone number, and email address of project point of contact; Company Name; Type of Work; Waterway and location where work will be done; Latitude & Longitude of work area (Degrees, Minutes, Thousandths of seconds); Work Start & Stop dates and Hours of Operation; Equipment on scene; Passing Arrangements / Time to move vessels to not impede navigation; VHF Radio Channel monitored; Disposal Site (if used); NOAA Chart Number for the area.**

**(I) The Permittee, and their agents shall check in with U.S. Coast Guard Sector New York Vessel Traffic Service (VTSNY) on VHF CH 12 or at (718) 354-4195 each day, fifteen minutes before starting, and upon completion, of diving operations.**

**(J) The permittee, and their agents, shall email U.S. Coast Guard Sector New York [Jeffrey.M.Yunker@uscg.mil] each request to moor two or more barges abreast or moor any single barge perpendicular to the federal channel at any time during the project for review with VTSNY. Construction barges may be required to move with advance notice depending on the location and combined beam of the moored vessels.**

**(K) The permittee, and their agents, shall email U.S. Coast Guard Sector New York [Jeffrey.M.Yunker@uscg.mil] the as-built coordinates for the center of each of the ten relocated sewer outfalls.**

**(L) The permittee, and their agents, shall notify the National Oceanic and Atmospheric Administration of the project completion and specifications so they may initiate the appropriate chart and Coast Pilot corrections. This notification must be submitted online at <https://nauticalcharts.noaa.gov/charts/docs/charts-updates/Permit-Public-Notice.pdf> and include a copy of the USACE permit.**

**(M) The permittee, and their agents, shall ensure any current, or future, outdoor lighting is located or shielded so that it is not confused with any aids to navigation and does not interfere with navigation on the adjacent waterway. If installed, the lights must be white and non-flashing.**

**(N) The permittee shall ensure all soil and sediment management during in-water construction adheres to a Mitigation Work Plan (MWP) approved by the New York State Department of Environmental Conservation (NYSDEC), and/or shall complete any sediment testing requirements, as required by the NYSDEC, prior to the start of any in-water work within the project area. A copy of any changes to the MWP, and any reports resulting from additional soil testing, shall be provided to the U.S. Army**

PERMITTEE: New York City Department of Design and Construction  
PERMIT NO.: NAN-2019-00596

Corps of Engineers, Regulatory Branch.

(O) The permittee, and their agents, shall conduct all in-water work within the confines of a turbidity curtain and oil booms to contain soil and suspended sediments. Additionally, the permittee shall use other Best Management Practices to ensure turbidity is minimized in the water.

(P) The permittee understands and agrees that, if future operations by the United States require the removal, relocation, or other alteration, of the structure or work herein authorized, or if, in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the permittee will be required, upon due notice from the Corps of Engineers, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration.

(Q) The permittee shall utilize best management practices to minimize turbidity during all in-water work activities as well as prevent construction materials, including debris, from entering any waterway to become drift or pollution hazards.

**Further Information:**

1. **Congressional Authorities:** You have been authorized to undertake the activity described above pursuant to:

Section 10 of the Rivers and Harbors Act of 1899 (33 U.S. Code 403).

Section 404 of the Clean Water Act (33 U.S. Code 1344).

Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).

2. **Limits of this authorization:**

a. This permit does not obviate the need to obtain other Federal, state, or local authorizations required by law.

b. This permit does not grant any property rights or exclusive privileges.

c. This permit does not authorize any injury to the property or rights of others.

d. This permit does not authorize interference with any existing or proposed Federal project.

3. **Limits of Federal Liability:** In issuing this permit, the Federal Government does not assume any liability for the following:

**PERMITTEE: New York City Department of Design and Construction**  
**PERMIT NO.: NAN-2019-00596**

a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.

b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.

c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.

d. Design or construction deficiencies associated with the permitted work.

e. Damage claims associated with any future modification, suspension, or revocation of this permit.

**4. Reliance on Applicant's Data:** The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

**5. Reevaluation of Permit Decision:** This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

a. You fail to comply with the terms and conditions of this permit.

b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (See 4 above).

c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

**6. Extensions:** General Condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.

Your signature below, as permittee, indicates that you accept and agree to comply with the terms

**Permit Components**

NATURAL RESOURCE PERMIT CONDITIONS

WATER QUALITY CERTIFICATION SPECIFIC CONDITION

GENERAL CONDITIONS, APPLY TO ALL AUTHORIZED PERMITS

NOTIFICATION OF OTHER PERMITTEE OBLIGATIONS

**NATURAL RESOURCE PERMIT CONDITIONS - Apply to the Following Permits: TIDAL WETLANDS; WATER QUALITY CERTIFICATION; EXCAVATION & FILL IN NAVIGABLE WATERS**

**1. Conformance With Plans** All activities authorized by this permit must be in strict conformance with the approved plans submitted by the applicant or applicant's agent as part of the permit application. Such approved plans were prepared by the entities described and cited in Natural Resources permit condition 2.

**2. Conformance with Plans - Addenda**

Documents from the resubmission prepared by NYCDDC titled "Response to NYSDEC Notice of Incomplete Application (Dated October 1, 2019)," all received by NYSDEC November 18, 2019, as follows:

1. Enclosure 2, "Response to NYSDEC Notice of Incomplete Application: November 15, 2019."
2. Letter from Eram Quadri of NYCOMB to Karen Greene of NOAA National Marine Fisheries Service, dated September 4, 2019.
3. Letter from Eram Quadri of NYCOMB to Dr. Michael J. Asaro of NOAA's National Marine

Fisheries Service, page 5, dated May 13, 2019.

4. Enclosure 5, “Revised Attachment 2 – Project Description,” dated November 15, 2019, received by NYSDEC 11/18/2019.
5. Plans prepared by NYC Department of Design and Construction, titled ‘East Side Coastal Resiliency Project’, Revision 1, Sheets 1-62 of 66, dated November 15, 2019.
6. Enclosure 1, “Response to Request for Additional Justification for Fire Boat House Encasement of Support Piles,” dated April 2, 2020, received by NYSDEC by email on April 6, 2020.
7. Email from NYCDDC to NYSDEC regarding “SANDRESM1 - ESCR – JPA comment on cofferdam,” dated April 12, 2020, received by NYSDEC April 13, 2020.

**3. Notice of Intent to Commence Work** At least five (5) days prior to the start of work. Permittee must complete and submit the attached “Notice of Intent to Commence Work” form to the NYSDEC Division of Marine Resources, 47-40 21st Street, Long Island City, New York 11101.

**4. Notice of Completion of Work** Within ten (10) days of the completion of work, Permittee must complete and submit the attached Notice of Completion of Work form to NYSDEC Division of Marine Resources, 47-40 21st Street, Long Island City, New York 11101.

**5. Mitigation Plan within 90 Days of Permit Issuance** Within 90 days of the issuance of this permit, Permittee must submit verifying documentation that the 2,195 cubic yards of fill placement below mean high water will be offset through the purchase of an approvable quantity of credits from the Saw Mill Creek Wetland Mitigation Bank.

If the Permittee is unable to purchase the above-referenced credits, a traditional mitigation plan will be required. This plan must be submitted to NYSDEC for review and approval within 120 days of permit issuance. This mitigation plan must account for the proposed placement of 2,195 cubic yards of fill placement below mean high water within tidal wetlands and/or navigable waters at a 2:1 ratio. Any comments resulting from NYSDEC review must be responded to and addressed with a revised mitigation plan within two weeks of receipt of said comments. All correspondence must be submitted to NYSDEC Division of Marine Resources 47-40 21st Street, Long Island City, New York 11101 (Attention: Caitlin Frame).

**6. Cofferdam Construction Work Window** Installation of cofferdams is prohibited from January 15 through May 31 of any calendar year to minimize impacts to winter flounder eggs and larvae.

**7. Concrete or Leachate Must Not Be Discharged** During construction, concrete or leachate will not escape or be discharged, nor will washings from transit mix trucks, mixers, or other devices enter tidal wetlands and or protected buffer areas.

**8. Erosion/Sediment Control** All areas of soil disturbance resulting from this project will be stabilized immediately following project completion or prior to permit expiration, whichever comes first. The approved methodologies are as follows:

A. stabilization of the entire disturbed area with appropriate vegetation (grasses, etc.)

B. stabilized as per specifications identified on approved plans.

C. temporarily stabilized with straw or hay mulch or jute matting or other similar natural fiber matting within 1 week of final grading. Temporary stabilization will be maintained until a mature vegetative cover is established.

**9. Clean Fill Material Only** All fill will consist of clean sand, gravel, or soil. The use of material such as asphalt, slag, fly-ash, recycled concrete aggregate (RCA), broken concrete, or demolition debris is strictly prohibited.

**10. Construct Bulkhead Prior to Fill Placement** All peripheral berms, cofferdams, rock revetments, seawalls, gabions, bulkheads, etc. will be completed prior to placement of any fill material behind such structures.

**11. Excavate Backfill Prior to Removal of Bulkhead** Prior to any construction or removal of bulkheads and other shoreline stabilization structures all backfill will be excavated landward of the bulkhead and retained so as not to enter the waterway, tidal wetland or protected buffer area.

**12. Demolition and Construction Debris** Should any demolition or construction debris fall into the waterway or enter the tidal wetlands, it must be removed immediately.

**13. Disposal of Demolition and Construction Debris** All demolition and construction debris must be properly disposed of at a licensed facility.

**14. Wood Preservatives**

A. Pressure treated wood used for construction of in-water structures must have been treated with a preservative and must have undergone a treatment process approved (stamped or otherwise marked as certified) by the American Wood Preservative Association.

B. Wood treated with Pentachlorophenol (PCP) must not be used in wetlands or surface waters.

C. The use of creosote treated wood is prohibited both in the water and in the upland areas.

D. Chromated Copper Arsenate (CCA) pressure treated wood must be clean and free of CCA surface deposits. Wood with surface deposits must be washed for at least 5 minutes under running water prior to use. (Note the following condition for the handling of wash water.)

E. Any wood debris such as sawdust or wash water must not enter any water body, including wetlands, or protected buffer areas.

**15. Combined Best Management Practices** Best management practices will be employed to prevent the loss of construction materials, debris and sediments from entering the wetlands or waterways. Such practices may include, but are not limited to construction fencing, staked hay bales, silt fencing, floating platforms, floating booms, netting, containment booms and turbidity curtains.

**16. No Interference With Navigation** There shall be no unreasonable interference with navigation by the work herein authorized.

**17. State Not Liable for Damage** The State of New York shall in no case be liable for any damage or injury to the structure or work herein authorized which may be caused by or result from future operations undertaken by the State for the conservation or improvement of navigation, or for other

purposes, and no claim or right to compensation shall accrue from any such damage.

**18. Precautions Against Contamination of Waters** All necessary precautions shall be taken to preclude contamination of any wetland or waterway by suspended solids, sediments, fuels, solvents, lubricants, epoxy coatings, paints, concrete, leachate or any other environmentally deleterious materials associated with the project.

**19. State May Require Site Restoration** If upon the expiration or revocation of this permit, the project hereby authorized has not been completed, the applicant shall, without expense to the State, and to such extent and in such time and manner as the Department of Environmental Conservation may lawfully require, remove all or any portion of the uncompleted structure or fill and restore the site to its former condition. No claim shall be made against the State of New York on account of any such removal or alteration.

**20. State May Order Removal or Alteration of Work** If future operations by the State of New York require an alteration in the position of the structure or work herein authorized, or if, in the opinion of the Department of Environmental Conservation it shall cause unreasonable obstruction to the free navigation of said waters or flood flows or endanger the health, safety or welfare of the people of the State, or cause loss or destruction of the natural resources of the State, the owner may be ordered by the Department to remove or alter the structural work, obstructions, or hazards caused thereby without expense to the State, and if, upon the expiration or revocation of this permit, the structure, fill, excavation, or other modification of the watercourse hereby authorized shall not be completed, the owners, shall, without expense to the State, and to such extent and in such time and manner as the Department of Environmental Conservation may require, remove all or any portion of the uncompleted structure or fill and restore to its former condition the navigable and flood capacity of the watercourse. No claim shall be made against the State of New York on account of any such removal or alteration.

## WATER QUALITY CERTIFICATION SPECIFIC CONDITIONS

**1. Water Quality Certification** The authorized project, as conditioned pursuant to the Certificate, complies with Section 301, 302, 303, 306, and 307 of the Federal Water Pollution Control Act, as amended and as implemented by the limitations, standards, and criteria of state statutory and regulatory requirements set forth in 6 NYCRR Section 608.9(a). The authorized project, as conditioned, will also comply with applicable New York State water quality standards, including but not limited to effluent limitations, best usages and thermal discharge criteria, as applicable, as set forth in 6 NYCRR Parts 701, 702, 703, and 704.

## GENERAL CONDITIONS - Apply to ALL Authorized Permits:

**1. Facility Inspection by The Department** The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71- 0301 and SAPA 401(3).

The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

**2. Relationship of this Permit to Other Department Orders and Determinations** Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

**3. Applications For Permit Renewals, Modifications or Transfers** The permittee must submit a separate written application to the Department for permit renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing. Submission of applications for permit renewal, modification or transfer are to be submitted to:

Regional Permit Administrator  
NYSDEC Region 2 Headquarters  
47-40 21st St  
Long Island City, NY 11101 -5401

**4. Submission of Renewal Application** The permittee must submit a renewal application at least 30 days before permit expiration for the following permit authorizations: Excavation & Fill in Navigable Waters, Tidal Wetlands, Water Quality Certification.

**5. Permit Modifications, Suspensions and Revocations by the Department** The Department reserves the right to exercise all available authority to modify, suspend or revoke this permit. The grounds for modification, suspension or revocation include:

- a. materially false or inaccurate statements in the permit application or supporting papers;
- b. failure by the permittee to comply with any terms or conditions of the permit;
- c. exceeding the scope of the project as described in the permit application;
- d. newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
- e. noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**6. Permit Transfer** Permits are transferrable unless specifically prohibited by statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

## NOTIFICATION OF OTHER PERMITTEE OBLIGATIONS

### **Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification**

The permittee, excepting state or federal agencies, expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees, and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under Article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

### **Item B: Permittee's Contractors to Comply with Permit**

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

### **Item C: Permittee Responsible for Obtaining Other Required Permits**

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

### **Item D: No Right to Trespass or Interfere with Riparian Rights**

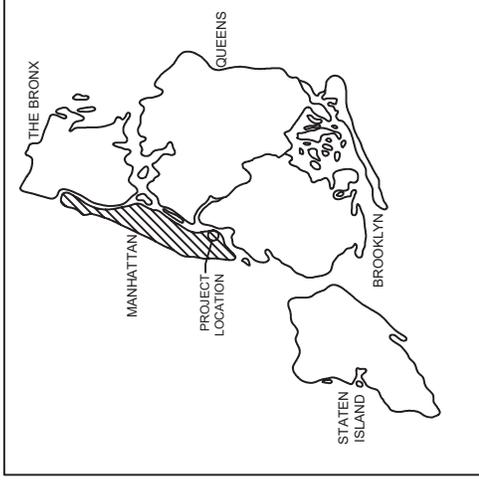

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

PLAN VIEW  
NOT TO SCALE

SECTION B-B  
NOT TO SCALE

NOTES:

TURBIDITY CURTAIN

1. APPLICATION: TURBIDITY CURTAINS ARE NOT ALLOWED TO BE INSTALLED ACROSS FLOWING WATER COURSES.
2. DESIGN CRITERIA: THE TURBIDITY CURTAIN SHALL BE FIRMLY ANCHORED IN PLACE. THE HEIGHT OF THE CURTAIN SHALL BE 20 PERCENT GREATER THAN THE DEPTH OF THE WATER TO ALLOW FOR WATER LEVEL FLUCTUATIONS. IF WATER DEPTHS AT THE DESIGN ALIGNMENT ARE MINIMAL, THE TOE CAN BE ANCHORED IN PLACE BY STAKING.
3. CONSTRUCTION SPECIFICATIONS: THE AREA OF PROPOSED INSTALLATION OF THE CURTAIN SHALL BE INSPECTED FOR OBSTACLES AND IMPEDIMENTS THAT COULD DAMAGE THE CURTAIN OR IMPAIR ITS EFFECTIVENESS TO RETAIN SEDIMENT. ALL MATERIALS SHALL BE REMOVED SO THEY CANNOT ENTER THE WATERBODY.
4. MAINTENANCE: THE TURBIDITY CURTAIN SHALL BE INSPECTED DAILY. ANY DAMAGED SECTIONS SHALL BE REPAIRED OR REPLACED IMMEDIATELY. IT IS NOT NORMALLY NECESSARY TO REMOVE SEDIMENT DEPOSITED BEHIND THE CURTAIN; HOWEVER, WHEN DETERMINED BY THE ENGINEER TO BE NECESSARY, REMOVAL SHALL BE DONE BY HAND PRIOR TO REMOVAL OF THE BARRIER. ALL REMOVED SILT SHALL BE STABILIZED IN UPLAND AREAS AWAY FROM THE WATERBODY. THE BARRIER SHALL BE REMOVED SLOWLY AND BY CAREFULLY PULLING IT TOWARD THE CONSTRUCTION SITE TO MINIMIZE THE RELEASE OF ATTACHED SEDIMENT.

COFFERDAM

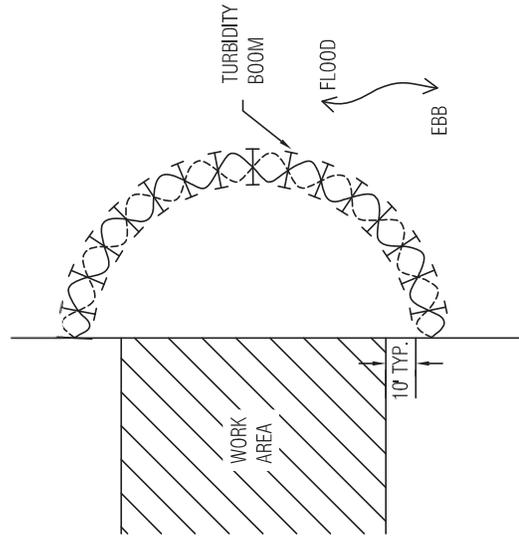

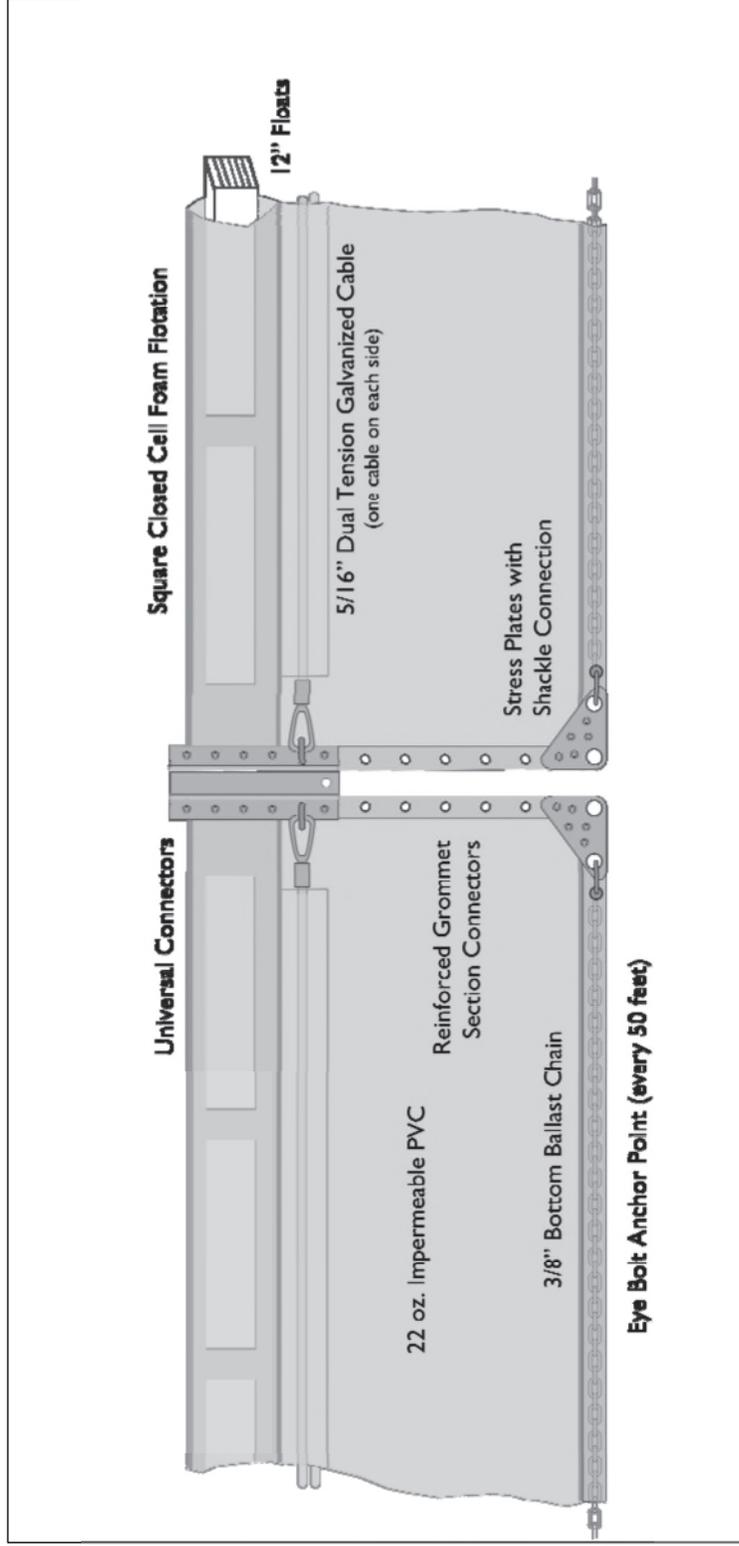

1. DESIGN CRITERIA: NO CONSTRUCTION ACTIVITY SHALL COMMENCE IN THE AREA OF THE COFFERDAM UNTIL IT IS COMPLETED AND STABILIZED. COFFERDAM STRUCTURES SHALL BE SIZED AND INSTALLED IN ACCORDANCE WITH THE MANUFACTURERS RECOMMENDATIONS. TOP OF COFFERDAM SHOULD BE CONSTRUCTED TO ALIGN WITH TOP OF EXISTING PILE CAP.
2. MAINTENANCE AND INSPECTION: ALL COFFERDAMS WILL BE INSPECTED DAILY TO ASSURE PROPER PERFORMANCE AND STABILITY. ANY UNDERMINED OR SETTLED AREAS SHALL BE RESTORED IMMEDIATELY. ANY HOLES, LEAKS, OR TORN AREAS IN THE GEO-MEMBRANES OR FABRIC SHALL BE REPAIRED IMMEDIATELY. ANY SHIFTING, MOVEMENT, OR SETTLING OF THE COFFER DAM SHALL BE ADDRESSED IMMEDIATELY. INSPECT THE INTERIOR DEWATERING SYSTEM AND ENSURE THAT THE SYSTEM IS DISCHARGING CLEAN WATER, OR IS BEING PUMPED TO APPROPRIATE SEDIMENT CONTROL FACILITY PRIOR TO RETURNING TO THE WATER RESOURCE. REPAIR OR REPLACE ANY LOSS OF ROCK RIPRAP OR FILL THAT MAY OCCUR AND ASSURE THE TOP OF THE COFFER DAM IS LEVEL WITHOUT ANY LOW SPOTS DUE TO SETTLING.
3. UPON COMPLETION OF THE CONSTRUCTION WORK, REMOVE ALL EXCESS MATERIAL, ACCUMULATED SEDIMENT AND DEBRIS FROM THE WORK AREA, AND REMOVE THE COFFERDAM IN ACCORDANCE WITH THE SITE STABILIZATION PLAN.

FIREBOAT HOUSE TYPICAL SECTION

**A** EXISTING FIREBOAT HOUSE PLATFORM  
P-58 SCALE: 1" = 5'-7/8"

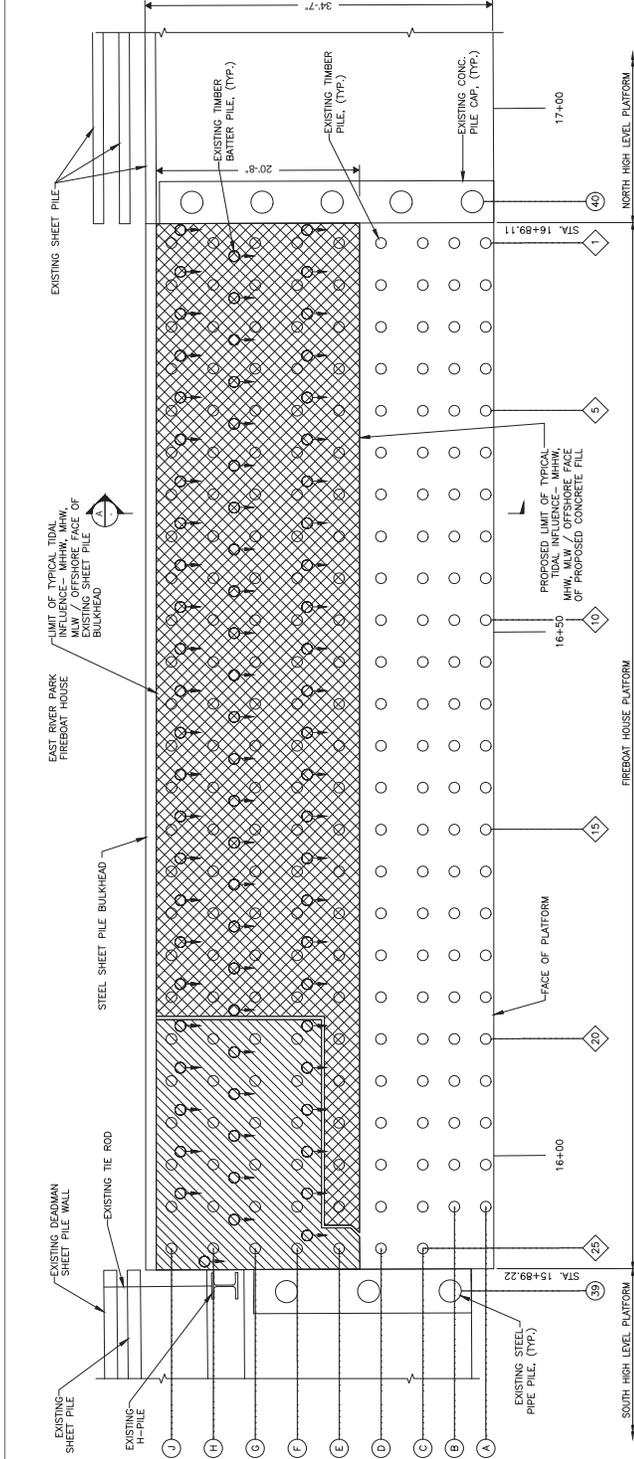

NOTE: TIMBER FENDERS AND FIREBOAT HOUSE FOUNDATION NOT SHOWN FOR CLARITY

NOTES:

- ADJACENT PILES NOT SHOWN FOR CLARITY.
- OUT LENGTH OF THE EXISTING TIMBER PILES SHALL BE THE GREATER DIMENSION IN EITHER DIRECTION FROM THE CENTERLINE TO SOUND TIMBER. SOUND TIMBER SHALL BE WHERE MINIMUM 10" PILE DIAMETER EXISTS AND GREATER THAN 90% CROSS-SECTION REMAINS, OR WHERE 8" PILE DIAMETER EXISTS WITH 100% REMAINING CROSS-SECTION (TO BE VERIFIED BY OWNER'S REPRESENTATIVE). TRIM OAK WEDGES AS NEEDED TO MAINTAIN MINIMUM CLEARANCE OF 1-1/2" FROM INSIDE OF FIBERGLASS FORM.
- CONTRACTOR TO TRIM EXISTING PILE AS NECESSARY TO INSTALL GALVANIZED STEEL FISH PLATES FLUSH BETWEEN THE EXISTING PILES. THE FISH PLATES SHALL BE PLACED BETWEEN THE EXISTING PILES SMALLER THAN THE COMPOSITE PILE. OAK SPACER BLOCKS SHALL BE PLACED BETWEEN THE EXISTING PILE AND FISH PLATES TO MAINTAIN A FLUSH CONNECTION WITH THE COMPOSITE PILE.
- CONTRACTOR TO TRIM EXCESS PROJECTING PORTION OF GALVANIZED BOLTS, IF NECESSARY, TO ACCOMMODATE THE RIGID FIBERGLASS FORMWORK WITH A MAXIMUM ANNULUS OF 3" INCHES.
- CONTRACTOR SHALL PRE-INSTALL A PLUG FORM INSIDE THE COMPOSITE PILE AND FILL THE COMPOSITE PILE WITH CEMENTITIOUS GROUT, TO A MINIMUM ELEVATION OF 1 FOOT ABOVE THE EXISTING PILE TOP. CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING MEANS AND METHODS TO PLACE FILL AND ALLOW EXCESS WATER TO FLOW OUT FROM INSIDE THE COMPOSITE PILE.
- PUMP PORTS MUST BE CAPPED AFTER EPOXY PLACEMENT. CONTRACTOR TO PROVIDE MEANS AND METHODS FOR MATERIAL PLACEMENT.
- THE BOTTOM ELEVATION OF THE FIBERGLASS FORMWORK AND EPOXY GROUT FILL SHALL EXTEND 1 FT BELOW THE BOTTOM BOLT OF THE SPALICE CONNECTION. THE FORMWORK AND EPOXY GROUT FILL SHALL ALSO EXTEND NO LESS THAN 2 FT BELOW THE EXISTING MUDLINE ELEVATION. THE DEPTH OF EXCAVATION SHALL BE DETERMINED BY THE ELEVATION OF SOUND TIMBER AT EACH REPAIR LOCATION.
- PER UNDERWATER INSPECTION, SOILS NEAR THE MUDLINE ARE COMPOSED OF A MIX OF HARD SOILS AND STONE WHICH MAY BE PRESENT AT THE BOTTOM OF THE EXCAVATION. CONTRACTOR SHALL EXCAVATE AND BACKFILL THE SITE TO THE ELEVATIONS AND LIMITS SHOWN AND AS NEEDED TO MEET THE REQUIREMENTS OF CONSTRUCTION.
- EXISTING TIMBER DECKING DIRECTLY ABOVE THE EXISTING TIMBER PIER CAP IS TO REMAIN. TIMBER DECKING IN LOCATIONS WHERE TIMBER PILE CAPS ARE TO BE INSTALLED IS TO BE REMOVED.

(NO TEXT ON THIS PAGE)

Addendum	Addendum Question No.	Bidder's Question	Response
4	1	Volume 1 of 3 Bid Booklet; page A-8; OTHER; 3. PK-ESCR 025, PK-ESCR 099. These items are not located in the contract bid schedule but mentioned in the special experience requirements. Please provide direction.	Refer to Addendum 3, Article 3. The references are to Section numbers, not item numbers. The Bidder's attention is drawn to Article (C) on Bid Booklet page A-14R.
4	2	Volume 1 of 3 Bid Booklet; page A-8; OTHER; 8. PK-ESCR 653. This item requires special experience for installation at the southern M&O canopy. Will the same the qualification be needed in the northern canopy?	Refer to Addendum 3, Article 3. The references are to Section numbers, not item numbers. The Bidder's attention is drawn to Article (C) on Bid Booklet page A-14R.
4	3	Volume 1 of 3 Bid Booklet; page A-8; OTHER; 9. PK-ESCR 928. This item is not located on the contract bid schedule but mentioned in the special experience requirements. Please provide direction.	Refer to Addendum 3, Article 3. The references are to Section numbers, not item numbers. The Bidder's attention is drawn to Article (C) on Bid Booklet page A-14R.
4	4	Volume 1 of 3 Bid Booklet; page A-8; OTHER; 11. 572.0002NN01. This item is not located on the contract bid schedule but mentioned in the special experience requirements and located in the special bridge specifications. Confirm where the cost of the metalizing is carried.	The references are to Section numbers, not item numbers. Please refer to the specification in the BRIDGES-Pages for payment information. The Bidder's attention is drawn to Article (C) on Bid Booklet page A-14R.
4	5	Volume 3 of 3 Bid Booklet; Building specifications; Section 01 11 00 Summary of Work; page BLDG-1; Summary of work. Bulletins (d) and (e) are two buildings, not on the bid schedule. Is this work required for the contract?	Both M & O Areas 2 and 3 Buildings shall be paid under lump sum Item no. PK-ESCR 049
4	6	Volume 1 of 3 Bid Booklet; page A-11; OTHER; 45. Buildings pages – Section 28 46 00. This item is not located on the contract bid schedule but mentioned in the special experience requirements. Please provide direction.	The references are to Section numbers, not item numbers. The Bidder's attention is drawn to Article (C) on Bid Booklet page A-14R.
4	7	Volume 1 of 3 Bid Booklet; page A-11; OTHER; 49. PC -pages Section ESCR 50.61 and 50. PC -pages Section ESCR 50.61. These items are not located on the contract bid schedule but mentioned in the special experience requirements and located in the parallel conveyance specifications. Will micro-tunneling be paid under other items?	The references are to Section numbers, not item numbers. The Bidder's attention is drawn to Article (C) on Bid Booklet page A-14R.

Addendum	Addendum Question No.	Bidder's Question	Response
4	8	Volume 3 of 3; Highway special provisions; B.15 Us Army Corps of Engineers Requirements; Paragraph D; Please provide a list of ESA-listed species that will affect pile driving operations, along with date restrictions.	Winter Flounder: Avoid installing cofferdams between January 15 and May 31. Migrating anadromous fishes (shad and herring): Avoid pile driving, sheetpile installation, and other in-water construction activities occurring outside of the cofferdams from March 1 to June 30.
4	9	No reinforcing details are provided for the transition walls shown on drawings F850 to F857. Drawing F857 Note 3 refers to F852 for reinforcing, but F852 is "intentionally left blank." Please provide details.	Drawings F852A and F857A have been added. Refer to Addendum 2, Article 2.
4	10	Under general notes, the contractor is to work with outside utility companies for protection and relocation. Will we receive the utility agreements and coordination schedule for any work associated with these utilities?	Please refer to the JB-Pages in Volume 3.
4	11	Contract drawing DS104 (SHT 1180) has conflicting direction, at the bottom of the sheet just right of the Segment 1 and Segment 2 match line there are two (2) notes that state "48" Branch Interceptor (RCFT) to be abandoned in place (69 LF)" but the line designation is indicating abandonment and removal. Please clarify what is to be done with their run of pipe.	The callouts for abandonment/removal have been revised.
4	12	What depths are required for Pre-Drilling Holes for Piles? It states below existing utilities on Delancey Street Bridge drawings, but inverts of existing utilities are not present.	Please refer to the utility plans for invert elevations. The plans (including BT133) call out that pre-drilling is to be performed 10 feet below the bottom of the utility.
4	13	Pile tables for the Delancey and East 10th Street pedestrian bridges are blank. Steel pile details in each bridge dictate the estimated pile tips, but the locations are vague. Please provide accurate estimated pile tips for these locations.	The referenced pile tables for Delancey Street and East 10th Street are intended for As-Built purposes. The actual pile tip elevations will be added after construction. The pile tables on the Steel Pile Details dwg BT133 and BD141 provide the estimated pile tip elevation information and notes clearly which piles are being referred. Drawing BD 141 has been revised with estimated pile tip elevations for the staircase footings. Refer to Addendum 4, Article 3.
4	14	What depths are required for Pre-Drilling Holes for Piles? It states below existing utilities on East 10th Street drawings, but inverts of existing utilities are not present.	Please refer to the utility plans for invert elevations. The plans (including BT133) call out that pre-drilling is to be performed 10 feet below the bottom of the utility.

Addendum	Addendum Question No.	Bidder's Question	Response
4	15	Please provide details of the Montgomery Street roller gate seepage wall	See revised drawing FG110 for details on the concrete seepage wall. Refer to Addendum 4, Article 3.
4	16	Please provide details of the FDR Swing gate seepage wall	See revised drawings FG200, FG209, & FG210 for concrete seepage wall details. Refer to Addendum 4, Article 3.
4	17	Please provide details of the East 14th roller gate seepage wall	See revised drawing FG274 for seepage wall details. Refer to Addendum 4, Article 3.
4	18	Sheeting required for the Comfort Building at East 10th Street. Will contractor be responsible for the design? Will ties rods installed under a previous stage interfere with the proposed foundation? Is any SOE required for this building paid under the temporary sheeting item or under the building item?	The support of excavation (SOE) for the Comfort Building is the Contractor's means and methods, and the Contractor is responsible for the sheeting design. The H-piles should not interfere with ties. All SOE required is included the lump sum building item.
4	19	Sheet 2575 stipulates piles are spaced at 8-0 OC, while pile locations are provided in pile layout plan. Please clarify.	Please follow pile layout plans with tabulated northings and eastings.
4	20	Refer to Drawings BT-142 thru BT-151, Sheets 392 thru 401 of 2791. No details for this structure are provided for the connection of the bottom lateral braces to the end floor beams and to the arch rib knuckle. Should we use similar connections as shown in Detail 2 and 3 on Drawing BC-128 Sheet 138 of 2791?	The similar details shown on sheet BC-128 should be used.
4	21	Refer to Drawings BD-153 thru BD-162, Sheets 280 thru 289 of 2791. No details for this structure are provided for the connection of the bottom lateral braces to the end floor beams and to the arch rib knuckle. Should we use similar connections as shown in Detail 2 and 3 on Drawing BC-128 Sheet 138 of 2791?	The similar details shown on sheet BC-128 should be used.
4	22	On Drawing BD-167 sheet 294 of 2791 and Drawing BT-156 Sheet 406 of 2791 the radial heights of the arch rib are missing. Will the owner please provide them?	All the information to generate the arch geometry is provided with the equation of the parabola and beginning and end depths.

Addendum	Addendum Question No.	Bidder's Question	Response
4	23	The 2 draft OCMC permits for FDR each refer to a different limit and timeframe for full FDR closures. Please confirm that these two permits are exclusive of each other, and that the 10-hr closures on permit dated April 2, 2020 will not count towards the 3 times limit on permit dated April 21, 2020.	Confirmed.
4	24	Please provide the missing contract drawings PH001 - PH021	Refer to Addendum 2, Articles 1 and 2.
4	25	We found some discrepancies on the work permit schedule between the NY DOT and the schedules shown in the drawing TC100 for the FDR drive ROW. Which one is prevailing?	NYCDOT traffic stipulations control.
4	26	According to the different phases shown in the MPT plans (dwgs TC 100 to TC198) we are asking you if the Contractor is allow to work in more than one phase at the same time or it needs to complete the work till the final configuration, within the phase, before to start on the next ones?	Yes. See Sheet TC100, Note 6.
4	27	Drawing TC100 general notes. In the note 24, the item 7.13 paid the repair of any asphalt damaged pavement as well as the item 6.70 mentioned in the note 28. Can you clarify where the temporary asphalt has been paid?	Note 28 refers to the repair of damaged pavement markings, not temporary asphalt.
4	28	Can you clarify if the snow removal is paid under the item 7.13 or under the specification item Escr 7.13 SI Control of snow and ice condition?	Section ESCR-7.13.2.C in the GENERAL SPECIAL SPECIFICATIONS describes the locations for control and removal of snow and ice conditions for public areas in open parks. All other snow and ice removal is covered under Item 7.13 B.
4	29	Reference Site Demolition Drawings PDS002, PDS103, PDS104 and others. These drawings fail to show the complete westward Limit of work. Kindly clarify.	The westward limit of work can be found in the BC (Corlears Hook Bridge), BD (Delancey Street Bridge), and BT (10th Street Bridge) series.
4	30	Reference Drawings PDT100. Kindly clarify the note "Pier 42 (By others). Kindly clarify. We interpret this note to mean Pier 42 Contractor will "protect in place".	All trees within the project limits that are installed under the separate Pier 42 work will need to be protected in place as part of the SANDRESM1 project.
4	31	Please provide Milestone Drawings ARM001-ARM011 as we do not see these in the current bid documents provided	Refer to Addendum 2, Articles 1 and 2.

Addendum	Addendum Question No.	Bidder's Question	Response
4	32	Please provide NYC Parks Standard Details as we do not see these in the current bid documents provided	Refer to Addendum 2, Articles 1 and 2.
4	33	Please provide Appendix A: Signed & Sealed Project Survey as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	34	Please provide Appendix A: FEDERAL PROJECT CONSTRUCTION OF SEWERS EAST RIVER DRIVE E.10TH ST. TO E.11TH ST. AND AT FOOT OF EAST 11TH STREET EAST RIVER DRIVE TO THE BULKHEADLINE as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	35	Please provide Appendix A: BRANCH INTERCEPTOR MANHOLES CONTRACT NO.4 SOUTH BRANCH INTERCEPTING SEWER-EAST SIDE MANHOLES PLANS AND SECTIONS SHEET 58 OF 71 as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	36	Please provide Appendix A: CONTRACT NO.4 SOUTH BRANCH INTERCEPTING SEWER-EAST SIDE EAST 10TH STREET - AVE. D TO EAST RIVER PARK PLAN AND PROFILE SHEET 24 OF 71 as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	37	Please provide Appendix A: STRUCTURAL REFERENCE CONTRACT NO.4 SOUTH BRANCH INTERCEPTING SEWER - EAST SIDE, MANHOLE 23, PLANS AND SECTIONS SHEET 57 OF 71 as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	38	Please provide Appendix A: RECONSTRUCTION OF THE PROMENADE AND LANDSCAPE FROM JACKSON STREET TO EAST 14TH STREET, BETWEEN THE FDR DRIVE AND THE EAST RIVER, IN EAST RIVER PARK, BOROUGH OF MANHATTAN as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	39	Please provide Appendix A: THE PARTIAL RECONSTRUCTION OF THE FIRE BOAT HOUSE LOCATED OPPOSITE GRAND STREET BETWEEN THE F.D.R. DRIVE AND THE EAST RIVER IN EAST RIVER PARK, BOROUGH OF MANHATTAN as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.

Addendum	Addendum Question No.	Bidder's Question	Response
4	40	Please provide Appendix A: THE RECONSTRUCTION OF THE BULKHEADS AND RELIEVING PLATFORMS FROM JACKSON STREET TO 14TH STREET BETWEEN THE FDR DRIVE AND THE EAST RIVER, IN EAST RIVER PARK(2013) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	41	Please provide Appendix A: THE RECONSTRUCTION OF THE BULKHEADS AND RELIEVING PLATFORMS FROM JACKSON STREET TO 14TH STREET BETWEEN THE FDR DRIVE AND THE EAST RIVER, IN EAST RIVER PARK (2004) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	42	Please provide Appendix A: EAST RIVER DRIVE IMPROVEMENT FROM MONTGOMERY STREET TO GRAND STREET (1940) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	43	Please provide Appendix A: 1940 CROSS SECTIONS OF BULKHEAD as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	44	Please provide Appendix A: BULKHEAD WALL AND SEWER CONSTRUCTION, DREDGING AND FILLING - EAST RIVER DRIVE (1937) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	45	Please provide Appendix A: BULKHEAD WALL AND FILLING - EAST RIVER DRIVE (1938) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	46	Please provide Appendix A: RELOCATION OF 345 KV FDRS (2003) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	47	Please provide Appendix A: CONSTRUCTION OF SEWERS IN EAST RIVER DRIVE E. 11TH ST TO E. 13TH ST. (1935) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	48	Please provide Appendix A: CONSTRUCTION OF FRANKLIN D. ROOSEVELT DRIVE STATE HIGHWAY 91-4 (1995) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	49	Please provide Appendix A: EAST RIVER RELIEVING PLATFORM - PILE DRIVING LOGS (2005-2010) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.

Addendum	Addendum Question No.	Bidder's Question	Response
4	50	Please provide Appendix A: DYNAMIC LOAD TEST (2005-2009) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	51	Please provide Appendix A: CON EDISON SLEEVE DETAILS AND METHOD OF SEALING H.P. CABLE PIPE as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	52	Please provide Appendix A: RECONSTRUCTION ON FDR DRIVE - AVENUE C VIADUCT E. 18TH STREET TO E. 25TH STREET STATE HIGHWAY 93-4 (2000) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	53	Please provide Appendix A: PLANS FOR RECONSTRUCTION OF A PORTION OF THE CITY OF NEW YORK: FRANKLIN D ROOSEVELT DRIVE (SOUTH ST. VIADUCT) (1980) as we do not see these in the current bid documents provided	Refer to Addendum 3, Article 3.
4	54	The span lengths for the Esplanade Deck that are shown on the girder framing plan on sheets 855 thru 862 do not match with the span lengths that are shown on the structural elevation drawings on sheets 836 thru 847 and they also do not align with the girder beam detail tables on sheets 929 thru 934 of 2791. Also the pier numbers are blank on some of the girder framing sheets and the pier numbers that are labeled do not seem to match with the pier numbers on the structural framing elevation. Please clarify.	Drawing series WS520, WS450, along with WS700 to WS707 and WS660 to WS667 have been revised. Refer to Addendum 4, Article 3. Please note that span lengths are measured between the adjacent pier centerlines along the construction baseline (as defined in WS510). Beam length starts 3" MIN from pier centerline (see SHEETS WS660 THROUGH WS667)

Addendum	Addendum Question No.	Bidder's Question	Response
